Importance: High

Evening Sheriff,

Hope this finds you doing well. My team and I saw you speaking on the news today and we would like to offer our support to get you and the people of New Jersey some answers.

Attached is thermal imaging of a drone in-flight from my thermal HUD during a recent mission in Texas where cartel "ghost" drones were flying in US Airspace. The ability to triangulate and interrogate an airborne object from the ground is not all that complicated with the appropriate training and technology. This is something that we have been training agencies to do since the creation of our international public safety UAS best practice program in 2018. You and I first spoke about this potential for chaos in Louisville years ago at NSA.

Apart of our team are 2 of the 7 people to ever be granted FAA flight authorization to fly Group 2+ UAVs in NJ Airspace. We can bring to bear a rapid intervention capability to interrogate this issue. All personnel and assets would come from US-trusted manufacturers (e.g. DoC and DoD recognized). To date no one has called any of us to address this matter which is why I would be grateful for your attention.

Please let me know if there is anything we can do, and I would be happy to come speak with you in person to answer any questions.

Josh

Best Regards,

Joshua K. Brown, MAIS
