<b>HEADLINE</b>	<b>04/13 Teen jailed 1yr for deadly fight</b>
<b>SOURCE</b>	<a href="https://www.kiro7.com/news/local/judge-sentences-teen-who-killed-another-teen-in-a-fight-to-more-than-the-maximum/731973913">https://www.kiro7.com/news/local/judge-sentences-teen-who-killed-another-teen-in-a-fight-to-more-than-the-maximum/731973913</a>
<b>GIST</b>	<p>In a move rarely seen in a Snohomish County court, a judge sentenced a Marysville teen who killed another teen in a fight to more than the maximum penalty for the crime.</p> <p>The judge said the kick to the head that killed 16-year-old Robbie Myrick Jr. and the actions that followed last August were so cruel that the boy responsible deserves a harsher punishment.</p> <p>Myrick -- and the teen we are not naming because he is a minor -- had agreed to the fight in these Marysville woods. The teen admitted to punching Robbie so hard he fell and then kicking him so hard he suffered irreversible brain damage. No one called 911 for at least an hour, including four adults watching the fight.</p> <p>"I pray to God Robbie was not cognizant of being left on the ground like some discarded piece of trash," Robbie's uncle Rod Hampton told the Snohomish County judge Friday.</p> <p>At the teen's sentencing, a shattered family pleaded for the judge to give more than the 30-day maximum sentence for second-degree manslaughter committed by a minor.</p> <p>"The defendant in this case claims he didn't intend to end someone's life. I'd be willing to bet that your average drunk driver who ends up killing someone in an accident didn't get behind the wheel with the intention of killing someone, but if they did they would be charged with vehicular homicide, and they wouldn't be looking at a token sentence of 30 days," Robbie's father, Robert Myrick Sr., told the judge.</p> <p>And the judge agreed -- 30 days is not enough.</p> <p>"He was down on the ground, he could do nothing to you — you had won the fight, to put it that way — and for some reason I will never know, you decided to up the ante on your victim and that resulted in his death," Judge Richard Okrent said to the teen, sitting next to his attorney.</p> <p>The teen was sentenced to one year in juvenile detention.</p>

HEADLINE	<b>04/14 Sex workers devastated; eye alternatives</b>
SOURCE	<a href="https://www.azcentral.com/story/news/local/arizona-investigations/2018/04/12/sex-workers-seeking-alternatives-other-websites-after-backpage-closure/507900002/">https://www.azcentral.com/story/news/local/arizona-investigations/2018/04/12/sex-workers-seeking-alternatives-other-websites-after-backpage-closure/507900002/</a>
GIST	<p>When the Department of Justice unceremoniously shut down Backpage last week, it was the first public-facing step in a sweeping criminal case against the website's executives.</p> <p>But before federal authorities could issue a statement, before the classified site's owners would face a judge, and before the public would learn of their charges, the narrative around Backpage had taken on a life of its own.</p> <p>The site had served as a microcosm of a larger debate on prostitution in recent years, and the seizure of what the DOJ called the "Internet's leading forum for prostitution ads" ignited swift reactions on both sides.</p> <p>Anti-sex-trafficking advocates, including Cindy McCain, cheered Backpage's demise as a blow to an abusive industry.</p> <p>Meanwhile, sex workers across the U.S. and Canada swarmed social media to air concerns rarely heard in political discourse: To them, Backpage's demise meant the end of safeguards and a reliable revenue stream in a profession that's not going anywhere.</p> <p>"They're devastated," said Laura Dilley, executive director of PACE, a Vancouver-based nonprofit that advocates for decriminalizing prostitution.</p> <p>If sex workers can't advertise online, they can't screen their clients beforehand and are forced back out to bars and into the street, Dilley said.</p> <p>"I am going to do what I have to do to survive... I might have to work the streets, work the bars; you do what you have to do."</p> <p>While many sex workers told The Arizona Republic they would continue posting on other smaller websites, they also worry about the future. On Wednesday morning, President Trump signed a bill giving prosecutors more power to go after websites that knowingly host sex-trafficking ads. It also gives women who claimed they were trafficked the ability to sue.</p> <p>It's not clear how websites will respond. After the bill passed Congress, for example, Craigslist took down its singles ads. And as the bill was moving through Congress, Backpage restricted postings on singles ads to photos, phone numbers and web links.</p> <p>"There's a lot of uncertainty; a lot of grief and fear," said Jelena Vermilion, a sex worker based outside of Toronto. "A lot of people are essentially planning to be homeless, planning how to fall gracefully as much as possible...From Friday, a lot of these people haven't had any calls."</p> <p>IndyStar columnist Tim Swarens spent more than a year investigating a lucrative business where abused children are bought and sold. USA TODAY</p> <p>After the Backpage closure April 6, an Arizona-based sex worker called Vegas said she relied on her regular clients to get her through that weekend.</p> <p>"I am going to do what I have to do to survive," she said. "I might have to work the streets, work the bars; you do what you have to do."</p> <p>Prostitution is still illegal in 49 states, the exception being certain counties in Nevada. For this reason, The Arizona Republic has agreed to withhold the sex workers' legal names for this story. In Canada, selling sex is legal, but buying it isn't.</p>

Vegas said Backpage afforded her more anonymity than meeting strangers in public. And it gave her a barrier to screen her clients and meet them in a safe place.

“It will push it underground,” Vegas said, noting that Backpage screened for ads that appeared to include someone underage or trafficking victims.

“Backpage had an incentive to review the ads and make sure nothing was going on,” she said. “Now, it’s going to force people out to the streets, where we can’t really fight.”

A Michigan woman who goes by the name Sarah Fenix on Twitter posted a viral thread about how the ability to screen on Backpage saved her from riskier sex work. Fenix told The Republic she used the site to test the client before they met up. She would ask them to text their favorite movie “so I know you’re real,” or to bring her fruit or bagels.

“The guys who could follow that one simple instruction were actually better than the ones who couldn’t,” she said. “It’s not necessarily about the information you get, it’s about gauging someone’s willingness to follow instruction.”

Fenix said she is no longer in the business and now works a "cube" job. Seeing the closure of Backpage though, she said, was like watching a childhood house burn down.

A broader debate

The reactions over Backpage generally boil down to two camps: Those who believe prostitution should be illegal and those who don’t. Advocates for decriminalization say the sex industry will always be around, and regulation would make it safer. Those against it argue that selling sex, by nature, is abusive.

Advocates have succeeded in changing police attitudes about prostitutes from being seen as criminals to women in need of rescue. Many sex workers, however, reject the “victim” label.

In recent years, some anti-trafficking advocacy and political groups have begun blurring the lines between prostitution and sex trafficking: Per the expanded definition, a sex-trafficking victim is someone who enters prostitution by force, fraud or coercion. A minor, by definition is always considered a trafficking victim.

In a press statement, FBI Director Christopher Wray said Backpage’s closing strips traffickers of a key tool.

“This website will no longer serve as a platform for human traffickers to thrive,” he said. “Whether on the street or on the Internet, sex trafficking will not be tolerated.”

Backpage executives are not charged with a sex-trafficking crime, but instead crimes related to facilitating prostitution and money laundering. But the indictment states that many of the ads published on Backpage “depicted children who were victims of sex trafficking.”

Prosecutors say Backpage executives showed a financial incentive to allow the ads to run.

In recent years, law-enforcement actually worked Backpage to conduct prostitution-related sting operations. Police, including those in Phoenix, have previously posted ads on Backpage posing as an underage girl for sale, or as a trafficker searching for victims.

Jonathan Howard, a spokesman for the Phoenix Police Department, rejected the notion that sites like Backpage should remain in place because it confined criminals to one area.

"Just because it's easy doesn't mean it's right," he said. "We knew that that was one of the most prolific

	<p>sites for sex trafficking, but we still have to hold people accountable."</p> <p>Howard said police hope Backpage's closure encourages troubled young women and men to seek options other than prostitution.</p> <p>"It is extremely easy for them to go to sites like Backpage.com, and immediately be drawn into this high-risk lifestyle," he said.</p>

<b>HEADLINE</b>	<b>04/14 Docs keep licenses despite sex abuse</b>
<b>SOURCE</b>	<a href="https://www.yahoo.com/news/ap-investigation-doctors-keep-licenses-despite-sex-abuse-145310788--politics.html">https://www.yahoo.com/news/ap-investigation-doctors-keep-licenses-despite-sex-abuse-145310788--politics.html</a>
<b>GIST</b>	<p>WASHINGTON (AP) — The first time that Dr. Anthony Bianchi came onto a patient, California's medical board alleged, the gynecologist placed a chair against the exam room door, put his fingers into the woman's vagina and exposed his erect penis.</p> <p>The second time, the board claimed, he told a patient that he couldn't stop staring at her breasts and recounted a dream in which he performed oral sex on her in the office.</p> <p>The third time, the board charged, he told a pregnant patient suffering from vaginal bleeding that she shouldn't shave her pubic hair before her next visit, as he was getting too excited.</p> <p>These episodes led to disciplinary actions by the state's medical board in 2012 and in 2016. Bianchi agreed not to contest the charges, and he held onto his medical license. Under a settlement with California's medical board, he agreed to seek therapy and refrain from treating women during five years of probation.</p> <p>Bianchi did not respond to telephone messages from The Associated Press left for him at the workers' compensation clinic in Fresno, California, where he now evaluates occupational health claims.</p> <p>In recent months, Hollywood moguls, elite journalists and top politicians have been pushed out of their jobs or resigned their posts in the wake allegations of sexual misconduct. In contrast, the world of medicine is often more forgiving, according to an AP investigation.</p> <p>When the doctors are disciplined, the punishment often consists of a short suspension paired with mandatory therapy that treats sexually abusive behavior as a symptom of an illness or addiction, the AP found.</p> <p>Decades of complaints that the physician disciplinary system is too lenient on sex-abusing doctors have produced little change in the practices of state medical boards. And the #MeToo campaign and the rapid push in recent months to increase accountability for sexual misconduct in American workplaces do not appear to have sparked a movement toward changing how medical boards deal with physicians who act out sexually against patients or staffers.</p> <p>The sentencing of Larry Nassar, a former doctor for the U.S. Olympic gymnastics program convicted of abusing more than 150 women and girls, has put a high-profile case of physician misconduct in the spotlight. But across the country, most doctors accused of sexual misconduct avoid a medical license review entirely. A study last year found that two-thirds of doctors who were sanctioned by their employers or paid a settlement as the result of sex misconduct claims never faced medical board discipline.</p> <p>"There's been a failure of the medical community to take a stand against the issue," said Azza Abbudagga, a health services researcher with nonprofit advocacy organization Public Citizen.</p> <p>She published a report recently detailing sexual misconduct among physicians. Its findings showed that of the 253 doctors reported to the National Practitioner Data Bank for having been sanctioned by their</p>

respective hospitals or health care organizations for sexual misconduct, or paid a settlement that stemmed from such an allegation, 170 of them were not disciplined by state medical boards, even though all boards have access to the reports filed with the data bank.

"They could tell the public that they will investigate every single case. There are many things that can be done, even just having a policy of zero tolerance," she said. "If every single hospital would just take a stand and issue a statement saying clearly that any sexual misconduct with patients won't be tolerated and that there will be consequences including permanently revoking the medical license of every doctor found guilty."

Current guidelines from the Federation of State Physician Health Programs, which represents doctor rehab programs in 47 states, are largely silent on handling sexual misconduct treatment and describe sexual harassment as a "cause of impairment" in a doctor. Programs to treat doctor impairment are inherently supposed to be "nondisciplinary," per the federation's guidelines.

Linda Bresnahan, who heads the federation, said its guidelines are being rewritten and, despite their language, should not be applied to sexual misbehavior. A statement provided by the federation says only about half of doctor rehab programs nationwide accept doctors accused of sexual misconduct, a choice the group considers to be "a local issue beyond the purview of national guidance."

The harm committed by sexually abusive doctors is aggravated by the personal nature of the doctor-patient relationship, according to experts and doctors' victims.

When Marissa White came to Dr. Gunwant Dhaliwal in 2007 for neck pain after a car accident, he reached under her shirt and into her bra, grabbing her breasts.

A jury convicted him of misdemeanor battery in the case, and Florida's medical board concluded that his crime demonstrated his "lack of good moral character" and "lack of worthiness" to practice medicine. But despite that finding — and at least six other similar allegations made by women patients and employees, both before and after the incident with White, according to court cases and police complaints — Dhaliwal can still be found practicing at his Tampa-area urgent care clinics.

"I had to sit there in front of him, look him in the eye, they made their guilty verdict and that's it, nothing came of it," White told the AP of her experience at trial. She still lives in Florida, but won't even go to the neighborhood where Dhaliwal practices medicine.

"He should have lost his license a long time ago. He should have lost it the first time it happened."

But his office manager told the AP that, while the Florida board referred him to the state's impaired physician network for evaluation, nothing came of it.

"They did an evaluation and did not find anything wrong," the woman told the AP. "They don't do any treatment."

The office manager, who refused to provide the AP with her full name, noted that Dhaliwal had not had any new complaints brought against him since his settlement with the medical board. When the AP asked to speak with Dhaliwal, she said that he was declining on the advice of his lawyers.

Dhaliwal did not respond to requests for comment left with his clinic's staff or a voicemail left with his lawyer.

Examples of problematic behavior are easy to find in states across the country.

In Arkansas, Dr. Robert Rook was allowed to keep his family practice open, so long as he's chaperoned, despite facing multiple criminal charges for rape. Prosecutors subsequently downgraded the charges to more than 20 counts of sexual assault in the second- and third-degree, charges for which Rook says he is

innocent.

Rook did not return phone messages left with a secretary at his Conway office. He is set to face trial later this year.

The Idaho State Board of Medicine in May reinstated the license of Richard Pines, a child and adolescent psychiatrist who lost his license in 2013 after the board accused him of having sexual relationships with four former patients, including taking nude photos of a 14-year-old and convincing the boys that he needed to practice giving naked massages to keep his medical license.

The state's highest court in 2015 ruled that Pines had engaged in sexual misconduct, but determined that two of the four alleged victims were not former patients. The court remanded Pines' case to a lower court and vacated his punishment, instead ordering the board to re-evaluate the scope of disciplinary action based on the charges the court upheld. The court's order also blasted the board for being impartial, accusing its members of "passionately railing" against Pines in its decision.

The AP reached out to Pines' former employers and contacted his most recent attorneys, but was unable to reach him. The AP also left a message for a biller at Sage Health Care, where Pines still processes invoices. The receptionist said Pines bills through the office but was unable to provide more details about his current practice.

State-authorized programs that attempt to oversee the rehabilitation of doctors who have committed sexual misconduct aren't always forthcoming about their methods. In Florida, the Professional's Resource Network, which the state medical board assigned to evaluate Gunwant Dhaliwal after his battery conviction, asked the AP to provide detailed questions and a list of sources before it would answer questions.

After the AP provided the head of the program, Alexis Polles, with basic questions about the program's approach to clearing doctors for return to work after instances of sexual abuse, she declined to answer any of them.

The lenience of penalties for sexually abusive doctors sometimes a source of frustration even for members of the medical board who administer the discipline, according to Jason Rosenberg, a former chairman of the Florida medical board.

"This is incredibly inappropriate," Rosenberg said during one 2013 meeting when Florida's medical board allowed James Yelton-Rossello, a psychiatrist alleged to have molested jailed psychiatric patients, to keep his license. The settlement with the Florida board of medicine did not require Yelton-Rossello to admit guilt.

"You can't do this and serve french fries," Rosenberg said at that meeting, citing fast food restaurants' policies against hiring sex offenders. "I'm ashamed of what's going on here."

Yelton-Rossello's lawyer did not respond to telephone messages or an email request for comment.

Some medical boards blame administrative law judges for tying their hands from seeking harsher punishments.

In an interview last year, Rosenberg said he responded to an administrative law judge's refusal to uphold a different license revocation by attempting to compel that doctor to display a sign stating "I molest patients" in his office.

Rosenberg's effort failed, though some doctors have been required to post signs in their office stating that they must be chaperoned in the presence of female patients.

Bob Cohen, the chief judge in Florida's division of administrative hearings, rejected the idea that

administrative law judges are responsible for watering down the punishments of sexually abusive doctors. He said the board of medicine could seek to override administrative law decisions they disagree with, something the Florida board acknowledged in a statement to the AP.

"One of the reasons they don't always appeal is they have a lot of cases," Cohen said of state health officials. He acknowledged, however, that "consistency" was a goal in punishments, and that past leniency shown to doctors sets a precedent for weaker punishments in the present day.

The question of doctor punishments is part of a larger problem in the medical field. Numerous factors, including hospitals' disinclination to report abusive doctors, to shortfalls in a private, interstate system meant to flag them to future employers, and patients' simple reluctance to challenge a medical professional, skew the field in doctors' favor, according to a 2016 investigation by the Atlanta Journal-Constitution.

Some doctors who are reported to medical boards for sexual misconduct receive reprimands instead of suspensions. G. Eric Nielson, a medical malpractice attorney in Utah, says that's because doctors tend to try to protect other doctors as much as possible.

"There's an institutional bias on the part of the medical review board," he said. "They're generally doctors, they work very hard to get their medical degrees and they're very, very disinclined to yank the license of another doctor. The primary focus is: Let's take care of the doctor and help him get through this problem."

A medical board in California in 2009 revoked the license of Dr. Kamron Hakhamimi after it ruled that his conduct constituted abuse, neglect and exploitation when he prescribed powerful drugs to a woman he met online and then had sex with her; he had previously pleaded no contest to a pair of misdemeanor charges stemming from the incident. But the board stayed the revocation in favor of seven years' probation and a requirement that he complete an ethics class and a course on professional boundaries, though the California Department of Health Care Services barred Hakhamimi from participating in any federally funded programs for 12 years.

When contacted for comment, Hakhamimi said, "Nothing happened in the clinic. No medical malpractice, no suspension." When asked whether the courses were effective, he said, "they're mandatory for a reason: It's a business," and then hung up.

Sexually abusive physicians are not generally required to apologize or even acknowledge having acted inappropriately in order to keep their license. Three years after his misdemeanor battery conviction, for example, Florida doctor Dhaliwal was acquitted of molesting another patient. He took the opportunity to issue a news release calling the women who have accused him of misconduct liars motivated by greed.

In email statement, Florida Medical Board spokesman Brad Dalton said the doctor disciplinary boards "do not have the legal authority to force a physician to speak or place a gag order on them to prevent them from doing so."

In practice, even some lawyers who represent doctors find the physician health programs to be problematic.

David Spicer, who has represented doctors facing medical board discipline in Florida, says the state's doctor rehabilitation program isn't well designed to evaluate or treat sexual misbehavior. The program's key component, he said, is a "one-size-fits-all" requirement that doctors engage in therapy sessions and not get into trouble for a specified period, generally five years.

Spicer said Florida's program, run by an independent organization called the Physician Research Network, does a better job dealing with doctors' who abuse alcohol or drug, but it hasn't been effective at evaluating or treating doctors with sexual problems.

Experts in the treatment of sexual misbehavior question whether the treatments mandated for doctors who

	<p>molest patients are even appropriate for such misconduct.</p> <p>"It's insufficient," said Rory Reid, a UCLA psychology professor who studies addiction and hypersexual behavior. While some types of sexual behavior, such as the compulsive viewing of pornography, might best be addressed through addiction treatment therapy, rehabilitation programs for sex offenders typically focus on restitution and empathy for a person's victims.</p> <p>"We have clinical trials for everything underneath the sun," Reid said. "But there's not one clinical trial that I'm aware of on the efficacy of treatment for doctors who have engaged in sexual misconduct."</p>

<b>HEADLINE</b>	<b>04/13 Backpage CEO pleads guilty</b>
<b>SOURCE</b>	<a href="https://abcnews.go.com/Technology/wireStory/backpage-ceo-pleads-guilty-testify-54437158">https://abcnews.go.com/Technology/wireStory/backpage-ceo-pleads-guilty-testify-54437158</a>
<b>GIST</b>	<p>The chief executive of Backpage.com pleaded guilty to state and federal charges including conspiracy and money laundering, and agreed to testify in ongoing prosecutions against others at the website that authorities have dubbed a lucrative nationwide "online brothel," authorities said.</p> <p>"For far too long, Backpage.com existed as the dominant marketplace for illicit commercial sex, a place where sex traffickers frequently advertised children and adults alike," U.S. Attorney General Jeff Sessions said in a statement. "But this illegality stops right now."</p> <p>Backpage brought in a half-billion dollars since it began in 2004, mostly through prominent risqué advertising for escorts and massages, among other services and some goods for sale, according to federal prosecutors. Authorities allege the site was often used to traffic underage victims, while company officials said they tried to scrub the site of such ads.</p> <p>Chief Executive Officer Carl Ferrer will serve no more than five years in prison under a California agreement in which he pleaded guilty to one count of conspiracy and three counts of money laundering in California. Also Thursday, Texas Attorney General Ken Paxton announced the company pleaded guilty to human trafficking.</p> <p>And a federal judge in Phoenix unsealed an April 5 plea deal revealing that Ferrer pleaded guilty to conspiracy, and Backpage.com pleaded guilty to money laundering conspiracy.</p> <p>Under his plea agreement, Ferrer agreed to make the company's data available to law enforcement as investigations and prosecutions continue. The guilty pleas are the latest in a cascade of developments in the last week against the company founded by the former owners of the Village Voice in New York City, Michael Lacey, 69, and James Larkin, 68.</p> <p>The company founders were among Backpage officials indicted by a federal grand jury in Arizona. Attorneys for the company and Lacey, Larkin and Ferrer did not respond to multiple telephone and email messages from The Associated Press.</p>

04/16 US envoy fears: chem. site tampered

SOURCE

<https://www.reuters.com/article/us-mideast-crisis-syria-chemicalweapons/russia-may-have-tampered-with-chemical-attack-site-u-s-envoy-says-idUSKBN1HN126?il=0>

GIST

THE HAGUE (Reuters) - Russia may have tampered with the site of an alleged chemical weapons attack in Syria's Douma, the U.S. envoy to the global watchdog said on Monday, urging the body to condemn the continuing use of banned chemical weapons.

The comments came during a closed-door meeting at the Organisation for the Prohibition of Chemical Weapons, convened after an April 7 attack in the town of Douma, outside the Syrian capital, in which dozens of people were allegedly killed with poison gas.

“It is long overdue that this council condemns the Syrian government for its reign of chemical terror and demands international accountability for those responsible for these heinous acts,” U.S. Ambassador Kenneth Ward said in comments obtained by Reuters.

“It is our understanding the Russians may have visited the attack site. It is our concern that they may have tampered with it with the intent of thwarting the efforts of the OPCW Fact-Finding Mission to conduct an effective investigation.”

## GIST

The next time you sign a credit card receipt, savor it.

While it may take time for the news to filter down to retailers, Visa, American Express, Discover and Mastercard have said that as of this month, they will no longer require customers to sign their names when paying with a credit card.

The signature has had a good run. It’s not dead, but it is dying.

American culture has preferred credit to debit, and so signing has stuck around longer. But new credit cards have converted to chip cards that are harder to counterfeit.

“Signatures are becoming more irrelevant,” said Harshita Rawat, an analyst at Bernstein Research. “The final nail in the coffin was the chip card.”

If you want to pay with your phone, many use fingerprint scanners to authorize transactions, and Apple’s got facial recognition on its iPhone X while Samsung uses iris scanning on the Galaxy S8. Visa has also rolled out prototype rings, pins and even sunglasses that you can scan instead of using a card.

Several of the largest retailers, including Walmart and Target, have moved to drop the signature requirement. Home Depot had already waived the requirement for purchases under \$50, and plans to do the same for larger purchasers, but hasn't set a date yet. Stephanie Cunha, a spokeswoman for CVS, said "We are evaluating our options but have no specific changes to announce at this time."

04/15 US plans new sanctions on Russia

## SOURCE

<https://www.nytimes.com/2018/04/15/us/politics/trump-russia-sanctions-syria.html?action=click&module=Top%20Stories&pgtype=Homepage>

## GIST

WASHINGTON — The Trump administration plans to impose new sanctions against Russia on Monday to punish it for enabling the Syrian government's use of chemical weapons in its civil war, the latest in a series of actions by both sides underscoring the deterioration in relations between Moscow and the West.

The sanctions, coming shortly after American-led airstrikes against facilities linked to Syria's chemical weapons, are meant to signal that the United States holds responsible not just the government of President Bashar al-Assad but also his patrons in Russia and Iran. President Trump has vowed that Syria's allies will pay a "big price" for facilitating the suspected use of poison gas.

But it remained unclear how far Mr. Trump would go in trying to shape events in Syria, which has been racked by civil war for seven years. President Emmanuel Macron of France, who along with Prime Minister Theresa May of Britain joined in the strike on Syrian targets, said on Sunday night that he had persuaded Mr. Trump to keep a small American ground force in Syria despite the president's public declaration that he wanted to get out.

"We convinced him it was necessary to stay," Mr. Macron said in a televised interview with French journalists. "I assure you, we have convinced him that it is necessary to stay for the long term."

American officials, however, disputed that, saying that Mr. Macron misinterpreted the conversation. About 2,000 American troops are in Syria to fight the Islamic State, or ISIS, not to play a role in the civil war. In public comments before the chemical attack that prompted him to launch airstrikes, Mr. Trump said he wanted to pull them out right away. Advisers urged him to hold off, and he gave them five to six months to complete a withdrawal.

“The U.S. mission has not changed — the president has been clear that he wants U.S. forces to come home as quickly as possible,” Sarah Huckabee Sanders, the White House press secretary, said in a statement Sunday night. “We are determined to completely crush ISIS and create the conditions that will prevent its return. In addition, we expect our regional allies and partners to take greater responsibility both militarily and financially for securing the region.”

The new American sanctions were announced on Sunday by Nikki R. Haley, the ambassador to the United Nations and the administration’s leading public voice excoriating Russia in recent days. “They will go directly to any sort of companies that were dealing with equipment related to Assad and chemical weapons use,” she said on “Face the Nation” on CBS. “And so I think everyone is going to feel it at this point. I think everyone knows that we sent a strong message, and our hope is that they listen to it.”

04/15 Minor quake near Salem Oregon

## SOURCE

<http://mynorthwest.com/954831/3-1-magnitude-earthquake-hits-near-oregon-state-capital-city/>

## GIST

SILVERTON, Ore. (AP) — No injuries or property damage have been reported following a 3.1 magnitude earthquake near the Oregon state capital.

The U.S. Geological Survey confirmed the earthquake hit about 4 miles (6.4 kilometers) southwest of Silverton at 8:45 p.m. Saturday.

Some nearby residents said they felt the earthquake, which also struck near the state capital city of Salem.

In nearby Mollala, northeast of this site, a magnitude 4.0 quake also hit last December.

Experts have said for years that Oregon and the Pacific Northwest are due for a catastrophic earthquake with a magnitude of 8.0 or higher.

04/15 Oregon gov. declares drought emergency

## SOURCE

<http://q13fox.com/2018/04/15/oregon-governor-declares-drought-emergency-in-second-county/>

## GIST

SALEM, Ore. — Oregon Gov. Kate Brown has declared a drought emergency in the second county in a month.

Brown on Friday announced a drought emergency in Grant County due to low snowpack, lack of precipitation, low streamflows and warming temperatures.

The declaration comes after Brown announced a drought emergency in Klamath County on March 13.

They're the first state drought declarations since 2015.

The governor's drought declarations allow increased flexibility in how water is managed to ensure that limited supplies are used as efficiently as possible.

The drought declarations also position farmers and ranchers in the county for federal aid as Oregon braces for the upcoming wildfire season.

04/15 Summer fire rules in effect

## SOURCE

<http://q13fox.com/2018/04/15/summer-fire-rules-kick-off-today-in-washington/>

## GIST

It may not feel warm outside yet, but Washington's "summer fire rules" are now in effect.

“Whether fire season is delayed or not, Washington’s forests always face the threat of wildfire,” said Commissioner of Public Lands Hilary Franz. “We’re preparing now to be ready for fire season before the weather heats up, and I encourage all our neighbors to do the same.”

The state's summer fire rules are in effect until October 15. The rules apply to the 13 million acres of private and state forestlands protected by the Washington Department of Natural Resources.

These regulations affect loggers, firewood cutters, land clearers, road builders, heavy equipment operators, off-road motorcyclists, and others. During fire season, people using motorized equipment in the woods must have approved spark arresters and follow fire safety precautions. In addition, those working in the woods must have fire prevention and extinguishing equipment in good working order at the job site and workers trained in proper use.

The rules are intended to prevent forest fires and to extinguish small fires before they spread to the forested lands. These rules restrict cigarette smoking in forested areas to roads, gravel pits, or other clearings and prohibit lighting fireworks on forestland.

According to experts, Washington's forests always face the threat of wildfire. So even though we have above average snowpack, the risk of wildfire can change quickly during the springtime.

"As soon as the weather conditions warm up and the humidity begins to drop, the ground conditions become much more of a tinderbox very very quickly and certainly as the summer goes on," Kyle Ohashi of Puget Sound Regional Fire told Q13 News.

Property owners can reduce fire risk to their homes and lands by keeping dead vegetation off roofs and away from buildings. The Firewise program explains how to use these techniques and offers incentives to communities who follow Firewise principles.

Last year, more than 32,800 acres of DNR-protected lands were consumed by 815 wildfires. Out of 815 wildfires, 90 percent were human-caused.

## GIST

SEOUL, April 15 (UPI) -- With less than a fortnight until the South and North Korea hold their first summit in more than a decade, officials from both sides are expected to wrap up the final details this week.

Yonhap reported Sunday that an additional working-level meeting will be held Wednesday at the Tongilgak, a North Korean building at the Panmunjom truce village on the inter-Korean border.

After the protocol, security, media coverage and other technical details of the summit are finalized during the talks, a high-level meeting is expected to be held between South Korea's Unification Minister Cho Myoung-gyon and Ri Son-gwon, chairman of the North's agency for inter-Korean affairs, for Wednesday.

The presidential official said the high-level meeting will likely be held within the week.

Meanwhile, Seoul has announced, "Peace, a New Beginning," will be the slogan for the inter-Korean talks.

Presidential spokesman Kim Eui-kyeom told reporters Sunday that the slogan indicates the start of world peace through the first inter-Korean meeting in eleven years, followed by the first-ever summit between the United States and North Korea.

04/16 Russia reinforcements head to Syria

## SOURCE

<http://www.dailymail.co.uk/news/article-5618609/Russian-ships-laden-tanks-seen-Bosphorus-en-route-Tartus-Syria-led-air-strikes.html>

## GIST

Two Russian warships laden with military vehicles have been spotted en route to Syria after Friday's US-led airstrikes obliterated three suspected chemical weapons sites.

An Alligator-landing ship was pictured cruising down The Bosphorus on Sunday as the world awaits Vladimir Putin's response to this week's co-ordinated military action against Syria.

The vessel was spotted on its way to the Russian naval base at Tartus on the north Syrian coast.

On its fourth deployment of Russian military equipment to the war-torn country the ship was seen laden with tanks, trucks, ambulances and an IED radar.

A yellow RoRo Alexandr Tkachenko was also pictured heading for Tartus carrying high-speed patrol boats, a temporary bridge structure and several trucks. The images were posted on social media by Bosphorus-based naval observer Yörük Işık.

They come in wake of Friday's US-led campaign against Bashar al-Assad's regime and a chemical weapons attack that brutally murdered 75 civilians.

The blue Project 117 LST Orsk 148 ship was carrying Soviet BTR-80 tanks, Ramaz trucks and a Pelena-1 bomb radar, used to detect IEDs.

A second yellow cargo vessel was equipped with a BMK-T boat used for building temporary bridges and an array of other military hardware.

The Russian warships approaching Syria come after the United States outlined new economic sanctions in response to Moscow's continued support of Assad's regime in Syria.

Nikki Haley, US Ambassador to the United Nations, said measures to be imposed on Monday will send a message to Russia after it blocked six UN attempts to investigate its use of chemical weapons.

Meanwhile French President Emmanuel Macron today insisted the allied forces had not 'declared war' on Syria.

He told a French TV station: 'We have not declared war on the regime of Bashar al-Assad.' During the

two-hour interview he also claimed he had 'convinced' Trump to maintain a military presence in Syria after the US leader threatened to pull out of the country entirely.

It emerged that Trump called Mr Macron twice before he shared his intention to strike Syria in a Twitter post. But he failed to call UK Prime Minister Theresa May in the early stages of the operation, giving the French leader the opportunity to claim France is America's leading ally in Europe.

04/16 Oklahoma wildfires force evacuations

## SOURCE

<https://www.cnn.com/2018/04/13/us/oklahoma-wildfires/index.html>

## GIST

(CNN)Wildfires have killed one person and forced the evacuation of four towns in Oklahoma, authorities said.

The state chief medical examiner's office reported a 61-year-old man died Thursday in Roger Mills County as a result of injuries sustained in a fire that began southeast of Leedey, the Oklahoma Department of Emergency Management said.

A 54-year-old hunter reported missing in the large Dewey County fire was found alive, Oklahoma Forestry Services Fire Chief Scott Huff said. The man was flown to an area hospital Friday, but his condition was unknown.

Officials said the man was one of three hunters who got caught in the wildfire. The two others were found Thursday.

About 1,000 people evacuated Vici, more than 100 miles northwest of Oklahoma City, Dewey County Sheriff Clay Sander said.

Evacuations were also ordered in the Dewey County towns of Seiling, Taloga and Putnam, said Michelle Finch-Walker, spokeswoman for Oklahoma Forestry Services.

The Rhea Fire in Dewey County has burned an estimated 138,000 acres and is 0% contained, she said.

Around midday Friday, the National Weather Service issued an advisory saying that fire was approaching the Iochem iodine plant east of Vici. Sander told CNN about 30 residents were asked to evacuate immediately as the wildfire closed in on the chemical plant.

Some 450 people were evacuated in adjacent Woodward County. The estimated size of that fire was changed from 115,000 to 59,000 acres because of more accurate mapping, Finch-Walker said. There are two other major fires in the state.

The blazes have consumed 200,000 acres, Gov. Mary Fallin said in announcing a state of emergency for 52 counties because of wildfire and drought conditions.

"I'm asking all Oklahomans to be vigilant and careful, and to do their part to prevent fires," Fallin said in a statement. "Anything that can be done to minimize fires will help to keep both our firefighters and the public safe."

'The fire is rapidly spreading'

State officials said dry conditions and strong winds have combined to create potential fire dangers.

"These fires are going to continue to be quite explosive under these conditions, with that kind of wind pushing it, and all the dry fuels that are available," Finch-Walker told CNN. "The fire is rapidly spreading and growing and we will continue to see extreme fire behavior until we can get through this event."

"We've got historic conditions as far as fire. We haven't seen these kinds of conditions in a decade," said Matt Lehenbauer, emergency management director for Woodward County.

"We've had half an inch of rain in six months," Lehenbauer said.

04/16 US, Russia enter new era of animosity

## SOURCE

<https://www.bloomberg.com/news/articles/2018-04-16/syria-strikes-lock-u-s-and-russia-into-a-new-era-of-animosity>

## GIST

A few weeks ago, Donald Trump invited Vladimir Putin to meet -- maybe even at the White House. After U.S.-led missile strikes in Syria, the two nations' officials can't get into the same room without insulting each other.

Speaking at an emergency session of the United Nations Security Council Saturday, hours after the U.S., France and the U.K. launched missiles intended to take out Syria's chemical weapons capability, American Ambassador Nikki Haley called on Russia -- the main backer of the Syrian regime -- "to take a hard look at the company it keeps." Her Russian counterpart Vassily Nebenzia retorted that the U.S. and its allies were engaged in the "diplomacy of myth-making."

The strikes against the regime of Russia's ally Bashar al-Assad put an exclamation point on how swiftly ties between the former Cold War foes have deteriorated in recent weeks, with President Trump even overcoming his past unwillingness to criticize President Putin by name.

Now, the U.S.-Russia relationship, already under severe strain over issues from Russian meddling in the 2016 American presidential campaign to its role in Syria and Ukraine, may be irretrievably broken for the foreseeable future. There may be too much bad blood, too much suspicion and too much anger on both sides to turn the animosity around.

"I don't see things getting better," said Boris Zilberman, deputy director of congressional relations at the Foundation for Defense of Democracies and a Russia expert. "We're at a very low point and clearly the administration's position on Russia has hardened."

The result has been an unprecedented wave of retaliations and tit-for-tat actions. After the U.K. blamed Russia for the poisoning of a former spy in Britain, more than 150 Russian diplomats were expelled by the U.K. and allies including the U.S. The Trump administration followed with new sanctions on Russian oligarchs including billionaire aluminum magnate Oleg Deripaska. His company lost half its value in a day after the sanctions were announced.

Haley raised the prospect of still more sanctions on Russia, saying Sunday on CBS's "Face the Nation" that a fresh round of penalties would "go directly to any sorts of companies that were dealing with equipment" related to Assad and his chemical weapons.

While for now no significant new U.S. sanctions seem likely --limiting Russian market losses after last week's sharp declines -- in Moscow, lawmakers are starting Monday to discuss a draft law with counter-measures against the U.S..

"What kind of cooperation can there be? Where?" asked Fyodor Lukyanov, head of Russia's Council on Foreign and Defense Policy, who advises the Kremlin. Russia gets "new sanctions and threats every week," he said. "Americans believe that you can humiliate and put pressure everywhere and at the same time offer cooperation where they need it. This does not happen."

The two countries routinely accuse each other of fabricating events, as they did during the Cold War.

The U.S. says Russia is blocking investigators from the scene of the chemical attack that prompted the latest airstrikes. Russia has argued both that the attack in the Syrian city of Douma never happened or that it was orchestrated by the U.S. and its allies to provoke a military response.

"Americans need to understand that the wars of the future will look more like this: Russia is investing significant resources to create propaganda and disinformation," said Senator Ben Sasse, a Nebraska Republican, after Russia claimed that almost all the missiles fired into Syria were shot down -- an assertion the U.S. denied. "Our enemies will work to create confusion and distrust among Americans here at home."

What limited cooperation there was between the two countries has ground to a halt. A November agreement between the two sides to press all parties in Syria toward negotiations known as the Geneva process has stalled and they have abandoned plans for more "de-escalation zones" to ease the violence. Instead, Russia is attempting to create such zones with Turkey and Iran.

From the White House, there is still hope that Russia will change its posture, and Trump's informal invitation for an eventual meeting with Putin hasn't been rescinded.

"After his last call with President Putin on March 20, the president confirmed that the two had discussed a bilateral meeting at a number of potential venues, including the White House," Robert Palladino, a spokesman for the National Security Council, said in a statement Sunday night. "The desire for a meeting still stands, as the president believes a better relationship with Russia is in our mutual interest. That said, the president has been consistent and tough on Russia."

04/15 Russia: chaos if West strikes Syria again

## SOURCE

<https://www.newsmax.com/newsfront/putin-syria-global-chaos/2018/04/15/id/854589/>

## GIST

Russian President Vladimir Putin warned on Sunday that further Western attacks on Syria would bring chaos to world affairs, while signs emerged that Moscow and Washington want to pull back from the worst crisis in their relations for years.

Putin made his remarks in a telephone conversation with Iranian counterpart Hassan Rouhani after the United States, France and Britain launched missile strikes on Syria on Saturday over a suspected poison gas attack.

A Kremlin statement said Putin and Rouhani agreed that the Western strikes had damaged the chances of achieving a political resolution in the multi-sided, seven-year conflict that has killed at least half a million people.

"Vladimir Putin, in particular, stressed that if such actions committed in violation of the U.N. Charter continue, then it will inevitably lead to chaos in international relations," a Kremlin statement said.

The attacks struck at the heart of Syria's chemical weapons programme, Washington said, in retaliation for a suspected poison gas attack a week ago. All three participants insisted the strikes were not aimed at toppling President Bashar al-Assad or intervening in the conflict.

The bombings, hailed by U.S. President Donald Trump as a success but denounced by Damascus and its allies as an act of aggression, marked the biggest intervention by Western countries against Assad and ally Russia, whose foreign minister Sergei Lavrov called them "unacceptable and lawless".

Putin's comments were published shortly after Russian Deputy Foreign Minister Sergei Ryabkov struck a more conciliatory note by saying Moscow would make every effort to improve political relations with the West.

When asked whether Russia was prepared to work with the proposals of Western countries at the United Nations, Ryabkov told TASS news agency: "Now the political situation is extremely tense, the atmosphere is extremely electrified, so I will not make any predictions.

"We will work calmly, methodically and professionally, using all opportunities to remove the situation

from its current extremely dangerous political peak."

