Air Bear Goes to Pennsauken

By Barbara Harris-Para

The FAA Air Bear, Rosanne Weiss, and Barbara Harris-Para participated in the yearly "Space Day" at Carson Elementary School. "Air Bear" welcomed more than 200 students in kindergarten through second grade to a session on aviation.

The video, "Air Bear Goes on a Trip," was shown to the students. Barbara Harris-Para offered explanations about airplanes, airports and pilots. She asked the students if they had ever flown on a plane before, where they had gone if they had flown before, and if they remembered meeting the airport people they saw in the video.

The entire day was very productive with lots of hugs and smiles from the students for Air Bear. The children were provided coloring books and other materials they could use when they got back to their classrooms.
