Categories: 3rd installment, Needs Redaction

Dean,

Thanks for the updated information. I have included Susan Forsythe in this email (she is the new SERC representative from the Washington Emergency Management Division).

Thanks again.

Stay Safe,

William (Bill) Whealan

Subject: Updated Federal Explosives Licensees/Permittees Contact Information

Hi Bill and Charma,

Pursuant to discussions in conjunction with Executive Order 13650, "Improving Chemical Facility Safety and Security," the Bureau of Alcohol, Tobacco, Firearms and Explosives (ATF) is providing contact information for Federal explosives licensees and permittees (FELs) in each SERC's geographic area. This email serves to provide you with updated contact information collected during ATF inspections conducted from October 1, 2018 through March 31, 2019.

This plan was developed partially in response to concerns voiced by explosives industry associations emphasizing the need for more frequent and regular contact with local authorities. As noted in recent SERC updates, this information is being disseminated directly to SERC points of contact with the expectation that the information will be further disseminated to first responders and appropriate LEPC members to (1) help establish relationships and facilitate better communication between these local responders and the FELs in their areas; (2) provide important information to local responders for emergency planning and response purposes; and (3) enable local authorities and FELs to develop training for emergencies involving the explosives plants and storage facilities.

Please feel free to contact me if you find certain vital contact information (email addresses and phone numbers) missing from the attached spreadsheet. Thank you.

Dean