Russian Foreign Ministry official Vladimir Ermakov said Washington would want to maintain a dialogue with Moscow about strategic stability after the raids, Russian media reported.

In an indication that the West, too, would prefer to lower tensions, the United States and Britain both reiterated that their military action on Saturday was not aimed at Assad, Putin's ally, only at his use of chemical weapons.

Speaking to the BBC, Britain's Foreign Secretary (Minister) Boris Johnson said that Western powers had no plans for further missile strikes, though they would assess their options if Damascus used chemical weapons again.

"This is not about regime change ... This is not about trying to turn the tide of the conflict in Syria," he told the BBC, adding that Russia was the only country able to pressure Assad to negotiate an end to the conflict.

Asked about U.S.-Russia relations, U.S. ambassador to the United Nations Nikki Haley said ties were "very strained" but that the United States still hoped for a better relationship.

Haley said that the United States would not pull its troops out of Syria until its goals were accomplished. Speaking on Fox News Sunday, Haley listed three aims for the United States: ensuring that chemical weapons are not used in any way that poses a risk to U.S. interests, that Islamic State is defeated and that there is a good vantage point to watch what Iran is doing.

Trump has made clear he wants to withdraw the roughly 2,000 U.S. troops involved in the anti-Islamic State campaign in Syria. But he appeared to contradict that message when he said on Saturday that Western allies were prepared to "sustain" the military response if Assad does not stop using prohibited chemical weapons.

04/15 Opposition to sanctuary spreads in Calif.

## SOURCE

<https://www.newsmax.com/newsfront/us-california-sanctuary-backlash/2018/04/15/id/854625/>

## GIST

More local governments in California are resisting the state's efforts to resist the Trump administration's immigration crackdown, and political experts see politics at play as Republicans try to fire up voters in a state where the GOP has grown weak.

Since the Jeff Sessions-led Department of Justice sued California last month over its so-called "sanctuary state" law limiting police collaboration with immigration agents, at least a dozen local governments have voted to either join or support the lawsuit or for resolutions opposing the state's position. Those include the Board of Supervisors in Orange County, which has more than three million people.

More action is coming this week, with leaders in the Orange County city of Los Alamitos scheduled to vote Monday on a proposal for a local law to exempt the community of 12,000 from the state law. On Tuesday, the San Diego County Board of Supervisors is meeting to consider joining the Trump administration lawsuit.

Immigration has been a hot topic across the country since President Donald Trump campaigned in 2016 on promises of tougher enforcement and a wall on the U.S.-Mexico border. It has been a lightning rod issue in California far longer.

The state passed a measure backed by Republican Gov. Pete Wilson in the 1990s to deny public healthcare and education to immigrants in the country illegally. It was later overturned but left a lingering resentment among the state's growing Hispanic population.

In recent years, California Republicans have taken a less strident approach to immigration in a state where one in four people are foreign-born. But the Trump administration lawsuit has energized many in a party that has been rendered nearly irrelevant at the state level, where Democrats control every key office.

"When the attorney general of the United States decides to take a firm position against it, I think that gave a signal to a lot of us that, 'Hey, California is on the wrong side of this thing,'" said Fred Whitaker, chairman of the Republican Party in Orange County. He also is a councilman in the city of Orange who proposed a local resolution on the issue that passed last week.

Raphael Sonenshein, executive director of the Pat Brown Institute for Public Affairs at California State University, Los Angeles, said it's not surprising Republicans are galvanizing over immigration.

"Politics is very much about emotions, especially in midterms," he said. "I think it was only a matter of

time when people went back to the issue that actually hits the nerve in the Republican base these days more than any other."

Under Democratic leadership, California has enacted a series of laws in recent years aimed at helping immigrants, including issuing driver's licenses regardless of legal status and assisting with tuition at state universities. After Trump was elected, lawmakers passed the measure to limit police collaboration with federal immigration agents.

Immigrant and civil rights advocates applauded the measure, known as SB54, as a way to encourage immigrants to report crime to police without fearing deportation. Critics said it would make it too hard for federal agents to find and deport ex-convicts who are a danger to communities.

Most of the local governments siding with the Trump administration are in Orange County, an area once considered a GOP stronghold but that voted for Hillary Clinton in the 2016 presidential election. But it's starting to spread.

Escondido in neighboring San Diego County has voted to support the federal lawsuit and last week the small city of Ripon in the state's Central Valley did the same.

In many cases, meetings on the issue have drawn boisterous crowds. Anti-illegal immigration activists have traveled from city to city to attend, heightening tensions with those who want their communities to support immigrant-friendly policies or stay out of the fray.

In response to the controversy, some local governments have taken the opposite approach. Leaders in Santa Ana, an Orange County city home to about 330,000 residents, voted to support California in the lawsuit.

04/16 Syrians Damascus rally support military

## SOURCE

<http://abcnews.go.com/International/wireStory/latest-large-rally-damascus-supporting-assads-army-54494618?>

## GIST

Hundreds of Syrians gathered on Monday in a landmark square in Syria's capital, Damascus, rallying in

support of their armed forces, which they say succeeded in confronting the unprecedented joint airstrikes by the West over the weekend.

State TV broadcast the rally live from the central Omayyad Square. Protesters waved Syrian flags at the demonstration, dubbed a "salute to the achievements of the Arab Syrian Army," set off fireworks and unleashed celebratory gunfire.

Shouts of "Allah, Syria, and only Bashar," a reference to Syrian President Bashar Assad, rang out.

The joint airstrikes by the United States, Britain and France bombed sites that the three countries said were linked to Syria's chemical weapons program. The airstrikes were triggered by an alleged chemical attack in the town of Douma, just outside of Damascus.

Syrian activists said more than 40 people were killed, but Syria and Russia deny the attack. Russia accused Britain of staging the attack.

Saturday's airstrikes came shortly after a fact-finding mission from the Organization of the Prohibition of Chemical Weapons arrived in Syria to investigate the attack. The mission is still expected to make it to Douma, where government security agencies and Russian military police have deployed after the town fell under government control, raising complaints from the Syrian opposition that evidence of chemical weapons' use might no longer be found.

The OPCW is holding an emergency meeting Monday in the Hague to discuss the suspected chemical attack in Douma.

The strikes have ratcheted up international tension, as the U.S. and Russia exchanged threats of retaliation. U.S. Ambassador to the United Nations Nikki Haley has indicated new economic sanctions will be announced Monday against Russia for enabling Assad's government to continue using chemical weapons.

Russian President Vladimir Putin said the military strikes violated the U.N. Charter and that if they continue, "it will inevitably entail chaos in international relations," according to a Kremlin statement on Sunday.

04/15 Protestors rally to shutdown Starbucks

#### SOURCE

<http://abcnews.go.com/US/protesters-rally-philadelphia-starbucks-black-men-handcuffed-arrested/story?>

#### GIST

Protestors rallied Sunday at the downtown Philadelphia Starbucks where two black men were led out in handcuffs by police and accused of trespassing to decry the actions of the coffee company and the cops.

Armed with bullhorns and signs, a small group of protestors gathered outside the Starbucks on Spruce Street and demanded action in the wake of Thursday's arrests. They directed their rage at Starbucks, the police department and the workers who called the cops in the first place.

"We want the manager fired form this establishment for racially profiling black people," a man boomed from the bullhorn. "We want the police officers in the arrest fired as well."

The protester with the bullhorn said the activists were "not going anywhere" and vowed, "We're going to show you want a shutdown means."

The arrests of the men -- who have not been identified, but have retained an attorney -- was captured on video and tweeted by Melissa DePino, a 50-year-old mother of two who told ABC News she's vowed to not shop at Starbucks again.

It's since been viewed more than 9 million times as of Sunday afternoon.

"It was humiliating for those guys," Depino told ABC News. "They were completely minding their own business."

Both men were later freed and the charges they were facing -- trespassing and disturbance -- were dropped Thursday night.

This happened while paperwork was being drawn up. District Attorney Larry Krasner also refused to prosecute once Starbucks asked to not press charges, according to a video testimonial released by Philadelphia Police Commissioner Richard Ross Jr. on Saturday.

Attempting to deflect blame away from his department, the commissioner assured the public that he has reviewed the facts and defended the cops, saying they "did absolutely nothing wrong."

"I can tell you candidly these officers did a service they were called to do," he said.

04/15 Spring blizzard pounds Midwest

## SOURCE

<http://www.foxnews.com/us/2018/04/15/spring-blizzard-pounds-midwest-flights-canceled-deaths-reported.html>

## GIST

Amid a spring blizzard in the Midwest that prompted hundreds of flights to be canceled Saturday, one runway has reopened at Minneapolis-St. Paul International Airport, officials said Sunday.

A total of 469 flights had been canceled at the Minnesota airport alone, airport spokesman Patrick Hogan said. All of Saturday's incoming and outgoing flights were canceled because of heavy snowfall and low visibility.

The snow was coming down too fast for plows to keep the runways clear or for crews to keep the planes deiced, airport officials said.

Hogan said crews were working to get other runways open.

St. Paul also declared a snow emergency, as blizzard warnings continued into Sunday, the Minneapolis Star Tribune reported.

"This system will rank up there as one of the most significant winter storms in some time," read a Weather Service report early Saturday. It declared the storm "historic," shortly after, the Star Tribune reported.

“This is certainly one of the more powerful [storms] in recent memory,” Jacob Beitlich, a Weather Service meteorologist, said, according to the paper. “Any time you close a Twin Cities airport, it’s gotta be usually a pretty bad snowstorm.”

Blizzard conditions have closed the airport for two days in Sioux Falls, South Dakota’s largest city.

The snowfall, part of a storm system stretching from the Gulf Coast to the Great Lakes, brought snow, tornadoes, rain and hail.

At least three weather-related deaths occurred in Wisconsin, Nebraska and Louisiana.

By Saturday night, Minneapolis was buried under more than 13 inches of snow.

It marked the first time a blizzard has descended on the metro area of the Twin Cities since 2005, the Star Tribune said, citing the National Weather Service.

Hundreds of crashes and spinouts were reported across the state, according to the Star Tribune. One fatality occurred Saturday when a vehicle struck a pedestrian in Medina, but it was unclear whether it was weather-related.

The weather is expected to persist through Sunday in Minnesota, Wisconsin and Michigan before moving into New York state and New England.

## GIST

The United States and Jordan have launched a 12-day military exercise with scenarios ranging from border security to counter-terrorism and for the first time a simulated chemical incident.

The Eager Lion drill started Sunday, a day after the U.S., France and Britain launched missiles at Syrian military targets in response to an alleged chemical weapons attack near Damascus a week ago.

Maj. Gen. Jon Mott, the director of Exercises and Training at the U.S. Central Command, told reporters that a mobile laboratory team will respond to a simulated chemical incident.

He said that it's a "threat all too real, as we've seen recently in Syria."

More than 7,000 troops, including 3,500 U.S. service members, are participating in the annual drill, the U.S. military's largest and most complex in the region.

## HEADLINE

04/15 Jefferson Co. to offer CERT training

## SOURCE

<https://www.peninsuladailynews.com/news/jefferson-county-to-offer-community-emergency-response-team-training/>

## GIST

PORT TOWNSEND — Jefferson County is about to start a Community Emergency Response Team training program.

Community Emergency Response Team (CERT) training has been provided in neighboring Clallam County but not in Jefferson County, until now.

The Jefferson County Department of Emergency Management, all county fire districts and the Neighborhood Preparedness (NPREP) action group through Local 20/20 are collaborating on the program, said Lynn Sterbenz, director of Jefferson County Department of Emergency Management.

The CERT program educates volunteers about disaster preparedness for possible hazards and trains them in such basic disaster response skills as fire safety, light search and rescue, team organization and disaster medical operations.

A program manager course will be offered May 21-22, while a three-day train-the-trainer course is planned May 23-25. Both are offered free, with training materials provided, but prerequisites and pre-registration are required.

Interested participants must complete and return a registration form by May 16. Registration will be on a first-come, first-served basis. Class size is limited to 30 students with minimum being 15.

Qualified volunteers are sought for both courses, Sterbenz said.

The first step for the Jefferson County program is to build a cadre of volunteer CERT instructors, Sterbenz said.

The county now has seven qualified CERT instructors, as opposed to more than 25 in Clallam County.

“We know there are highly qualified retired people in Jefferson County, some of whom are likely CERT trained already who might be interested in joining our instructor pool,” Sterbenz said.

Program managers will assist in the ongoing logistical aspects of coordinating the CERT program. The course will prepare participants to work with the Department of Emergency Management, fire districts and NPREP.

The prerequisites for both courses are the same: Participants must have completed the CERT basic training course (any location is acceptable) or completed the online course IS-317: Introduction to CERT, which can be found at <https://training.fema.gov/is/courseoverview.aspx?code=IS-317>.

It also is necessary to have a referral from a CERT-sponsoring agency, such as the Department of Emergency Management, city or county government, fire districts, schools, hospitals, or a community-based organization such as NPREP.

The registration form is available on the State of Washington, Emergency Management Division’s Training and Exercise calendar. Visit <https://mil.wa.gov/training-and-exercise> and click on the In-State Training Calendar.

CERT offers a consistent, nationwide approach to volunteer training and organization that professional responders can rely on during disaster situations, which allows them to focus on more complex tasks,

Sterbenz said.

“Through CERT, the capabilities to prepare for, respond to and recover from disasters is built and enhanced,” she said in a news release.

The CERT program was designed as a grassroots initiative and is structured so that the local and state program managers have the flexibility to form their programs in the way that best suits their communities, Sterbenz said.

There are more than 2,700 local CERT programs nationwide, with more than 600,000 individuals trained since CERT became a national program.

04/15 Britain: no new attacks planned for now

## SOURCE

<https://www.usnews.com/news/world/articles/2018-04-15/no-new-attacks-planned-against-syria-for-now-says-britain>

## GIST

LONDON (Reuters) - There are no plans as yet to repeat missile strikes on Syria, but Britain will consider further action if President Bashar al-Assad again uses chemical weapons against his people, foreign minister Boris Johnson said on Sunday.

In a show of support for Prime Minister Theresa May's decision to join the United States and France in attacking chemical weapons facilities in Syria on Saturday, her one-time political rival Johnson said it was the right thing to do.

But the prime minister may not find such backing when she faces parliament on Monday, where some lawmakers are angry that May took military action without their approval - a process that has increasingly become a tradition in Britain.

Speaking to the BBC, Johnson said what he described as the successful strikes on three sites in Syria were a message from the world that enough was enough, but acknowledged he could not say whether Assad still had chemical weapons.

"There is no proposal on the table at the moment for further attacks because so far, thank heavens, the Assad regime have not been so foolish as to launch another chemical weapons attack," he told the Andrew Marr show.

"If and when such a thing were to happen then clearly, with allies, we would study what the options were."

04/14 Best age to claim Social Security?

## SOURCE

<https://www.usatoday.com/story/money/personalfinance/retirement/2018/04/14/9-different-ages-for-claiming-social-security-and-what-they-mean-to-you/33696453/>

## GIST

Social Security serves as a key source of income for millions of retired seniors, and as an eligible worker, you get an eight-year window to start taking benefits. Here are the various ages at which you might claim Social Security, and their impact on your benefits.

### Age 62

Age 62 is the earliest point at which you can file for Social Security, and it's also the most popular age for seniors to claim benefits. The advantage of filing at 62 is that you get your money sooner. The downside, however, is that you'll face the greatest reduction in benefits by going this route.

If you're entitled to a full monthly benefit of \$1,500 at age 67, for example, then filing at 62 will knock each payment you collect down to \$1,050. That said, if you're unemployed come 62 or need the money for another reason, you're better off taking benefits than resorting to credit card debt.

### Age 63

Filing for Social Security at 63 still means taking benefits early and having them significantly reduced. Still, if you're desperate for cash, it often pays to take that hit, which won't be quite as bad as it would if you were to file at 62. Using our example above, a \$1,500 benefit at age 67 would be whittled down to \$1,125 at 63 -- not ideal, but better than collecting just \$1,050.

## Age 64

Claiming Social Security at age 64 will also result in a sizable reduction in your full monthly benefit. But it won't be as drastic as filing at an earlier age. In the case of a \$1,500 benefit at 67, you'd only lose about 20% by filing at 64, thereby resulting in a \$1,200 monthly payment.

## Age 65

Once you turn 65, you're eligible for coverage under Medicare. As such, some people get confused and assume that 65 is the age at which they're able to collect their Social Security benefits in full. Not so. Still, if you retire at 65 once Medicare kicks in and decide to file for benefits simultaneously, you won't face such an extreme reduction. Following the above example, a \$1,500 monthly benefit at 67 would only be reduced to \$1,300 at 65.

## Age 66

Age 66 is a significant one from a Social Security standpoint because it's when workers born between 1943 and 1954 reach full retirement age and are thereby eligible to collect their monthly benefits without a reduction. Your full retirement age is a function of your year of birth, as follows:

### YEAR OF BIRTH

### FULL RETIREMENT AGE

1943-1954

66

1955

66 and 2 months

1956

66 and 4 months

1957

66 and 6 months

1958

66 and 8 months

1959

66 and 10 months

1960

67

Data source: Social Security Administration.

Therefore, if you were born after 1954 but before 1960, your full retirement age is 66 and a certain number of months. If you were born in 1960 or later and have a full retirement age of 67, filing for Social Security at 66 will reduce your benefits by about 6.67%. That means a full monthly benefit of \$1,500 would go down to just \$1,400 if you were to take them a year earlier.

#### Age 67

If you were born in 1960 or later, this is perhaps the age you've been waiting for, since it's when you get to take your monthly benefits in full. In our example, age 67 is when you'd get that \$1,500 we keep talking about. That said, you don't have to file for Social Security at full retirement age. You can hold off and grow your benefits for a higher monthly payout.

#### Age 68

Though 68 is hardly a common age for taking Social Security, it's a strategic one nonetheless. That's because for each year you delay your benefits past full retirement age up until age 70, you get an 8% boost in payments, which, in our ongoing example, would take a full monthly benefit of \$1,500 at 67 up to \$1,620 at 68. That increase then remains in effect for the rest of your life. Of course, not everyone wants or can afford to hold off on benefits all the way until 70, but waiting until 68 is a decent compromise -- you get a modest boost without having to wait too long.

#### Age 69

Age 69 is a good time to take your benefits if you don't need them sooner. Doing so will boost our aforementioned \$1,500 benefit to \$1,740, thus guaranteeing a higher payout for as long as you collect Social Security.

#### Age 70

The credits you accrue for delaying benefits past full retirement age stop accumulating once you reach 70. Therefore, it's considered the latest age to file for Social Security. Granted, you don't have to sign up for benefits at that time, but there's really no financial incentive not to. If you're dealing with a full retirement age of 67, filing at 70 means boosting your benefits by 24%, which would turn a \$1,500 monthly payment into \$1,860 -- for life.

Which of the above ages is the right one for you to take benefits? It depends on a host of circumstances, from your savings level to your employment status to the state of your health. The key is to understand the pros and cons of filing at various ages so you land on the one that works best for you.

04/14 Recall: 200M eggs

## SOURCE

<https://www.usatoday.com/story/money/nation-now/2018/04/14/200-million-eggs-recalled-over-salmonella-fears/518245002/>

## GIST

GREENSBORO, N.C. — More than 200 million eggs are being recalled over fears of salmonella.

Rose Acre Farms of Seymour, Ind., is voluntarily recalling the eggs due to possible contamination with the bacteria.

According to the Food and Drug Administration, 22 illnesses have been reported so far.

The eggs were distributed from the farm in Hyde County, N.C., and reached consumers in Colorado, Florida, New Jersey, New York, North Carolina, Pennsylvania, South Carolina, Virginia, and West Virginia through retail stores and restaurants.

They were sold under the brand names Country Daybreak; Crystal Farms; Coburn Farms; Sunshine Farms; Glenview; Great Value; as well as at Walmart and Food Lion stores.

The egg recall is the largest in the United States since 2010, according to Food Safety News.

The recall involves eggs with the plant number P-105, with the Julian date range of 011 through 012 printed on either side of the carton or package.

04/14 France: Syria used chemicals in attack

## SOURCE

[https://www.upi.com/Top\\_News/World-News/2018/04/14/France-issues-report-with-evidence-Assad-](https://www.upi.com/Top_News/World-News/2018/04/14/France-issues-report-with-evidence-Assad-)

## GIST

April 14 (UPI) -- In the aftermath of the early morning attacks on Syria, France declassified a report with details they say prove that a chemical attack in Syria last week was carried out by the regime of President Bashar Assad.

The seven-page report, released by the Foreign Ministry on Saturday, said chemicals used in attacks on the Damascus suburb of Douma April 7 left victims with skin and cornea burns, suffocation and other breathing difficulties and extreme salivation and secretions from the mouth and nose, all markers consistent with the effects of chlorine gas.

The report also states other strikes using chemical weapons have been carried out by the Syrian government since April 4, 2017, when a chemical attack in Syria's northern Idlib province left more than 80 civilians dead.

French President Emmanuel Macron had been under pressure to back his claim that France has "proof" of Assad's role in the chemical attack in Douma.

France joined the United States and Great Britain early Saturday in firing 105 missiles at three sites in a "proportional" attack, destroying "fundamental components" of Syria's chemical weapons infrastructure including a research center in greater Damascus, a chemical weapons storage facility and another storage facility and command center, both in Homs.

France's conclusions were supported U.S. officials who determined that chlorine and sarin, a highly toxic nerve agent, were used on the civilians in the April 7 attack.

04/15 Australia bushfire threatens Sydney

## SOURCE

<http://www.bbc.com/news/world-australia-43773656>

## GIST

Hundreds of Australian firefighters are tackling a large bushfire that has reportedly affected homes in the southern suburbs of Sydney.

The New South Wales Rural Fire Service (RFS) said it was concerned that flying embers could spark new blazes ahead of the advancing fire front.

Some residents have been instructed to seek shelter as evacuation is now too dangerous.

Recent weather in south-eastern Australia has been unseasonably hot.

Shane Fitzsimmons from the RFS said the fire was behaving "very aggressively".

Strong winds have been pushing the flames north and east towards suburban areas.

The fire has burned nearly 2,500 hectares of land, the RFS said.

More than 70 fire appliances were stationed along roads dividing bushland from homes while helicopters were dumping water on the fire from above, SBS reported.

Prime Minister Malcolm Turnbull praised the emergency response.

"It is unseasonably hot and that's a matter of obviously great concern, but we have to deal with the worst that Mother Nature can throw at us and the worse Australians are presented with by nature, the better it brings out the Australian spirit," he said.

New South Wales police have declared the area a crime scene but the RFS says it is too early to know if the fire was started deliberately, SBS reported.

04/15 Gun rights rallies at state capitols

SOURCE

<http://www.foxnews.com/politics/2018/04/15/gun-rights-supporters-hold-rallies-at-state-capitols-across-us.html>

GIST

Gun rights advocates rallied at state capitols across the country on Saturday to make their voices heard amid recent efforts to impose stricter gun-control laws that they fear undermine their Second Amendment rights.

Peaceful protesters numbering in the hundreds gathered outside statehouses from Maine to Wyoming to hear speakers warn that any restrictions on gun ownership or use could eventually lead to bans for law-abiding gun owners.

"Gun owners have been portrayed in a negative way and it is our hope that this peaceable rally will show that we are safe, law-abiding individuals that happen to take our constitutional rights very seriously," Dave Gulya, an organizer for the Maine event that attracted about 800 people, told the Bangor Daily News.

The National Constitutional Coalition of Patriotic Americans sponsored the 45 planned rallies across the U.S. in support of the right to bear arms, according to the paper.

"If you have a building and you take a brick out every so often, after a while you're not going to have a building," said Westley Williams, who joined about 100 people outside the state Supreme Court building in Cheyenne, Wyo.

An estimated 160 Second Amendment supporters rallied in Atlanta, with some carrying firearms, flags and signs saying "Don't Tread on Me" as they listened to speakers talk about gun rights.

Protesters in Vermont took to the steps of the Statehouse in Montpelier, where days earlier they felt Gov. Phil Scott "betrayed" them when he signed three major gun control measures.

"Three days ago, on these steps, we were betrayed," Joe Nagle told the Burlington Free Press. "We were promised no new gun laws."

The paper reported that the National Rifle Association criticized Scott, a Republican, and called on gun owners to abandon the governor, who changed his stance in February after an alleged school shooting plot shook the state.

Saturday's protests came less than three weeks after hundreds of thousands marched in Washington, New York and elsewhere to demand tougher gun laws after the Feb. 14 school shooting in Parkland, Fla., that killed 17. Organizers of those protests demanded a ban on assault weapons and high-capacity magazines, and called for universal background checks on potential gun owners.

Pro-gun protesters also showed up in Boston; Indianapolis; Albany, N.Y.; Austin, Texas; Des Moines, Iowa; and other cities.

04/14 Experts: strikes won't stop Syria Assad

## SOURCE

<https://www.nbcnews.com/news/world/trump-s-u-s-led-airstrike-syria-won-t-stop-n866046>

## GIST

The Pentagon boasted Saturday that its coordinated show of military force obliterated key chemical weapons facilities in Syria and set back the country's chemical weapons capabilities "for years."

But military and Middle East experts say the predawn onslaught — touted by the Defense Department as "precise, overwhelming and effective" — appears to have been little more than an empty gesture and likely did not do much to alter Syrian President Bashar al-Assad's military calculus.

Gen. Douglas Lute, the former U.S. ambassador to NATO, said that Assad's threshold for pain is very high because "he's in a fight for his life" to maintain control of his country, which has been mired in a seven-year civil war.

The airstrikes, which targeted three facilities involved in research or storage of chemical weapons in western Syria, won't disable him from taking further action — whether chemical or conventional, Lute said.

"I think he's feeling reasonably good right now," Lute said of Assad. "Some of his facilities were struck, but it doesn't really challenge his hold on the country."

But experts said it's unclear how long of an impact the strike would have on Assad's weapon capabilities and whether it would dissuade him, as intended, from using chemical weapons in the future. Syria has repeatedly denied using chemical weapons against its people.

They also said the so-called red line that the Trump administration is drawing, meant as a marker for reprisals, could be problematic.

"People will see [the reasoning for the strike] and say, 'Does that mean that Bashar al-Assad has the green light to use conventional munitions against defenseless civilians?'" said former Ambassador Lincoln Bloomfield, who served in the past three Republican administrations, most recently as the assistant secretary of state for political-military affairs under President George W. Bush.

Assad, meanwhile, appeared unruffled Saturday as he strolled into the presidential palace in Damascus, briefcase in hand and mere miles from where some of the missiles struck chemical weapons depots hours earlier, according to a video released on Twitter by the Syrian regime.

While the attack may have destroyed the facilities where Syria combines its chemical agents, the strike likely will only cripple the country's ability to deploy certain agents, such as sarin gas, experts told NBC News.

Sarin was not the only agent used in the alleged chemical attack last week on the rebel stronghold of Douma, east of Damascus, senior Trump administration officials said Saturday.

Defense Secretary James Mattis told reporters Friday that chlorine gas was also used. Experts say that it's a common industrial chemical that is not difficult to produce and can be added to a barrel bomb or improvised artillery rocket.

It's unlikely Syria's ability to produce or find the chemical were inhibited by the airstrikes in any way, said Justin Bronk, a research fellow at the Royal United Services Institute in London.

The widespread use of chlorine for commercial purposes means that it is not included in the Chemical Weapons Convention that came into effect in 1997, a point readily cited by the Russian and Syrian governments. But the use of it as a gas in war or as an attachment to an explosive does constitute a war crime, experts said, and it's a simple weapon that has roots that go as far back as World War I.

That's why some experts don't think the strategic strike on chemical weapons facilities in Syria will have a long-term effect on the Assad regime, including its military operations.

"I don't think [their chemical weapons] capability will have been affected significantly at all," Bronk said.

"And the delivery mechanism that is the Syrian Air Force — we have not seen much in terms of bases being hit as opposed to chemical facilities. The aircraft were mostly evacuated so they would have remained untouched."

04/14 Closer look at targets hit in Syria

## SOURCE

<https://www.cbsnews.com/news/syrian-airstrikes-hit-chemical-weapons-facilities-2018-04-14/>

## GIST

The U.S., together with the U.K. and France, targeted three sites in Syria overnight in response to the Syrian regime's alleged use of chemical weapons on civilians last weekend. The Pentagon said a total

of 105 weapons were launched in the operation.

"This is going to set the Syrian chemical weapons program back for years," Lt. Gen. Kenneth McKenzie, a director of the Joint Chiefs of Staff, said Saturday morning.

Chief Pentagon spokeswoman Dana White described the target choices as "very methodical" and called it a "deliberate decision" to go after chemical weapons facilities.

"The strikes went at the very heart of the enterprise to the research, to develop, to storage. So we are very confident that we have significantly crippled Assad's ability to produce these weapons," White said.

Barzeh research and development center, Damascus

The Pentagon said 76 missiles were aimed at the research center located northeast of central Damascus. McKenzie said 57 of the missiles were Tomahawk missiles, adding that the strikes "successfully destroyed" three buildings in the city.

The research center was used for development, production and testing of chemical and biological warfare technology, Chairman of the Joint Chiefs Gen. Joseph Dunford said at a news conference Friday.

Britain's Ministry of Defense said the facility was a former missile base where the Syrian regime keeps "chemical weapon precursors stockpiled in breach of Syria's obligations under the Chemical Weapons Convention." It said the facility is located "some distance from any known concentrations of civilian habitation, reducing yet further any such risk."

Images from The Associated showed the damage to the facility that was essentially reduced to rubble.

CBS News correspondent Seth Doane visited the site Saturday where the complex once stood. He spoke with a scientist only identified as Sayed who said his office -- and life's work -- were inside the building.

Sayed said he'd worked there for 38 years and cried when he saw the complex in ruins. He said it's "totally incorrect" that chemical weapons were being developed there. "The Organization for the Prohibition of Chemical Weapons (OPCW) visited here and didn't report anything wrong with this place," he said.

Him Shinshar chemical weapons storage site, west of Homs

The facility is located 15 miles west of Homs and was the primary location of Syrian serin and precursor production equipment, Dunford said.

Twenty-two weapons were aimed at the site, including naval cruise missiles and scout teams, McKenzie said Saturday.

Second chemical weapons storage site, west of Homs

Seven missiles targeted the bunker, which was successfully hit, Gen. McKenzie said Saturday. He said the missiles were delivered from British, French and U.S. from the Mediterranean, and each strike hit around 4 a.m. in Syria.

"This strike aimed to deliver a clear and unambiguous message to the Syrian regime that their use of chemical weapons against innocent civilians is inexcusable and to deter any future use of chemical weapons," McKenzie said Saturday.

He said initial indications showed the strikes accomplished the Pentagon's "military objections without material interference from Syria."

04/14 Warship ruse, new stealth missiles

## SOURCE

<https://www.bloomberg.com/news/articles/2018-04-14/warship-ruse-and-new-stealth-missiles-how-they-attacked-syria>

## GIST

President Donald Trump's outrage over another apparent chemical weapons attack by Syrian President Bashar al-Assad was clear. And for the second time in his presidency, the U.S. commander-in-chief demanded retaliation.

As images of sick or dying children flooded global media all week, the U.S. guided-missile destroyer USS Winston Churchill churned toward the Mediterranean to join a flotilla of allied warships, including another U.S. destroyer, the USS Donald Cook.

It was a ruse.

While both vessels carry as many as 90 Tomahawk missiles -- the main weapon used in the Friday evening strike on Syria -- neither ship in the end fired a shot. Instead, according to a person familiar with White House war planning, they were part of a plan to distract Russia and its Syrian ally from an assault Assad's government could do little to defend itself against.

It worked. Pentagon officials on Saturday said they faced little resistance to their targeted attack on what they said were three Syrian chemical weapons facilities. Most of the Syrian countermeasures, including defensive ballistic missiles, were fired after U.S. and allied weapons hit their targets, Lieutenant General Kenneth McKenzie told reporters on Saturday.

"No Syrian weapon had any effect on anything we did," McKenzie said. He described the joint U.S., French and U.K. strike as "precise, overwhelming and effective."

Brazen as it was perceived to be, the Assad regime's decision to again use chemical weapons on own people didn't by itself spur the U.S. to act. The Trump administration was also motivated by how closely the attack followed the use of a nerve agent to poison a Russian ex-spy and his daughter in England in March, an action the U.K. government and its allies blamed on Russia.

The English incident added to concerns held by Trump, his top aides, and leaders in the U.K. and France that not responding might encourage proliferation of chemical weapons, according to two administration officials who spoke on condition of anonymity to discuss the deliberations.

As the strategy of how to respond took shape, Trump appeared to telegraph his intentions to the world with a tweet on April 11: "Russia vows to shoot down any and all missiles fired at Syria. Get ready Russia, because they will be coming, nice and new and 'smart!'"

Analysts suggested Assad's regime would respond to Trump's threats by protectively moving weapons and personnel away from likely targets. An already difficult battle plan -- which required hitting Assad without provoking Russian reprisals or injecting the U.S. further into Syria's seven-year civil war -- was getting harder.

In the White House, Trump met with military officials and made several calls to his French and British counterparts, President Emmanuel Macron and Prime Minister Theresa May, with the goal of following through on a threat to impose a "big price" on Syria -- a vow made in an earlier tweet, on April 8.

During a meeting with the National Security Council and top military leaders early in the week, Trump had been presented five large target options -- called sets -- for potential strikes, according to the person familiar with the plans. The president largely listened as Pentagon chief Jim Mattis, Joint Chiefs Chairman Marine Corps General Joe Dunford and other military leaders did most of the talking. New National Security Adviser John Bolton -- who started work on April 9 -- and Vice President Mike Pence were also on hand.

The president asked Bolton and the military leaders to justify each potential target, and was particularly focused on limiting the risk of escalation by Russia. There was unanimity among Trump's top national security staff about conducting strikes but debate about how hard to hit the Syrians, the person said.

Trump, who just a week earlier said he wanted to pull U.S. troops out of Syria "very soon," didn't want to become drawn into the civil war there and instead focused the military response on deterring the use of chemical weapons, according to the official.

With the allies on board and the USS Winston Churchill arriving in the Mediterranean region, the attack was nearly under way.

As the president addressed the nation at 9 p.m. Washington time, on Friday, a barrage of 105 U.S., U.K. and French missiles converged on Syria. They came from the Red Sea, the Arabian Gulf and the Mediterranean, homing in from three directions to overwhelm whatever missile defenses Assad's regime might deploy. Russia's more advanced air defense system didn't engage the allied weapons.

According to the Pentagon, the allied weaponry included 19 new "Extended-Range" stealthy Joint Air-to-Surface Standoff Attack Munitions launched by two B-1B bombers based out of Al Udeid Air Base, Qatar, and six Tomahawk cruise missiles launched from the Virginia-class USS John Warner submarine. The bomber-launched missiles, built by Lockheed Martin Corp., had never been used in combat.

The cruiser USS Monterey fired 30 Tomahawks and the destroyer USS Laboon fired seven Tomahawks from the Red Sea. The destroyer USS Higgins fired 23 Tomahawks from the North Arabian Gulf, according to McKenzie.

The weapons also included French SCALP-EG cruise missiles and British Storm Shadow standoff missiles launched by Tornado and Typhoon jets. Nine SCALP missiles were fired at what the Pentagon said was a chemical weapons storage complex at Hims-Shinshar, along with two SCALPS, nine Tomahawks and eight Storm Shadows.

04/15 Caravan migrants on freight train to US

## SOURCE

<https://www.cnn.com/2018/04/14/americas/central-america-migrant-caravan-train/index.html>

## GIST

Tultitlán, Mexico (CNN)A stampede of Central American migrants rushed to the tracks Saturday when the first whistle of the train rang out.

After a few days in Mexico City, it was time to continue their journey north to the US border. About 500 migrants traveling in a caravan climbed onto the freight train just outside the Mexican city of Tultitlán.

They were about 1,500 miles south of the US-Mexico border as they started heading northwest to the city of Celaya.

As the train slowed down, migrants scrambled around the train cars to find a way to climb aboard, throwing small bags of belongings onto the train and hastily helping one another.

Police and guards watched from a few feet away. Some took photos. None took action to stop the migrants as they climbed the train.

As migrants set makeshift tents with blankets to protect them from the dusty wind and scorching sun, people from the ground and a bridge above waved. Some tossed water and snacks. As the train pulled forward, one migrant yelled out, "Gracias Mexico!" ("Thank you Mexico!")

More than 1,100 people set on the journey across Mexico on March 25, but they have dispersed into smaller groups as they headed north, organizers said.

The government of Mexico has granted many of the migrants temporary permission to stay in the country. Most of the migrants agree Mexico has been a welcoming place. Police have escorted the caravan at times and stopped traffic to help the convoys stay together. Churches and shelters have opened their doors, providing food and a safe place to sleep. Some of the migrants have decided to stay in Mexico.

The migrants, most from Honduras, say they are fleeing violence and poverty. Honduras and El Salvador are among the countries with the highest homicide rates in the world.

04/14 US confident Syria used chlorine, sarin

## SOURCE

<https://www.cnn.com/2018/04/14/politics/us-chlorine-sarin-syria/index.html>

## GIST

(CNN)Senior US officials expressed confidence Saturday that both chlorine and sarin gas were used in Syria's alleged chemical weapons attack on the Damascus enclave of Douma last week -- a conclusion that went a step further than Vice President Mike Pence did in his remarks earlier Saturday.

"While the available information is much greater on the chlorine use, we do have significant information that also points to sarin use," a senior administration official said on a call with reporters, citing reports from media, nongovernmental organizations and other open sources.

"They do point to miosis -- constricted pupils -- convulsions and disruptions to central nervous systems. Those symptoms don't come from chlorine. They come from nerve agents. ... It's a much more efficient weapon, unfortunately, the way the regime has been using it, and it's resulted in higher deaths, it resulted in terrible pictures."

The comments come a day after the United States launched targeted airstrikes against suspected chemical weapons facilities in Syria in coordination with the British and French.

Earlier Saturday, Pence held off from expressing a final judgment about whether sarin gas was deployed in the chemical weapons attack.

"Chlorine and possibly nerve agents were used," Pence said during his address at the Summit of the Americas in Peru.

Another administration official laid out evidence on Saturday for the United States' conclusion that Syrian President Bashar al-Assad's government was behind the chemical weapons attack; that included eyewitness accounts of Syrian government helicopters circling the site of the attack on April 7 and high-resolution photos that "clearly" documented asphyxiation and foaming at the mouth.

"Assad has established himself as a user of chemical weapons" from past attacks, the official added.

Another official said, "We have incontrovertible evidence from the photos" that chemical weapons were used and it was "clear to the international community."

The administration maintains that it "exhausted every avenue in the international community" for diplomacy and sanctions before launching the missile strike, and that the President and allies felt the appropriate response was military action.

US officials said they hope the strike will serve to deter Syria's government from using chemical weapons in the future.

"If this step does not succeed, we will be prepared to act again," an official said on the call, echoing what other top administration officials emphasized on Saturday. Whether or not that happens is up to Syria and also Russia, the officials said.

04/15 US, allies: end Syria chem. program

## SOURCE

<https://www.cnn.com/2018/04/15/middleeast/us-uk-france-russia-un-syria-intl/index.html>

## GIST

(CNN)The United States, the United Kingdom and France are pushing for an "irreversible" end to Syria's chemical weapons program, amid furious recriminations from Russia over the effectiveness and legality of a wave of US-led missile strikes on Syrian targets.

UN diplomats shared with CNN a new resolution, led by France and backed by the US and the UK, calling for an independent investigation into the suspected chemical weapons attack inside Syria that precipitated the cruise missile strikes unleashed by the Western allies Friday.

France's ambassador to the United Nations, Francois Delattre, said Syria's chemical weapons program must be dismantled in a "verifiable and irreversible way."

The renewed push for a UN-backed diplomatic solution follows a volatile emergency meeting of the UN Security Council, called by Moscow Saturday, with Russia's UN ambassador, Vassily Nebenzia, condemning the joint US-British-French strikes as a violation of international law.

Nebenzia said Friday's missile strikes, targeted at facilities associated with the Syrian regime's chemical weapons program, had been a "blow to the political settlement" in the divided Middle Eastern nation.

The Russian-led response to the strikes, though limited to words, comes amid days of building pressure and talk among UN diplomats of a potential new Cold War.

UN Secretary-General Antonio Guterres has urged all Security Council members to show restraint, as US Ambassador to the UN Nikki Haley told the meeting that Washington remains "locked and loaded" to respond to any future Syrian chemical attacks.

