Mason Craig Turner

is a member in good standing with the USAF MARS program. Member agrees to operate the station in accordance with all appropriate Air Force regulations and instructions.

Issued /Expires dates

AFMARS Form AF3666 JAN 2013

Welcome to the USAF Military Auxiliary Radio System – MARS. MARS has played a significant role in Air Force emergency communications support since its inception in 1948. Prior to that, the Army Amateur Radio Service (AARS), its predecessor, was in existence since 1925. We are very proud of our MARS program and of the dedicated affiliate members who participate in it.

Your MARS call sign is shown above. It is valid as long as you reside in the present MARS geographical area. You may use this call when you are temporarily in a different part of the country; however, should your residence (station location) change and your new station location falls in a different MARS region, a new call sign indicating the new region will be provided.

Again, welcome to the program. We are pleased to have you with us.
