Subject: RE: Internet Speed / WIFI speed in Internet

Todd,

The short answer is that this is a matter for Spectrum and AT&T. The city of Oakwood has no power or control over these private companies and how they plan/execute their business operations. I can imagine that it is quite challenging for these internet service providers to keep up with demand. I can also imagine that there are many households in Oakwood, and in our neighboring suburbs, that have high service demand, as your family obviously does.

Below is contact information for a person at Spectrum (Charter). Jason should be able to talk to you about any plans they have to improve services in the area.

Jason A. Kershner | Director, Government Affairs

O: 513.386.5068 C: 513.535.9330

11325 Reed Hartman Hwy., Suite 148 | Cincinnati, Ohio 45241

E: Jason.A.Kershner@charter.com

I am seeking a similar contact with AT&T and will forward that once I have it.

The city does not have the power to refuse to allow a company to improve their internet service. The contact from AT&T should be able to specifically address this with you.

That all said, a third internet service provider (Point Broadband) is making plans to build a fiber optic network in several communities around the Dayton area, including Oakwood. It is expected to take 2-3 years to complete the project. This obviously does not help you in the short term, but should make a difference down the road when we have three companies competing for the business.

Subject: Re: Internet Speed / WIFI speed in Internet

Hello,

I live at 120 Spirea Drive in Oakwood.

My wife is self-employed.

We have 2 college age kids attending school and meeting online.

We have 2 younger kids who play video games and also did online school / learning last year.

My work lets me work from home often as well.

The issue is the fact that we cannot get a stronger web/wifi/internet speed at our address.

We tried the most expensive package with Spectrum and it was terrible.

We currently have ATT and it is better but not good.

In investigating how and why our speeds are so poor, I came across ATT Fiber. I tried to upgrade to this level of service and was told it was not available at my address. Apparently it is available for parts of Oakwood but not my house.

So I wanted to check this out and eventually someone told me that only part of Oakwood can get Fiber because the city refused to allow it.

Now, I am smart enough to take that with a grain of salt but I would love to hear why in 2021, in an affluent city that has very high property taxes and great schools - I can't seem to get high speed fiber internet for my family.

Can you please provide your thoughts on this situation? Is it an Oakwood issue? Is it an AT&T issue? Little of both?

I greatly appreciate your thoughts and feedback.

Thank you very much!

todd

Met with Dave, Karen and Brian at 11.

There is still water flowing from the pool to the sewer out by the basketball court. Dave has called Drain Tech to come in see if a camera will show anything. In the meantime, Karen is talking with Rob again about his findings last week when he was here last week when Karen was on vacation to possibly add to Rob's comments. Will keep you updated.

Scott,

Hope all is well.

We have successfully addressed the Telford/Aberdeen matter without the need to engage you in the detailed study... but will certainly keep the proposal in the event it resurfaces.

Chris Kuzma, our new staff engineer, starts work next Monday, August 2. Chris is 28. He's a Centerville native and has a BSCE from the University of Toledo. He co-op'ed with CESO from 2012-2015 and was a design engineer there from 2016-2018. He then worked for a private design firm for a year or so in South Carolina, and then most recently with Viox & Viox, Inc in Cincinnati. I think he will be a good addition to our staff.

I will get with you in a couple weeks to see about setting up a time for you to meet Chris and for us to get started on a master plan for our traffic signal system. You had mentioned meeting with the person at ODOT Central Office to discuss possible grant programs. Maybe this is a meeting that Chris can accompany you to.

Anyway, I'll be back in touch soon.

Norb
Agree. Averaging a little more than one crash per year is low. And the trend over the past 3 years is even lower (driver performance is improving).

However, if the primary crash pattern involves on-street parking, you may want to consider countermeasures if you perform a formal study. Reverse angle parking may be a countermeasure if the parking crashes are vehicles backing from a parking space into the travel lane. Reverse angle parking would provide better visibility of conflicting traffic when leaving the space. The city would need to determine if the change is worth the training (and acceptance) required of the public.