Outside of the UN, protests against the strikes were held around the world Saturday, including in major cities in the US, Mexico, Greece and the UK.

While some of the protestors came out in support of Syrian President Bashar Al-Assad's regime, many others were opposed to the use of military action by Western powers against Syria.

04/14 Russia: Western-designed nerve agent

## SOURCE

<http://abcnews.go.com/International/wireStory/russia-trace-western-made-nerve-agent-uk-samples-54468326>

## GIST

Russia's foreign minister says Moscow has received a document from a Swiss lab that analyzed the samples in the nerve agent poisoning of an ex-Russian spy, which points at a Western-designed nerve agent as a likely cause.

Minister Sergey Lavrov said Saturday that Moscow received the confidential information from the

laboratory in Spiez, Switzerland, that analyzed samples from the site of the March 4 poisoning of Sergei Skripal and his daughter in the English city of Salisbury.

He said the analysis was done at the request of the Organization for the Prohibition of Chemical Weapons.

The OPCW's report confirmed British findings that the Skripals were poisoned with a military-grade nerve agent, but didn't say who was responsible.

Britain has accused Russia of poisoning them with a Soviet-designed agent, an accusation that Moscow denies.

Lavrov said the document indicated that the samples from Salisbury contained BZ nerve agent and its precursor. He said BZ was part of chemical arsenals of the U.S., Britain and other NATO countries, while the Soviet Union and Russia never developed the agent.

Lavrov added that the Swiss lab also pointed at the presence of the nerve agent A234 in the samples, but added that the lab noted that its presence in the samples appeared strange, given the substance's high volatility and the relatively long period between the poisoning and the sample-taking.

He noted that OPCW's report didn't contain any mention of BZ, adding that Russia will ask the chemical weapons watchdog for an explanation.

Britain said that the A234 agent belonged to the family of Soviet-designed nerve agents dubbed Novichok.

04/15 Thousands protest in Athens against US

SOURCE

<http://abcnews.go.com/International/wireStory/thousands-protest-athens-us-led-syria-airstrikes-54478012?>

GIST

Thousands of Greeks turned up at a rally and march in central Athens organized by the Communist Party to protest the U.S.-led airstrikes against Syria.

The protesters gathered Saturday at Athens' central Syntagma Square before marching to the U.S. Embassy, chanting anti-U.S. slogans and carrying banners. Some wrote on the pavement in red paint: "Americans, murderers of people."

Police vehicles barricaded access to the embassy and protesters left peacefully.

Dimitris Koutsoumbas, the Communist Party's leader, blasted Greek politicians for believing "flimsy excuses about a use of chemical weapons" by Syria. He also criticized their "subservience" to the EU and NATO, as well as their support for Israel.

He told the crowd "the imperialists once again spill the blood of the local people. They destroy and splinter states by using fabricated evidence."

04/15 Israel: Hamas tunnel network destroyed

## SOURCE

<http://abcnews.go.com/International/wireStory/israel-destroys-hamas-tunnel-network-gaza-54478033?>

## GIST

The Israeli military said Sunday it has destroyed a Gaza attack tunnel built by Hamas militants that penetrated Israeli territory.

Lt. Col. Jonathan Conricus, a military spokesman, said the new Hamas tunnel was connected to a network dug in the northern Gaza Strip and entered Israel near the Israeli community of Nahal Oz. It's the fifth such Hamas tunnel Israel has destroyed in as many months.

Conricus said the tunnel was adjacent to the site of recent mass protests, which Israel says Hamas is using as a cover for attacks.

Conricus said Hamas began building the tunnel following the 2014 war. Israel has placed a high priority

on halting the tunnel threat since Hamas infiltrated Israel during the war. Although they did not manage to reach civilian areas, the infiltrations caught Israel off guard, with one attack killing five soldiers, and terrified the local population.

In two weeks of protests, 28 Palestinians have been killed and more than 1,500 wounded by Israeli fire. The marches have been organized by Gaza's militant Hamas rulers, but large turnouts on two preceding Fridays were also driven by Gaza's dire living conditions and desperation among the territory's 2 million residents, who have been enduring a crippling border closure by Israel and Egypt since 2007.

Defense Minister Avigdor Lieberman said this was the longest and deepest tunnel Israel has discovered thus far.

"It's a tunnel that cost millions of dollars to dig, money that instead of going to ease the hardship of Gaza's residents has sunk in the sand," he said. "Residents of Gaza: Hamas is burning your money on tunnels to nowhere."

Hamas had no immediate comment.

04/15 France urges Russia join peace push

## SOURCE

<http://abcnews.go.com/International/wireStory/france-urges-russia-join-peace-push-syria-strike-54478584?>

## GIST

France is urging Russia to join a push for a political solution in Syria after joint U.S., French and British attacks on Syrian chemical weapons sites.

French Foreign Minister Jean-Yves Le Drian said in an interview published Sunday in the Journal du Dimanche newspaper that "we should join our efforts to promote a political process in Syria that would allow a way out of the crisis."

France has continued to talk regularly with Russia even as East-West tensions have grown. French President Emmanuel Macron spoke with Russian President Vladimir Putin on Friday, hours before the

Western missile strikes.

Western countries blamed Syria's government for a chemical attack on a rebel-held area earlier this month that killed more than 40 people. The Syrian government and its ally Russia denied the allegations.

## GIST

The U.S. announced that overnight airstrikes succeeded in dealing a severe blow against the Syrian government's capacity to use chemical weapons.

But U.N. Ambassador Nikki Haley also warned Saturday that the U.S. is "locked and loaded" in case Syrian President Bashar al-Assad uses chemical weapons again.

"Last night, we successfully hit the heart of Syria's chemical weapons enterprise, and because of these actions, we are confident that we have crippled Syria's chemical weapons program," Haley said at an emergency meeting of the U.N. Security Council. "I spoke to the president this morning and he said that if the Syrian regime uses this poisonous gas again, the United States is locked and loaded."

She added, "When our president draws a red line, our president enforces the red line."

The Security Council meanwhile rejected a Russian resolution calling for condemnation of the "aggression" by the U.S. and its allies against Syria. Only two other countries, China and Bolivia, joined Russia in supporting the resolution. Eight countries voted against it, and three abstained. A resolution needs at least nine "yes" votes to pass.

Anatoly Antonov, Russia's ambassador to the United States, tweeted that the strike would have repercussions. "We warned that such actions will not be left without consequences."

04/13 Report: Seattle w/most regressive taxes

## SOURCE

<http://mynorthwest.com/953315/seattle-regressive-taxes/>

## GIST

Washington state's tax system has been called the most unfair to the poor in the nation. Now, Seattle is ranked as having the most regressive taxes in the state.

According to a report from the Economic Opportunity Institute, a Seattle household making \$25,000 per year pays 17 percent of its income in state and local taxes. Meanwhile, a household earning \$250,000 pays just 4.4 percent.

"Even if public expenditures are relatively progressive in nature, city projects are increasingly being built on the backs of those who can least afford to pay for them," the report from the Institute states.

Seattle, the Institute criticizes, likes to imagine itself as a progressive beacon. But of the major cities in Washington, it's Spokane that has the least regressive taxes. A household earning \$25,000 has 10.4 percent of its income taxed

Of course, King County voters tend to approve higher taxes to fund schools and projects more than outside cities.

But Seattle is trapped within the state's already regressive tax system.

"Every major statewide tax in Washington is regressive," according to the report.

04/13 Probe: SPD cops violated force policy

## SOURCE

<https://www.seattletimes.com/seattle-news/two-seattle-officers-violated-force-policies-in-eastlake-shooting-internal-probe-finds/>

## GIST

Two Seattle police officers violated policies when they fired a barrage of gunshots that injured the driver and passenger of a stolen car fleeing an Eastlake alley in October, the department's internal-investigation unit has found.

The Office of Police Accountability (OPA) recommended that allegations regarding excessive use of force, use of deadly force on a fleeing person and firing weapons at a moving vehicle be sustained, said Andrew Myerberg, OPA's civilian director.

Myerberg said the officers' chain of command agreed with the findings, which were jointly submitted to Interim Police Chief Carmen Best for a final decision and any potential disciplinary action.

Neither officer was named by the OPA, but the department has previously identified them as Officer Kenneth Martin and Officer Tabitha Sexton. They will be given the opportunity to meet with the chief before a decision is reached. Hearings have been set for May.

In Martin's case, the OPA recommended that an additional allegation of failure to de-escalate the situation also be sustained.

No details on the findings were released. The Seattle Times has filed a public-disclosure request for the OPA's written findings and analysis. Kevin Stuckey, president of the Seattle Police Officers' Guild, could not be reached for comment.

On Oct. 8, Martin and Sexton fired dozens of rounds at a fleeing Subaru in an alley west of the 2200 block of Yale Avenue East. Video footage captured by officers' body cameras and dashboard cameras was released by the department's public-affairs office two days after the incident.

Police had responded to a call reporting two people using drugs and possibly handling a gun inside a car.

The video shows officers moving toward a car as an officer asks "is that them right there?" Officers then

yell for one of the individuals to get on the ground, but the person ran toward the car.

The video then shows four officers running toward the car, with one of them — identified as Martin — standing in front of the car and moving out of the way as the driver leaves a parking stall and heads north through the alley.

Martin and Sexton initially opened fire as the car pulled out. The driver briefly stopped the car twice as the officers opened fire again with numerous gunshots. The driver then turned the vehicle right and drove off.

The driver and passenger were not seriously hurt and were arrested later in Everett.

In charging documents filed against both occupants of the car, a Seattle police detective wrote that as officers approached the car on foot, they shouted commands that the suspects ignored.

Martin was standing in front the car, and patrol-car video showed the driver accelerated forward and struck Martin as he was trying to get out of the way, according to the detective.

“To stop the imminent threat, officers fired their firearms,” the detective wrote.

One issue to arise in the incident was whether the officers had justification to fire the second volley of shots, when the car appeared to be driving away.

According to the Police Department’s manual, officers shouldn’t fire at a moving vehicle “unless a person in the vehicle is immediately threatening the officer or another person with deadly force by means other than the vehicle.” The manual states that the moving vehicle itself shall not “presumptively constitute a threat that justifies” deadly force.

Officers also should move out of the path of a vehicle unless the person is immediately threatening the officer or another person.

King County prosecutors conducted a preliminary review of the incident, but tentatively declined to bring criminal charges against Martin and Sexton. Prosecutors, who will make a final determination later, returned the case to the Police Department for further investigation.

Myerberg said the OPA didn't reach a conclusion on whether the two officers committed violations of law, leaving that decision to prosecutors.

Prosecutors charged a man and his mother in connection with the stolen car after their fingerprints were found on the Subaru Impreza, according to court documents. The car had been found abandoned in North King County.

Joshua Brooks, 21, the driver, pleaded guilty April 5 to possession of a stolen vehicle and is awaiting sentencing. His mother, Wendy Lee, 46, who pleaded guilty to taking a motor vehicle without permission, was sentenced in December to 49 days of time served in the King County Jail.

Before they were booked into jail, Brooks and Lee were both treated at Harborview Medical Center for injuries suffered in the shooting. Brooks had two gunshot wounds to his lower back, and Lee's lower back and legs were peppered with tiny pieces of shrapnel, according to court documents.

04/13 Everett, KCSO plan new gang units

## SOURCE

<http://q13fox.com/2018/04/13/gang-units-what-are-they-and-do-we-need-them/>

## GIST

EVERETT, Wash. – From Snohomish to Pierce counties, we've seen an increase in gang violence.

Just months after Everett elected a new mayor, police say a 13-year-old with gang affiliation shot and killed a 14-year-old.

"My focus is on public safety and gang violence. We're seeing a real uptick and it's frightening, the age of the kids we're seeing," said Everett Mayor Cassie Franklin.

To combat that, the Everett Police Department is now working on putting together a new gang unit.

There's talk of the same thing in King County after 13-year-old Elizabeth Juarez and 19-year-old

Eveona Cortez were shot and killed in Burien in late March.

“Talking to the sheriff {Mitzi Johanknecht} today, she would like to get a gang unit, maybe not just in King County maybe not just in Burien, but getting all the agencies involved,” said county sheriff’s Sgt. Ryan Abbott.

Jonathan Wender is a 20-year police veteran and the CEO and president of Polis Soutions, a consulting firm that helps train police departments across the nation in partnership with the Department of Justice. He says now is the time to bring back gang units that were disbanded across the Puget Sound.

“We have an uptick in gang activity now and we want to reallocate those resources to address that issue,” said Wender.

He says gang unit members play a vital role in stopping gun violence. But he says it means either adding more funding to hire more officers or shifting some current officers and deputies to the newly formed gang unit.

“It means they’re good investigators, they have unimpeachable honesty, they’ve got credibility, they can be firm, and they can be fair,” said Wender.

Wender says gang units are more than just about learning gang signs, or knowing who wears which color, or if this is graffiti or tagging.

“It’s really not a secret who those folks are. The challenge is that you can build up a relationship with them, that you can deal with crimes when they occur but most importantly prevent the crimes from occurring in the first place,” said Wender.

The emotions from a vigil in Burien for the two slain teenagers show the damage gangs can do in a community, but Wender says a gang unit isn’t the only solution.

“It’s not an either-or proposition. Do we need more case workers? Do we need more drug and alcohol treatment, better mental health care? Absolutely,” said Wender.

In about a month, Everett police say they’ll have the groundwork laid for the new gang unit. It’ll be just in time for the normal uptick in gun and gang violence we normally see across the area during the

warmer, summer months.

04/13 DOJ demands Seattle documents

#### SOURCE

<https://www.kiro7.com/news/local/doj-demands-seattle-give-documents-related-to-compliance-with-immigration-authorities/731916316>

#### GIST

The U.S. Department of Justice on Thursday, April 12, sent letters to the city of Seattle and the state of Vermont demanding they produce documents that show whether each jurisdiction is “unlawfully restricting information sharing by its law enforcement officers with federal immigration authorities.”

An excerpt from the DOJ announcement is below:

"The Department of Justice previously contacted these jurisdictions and raised concerns about laws, policies, or practices that may violate 8 U.S.C. § 1373, a federal statute that promotes information sharing related to immigration enforcement and with which compliance is a condition of FY2016 and FY2017 Byrne JAG awards.

"The letters also state that failure to respond, respond completely, or respond in a timely manner will be subject to a Department of Justice subpoena."

What's happening Friday?

The federal government is demanding documentation proving that local law enforcement has been compliant with a law that requires cooperation with federal agencies, including ICE. It's telling Seattle to hand over documents to that end or they will be subpoenaed anyway. If Seattle is found to be uncompliant, it could face federal funding cuts.

What federal funding?

Byrne Grants. The letter says: "These materials are critical to our ongoing review. Should the Department determine your jurisdiction is out of compliance with section 1373, the Department may, as detailed in your award documents, seek return of your FY 2016 grant funds, require additional conditions for receipt of any FY 2017 Byrne JAG funding for which you have applied, and/or deem you ineligible for FY 2017 Byrne JAG funds."

What's a Byrne Grant?

The Edward Byrne Memorial Justice Assistance Grants Program (Byrne JAG) is the cornerstone federal crime-fighting program, enabling communities to target resources to their most pressing local needs.

How has it helped the state of Washington?

Law enforcement agencies in Western Washington get nearly \$8 million in federal grant funding for a range of projects designed to enhance community safety and improve crime fighting technologies, announced U.S. Attorney Annette L. Hayes.

King County called this kind of action bullying last July.

NEW FEDERAL REQUIREMENT: Certify compliance with Section 1373, a federal statute applicable to state and local governments that generally bars restrictions on communications between state and local agencies and officials at the Department of Homeland Security

CURRENT KING COUNTY POLICY: King County has always been in compliance with U.S. Code Section 1373. As it relates to immigration enforcement, King County does not ask people for their immigration status and does not collect immigration information

04/14 Putin sits back as US strikes Syria

## SOURCE

<https://www.stripes.com/news/europe/putin-sits-back-as-us-allies-strike-syria-1.522046>

## GIST

MOSCOW — Facing a stark choice between engaging the United States, Britain and France in combat or passively watching them strike his ally, President Vladimir Putin has opted for the peaceful route. That cautious response may dent the Russian leader's tough-man image but it won't undermine his gains in Syria or erode his authority at home.

The Kremlin had warned Washington that Russia would fend off any strike that jeopardized its servicemen in Syria, and the West respected the red line by giving advance notice of Saturday's attack, just as it did a year ago when it struck a Syrian air base. Russia had sat idle back then, but this time, it had threatened to retaliate.

Such a clash could have quickly spun out of control — an extremely dangerous scenario that was widely compared to the 1962 Cuban missile crisis, when the world narrowly escaped a nuclear conflict.

"With our allies, we ensured that the Russians were warned ahead of time," said French Defense Minister Florence Parly. The U.S.-led strike was a response to a purported chemical attack on civilians in the Syrian town of Douma on April 7. Russia said its experts found no trace of chemical agents.

A senior French official noted that President Emmanuel Macron did not tell Putin about the strikes when they spoke on the phone Friday, but "certain de-confliction mechanisms" had already been triggered by that point, and "both knew that a new phase was going to begin quickly."

Putin condemned Saturday's strikes as an "act of aggression" that will worsen the humanitarian catastrophe in Syria and have a "destructive influence on the entire system of international relations." He criticized Washington and its allies for attacking without waiting for inspectors from the international chemical weapons watchdog group to visit Douma, just outside Damascus.

The Russian military said its air defenses at two bases in Syria tracked the incoming missiles but didn't engage them.

Russian social media buzzed Saturday with angry nationalist comments blasting Putin for failing to protect his ally. But state TV focused on criticizing the West for acting on the basis of what Moscow called a faked chemical attack.

The Kremlin's tight control over the media will help Putin avoid any significant damage to his carefully nurtured image of a strong leader.

In fact, his cautious stance could boost his popularity further amid fears of war that swept Russia. In recent days, state media have been offering tips on how to behave in a nuclear conflict and what supplies to take to bomb shelters.

Most Russians will now heave a sigh of relief and feel grateful to Putin for pulling back from the brink. State TV channels compared what they described as U.S. President Donald Trump's reckless action with the responsible, statesmanlike stance taken by Putin.

Fyodor Lukyanov, head of the Council for Foreign and Defense Policies, an association of top Russian foreign policy and security experts, said on state TV that Moscow's warning to strike back "clearly hasn't come unnoticed by the Pentagon, and the strike was quite careful."

The Kremlin will also use the crisis to advance its narrative of an aggressive West that plunges the world into chaos and disregards international law. Russian officials and lawmakers compared it to the 2003 invasion of Iraq that was launched on claims that Baghdad was developing suspected nuclear weapons — allegations that proved to be false.

Commentators on state TV argued that Trump and British Prime Minister Theresa May launched the attack to distract attention from their political problems at home.

For now, Putin has limited his response to calling an urgent meeting of the U.N. Security Council.

No military measures were immediately announced, but in a clear warning to the U.S. and its allies, Col. Gen. Sergei Rudskoi of the Russian military's General Staff said Moscow could boost Syria's Soviet-era air defense assets with batteries of state-of-the-art S-300 missiles. He noted that Moscow so far has heeded Western requests not to provide the missiles to Damascus, but said it may now reconsider.

Rudskoi added that Moscow could also supply long-range missiles to unidentified other countries, a possible reference to Iran that has taken deliveries of S-300s in the past.

The statement clearly was aimed at discouraging the West from more attacks on Syria that could endanger Assad's gains on the battlefield, where Russian support has helped him secure control of most strategic areas.

#### GIST

UNITED NATIONS (Reuters) - U.N. Secretary-General Antonio Guterres urged all states on Saturday "to show restraint in these dangerous circumstances and to avoid any acts that could escalate matters and worsen the suffering of the Syrian people."

He said international investigators were in Syria and ready to visit the site of a suspected deadly chemical weapons attack in Douma, which prompted military action by the United States, France and Britain.

#### SOURCE

<https://www.reuters.com/article/us-mideast-crisis-syria-britain/britain-attacks-syria-with-cruise-missiles-to-deter-more-chemical-attacks-idUSKBN1HL037>

GIST

LONDON (Reuters) - Britain struck Syria with air-launched cruise missiles on Saturday to cripple President Bashar al-Assad's chemical weapons facilities and prevent what Prime Minister Theresa May cast as a global slide towards their greater use.

Four Royal Air Force Tornado jets from the Akrotiri base in Cyprus fired Storm Shadow missiles at a military facility near Homs where it was assessed that Syria had stockpiled chemicals, Britain's Ministry of Defense said.

May said the strike was "limited and targeted" and came after intelligence indicated that Syrian military officials had co-ordinated a chlorine attack in the Damascus suburb of Douma on April 7.

Missile attacks by the United States, France and Britain had been aimed at deterring Assad's further use of chemical weapons and were not an attempt to topple the Syrian government, May said. The mission had been a success, she said.

04/14 France: Syria chem. capacity weakened

SOURCE

<https://www.reuters.com/article/us-mideast-crisis-syria-homs/france-says-syrias-capacity-to-produce-chemical-weapons-considerably-weakened-idUSKBN1HL12K?il=0>

GIST

PARIS (Reuters) - The capacity of the Syrian regime to produce and store chemical weapons has been "considerably weakened" after the air strikes conducted by the French, U.S and British military on Saturday, Defense Minister Florence Parly said.

Parly said some of the strikes had targeted two sites used by Bashar al-Assad's regime to store and assemble chemical weapons near the Syrian city of Homs.

"The mission is a success. The goals had been carefully chosen and I observe that there are no incidents to report between our forces and other forces active in the region," Parly told a news

conference.

French army chief Francois Lecointre added Syria's ground-to-air defense system had been effective but that its efficiency proved "very limited." Russian assets deployed in Syria were "neither active nor proactive" he said.

He added that there was no reason to think there could have been any collateral victim.

04/14 Iran: West attack on Syria 'a crime'

## SOURCE

<https://www.reuters.com/article/us-mideast-crisis-syria-iran-guards/irans-supreme-leader-says-western-attack-on-syria-a-crime-idUSKBN1HL0DO>

## GIST

ANKARA (Reuters) - Iran's Supreme Leader Ayatollah Ali Khamenei said coordinated air strikes on Syria by the United States, France and Britain on Saturday were a crime that would bring no benefit.

"Today's dawn attack on Syria is a crime. I clearly declare that the president of the United States, the president of France and the British prime minister are criminals," Khamenei said in a speech, according to his Twitter account.

"They will not benefit (from the attack) as they went to Iraq, Syria and Afghanistan in the past years and committed such crimes and did not gain any benefits," Khamenei added.

Iran — the dominant Shi'ite Muslim power which is in rivalry with Saudi Arabia and the United States' other Sunni Arab allies — has been Syrian President Bashar al-Assad's most supportive ally against insurgents throughout the conflict.

Militias backed by Tehran helped Assad's army stem rebel advances and, following Russia's entry into the war in 2015, turn the tide decisively in the Syrian government's favor.

Iran's pragmatist President Hassan Rouhani warned that the U.S.-led missile attacks would lead to

further destruction in the Middle East, the semi-official Tasnim news agency reported.

“Such attacks will have no result but more destruction ... the Americans want to justify their presence in the region by such attacks,” Rouhani was quoted as saying, signaling that Iran’s support for Assad would grow.

04/13 Syria vows to press war against rebels

## SOURCE

<https://www.reuters.com/article/us-mideast-crisis-syria-army/syrian-army-vows-to-press-war-rebels-say-strikes-not-enough-idUSKBN1HL0BG>

## GIST

BEIRUT (Reuters) - The Syrian opposition said Western strikes on Saturday would not change the course of the seven-year-old war as the army said it would crush remaining rebel parts of the country.

The missiles by the United States, Britain, and France targeted President Bashar al-Assad’s chemical weapons capabilities in response to a deadly poison gas attack near Damascus a week ago, Washington said.

But rebels and opposition politicians said the Western powers should also hit Assad’s conventional weapons which have killed many more people during the war.

Some insurgent officials said they feared an onslaught against the rebel bastion of Idlib, which a senior Iranian official has indicated could be the next target.

“Maybe the regime will not use chemical weapons again, but it will not hesitate to use weapons,” opposition leader Nasr al-Hariri said.

A rebel fighter said he was bracing for further attacks as “revenge” by the government with its allies on rebel territory in the northwest, including the Idlib region.

“More was expected from the American strike to affect the path of the war and to curb Assad’s crimes,”

he told Reuters from Hama province.

Damascus and its allies have said reports about poison gas in Douma were fabricated as a pretext for Western strikes.

04/13 UN puts Myanmar military on blacklist

## SOURCE

<http://www.foxnews.com/world/2018/04/13/myanmar-military-put-on-un-blacklist-for-sexual-violence.html>

## GIST

UNITED NATIONS – A U.N. report puts Myanmar's armed forces on a U.N. blacklist of government and rebel groups "credibly suspected" of carrying out rapes and other acts of sexual violence in conflict for the first time.

An advance copy of Secretary-General Antonio Guterres' report, obtained Friday by The Associated Press, says international medical staff in Bangladesh have documented that many of the nearly 700,000 Rohingya Muslims who fled from Myanmar "bear the physical and psychological scars of brutal sexual assault."

The U.N. chief said the assaults were allegedly perpetrated by the Myanmar Armed Forces "at times acting in concert with local militias, in the course of military 'clearance' operations in October 2016 and August 2017."

Guterres said this was part of a strategy "to humiliate, terrorize and collectively punish the Rohingya community."

04/13 Arizona to require 'travel ID' for TSA

## SOURCE

<http://www.foxnews.com/travel/2018/04/13/arizona-residents-will-soon-need-travel-id-to-board-planes.html>

GIST

The Arizona Department of Transportation has announced that state residents will require a new form of identification to pass through Transportation Security Administration screeners in the near future.

As of Oct. 1, 2020, Grand Canyon state residents traveling out of Phoenix Sky Harbor International, Phoenix Mesa-Gateway, Flagstaff, Tucson International and Yuma International airports will need to carry "Voluntary Travel IDs" or be grounded, AZ Family is reporting.

The new ID will also be requisite to access restricted federal buildings and military bases, as standard credentials will no longer suffice.

Minors under age 18 will not be required to have the new ID if they are traveling with an adult who does.

According to AZ Central, driver's licenses are not compliant with the REAL ID Act passed by Congress in 2005, which amped up identification requirements for air travelers in the wake of 9/11. To compensate, the Arizona Legislature passed a law that said a license or card holder must voluntarily take steps to secure a Voluntary Travel ID.

"Now is a great time to get a Voluntary Travel ID because the federal deadline gets closer every day," Motor Vehicle Division (MVD) Director Eric Jorgensen told AZ Family.

"MVD is making this process simple. Customers can go to [ServiceArizona.com](http://ServiceArizona.com) and make an office appointment. The website provides information about what documents customers should bring with them to meet the REAL ID requirements for the Voluntary Travel ID."

The Voluntary Travel ID's cost \$25 and are valid for eight years, according to the Arizona Department of Transportation. The new ID sets itself apart from the standard state driver's license with a gold star in the top right corner.

While the new measures may seem intense, Arizona is not alone in increasing travel security.

In correlation with the 2005 REAL ID Act, as of Jan. 22, 2018, residents of Kentucky, Maine, Minnesota, Missouri, Montana, Oklahoma, Pennsylvania, South Carolina and Washington were supposed to be

required to have their passports to fly anywhere, although the federal government has granted extensions.

04/12 US: blood samples show nerve agent

## SOURCE

<https://www.nbcnews.com/news/mideast/u-s-has-blood-samples-show-nerve-agent-syria-gas-n865431>

## GIST

WASHINGTON — The U.S. now has blood and urine samples from last Saturday's deadly attack in Syria that have tested positive for chemical weapons, according to two U.S. officials familiar with the intelligence.

The samples suggested the presence of both chlorine gas and an unnamed nerve agent, two officials said. Typically, such samples are obtained through hospitals and collected by U.S. or foreign intelligence assets on the ground. The officials said they were "confident" in the intelligence, though not 100 percent sure.

The Assad regime is known to have stocks of the nerve agent sarin, and has previously used a mixture of chlorine and sarin in attacks, say U.S. officials.

Officials also said that the U.S. has compiled intelligence from the U.S. and other countries, including images, that indicate the Syrian government was behind the weekend attack.

Activists and aid groups say that dozens died in Saturday's airborne assault on Douma, the last rebel stronghold in eastern Ghouta, which has been subjected to intensive bombing by Syria's Russian-backed Assad regime.

Russia and Syria have denied any involvement in the alleged chemical attack.

U.S. officials say the Assad regime has conducted multiple chlorine attacks on rebels during the past six months.

04/13 Death involves 911 system w/issues

## SOURCE

<https://www.cbsnews.com/news/kyle-plushs-death-is-latest-incident-involving-911-system-riddled-with-issues/>

## GIST

A teenager trapped in a minivan made desperate pleas to 9-1-1 for help, but responders didn't get there in time. It happened in Cincinnati -- focusing new attention on the city's troubled emergency response system.

Kyle Plush, 16, had to use voice commands to call 911. He was trapped in the back of his minivan, while his phone was in the front.

"I'm stuck in my van outside the Seven Hills [unintelligible] parking lot," Plush said.

"The Seven Hills what parking lot?" the dispatcher asked.

"Send help, I am going to die here," Plush said.

Police said Plush was reaching for his tennis gear in the back when the third row of the 2004 Honda Odyssey collapsed, pinning him upside down and crushing his chest.

Twelve minutes after he called, police were at the scene but couldn't locate him. While they were there, Plush called 911 again and gave specifics on his car -- and his last wishes.

"I probably do not have much time left, so tell my mom that I love her if I die," Plush said. "I'm stuck in my gold Honda Odyssey. This is not a joke, this is not a joke, I am stuck in my gold Honda Odyssey van."

The 911 operator, who has been put on leave, didn't relay the make or model to police, and police officers gave up after 11 minutes. She claims she couldn't hear Plush and her computer froze.

Critics say it is the latest incident in a 911 system riddled with issues. Cincinnati's mayor John Cranley said Friday the problems of management, supervision and technology have plagued the 911 center for years.

"Time's up for waiting for our 9-1-1 system to fix itself," said Councilman Chris Seelbach. "We have to take urgent action immediately to have a system in place that ensures that you can call three numbers and within minutes police and fire officers will be on the scene."

Six hours after the first 911 call, Plush's father discovered his son in car. Internal police records show that the 911 operator who was put on leave, received an "unacceptable" rating for her performance.

04/13 CDC: likely source E. coli outbreak

## SOURCE

<https://www.cbsnews.com/news/cdc-romaine-lettuce-likely-source-of-e-coli-outbreak/>

## GIST

Health officials say chopped romaine lettuce from the Yuma, Arizona growing region is the likely source of the current E. coli outbreak that has now sickened people in 11 states, and they're warning consumers across the country to avoid eating lettuce that may have been contaminated.

According to the latest update from the Centers for Disease Control and Prevention, so far there have been 35 cases of illness, 22 of which led to hospitalizations. Three people have developed a severe complication -- a type of kidney failure called hemolytic uremic syndrome (HUS) which can be life-threatening. The outbreak involves a particularly dangerous strain of the bacteria known as Shiga toxin-producing E. coli O157:H7.

"Information collected to date indicates that chopped romaine lettuce from the Yuma, Arizona growing region could be contaminated with E. coli O157:H7 and could make people sick," the CDC said in a statement.

No common grower, supplier, or distributor has been identified yet. State and local public health investigators continue interviewing ill people to determine what they ate and how they might have been exposed.

So far, cases of illness from this outbreak have been reported in Connecticut, Idaho, Illinois, Michigan, Missouri, New Jersey, New York, Ohio, Pennsylvania, Virginia, and Washington.

04/14 Pentagon: successfully hit every target

## SOURCE

<https://www.cbsnews.com/news/strikes-on-syria-pentagon-briefing-today-2018-04-14-live-stream-updates/>

## GIST

WASHINGTON -- Pentagon spokesperson Dana White said Saturday the U.S. and its allies "successfully hit every target" in airstrikes in Syria overnight. The U.S., U.K. and France and U.K. launched the strikes Friday night Eastern Time in response to the Syrian regime's alleged use of chemical weapons last weekend. In total, the U.S. used 105 weapons against three targets.

"I can assure you we took every measure and precaution to strike only what we targeted and — and we successfully hit every target," White told reporters Saturday.

White said the U.S. believes it has "significantly crippled" Syrian President Bashar Assad's ability to carry out a chemical weapons attack. White said the mission in Syria remains defeating the Islamic State of Iraq and Syria (ISIS), but the U.S. will not stand by while Assad attacks "innocent Syrian people."

Later Saturday morning, the U.N. Security Council was meeting at Moscow's request.

Lt. Gen. Kenneth McKenzie, the director of the Joint Staff at the Pentagon, told reporters Saturday the initial assessment is that the Defense Department accomplished its goals "without material interference" from Syrian defenses. The attempts from Syrian defenses were imprecise, in contrast to the U.S. mission, he said.

"We are confident that all of our missiles reached their targets," McKenzie emphasized, reiterating what White said.

McKenzie said, "As of right now, we are not aware of any civilian casualties," although they cannot be certain, given the defense launched by the Syrians.

Secretary of Defense James Mattis emphasized that the targets were infrastructure related to the Syrian regime's chemical weapons program, and that there are no plans at this time for further strikes.

But the president, in his address to the nation from the White House, declared that the U.S. is prepared to continue military intervention until Assad stops the use of chemical weapons.

04/14 Syria police units enter Douma

## SOURCE

<http://abcnews.go.com/International/wireStory/latest-syrian-police-units-enter-town-douma-54464281?>

## GIST

The Latest on developments in Syria (all times local):

10:50 p.m.

Syrian state-run TV says Syrian police units are entering the town of Douma, site of a suspected chemical weapons attack and the last rebel town in the eastern Ghouta region.

Syrian TV showed police waving Syrian flags apparently on the edge of the town just east of Damascus, and said the "terrorist presence" in Douma will end "in a few hours."

The entry of government forces to Douma follows a Russian-mediated deal that secured the surrender and evacuation of the rebels and thousands of civilians from the town.

Douma and the sprawling eastern Ghouta region near the capital, Damascus, had been under rebel control since 2012 and was a thorn in the side of President Bashar Assad's government for years. The government's capture of Douma, the last town held by the rebels in eastern Ghouta, marks a major victory for Assad.

04/14 Syrians in Damascus show defiance

## SOURCE

<http://abcnews.go.com/International/wireStory/syrians-gather-capital-defiance-airstrikes-54464277?>

## GIST

Hundreds of Syrians gathered at landmark squares in the Syrian capital Saturday, honking their car horns, flashing victory signs and waving Syrian flags in scenes of defiance that followed unprecedented joint airstrikes by the United States, France and Britain.

A few hours earlier, before sunrise, loud explosions jolted Damascus and the sky turned orange as Syrian air defense units fired surface-to-air missiles in response to three waves of military strikes meant to punish President Bashar Assad for his alleged use of chemical weapons.

Associated Press reporters saw smoke rising from east Damascus and what appeared to be a flame lighting up the sky. From a distance, U.S. missiles hitting suburbs of the capital sounded like thunder. Shortly after the one-hour attack ended, vehicles with loudspeakers roamed the streets of Damascus blaring nationalist songs.

"Good souls will not be humiliated," Syria's presidency tweeted after the airstrikes began.

Immediately after the attack, hundreds of residents gathered in Damascus' landmark Omayyad square, celebrating what they said was the army's success in shooting down or derailing some of the missiles. Many waved Syrian, Russian and Iranian flags. Some clapped their hands and danced, others drove in convoys, honking their horns in defiance.

"We are not scared of America's missiles. We humiliated their missiles," said Mahmoud Ibrahim, half his body hanging outside his car window, waving a Syrian flag. The crowd then moved toward the nearby Damascus University where pro-government fighters danced, waving their automatic rifles over their heads.

The seemingly limited strikes with no apparent future strategy for how to deal with the wider civil war was a cause for celebration by Assad supporters but criticized by the Syrian opposition.

Mohammad Alloush, spokesman for the Army of Islam rebel group, called the airstrikes a "farce" in a Twitter posting. Nasr al-Hariri, a senior opposition leader, said Syrians need a strategy that leads to a political solution to "save it from the brutality of the Syrian regime."

A Syrian military statement said in all, 110 missiles were fired by the U.S., Britain and France and that most of them were shot down or derailed. Russia's military said Syrian air defense units downed 71 out of 103 cruise missiles launched by the U.S. and its allies.

Syrian TV called the attacks a "blatant violation of international law and shows contempt for international legitimacy."

U.S. Defense Secretary James Mattis said there were no reports of U.S. losses during the initial airstrikes.

04/14 Europe leaders back strikes on Syria

## SOURCE

<http://abcnews.go.com/International/wireStory/european-leaders-back-syria-strikes-warn-escalation-54466093?>

## GIST

Many European leaders voiced support and understanding Saturday for the U.S.-led air strikes against Syria, but warned against allowing the seven-year conflict to escalate.

---

"It has always been Bulgaria's position that no cause justifies the killing of innocent people, including children; that the use of chemical weapons is a war crime and the strike on Syrian targets was a response to a war crime." Bulgarian government statement. Bulgaria currently holds the rotating EU presidency.

---

"Strikes by US, France and UK make it clear that Syrian regime together with Russia & Iran cannot continue this human tragedy, at least not without cost. The EU will stand with our allies on the side of justice." - Tweet by European Council President Donald Tusk.

---

"What has occurred in Syria in recent days goes far beyond the constant violation of cease fires. The response to these atrocities is legitimate and proportionate." - Spanish Prime Minister Mariano Rajoy.

---

"This was a limited and targeted action to strike the capacity of building or diffusing chemical arms. It cannot and should not be the start of an escalation." - Italian Premier Paolo Gentiloni.

---

"The strike against the Syrian regime that uses chemical weapons to attack the civilian population was inevitable." - Acting Czech Prime Minister Andrej Babis.

---

"We support the fact that our U.S., UK and French allies took on responsibility in this way as permanent members of the U.N. Security Council. The military strike was necessary and appropriate in order to preserve the effectiveness of the international ban on the use of chemical weapons and to warn the Syrian regime against further violations." - German Chancellor Angela Merkel.

---

"The international community has the responsibility to identify and hold accountable those responsible of any attack with chemical weapons. This was not the first time that the Syrian regime has used chemical weapons against civilians but it must be the last." - European Union Commission President Jean-Claude Juncker.

---

"The strike against the Syrian regime that uses chemical weapons to attack the civilian population was inevitable." - Acting Czech Prime Minister Andrej Babis.

---

"Belgium strongly condemns all use of chemical weapons which are a blatant violation of international law. Belgium therefore understands the military action in Syria of our American, French and British partners who have targeted identified production facilities." - Belgian government statement.

04/14 Military, chemical weapon sites targeted

## SOURCE

<http://abcnews.go.com/International/us-strike-syria-targets-military-chemical-weapons-sites/story?id=54435901>

## GIST

President Donald Trump said Friday he had ordered "precision strikes" against Syria's chemical weapons capability in conjunction with the France and the United Kingdom.

Included in the targets was a scientific research center in the greater Damascus area, described by the Chairman of the Joint Chiefs of Staff Gen. Joseph Dunford as a center for research, development, production and testing of chemical weapons.

Two other sites were near the city of Homs: the site of Syria's primary sarin production facility and a chemical weapons storage facility that included an important command post.

He said that while the coalition forces had many potential targets from which to choose, the three sites were chosen for their significance to Syria's chemical weapons program and well as their location and layout, in an attempt to minimize risk to innocent civilians.

Perhaps heeding the possibility of U.S. military action, Russian news agency Interfax reported on Wednesday that Russia's Navy will conduct military exercises off the coast of Syria on Wednesday.

According to Syria state TV 110 rockets were launched in the attack by the U.S., U.K. and France around 3:55 a.m. Syrian time.

## GIST

Russia, the Syrian regime's top ally, reacted strongly to the air strikes launched by the United States and its allies on Damascus and Homs early Saturday, warning of "consequences."

The U.S., U.K. and France launched a series of strikes on three locations identified as critical to Syria's production of chemical weapons, including a scientific research center in Damascus, and a production facility and storage facility in Homs, according to U.S. Chairman of the Joint Chiefs of Staff Gen. Joseph Dunford.

The Russian embassy in U.S. wasted no time in reacting to the strikes late Friday in the U.S., with Ambassador Anatoly Antonov saying on Twitter, "The worst apprehensions have come true. Our warnings have been left unheard."

"A pre-designed scenario is being implemented," the statement continued. "Again, we are being threatened. We warned that such actions will not be left without consequences."

