I. DEFINITIONS

A. In this agreement:

1. **“Data Governance Council”** shall mean the decision-making body, consisting of Employees of Data Trust Members that are state agencies selected by the Executive Data Board, which ensures that the development and deployment of the data trust adheres to the data, technical, and acceptable use specifications outlined in exhibits attached hereto, in addition to managing, monitoring, and sustaining the data trust.
2. **“Data Governance Council Representative”** shall mean the individual employee of a state agency Data Trust Member selected by the Executive Data Board to the Data Governance Council.
3. **“Data Trust”** shall mean the Trustee, Data Trust Member, and other Data Trust Members which collectively form the Data Trust as constituted in this Data Trust Agreement.
4. **“Data Trust Member”** shall mean an organization that has been approved to participate in the data trust and being a party to the Data Trust Agreement. Data Trust Members may include private companies, non-profit organizations, philanthropic and governmental entities, and community and/or advocacy groups as determined and approved by the Trustee.
5. **“Data Trust Member-Contributed Data Resources”** shall mean any data owned by or stewarded over by Data Trust Member or other Data Trust Members provided to the Trustee for use by the Data Trust, designated as Tier 0, Tier 1, Tier 2 or Tier 3 data, and described in Exhibit B or on the Data Trust electronic metadata registry. No Tier 4 data shall be knowingly incorporated into the Data Trust.
6. **“Data Trust Member-Owned Data Resource”** shall mean any data owned by or stewarded over by Data Trust Member or other Data Trust Members.

12. **“Tier 1 Data”** shall mean data that is not protected from public disclosure or subject to withholding under any law, regulation, or contract. Nevertheless, publication of the dataset on the public Internet and exposure to search engines would: have the potential to jeopardize the safety, privacy, or security of a person who may be identified through use of the data; requires subjective redaction to classify the data as Tier 0 data; impose an undue financial or administrative burden on the Data Trust Member; or expose the Trustee or Data Trust Member to litigation or liability.

15. **“Tier 4 Data”** shall mean sensitive or proprietary data where the unauthorized disclosure could potentially cause major damage or injury, including death, to entities or individuals identified in the information, or otherwise significantly impair the ability of the Data Trust Member to perform its statutory functions. Tier 4 Data includes any dataset designated by a federal agency at the level “Confidential” or higher under the federal government’s system for marking classified information.
16. **“Trust-managed Data Resource”** shall be any data resource, including transformed data, generated by the combination of one or more Data Trust Member-contributed Data Resources and managed on behalf of the Trust by the Trustee in support of the agreed upon goals of the Trust, or one or more of the Approved Projects and Uses.
