Subject: Homeless lady on Noriega

Hi John,
As I mentioned to you by phone.. There is a homeless woman who has come and gone for the last 15 years. But on this occasion she has stayed for the long run. There is human waste all over the sidewalk and the smell is horrendous. People can no longer walk on sidewalk and instead are forced to walk through the street to avoid walking past the smell and stepping on the all waste. It is completely out of control and affecting the local businesses and residents, including us. I am expecting a visit from an insurance company from Spain and we will be very ashamed and embarrassed to have them visit and walk past the human waste and aggressive woman on the street. We would greatly appreciate any and all help in assisting us in keeping the street safe and sanitary.

Thank you,
George Bourekas