Russia has long been an ally of Syrian President Bashar al-Assad. Syria serves as an important access point to the Mediterranean Sea for Russian ships and a hub for Russia in the Middle East. They have also supplied Assad with the military resources necessary to fight back against the rebels who nearly overthrew him in 2011.

President Donald Trump criticized Russia in his address to the country following the launch of missiles on Friday night.

"In 2013, President [Vladimir] Putin and his government promised the world that they would guarantee the elimination of Syria's chemical weapons," Trump said. "Assad's recent attack, and today's response, are the direct result of Russia's failure to keep that promise."

Putin responded to Saturday's attack by calling the strikes "an act of aggression against a sovereign state that is at the forefront of the fight against terrorism."

"The current escalation of the situation around Syria has a devastating impact on the whole system of international relations," Putin said. "History will put everything in its place, and it has already laid heavy responsibility on Washington for bloody reprisals against Yugoslavia, Iraq and Libya."

Putin also called for an emergency meeting U.N. Security Council.

04/14 US, allies strike Syria

## SOURCE

<http://abcnews.go.com/International/trump-orders-strike-syria-response-chemical-attack/story?id=54459378>

## GIST

President Donald Trump ordered a strike on Syria Friday in response to last weekend's chemical weapons attack.

Addressing the nation Friday evening, Trump said the strike was a joint operation with France and the United Kingdom.

"A short time ago, I ordered the United States Armed Forces to launch precision strikes on targets associated with the chemical weapons capabilities of Syrian dictator Bashar al-Assad," Trump said.

Trump said that the "massacre" last weekend in Syria "was a significant escalation in a pattern of chemical weapons use by that very terrible regime."

"The evil and the despicable attack left mothers and fathers, infants and children thrashing in pain and gasping for air. These are not the actions of a man," Trump said, referring to Assad. "They are crimes of a monster instead."

In a later briefing, Defense Secretary James Mattis said the strike demonstrates the international resolve to prevent the use of chemical weapons, saying he is "confident the Syrian regime conducted a chemical attack on innocent people in the last week."

"Clearly the Assad regime did not get the message last year," Mattis said, adding that this time the U.S. struck harder.

"We have gone to great lengths to avoid civilian and foreign casualties," he said. "... I believe that we sent a very strong message."

Chairman of the Joint Chiefs of Staff Gen. Joseph Dunford said the strike specifically hit three targets associated with the production and storage of chemical weapons: a scientific research center; a storage center for sarin and its precursor components; and a chemical weapons storage facility and command post.

"Important infrastructure was destroyed," said Dunford.

04/16 Changing cyber threat landscape

SOURCE

<https://cybersecurity.cioreview.com/news/the-changing-cyber-threat-landscape-nid-26065-cid-145.html>

GIST

Over the course of 2017, the number of global cyber attacks continued growing at a rapid pace which also resulted in the reshaping of the cybersecurity arena. With the adoption of various technology, traditional threats such as generic Trojans, ransomware, and spambots received facelifts with military-grade coding and tactics. Threats including GoldenEye and WannaCry gave numerous organizations tears and forced many to down their shutters.

The effectiveness of these kinds of sophisticated threats can be analyzed by using lateral movement vectors that augment zero-day exploits such as EternalBlue and EternalRomance, allowing malware to 'hop' from one network to another across the globe. These targeted attacks are reshaping corporate and government digital security initiatives, while simultaneously causing fallout in the consumer space.

The past year witnessed the rapid rise of commoditization of cybercrime, with Ransomware-as-a-Service and Malware-as-a-Service becoming easily and widely available on the dark web. Furthermore, the year also witnessed the growth of advanced services, like FUD (fully undetected), which enable attackers to upload malware to an analysis service for a fee. The past year also witnessed a new

generation of IoT-based attacks known as Reaper. Analysis revealed that the attack codes were armed with exploits spanning a variety of IoT vendors, including Linksys, NetGear, GoAhead, and Avtech. The growth of cyber attacks is simply an example of the sorts of the ongoing development of security exploits.

04/16 National Guard mission: cyber defense

## SOURCE

<https://federalnewsradio.com/cyber-exposure/2018/04/national-guard-preparing-to-defend-cyberspace-for-states/>

## GIST

National Guard units are ramping up their defensive cyber capabilities across the

board, and in the not-too-distant future will be able to quickly respond to cyber attacks in their home states and territories, much as they do today for natural disasters.

“The Air National Guard (ANG) has 15 Cyber Operations Squadrons that provide Cyber Protection Teams (CPTs) and National Mission Teams (NMTs) in support of DoD cyber missions,” said Sgt. 1st Class W. Michael Houk, a spokesman for the National Guard Bureau. “In addition, the Army National Guard (ARNG) Cyber Brigade is building a full cyber brigade with five battalions consisting of 11 CPTs, five cybersecurity companies and five cyber warfare companies.”

The guard also is actively working on cyber missions across the country.

“ARNG personnel are currently mobilized as part of Task Force Echo under the control of Army Cyber in support of U.S Cyber Command to engineer, operate and maintain critical network infrastructure,” Houk said. “The ANG continually provides two CPTs and continually fills portions of a NMT in support of U.S. Cyber Command.”

While guard cyber units already contribute to military missions around the globe, the National Guard’s recent efforts are a result of a 2016 Government Accountability Office study that underscored the importance of the guard’s readiness against cyber threats. At the time, many guard units had some limited cyber capabilities, but they were mostly assigned to local duties, such as protecting the online assets of the unit.

Despite early success, the guard acknowledged that quite a few challenges remain in this new area.

One is the long-standing fact that most guard personnel are part-time, something that was less of a concern when performing more traditional missions.

“We have in our ranks people with cyber expertise gained through civilian experience,” said John Goheen, the director of communications for the National Guard Association of the United States. “The military could really use these people full time, but the salaries they command as civilians makes that challenging.”

And it’s not just the guard that is experiencing, or will soon experience, the same situation.

“The active military will likely run into the same problem moving forward,” Goheen said. “They train bright, young people — and then lose them to private industry. We have a place for them in the guard, but again, they will only be part-time. The military needs to find ways to tap this resource.”

Another hurdle is one the National Guard has always experienced — that of running a branch of the national military within the jurisdictions of each individual state.

“The nature of the National Guard enables our personnel to work with state and local authorities on critical infrastructure,” Goheen said. “In fact, a lot of guard cyber exercise involves assisting with defending power plants and water systems.”

In an actual incident, such as an attack on a power plant through its cyber infrastructure, a state government could activate the guard, and called upon it to stop it, officials said. After it halted the main attack, a guard cyber unit could remain behind to protect the infrastructure while the critical infrastructure owner constructed the new cyber defenses.

The scope and capabilities of any given state-level mission would be up to the governor of that state, not unlike traditional guard missions.

“National Guard forces would likely respond to a cyber incident in the same manner as other domestic emergencies such as hurricanes or floods,” Houk said. “A governor may activate National Guard personnel in state-funded, State Active Duty in accordance with state and local laws and DoD policy.”

Additionally, under the United States Code Title 32, a state governor, with approval from the secretary of Defense or the president, may activate guardsmen for homeland defense activities, or to provide support for civil authorities.

National Guard leaders expressed confidence that the guard would soon be responding to cyber incidents on a regular basis, just like they do for floods, snowstorms and missions to maintain the peace in extraordinary circumstances. Now, maintaining the peace extends to cyberspace.

04/13 India bitcoin exchange suffers setback

## SOURCE

<https://www.hackread.com/someone-stole-3-million-in-bitcoin-from-coinsecure-bitcoin-exchange/>

## GIST

In a security notice, the Indian Bitcoin exchange Coinsecure has revealed that it has suffered a setback after 438 BTC which is over \$3 million (\$3,542,957) according to current Bitcoin price were stolen from its offline Bitcoin wallets

The company maintains that it has never been hacked or compromised and the incident took place when its CSO Dr. Amitabh Saxena was extracting BTG (Bitcoin Gold) to distribute to its customers. Saxena, on the other hand, claims that funds were lost in the process during the extraction of the private keys.

The company has launched a complaint with the Cyber Cell in Delhi and is also conducting an investigation with the help of cybersecurity experts. However, a look at the police complaint points to an inside job as the company's director Mohit Kalra stated in the complaint that:

“As the private keys are kept with Dr. Amitabh Saxena, we feel that he is making a false story to divert our attention and he might have a role to play in this entire incident. The incident reported by Dr. Amitabh Saxena does not seem convincing to us. Dr. Amitabh Saxena also has an Indian Passport and he might fly out of the country soon, therefore, his passport should be seized as he cannot fly out of the country”

Ningning Niumai, founder of Greymeter, a social network for college students and young professionals tweeted that Dr. Amitabh Saxena was appointed almost 6 months ago by the company, therefore, handing over private keys of Coinsecure is very suspicious.

“Dr. Amitabh Saxena appointed barely 6 months ago has the private key to Coinsecure's wallet?!! Is he a Scapegoat?!! Very suspicious and convenient blame game after the recent RBI ruling on Bitcoin,” said Niumai.

It is noteworthy that Coinsecure incident has occurred days after the Reserve Bank of India (RBI) barred banks and financial institutions from dealing in cryptocurrencies from April 6th, 2018.

04/13 FTC: 2016 Uber hack impacted 25M

## SOURCE

<https://www.securityweek.com/25-million-us-individuals-impacted-2016-uber-hack>

## GIST

The 2016 data breach that Uber made public in November 2017 impacted over 25 million riders and drivers in the United States, the Federal Trade Commission (FTC) reveals.

The hack, which the ride-sharing company kept silent about for a year, impacted more than 57 million users globally. Hackers managed to access data stored on an Amazon Web Services (AWS) account and steal names, email addresses and mobile phone numbers of customers around the world.

In February this year, Uber chief information security officer said that two individuals living in Canada and Florida were responsible for the massive data breach.

In an attempt to cover up the hack, Uber paid the attackers \$100,000 through its third-party “bug bounty” program, which was designed to reward those who responsibly disclose vulnerabilities, rather than those who maliciously exploit them.

The company came under scrutiny after the hack was made public in November 2017, and even became the target of a US criminal investigation. The data breach was revealed only three months after Uber agreed to implement new data protection measures in a settlement with the FTC over a 2014 incident.

Now, the Commission says the ride-sharing company has agreed to expand the proposed settlement and that it will be subject to additional requirements. Under the new settlement, Uber could be subject to civil penalties if it doesn't notify the FTC of future breaches in due time.

04/13 Hoaxes, scams w/school violence fears

## SOURCE

<https://www.scmagazine.com/email-hoaxes-and-phishing-scams-prey-off-of-school-violence-fears/article/758240/>

## GIST

A Swiss hacking group has reportedly claimed credit for using a hijacked email domain to bombard schools around the U.S. with fake threats of violence. And in related news, security awareness training provider KnowBe4 issued a warning on Thursday about a credentials phishing campaign that also preys on school shooting fears by impersonating a campus security alert.

According to multiple news outlets, a group called the Apophis Squad sent disturbing hoax emails to school district superintendents in at least 46 states last Sunday and Monday, triggering an increased police presence and in some cases class cancellations. The emails featured the subject line "Student help!" and purported to be authored by a bullied student who threatened to show up at school "with 3 bombs, and a .22 handgun."

The adversaries reportedly used the email address apophissquad@zonix.us, after hijacking the domain of Zonix, a Dallas-based online gaming company that provides Minecraft servers.

"Over the past few hours we were directly contacted by a group that threatened to send a bomb hoax spoofing our email domain in an attempt to directly smear and harm Zonix," states a series of tweets posted on Zonix's official Twitter account on Apr. 9. "We began to realize the threat was credible when we began hearing responses from school superintendents pertaining to this situation. We are aware that some schools might have been affected by this and we apologize for any inconvenience or panic that could have happened because of this situation.

Apophis Squad's account on Twitter, meanwhile, has been suspended. But a journalist with the Union-Democrat in Sonora, Calif. reportedly made contact with one of the hackers, who said the attack's motive was to taunt law enforcement, adding "We got nothing better to do." The hacker also stated future plans to leak information originating from a U.S. Army database.

Reportedly, the same perpetrators previously sent similar threats to UK-based schools in March 2018, using the domain of Zonix competitor VeltPvP.

Meanwhile, an unnamed community college in Florida was recently targeted in phishing campaign

spoofing its campus-wide security alerts, according to a KnowBe4 founder and CEO Stu Sjouwerman, who warns in a company blog post that this scheme could easily spread to additional educational institutions as well as companies and organizations that have established active shooter protocols.

The email arrives with a subject line such as "IT DESK: Security Alert Reported on Campus," "IT DESK: Campus Emergency Scare" or "IT DESK: Security Concern on Campus Earlier," and instructs recipients to click a link to a memo containing proper instructions. However, the link leads to a credentials phishing page that imitates the Microsoft log-in process, which many campuses computers require.

"What makes this particular attack so infuriating," remarks Sjouwerman, is that it exploits current concerns over active shooters on education campuses, a sensitive issue that could likely generate panicked, reflexive clicks from recipients who are already on edge over the recent shooting at Marjory Stoneman Douglas High School, also in Florida."

04/13 Federal agency data under siege

## SOURCE

<http://www.darkreading.com/attacks-breaches/federal-agency-data-under-siege/a/d-id/1331467>

## GIST

The US government continues to grapple with the same cybersecurity challenges faced by most organizations, but it has a different set of hurdles to overcome than its private-sector counterparts. As a result, federal agencies are experiencing more data breaches than other industry sectors. Despite skyrocketing IT security spending, successful attacks are escalating across the board. Federal agencies in particular are weathering a perfect storm around data that puts agency secrets — and the personal data of over 330 million American citizens — at risk.

According to Thales' 2018 Data Threat Report—Federal Government Edition, 57% of federal respondents reported data breaches, a threefold increase over the 18% recorded back in 2016. As many as 12% experienced multiple breaches in 2017 and in previous years.

Many agencies are in a difficult position. Federal agencies must protect sensitive data and both thwart bad guys hunting for citizens' private data and nation-state hackers with their own agendas — in addition to grappling with perennial underfunding, understaffing, and antiquated systems that commercial enterprises tossed into the dumpster years ago. At the same time, they need to make government more accessible and transparent via digital transformation, which inevitably exposes them to more cyber threats.

But these factors don't completely explain the growing numbers of breaches at federal agencies.

### Catching Up with the Private Sector

Despite these troubles, agency IT security professionals are trying to stay positive, partly because spending is sharply increasing this year. "Like most other sectors, data security spending plans in the US federal sector are up compared to last year — way up," says Garrett Bekker, 451 Research's principal analyst for information security, as highlighted in the Thales report. "Perhaps more importantly, for the first time, the US federal government ranks the highest of any US vertical in terms of spending increase plans — more than nine out of 10 (93%) plan to increase security spending in 2018."

In fact, a staggering 73% of federal agencies say their IT security spending will be much higher in 2018, according to the report. This comes after several years of IT security spending well below that of commercial enterprises.

"The bad news is that reports by US federal respondents of successful breaches last year (57%) are far ahead of the global average (36%), and also the global federal sector (26%). Further, 70% of US federal respondents say their agencies were breached at some point in the past," says Bekker.

04/16 Woolworths hit by IT glitch

### SOURCE

<https://www.zdnet.com/article/woolworths-turning-customers-away-following-it-outage/>

### GIST

Woolworths is turning customers away from its stores, following reports the Australian supermarket chain is suffering a nationwide IT outage.

Customers took to Twitter Monday afternoon, posting photos of security screens pulled shut at stores around the country, with some reporting being told by store managers that an IT glitch had affected its cash registers.

ZDNet understands the glitch didn't make its way to all stores, however, with some operating as usual.

Woolworths eventually confirmed the outage, apologising for the inconvenience via Twitter.

"We can confirm that an IT issue impacted registers in our supermarkets for a short period of time this afternoon. The registers are now back online in all our stores. We apologise for any inconvenience caused. Thanks," the reply to many reads.

Woolworths in August apologised to customers following reports that some experienced a second batch of payments withdrawn from their bank accounts.

A Woolworths spokesperson told ZDNet at the time it received confirmation from Cuscal, one of its payment processors that services financial institutions, that due to an error at its datacentre, some Woolworths customers received incorrect transactions on accounts processed by Cuscal.

04/16 Windows servers targeted to cryptomine

## SOURCE

<https://www.bleepingcomputer.com/news/security/windows-servers-targeted-for-cryptocurrency-mining-via-iis-flaw/>

## GIST

Hackers are leveraging an IIS 6.0 vulnerability to take over Windows servers and install a malware strain that mines the Electroneum cryptocurrency.

Attacks aren't widespread, as they target a quite old IIS version, but they are happening at scale.

Hackers using former IIS 6.0 zero-day

Hackers are using CVE-2017-7269 to take over servers. This is a vulnerability discovered by two Chinese researchers in March 2017 that affects IIS' WebDAV service. At the time it was discovered last year, the flaw was a zero-day, being under heavy exploitation for almost nine months, since June 2016.

Microsoft initially said it was not planning to fix the flaw because IIS 6.0 was end-of-life, and so were the

operating systems that shipped with IIS 6.0 by default —Windows XP and Windows Server 2003.

But the vulnerability shared some common traits with the EXPLODINGCAN NSA exploit leaked in April 2017 by the Shadow Brokers, and it eventually received a fix in mid-June 2017.

Since then, it's been used by at least one threat actor to deploy Monero miners on Windows servers still running the old IIS 6.0 version.

Now, F5 Labs says it found another hacker group using the same exploit, but deploying an Electroneum miner instead of Monero.

According to experts, the threat actor uses CVE-2017-7269 to deliver an ASCII shellcode which contains a Return-Oriented Programming (ROP) exploit chain that installs a reverse shell on vulnerable hosts.

Attackers then use the reverse shell to download the miner and start the mining process. The infection process is masked by the use of the Squiblydoo technique and by disguising the miner as the legitimate lsass.exe (Local Security Authority Subsystem Service) process.

F5 experts said the Electroneum address they found in attacks stored only \$99, suggesting they either caught the campaign at its beginning, or crooks are rotating address IDs to avoid researchers from tracking their entire operation.

04/16 Russia blocks Telegram messenger

## SOURCE

<https://www.reuters.com/article/us-russia-telegram-blocking/russia-starts-blocking-telegram-messenger-regulator-idUSKBN1HN13J>

## GIST

MOSCOW (Reuters) - Russia's state telecommunications regulator said on Monday it had begun blocking access to messenger service Telegram after the service's owner refused to comply with an order to give Russian state security access to users' secret messages.

The watchdog, Roskomnadzor, said in a statement on its website that it had sent telecoms operators a notification about blocking access to Telegram inside Russia

The service, set up by a Russian entrepreneur, has more than 200 million global users and is ranked as the world's ninth most popular mobile messaging app.

Interfax news agency quoted an official at the watchdog as saying it would take several hours to complete the operation to block access. In Moscow, the Telegram app was still functioning as normal early on Monday afternoon.

Roskomnadzor was implementing a decision handed down on Friday by a Russian court that Telegram should be blocked because it was in violation of Russian regulations.

Telegram had refused a request by Russia's Federal Security Service (FSB) to give them access to users' encrypted messages.

04/16 'Digital resurrections' bring back dead?

## SOURCE

<https://www.nbcnews.com/mach/science/will-digital-resurrections-let-us-bring-back-dead-ncna865806>

## GIST

Humans have always looked for tangible ways to remember departed loved ones. We save letters and emails they wrote us. We look fondly at photos of them. We watch and rewatch old videos just to see their faces and hear them talk.

But the rise of digital technologies may soon give us even more compelling ways to remember lost friends and family. These include apps that let us text with digital representations of the dead — we'd type a message and then get some sort of comforting reply — and maybe even systems that let us speak with and possibly touch realistic avatars of the ones we miss most.

Maybe that sounds creepy, but some experts believe we'll find comfort in continuing our interactions with people whose biological existences have come to an end.

“Many people visit the headstone of a loved one to help come to terms with their passing, and have a one-sided conversation where they think about the memory of them,” says Bruce Duncan, managing director of Terasem Movement Foundation, a Bristol, Vermont-based nonprofit that promotes digital resurrections. “Being able to have a two-way conversation with a digital version of them, where you can be reminded of their mannerisms or behavioral patterns in an interactive way, could become a natural part of the grieving process.”

Several companies, including Luka, a San Francisco-based startup, and research organizations including the MIT Media Lab, are working on digital resurrection technology.

It goes without saying that the digital version of a person is no match for the living, breathing human being. But scientists are experimenting with algorithms that can take a person's emails and text messages and use them to generate text messages that are at least evocative of a specific person. The messages can use emojis like the dead person once did. And with data pulled from the internet, the texts can even include back-and-forths about topical things like weather and current events.

In coming years, Duncan believes, there may be browser plug-ins capable of capturing an entire life's worth of social media posts, emails, photos, and other digital data and using everything to approximate an individual's personality, complete with values and opinions.

Digital resurrection technology is unlikely to stop with chatbots. Duncan and other experts foresee a time when we'll be able to interact with lost loved ones not just via texts but in virtual reality.

“You'd be able to put on your virtual reality glasses and headset, and experience typical everyday situations with that person, like sitting at the breakfast table or taking a walk in a nearby park,” says Charlotte Runius, CEO of Fenix Begravning, a Stockholm, Sweden-based funeral planning agency that is working with AI experts to develop these technologies. “Hearing their voice and seeing them would allow you to actually feel like you're next to the person again, and you can talk to them and get replies in a much more realistic way.”

By wearing a bodysuit and gloves studded with sensors and actuators, it might even be possible to interact physically with a realistic-looking avatar of a deceased person. The technology could monitor a living person's movements, voice, and facial expressions and then later use them to direct an avatar to respond appropriately — perhaps by offering advice or giving a comforting hug.

In the distant future, one can imagine that it would be possible to create a robotic avatar of a beloved one — a bit like the scenario depicted in a popular episode of the Netflix series "Black Mirror," in which a grieving widow's late partner is resurrected in robotic form with help from his texts, photos, and emails.

The only snag with these scenarios is that much of the data used to resurrect someone would have to be collected while he or she was still alive — for instance, by having him or her speak a thousand or so words and be recorded on video.

## EMOTIONAL COMFORT — OR PAIN?

What would it be like to interact with someone who's been brought back in digital form? Some experts say it could aid the grieving process. Others worry that interacting with a virtual representation of a person who is no longer alive would only intensify feelings of sadness and loss.

Studies have shown that bereaved people can experience grief hallucinations, and there are concerns that interacting with avatars might raise the risk.

Duncan believes that, at least for most people, the experience will be akin to watching home movies and enjoying the memories that they trigger.

“Enjoying talking to past loved ones via digital media may eventually become the future version of looking through photographs of past events... It’s hard to predict the future, but just as we’ve adjusted to using Skype and cell phones I think we’ll consider it valuable to continue some connection with a person we care about.”

04/15 Pushing back Russia disinformation

## SOURCE

<https://www.nbcnews.com/politics/donald-trump/one-tiny-corner-u-s-government-pushes-back-against-russian-n866021>

## GIST

WASHINGTON — When reports began to emerge last month that Russian mercenaries had attacked a U.S. base in Syria, Russia issued a flat denial, and the U.S. was silent.

Then, leaked recordings surfaced on the internet.

"We've had our asses f--- kicked. So one squadron f--- lost 200 people ...the Yankees knew for sure that the Russians were coming."

The tapes seemed to show Russian guns-for-hire acknowledging a crushing defeat in the Feb. 8 incident. It was an embarrassment for the Kremlin, which was forced to admit that Russian citizens had been killed by the U.S. military — something an American general later confirmed to NBC News.

With their election interference and ongoing manipulation of social media platforms like Twitter, the Russians have been regularly outfoxing America in the information realm, U.S. intelligence officials acknowledge. Who turned the tables this time?

Not the White House, the State Department or the CIA. The recordings were published by a U.S.-government-funded web site called Polygraph.info, whose reporter says she got them from a source close to the Kremlin.

Polygraph is a relatively new fact-checking arm of an obscure, diminutive media effort by the U.S. to highlight Russian misdeeds and counter Russian propaganda.

It's an anomaly in the Trump administration — perhaps the only part of the U.S. government whose job is to regularly punch back against what experts say is a stream of Russian disinformation aimed at America and the West.

"At the end of the day, the Russians are engaging in information warfare — they're telling lies," said John Lansing, a former television executive who oversees the effort. "And we're confronting them toe-to-toe with fact-based, truthful, professional journalism."

Russia's proficiency at information war has been on display in the wake of the U.S.-led military strike Friday night in Syria. Russia called the strikes illegal and said the chemical weapons attacks that prompted them were staged. To get that message out, there was a 2000 percent spike in activity in the hours since the strike by fake Russian propaganda accounts on social media, a Pentagon spokeswoman said Saturday. A web site that tracks a slice of those accounts, Hamilton 68, found that they were pumping out the Russian government narrative in English.

## THEY'RE "EATING OUR LUNCH"

The U.S. is ill-equipped to respond. Polygraph, part of the tiny corner of the government that's trying, has a staff of five that doesn't usually work on the weekends.

"We focus mostly on Russia right now because there is a large flow of disinformation that's coming from Russia," said Jim Fry, a former Dallas television reporter who runs Polygraph from Washington.

Polygraph is a joint venture of the Voice of America and Radio Liberty, which are funded by — but independent of — the U.S. government. They fall under the umbrella of the Broadcasting Board of Governors, whose mission is to promote freedom and democracy and "tell America's story" around the world. But they are walled off, editorially, from the administration in power.

"The law protects us from interference by U.S. government officials," said Tom Kent, who spent 44 years at The Associated Press before becoming president of Radio Liberty and Radio Free Europe. "They can't tell us what to broadcast."

During the Cold War, the VOA and Radio Liberty sought to counter communist propaganda and funnel information to the news-starved citizenry behind the Iron Curtain.

Those muscles — and budgets — have long since atrophied. But in recent years, there have been growing calls for a new twist on that old mission.

When Lansing became CEO of the Broadcasting Board of Governors in 2015, he said he was confronted on Capitol Hill and throughout the government with a single question:

"Why are the Russians eating our lunch in terms of information warfare?"

People were talking mainly about RT, the former Russia Today, which spends hundreds of millions of dollars a year on an English language broadcast and web platform that regularly skewers American and the West. The U.S. government has labeled RT a propaganda operation.

The State Department came under criticism earlier this year when news reports highlighted its failure to spend \$120 million that had been allocated to push back on Russian propaganda abroad.

Lost in that conversation was the fact that one month into the Trump Administration, Lansing and his team launched Current Time America, a 24-hour Russian-language broadcasting and web platform. The budget was \$20 million — around one-tenth the size of RT's budget, Lansing says. But one year later, Current Time America is available on TV screens in 30 countries, and officials counted 400 million view views on social media last year.

Still, U.S. information efforts are minuscule compared to the Russian campaign. While Current Time America is available in Russia, the Russian government makes it difficult to find — keeping it off cable systems and requiring special tuning for satellite reception.

The broadcasting board's total budget this year is about \$660 million dollars, about a third of what was spent in 1991, adjusted for inflation.

"I think we should be investing more," Lansing said.

The Russian government labels the entire U.S.-funded journalism operation "propaganda" that is "part of a broader, wide-reaching American system of pressure on our country."

Irina van Dusen, who heads the effort as chief of Voice of America's Russian-language programming, knows what propaganda looks like. She grew up in the Soviet Union, listening to the VOA on an illegal short wave radio for scraps of accurate reporting.

She got her journalism degree in Moscow, but decided that if she wanted to practice real journalism, she would have to move to the West.

During the Cold War, she says, the VOA was trying to break through jamming and censorship. Now there has been a proliferation of Russian TV and web channels that put out a cacophony of news, nearly all of it favorable to Vladimir Putin. The task in 2018 is trying to break through a fog of disinformation.

The prevailing view in Russia, she said, is that "There is no truth. There is only different versions, different narratives... We stand by the fact that there is truth. And there are facts."

From a TV studio near not far from where special counsel Robert Mueller comes to work each day, Current Time America covers Washington, offering live broadcasts of Congressional hearings with simultaneous translations.

"People can listen, see how it's done, how policies are made, what questions asked, what facts are being brought up," she said.

The channel also covers Russia, to "provide Russian speaking audiences with a true portrait of the society, you know? As opposed to state-run Russian television that — interprets everything that is done

in the world...as some kind of a United States manipulation and United States meddling in world affairs."

Polygraph.info, and its Russian-language counterpart, Factograph — try to be slightly edgier than a traditional news operation.

"What our reporters do every day is they begin the day looking at Russian media," said Fry. "Looking at what's coming out of Russia. And then we decide whether there's something to fact check. Usually, almost every day, there's more to fact check than we could possibly do with our staff."

The site is modeled after other media fact check efforts, including Politifact and factcheck.org. It highlights a claim, say, by Putin or another Russian official, and brands it for veracity, with labels like "Partially True," "False" or "Misleading."

In March, the site fact-checked a Putin documentary that alleged the Russian leader had always believed that the Ukrainian territory of Crimea was part of Russia. It highlighted remarks by Putin in 2008 in which he said something very different: "Crimea is absolutely not a disputed territory." Six years later, Putin seized Crimea from Ukraine, to international condemnation.

Polygraph also challenged Russia's denial that the nerve agent used to poison a former spy in the UK was made only in Russia, and its assertion that no chemical attack took place in Syria.

Polygraph reporters are not afraid to endorse criticism of the U.S. when it's accurate. When Russian foreign minister Sergei Lavrov criticized a list of Russian oligarchs that the Treasury Department admitted it cribbed from Forbes magazine, Polygraph labeled his comments, "Partially True."

In January, reporters examined a fur coat shown off on Facebook by Russia's foreign ministry spokeswoman. She said it was a fake, bought at a fair in Russia. Polygraph found that the fair didn't sell any coat — and that the coat may have been a fur from an endangered ocelot.

Polygraph's traffic numbers are usually in the low thousands, but that video got 37,000 views, Fry said.

The audio recordings of the Russian mercenaries were a huge coup, even if the site did not seem to get much credit for the scoop. Fry said a Polygraph journalist in Europe, who did not want to be identified, obtained the tapes from a Kremlin source. He acknowledged that he could not rule out U.S. intelligence involvement in distributing the tapes, but that would also be true if the audio had been obtained by a mainstream journalism organization, he said.

The recordings describe an incident in which a number of Russian mercenaries led a group of pro-Assad fighters in an attack on a U.S. base beginning Feb. 7. The mercenaries were from the Wagner Group, it's been widely reported — co-owned by Russian oligarch Yevgeniy Prigozhin, who is close to Vladimir Putin. Prigozhin is also one of the defendants in the indictment brought by Mueller against Russians accused of illegal election activity.

It was the largest ever attack on U.S. troops in Syria, and it was perhaps the first time in many decades that Russian and American troops fought in open combat. Russian mercenaries were among the hundreds who died as the Americans strafed, bombed and shelled the assault force, Army Brig. Gen. Jonathan Braga told NBC's Richard Engel.

The tapes, Fry said, depicted "people who worked for this Russian paramilitary company who were involved in this attack...It showed they knew they were (counterattacked) by Americans. And it showed that there were people who were killed."

Interestingly enough, he added, "within days of our story, the Russian government started admitting there had been involvement of the private military company, the Russian company, in that attack."

Sometimes it's obvious that Russians are more nimble than the Americans at the information game.

On Friday, when the Russian defense ministry accused Britain of faking the chemical attack in Syria, RT was leading its web site with an article highlighting the allegations — making no mention of denunciations from the United Nations and U.S. and British officials.

Polygraph, meanwhile, was leading with a story fact-checking a statement from Russian state media that Hitler had become more popular than Harry Potter in Latvia. It made no mention of the bogus Russian allegation against Britain.

"We didn't get to that today," Fry said, reached by phone. "I wish I could respond as quickly as what they put out."

04/14 Europol busts bitcoin laundering ring

## SOURCE

<https://interestingengineering.com/europol-busts-bitcoin-drug-money-laundering-ring>

## GIST

In what may now seem like an almost prophetic event, the European Union Agency for Law Enforcement Cooperation (Europol) expressed concerns last February that billions in illegal proceeds were hidden in Europe in crypto-cash. Now, Europol in cooperation with global law enforcement agencies has arrested 11 people involved in a cryptocurrency drug trafficking ring that laundered over €8 million.

The operation, named Tulipan Blanca, saw Spain's Guardia Civil, Finnish law enforcement authorities and the US Department of Homeland Security come together to investigate 137 individuals. "As a result of the operation, the Spanish Guardia Civil carried out eight searches and seized several computers, devices, and the equipment used to commit the crimes, such as money bags or money counting machines," Europol said in a statement.

The statement explained that drug traffickers contacted the criminal ring to launder money obtained from their illicit activities. The ring proceeded to split the money into small cash amounts deposited into 174 bank accounts.

From there, the criminals used credit cards linked to the fraudulent bank accounts to withdraw the illegal proceeds from Columbia. However, realizing that these transactions could be tracked, the criminal group then turned to cryptocurrencies.

To cover their tracks, the ring used an unnamed Finnish cryptocurrency exchange to turn their cash into bitcoins and then subsequently further converted the bitcoins into Colombian pesos.

"With cryptocurrencies increasingly used to finance and carry out criminal activities, Europol will continue to coordinate across EU Member States and beyond, to effectively respond to this rising threat," Europol's statement said.

04/14 Targeting tax pros w/fraud returns

## SOURCE

<https://www.cnbc.com/2018/04/14/cybercriminals-now-targeting-tax-pros-to-cash-in-on-fraudulent-returns.html>

## GIST

The deadline to file your taxes is rapidly approaching, but cyber criminals have already been hard at work trying to cash in with fraudulent tax returns.

This tax season, experts say instead of targeting individual tax payers, scam artists are targeting tax professionals.

"One of the challenges that we're seeing this year is that as tax professionals and the I.R.S. have become more and more sophisticated, so too have the adversaries," said Caleb Barlow, IBM Security's vice president of threat intelligence.

Tax fraud is big business for cyber criminals. Last year Internet crimes netted the perpetrators \$445 billion, with tax fraud as a primary focus, according to IBM Security, which monitors cyber crimes.

"We had about 75 tax professionals report that they had been victims of some sort of a tax payer breach. So that unfortunately is a 60 percent increase for the same period of time last year," said Cecilia Barreda, an I.R.S. spokeswoman.

The I.R.S. can recognize if a computer of an individual is filing too many tax returns, and will stop them for likely being fraudulent. But the agency expects tax professionals to file dozens, if not hundreds of tax returns on behalf of their clients.

"If they [cybercriminals] can compromise a tax professional, they get access to two key things. One is the private information of that tax professional's clients that can be used to file tax returns on their behalf," Barlow said.

"And in addition to that, they can use the IP address and the computer of the tax professional to actually do the filing with the I.R.S.," he added.

Here is how the scam works: Cyber criminals target tax professionals with what is known as phishing — spam email that seems legitimate, but contains links or attachments laden with malware.

"The minute that you click on that link, well, then you're owned by the adversary. And what this often means is that they can take control of that system that's normally used by that tax professional," Barlow said.

Once a tax professional's computer is compromised, an attacker can steal the numbers and log-in information they use to file.

"It's an I.P. address we seen before, it's a signature of a computer we seen before. We know it's a tax professional, so they are going be submitting lots of returns," said Barlow.

This year's tax season may be the perfect storm. With a new tax code coming in this year, there has been extra confusion.

"This is kind of a perfect storm where you have a lot of misinformation, a dearth of information, and these new techniques that are being widely used by these criminals looking for compromised computers belonging to tax prep professionals," said Roman Sannikov, the director of European research and analysis for Flashpoint, a cybersecurity company.

He added that "they can use to not only steal information, but also to file these returns in a much more successful way."

04/15 Guarding rail against evolving threats

## SOURCE

<http://www.railjournal.com/index.php/technology/cybersecurity-guarding-rail-against-evolving-threats.html>

## GIST

As the railway seeks to harness the benefits of digitalisation and the Internet of Things, the links between information technology and operational technology become ever-more intertwined. However, these trends are completely redefining the railway security environment as systems become vulnerable to new types of threats. Keith Barrow assesses how the industry is responding to the cybersecurity challenge.

ON May 13 2017, passengers at mainline stations in Germany glanced up at the information screens and saw something unusual. Obscuring the lists of departures and arrivals, a ransomware notice demands a \$US 300 payment in Bitcoin.

The WannaCry virus had infected 450 German Rail (DB) computers, bringing down passenger information systems, ticket machines, and CCTV networks.

This was a very public demonstration of rail's vulnerability to cyberattack, and while the target in this case was the company's business systems, the attack also highlighted the need to secure operational systems against hackers.

Until recently, Industrial Automated Control Systems (IACS) were considered relatively well-insulated against external influence with a high degree of immunity to security threats and attacks. However, the threat landscape has altered significantly in recent years with the proliferation of digital technologies and the increasing interconnectivity between the business and operational functions of companies.

Research by IBM shows cyberattacks on ICAS increased by more than 600% between 2012 and 2014, while according to Dell's 2015 cybersecurity report, attacks on supervisory control and data acquisition (Scada) systems surged from 91,676 in January 2012 to 675,186 in January 2014.

Mr François Hausman, mainline cybersecurity manager for Alstom and leader of Shift2Rail's cybersecurity work package, told delegates at Railtech's recent Intelligent Rail Summit in Vienna that the characteristics of railway networks make them a potential cyberattack target. These include:

- \*distributed architecture - electronic components spread along a section of line or a train
- \*long lifecycles for equipment
- \*high level of certification for safety-related systems
- \*diversity of supply chain and technology, and
- \*small-medium volume production of components.

Mr Domenico Raguseo, technical sales manager, Europe, for IBM says systems are vulnerable to hackers when there is a high degree of integration between IT and operational technology (OT).

"The railway industry is very secure from a cybersecurity point-of-view - hackers would have a lot of difficulty getting into your systems," he says. "With high standards and tonnes of security control, a hacker needs to invest a lot of time if he wants to create a problem for you. Unfortunately, the good news stops here. The safety-first philosophy of rail - that the train stops to protect the lives of the passengers - is good for hackers, because they don't want to kill people, they want to get money. So it would be fantastic for a hacker to stop a train."

As senior managers seek ever more data on the day-to-day performance of the railway, business and operational systems are increasingly interconnected, and wherever there are interfaces, there are potential points of attack.

Mr Lovan Pushparatnam, head of tramway systems and telecoms with Systra, says any cybersecurity strategy must consider people as well as technology. "The best results are achieved when cybersecurity is treated as part of an overall security policy addressing technical aspects and operational procedures, with continuous assessment and measurement," he says. "It's not about protection, it's about process and preparation, monitoring both your assets and your organisation."

Testing the vulnerability of railway systems to cyberattack is a particular challenge because of the difficulty of simulating attacks under realistic operating conditions. "When we model attack patterns, we need to understand how it is possible to attack," Raguseo says. "It's not easy to do penetration testing in a real environment, so you need to create a test environment. Developing a test environment is complicated for IT - I'd say it's impossible for a complex environment like rail."

The European Union (EU) Directive on security of network and information systems (NIS Directive) came into force in August 2016, and is intended to boost the overall level of cybersecurity in member states. The NIS Directive is due to be transposed into the legal systems of the member states by next month and specifically identifies train operators and railway infrastructure managers as entities that could be considered "operators of essential services." Businesses in this category will be required to implement risk management practices, taking "appropriate and proportional technical and organisational measures to manage the risks posed to the security of networks and information systems which they use in their operations." Significant cyber attacks must be reported to a "competent national NIS authority."

All of this leaves railway industry stakeholders with the challenge of securing assets which can have a lifespan of several decades against a threat that is constantly evolving. System architecture is therefore a crucial consideration in safeguarding next-generation rail technologies against attack.

04/15 Experts warn: Russia cyber warfare

## SOURCE

<https://www.standard.co.uk/news/world/syria-news-latest-russia-could-launch-cyber-warfare-within-days-after-us-led-military-action-expert-a3814226.html>

## GIST

Russia could "launch cyber warfare within weeks" in retaliation to US-led airstrikes on Syria bringing down City firms, the UK transport network and the NHS, experts have warned.

Theresa May hailed "targeted and limited" action on key sites of Syria's chemical weapons regime "a success" while Donald Trump branded the offensive "perfectly executed".

But Russia warned of “consequences” following the strike which has left the Prime Minister facing questions over why the decision was not put to a parliamentary vote.

Now experts have said the action in retaliation to a suspected chemical attack in Douma a week ago could lead to “cyber warfare”.

"I suspect Russia will choose not to respond in military terms. But cyber warfare is highly likely," he says.