Brian, a previous version of the attached document is on the city's website and answers many of the questions you have raised. (The version I am attaching has been updated to change DP&L to AES, and to update the name of the contractor that AES is using. It will be added to our website shortly.)

Sorry, I did not get back with you earlier but I was tied up in meetings this morning.

Aside from that, here are a few additional answers to your other questions:

1. The city does not always know which contractor may be performing work for AES on a given day. AES has an annual permit for its right-of-way facilities that covers all maintenance work, whether it is performed by AES employees or contractors. Right now it is Fitzwater that is in the community trimming trees.

2. Regarding trees between the sidewalk and curb, they are owned by the homeowner although they are located in public right-of-way. It is expected that the homeowner will perform most routine maintenance of those trees, but the city will address dead, decayed, or otherwise unsafe trees in the right-of-way due to their location along public streets and sidewalks.

3. It is possible that property values could be affected by improperly trimmed trees, but the city is not able to quantify or measure that. We encourage property owners to communicate with AES and with the contractor working in their area to clarify expectations in advance of work being performed.

Norb,

I will have to get a list from AES or Fitzwater. The ones I know about now include Kramer, Patterson, West Schantz and Far Hills from Patterson going north.

I have requested a meeting with AES and Fitzwater, their contractor. Yes, I do think the trees could be done better but each time you talk with them, they say they are following PUCO regulations. I have always felt they could do a better job but that is my opinion which I have shared but I have always gotten the same response from DPL and their contractors. In talking to one of the residents on Kramer, the supervisor admitted to her that the trees were not trimmed properly and offered to have them removed which is what they want.

I am not sure who the AES contact is as we have not been notified of the change from DPL to AES. That is one reason I have requested a meeting. Have contacted the Line clearance Department but have not heard anything back yet.

Carol

FACT SHEET: TREE TRIMMING NEAR POWER LINES

Why does AES trim trees near power lines?

The Public Utilities Commission of Ohio (PUCO) requires AES Ohio (AES) to inspect and clear at least 20% of their power lines annually. This is critical to maintain reliable and safe electric power.

How much will be trimmed or cut?

Federal OSHA standards require 10 feet of line clearance. However, that is a minimum standard and does not mean that only 10 feet of material will be trimmed. Trimming is species-specific, taking into account the growth rate of trees and the length of time before trimmers will return to the same area. Typically, limbs and branches will be trimmed to allow at least 12-14 feet of clearance on all sides of power lines. Poles are also cleared from the ground up.

Does AES trim along service drops?

No. Service drops, which are the wire(s) connecting your home to a AES distribution line, are considered the homeowner's responsibility and are not part of AES's line clearance program.

Who does the trimming? What standards do they follow?

AES usually hires private contractors to conduct routine tree trimming. Fitzwater Tree & Lawn Care is currently one of those contractors. Whether trimming is performed by AES or a contractor, they generally follow standards developed by the Tree Care Industry Association (TCIA) and the International Society of Arboriculture (ISA).

How will I know where tree trimming is scheduled to take place?

Work areas may include power lines within public rights-of-way and on private property. The city of Oakwood monitors trimming within public rights-of-way, but has no power to monitor trimming on private property.

- **Public rights-of-way:** Oakwood's City Ordinances require that AES obtain an annual permit to trim trees within public rights-of-way (streets, alleys, sidewalks, tree lawn areas, etc.). The permit requires AES to inform the city of work areas in public rights-of-way.
- **Private property:** When work is planned on private property, AES or their private contractor should provide notice to each affected property owner at least 2 days in advance. Notices are usually hung on the door or mailed, and include contractor contact information. The city is not informed of work areas on private property.

Are tree trimmers allowed to enter my property?

Power lines on private property are usually located in utility easement areas, which gives AES or their contractors the right to enter and maintain those lines. Utility easements are filed with the

Montgomery County Recorder's office, and copies are typically kept by AES. You may also wish to consult an attorney if you have specific questions about your property rights.

What happens to the cut material?

