This is what we used to “menu” the tech, but it came right before budget was due, so we gave some lump sum and some ongoing. I’ll trust Kimmie on ongoing vs one-time but I thought it was the other way around. The breakdown will be visible in the POL reconcile.

Sorry - working from my phone here but can follow up with more detail tomorrow when I’m in front on a computer. The deck here has their entire request, including Prop E things on page 13, 19, and 20.

There was importance behind auto-transcription at some point, directed to fund by MLB as Chief Scott prioritized. There was also funding for camera continuity. I’ll send you those screenshots separately on Teams now.

The rest, to a large extent, was left to the Policy team and the Department to prioritize. In the budget, the only description is “Prop E Technology Pilot”, so we could say it funds whatever we want to say it funds.. something along the lines of “police will consider new technologies and implementation of x, y, z (all the things listed on those slides).

I am sure we will discuss. AND, my apologies for not making that 4pm cutoff. Finalizing some numbers with Admin Bureau and AC ops.

Thankyou!  
Catherine