"It will be an attack on national infrastructure, not just upsetting city firms, but getting inside the transport system, or the health system, or air traffic control. It could affect everyone."

Mark Almond, director of the Crisis Research Institute, Oxford agreed that the strikes would spark retaliation and said Britain was most vulnerable to a counter-attack.

Despite admitting that the "immediate risk of a wider war" has been avoided for now, he warned that sources of potential conflict are still very much active on the ground in Syria.

He wrote in the Sunday Telegraph: "Bad relations could easily encourage a reckless Russian freebooter, prompted and paid by Iran, to try his luck getting revenge on the pockets of US and British forces operating in eastern Syria.

"Britain is more exposed to potential revenge attacks, despite only four Tornados taking part in the strikes, because they flew from Akrotiri in Cyprus - so close to Syria and to Lebanon."

04/15 'Operation Parliament' targets Mideast

## SOURCE

<https://www.forbesmiddleeast.com/en/new-cyberattack-operation-parliament-targets-governments-military-and-intelligence-organizations/>

## GIST

A new potentially geopolitically-motivated cyberattack dubbed Operation Parliament has been targeting governmental departments and large private entities across the Middle East, according to global cybersecurity company Kaspersky Lab.

Operation Parliament has so far affected an unknown number of organizations in over 27 countries, mostly in the Middle East and North Africa, including Egypt, Iran, Iraq, Jordan, Kuwait, Lebanon, Morocco, Oman, Palestine, Qatar, Saudi Arabia and the U.A.E. Financial impact of the attack has not been disclosed.

In a campaign believed to have been active since 2017, the cybercriminals targeted selected victims through malware disguised as legitimate email attachments. Upon opening the attachments victims unwittingly gave the criminals access to their systems, enabling them to remotely gain control over their devices and mine data, as well as activate tools such as webcams. It is believed that the attackers had previously gained access to large databases of contacts for sensitive organisations and targeted non-trained staff.

The criminal group “hid in plain sight” accordingly to Kaspersky Lab. The malware was first discovered during an operation to uncover a phishing scam targeting political figures. At first it appeared to be the work of another group already known to officials. However, under further inspection the encrypted malware was found to be very different to any previous attacks.

Victims are known to include parliaments, senates, top state offices and officials, political science scholars, military and intelligence agencies, ministries, media outlets, research centres, election commissions, Olympic organizations and large trading companies. Over 130 individual users have been identified as victims so far. Efforts are now underway by law enforcers to find the group behind the attacks and prevent any further damage.

“Operation Parliament is another symptom of the continuously developing tensions in the Middle East and North Africa. We are witnessing higher sophistication and smarter techniques used by attackers and it doesn’t look like they will stop or slow down anytime soon” said Mohamad Amin Hasbini, Senior Security Researcher, Global Research & Analysis Team at Kaspersky Lab.

04/14 UK considers retaliatory cyberattacks

## SOURCE

<https://www.reuters.com/article/us-britain-russia-cyber/uk-could-launch-retaliatory-cyber-attack-on->

russia-if-infrastructure-targeted-sunday-times-idUSKBN1HL1BT

GIST

LONDON (Reuters) - Britain would consider launching a cyber attack against Russia in retaliation if Russia targeted British national infrastructure, the Sunday Times reported, citing unnamed security sources.

Britain's relations with Russia are at a historic low, after it blamed Russia for a nerve agent attack on former Russian spy Sergei Skripal and his daughter in England, prompting mass expulsions of diplomats.

Russia has denied involvement, and on Saturday also condemned strikes against Syria by Western powers, which Britain took part in.

Cyber security has become a focal point of the strained relations. On Thursday, a British spy chief said that his GCHQ agency would "continue to expose Russia's unacceptable cyber behaviour", adding there would be increasing demand for its cyber expertise.

The Sunday Times also said that British spy officials had been preparing for Russia-backed hackers to release embarrassing information on politicians and other high-profile people since the attack on the Skripals.

04/14 US: 2000% rise disinformation campaign

SOURCE

<http://www.foxnews.com/world/2018/04/14/russian-trolls-launch-disinformation-campaign-after-syria-airstrikes-pentagon.html>

GIST

Following U.S.-led coalition strikes in Syria to degrade chemical weapons capabilities, the Pentagon says it's seen a "2,000 percent increase" in Russian "disinformation."

Russia, a close ally of Syrian President Bashar al-Assad, has reportedly started a new campaign to spread propaganda and other false narratives on social media after the U.S., France and the United Kingdom staged airstrikes in Syria this weekend in response to Assad's alleged use of chemical weapons.

Chief Pentagon spokeswoman Dana White said at a briefing on Saturday that “there has been a 2,000 percent increase in Russian trolls in the last 24 hours.”

Saturday’s briefing was an attempt to counter any false information.

An investigation into the 2016 presidential elections by the federal government has found that a number of Kremlin-backed hacking groups spread politically charged content across social media platforms in an attempt to influence the outcome.

At a meeting of the U.N. Security Council Saturday, U.S. Ambassador Nikki Haley took aim at Russian ambassador Vasily Nebenzia over the “fake news.”

“The pictures of dead children are not fake news,” she said.

04/13 Yahoo, AOL read, share users’ emails

## SOURCE

<https://www.cnet.com/news/yahoo-aol-oath-privacy-policy-verizon-emails-messages/>

## GIST

Oath, the media division of Verizon that runs both AOL and Yahoo, is finally unifying the privacy policy of its two giant legacy Internet brands. That means an updated set of privacy terms and policies for hundreds of millions of users. And in an online world where privacy expectations have been radically reshaped in light of Facebook’s Cambridge Analytica mess, it’s more important than ever to read the fine print on those splash screens.

When we logged in to a Yahoo Mail account Friday, we were greeted with the privacy policy you see below (Jason Kint had pointed to the policy earlier on Twitter). In it, Oath notes that it has the right to read your emails, instant messages, posts, photos and even look at your message attachments. And it might share that data with parent company Verizon, too.

To be clear, Yahoo’s previous privacy policy had already stated that Yahoo “analyzes and stores all

communications content, including email content," so the company has previously disclosed that it's been able to scan the contents of your emails, at least. (AOL's legacy privacy policy doesn't say anything like that.)

When you dig further into Oath's policy about what it might do with your words, photos, and attachments, the company clarifies that it's utilizing automated systems that help the company with security, research and providing targeted ads -- and that those automated systems should strip out personally identifying information before letting any humans look at your data. But there are no explicit guarantees on that.

Notably, Google used to scan its Gmail messages for better ad targeting, though it stopped the practice in June of 2017.

In other words, emails related to your banking and financial transactions appear to be equally in the crosshairs of Oath's ad targeting engine.

There appears to be another big change for Yahoo users, too: Oath's previous mutual arbitration clause and class-action waiver has been updated and extended across the company's services to include Yahoo as well. What it means is if you don't like what the company does with your data, you'll have a hard time suing.

04/14 Google loses 'right to be forgotten' case

## SOURCE

<https://www.cbsnews.com/news/google-loses-right-to-be-forgotten-legal-case-europe/>

## GIST

A U.K. court has ruled in favor an unnamed businessman who wanted Google to remove search results of his past conviction history in a landmark "right to be forgotten" case. The search engine had previously refused to delete results about his conviction, BBC News reports.

Ten years ago, the businessman was convicted of conspiring to intercept communications. He spent six months in jail. He argued that his conviction was no longer relevant to the public.

Google said in a statement Friday it would respect the judge's decision. "We work hard to comply with

the right to be forgotten," it said, "but we take great care not to remove search results that are in the public interest."

However, Justice Mark Warby rejected a separate claim by a businessman who had committed a more serious crime. More than 10 years ago, the second man was convicted of conspiring to account falsely. He spent four years in jail.

Warby said the winning businessman had shown remorse, while the other man continued to "mislead the public."

In 2014, the European Court of Justice set legal precedent for the "right to be forgotten" after a Spanish man asked Google to remove results about his financial history. Google said it has removed 800,000 pages from its results over similar requests, but companies can decline to remove information if they believe they are in the public interest.

04/15 Using social media inspire potential terror

SOURCE

<https://theconversation.com/since-boston-bombing-terrorists-are-using-new-social-media-to-inspire-potential-attackers-94944>

GIST

Five years ago, a deadly attack during the Boston Marathon made America's nightmare come true: the radicalized boy next door.

The research my colleagues and I conduct at Georgia State University tracks how terrorist organizations expose people – mostly young men – to radical messages and extreme violence on social media. The goal: changing their worldview and eventually guiding them to act.

The Boston Marathon bombing marked the beginning of a new trend that is almost impossible to prevent. Before, individuals would receive guidance and training from terrorist organizations in person.

Now, these same groups simply inspire individuals to carry out attacks on their own, for which the group can claim credit if they are successful. We call that “self-radicalizing.”

### Radicalization of the boy next door

It remains puzzling to many how Dzhokhar Tsarnaev, a 19-year-old stoner who listened to Jay-Z and watched “The Walking Dead,” could – with his older brother, Tamerlan – killed and injured so many innocent civilians. Authorities at least knew more about Dzhokhar because he was taken alive. His brother died during a police chase.

Courtroom sketch of Boston Marathon bomber Dzhokhar Tsarnaev. Jane Flavell Collins via AP

Dzhokhar did not fit the profile experts have identified as typical of self-radicalized terrorists – either jihadi (a Muslim Holy warrior) or extreme right-wing versions. They were unlike many terrorists who gravitate to extremist ideologies.

According to researchers Alice Marwick and Becca Lewis, people who are radicalized “may have a hard time finding like-minded friends in their day-to-day lives, or connecting with romantic partners.”

Dzhokhar was described by Rolling Stone magazine, for example, as attractive, popular and a student athlete. He was also flunking courses and lost his financial aid at University of Massachusetts-Dartmouth in the semester leading up to the attack. But that hardly explains why he went on to plan the deaths of potentially hundreds of runners and spectators.

Eventually, prosecutors found copies of Inspire magazine on Dzhokhar’s laptop. The magazine is an English-language online publication that was published by al-Qaida in the Arabian Peninsula. They also found videos of sermons by Anwar al-Awlaki, the American-born firebrand jihadi cleric who was killed in 2011 in Yemen by two U.S. drones. Awlaki’s videos are still circulating on social media years after his death.

The evidence and Dzhokhar’s testimony suggest that the brothers were inspired by propaganda. Both Awlaki’s sermons and Inspire magazine advocate and provide specific “how-to” instructions on mass casualty attacks. Dzhokhar and his brother learned how to make the pressure-cooker bombs from one of the most well-known articles published by the magazine: “How to Build a Bomb in the Kitchen of Your Mom.”

For example, the text explains: “Can I make an effective bomb that causes damage to the enemy from ingredients available in any kitchen in the world? The answer is yes. But before how, we ask why? It is because Allah says ... every Muslim is required to defend his religion and his nation.”

In the five years since the Boston bombing, the number of social media platforms disseminating terrorist propaganda has increased tenfold. And thus, so has the scale and scope of possible future attacks.

### Shift to encrypted platforms

As technology evolves, new online platforms provide avenues for terrorist organizations to share information. Platforms have gone from an open interface model, in which anyone can observe what is occurring, to closed and encrypted platforms in which privacy and security settings are protected. These platforms are not readily accessible nor can they be viewed without already being a member of the chat room or channel. When used by terrorist groups, encrypted platforms are harder to police and monitor.

Telegram is an encrypted application developed by Pavel Durov, the inventor of Russia's Facebook equivalent, VKontakte. Telegram has all but replaced Twitter and Facebook for jihadi communication. Open platforms like Twitter and Facebook have increasingly policed jihadi content, shut down their sites, and taken down their content within minutes of it being posted.

Social media allows terrorist groups to foster a virtual community and a sense of belonging. Research on radicalization suggests that their methods involve taking advantage of individuals' feelings of loneliness and alienation. However, this doesn't explain why well-adjusted, well-integrated individuals who appear to have assimilated into Western society – like the Tsarnaevs – gravitate to violent extremist ideologies.

Research I've done with colleagues on social media demonstrates that terrorist organizations also deliberately foster a type of addiction to the platform and to its content.

They do this by creating a schedule of positive reinforcement that modifies behavior, like gambling or playing slot machines. The result changes every time such that one cannot anticipate the outcome and continues to engage in behavior in hopes of a reward the next time around. Not knowing whether you are on the verge of a big win sustains the individual to continue the behavior (in some cases, gambling), whereas not knowing what type of reward the terrorist platform will offer equally sustains user engagement.

This keeps the individual tethered to his or her computer, making certain rewards more valuable, limiting how much time you have to join a group or access material, making access exclusive, and varying content to prevent boredom.

Through this process, it is possible that ordinarily well-adjusted individuals can be persuaded to channel everyday feelings of frustration, disappointment or anger into acts of extreme violence.

As the Islamic state further recedes and loses even more territory, it is adapting to exist almost entirely digitally. Those who fight terrorism need to understand the difference between individuals who are inspired and those who are directly encouraged to engage in violence. Likewise, terrorism researchers need to understand the role of social media in capturing the imagination of young men and instigating them to perpetrate violence.

04/15 ISIS member families on rise in Anbar

## SOURCE

<https://www.iraqinews.com/iraq-war/number-of-islamic-state-members-families-on-the-rise-in-anbar-as-displaced-people-return-back-home/>

## GIST

Anbar (IraqiNews.com) The number of families of Islamic State members has been growing as hundreds of displaced families returned to their regions, a security source from Anbar police said on Sunday.

Speaking to Almaalomah website on Sunday, the source said “number of IS families in Hit city and surrounding regions reached 150 families, which indicate terrorist operations that could target security troops and civilians, given that those families provide the militants with information about security personnel in order to target them.”

“The presence of those families in Hit threaten safety and stability of the region. Displacing them could be hard due to pressures by rights groups,” the source added.

Thousands of IS militants as well as Iraqi civilians were killed since the government campaign, backed by paramilitary troops and the coalition, was launched in October 2016 to fight the militant group.

In December, Abadi announced full liberation of Iraqi lands, declaring end of war against IS members. However, Islamic State continues to launch sporadic attacks across Iraq against troops. Security reports indicate that the militant group still poses threat against stability in the country.

As many as 3,298 civilians were killed and 4,781 others were wounded in 2017, excluding Anbar civilian casualty figures for November and December, which are not available, UNAMI said in a report in December.

04/16 ISIS threatens New York subways

## SOURCE

<http://www.dailymail.co.uk/news/article-5620103/ISIS-threaten-bomb-New-Yorks-subway-chilling-propaganda-poster.html>

## GIST

ISIS propaganda chiefs have issued a chilling threat to bring death and destruction to New York's subway.

The terror group has vowed to attack Paris and the World Cup finals in Russia in recent weeks as part of a global campaign of lone wolf strikes as it continues to lose territory in the Middle East.

In its latest warning, uploaded to militant Islamist messaging platforms, a man is pictured standing on the platform at New York's High Street - Brooklyn Bridge Station with explosives and a timer behind him.

The poster includes the threat: 'You will not expect where we will attack.'

Last year extremists also threatened to attack the Queen and the Vatican City.

The group's propaganda wing – the Wafa Media Foundation - is continuing to churn out threats despite the so-called ISIS caliphate suffering huge losses in Syria and Iraq.

ISIS fanatics are increasingly turning to lone-wolf supporters to take up their violent cause around the world.

'Wafa Media Foundation specialises in these types of graphics. Wafa's threat, like others recently issued by pro-ISIS media groups, is a specific attack directive within a larger push by ISIS for lone wolf attacks as it rapidly loses territory in Iraq and Syria,' said Rita Katz, director of the respected SITE Intelligence Group,

'Though these threats should be taken seriously, there is also a publicity element to pro-ISIS media groups' threats against places like the Vatican or events like 2018 FIFA World Cup.'

04/16 Extremists hamper polio eradication

## SOURCE

<http://abcnews.go.com/Health/wireStory/nigerias-boko-haram-extremists-hamper-polio-eradication-54494701?>

## GIST

Islamic extremists made Imana Alhaji Gana's village in northeastern Nigeria too dangerous for health workers to vaccinate against polio. Now that she and her family have fled to a displacement camp, those workers want to catch her children in time.

Here in the camps housing thousands of families seeking safety from the extremists, health teams are going from tent to tent, inoculating youngsters against the disease that withers limbs and disables children for life.

At first, Gana is afraid to let the outreach workers vaccinate her baby. Eventually they persuade her that the three-week-old child is not too young for immunization, which can take place as early as the day of birth.

The complicated fight against polio is yet another way the Nigeria-based extremist group Boko Haram has disrupted life in the northeast, leaving children vulnerable to an entirely preventable disease.

"When such children come to the camps or host communities they become a threat to other children," said Almai Some, the field coordinator in Borno state for the vaccination campaign run by Rotary.

Some of the families arriving are from areas where polio vaccinators have not been able to visit for as long as six years.

Boko Haram's insurgency began in Maiduguri, Borno state's capital, but its reach has expanded beyond Nigeria's borders to neighboring Niger, Chad and Cameroon. Its violence has proved to be a major setback to the international campaign against polio.

Nigeria is one of just three countries where polio is endemic and has not been eliminated, along with Pakistan and Afghanistan. The final phase to wipe out polio is "proving to be extraordinarily difficult" because "the poliovirus is surviving despite all the good work and in the face of everything that is being thrown at it," said a WHO-appointed monitoring group at the end of last year.

In Nigeria, there is little or no surveillance data in Borno state, and "unless there is a breakthrough to reach those areas in Borno, the entire polio (eradication) program is at risk," said the monitoring group. Nigeria had other outbreaks last year including cholera, hepatitis, monkeypox, Lassa and yellow fevers, showing the challenges to the country's health care system. Globally the campaign to eradicate polio has been faced with outbreaks last year in non-endemic countries like Congo and Syria.

Now the WHO says it will be spending \$127 million toward eradicating polio in Nigeria between 2018 and 2019. Rotary's program is helping that effort by targeting some 2.1 million children in 24 accessible local governments. But there are still three areas in Borno state that are not included because of ongoing instability: Kala-Balge, Marte and Abadam. For those unreachable areas, the vaccinators train Nigerian soldiers in how to administer the vaccines.

In a few cases, villagers have reported being threatened by Boko Haram fighters to avoid the polio vaccine. And in 2013 a number of vaccinators were attacked and killed by the extremists, leading some of their colleagues to disguise their vaccine carriers or hide them under their hijabs.

04/15 Turkey: US pastor faces terror trial

## SOURCE

[http://abcnews.go.com/International/wireStory/us-pastor-trial-alleged-terror-ties-spying-turkey-54478886?cid=clicksource\\_76\\_2\\_hero\\_headlines\\_bsq\\_hed](http://abcnews.go.com/International/wireStory/us-pastor-trial-alleged-terror-ties-spying-turkey-54478886?cid=clicksource_76_2_hero_headlines_bsq_hed)

## GIST

An American pastor imprisoned in Turkey is going on trial for alleged terror ties and spying in a case that has increased tensions between Washington and Ankara.

Andrew Craig Brunson, a 50-year-old evangelical pastor from North Carolina, is facing up to 35 years in prison on charges of "committing crimes on behalf of terror groups without being a member" and "espionage." The trial begins Monday in western Izmir province.

Brunson was arrested in December 2016 for alleged links to both an outlawed Kurdish insurgent group and the network of the U.S.-based Muslim cleric who Turkey blames for a masterminding a failed military coup that year. The cleric, Fethullah Gulen, denies the claim.

Brunson, who has lived in Turkey for 23 years, has denied all allegations, saying that he solely worked as a pastor.

The Turkish government has clearly linked Brunson's case with its determination to force the U.S. to extradite Gulen — and some see the pastor as a diplomatic pawn.

The American Center for Law and Justice, a conservative Christian group in the U.S., has called Brunson a "hostage of the Turkish government." A petition has garnered more than half a million signatures, claiming that the case was putting Christianity on trial.

Brunson's lawyer, Ismail Cem Halavurt, told The Associated Press on Sunday he expects the pastor's acquittal, arguing that the "weak" indictment lacked sufficient evidence to make the case hold up in court.

American officials have repeatedly requested that Brunson be released — President Donald Trump himself asked Turkish President Recep Tayyip Erdogan to have his government "expeditiously" return the pastor to the U.S.

But Erdogan fired back at Washington, demanding that the U.S. first return Gulen.

## GIST

Officials say a U.N. peacekeeper is dead and 10 French soldiers have been wounded after a jihadist attack in northern Mali.

Residents in the town of Timbuktu reported hearing two large detonations Saturday near a camp for the U.N. mission known as MINUSMA.

Ten soldiers from the French military operation known as Barkhane were among those hurt — five seriously, according to the Malian security ministry.

There was no immediate claim of responsibility though a number of extremist groups are active in the region.

A security official, who spoke on condition of anonymity because he was not authorized to speak to reporters, said one of the vehicles used in the attack had been disguised as a MINUSMA vehicle while the other was marked as a Malian military vehicle.

## GIST

The Syrian army has declared the eastern suburbs of the capital Damascus "fully liberated" after the last group of gunmen left the town of Douma.

An army statement read by chief military spokesman Brig. Gen. Ali Mayhoub said Saturday that special units are clearing streets and squares of Douma from mines and explosives planted by rebels.

Douma is the largest town of the suburbs known as eastern Ghouta and its capture marks the biggest victory for President Bashar Assad's forces since the conflict began seven years ago.

The army said that troops discovered weapons factories, arms depots, tunnels and food storage places.

It added that the army is preparing eastern Ghouta for tens of thousands who were displaced over the

past two months during a crushing government offensive to retake the area.

04/15 Afghan, Pakistan forces border clash

#### SOURCE

<http://abcnews.go.com/International/wireStory/afghan-pakistani-forces-clash-disputed-border-54478030?>

#### GIST

An Afghan official says Pakistani forces have crossed into eastern Afghanistan and clashed with Afghan troops.

Col. Abdul Hanan, the acting provincial police chief in the eastern Khost province, says the fighting broke out early Sunday and is still underway. He was not immediately able to confirm reports of casualties.

The two countries are separated by the 2,400-kilometer (1,500-mile) Durand Line, which was drawn by British rulers in 1896. Kabul does not recognize it as an international border and has objected to new fortifications being built by Pakistan.

The two U.S. allies routinely accuse each other of failing to crack down on militants who operate along the porous border.

04/15 Militants attack Afghan checkpoint; 11 dead

#### SOURCE

<http://abcnews.go.com/International/wireStory/insurgents-attack-checkpoint-afghanistan-kill-police-54477896?>

#### GIST

At least 11 Afghan paramilitary forces were killed when the Taliban attacked their checkpoint, an official said Sunday.

Zabi Amani, a spokesman for the governor of the northern Sari Pul province, said two other forces were wounded in the attack late Saturday. He said three insurgents were killed, including a local commander, and four others were wounded.

Those targeted were members of the Local Uprising Forces, militias supported by the government.

No one immediately claimed the attack, but Amani blamed the Taliban, who are active in the area.

## GIST

VIENNA – An Austrian court has convicted a 19-year-old of involvement in plans for two Islamic extremist attacks in Germany, one of which was supposed to be carried out by a 12-year-old boy.

The Austria Press Agency reported that the defendant was convicted Friday in Vienna of attempted incitement to murder as a terrorist crime. He was given a nine-year sentence.

The Austrian of Albanian descent was accused of trying to incite a 12-year-old to attack a Christmas market in Ludwigshafen in 2016, and plotting an attack on the United States' Ramstein Air Base along with a 16-year-old girl.

Defense lawyer Wolfgang Blaschitz said he is considering appealing.

The defendant testified he became a supporter of the Islamic State group following a previous jail term for robbery. He denied ordering any attacks.

04/14 Boko Haram abductions, killings

## SOURCE

<http://abcnews.go.com/International/boko-haram-abducted-1000-children-killed-2000-teachers/story?>

## GIST

Boko Haram has abducted more than 1,000 children in northeast Nigeria since 2013, the United Nations' children's agency announced Friday.

The number of children kidnapped by the Nigerian terrorist group includes 276 girls snatched from a boarding school in the northeast town of Chibok on the night of April 14, 2014, four years ago today.

Some of the Chibok schoolgirls managed to escape, while others were later rescued or freed following negotiations. But four years on from that fateful night, more than 100 of them have yet to be returned to their families, according to UNICEF.

"The four-year anniversary of the Chibok abduction reminds us that children in northeastern Nigeria continue to come under attack at a shocking scale," Mohamed Malick Fall, UNICEF representative in Nigeria, said in a statement Friday. "They are consistently targeted and exposed to brutal violence in their homes, schools and public places."

Since Boko Haram launched its insurgency in the northeast region nine years ago, at least 2,295 teachers have been killed and over 1,400 schools have been destroyed. Most of these schools haven't been able to reopen due to extensive damage or ongoing insecurity in the area, according to UNICEF.

Most recently, suspected Boko Haram fighters abducted 110 students from an girls' boarding school in the northeast town of Dapchi in the middle of the night on Feb. 19. More than a month later, 104 of the schoolgirls were freed by their captors following "back-channel efforts and with the help of some friends of the country," according to Segun Adeyemi, spokesman for Nigeria's Ministry of Information and Culture.

The relentless onslaughts show not even children and schools are spared from Boko Haram's wrath -- rather, they are the targets.

The Nigerian jihadist group's uprising was fueled largely through the group's systematic campaign of

abducting children and forcing thousands of girls and boys into their ranks, according to a report issued in April 2017 by the United Nations Children's Fund (UNICEF).

04/14 Egypt: suicide bombers Sinai kill 8

## SOURCE

<http://abcnews.go.com/International/wireStory/egypt-troops-killed-15-wounded-sinai-clashes-54465542?>

## GIST

Militants wearing explosive belts blew themselves up as they tried to infiltrate a military base in Egypt's central Sinai, killing eight soldiers and wounding 15 others, the military said on Saturday.

The clashes at dawn left 14 militants dead. They were armed with rifles and RPGs, the armed forces said in a statement. The attack comes two months after the launch of a massive operation against militants in Sinai as well as parts of Egypt's Nile Delta and Western Desert, along the porous border with Libya.

There was no immediate claim of responsibility for the attack which bore the hallmarks of the extremist Islamic State group, whose local affiliate is spearheading an Islamic insurgency in Egypt's Sinai Peninsula.

Egypt has for years been struggling to contain the Islamic insurgency in the turbulent Sinai region. It has carried out military operations there that, it says, have killed hundreds of militants.

It has also built a buffer zone along the border with Gaza to curb the flow of militants and weapons through a vast tunnel network. The insurgency, however, has shown no signs of abating.

04/14 'Warranty void if removed' stickers illegal

## SOURCE

<https://www.bleepingcomputer.com/news/government/ftc-warranty-void-if-removed-stickers-are-illegal/>

## GIST

The US Federal Trade Commission (FTC) sent letters this week to six major companies containing warnings that using "warranty void if removed" or similarly worded stickers on their products is illegal.

The FTC said the six companies sell automobiles, cellular devices, and video gaming systems, all industry verticals where such practices are rampant.

But besides the use of anti-tampering "warranty void if removed" stickers, the letters also warn companies against forcing customers into using replacement parts or repair services provided by certain companies for users to keep their warranties intact.

In other words, the FTC has officially shown its support for the Right To Repair movement that's been becoming popular in the US and Europe.

"Provisions that tie warranty coverage to the use of particular products or services harm both consumers who pay more for them as well as the small businesses who offer competing products and services," said Thomas B. Pahl, Acting Director of the FTC's Bureau of Consumer Protection.

## Limiting repair options illegal under 1975 US law

The FTC says that such practices are illegal under the Magnuson-Moss Warranty Act, a law that governs consumer product warranties, and which states that no company can put restrictions on the way users choose to repair their products.

The law says that companies can't force users to use only certain types of (astronomically-priced) replacement parts, take products for repair jobs only at certain repair shops, or can't plaster anti-tampering stickers on products to prevent users from repairing their own products.

Over the past two decades, companies in the US have been ignoring this law and have been locking down products and repair practices, using "warranty voiding" as punishment for those users who make modifications to products or dare to find cheaper or faster ways of repairing products.

The FTC says this is illegal. The Commission plans to review the six companies it sent letters to after 30 days and see if they have dropped their current practices, threatening legal action if they did not.

04/15 Fake gov. letters surface in Clark Co.

## SOURCE

<https://www.seattletimes.com/seattle-news/politics/fake-inslee-letter-posted-on-doors-around-clark-county/>

## GIST

VANCOUVER — On Thursday morning, Gary Berreth stepped outside his house and found an unexpected letter attached to his front door.

The letter featured the Washington state seal and claimed to be from the Office of the Governor. It warned of “an adjustment in property taxes” due to the shutdown of an oil terminal and an agreement with BNSF Railway to prohibit the shipping of oil, lumber and coal by rail through Vancouver.

At the end of the letter was a carefully scrawled signature: “Jay Inslee,” Washington’s Democratic governor. Copied on the letter were Clark County Assessor Peter Van Nortwick and Treasurer Doug Lasher.

“I instantly knew that there is no way the government does business like this,” said Berreth, who said he saw the same letter attached to other doors throughout his Green Meadows neighborhood.

Berreth was correct in assuming the letter was a hoax.

In an era of growing concerns of fake news spreading online, these apparent dirty tricksters have taken up a more old-fashioned approach to spreading misinformation.

Simon Vila, spokesman for Inslee, confirmed that neither the governor nor his staff were out posting notes to residents’ doors.

“This is definitely not from our office,” he said.

Vila said the governor’s office suspects that whoever is behind the fake notes is also behind a series of strange letters directed to supporters of U.S. Sen. Patty Murray, D-Washington. These letters were typically signed by “Titania,” a character from the play, “A Midsummer Night’s Dream.”

Vila noted that the fonts of both letters are similar.

The letter’s reference to “shutting down the oil terminal” is a likely reference to Inslee’s decision earlier this year to reject a proposed crude-by-rail terminal at the Port of Vancouver.

The letter’s claim that BNSF, which operates a large network of railways, has entered an agreement to end the shipment of oil, lumber and coal by rail through Vancouver is also highly questionable.

Courtney Wallace, director of public affairs for BNSF, said in an email that as “a common carrier, we are obligated by federal law to move all regulated goods.”

“I’m just surprised someone took the time to write something like this up,” said Van Nortwick, a Republican. He took to Facebook to debunk the letter, although pointed out that not all of it was fake news.

“It’s very rare that someone gets my name spelled right,” he said

04/15 Newest threat to Calif. redwoods: pot

## SOURCE

<https://www.sfgate.com/news/article/The-newest-threat-to-California-s-redwoods-isn-t-12835952.php>

## GIST

A new industry is thriving in California. It is green in terms of the money being made and the crop itself. Yet it is anything but that when it comes to the environment, posing horrendous ecological threats to the

region's redwood forests.

Lindgren Lumber and Humboldt Flakeboard are the newest additions to the Medical Marijuana Innovation Zone, an area in Arcata, California, zoned specifically for marijuana cultivation and processing. As businesses like Humboldt Harvest Wellness and Talking Tree Farms apply for the necessary permits to process cannabis in the former mill complex, it is evident that the cannabis business may restore the economy of redwood country.

But this new industry might also undermine the environmental activism that has long fought to preserve the redwoods as a natural resource.

Not long ago, activists thought they had won this fight. And they had - until now. They successfully dislodged corporate logging, but the old timber mills are being used to churn out marijuana. Marijuana cultivation subjects North Coast forests to a barrage of environmental assaults: soil erosion, heavy pesticide use, stream diversion, irresponsible grading and land clearing, all of which threaten to lay waste to the redwoods.

As marijuana businesses repurpose Arcata's remaining lumber mills, a renewed ecological peril haunts Humboldt County. Just like timber companies in decades past, marijuana interests are positioning themselves to shape regulations that protect the industry, not the environment. Americans only have to look back a few decades to the activism that saved the redwoods to understand just how high the stakes are.

Precipitating the "timber wars," that activism began when logging companies expanded operations during the post-World War II housing boom. Timber yields exploded between 1940 and 1970, and increased demand led logging companies to clear-cut large swaths of North Coast redwood forest. This practice had broad ramifications. Leveling a patch of forest compromised entire watersheds by eroding soil and increasing siltation in streams, which left forests vulnerable to flooding, landslides and myriad other environmental problems.

Efforts at redwood preservation proved ineffective when protected groves were surrounded by denuded land. Consequently, environmental advocates intensified their push to create an expansive national park in Northern California that would protect the redwoods from the damage caused by clear-cutting.

By 1968, the Redwood National Park Act established a federal park that protected 58,000 acres of forest. Preservationists had originally proposed acquiring 90,000 acres to ensure the ecological stability of the region, but fierce resistance from timber companies forced a compromise. Yet because environmental impacts were not confined by man-drawn property lines, this compromise meant clear-cuts on nearby private property ended up threatening protected redwood stands anyway.

Activists requested the National Park Service exercise its discretionary power to create a buffer zone around sensitive groves. Three separate studies confirmed the grave ecological hazards presented by nearby logging operations.

NPS, though, was new to the area, and hoped to avoid making waves as it worked to integrate itself into the community. As a result, jobs and the local economy trumped ecological health. NPS took an approach that empowered private interests, adopting a utilitarian cost-benefit analysis that overrode preservationist policy.

Increased harvests led to new logging roads, clear-cut sites, stream diversion and, perhaps most shocking, aerial spraying of Agent Orange, a herbicide known to contain carcinogens. Roads and clear-cuts interrupted the ecosystem and directly threatened wildlife habitat. Road-building itself led to erosion and presented dangers for aquatic life. The use of Agent Orange compounded these problems not only by poisoning habitats, but also by destroying the roots and undergrowth that stabilized the forest floor.

Nevertheless, passing legislation to protect additional old growth proved difficult because of the political might of corporations like Maxxam, a multinational conglomerate that muscled its way into Humboldt's timber industry during the redwood wars. Activists spent years fighting to save remaining old-growth redwood stands. Finally, the Clinton administration brokered a deal to preserve sensitive groves.

But the victory was short-lived. Although the timber industry fell, a robust pot industry soon sprouted in its place. This was not the same pot industry once concentrated in small, personal gardens and largely associated with hippies, back-to-the-landers and other counterculture migrants. The growing popularity of pot, along with increasing legalization, has turned marijuana cultivation into big business. And despite its reputation as a liberal bastion, California left regulation to local authorities.

The result is a tangled web of lenient laws. Despite the liberalization of marijuana laws in the state, semi-legal and illegal cultivation persists. Marijuana's illegality elsewhere continues to fuel a robust black market. Intending to sell on this market, pot farmers interested in a cash crop have little incentive to seek permits or comply with regulations. In any case, the odd dichotomy under which marijuana is legal in California, but illegal under federal law, makes it hard to enforce regulations as local officials find themselves at odds with federal agencies.

At best, pot farmers loosely adhere to regulations while they operate in a legal gray area. At worst, inconsistent enforcement encourages illegal cultivation - which poses serious environmental consequences as these grow sites often contain banned pesticides and other toxic contaminants.

And that creates real environmental hazards. According to Rep. Jared Huffman, a Democrat, authorities have removed 8,188 pounds of fertilizer, 104 pounds of rodenticide, 560 gallons of insecticide, 50

gallons of garbage and miles of irrigation line from illegal grow sites on the North Coast.

Perhaps the most detrimental contaminant making its way into the forests is carbofuran, a toxic pesticide banned in the United States. These pesticides leach into streams and other waterways, increasing their deadly reach. Chemical runoff from grow sites poisons swimming holes and has the potential to seep into city water supplies, which is alarming because carbofuran is lethal to humans in small doses. Ecologists have also determined that chemicals are endangering wildlife such as the Pacific fisher and the northern spotted owl.

In addition to the impact from toxins, the water usage demanded by marijuana cultivation does serious ecological harm. A marijuana plant requires around 22.7 liters of water a day. Unregulated cultivation can easily deplete surface water sources as farmers divert streams and springs.

Water isn't the only resource that pot devours. The plants require lots of sun, which encourages farmers to clear grow sites of trees and plants that might compete with cannabis for light. Satellite imaging has revealed the alarming rate at which these clearings are breaking up otherwise continuous forest. And grow sites require access, which means additional land is cleared and improperly graded as rogue farmers build roads.

All of these changes in the land accrue: Forest and other habitat is fragmented, streams are buried, diverted or polluted, and wildlife dies.

These trends are disturbing. California produces 60 to 70 percent of the marijuana consumed in the United States, which means the state is shouldering most of the environmental cost. As one study of the North Coast indicates, the danger from marijuana cultivation is particularly concerning because the "region is a recognized biodiversity hotspot." The redwoods constitute an ecosystem that is unique and rare - and now marijuana cultivation even poses a threat to Redwood National Park.

04/15 China sends warning to Taiwan, US

## SOURCE

<https://www.cnn.com/2018/04/15/asia/taiwan-us-china-xi-jinping-drills-intl/index.html>

## GIST

(CNN)Chinese President Xi Jinping has sent a clear message of Beijing's disapproval over growing ties between the United States and Taiwan by ordering live-fire drills in the Taiwan Strait.

The drills, to be held this coming Wednesday, will mark the first time the Chinese Navy has held drills with live ammunition in the strait since September 2015, in the lead-up to the self-ruled island's presidential election.

Prior to those elections, relations between the two were at a high point after Xi met with then-President Ma Ying-jeou, the first such meeting in history between leaders of the two governments.

But since then, tensions between China and the island it views as a breakaway province have become strained under Ma's successor, President Tsai Ing-wen.

The new Trump administration has sought closer ties to President Tsai's government, angering Beijing by signing two deals in the past month to tighten ties with the island, including a travel act which will allow more official visits between the US and Taipei.

"(China) wants to highlight that the Chinese navy is ever ready and secondly, it is a signal to the government in Taipei you better not go further," Collin Koh, research fellow at the S. Rajaratnam School of International Studies' Maritime Security Program, told CNN.

The planned live-fire exercises follow a massive show of force by the PLA Navy on April 10 and 11, which conducted the country's largest military drills ever in the South China Sea.

Chinese President Xi personally reviewed the troops himself from the deck of the Chinese destroyer Changsha on Thursday, speaking to the troops about the need for the navy to become "world-class."

Responding to the news of the upcoming live-fire drills, the Taiwanese Defense Military said in a statement the drills were taking place in a routine military zone and reiterated their national army could protect the country from any threat.

"Our people please rest assured," the statement said.

04/15 FDA pulls concentrated caffeine

## SOURCE

<https://www.nbcnews.com/health/health-news/fda-acts-pull-concentrated-caffeine-market-n865716>

## GIST

Bulk caffeine products may have killed at least two people and they don't belong on the market, the Food and Drug Administration said Friday.

The FDA declared concentrated, bulk caffeine products illegal and said it would act to get them off the shelves.

"These products present a significant public health threat because of the high risk that they will be erroneously used at excessive, potentially dangerous doses," the FDA said in a statement.

"Highly concentrated and pure caffeine, often sold in bulk packages, have been linked to at least two deaths in otherwise healthy individuals."

The FDA has been warning about powdered caffeine since 2014, when an Ohio teenager died after using it. It's also specifically asked sellers to stop providing it directly to consumers.

"Despite multiple actions against these products in the past, we've seen a continued trend of products containing highly concentrated or pure caffeine being marketed directly to consumers as dietary supplements and sold in bulk quantities, with up to thousands of recommended servings per container," FDA Commissioner Dr. Scott Gottlieb said in a statement.

"We know these products are sometimes being used in potentially dangerous ways. For example, teenagers, for a perceived energy kick, sometimes mix dangerously high amounts of super-concentrated caffeine into workout cocktails."

It would be easy to get a dangerous dose, the FDA said.

"A half cup of a highly concentrated liquid caffeine can contain approximately 2,000 mg of caffeine and just a single teaspoon of a powdered pure caffeine product can contain approximately 3,200 mg of caffeine. This is equivalent to about 20 to 28 cups of coffee, a potentially toxic dose of caffeine," the agency said.

“Regardless of whether the product contains a warning label, such products present a significant and unreasonable risk of illness or injury to the consumer,” the FDA added.

Too much caffeine can cause fatal heartbeat irregularities.

The FDA's action does not include energy drinks or energy products that contain caffeine, or supplements. "Moreover, this guidance does not affect other types of products that might also contain caffeine, such as prescription or over-the-counter drugs or conventional foods, like traditionally caffeinated beverages," it said.

But the bulk products can easily confuse people, who may accidentally overdose on them.

04/14 MBTA rail safety system off track

## SOURCE

<http://www.bostonglobe.com/metro/2018/04/14/who-driving-your-commuter-train-likely-someone-with-wreck-record/sLRyEIPMFvZqDoe6Je8YFI/story.html>

## GIST

Dean Walker's license has been suspended 39 times for everything from driving to endanger to refusing a breathalyzer test. He's been caught speeding 16 times and convicted of drunken driving twice.

