b7E

One of our system administrators has been trying to determine what happened. He found new accounts on some of our machines and some hidden files on those accounts. Some of these are the same programs we found in association during CYBERSNARE. Source code for one of the newer programs, a file called [redacted] appears to be an automated TCP SYN flooding attack.....

D Exercise

¹ Operation CYBERSNARE is part of the Mercury Project, a joint operation conducted by federal law enforcement personnel and telecommunications industry personnel.

² If [redacted] source code is requested, provide SYN flooding code from Internet.
