Hi Donna

Camp move Trails can be up to 24 feet wide. We typically don't pull all the strings on the same trail as previous string. We move slight to the side or alternate back and forth to ensure we don't have any damage.

Receiver trails will be approximately 9 feet wide and source trails will be 12 feet wide. See below for table showing track contact area.

Please let me know if you have any further questions.

Subject: Quick Question

Good Morning Sue,

Would you tell me the width of the receiver trails, width of source trails and the width of the camp move trails?

Thank you so much,

Donna
