Subject: RE: Speed Spy for Fisher Rd.

Elaine,

I have spoken to LT. Akers and LT. Bard regarding the request. We will get this setup as soon as we can.

Thanks,

Lonnie

Subject: RE: Speed Spy for Fisher Rd.

That intersection would be East Ridge Street, to avoid confusion with East Ridge Road a couple of blocks up the hill.

Subject: Speed Spy for Fisher Rd.

Good Morning Lonnie,

The Town Manager has requested that a speed spy be set up on Fisher Rd. for a one-week period of time. The purpose is to capture data regarding vehicular traffic headed south (downhill) on Fisher

Rd. in the vicinity of the Pendleton Farm, at the intersection of West Ridge or just south of that location. We understand that there are not many locations to set up the car/speed spy on that route. Chris mentioned that Mr. Bill Scott may be willing to let us put the equipment in his driveway and is willing to ask on our behalf if needed (please let Chris know if you need this assistance).

As background information, the reason we are looking into this relates to the regular complaints by citizens who live on this route and the concern of at least one town council member that we may need to install traffic calming device(s) on Fisher Rd.. The purpose of the speed spy is to better analyze traffic speeds so that we can consider next steps. If possible, can you do the speed spy study in the next two weeks? If not please let us know when you could accommodate this request.

Thank you in advance for your assistance. I copied our team in the event that they can add additional information.

Warm Regards,

Elaine R. Holeton, AICP, CFM, CZA
Assistant Town Manager
Town of Wytheville, VA