Trees are considered a homeowner's property. Small debris may be chipped and removed by AES's contractor as part of jobsite cleanup, but larger limbs and branches are typically cut, stacked, and left on site for the property owner to use or dispose. Disposal can be done through the city's monthly greenwaste collection, or by dropping off the material in the yard debris dumpster at the Dog Park parking lot.

Who can I contact if I have questions about trimming that will be done on my property?

If you have questions about work at your property, always contact AES's contractor first. They should be willing to meet you at your property to discuss the work. If that does not resolve your concerns, you should contact AES's line clearance department. If you are still unsatisfied with their responses, you can call City Horticulturist Brian Caldwell at (937) 298-0775. The City Horticulturist may be able to influence the manner in which certain trimming is completed, but does not have power to issue orders that conflict with PUCO or OSHA regulations. To file a complaint about utility-based tree trimming, contact the PUCO at (800) 686-7826.

What can I do to prepare for tree trimming?

Homeowners should be certain that they completely understand the work to be done on their property. It is a good idea to take pictures of the trees prior to trimming and discuss with AES or the contractor the trimming that will be done. Most tree trimmers will try to work with customers regarding their concerns with trimming when possible.

What can I do to avoid having AES trim my trees?

Advance planning is key. The following are steps you can take to help avoid having AES trim trees in your yard:

- When planting trees in your yard, select a location away from power lines;
- Check with a nursery about the correct species of trees for planting in the space you have available;
- Trim all trees and bushes that are under and near power lines each year to keep them from growing toward the lines.

For more information about recommended trees to plant and where to locate them in relation to power lines, you may always contact the City Horticulturist at (937) 298-0775.

All: As a reminder, Chris starts work here next Monday, August 2. One of the first things I will have him do is meet with each of you individually for a "get to know you session" and for each of you to share with Chris anything and everything that you think would be good for him to know about your departments/job responsibilities. I will make a brief introduction to each of you as I catch you on Monday morning and will then let you and Chris set the date/time for your one-on-ones.

Rob: Since this is Chris's first public sector job, I would like for you to spend some time with him on what that means... public records, open meetings, transparency, ethics, the media, etc.

Kristi and Judy,

I will be there at 4 pm tomorrow, along with Carol Collins.

I have to say, though, that I am a little nervous about throwing this event together so quickly. Kind of risky, I think.

See you tomorrow.

Got it! Thx for quick reply. I think 4:00 pm should work for most. I'll let you know and thank you again!

Good Morning Leigh Ann,

Thank you for your note. I can do 4 P.M. on Wednesday but I have an appointment after work at 5. Would have to leave Old River by 4:55 at the latest.

Hi Carol

I hope you can join us again for another food truck meeting. Let me know what time works best next Wed late afternoon or early evening for you. Thank you so much for your time yesterday too.

Leigh Ann,

I am available anytime that afternoon or evening but we should have Carol there too. Please coordinate the time with her.

Thanks, Norb

Maybe Laura Connor or Greg Goetz? Someone who knows the Sunday schedule and traffic patterns (for OAKwood United et al). We want to develop the plan for layout of the trucks and vendors and get an idea of capacity.
Thx! (And have a good vacation!)

Hi Norbert and Kyle

Tae was caught in traffic in Cincy and could not get to our meeting today. Kristi, Sam, Carol, Judy and I talked in general terms but we need Tae for input re truck placement and needs. Are you two available next Wednesday 7/28 late afternoon or early evening?

Before we set schedule our next meeting, we want to be sure to have both of you can attend.

Thank you so much for letting me know.

Subject: Well #6 Clearing

Norb,

Our crew is back trimming the electric line from Firwood Drive to well #6 and discovered a large tree down on the line which snapped our pole nearest the bike path where the electric goes overhead to underground. The well still has power. The tree is large and would not have been cleared with the project we are working on (and trying to prevent), but we made a call to Security Fence to provide us a quote to set a new pole and hang our electric line. Clearing continues from the Firwood end, but our crew also cleared the area at the bike path end today so Security can access the pole location.