To fellow motorists, he's a hazard.

To the Registry of Motor Vehicles, he's a chronic offender. But to Keolis, the MBTA's commuter rail operator, Walker is something else entirely — an engineer.

Despite his appalling driving history, Walker is entrusted with operating six-car trains, at speeds averaging 60 miles per hour, carrying hundreds of commuters to and from the city.

Robert Ronquillo III, son of the chief justice of the Boston Municipal Court, was also penalized multiple times for safety violations on the job.

And he has plenty of company among his peers. About 110 commuter rail engineers, more than half of them, have driving records that experts described as poor considering the sensitive line of work they're in — at least three infractions such as speeding, causing accidents, and failing to stop.

Nearly 50 engineers have had their driver's licenses suspended — 44 of them more than once, according to Registry of Motor Vehicle records reviewed by the Globe.

The engineers' supervisors don't set much of an example, either. Manager of engineer training Shawn Monahan, who teaches aspiring engineers what they need to know before they can operate a train, has received 11 speeding tickets and caused two accidents.

Keolis's head engineer, Mark Neverett, has 13 speeding tickets, eight accidents, and an operating under the influence on his driving record, though he's had no recorded offenses since 2010.

The records obtained by the Globe, which span decades, raise serious concerns about safety on the commuter rail, experts say. Train operators aren't required to have a driver's license, and driving a 144-ton locomotive on fixed tracks is a very different discipline than driving a car. But a history of recklessness on the roads makes it much more likely someone will be reckless on the rails, they say.

"Someone who is known to have engaged in multiple incidents of risky and illegal behavior with an automobile should not be permitted to operate a train," said David Hughes, the former chief engineer and acting CEO of Amtrak. "Locomotive engineers aren't allowed mistakes on the job."

Many of the engineers with poor driving records have, records show, also faced discipline on the railway — ranging from counseling to suspension — for such on-the-job infractions as running a stop signal, failing drug tests, or causing derailments.

But perhaps the harshest penalty was reserved for the Keolis executive who sounded the alarm about the number of engineers with dismal driving records.

Robert T. McCarthy, the vice president of safety, was dismissed after he warned the company about the potential risks in employing engineers with problematic personal driving histories, according to documents obtained by the Globe.

McCarthy left Keolis last fall, just a year and a half after the company heralded his arrival from the Southern California Regional Rail Authority, where he served as deputy chief operating officer.

Before leaving, McCarthy sent an audit to Keolis's general manager raising a host of safety concerns, including the engineers' driving records. He concluded: "If there were a catastrophic incident, Keolis would be scrutinized and would not fare well in a [federal] investigation."

Keolis, which has operated the commuter rail system for the MBTA since July 2014, said Friday that "nothing is more important" than safety.

Spokesman Tory Mazzola said the company has invested \$15 million into improving safety systems, including a new training simulator and safety technology for engineers. Mazzola noted that its engineer supervisors are "valuable, hard-working employees with excellent work records" and their personal driving records have "absolutely no bearing" on their job performance.

Keolis said it inherited most of its workforce from the Massachusetts Bay Commuter Railroad Company, which ran the system from 2003 to mid-2014, and Amtrak, which ran the system before then. Keolis promised in its bid for the contract to review the qualifications of its workforce. Mazzola said Keolis relied on the employee certification and background checks performed by the prior rail system operators.

Keolis and MBCR officials both have said that commuter rail management is hamstrung by federal rules that allow a railroad to look at an engineer's driving record only for the three-year period prior to certifying him or her as fit for the job. Also, the railroad cannot consider speeding violations, only drunken driving convictions and related license suspensions. And even enforcing that standard is hard; the Brotherhood of Locomotive Engineers and Trainmen union fights the company whenever it seeks to impose discipline on one of its members, they said.

Keolis officials have faced questions about the company's engineers since the Globe reported in February that engineer Roberto Ronquillo III had 10 license suspensions and multiple stops for drunken driving on his record. At the time, Keolis and MBCR officials suggested Ronquillo, the son of a Boston judge, was an anomaly whose driving record was somehow missed during the vetting process.

Newly obtained internal documents suggest otherwise. Commuter rail officials pulled his driving record in 2011 when he was training to be an engineer. MBCR required Ronquillo to undergo enhanced drug and alcohol testing as a condition of getting the new job.

But the broader Globe review found that Ronquillo's alarming driving record barely stands out among commuter rail engineers, who earn around \$100,000 a year.

Among them: Veteran engineer Richard Russell who chalked up 13 speeding tickets, got into three accidents, and had his license suspended 14 times.

And Alcino Fernandes, who ran up 16 speeding tickets, caused 11 accidents, and received four citations for passing a school bus, records show. He is not currently operating a train, according to Keolis officials, and is awaiting a disciplinary hearing. Officials would not provide details.

Fernandes, the only engineer who responded to a Globe request for comment, said that most of his violations were “well over 10 or 20 years ago.” However, records show he was caught speeding in 2010 and committed a “state highway violation” in 2015.

“All that stuff took place long before I started with the railroad,” said Fernandes, 51. “I was a young kid when all that ridiculous stuff happened.”

As a group, the system’s engineers racked up a staggering number of violations, including more than 200 license suspensions, according to the Massachusetts Registry of Motor Vehicles. Besides motor vehicle infractions, drivers can lose their license for failing to pay fees or fines.

Eighty-five engineers received more than two speeding tickets. Six have been declared habitual traffic offenders. And more than 85 percent of the engineers have at least one driving infraction.

Hughes, who led national rail operator Amtrak, said locomotive engineers, like other transportation professionals, should have pristine driving records.

“In the trucking industry, you can’t drive a truck if you don’t have a clean record,” said Hughes. “Same with taxi industry. To have 80 percent of your engineers with an operating infraction is appalling. . . . I would imagine you might find 10 percent, maybe.”

In the Massachusetts’ commuter rail system, the opposite is true — fewer than 10 percent had no driving citations and no incidents of discipline.

“Yes, those are by far, the worst engineer records I’ve ever seen in decades of railroading,” said another expert, who asked to remain anonymous because he works for another railroad and fears retaliation.

Inside Keolis, executives had been warned about the problems in their corps of engineers.

In the preliminary safety audit submitted to the Keolis general manager, David Scorey, in November, McCarthy, then the executive in charge of safety, pointed out that motor vehicle regulators had identified many of the company's engineers as "habitual offenders" because of repeated speeding violations on their personal driving records.

Even so, McCarthy wrote, the company has not decertified — that is, declared unfit for service — any engineers for speeding on the rails during the history of the Keolis contract.

"This is highly suspicious given the propensity of our employees to speed [on the job]," he wrote.

Excessive speed has been the cause of several fatal railroad accidents across the country, including a 2013 crash in the Bronx that killed four and injured 61 and a crash in Philadelphia in 2015 that killed eight and injured more than 200.

About 100,000 people ride Keolis's commuter rail system each day, completely in the dark about the driving history of the engineer behind the controls.

"I can't talk now, I'm too shocked," commuter Mary Connaughton said after hearing a description of some of the engineers' driving records.

"What's it going to take, a train wreck for Keolis and the T to get ahead of this and put public safety first?" asked Connaughton — a former Massachusetts Turnpike Authority board member — when she later called back.

While Keolis and MBCR have reported few major incidents, records show at least 80 engineers have committed serious infractions while on the job — safety violations that include failing alcohol or drug tests, running stop signals, and causing derailments, records show.

While the company insists that safety is its top priority, the Federal Railroad Administration and the MBTA itself have raised concerns about its compliance with federal safety rules and the terms of its contract with the T.

The FRA, which regulates railroads, has fined Keolis some \$350,000 for violations that include leaving trains unsecured, operating moving trains with a door or doors open, and failing to conduct all engineer performance testing required under federal law, records show.

Joe Pesaturo, spokesman for the Massachusetts Bay Transportation Authority, said the agency “steadfastly holds” the commuter rail contractor accountable for providing safe and reliable service.

“Because safety is of paramount importance, the MBTA closely monitors the contract under which Keolis manages a qualified workforce that is in full compliance with all Federal Railroad Administration regulations,” Pesaturo said in a statement. “The commuter rail operator has demonstrated its strong commitment to safety through significant investments in equipment, training, and personnel.”

Some suspect that Keolis may feel financial pressure to keep engineers on the job even when they have problems at work.

Under its operators agreement with the MBTA, the company is penalized when a train is late or canceled. If an engineer is removed from service, the on-time performance may suffer.

A longtime issue

Experts say the problems with the commuter rail and its workforce go way back — before Keolis took over the \$2.7 billion contract in 2014.

Upon taking over the rail operation, Keolis, a French company, had just a few months to decide whom to retain from its inherited workforce, officials from both companies said.

And once hired or retained, employees are rarely, if ever, terminated — regardless of their personal history or work record.

Experts say that if a railroad wanted to impose order and discipline, it could refuse to promote an employee with a poor driving record, or could subject such a driver to increased testing. In extreme cases, the railroad could fire the employee for conduct unbecoming an employee under a clause in the company’s contract with the MBTA.

Governor Charlie Baker has repeatedly expressed dissatisfaction with Keolis’s per

<b>HEADLINE</b>	<b>04/16 US envoy fears: chem. site tampered</b>
<b>SOURCE</b>	<a href="https://www.reuters.com/article/us-mideast-crisis-syria-chemicalweapons/russia-may-have-tampered-with-chemical-attack-site-u-s-envoy-says-idUSKBN1HN126?il=0">https://www.reuters.com/article/us-mideast-crisis-syria-chemicalweapons/russia-may-have-tampered-with-chemical-attack-site-u-s-envoy-says-idUSKBN1HN126?il=0</a>
<b>GIST</b>	<p>THE HAGUE (Reuters) - Russia may have tampered with the site of an alleged chemical weapons attack in Syria's Douma, the U.S. envoy to the global watchdog said on Monday, urging the body to condemn the continuing use of banned chemical weapons.</p> <p>The comments came during a closed-door meeting at the Organisation for the Prohibition of Chemical Weapons, convened after an April 7 attack in the town of Douma, outside the Syrian capital, in which dozens of people were allegedly killed with poison gas.</p> <p>"It is long overdue that this council condemns the Syrian government for its reign of chemical terror and demands international accountability for those responsible for these heinous acts," U.S. Ambassador Kenneth Ward said in comments obtained by Reuters.</p> <p>"It is our understanding the Russians may have visited the attack site. It is our concern that they may have tampered with it with the intent of thwarting the efforts of the OPCW Fact-Finding Mission to conduct an effective investigation."</p>

<b>HEADLINE</b>	<b>04/14 End of credit card receipt signatures</b>
<b>SOURCE</b>	<a href="https://www.nytimes.com/2018/04/14/business/credit-card-signature.html?action=click&amp;module=In%20Other%20News&amp;pgtype=Homepage&amp;action=click&amp;module=Latest&amp;pgtype=Homepage">https://www.nytimes.com/2018/04/14/business/credit-card-signature.html?action=click&amp;module=In%20Other%20News&amp;pgtype=Homepage&amp;action=click&amp;module=Latest&amp;pgtype=Homepage</a>
<b>GIST</b>	<p>The next time you sign a credit card receipt, savor it.</p> <p>While it may take time for the news to filter down to retailers, Visa, American Express, Discover and Mastercard have said that as of this month, they will no longer require customers to sign their names when paying with a credit card.</p> <p>The signature has had a good run. It's not dead, but it is dying.</p> <p>American culture has preferred credit to debit, and so signing has stuck around longer. But new credit cards have converted to chip cards that are harder to counterfeit.</p>

	<p>“Signatures are becoming more irrelevant,” said Harshita Rawat, an analyst at Bernstein Research. “The final nail in the coffin was the chip card.”</p> <p>If you want to pay with your phone, many use fingerprint scanners to authorize transactions, and Apple’s got facial recognition on its iPhone X while Samsung uses iris scanning on the Galaxy S8. Visa has also rolled out prototype rings, pins and even sunglasses that you can scan instead of using a card.</p> <p>Several of the largest retailers, including Walmart and Target, have moved to drop the signature requirement. Home Depot had already waived the requirement for purchases under \$50, and plans to do the same for larger purchasers, but hasn’t set a date yet. Stephanie Cunha, a spokeswoman for CVS, said “We are evaluating our options but have no specific changes to announce at this time.”</p>

<b>HEADLINE</b>	<b>04/15 US plans new sanctions on Russia</b>
<b>SOURCE</b>	<a href="https://www.nytimes.com/2018/04/15/us/politics/trump-russia-sanctions-syria.html?action=click&amp;module=Top%20Stories&amp;pgtype=Homepage">https://www.nytimes.com/2018/04/15/us/politics/trump-russia-sanctions-syria.html?action=click&amp;module=Top%20Stories&amp;pgtype=Homepage</a>
<b>GIST</b>	<p>WASHINGTON — The Trump administration plans to impose new sanctions against Russia on Monday to punish it for enabling the Syrian government’s use of chemical weapons in its civil war, the latest in a series of actions by both sides underscoring the deterioration in relations between Moscow and the West.</p> <p>The sanctions, coming shortly after American-led airstrikes against facilities linked to Syria’s chemical weapons, are meant to signal that the United States holds responsible not just the government of President Bashar al-Assad but also his patrons in Russia and Iran. President Trump has vowed that Syria’s allies will pay a “big price” for facilitating the suspected use of poison gas.</p> <p>But it remained unclear how far Mr. Trump would go in trying to shape events in Syria, which has been racked by civil war for seven years. President Emmanuel Macron of France, who along with Prime Minister Theresa May of Britain joined in the strike on Syrian targets, said on Sunday night that he had persuaded Mr. Trump to keep a small American ground force in Syria despite the president’s public declaration that he wanted to get out.</p> <p>“We convinced him it was necessary to stay,” Mr. Macron said in a televised interview with French journalists. “I assure you, we have convinced him that it is necessary to stay for the long term.”</p> <p>American officials, however, disputed that, saying that Mr. Macron misinterpreted the conversation. About 2,000 American troops are in Syria to fight the Islamic State, or ISIS, not to play a role in the civil war. In public comments before the chemical attack that prompted him to launch airstrikes, Mr. Trump said he wanted to pull them out right away. Advisers urged him to hold off, and he gave them five to six months to complete a withdrawal.</p> <p>“The U.S. mission has not changed — the president has been clear that he wants U.S. forces to come home as quickly as possible,” Sarah Huckabee Sanders, the White House press secretary, said in a statement Sunday night. “We are determined to completely crush ISIS and create the conditions that will prevent its return. In addition, we expect our regional allies and partners to take greater responsibility both militarily and financially for securing the region.”</p> <p>The new American sanctions were announced on Sunday by Nikki R. Haley, the ambassador to the United Nations and the administration’s leading public voice excoriating Russia in recent days. “They will go directly to any sort of companies that were dealing with equipment related to Assad and chemical weapons use,” she said on “Face the Nation” on CBS. “And so I think everyone is going to feel it at this point. I think everyone knows that we sent a strong message, and our hope is that they listen to it.”</p>

<b>HEADLINE</b>	<b>04/15 Oregon gov. declares drought emergency</b>
<b>SOURCE</b>	<a href="http://q13fox.com/2018/04/15/oregon-governor-declares-drought-emergency-in-second-county/">http://q13fox.com/2018/04/15/oregon-governor-declares-drought-emergency-in-second-county/</a>
<b>GIST</b>	<p>SALEM, Ore. — Oregon Gov. Kate Brown has declared a drought emergency in the second county in a month.</p> <p>Brown on Friday announced a drought emergency in Grant County due to low snowpack, lack of precipitation, low streamflows and warming temperatures.</p> <p>The declaration comes after Brown announced a drought emergency in Klamath County on March 13.</p> <p>They're the first state drought declarations since 2015.</p> <p>The governor's drought declarations allow increased flexibility in how water is managed to ensure that limited supplies are used as efficiently as possible.</p> <p>The drought declarations also position farmers and ranchers in the county for federal aid as Oregon braces for the upcoming wildfire season.</p>
<a href="#">Return to Top</a>	

<b>HEADLINE</b>	<b>04/15 Summer fire rules in effect</b>
<b>SOURCE</b>	<a href="http://q13fox.com/2018/04/15/summer-fire-rules-kick-off-today-in-washington/">http://q13fox.com/2018/04/15/summer-fire-rules-kick-off-today-in-washington/</a>
<b>GIST</b>	<p>It may not feel warm outside yet, but Washington's "summer fire rules" are now in effect.</p> <p>"Whether fire season is delayed or not, Washington's forests always face the threat of wildfire," said Commissioner of Public Lands Hilary Franz. "We're preparing now to be ready for fire season before the weather heats up, and I encourage all our neighbors to do the same."</p> <p>The state's summer fire rules are in effect until October 15. The rules apply to the 13 million acres of private and state forestlands protected by the Washington Department of Natural Resources.</p> <p>These regulations affect loggers, firewood cutters, land clearers, road builders, heavy equipment operators, off-road motorcyclists, and others. During fire season, people using motorized equipment in the woods must have approved spark arresters and follow fire safety precautions. In addition, those working in the woods must have fire prevention and extinguishing equipment in good working order at the job site and workers trained in proper use.</p>

	<p>The rules are intended to prevent forest fires and to extinguish small fires before they spread to the forested lands. These rules restrict cigarette smoking in forested areas to roads, gravel pits, or other clearings and prohibit lighting fireworks on forestland.</p> <p>According to experts, Washington's forests always face the threat of wildfire. So even though we have above average snowpack, the risk of wildfire can change quickly during the springtime.</p> <p>"As soon as the weather conditions warm up and the humidity begins to drop, the ground conditions become much more of a tinderbox very very quickly and certainly as the summer goes on," Kyle Ohashi of Puget Sound Regional Fire told Q13 News.</p> <p>Property owners can reduce fire risk to their homes and lands by keeping dead vegetation off roofs and away from buildings. The Firewise program explains how to use these techniques and offers incentives to communities who follow Firewise principles.</p> <p>Last year, more than 32,800 acres of DNR-protected lands were consumed by 815 wildfires. Out of 815 wildfires, 90 percent were human-caused.</p>
<p><a href="#">Return to Top</a></p>	

<b>HEADLINE</b>	<b>04/15 Koreas to finalize working-level talks</b>
<b>SOURCE</b>	<a href="https://www.upi.com/Top_News/World-News/2018/04/15/South-and-North-Korea-to-finalize-working-level-talks-on-inter-Korean-summit/9871523843348/?utm_source=fp&amp;utm_campaign=ls&amp;utm_medium=2">https://www.upi.com/Top_News/World-News/2018/04/15/South-and-North-Korea-to-finalize-working-level-talks-on-inter-Korean-summit/9871523843348/?utm_source=fp&amp;utm_campaign=ls&amp;utm_medium=2</a>
<b>GIST</b>	<p>SEOUL, April 15 (UPI) -- With less than a fortnight until the South and North Korea hold their first summit in more than a decade, officials from both sides are expected to wrap up the final details this week.</p> <p>Yonhap reported Sunday that an additional working-level meeting will be held Wednesday at the Tongilgak, a North Korean building at the Panmunjom truce village on the inter-Korean border.</p> <p>After the protocol, security, media coverage and other technical details of the summit are finalized during the talks, a high-level meeting is expected to be held between South Korea's Unification Minister Cho Myoung-gyon and Ri Son-gwon, chairman of the North's agency for inter-Korean affairs, for Wednesday.</p> <p>The presidential official said the high-level meeting will likely be held within the week.</p> <p>Meanwhile, Seoul has announced, "Peace, a New Beginning," will be the slogan for the inter-Korean talks.</p> <p>Presidential spokesman Kim Eui-kyeom told reporters Sunday that the slogan indicates the start of world peace through the first inter-Korean meeting in eleven years, followed by the first-ever summit between the United States and North Korea.</p>

<b>HEADLINE</b>	<b>04/16 Russia reinforcements head to Syria</b>
<b>SOURCE</b>	<a href="http://www.dailymail.co.uk/news/article-5618609/Russian-ships-laden-tanks-seen-Bosphorus-en-route-Tartus-Syria-led-air-strikes.html">http://www.dailymail.co.uk/news/article-5618609/Russian-ships-laden-tanks-seen-Bosphorus-en-route-Tartus-Syria-led-air-strikes.html</a>
<b>GIST</b>	<p>Two Russian warships laden with military vehicles have been spotted en route to Syria after Friday's US-led airstrikes obliterated three suspected chemical weapons sites.</p> <p>An Alligator-landing ship was pictured cruising down The Bosphorus on Sunday as the world awaits Vladimir Putin's response to this week's co-ordinated military action against Syria.</p>

The vessel was spotted on its way to the Russian naval base at Tartus on the north Syrian coast.

On its fourth deployment of Russian military equipment to the war-torn country the ship was seen laden with tanks, trucks, ambulances and an IED radar.

A yellow RoRo Alexandr Tkachenko was also pictured heading for Tartus carrying high-speed patrol boats, a temporary bridge structure and several trucks. The images were posted on social media by Bosphorus-based naval observer Yörük Işık.

They come in wake of Friday's US-led campaign against Bashar al-Assad's regime and a chemical weapons attack that brutally murdered 75 civilians.

The blue Project 117 LST Orsk 148 ship was carrying Soviet BTR-80 tanks, Ramaz trucks and a Pelena-1 bomb radar, used to detect IEDs.

A second yellow cargo vessel was equipped with a BMK-T boat used for building temporary bridges and an array of other military hardware.

The Russian warships approaching Syria come after the United States outlined new economic sanctions in response to Moscow's continued support of Assad's regime in Syria.

Nikki Haley, US Ambassador to the United Nations, said measures to be imposed on Monday will send a message to Russia after it blocked six UN attempts to investigate its use of chemical weapons.

Meanwhile French President Emmanuel Macron today insisted the allied forces had not 'declared war' on Syria.

He told a French TV station: 'We have not declared war on the regime of Bashar al-Assad.' During the two-hour interview he also claimed he had 'convinced' Trump to maintain a military presence in Syria after the US leader threatened to pull out of the country entirely.

It emerged that Trump called Mr Macron twice before he shared his intention to strike Syria in a Twitter post. But he failed to call UK Prime Minister Theresa May in the early stages of the operation, giving the French leader the opportunity to claim France is America's leading ally in Europe.

<b>HEADLINE</b>	<b>04/16 Oklahoma wildfires force evacuations</b>
<b>SOURCE</b>	<a href="https://www.cnn.com/2018/04/13/us/oklahoma-wildfires/index.html">https://www.cnn.com/2018/04/13/us/oklahoma-wildfires/index.html</a>
<b>GIST</b>	<p>(CNN)Wildfires have killed one person and forced the evacuation of four towns in Oklahoma, authorities said.</p> <p>The state chief medical examiner's office reported a 61-year-old man died Thursday in Roger Mills County as a result of injuries sustained in a fire that began southeast of Leedey, the Oklahoma Department of Emergency Management said.</p> <p>A 54-year-old hunter reported missing in the large Dewey County fire was found alive, Oklahoma Forestry Services Fire Chief Scott Huff said. The man was flown to an area hospital Friday, but his condition was unknown.</p> <p>Officials said the man was one of three hunters who got caught in the wildfire. The two others were found Thursday.</p> <p>About 1,000 people evacuated Vici, more than 100 miles northwest of Oklahoma City, Dewey County Sheriff Clay Sander said.</p>

Evacuations were also ordered in the Dewey County towns of Seiling, Taloga and Putnam, said Michelle Finch-Walker, spokeswoman for Oklahoma Forestry Services.

The Rhea Fire in Dewey County has burned an estimated 138,000 acres and is 0% contained, she said.

Around midday Friday, the National Weather Service issued an advisory saying that fire was approaching the Iochem iodine plant east of Vici. Sander told CNN about 30 residents were asked to evacuate immediately as the wildfire closed in on the chemical plant.

Some 450 people were evacuated in adjacent Woodward County. The estimated size of that fire was changed from 115,000 to 59,000 acres because of more accurate mapping, Finch-Walker said. There are two other major fires in the state.

The blazes have consumed 200,000 acres, Gov. Mary Fallin said in announcing a state of emergency for 52 counties because of wildfire and drought conditions.

"I'm asking all Oklahomans to be vigilant and careful, and to do their part to prevent fires," Fallin said in a statement. "Anything that can be done to minimize fires will help to keep both our firefighters and the public safe."

'The fire is rapidly spreading'

State officials said dry conditions and strong winds have combined to create potential fire dangers.

"These fires are going to continue to be quite explosive under these conditions, with that kind of wind pushing it, and all the dry fuels that are available," Finch-Walker told CNN. "The fire is rapidly spreading and growing and we will continue to see extreme fire behavior until we can get through this event."

"We've got historic conditions as far as fire. We haven't seen these kinds of conditions in a decade," said Matt Lehenbauer, emergency management director for Woodward County.

"We've had half an inch of rain in six months," Lehenbauer said.

<b>HEADLINE</b>	<b>04/16 US, Russia enter new era of animosity</b>
<b>SOURCE</b>	<a href="https://www.bloomberg.com/news/articles/2018-04-16/syria-strikes-lock-u-s-and-russia-into-a-new-era-of-animosity">https://www.bloomberg.com/news/articles/2018-04-16/syria-strikes-lock-u-s-and-russia-into-a-new-era-of-animosity</a>
<b>GIST</b>	<p>A few weeks ago, Donald Trump invited Vladimir Putin to meet -- maybe even at the White House. After U.S.-led missile strikes in Syria, the two nations' officials can't get into the same room without insulting each other.</p> <p>Speaking at an emergency session of the United Nations Security Council Saturday, hours after the U.S., France and the U.K. launched missiles intended to take out Syria's chemical weapons capability, American Ambassador Nikki Haley called on Russia -- the main backer of the Syrian regime -- "to take a hard look at the company it keeps." Her Russian counterpart Vassily Nebenzia retorted that the U.S. and its allies were engaged in the "diplomacy of myth-making."</p> <p>The strikes against the regime of Russia's ally Bashar al-Assad put an exclamation point on how swiftly ties between the former Cold War foes have deteriorated in recent weeks, with President Trump even overcoming his past unwillingness to criticize President Putin by name.</p> <p>Now, the U.S.-Russia relationship, already under severe strain over issues from Russian meddling in the 2016 American presidential campaign to its role in Syria and Ukraine, may be irretrievably broken for the</p>

foreseeable future. There may be too much bad blood, too much suspicion and too much anger on both sides to turn the animosity around.

“I don’t see things getting better,” said Boris Zilberman, deputy director of congressional relations at the Foundation for Defense of Democracies and a Russia expert. “We’re at a very low point and clearly the administration’s position on Russia has hardened.”

The result has been an unprecedented wave of retaliations and tit-for-tat actions. After the U.K. blamed Russia for the poisoning of a former spy in Britain, more than 150 Russian diplomats were expelled by the U.K. and allies including the U.S. The Trump administration followed with new sanctions on Russian oligarchs including billionaire aluminum magnate Oleg Deripaska. His company lost half its value in a day after the sanctions were announced.

Haley raised the prospect of still more sanctions on Russia, saying Sunday on CBS’s “Face the Nation” that a fresh round of penalties would “go directly to any sorts of companies that were dealing with equipment” related to Assad and his chemical weapons.

While for now no significant new U.S. sanctions seem likely --limiting Russian market losses after last week’s sharp declines -- in Moscow, lawmakers are starting Monday to discuss a draft law with counter-measures against the U.S..

“What kind of cooperation can there be? Where?” asked Fyodor Lukyanov, head of Russia’s Council on Foreign and Defense Policy, who advises the Kremlin. Russia gets “new sanctions and threats every week,” he said. “Americans believe that you can humiliate and put pressure everywhere and at the same time offer cooperation where they need it. This does not happen.”

The two countries routinely accuse each other of fabricating events, as they did during the Cold War.

The U.S. says Russia is blocking investigators from the scene of the chemical attack that prompted the latest airstrikes. Russia has argued both that the attack in the Syrian city of Douma never happened or that it was orchestrated by the U.S. and its allies to provoke a military response.

“Americans need to understand that the wars of the future will look more like this: Russia is investing significant resources to create propaganda and disinformation,” said Senator Ben Sasse, a Nebraska Republican, after Russia claimed that almost all the missiles fired into Syria were shot down -- an assertion the U.S. denied. “Our enemies will work to create confusion and distrust among Americans here at home.”

What limited cooperation there was between the two countries has ground to a halt. A November agreement between the two sides to press all parties in Syria toward negotiations known as the Geneva process has stalled and they have abandoned plans for more “de-escalation zones” to ease the violence. Instead, Russia is attempting to create such zones with Turkey and Iran.

From the White House, there is still hope that Russia will change its posture, and Trump’s informal invitation for an eventual meeting with Putin hasn’t been rescinded.

“After his last call with President Putin on March 20, the president confirmed that the two had discussed a bilateral meeting at a number of potential venues, including the White House,” Robert Palladino, a spokesman for the National Security Council, said in a statement Sunday night. “The desire for a meeting still stands, as the president believes a better relationship with Russia is in our mutual interest. That said, the president has been consistent and tough on Russia.”

**HEADLINE** 04/15 Russia: chaos if West strikes Syria again

**SOURCE** <https://www.newsmax.com/newsfront/putin-syria-global-chaos/2018/04/15/id/854589/>

## GIST

Russian President Vladimir Putin warned on Sunday that further Western attacks on Syria would bring chaos to world affairs, while signs emerged that Moscow and Washington want to pull back from the worst crisis in their relations for years.

Putin made his remarks in a telephone conversation with Iranian counterpart Hassan Rouhani after the United States, France and Britain launched missile strikes on Syria on Saturday over a suspected poison gas attack.

A Kremlin statement said Putin and Rouhani agreed that the Western strikes had damaged the chances of achieving a political resolution in the multi-sided, seven-year conflict that has killed at least half a million people.

"Vladimir Putin, in particular, stressed that if such actions committed in violation of the U.N. Charter continue, then it will inevitably lead to chaos in international relations," a Kremlin statement said.

The attacks struck at the heart of Syria's chemical weapons programme, Washington said, in retaliation for a suspected poison gas attack a week ago. All three participants insisted the strikes were not aimed at toppling President Bashar al-Assad or intervening in the conflict.

The bombings, hailed by U.S. President Donald Trump as a success but denounced by Damascus and its allies as an act of aggression, marked the biggest intervention by Western countries against Assad and ally Russia, whose foreign minister Sergei Lavrov called them "unacceptable and lawless".

Putin's comments were published shortly after Russian Deputy Foreign Minister Sergei Ryabkov struck a more conciliatory note by saying Moscow would make every effort to improve political relations with the West.

When asked whether Russia was prepared to work with the proposals of Western countries at the United Nations, Ryabkov told TASS news agency: "Now the political situation is extremely tense, the atmosphere is extremely electrified, so I will not make any predictions.

"We will work calmly, methodically and professionally, using all opportunities to remove the situation from its current extremely dangerous political peak."

Russian Foreign Ministry official Vladimir Ermakov said Washington would want to maintain a dialogue with Moscow about strategic stability after the raids, Russian media reported.

In an indication that the West, too, would prefer to lower tensions, the United States and Britain both reiterated that their military action on Saturday was not aimed at Assad, Putin's ally, only at his use of chemical weapons.

Speaking to the BBC, Britain's Foreign Secretary (Minister) Boris Johnson said that Western powers had no plans for further missile strikes, though they would assess their options if Damascus used chemical weapons again.

"This is not about regime change ... This is not about trying to turn the tide of the conflict in Syria," he told the BBC, adding that Russia was the only country able to pressure Assad to negotiate an end to the conflict.

Asked about U.S.-Russia relations, U.S. ambassador to the United Nations Nikki Haley said ties were "very strained" but that the United States still hoped for a better relationship.

Haley said that the United States would not pull its troops out of Syria until its goals were accomplished. Speaking on Fox News Sunday, Haley listed three aims for the United States: ensuring that chemical weapons are not used in any way that poses a risk to U.S. interests, that Islamic State is defeated and that there is a good vantage point to watch what Iran is doing.

	<p>Trump has made clear he wants to withdraw the roughly 2,000 U.S. troops involved in the anti-Islamic State campaign in Syria. But he appeared to contradict that message when he said on Saturday that Western allies were prepared to "sustain" the military response if Assad does not stop using prohibited chemical weapons.</p>

<b>HEADLINE</b>	<b>04/15 Opposition to sanctuary spreads in Calif.</b>
<b>SOURCE</b>	<a href="https://www.newsmax.com/newsfront/us-california-sanctuary-backlash/2018/04/15/id/854625/">https://www.newsmax.com/newsfront/us-california-sanctuary-backlash/2018/04/15/id/854625/</a>
<b>GIST</b>	<p>More local governments in California are resisting the state's efforts to resist the Trump administration's immigration crackdown, and political experts see politics at play as Republicans try to fire up voters in a state where the GOP has grown weak.</p> <p>Since the Jeff Sessions-led Department of Justice sued California last month over its so-called "sanctuary state" law limiting police collaboration with immigration agents, at least a dozen local governments have voted to either join or support the lawsuit or for resolutions opposing the state's position. Those include the Board of Supervisors in Orange County, which has more than three million people.</p> <p>More action is coming this week, with leaders in the Orange County city of Los Alamitos scheduled to vote Monday on a proposal for a local law to exempt the community of 12,000 from the state law. On Tuesday, the San Diego County Board of Supervisors is meeting to consider joining the Trump administration lawsuit.</p> <p>Immigration has been a hot topic across the country since President Donald Trump campaigned in 2016 on promises of tougher enforcement and a wall on the U.S.-Mexico border. It has been a lightning rod issue in California far longer.</p> <p>The state passed a measure backed by Republican Gov. Pete Wilson in the 1990s to deny public healthcare and education to immigrants in the country illegally. It was later overturned but left a lingering resentment among the state's growing Hispanic population.</p> <p>In recent years, California Republicans have taken a less strident approach to immigration in a state where one in four people are foreign-born. But the Trump administration lawsuit has energized many in a party that has been rendered nearly irrelevant at the state level, where Democrats control every key office.</p> <p>"When the attorney general of the United States decides to take a firm position against it, I think that gave a signal to a lot of us that, 'Hey, California is on the wrong side of this thing,'" said Fred Whitaker, chairman of the Republican Party in Orange County. He also is a councilman in the city of Orange who proposed a local resolution on the issue that passed last week.</p> <p>Raphael Sonenshein, executive director of the Pat Brown Institute for Public Affairs at California State University, Los Angeles, said it's not surprising Republicans are galvanizing over immigration.</p> <p>"Politics is very much about emotions, especially in midterms," he said. "I think it was only a matter of time when people went back to the issue that actually hits the nerve in the Republican base these days more than any other."</p> <p>Under Democratic leadership, California has enacted a series of laws in recent years aimed at helping immigrants, including issuing driver's licenses regardless of legal status and assisting with tuition at state universities. After Trump was elected, lawmakers passed the measure to limit police collaboration with federal immigration agents.</p> <p>Immigrant and civil rights advocates applauded the measure, known as SB54, as a way to encourage immigrants to report crime to police without fearing deportation. Critics said it would make it too hard for</p>

	<p>federal agents to find and deport ex-convicts who are a danger to communities.</p> <p>Most of the local governments siding with the Trump administration are in Orange County, an area once considered a GOP stronghold but that voted for Hillary Clinton in the 2016 presidential election. But it's starting to spread.</p> <p>Escondido in neighboring San Diego County has voted to support the federal lawsuit and last week the small city of Ripon in the state's Central Valley did the same.</p> <p>In many cases, meetings on the issue have drawn boisterous crowds. Anti-illegal immigration activists have traveled from city to city to attend, heightening tensions with those who want their communities to support immigrant-friendly policies or stay out of the fray.</p> <p>In response to the controversy, some local governments have taken the opposite approach. Leaders in Santa Ana, an Orange County city home to about 330,000 residents, voted to support California in the lawsuit.</p>

<b>HEADLINE</b>	<b>04/16 Syrians Damascus rally support military</b>
<b>SOURCE</b>	<a href="http://abcnews.go.com/International/wireStory/latest-large-rally-damascus-supporting-assads-army-54494618?">http://abcnews.go.com/International/wireStory/latest-large-rally-damascus-supporting-assads-army-54494618?</a>
<b>GIST</b>	<p>Hundreds of Syrians gathered on Monday in a landmark square in Syria's capital, Damascus, rallying in support of their armed forces, which they say succeeded in confronting the unprecedented joint airstrikes by the West over the weekend.</p> <p>State TV broadcast the rally live from the central Omayyad Square. Protesters waved Syrian flags at the demonstration, dubbed a "salute to the achievements of the Arab Syrian Army," set off fireworks and unleashed celebratory gunfire.</p> <p>Shouts of "Allah, Syria, and only Bashar," a reference to Syrian President Bashar Assad, rang out.</p> <p>The joint airstrikes by the United States, Britain and France bombed sites that the three countries said were linked to Syria's chemical weapons program. The airstrikes were triggered by an alleged chemical attack in the town of Douma, just outside of Damascus.</p> <p>Syrian activists said more than 40 people were killed, but Syria and Russia deny the attack. Russia accused Britain of staging the attack.</p> <p>Saturday's airstrikes came shortly after a fact-finding mission from the Organization of the Prohibition of Chemical Weapons arrived in Syria to investigate the attack. The mission is still expected to make it to Douma, where government security agencies and Russian military police have deployed after the town fell under government control, raising complaints from the Syrian opposition that evidence of chemical weapons' use might no longer be found.</p> <p>The OPCW is holding an emergency meeting Monday in the Hague to discuss the suspected chemical attack in Douma.</p> <p>The strikes have ratcheted up international tension, as the U.S. and Russia exchanged threats of retaliation. U.S. Ambassador to the United Nations Nikki Haley has indicated new economic sanctions will be announced Monday against Russia for enabling Assad's government to continue using chemical weapons.</p> <p>Russian President Vladimir Putin said the military strikes violated the U.N. Charter and that if they continue, "it will inevitably entail chaos in international relations," according to a Kremlin statement on Sunday.</p>

<b>HEADLINE</b>	<b>04/15 Protestors rally to shutdown Starbucks</b>
<b>SOURCE</b>	<a href="http://abcnews.go.com/US/protesters-rally-philadelphia-starbucks-black-men-handcuffed-arrested/story?">http://abcnews.go.com/US/protesters-rally-philadelphia-starbucks-black-men-handcuffed-arrested/story?</a>
<b>GIST</b>	<p>Protestors rallied Sunday at the downtown Philadelphia Starbucks where two black men were led out in handcuffs by police and accused of trespassing to decry the actions of the coffee company and the cops.</p> <p>Armed with bullhorns and signs, a small group of protestors gathered outside the Starbucks on Spruce Street and demanded action in the wake of Thursday's arrests. They directed their rage at Starbucks, the police department and the workers who called the cops in the first place.</p> <p>"We want the manager fired from this establishment for racially profiling black people," a man boomed from the bullhorn. "We want the police officers in the arrest fired as well."</p> <p>The protester with the bullhorn said the activists were "not going anywhere" and vowed, "We're going to show you what a shutdown means."</p> <p>The arrests of the men -- who have not been identified, but have retained an attorney -- was captured on video and tweeted by Melissa DePino, a 50-year-old mother of two who told ABC News she's vowed to not shop at Starbucks again.</p> <p>It's since been viewed more than 9 million times as of Sunday afternoon.</p> <p>"It was humiliating for those guys," Depino told ABC News. "They were completely minding their own business."</p> <p>Both men were later freed and the charges they were facing -- trespassing and disturbance -- were dropped Thursday night.</p> <p>This happened while paperwork was being drawn up. District Attorney Larry Krasner also refused to prosecute once Starbucks asked to not press charges, according to a video testimonial released by Philadelphia Police Commissioner Richard Ross Jr. on Saturday.</p> <p>Attempting to deflect blame away from his department, the commissioner assured the public that he has reviewed the facts and defended the cops, saying they "did absolutely nothing wrong."</p> <p>"I can tell you candidly these officers did a service they were called to do," he said.</p>

<b>HEADLINE</b>	<b>04/15 Spring blizzard pounds Midwest</b>
<b>SOURCE</b>	<a href="http://www.foxnews.com/us/2018/04/15/spring-blizzard-pounds-midwest-flights-canceled-deaths-reported.html">http://www.foxnews.com/us/2018/04/15/spring-blizzard-pounds-midwest-flights-canceled-deaths-reported.html</a>
<b>GIST</b>	<p>Amid a spring blizzard in the Midwest that prompted hundreds of flights to be canceled Saturday, one runway has reopened at Minneapolis-St. Paul International Airport, officials said Sunday.</p> <p>A total of 469 flights had been canceled at the Minnesota airport alone, airport spokesman Patrick Hogan said. All of Saturday's incoming and outgoing flights were canceled because of heavy snowfall and low visibility.</p> <p>The snow was coming down too fast for plows to keep the runways clear or for crews to keep the planes deiced, airport officials said.</p>

Hogan said crews were working to get other runways open.

