All City phones are under control of Maas360, a Mobil Device Management system, which in turn is managed by City TID. The Police Department has several profiles within Maas360 system which dictate what mobile applications are available to the end users. All applications that are approved for LBPD phones have gone through a lengthy approval process that include input from the Chief of Police, City Attorney's Office, City TID, and the City Manager's office. There is no list of banned applications, any unapproved applications would be addressed as we become aware they are installed on Department issued phones. Per City TID here is a current list of all the nonstandard applications that are approved under the Maas360 system LBPD profiles:

SEQ	App Names
1	1Password - Password Manager
2	10-21 Police Phone
