Here's an updated draft. I thought I had sent it but it was sitting in my draft emails.

Problem sites identified by Dave and Patrick
It includes waste facilities (places that accept garbage – all the one's on Noah's map are here)
Recycling facilities (all types) – several shown in NBIC some may not be there any longer
TDL facilities based on my research an on preliminary data from AREA (facilities built, planned or under construction since 2000 and 200K s.f. or more)
Intermodal facilities