St. Paul also declared a snow emergency, as blizzard warnings continued into Sunday, the Minneapolis Star Tribune reported.

“This system will rank up there as one of the most significant winter storms in some time,” read a Weather Service report early Saturday. It declared the storm “historic,” shortly after, the Star Tribune reported.

“This is certainly one of the more powerful [storms] in recent memory,” Jacob Beitlich, a Weather Service meteorologist, said, according to the paper. “Any time you close a Twin Cities airport, it’s gotta be usually a pretty bad snowstorm.”

Blizzard conditions have closed the airport for two days in Sioux Falls, South Dakota’s largest city.

The snowfall, part of a storm system stretching from the Gulf Coast to the Great Lakes, brought snow, tornadoes, rain and hail.

At least three weather-related deaths occurred in Wisconsin, Nebraska and Louisiana.

By Saturday night, Minneapolis was buried under more than 13 inches of snow.

It marked the first time a blizzard has descended on the metro area of the Twin Cities since 2005, the Star Tribune said, citing the National Weather Service.

Hundreds of crashes and spinouts were reported across the state, according to the Star Tribune. One fatality occurred Saturday when a vehicle struck a pedestrian in Medina, but it was unclear whether it was weather-related.

The weather is expected to persist through Sunday in Minnesota, Wisconsin and Michigan before moving into New York state and New England.

<b>HEADLINE</b>	<b>04/15 Jefferson Co. to offer CERT training</b>
-----------------	---

SOURCE	<a href="https://www.peninsuladailynews.com/news/jefferson-county-to-offer-community-emergency-response-team-training/">https://www.peninsuladailynews.com/news/jefferson-county-to-offer-community-emergency-response-team-training/</a>
GIST	<p>PORT TOWNSEND — Jefferson County is about to start a Community Emergency Response Team training program.</p> <p>Community Emergency Response Team (CERT) training has been provided in neighboring Clallam County but not in Jefferson County, until now.</p> <p>The Jefferson County Department of Emergency Management, all county fire districts and the Neighborhood Preparedness (NPREP) action group through Local 20/20 are collaborating on the program, said Lynn Sterbenz, director of Jefferson County Department of Emergency Management.</p> <p>The CERT program educates volunteers about disaster preparedness for possible hazards and trains them in such basic disaster response skills as fire safety, light search and rescue, team organization and disaster medical operations.</p> <p>A program manager course will be offered May 21-22, while a three-day train-the-trainer course is planned May 23-25. Both are offered free, with training materials provided, but prerequisites and pre-registration are required.</p> <p>Interested participants must complete and return a registration form by May 16. Registration will be on a first-come, first-served basis. Class size is limited to 30 students with minimum being 15.</p> <p>Qualified volunteers are sought for both courses, Sterbenz said.</p> <p>The first step for the Jefferson County program is to build a cadre of volunteer CERT instructors, Sterbenz said.</p> <p>The county now has seven qualified CERT instructors, as opposed to more than 25 in Clallam County.</p> <p>“We know there are highly qualified retired people in Jefferson County, some of whom are likely CERT trained already who might be interested in joining our instructor pool,” Sterbenz said.</p> <p>Program managers will assist in the ongoing logistical aspects of coordinating the CERT program. The course will prepare participants to work with the Department of Emergency Management, fire districts and NPREP.</p> <p>The prerequisites for both courses are the same: Participants must have completed the CERT basic training course (any location is acceptable) or completed the online course IS-317: Introduction to CERT, which can be found at <a href="https://training.fema.gov/is/courseoverview.aspx?code=IS-317">https://training.fema.gov/is/courseoverview.aspx?code=IS-317</a>.</p> <p>It also is necessary to have a referral from a CERT-sponsoring agency, such as the Department of Emergency Management, city or county government, fire districts, schools, hospitals, or a community-based organization such as NPREP.</p> <p>The registration form is available on the State of Washington, Emergency Management Division’s Training and Exercise calendar. Visit <a href="https://mil.wa.gov/training-and-exercise">https://mil.wa.gov/training-and-exercise</a> and click on the In-State Training Calendar.</p> <p>CERT offers a consistent, nationwide approach to volunteer training and organization that professional responders can rely on during disaster situations, which allows them to focus on more complex tasks, Sterbenz said.</p> <p>“Through CERT, the capabilities to prepare for, respond to and recover from disasters is built and enhanced,” she said in a news release.</p>

	<p>The CERT program was designed as a grassroots initiative and is structured so that the local and state program managers have the flexibility to form their programs in the way that best suits their communities, Sterbenz said.</p> <p>There are more than 2,700 local CERT programs nationwide, with more than 600,000 individuals trained since CERT became a national program.</p>
<a href="#">Return to Top</a>	

<b>HEADLINE</b>	<b>04/15 Britain: no new attacks planned for now</b>
<b>SOURCE</b>	<a href="https://www.usnews.com/news/world/articles/2018-04-15/no-new-attacks-planned-against-syria-for-now-says-britain">https://www.usnews.com/news/world/articles/2018-04-15/no-new-attacks-planned-against-syria-for-now-says-britain</a>
<b>GIST</b>	<p>LONDON (Reuters) - There are no plans as yet to repeat missile strikes on Syria, but Britain will consider further action if President Bashar al-Assad again uses chemical weapons against his people, foreign minister Boris Johnson said on Sunday.</p> <p>In a show of support for Prime Minister Theresa May's decision to join the United States and France in attacking chemical weapons facilities in Syria on Saturday, her one-time political rival Johnson said it was the right thing to do.</p> <p>But the prime minister may not find such backing when she faces parliament on Monday, where some lawmakers are angry that May took military action without their approval - a process that has increasingly become a tradition in Britain.</p> <p>Speaking to the BBC, Johnson said what he described as the successful strikes on three sites in Syria were a message from the world that enough was enough, but acknowledged he could not say whether Assad still had chemical weapons.</p> <p>"There is no proposal on the table at the moment for further attacks because so far, thank heavens, the Assad regime have not been so foolish as to launch another chemical weapons attack," he told the Andrew Marr show.</p> <p>"If and when such a thing were to happen then clearly, with allies, we would study what the options were."</p>

<b>HEADLINE</b>	<b>04/14 Best age to claim Social Security?</b>
<b>SOURCE</b>	<a href="https://www.usatoday.com/story/money/personalfinance/retirement/2018/04/14/9-different-ages-for-claiming-social-security-and-what-they-mean-to-you/33696453/">https://www.usatoday.com/story/money/personalfinance/retirement/2018/04/14/9-different-ages-for-claiming-social-security-and-what-they-mean-to-you/33696453/</a>
<b>GIST</b>	<p>Social Security serves as a key source of income for millions of retired seniors, and as an eligible worker, you get an eight-year window to start taking benefits. Here are the various ages at which you might claim Social Security, and their impact on your benefits.</p> <p><b>Age 62</b> Age 62 is the earliest point at which you can file for Social Security, and it's also the most popular age for seniors to claim benefits. The advantage of filing at 62 is that you get your money sooner. The downside, however, is that you'll face the greatest reduction in benefits by going this route.</p> <p>If you're entitled to a full monthly benefit of \$1,500 at age 67, for example, then filing at 62 will knock each payment you collect down to \$1,050. That said, if you're unemployed come 62 or need the money for another reason, you're better off taking benefits than resorting to credit card debt.</p> <p><b>Age 63</b> Filing for Social Security at 63 still means taking benefits early and having them significantly reduced.</p>

Still, if you're desperate for cash, it often pays to take that hit, which won't be quite as bad as it would if you were to file at 62. Using our example above, a \$1,500 benefit at age 67 would be whittled down to \$1,125 at 63 -- not ideal, but better than collecting just \$1,050.

#### **Age 64**

Claiming Social Security at age 64 will also result in a sizable reduction in your full monthly benefit. But it won't be as drastic as filing at an earlier age. In the case of a \$1,500 benefit at 67, you'd only lose about 20% by filing at 64, thereby resulting in a \$1,200 monthly payment.

#### **Age 65**

Once you turn 65, you're eligible for coverage under Medicare. As such, some people get confused and assume that 65 is the age at which they're able to collect their Social Security benefits in full. Not so. Still, if you retire at 65 once Medicare kicks in and decide to file for benefits simultaneously, you won't face such an extreme reduction. Following the above example, a \$1,500 monthly benefit at 67 would only be reduced to \$1,300 at 65.

#### **Age 66**

Age 66 is a significant one from a Social Security standpoint because it's when workers born between 1943 and 1954 reach full retirement age and are thereby eligible to collect their monthly benefits without a reduction. Your full retirement age is a function of your year of birth, as follows:

<b>YEAR OF BIRTH</b>	<b>FULL RETIREMENT AGE</b>
1943-1954	66
1955	66 and 2 months
1956	66 and 4 months
1957	66 and 6 months
1958	66 and 8 months
1959	66 and 10 months
1960	67

*Data source: Social Security Administration.*

Therefore, if you were born after 1954 but before 1960, your full retirement age is 66 and a certain number of months. If you were born in 1960 or later and have a full retirement age of 67, filing for Social Security at 66 will reduce your benefits by about 6.67%. That means a full monthly benefit of \$1,500 would go down to just \$1,400 if you were to take them a year earlier.

#### **Age 67**

If you were born in 1960 or later, this is perhaps the age you've been waiting for, since it's when you get to take your monthly benefits in full. In our example, age 67 is when you'd get that \$1,500 we keep talking about. That said, you don't have to file for Social Security at full retirement age. You can hold off and grow your benefits for a higher monthly payout.

#### **Age 68**

Though 68 is hardly a common age for taking Social Security, it's a strategic one nonetheless. That's because for each year you delay your benefits past full retirement age up until age 70, you get an 8% boost in payments, which, in our ongoing example, would take a full monthly benefit of \$1,500 at 67 up to \$1,620 at 68. That increase then remains in effect for the rest of your life. Of course, not everyone wants or can afford to hold off on benefits all the way until 70, but waiting until 68 is a decent compromise --

you get a modest boost without having to wait too long.

### Age 69

Age 69 is a good time to take your benefits if you don't need them sooner. Doing so will boost our aforementioned \$1,500 benefit to \$1,740, thus guaranteeing a higher payout for as long as you collect Social Security.

### Age 70

The credits you accrue for delaying benefits past full retirement age stop accumulating once you reach 70. Therefore, it's considered the latest age to file for Social Security. Granted, you don't have to sign up for benefits at that time, but there's really no financial incentive not to. If you're dealing with a full retirement age of 67, filing at 70 means boosting your benefits by 24%, which would turn a \$1,500 monthly payment into \$1,860 -- for life.

Which of the above ages is the right one for you to take benefits? It depends on a host of circumstances, from your savings level to your employment status to the state of your health. The key is to understand the pros and cons of filing at various ages so you land on the one that works best for you.

<b>HEADLINE</b>	<b>04/14 France: Syria used chemicals in attack</b>
<b>SOURCE</b>	<a href="https://www.upi.com/Top_News/World-News/2018/04/14/France-issues-report-with-evidence-Assad-used-chemicals-in-attack/8611523742681/?utm_source=fp&amp;utm_campaign=ls&amp;utm_medium=1">https://www.upi.com/Top_News/World-News/2018/04/14/France-issues-report-with-evidence-Assad-used-chemicals-in-attack/8611523742681/?utm_source=fp&amp;utm_campaign=ls&amp;utm_medium=1</a>
<b>GIST</b>	<p>April 14 (UPI) -- In the aftermath of the early morning attacks on Syria, France declassified a report with details they say prove that a chemical attack in Syria last week was carried out by the regime of President Bashar Assad.</p> <p>The seven-page report, released by the Foreign Ministry on Saturday, said chemicals used in attacks on the Damascus suburb of Douma April 7 left victims with skin and cornea burns, suffocation and other breathing difficulties and extreme salivation and secretions from the mouth and nose, all markers</p>

	<p>consistent with the effects of chlorine gas.</p> <p>The report also states other strikes using chemical weapons have been carried out by the Syrian government since April 4, 2017, when a chemical attack in Syria's northern Idlib province left more than 80 civilians dead.</p> <p>French President Emmanuel Macron had been under pressure to back his claim that France has "proof" of Assad's role in the chemical attack in Douma.</p> <p>France joined the United States and Great Britain early Saturday in firing 105 missiles at three sites in a "proportional" attack, destroying "fundamental components" of Syria's chemical weapons infrastructure including a research center in greater Damascus, a chemical weapons storage facility and another storage facility and command center, both in Homs.</p> <p>France's conclusions were supported U.S. officials who determined that chlorine and sarin, a highly toxic nerve agent, were used on the civilians in the April 7 attack.</p>

<b>HEADLINE</b>	<b>04/15 Gun rights rallies at state capitols</b>
<b>SOURCE</b>	<a href="http://www.foxnews.com/politics/2018/04/15/gun-rights-supporters-hold-rallies-at-state-capitols-across-us.html">http://www.foxnews.com/politics/2018/04/15/gun-rights-supporters-hold-rallies-at-state-capitols-across-us.html</a>

<p><b>GIST</b></p>	<p>Gun rights advocates rallied at state capitols across the country on Saturday to make their voices heard amid recent efforts to impose stricter gun-control laws that they fear undermine their Second Amendment rights.</p> <p>Peaceful protesters numbering in the hundreds gathered outside statehouses from Maine to Wyoming to hear speakers warn that any restrictions on gun ownership or use could eventually lead to bans for law-abiding gun owners.</p> <p>“Gun owners have been portrayed in a negative way and it is our hope that this peaceable rally will show that we are safe, law-abiding individuals that happen to take our constitutional rights very seriously,” Dave Gulya, an organizer for the Maine event that attracted about 800 people, told the Bangor Daily News.</p> <p>The National Constitutional Coalition of Patriotic Americans sponsored the 45 planned rallies across the U.S. in support of the right to bear arms, according to the paper.</p> <p>"If you have a building and you take a brick out every so often, after a while you're not going to have a building," said Westley Williams, who joined about 100 people outside the state Supreme Court building in Cheyenne, Wyo.</p> <p>An estimated 160 Second Amendment supporters rallied in Atlanta, with some carrying firearms, flags and signs saying “Don’t Tread on Me” as they listened to speakers talk about gun rights.</p> <p>Protesters in Vermont took to the steps of the Statehouse in Montpelier, where days earlier they felt Gov. Phil Scott “betrayed” them when he signed three major gun control measures.</p> <p>“Three days ago, on these steps, we were betrayed,” Joe Nagle told the Burlington Free Press. "We were promised no new gun laws."</p> <p>The paper reported that the National Rifle Association criticized Scott, a Republican, and called on gun owners to abandon the governor, who changed his stance in February after an alleged school shooting plot shook the state.</p> <p>Saturday's protests came less than three weeks after hundreds of thousands marched in Washington, New York and elsewhere to demand tougher gun laws after the Feb. 14 school shooting in Parkland, Fla., that killed 17. Organizers of those protests demanded a ban on assault weapons and high-capacity magazines, and called for universal background checks on potential gun owners.</p> <p>Pro-gun protesters also showed up in Boston; Indianapolis; Albany, N.Y.; Austin, Texas; Des Moines, Iowa; and other cities.</p>

<p><b>HEADLINE</b></p>	<p><b>04/14 Experts: strikes won't stop Syria Assad</b></p>
<p><b>SOURCE</b></p>	<p><a href="https://www.nbcnews.com/news/world/trump-s-u-s-led-airstrike-syria-won-t-stop-n866046">https://www.nbcnews.com/news/world/trump-s-u-s-led-airstrike-syria-won-t-stop-n866046</a></p>
<p><b>GIST</b></p>	<p>The Pentagon boasted Saturday that its coordinated show of military force obliterated key chemical weapons facilities in Syria and set back the country's chemical weapons capabilities "for years."</p> <p>But military and Middle East experts say the predawn onslaught — touted by the Defense Department as "precise, overwhelming and effective" — appears to have been little more than an empty gesture and likely did not do much to alter Syrian President Bashar al-Assad's military calculus.</p> <p>Gen. Douglas Lute, the former U.S. ambassador to NATO, said that Assad's threshold for pain is very high because "he's in a fight for his life" to maintain control of his country, which has been mired in a seven-year civil war.</p>

The airstrikes, which targeted three facilities involved in research or storage of chemical weapons in western Syria, won't disable him from taking further action — whether chemical or conventional, Lute said.

"I think he's feeling reasonably good right now," Lute said of Assad. "Some of his facilities were struck, but it doesn't really challenge his hold on the country."

But experts said it's unclear how long of an impact the strike would have on Assad's weapon capabilities and whether it would dissuade him, as intended, from using chemical weapons in the future. Syria has repeatedly denied using chemical weapons against its people.

They also said the so-called red line that the Trump administration is drawing, meant as a marker for reprisals, could be problematic.

"People will see [the reasoning for the strike] and say, 'Does that mean that Bashar al-Assad has the green light to use conventional munitions against defenseless civilians?'" said former Ambassador Lincoln Bloomfield, who served in the past three Republican administrations, most recently as the assistant secretary of state for political-military affairs under President George W. Bush.

Assad, meanwhile, appeared unruffled Saturday as he strolled into the presidential palace in Damascus, briefcase in hand and mere miles from where some of the missiles struck chemical weapons depots hours earlier, according to a video released on Twitter by the Syrian regime.

While the attack may have destroyed the facilities where Syria combines its chemical agents, the strike likely will only cripple the country's ability to deploy certain agents, such as sarin gas, experts told NBC News.

Sarin was not the only agent used in the alleged chemical attack last week on the rebel stronghold of Douma, east of Damascus, senior Trump administration officials said Saturday.

Defense Secretary James Mattis told reporters Friday that chlorine gas was also used. Experts say that it's a common industrial chemical that is not difficult to produce and can be added to a barrel bomb or improvised artillery rocket.

It's unlikely Syria's ability to produce or find the chemical were inhibited by the airstrikes in any way, said Justin Bronk, a research fellow at the Royal United Services Institute in London.

The widespread use of chlorine for commercial purposes means that it is not included in the Chemical Weapons Convention that came into effect in 1997, a point readily cited by the Russian and Syrian governments. But the use of it as a gas in war or as an attachment to an explosive does constitute a war crime, experts said, and it's a simple weapon that has roots that go as far back as World War I.

That's why some experts don't think the strategic strike on chemical weapons facilities in Syria will have a long-term effect on the Assad regime, including its military operations.

"I don't think [their chemical weapons] capability will have been affected significantly at all," Bronk said. "And the delivery mechanism that is the Syrian Air Force — we have not seen much in terms of bases being hit as opposed to chemical facilities. The aircraft were mostly evacuated so they would have remained untouched."

<b>HEADLINE</b>	<b>04/14 Closer look at targets hit in Syria</b>
<b>SOURCE</b>	<a href="https://www.cbsnews.com/news/syrian-airstrikes-hit-chemical-weapons-facilities-2018-04-14/">https://www.cbsnews.com/news/syrian-airstrikes-hit-chemical-weapons-facilities-2018-04-14/</a>
<b>GIST</b>	<p>The U.S., together with the U.K. and France, targeted three sites in Syria overnight in response to the Syrian regime's alleged use of chemical weapons on civilians last weekend. The Pentagon said a total of 105 weapons were launched in the operation.</p> <p>"This is going to set the Syrian chemical weapons program back for years," Lt. Gen. Kenneth McKenzie, a director of the Joint Chiefs of Staff, said Saturday morning.</p> <p>Chief Pentagon spokeswoman Dana White described the target choices as "very methodical" and called it a "deliberate decision" to go after chemical weapons facilities.</p> <p>"The strikes went at the very heart of the enterprise to the research, to develop, to storage. So we are very confident that we have significantly crippled Assad's ability to produce these weapons," White said.</p> <p><b>Barzeh research and development center, Damascus</b></p> <p>The Pentagon said 76 missiles were aimed at the research center located northeast of central Damascus. McKenzie said 57 of the missiles were Tomahawk missiles, adding that the strikes "successfully destroyed" three buildings in the city.</p> <p>The research center was used for development, production and testing of chemical and biological warfare technology, Chairman of the Joint Chiefs Gen. Joseph Dunford said at a news conference Friday.</p> <p>Britain's Ministry of Defense said the facility was a former missile base where the Syrian regime keeps "chemical weapon precursors stockpiled in breach of Syria's obligations under the Chemical Weapons Convention." It said the facility is located "some distance from any known concentrations of civilian habitation, reducing yet further any such risk."</p> <p>Images from The Associated showed the damage to the facility that was essentially reduced to rubble.</p> <p>CBS News correspondent Seth Doane visited the site Saturday where the complex once stood. He spoke with a scientist only identified as Sayed who said his office -- and life's work -- were inside the building.</p> <p>Sayed said he'd worked there for 38 years and cried when he saw the complex in ruins. He said it's "totally incorrect" that chemical weapons were being developed there. "The Organization for the Prohibition of Chemical Weapons (OPCW) visited here and didn't report anything wrong with this place," he said.</p> <p><b>Him Shinshar chemical weapons storage site, west of Homs</b></p> <p>The facility is located 15 miles west of Homs and was the primary location of Syrian serin and precursor production equipment, Dunford said.</p>

Twenty-two weapons were aimed at the site, including naval cruise missiles and scout teams, McKenzie said Saturday.

### **Second chemical weapons storage site, west of Homs**

Seven missiles targeted the bunker, which was successfully hit, Gen. McKenzie said Saturday. He said the missiles were delivered from British, French and U.S. from the Mediterranean, and each strike hit around 4 a.m. in Syria.

"This strike aimed to deliver a clear and unambiguous message to the Syrian regime that their use of chemical weapons against innocent civilians is inexcusable and to deter any future use of chemical weapons," McKenzie said Saturday.

He said initial indications showed the strikes accomplished the Pentagon's "military objections without material interference from Syria."

<b>HEADLINE</b>	<b>04/14 Warship ruse, new stealth missiles</b>
<b>SOURCE</b>	<a href="https://www.bloomberg.com/news/articles/2018-04-14/warship-ruse-and-new-stealth-missiles-how-they-attacked-syria">https://www.bloomberg.com/news/articles/2018-04-14/warship-ruse-and-new-stealth-missiles-how-they-attacked-syria</a>
<b>GIST</b>	<p>President Donald Trump's outrage over another apparent chemical weapons attack by Syrian President Bashar al-Assad was clear. And for the second time in his presidency, the U.S. commander-in-chief demanded retaliation.</p> <p>As images of sick or dying children flooded global media all week, the U.S. guided-missile destroyer USS Winston Churchill churned toward the Mediterranean to join a flotilla of allied warships, including another U.S. destroyer, the USS Donald Cook.</p> <p>It was a ruse.</p> <p>While both vessels carry as many as 90 Tomahawk missiles -- the main weapon used in the Friday evening strike on Syria -- neither ship in the end fired a shot. Instead, according to a person familiar with White House war planning, they were part of a plan to distract Russia and its Syrian ally from an assault Assad's government could do little to defend itself against.</p> <p>It worked. Pentagon officials on Saturday said they faced little resistance to their targeted attack on what they said were three Syrian chemical weapons facilities. Most of the Syrian countermeasures, including defensive ballistic missiles, were fired after U.S. and allied weapons hit their targets, Lieutenant General Kenneth McKenzie told reporters on Saturday.</p> <p>"No Syrian weapon had any effect on anything we did," McKenzie said. He described the joint U.S., French and U.K. strike as "precise, overwhelming and effective."</p> <p>Brazen as it was perceived to be, the Assad regime's decision to again use chemical weapons on own people didn't by itself spur the U.S. to act. The Trump administration was also motivated by how closely the attack followed the use of a nerve agent to poison a Russian ex-spy and his daughter in England in March, an action the U.K. government and its allies blamed on Russia.</p> <p>The English incident added to concerns held by Trump, his top aides, and leaders in the U.K. and France that not responding might encourage proliferation of chemical weapons, according to two administration officials who spoke on condition of anonymity to discuss the deliberations.</p> <p>As the strategy of how to respond took shape, Trump appeared to telegraph his intentions to the world with a tweet on April 11: "Russia vows to shoot down any and all missiles fired at Syria. Get ready Russia,</p>

because they will be coming, nice and new and ‘smart!’”

Analysts suggested Assad’s regime would respond to Trump’s threats by protectively moving weapons and personnel away from likely targets. An already difficult battle plan -- which required hitting Assad without provoking Russian reprisals or injecting the U.S. further into Syria’s seven-year civil war -- was getting harder.

In the White House, Trump met with military officials and made several calls to his French and British counterparts, President Emmanuel Macron and Prime Minister Theresa May, with the goal of following through on a threat to impose a “big price” on Syria -- a vow made in an earlier tweet, on April 8.

During a meeting with the National Security Council and top military leaders early in the week, Trump had been presented five large target options -- called sets -- for potential strikes, according to the person familiar with the plans. The president largely listened as Pentagon chief Jim Mattis, Joint Chiefs Chairman Marine Corps General Joe Dunford and other military leaders did most of the talking. New National Security Adviser John Bolton -- who started work on April 9 -- and Vice President Mike Pence were also on hand.

The president asked Bolton and the military leaders to justify each potential target, and was particularly focused on limiting the risk of escalation by Russia. There was unanimity among Trump’s top national security staff about conducting strikes but debate about how hard to hit the Syrians, the person said.

Trump, who just a week earlier said he wanted to pull U.S. troops out of Syria “very soon,” didn’t want to become drawn into the civil war there and instead focused the military response on deterring the use of chemical weapons, according to the official.

With the allies on board and the USS Winston Churchill arriving in the Mediterranean region, the attack was nearly under way.

As the president addressed the nation at 9 p.m. Washington time, on Friday, a barrage of 105 U.S., U.K. and French missiles converged on Syria. They came from the Red Sea, the Arabian Gulf and the Mediterranean, homing in from three directions to overwhelm whatever missile defenses Assad’s regime might deploy. Russia’s more advanced air defense system didn’t engage the allied weapons.

According to the Pentagon, the allied weaponry included 19 new “Extended-Range” stealthy Joint Air-to-Surface Standoff Attack Munitions launched by two B-1B bombers based out of Al Udeid Air Base, Qatar, and six Tomahawk cruise missiles launched from the Virginia-class USS John Warner submarine. The bomber-launched missiles, built by Lockheed Martin Corp., had never been used in combat.

The cruiser USS Monterey fired 30 Tomahawks and the destroyer USS Laboon fired seven Tomahawks from the Red Sea. The destroyer USS Higgins fired 23 Tomahawks from the North Arabian Gulf, according to McKenzie.

The weapons also included French SCALP-EG cruise missiles and British Storm Shadow standoff missiles launched by Tornado and Typhoon jets. Nine SCALP missiles were fired at what the Pentagon said was a chemical weapons storage complex at Hims-Shinshar, along with two SCALPS, nine Tomahawks and eight Storm Shadows.

<b>HEADLINE</b>	<b>04/15 Caravan migrants on freight train to US</b>
<b>SOURCE</b>	<a href="https://www.cnn.com/2018/04/14/americas/central-america-migrant-caravan-train/index.html">https://www.cnn.com/2018/04/14/americas/central-america-migrant-caravan-train/index.html</a>
<b>GIST</b>	Tultitlán, Mexico (CNN)A stampede of Central American migrants rushed to the tracks Saturday when the first whistle of the train rang out.

After a few days in Mexico City, it was time to continue their journey north to the US border. About 500 migrants traveling in a caravan climbed onto the freight train just outside the Mexican city of Tultitlán.

They were about 1,500 miles south of the US-Mexico border as they started heading northwest to the city of Celaya.

As the train slowed down, migrants scrambled around the train cars to find a way to climb aboard, throwing small bags of belongings onto the train and hastily helping one another.

Police and guards watched from a few feet away. Some took photos. None took action to stop the migrants as they climbed the train.

As migrants set makeshift tents with blankets to protect them from the dusty wind and scorching sun, people from the ground and a bridge above waved. Some tossed water and snacks. As the train pulled forward, one migrant yelled out, "Gracias Mexico!" ("Thank you Mexico!")

More than 1,100 people set on the journey across Mexico on March 25, but they have dispersed into smaller groups as they headed north, organizers said.

The government of Mexico has granted many of the migrants temporary permission to stay in the country. Most of the migrants agree Mexico has been a welcoming place. Police have escorted the caravan at times and stopped traffic to help the convoys stay together. Churches and shelters have opened their doors, providing food and a safe place to sleep. Some of the migrants have decided to stay in Mexico.

The migrants, most from Honduras, say they are fleeing violence and poverty. Honduras and El Salvador are among the countries with the highest homicide rates in the world.

<b>HEADLINE</b>	<b>04/14 US confident Syria used chlorine, sarin</b>
<b>SOURCE</b>	<a href="https://www.cnn.com/2018/04/14/politics/us-chlorine-sarin-syria/index.html">https://www.cnn.com/2018/04/14/politics/us-chlorine-sarin-syria/index.html</a>
<b>GIST</b>	<p>(CNN)Senior US officials expressed confidence Saturday that both chlorine and sarin gas were used in Syria's alleged chemical weapons attack on the Damascus enclave of Douma last week -- a conclusion that went a step further than Vice President Mike Pence did in his remarks earlier Saturday.</p> <p>"While the available information is much greater on the chlorine use, we do have significant information that also points to sarin use," a senior administration official said on a call with reporters, citing reports from media, nongovernmental organizations and other open sources.</p> <p>"They do point to miosis -- constricted pupils -- convulsions and disruptions to central nervous systems. Those symptoms don't come from chlorine. They come from nerve agents. ... It's a much more efficient weapon, unfortunately, the way the regime has been using it, and it's resulted in higher deaths, it resulted in terrible pictures."</p> <p>The comments come a day after the United States launched targeted airstrikes against suspected chemical weapons facilities in Syria in coordination with the British and French.</p> <p>Earlier Saturday, Pence held off from expressing a final judgment about whether sarin gas was deployed in the chemical weapons attack.</p> <p>"Chlorine and possibly nerve agents were used," Pence said during his address at the Summit of the Americas in Peru.</p> <p>Another administration official laid out evidence on Saturday for the United States' conclusion that Syrian President Bashar al-Assad's government was behind the chemical weapons attack; that included</p>

eyewitness accounts of Syrian government helicopters circling the site of the attack on April 7 and high-resolution photos that "clearly" documented asphyxiation and foaming at the mouth.

"Assad has established himself as a user of chemical weapons" from past attacks, the official added.

Another official said, "We have incontrovertible evidence from the photos" that chemical weapons were used and it was "clear to the international community."

The administration maintains that it "exhausted every avenue in the international community" for diplomacy and sanctions before launching the missile strike, and that the President and allies felt the appropriate response was military action.

US officials said they hope the strike will serve to deter Syria's government from using chemical weapons in the future.

"If this step does not succeed, we will be prepared to act again," an official said on the call, echoing what other top administration officials emphasized on Saturday. Whether or not that happens is up to Syria and also Russia, the officials said.

<b>GIST</b>	<p>Thousands of Greeks turned up at a rally and march in central Athens organized by the Communist Party to protest the U.S.-led airstrikes against Syria.</p> <p>The protesters gathered Saturday at Athens' central Syntagma Square before marching to the U.S. Embassy, chanting anti-U.S. slogans and carrying banners. Some wrote on the pavement in red paint: "Americans, murderers of people."</p> <p>Police vehicles barricaded access to the embassy and protesters left peacefully.</p> <p>Dimitris Koutsoumbas, the Communist Party's leader, blasted Greek politicians for believing "flimsy excuses about a use of chemical weapons" by Syria. He also criticized their "subservience" to the EU and NATO, as well as their support for Israel.</p> <p>He told the crowd "the imperialists once again spill the blood of the local people. They destroy and splinter states by using fabricated evidence."</p>

<b>HEADLINE</b>	<b>04/15 Israel: Hamas tunnel network destroyed</b>
<b>SOURCE</b>	<a href="http://abcnews.go.com/International/wireStory/israel-destroys-hamas-tunnel-network-gaza-54478033?">http://abcnews.go.com/International/wireStory/israel-destroys-hamas-tunnel-network-gaza-54478033?</a>
<b>GIST</b>	<p>The Israeli military said Sunday it has destroyed a Gaza attack tunnel built by Hamas militants that penetrated Israeli territory.</p> <p>Lt. Col. Jonathan Conricus, a military spokesman, said the new Hamas tunnel was connected to a network dug in the northern Gaza Strip and entered Israel near the Israeli community of Nahal Oz. It's the fifth such Hamas tunnel Israel has destroyed in as many months.</p> <p>Conricus said the tunnel was adjacent to the site of recent mass protests, which Israel says Hamas is using as a cover for attacks.</p> <p>Conricus said Hamas began building the tunnel following the 2014 war. Israel has placed a high priority on halting the tunnel threat since Hamas infiltrated Israel during the war. Although they did not manage to reach civilian areas, the infiltrations caught Israel off guard, with one attack killing five soldiers, and terrified the local population.</p> <p>In two weeks of protests, 28 Palestinians have been killed and more than 1,500 wounded by Israeli fire. The marches have been organized by Gaza's militant Hamas rulers, but large turnouts on two preceding Fridays were also driven by Gaza's dire living conditions and desperation among the territory's 2 million residents, who have been enduring a crippling border closure by Israel and Egypt since 2007.</p> <p>Defense Minister Avigdor Lieberman said this was the longest and deepest tunnel Israel has discovered thus far.</p> <p>"It's a tunnel that cost millions of dollars to dig, money that instead of going to ease the hardship of Gaza's residents has sunk in the sand," he said. "Residents of Gaza: Hamas is burning your money on tunnels to nowhere."</p> <p>Hamas had no immediate comment.</p>

<b>HEADLINE</b>	<b>04/15 France urges Russia join peace push</b>
<b>SOURCE</b>	<a href="http://abcnews.go.com/International/wireStory/france-urges-russia-join-peace-push-syria-strike-54478584?">http://abcnews.go.com/International/wireStory/france-urges-russia-join-peace-push-syria-strike-54478584?</a>
<b>GIST</b>	<p>France is urging Russia to join a push for a political solution in Syria after joint U.S., French and British attacks on Syrian chemical weapons sites.</p> <p>French Foreign Minister Jean-Yves Le Drian said in an interview published Sunday in the Journal du Dimanche newspaper that "we should join our efforts to promote a political process in Syria that would allow a way out of the crisis."</p> <p>France has continued to talk regularly with Russia even as East-West tensions have grown. French President Emmanuel Macron spoke with Russian President Vladimir Putin on Friday, hours before the Western missile strikes.</p> <p>Western countries blamed Syria's government for a chemical attack on a rebel-held area earlier this month that killed more than 40 people. The Syrian government and its ally Russia denied the allegations.</p>
<a href="#">Return to Top</a>	

<b>HEADLINE</b>	<b>04/14 Security Council rejects Russia outcry</b>
<b>SOURCE</b>	<a href="http://abcnews.go.com/International/us-locked-loaded-syria-chemical-weapons-nikki-haley/story?id=54466163&amp;cid=clicksource_4380645_1_hero_headlines_bsq_hed">http://abcnews.go.com/International/us-locked-loaded-syria-chemical-weapons-nikki-haley/story?id=54466163&amp;cid=clicksource_4380645_1_hero_headlines_bsq_hed</a>
<b>GIST</b>	<p>The U.S. announced that overnight airstrikes succeeded in dealing a severe blow against the Syrian government's capacity to use chemical weapons.</p> <p>But U.N. Ambassador Nikki Haley also warned Saturday that the U.S. is "locked and loaded" in case Syrian President Bashar al-Assad uses chemical weapons again.</p> <p>"Last night, we successfully hit the heart of Syria's chemical weapons enterprise, and because of these actions, we are confident that we have crippled Syria's chemical weapons program," Haley said at an emergency meeting of the U.N. Security Council. "I spoke to the president this morning and he said that if the Syrian regime uses this poisonous gas again, the United States is locked and loaded."</p> <p>She added, "When our president draws a red line, our president enforces the red line."</p> <p>The Security Council meanwhile rejected a Russian resolution calling for condemnation of the "aggression" by the U.S. and its allies against Syria. Only two other countries, China and Bolivia, joined Russia in supporting the resolution. Eight countries voted against it, and three abstained. A resolution needs at least nine "yes" votes to pass.</p> <p>Anatoly Antonov, Russia's ambassador to the United States, tweeted that the strike would have repercussions. "We warned that such actions will not be left without consequences."</p>

<b>HEADLINE</b>	<b>04/13 Report: Seattle w/most regressive taxes</b>
<b>SOURCE</b>	<a href="http://mynorthwest.com/953315/seattle-regressive-taxes/">http://mynorthwest.com/953315/seattle-regressive-taxes/</a>
<b>GIST</b>	<p>Washington state's tax system has been called the most unfair to the poor in the nation. Now, Seattle is ranked as having the most regressive taxes in the state.</p> <p>According to a report from the Economic Opportunity Institute, a Seattle household making \$25,000 per year pays 17 percent of its income in state and local taxes. Meanwhile, a household earning \$250,000 pays just 4.4 percent.</p> <p>"Even if public expenditures are relatively progressive in nature, city projects are increasingly being built on the backs of those who can least afford to pay for them," the report from the Institute states.</p> <p>Seattle, the Institute criticizes, likes to imagine itself as a progressive beacon. But of the major cities in Washington, it's Spokane that has the least regressive taxes. A household earning \$25,000 has 10.4 percent of its income taxed</p> <p>Of course, King County voters tend to approve higher taxes to fund schools and projects more than outside cities.</p> <p>But Seattle is trapped within the state's already regressive tax system.</p> <p>"Every major statewide tax in Washington is regressive," according to the report.</p>

<b>HEADLINE</b>	<b>04/13 Probe: SPD cops violated force policy</b>
<b>SOURCE</b>	<a href="https://www.seattletimes.com/seattle-news/two-seattle-officers-violated-force-policies-in-eastlake-">https://www.seattletimes.com/seattle-news/two-seattle-officers-violated-force-policies-in-eastlake-</a>

	<a href="#"><u>shooting-internal-probe-finds/</u></a>
GIST	<p>Two Seattle police officers violated policies when they fired a barrage of gunshots that injured the driver and passenger of a stolen car fleeing an Eastlake alley in October, the department's internal-investigation unit has found.</p> <p>The Office of Police Accountability (OPA) recommended that allegations regarding excessive use of force, use of deadly force on a fleeing person and firing weapons at a moving vehicle be sustained, said Andrew Myerberg, OPA's civilian director.</p> <p>Myerberg said the officers' chain of command agreed with the findings, which were jointly submitted to Interim Police Chief Carmen Best for a final decision and any potential disciplinary action.</p> <p>Neither officer was named by the OPA, but the department has previously identified them as Officer Kenneth Martin and Officer Tabitha Sexton. They will be given the opportunity to meet with the chief before a decision is reached. Hearings have been set for May.</p> <p>In Martin's case, the OPA recommended that an additional allegation of failure to de-escalate the situation also be sustained.</p> <p>No details on the findings were released. The Seattle Times has filed a public-disclosure request for the OPA's written findings and analysis. Kevin Stuckey, president of the Seattle Police Officers' Guild, could not be reached for comment.</p> <p>On Oct. 8, Martin and Sexton fired dozens of rounds at a fleeing Subaru in an alley west of the 2200 block of Yale Avenue East. Video footage captured by officers' body cameras and dashboard cameras was released by the department's public-affairs office two days after the incident.</p> <p>Police had responded to a call reporting two people using drugs and possibly handling a gun inside a car.</p> <p>The video shows officers moving toward a car as an officer asks "is that them right there?" Officers then yell for one of the individuals to get on the ground, but the person ran toward the car.</p> <p>The video then shows four officers running toward the car, with one of them — identified as Martin — standing in front of the car and moving out of the way as the driver leaves a parking stall and heads north through the alley.</p> <p>Martin and Sexton initially opened fire as the car pulled out. The driver briefly stopped the car twice as the officers opened fire again with numerous gunshots. The driver then turned the vehicle right and drove off.</p> <p>The driver and passenger were not seriously hurt and were arrested later in Everett.</p> <p>In charging documents filed against both occupants of the car, a Seattle police detective wrote that as officers approached the car on foot, they shouted commands that the suspects ignored.</p> <p>Martin was standing in front the car, and patrol-car video showed the driver accelerated forward and struck Martin as he was trying to get out of the way, according to the detective.</p> <p>"To stop the imminent threat, officers fired their firearms," the detective wrote.</p> <p>One issue to arise in the incident was whether the officers had justification to fire the second volley of shots, when the car appeared to be driving away.</p> <p>According to the Police Department's manual, officers shouldn't fire at a moving vehicle "unless a person in the vehicle is immediately threatening the officer or another person with deadly force by means other than the vehicle." The manual states that the moving vehicle itself shall not "presumptively constitute a threat that justifies" deadly force.</p>

Officers also should move out of the path of a vehicle unless the person is immediately threatening the officer or another person.

