Provide justification for the equipment requested.

CyclopsX360CN is the surveillance system. This is a compartment that houses multiple cameras, with different capabilities, that provides 360 coverage.

CyclopsX360CN Pole Platform 12' is the platform that supports the CyclopsX360CN System.

Internet CTG Circuits will provide wireless access to enable law enforcement to access these systems remotely in real time. Remote access will make it easier for our investigators to access these videos, our analyst will also have quicker access to forensically analyze these videos. Furthermore, our narcotics investigators will be able to utilize these cameras where drug trafficking is a problem. Logging into the camera live time will allow for easier surveillance operations.