King County prosecutors conducted a preliminary review of the incident, but tentatively declined to bring criminal charges against Martin and Sexton. Prosecutors, who will make a final determination later, returned the case to the Police Department for further investigation.

Myerberg said the OPA didn't reach a conclusion on whether the two officers committed violations of law, leaving that decision to prosecutors.

Prosecutors charged a man and his mother in connection with the stolen car after their fingerprints were found on the Subaru Impreza, according to court documents. The car had been found abandoned in North King County.

Joshua Brooks, 21, the driver, pleaded guilty April 5 to possession of a stolen vehicle and is awaiting sentencing. His mother, Wendy Lee, 46, who pleaded guilty to taking a motor vehicle without permission, was sentenced in December to 49 days of time served in the King County Jail.

Before they were booked into jail, Brooks and Lee were both treated at Harborview Medical Center for injuries suffered in the shooting. Brooks had two gunshot wounds to his lower back, and Lee's lower back and legs were peppered with tiny pieces of shrapnel, according to court documents.

<b>HEADLINE</b>	<b>04/13 Everett, KCSO plan new gang units</b>
<b>SOURCE</b>	<a href="http://q13fox.com/2018/04/13/gang-units-what-are-they-and-do-we-need-them/">http://q13fox.com/2018/04/13/gang-units-what-are-they-and-do-we-need-them/</a>
<b>GIST</b>	<p>EVERETT, Wash. – From Snohomish to Pierce counties, we've seen an increase in gang violence.</p> <p>Just months after Everett elected a new mayor, police say a 13-year-old with gang affiliation shot and killed a 14-year-old.</p> <p>"My focus is on public safety and gang violence. We're seeing a real uptick and it's frightening, the age of the kids we're seeing," said Everett Mayor Cassie Franklin.</p> <p>To combat that, the Everett Police Department is now working on putting together a new gang unit.</p> <p>There's talk of the same thing in King County after 13-year-old Elizabeth Juarez and 19-year-old Eveona Cortez were shot and killed in Burien in late March.</p> <p>"Talking to the sheriff {Mitzi Johanknecht} today, she would like to get a gang unit, maybe not just in King County maybe not just in Burien, but getting all the agencies involved," said county sheriff's Sgt. Ryan Abbott.</p> <p>Jonathan Wender is a 20-year police veteran and the CEO and president of Polis Soutlions, a consulting firm that helps train police departments across the nation in partnership with the Department of Justice. He says now is the time to bring back gang units that were disbanded across the Puget Sound.</p> <p>"We have an uptick in gang activity now and we want to reallocate those resources to address that issue," said Wender.</p> <p>He says gang unit members play a vital role in stopping gun violence. But he says it means either adding more funding to hire more officers or shifting some current officers and deputies to the newly formed gang unit.</p>

	<p>“It means they’re good investigators, they have unimpeachable honesty, they’ve got credibility, they can be firm, and they can be fair,” said Wender.</p> <p>Wender says gang units are more than just about learning gang signs, or knowing who wears which color, or if this is graffiti or tagging.</p> <p>“It’s really not a secret who those folks are. The challenge is that you can build up a relationship with them, that you can deal with crimes when they occur but most importantly prevent the crimes from occurring in the first place,” said Wender.</p> <p>The emotions from a vigil in Burien for the two slain teenagers show the damage gangs can do in a community, but Wender says a gang unit isn’t the only solution.</p> <p>“It’s not an either-or proposition. Do we need more case workers? Do we need more drug and alcohol treatment, better mental health care? Absolutely,” said Wender.</p> <p>In about a month, Everett police say they’ll have the groundwork laid for the new gang unit. It’ll be just in time for the normal uptick in gun and gang violence we normally see across the area during the warmer, summer months.</p>

<b>HEADLINE</b>	<b>04/13 Seattle: standard min. wage for disabled</b>
<b>SOURCE</b>	<a href="https://www.kiro7.com/news/local/seattle-becomes-first-in-country-to-require-standard-minimum-wage-for-disabled/731855072">https://www.kiro7.com/news/local/seattle-becomes-first-in-country-to-require-standard-minimum-wage-for-disabled/731855072</a>
<b>GIST</b>	<p>SEATTLE - Seattle Mayor Durkan today signed legislation banning the allowance of sub-minimum wages for people with disabilities.</p> <p>For KIRO 7 News at 5, Essex Porter was at Seattle City Hall today, where the bill was signed to promote integration and equal treatment for people with disabilities.</p> <p>The bill, authored by Councilmember Teresa Mosqueda, made Seattle the first city in the U.S. to require standard minimum wage for disabled people.</p>
<a href="#">Return to Top</a>	

<b>HEADLINE</b>	<b>04/13 DOJ demands Seattle documents</b>
<b>SOURCE</b>	<a href="https://www.kiro7.com/news/local/doj-demands-seattle-give-documents-related-to-compliance-with-immigration-authorities/731916316">https://www.kiro7.com/news/local/doj-demands-seattle-give-documents-related-to-compliance-with-immigration-authorities/731916316</a>
<b>GIST</b>	<p>The U.S. Department of Justice on Thursday, April 12, sent letters to the city of Seattle and the state of Vermont demanding they produce documents that show whether each jurisdiction is “unlawfully restricting information sharing by its law enforcement officers with federal immigration authorities.”</p> <p>An excerpt from the DOJ announcement is below:</p> <p>"The Department of Justice previously contacted these jurisdictions and raised concerns about laws, policies, or practices that may violate 8 U.S.C. § 1373, a federal statute that promotes information sharing related to immigration enforcement and with which compliance is a condition of FY2016 and FY2017 Byrne JAG awards.</p> <p>"The letters also state that failure to respond, respond completely, or respond in a timely manner will be subject to a Department of Justice subpoena."</p> <p><b>What’s happening Friday?</b></p>

The federal government is demanding documentation proving that local law enforcement has been compliant with a law that requires cooperation with federal agencies, including ICE. It's telling Seattle to hand over documents to that end or they will be subpoenaed anyway. If Seattle is found to be uncompliant, it could face federal funding cuts.

### **What federal funding?**

Byrne Grants. The letter says: "These materials are critical to our ongoing review. Should the Department determine your jurisdiction is out of compliance with section 1373, the Department may, as detailed in your award documents, seek return of your FY 2016 grant funds, require additional conditions for receipt of any FY 2017 Byrne JAG funding for which you have applied, and/or deem you ineligible for FY 2017 Byrne JAG funds."

### **What's a Byrne Grant?**

The Edward Byrne Memorial Justice Assistance Grants Program (Byrne JAG) is the cornerstone federal crime-fighting program, enabling communities to target resources to their most pressing local needs.

### **How has it helped the state of Washington?**

Law enforcement agencies in Western Washington get nearly \$8 million in federal grant funding for a range of projects designed to enhance community safety and improve crime fighting technologies, announced U.S. Attorney Annette L. Hayes.

King County called this kind of action bullying last July.

**NEW FEDERAL REQUIREMENT:** Certify compliance with Section 1373, a federal statute applicable to state and local governments that generally bars restrictions on communications between state and local agencies and officials at the Department of Homeland Security

**CURRENT KING COUNTY POLICY:** King County has always been in compliance with U.S. Code Section 1373. As it relates to immigration enforcement, King County does not ask people for their immigration status and does not collect immigration information

<b>HEADLINE</b>	<b>04/14 Putin sits back as US strikes Syria</b>
<b>SOURCE</b>	<a href="https://www.stripes.com/news/europe/putin-sits-back-as-us-allies-strike-syria-1.522046">https://www.stripes.com/news/europe/putin-sits-back-as-us-allies-strike-syria-1.522046</a>
<b>GIST</b>	<p>MOSCOW — Facing a stark choice between engaging the United States, Britain and France in combat or passively watching them strike his ally, President Vladimir Putin has opted for the peaceful route. That cautious response may dent the Russian leader's tough-man image but it won't undermine his gains in Syria or erode his authority at home.</p> <p>The Kremlin had warned Washington that Russia would fend off any strike that jeopardized its servicemen in Syria, and the West respected the red line by giving advance notice of Saturday's attack, just as it did a year ago when it struck a Syrian air base. Russia had sat idle back then, but this time, it had threatened to retaliate.</p> <p>Such a clash could have quickly spun out of control — an extremely dangerous scenario that was widely compared to the 1962 Cuban missile crisis, when the world narrowly escaped a nuclear conflict.</p> <p>"With our allies, we ensured that the Russians were warned ahead of time," said French Defense Minister Florence Parly. The U.S.-led strike was a response to a purported chemical attack on civilians in the Syrian town of Douma on April 7. Russia said its experts found no trace of chemical agents.</p>

A senior French official noted that President Emmanuel Macron did not tell Putin about the strikes when they spoke on the phone Friday, but "certain de-confliction mechanisms" had already been triggered by that point, and "both knew that a new phase was going to begin quickly."

Putin condemned Saturday's strikes as an "act of aggression" that will worsen the humanitarian catastrophe in Syria and have a "destructive influence on the entire system of international relations." He criticized Washington and its allies for attacking without waiting for inspectors from the international chemical weapons watchdog group to visit Douma, just outside Damascus.

The Russian military said its air defenses at two bases in Syria tracked the incoming missiles but didn't engage them.

Russian social media buzzed Saturday with angry nationalist comments blasting Putin for failing to protect his ally. But state TV focused on criticizing the West for acting on the basis of what Moscow called a faked chemical attack.

The Kremlin's tight control over the media will help Putin avoid any significant damage to his carefully nurtured image of a strong leader.

In fact, his cautious stance could boost his popularity further amid fears of war that swept Russia. In recent days, state media have been offering tips on how to behave in a nuclear conflict and what supplies to take to bomb shelters.

Most Russians will now heave a sigh of relief and feel grateful to Putin for pulling back from the brink. State TV channels compared what they described as U.S. President Donald Trump's reckless action with the responsible, statesmanlike stance taken by Putin.

Fyodor Lukyanov, head of the Council for Foreign and Defense Policies, an association of top Russian foreign policy and security experts, said on state TV that Moscow's warning to strike back "clearly hasn't come unnoticed by the Pentagon, and the strike was quite careful."

The Kremlin will also use the crisis to advance its narrative of an aggressive West that plunges the world into chaos and disregards international law. Russian officials and lawmakers compared it to the 2003 invasion of Iraq that was launched on claims that Baghdad was developing suspected nuclear weapons — allegations that proved to be false.

Commentators on state TV argued that Trump and British Prime Minister Theresa May launched the attack to distract attention from their political problems at home.

For now, Putin has limited his response to calling an urgent meeting of the U.N. Security Council.

No military measures were immediately announced, but in a clear warning to the U.S. and its allies, Col. Gen. Sergei Rudskoi of the Russian military's General Staff said Moscow could boost Syria's Soviet-era air defense assets with batteries of state-of-the-art S-300 missiles. He noted that Moscow so far has heeded Western requests not to provide the missiles to Damascus, but said it may now reconsider.

Rudskoi added that Moscow could also supply long-range missiles to unidentified other countries, a possible reference to Iran that has taken deliveries of S-300s in the past.

The statement clearly was aimed at discouraging the West from more attacks on Syria that could endanger Assad's gains on the battlefield, where Russian support has helped him secure control of most strategic areas.

<b>HEADLINE</b>	<b>04/13 UN puts Myanmar military on blacklist</b>
<b>SOURCE</b>	<a href="http://www.foxnews.com/world/2018/04/13/myanmar-military-put-on-un-blacklist-for-sexual-violence.html">http://www.foxnews.com/world/2018/04/13/myanmar-military-put-on-un-blacklist-for-sexual-violence.html</a>
<b>GIST</b>	<p>UNITED NATIONS – A U.N. report puts Myanmar's armed forces on a U.N. blacklist of government and rebel groups "credibly suspected" of carrying out rapes and other acts of sexual violence in conflict for the first time.</p> <p>An advance copy of Secretary-General Antonio Guterres' report, obtained Friday by The Associated Press, says international medical staff in Bangladesh have documented that many of the nearly 700,000 Rohingya Muslims who fled from Myanmar "bear the physical and psychological scars of brutal sexual assault."</p> <p>The U.N. chief said the assaults were allegedly perpetrated by the Myanmar Armed Forces "at times acting in concert with local militias, in the course of military 'clearance' operations in October 2016 and August 2017."</p> <p>Guterres said this was part of a strategy "to humiliate, terrorize and collectively punish the Rohingya community."</p>

<b>HEADLINE</b>	<b>04/13 Arizona to require 'travel ID' for TSA</b>
<b>SOURCE</b>	<a href="http://www.foxnews.com/travel/2018/04/13/arizona-residents-will-soon-need-travel-id-to-board-planes.html">http://www.foxnews.com/travel/2018/04/13/arizona-residents-will-soon-need-travel-id-to-board-planes.html</a>
<b>GIST</b>	<p>The Arizona Department of Transportation has announced that state residents will require a new form of identification to pass through Transportation Security Administration screeners in the near future.</p> <p>As of Oct. 1, 2020, Grand Canyon state residents traveling out of Phoenix Sky Harbor International, Phoenix Mesa-Gateway, Flagstaff, Tucson International and Yuma International airports will need to carry "Voluntary Travel IDs" or be grounded, AZ Family is reporting.</p> <p>The new ID will also be requisite to access restricted federal buildings and military bases, as standard credentials will no longer suffice.</p> <p>Minors under age 18 will not be required to have the new ID if they are traveling with an adult who does.</p> <p>According to AZ Central, driver's licenses are not compliant with the REAL ID Act passed by Congress in 2005, which amped up identification requirements for air travelers in the wake of 9/11. To compensate, the Arizona Legislature passed a law that said a license or card holder must voluntarily take steps to secure a Voluntary Travel ID.</p> <p>"Now is a great time to get a Voluntary Travel ID because the federal deadline gets closer every day," Motor Vehicle Division (MVD) Director Eric Jorgensen told AZ Family.</p> <p>"MVD is making this process simple. Customers can go to ServiceArizona.com and make an office appointment. The website provides information about what documents customers should bring with them to meet the REAL ID requirements for the Voluntary Travel ID."</p> <p>The Voluntary Travel ID's cost \$25 and are valid for eight years, according to the Arizona Department of Transportation. The new ID sets itself apart from the standard state driver's license with a gold star in the top right corner.</p>

	<p>While the new measures may seem intense, Arizona is not alone in increasing travel security.</p> <p>In correlation with the 2005 REAL ID Act, as of Jan. 22, 2018, residents of Kentucky, Maine, Minnesota, Missouri, Montana, Oklahoma, Pennsylvania, South Carolina and Washington were supposed to be required to have their passports to fly anywhere, although the federal government has granted extensions.</p>

<b>HEADLINE</b>	<b>04/12 US: blood samples show nerve agent</b>
<b>SOURCE</b>	<a href="https://www.nbcnews.com/news/mideast/u-s-has-blood-samples-show-nerve-agent-syria-gas-n865431">https://www.nbcnews.com/news/mideast/u-s-has-blood-samples-show-nerve-agent-syria-gas-n865431</a>
<b>GIST</b>	<p>WASHINGTON — The U.S. now has blood and urine samples from last Saturday's deadly attack in Syria that have tested positive for chemical weapons, according to two U.S. officials familiar with the intelligence.</p> <p>The samples suggested the presence of both chlorine gas and an unnamed nerve agent, two officials said. Typically, such samples are obtained through hospitals and collected by U.S. or foreign intelligence assets on the ground. The officials said they were "confident" in the intelligence, though not 100 percent sure.</p> <p>The Assad regime is known to have stocks of the nerve agent sarin, and has previously used a mixture of chlorine and sarin in attacks, say U.S. officials.</p> <p>Officials also said that the U.S. has compiled intelligence from the U.S. and other countries, including images, that indicate the Syrian government was behind the weekend attack.</p> <p>Activists and aid groups say that dozens died in Saturday's airborne assault on Douma, the last rebel stronghold in eastern Ghouta, which has been subjected to intensive bombing by Syria's Russian-backed Assad regime.</p> <p>Russia and Syria have denied any involvement in the alleged chemical attack.</p> <p>U.S. officials say the Assad regime has conducted multiple chlorine attacks on rebels during the past six months.</p>

<b>HEADLINE</b>	<b>04/13 Death involves 911 system w/issues</b>
<b>SOURCE</b>	<a href="https://www.cbsnews.com/news/kyle-plushs-death-is-latest-incident-involving-911-system-riddled-with-issues/">https://www.cbsnews.com/news/kyle-plushs-death-is-latest-incident-involving-911-system-riddled-with-issues/</a>
<b>GIST</b>	<p>A teenager trapped in a minivan made desperate pleas to 9-1-1 for help, but responders didn't get there in time. It happened in Cincinnati -- focusing new attention on the city's troubled emergency response system.</p> <p>Kyle Plush, 16, had to use voice commands to call 911. He was trapped in the back of his minivan, while his phone was in the front.</p> <p>"I'm stuck in my van outside the Seven Hills [unintelligible] parking lot," Plush said.</p> <p>"The Seven Hills what parking lot?" the dispatcher asked.</p> <p>"Send help, I am going to die here," Plush said.</p> <p>Police said Plush was reaching for his tennis gear in the back when the third row of the 2004 Honda</p>

	<p>Odyssey collapsed, pinning him upside down and crushing his chest.</p> <p>Twelve minutes after he called, police were at the scene but couldn't locate him. While they were there, Plush called 911 again and gave specifics on his car -- and his last wishes.</p> <p>"I probably do not have much time left, so tell my mom that I love her if I die," Plush said. "I'm stuck in my gold Honda Odyssey. This is not a joke, this is not a joke, I am stuck in my gold Honda Odyssey van."</p> <p>The 911 operator, who has been put on leave, didn't relay the make or model to police, and police officers gave up after 11 minutes. She claims she couldn't hear Plush and her computer froze.</p> <p>Critics say it is the latest incident in a 911 system riddled with issues. Cincinnati's mayor John Cranley said Friday the problems of management, supervision and technology have plagued the 911 center for years.</p> <p>"Time's up for waiting for our 9-1-1 system to fix itself," said Councilman Chris Seelbach. "We have to take urgent action immediately to have a system in place that ensures that you can call three numbers and within minutes police and fire officers will be on the scene."</p> <p>Six hours after the first 911 call, Plush's father discovered his son in car. Internal police records show that the 911 operator who was put on leave, received an "unacceptable" rating for her performance.</p>

<b>HEADLINE</b>	<b>04/14 Pentagon: successfully hit every target</b>
<b>SOURCE</b>	<a href="https://www.cbsnews.com/news/strikes-on-syria-pentagon-briefing-today-2018-04-14-live-stream-updates/">https://www.cbsnews.com/news/strikes-on-syria-pentagon-briefing-today-2018-04-14-live-stream-updates/</a>
<b>GIST</b>	<p>WASHINGTON -- Pentagon spokesperson Dana White said Saturday the U.S. and its allies "successfully hit every target" in airstrikes in Syria overnight. The U.S., U.K. and France and U.K. launched the strikes</p>

Friday night Eastern Time in response to the Syrian regime's alleged use of chemical weapons last weekend. In total, the U.S. used 105 weapons against three targets.

"I can assure you we took every measure and precaution to strike only what we targeted and — and we successfully hit every target," White told reporters Saturday.

White said the U.S. believes it has "significantly crippled" Syrian President Bashar Assad's ability to carry out a chemical weapons attack. White said the mission in Syria remains defeating the Islamic State of Iraq and Syria (ISIS), but the U.S. will not stand by while Assad attacks "innocent Syrian people."

Later Saturday morning, the U.N. Security Council was meeting at Moscow's request.

Lt. Gen. Kenneth McKenzie, the director of the Joint Staff at the Pentagon, told reporters Saturday the initial assessment is that the Defense Department accomplished its goals "without material interference" from Syrian defenses. The attempts from Syrian defenses were imprecise, in contrast to the U.S. mission, he said.

"We are confident that all of our missiles reached their targets," McKenzie emphasized, reiterating what White said.

McKenzie said, "As of right now, we are not aware of any civilian casualties," although they cannot be certain, given the defense launched by the Syrians.

Secretary of Defense James Mattis emphasized that the targets were infrastructure related to the Syrian regime's chemical weapons program, and that there are no plans at this time for further strikes.

But the president, in his address to the nation from the White House, declared that the U.S. is prepared to continue military intervention until Assad stops the use of chemical weapons.

<b>HEADLINE</b>	<b>04/14 Syrians in Damascus show defiance</b>
-----------------	--

<b>SOURCE</b>	<a href="http://abcnews.go.com/International/wireStory/syrians-gather-capital-defiance-airstrikes-54464277?">http://abcnews.go.com/International/wireStory/syrians-gather-capital-defiance-airstrikes-54464277?</a>
<b>GIST</b>	<p>Hundreds of Syrians gathered at landmark squares in the Syrian capital Saturday, honking their car horns, flashing victory signs and waving Syrian flags in scenes of defiance that followed unprecedented joint airstrikes by the United States, France and Britain.</p> <p>A few hours earlier, before sunrise, loud explosions jolted Damascus and the sky turned orange as Syrian air defense units fired surface-to-air missiles in response to three waves of military strikes meant to punish President Bashar Assad for his alleged use of chemical weapons.</p> <p>Associated Press reporters saw smoke rising from east Damascus and what appeared to be a flame lighting up the sky. From a distance, U.S. missiles hitting suburbs of the capital sounded like thunder. Shortly after the one-hour attack ended, vehicles with loudspeakers roamed the streets of Damascus blaring nationalist songs.</p> <p>"Good souls will not be humiliated," Syria's presidency tweeted after the airstrikes began.</p> <p>Immediately after the attack, hundreds of residents gathered in Damascus' landmark Omayyad square, celebrating what they said was the army's success in shooting down or derailing some of the missiles. Many waved Syrian, Russian and Iranian flags. Some clapped their hands and danced, others drove in convoys, honking their horns in defiance.</p> <p>"We are not scared of America's missiles. We humiliated their missiles," said Mahmoud Ibrahim, half his body hanging outside his car window, waving a Syrian flag. The crowd then moved toward the nearby Damascus University where pro-government fighters danced, waving their automatic rifles over their heads.</p> <p>The seemingly limited strikes with no apparent future strategy for how to deal with the wider civil war was a cause for celebration by Assad supporters but criticized by the Syrian opposition.</p> <p>Mohammad Alloush, spokesman for the Army of Islam rebel group, called the airstrikes a "farce" in a Twitter posting. Nasr al-Hariri, a senior opposition leader, said Syrians need a strategy that leads to a political solution to "save it from the brutality of the Syrian regime."</p> <p>A Syrian military statement said in all, 110 missiles were fired by the U.S., Britain and France and that most of them were shot down or derailed. Russia's military said Syrian air defense units downed 71 out of 103 cruise missiles launched by the U.S. and its allies.</p> <p>Syrian TV called the attacks a "blatant violation of international law and shows contempt for international legitimacy."</p> <p>U.S. Defense Secretary James Mattis said there were no reports of U.S. losses during the initial airstrikes.</p>

<b>HEADLINE</b>	<b>04/14 Europe leaders back strikes on Syria</b>
<b>SOURCE</b>	<a href="http://abcnews.go.com/International/wireStory/european-leaders-back-syria-strikes-warn-escalation-54466093?">http://abcnews.go.com/International/wireStory/european-leaders-back-syria-strikes-warn-escalation-54466093?</a>
<b>GIST</b>	<p>Many European leaders voiced support and understanding Saturday for the U.S.-led air strikes against Syria, but warned against allowing the seven-year conflict to escalate.</p> <p>_____</p> <p>"It has always been Bulgaria's position that no cause justifies the killing of innocent people, including children; that the use of chemical weapons is a war crime and the strike on Syrian targets was a response to a war crime." Bulgarian government statement. Bulgaria currently holds the rotating EU presidency.</p> <p>_____</p>

"Strikes by US, France and UK make it clear that Syrian regime together with Russia & Iran cannot continue this human tragedy, at least not without cost. The EU will stand with our allies on the side of justice." - Tweet by European Council President Donald Tusk.

---

"What has occurred in Syria in recent days goes far beyond the constant violation of cease fires. The response to these atrocities is legitimate and proportionate." - Spanish Prime Minister Mariano Rajoy.

---

"This was a limited and targeted action to strike the capacity of building or diffusing chemical arms. It cannot and should not be the start of an escalation." - Italian Premier Paolo Gentiloni.

---

"The strike against the Syrian regime that uses chemical weapons to attack the civilian population was inevitable." - Acting Czech Prime Minister Andrej Babis.

---

"We support the fact that our U.S., UK and French allies took on responsibility in this way as permanent members of the U.N. Security Council. The military strike was necessary and appropriate in order to preserve the effectiveness of the international ban on the use of chemical weapons and to warn the Syrian regime against further violations." - German Chancellor Angela Merkel.

---

"The international community has the responsibility to identify and hold accountable those responsible of any attack with chemical weapons. This was not the first time that the Syrian regime has used chemical weapons against civilians but it must be the last." - European Union Commission President Jean-Claude Juncker.

---

"The strike against the Syrian regime that uses chemical weapons to attack the civilian population was inevitable." - Acting Czech Prime Minister Andrej Babis.

---

"Belgium strongly condemns all use of chemical weapons which are a blatant violation of international law. Belgium therefore understands the military action in Syria of our American, French and British partners who have targeted identified production facilities." - Belgian government statement.

<b>HEADLINE</b>	<b>04/14 Russia warns US of 'consequences'</b>
<b>SOURCE</b>	<a href="http://abcnews.go.com/International/russia-responds-us-attack-syria-actions-left-consequences/story?id=54464208&amp;cid=clicksource_4380645_1_takeover_2_column_vod_headlines">http://abcnews.go.com/International/russia-responds-us-attack-syria-actions-left-consequences/story?id=54464208&amp;cid=clicksource_4380645_1_takeover_2_column_vod_headlines</a>
<b>GIST</b>	<p>Russia, the Syrian regime's top ally, reacted strongly to the air strikes launched by the United States and its allies on Damascus and Homs early Saturday, warning of "consequences."</p> <p>The U.S., U.K. and France launched a series of strikes on three locations identified as critical to Syria's production of chemical weapons, including a scientific research center in Damascus, and a production facility and storage facility in Homs, according to U.S. Chairman of the Joint Chiefs of Staff Gen. Joseph Dunford.</p> <p>The Russian embassy in U.S. wasted no time in reacting to the strikes late Friday in the U.S., with Ambassador Anatoly Antonov saying on Twitter, "The worst apprehensions have come true. Our warnings have been left unheard."</p> <p>"A pre-designed scenario is being implemented," the statement continued. "Again, we are being threatened. We warned that such actions will not be left without consequences."</p> <p>Russia has long been an ally of Syrian President Bashar al-Assad. Syria serves as an important access point to the Mediterranean Sea for Russian ships and a hub for Russia in the Middle East. They have also supplied Assad with the military resources necessary to fight back against the rebels who nearly overthrew him in 2011.</p> <p>President Donald Trump criticized Russia in his address to the country following the launch of missiles on Friday night.</p> <p>"In 2013, President [Vladimir] Putin and his government promised the world that they would guarantee the elimination of Syria's chemical weapons," Trump said. "Assad's recent attack, and today's response, are the direct result of Russia's failure to keep that promise."</p> <p>Putin responded to Saturday's attack by calling the strikes "an act of aggression against a sovereign state that is at the forefront of the fight against terrorism."</p> <p>"The current escalation of the situation around Syria has a devastating impact on the whole system of international relations," Putin said. "History will put everything in its place, and it has already laid heavy responsibility on Washington for bloody reprisals against Yugoslavia, Iraq and Libya."</p> <p>Putin also called for an emergency meeting U.N. Security Council.</p>
<a href="#">Return to Top</a>	

<b>HEADLINE</b>	<b>04/14 US, allies strike Syria</b>
<b>SOURCE</b>	<a href="http://abcnews.go.com/International/trump-orders-strike-syria-response-chemical-attack/story?id=54459378">http://abcnews.go.com/International/trump-orders-strike-syria-response-chemical-attack/story?id=54459378</a>

<b>GIST</b>	<p>President Donald Trump ordered a strike on Syria Friday in response to last weekend's chemical weapons attack.</p> <p>Addressing the nation Friday evening, Trump said the strike was a joint operation with France and the United Kingdom.</p> <p>"A short time ago, I ordered the United States Armed Forces to launch precision strikes on targets associated with the chemical weapons capabilities of Syrian dictator Bashar al-Assad," Trump said.</p> <p>Trump said that the "massacre" last weekend in Syria "was a significant escalation in a pattern of chemical weapons use by that very terrible regime."</p> <p>"The evil and the despicable attack left mothers and fathers, infants and children thrashing in pain and gasping for air. These are not the actions of a man," Trump said, referring to Assad. "They are crimes of a monster instead."</p> <p>In a later briefing, Defense Secretary James Mattis said the strike demonstrates the international resolve to prevent the use of chemical weapons, saying he is "confident the Syrian regime conducted a chemical attack on innocent people in the last week."</p> <p>"Clearly the Assad regime did not get the message last year," Mattis said, adding that this time the U.S. struck harder.</p> <p>"We have gone to great lengths to avoid civilian and foreign casualties," he said. "... I believe that we sent a very strong message."</p> <p>Chairman of the Joint Chiefs of Staff Gen. Joseph Dunford said the strike specifically hit three targets associated with the production and storage of chemical weapons: a scientific research center; a storage center for sarin and its precursor components; and a chemical weapons storage facility and command post.</p> <p>"Important infrastructure was destroyed," said Dunford.</p>

<b>HEADLINE</b>	<b>04/16 Changing cyber threat landscape</b>
<b>SOURCE</b>	<a href="https://cybersecurity.cioreview.com/news/the-changing-cyber-threat-landscape-nid-26065-cid-145.html">https://cybersecurity.cioreview.com/news/the-changing-cyber-threat-landscape-nid-26065-cid-145.html</a>
<b>GIST</b>	<p>Over the course of 2017, the number of global cyber attacks continued growing at a rapid pace which also resulted in the reshaping of the cybersecurity arena. With the adoption of various technology, traditional threats such as generic Trojans, ransomware, and spambots received facelifts with military-grade coding and tactics. Threats including GoldenEye and WannaCry gave numerous organizations tears and forced many to down their shutters.</p> <p>The effectiveness of these kinds of sophisticated threats can be analyzed by using lateral movement vectors that augment zero-day exploits such as EternalBlue and EternalRomance, allowing malware to 'hop' from one network to another across the globe. These targeted attacks are reshaping corporate and government digital security initiatives, while simultaneously causing fallout in the consumer space.</p> <p>The past year witnessed the rapid rise of commoditization of cybercrime, with Ransomware-as-a-Service and Malware-as-a-Service becoming easily and widely available on the dark web. Furthermore, the year also witnessed the growth of advanced services, like FUD (fully undetected), which enable attackers to upload malware to an analysis service for a fee. The past year also witnessed a new generation of IoT-based attacks known as Reaper. Analysis revealed that the attack codes were armed with exploits spanning</p>

	a variety of IoT vendors, including Linksys, NetGear, GoAhead, and Avtech. The growth of cyber attacks is simply an example of the sorts of the ongoing development of security exploits.

<b>HEADLINE</b>	<b>04/16 National Guard mission: cyber defense</b>
<b>SOURCE</b>	<a href="https://federalnewsradio.com/cyber-exposure/2018/04/national-guard-preparing-to-defend-cyberspace-for-states/">https://federalnewsradio.com/cyber-exposure/2018/04/national-guard-preparing-to-defend-cyberspace-for-states/</a>
<b>GIST</b>	<p>National Guard units are ramping up their defensive cyber capabilities across the board, and in the not-too-distant future will be able to quickly respond to cyber attacks in their home states and territories, much as they do today for natural disasters.</p> <p>“The Air National Guard (ANG) has 15 Cyber Operations Squadrons that provide Cyber Protection Teams (CPTs) and National Mission Teams (NMTs) in support of DoD cyber missions,” said Sgt. 1st Class W. Michael Houk, a spokesman for the National Guard Bureau. “In addition, the Army National Guard (ARNG) Cyber Brigade is building a full cyber brigade with five battalions consisting of 11 CPTs, five cybersecurity companies and five cyber warfare companies.”</p> <p>The guard also is actively working on cyber missions across the country.</p> <p>“ARNG personnel are currently mobilized as part of Task Force Echo under the control of Army Cyber in support of U.S Cyber Command to engineer, operate and maintain critical network infrastructure,” Houk said. “The ANG continually provides two CPTs and continually fills portions of a NMT in support of U.S. Cyber Command.”</p> <p>While guard cyber units already contribute to military missions around the globe, the National Guard’s recent efforts are a result of a 2016 Government Accountability Office study that underscored the importance of the guard’s readiness against cyber threats. At the time, many guard units had some limited cyber capabilities, but they were mostly assigned to local duties, such as protecting the online assets of the unit.</p> <p>Despite early success, the guard acknowledged that quite a few challenges remain in this new area. One is the long-standing fact that most guard personnel are part-time, something that was less of a concern when performing more traditional missions.</p> <p>“We have in our ranks people with cyber expertise gained through civilian experience,” said John Goheen, the director of communications for the National Guard Association of the United States. “The military could really use these people full time, but the salaries they command as civilians makes that challenging.”</p> <p>And it’s not just the guard that is experiencing, or will soon experience, the same situation.</p> <p>“The active military will likely run into the same problem moving forward,” Goheen said. “They train bright, young people — and then lose them to private industry. We have a place for them in the guard, but again, they will only be part-time. The military needs to find ways to tap this resource.”</p> <p>Another hurdle is one the National Guard has always experienced — that of running a branch of the national military within the jurisdictions of each individual state.</p> <p>“The nature of the National Guard enables our personnel to work with state and local authorities on critical infrastructure,” Goheen said. “In fact, a lot of guard cyber exercise involves assisting with defending power plants and water systems.”</p> <p>In an actual incident, such as an attack on a power plant through its cyber infrastructure, a state government could activate the guard, and called upon it to stop it, officials said. After it halted the main attack, a guard cyber unit could remain behind to protect the infrastructure while the critical infrastructure</p>

	<p>owner constructed the new cyber defenses.</p> <p>The scope and capabilities of any given state-level mission would be up to the governor of that state, not unlike traditional guard missions.</p> <p>“National Guard forces would likely respond to a cyber incident in the same manner as other domestic emergencies such as hurricanes or floods,” Houk said. “A governor may activate National Guard personnel in state-funded, State Active Duty in accordance with state and local laws and DoD policy.”</p> <p>Additionally, under the United States Code Title 32, a state governor, with approval from the secretary of Defense or the president, may activate guardsmen for homeland defense activities, or to provide support for civil authorities.</p> <p>National Guard leaders expressed confidence that the guard would soon be responding to cyber incidents on a regular basis, just like they do for floods, snowstorms and missions to maintain the peace in extraordinary circumstances. Now, maintaining the peace extends to cyberspace.</p>

<b>HEADLINE</b>	<b>04/13 India bitcoin exchange suffers setback</b>
<b>SOURCE</b>	<a href="https://www.hackread.com/someone-stole-3-million-in-bitcoin-from-coinsecure-bitcoin-exchange/">https://www.hackread.com/someone-stole-3-million-in-bitcoin-from-coinsecure-bitcoin-exchange/</a>
<b>GIST</b>	<p>In a security notice, the Indian Bitcoin exchange Coinsecure has revealed that it has suffered a setback after 438 BTC which is over \$3 million (\$3,542,957) according to current Bitcoin price were stolen from its offline Bitcoin wallets</p> <p>The company maintains that it has never been hacked or compromised and the incident took place when its CSO Dr. Amitabh Saxena was extracting BTG (Bitcoin Gold) to distribute to its customers. Saxena, on the other hand, claims that funds were lost in the process during the extraction of the private keys.</p> <p>The company has launched a complaint with the Cyber Cell in Delhi and is also conducting an investigation with the help of cybersecurity experts. However, a look at the police complaint points to an inside job as the company’s director Mohit Kalra stated in the complaint that:</p> <p>“As the private keys are kept with Dr. Amitabh Saxena, we feel that he is making a false story to divert our attention and he might have a role to play in this entire incident. The incident reported by Dr. Amitabh Saxena does not seem convincing to us. Dr. Amitabh Saxena also has an Indian Passport and he might fly out of the country soon, therefore, his passport should be seized as he cannot fly out of the country”</p> <p>Ningning Niumai, founder of Greymeter, a social network for college students and young professionals tweeted that Dr. Amitabh Saxena was appointed almost 6 months ago by the company, therefore, handing over private keys of Coinsecure is very suspicious.</p> <p>“Dr. Amitabh Saxena appointed barely 6 months ago has the private key to Coinsecure’s wallet?!! Is he a Scapegoat?!! Very suspicious and convenient blame game after the recent RBI ruling on Bitcoin,” said Niumai.</p> <p>It is noteworthy that Coinsecure incident has occurred days after the Reserve Bank of India (RBI) barred banks and financial institutions from dealing in cryptocurrencies from April 6th, 2018.</p>

<b>HEADLINE</b>	<b>04/13 FTC: 2016 Uber hack impacted 25M</b>
<b>SOURCE</b>	<a href="https://www.securityweek.com/25-million-us-individuals-impacted-2016-uber-hack">https://www.securityweek.com/25-million-us-individuals-impacted-2016-uber-hack</a>
<b>GIST</b>	The 2016 data breach that Uber made public in November 2017 impacted over 25 million riders and drivers in the United States, the Federal Trade Commission (FTC) reveals.

	<p>The hack, which the ride-sharing company kept silent about for a year, impacted more than 57 million users globally. Hackers managed to access data stored on an Amazon Web Services (AWS) account and steal names, email addresses and mobile phone numbers of customers around the world.</p> <p>In February this year, Uber chief information security officer said that two individuals living in Canada and Florida were responsible for the massive data breach.</p> <p>In an attempt to cover up the hack, Uber paid the attackers \$100,000 through its third-party “bug bounty” program, which was designed to reward those who responsibly disclose vulnerabilities, rather than those who maliciously exploit them.</p> <p>The company came under scrutiny after the hack was made public in November 2017, and even became the target of a US criminal investigation. The data breach was revealed only three months after Uber agreed to implement new data protection measures in a settlement with the FTC over a 2014 incident.</p> <p>Now, the Commission says the ride-sharing company has agreed to expand the proposed settlement and that it will be subject to additional requirements. Under the new settlement, Uber could be subject to civil penalties if it doesn't notify the FTC of future breaches in due time.</p>

<b>HEADLINE</b>	<b>04/13 Hoaxes, scams w/school violence fears</b>
<b>SOURCE</b>	<a href="https://www.scmagazine.com/email-hoaxes-and-phishing-scams-prey-off-of-school-violence-fears/article/758240/">https://www.scmagazine.com/email-hoaxes-and-phishing-scams-prey-off-of-school-violence-fears/article/758240/</a>
<b>GIST</b>	<p>A Swiss hacking group has reportedly claimed credit for using a hijacked email domain to bombard schools around the U.S. with fake threats of violence. And in related news, security awareness training provider KnowBe4 issued a warning on Thursday about a credentials phishing campaign that also preys on school shooting fears by impersonating a campus security alert.</p> <p>According to multiple news outlets, a group called the Apophis Squad sent disturbing hoax emails to school district superintendents in at least 46 states last Sunday and Monday, triggering an increased police presence and in some cases class cancellations. The emails featured the subject line "Student help!" and purported to be authored by a bullied student who threatened to show up at school "with 3 bombs, and a .22 handgun."</p> <p>The adversaries reportedly used the email address apophissquad@zonix.us, after hijacking the domain of Zonix, a Dallas-based online online gaming company that provides Minecraft servers.</p> <p>"Over the past few hours we were directly contacted by a group that threatened to send a bomb hoax spoofing our email domain in an attempt to directly smear and harm Zonix," states a series of tweets posted on Zonix's official Twitter account on Apr. 9. "We began to realize the threat was credible when we began hearing responses from school superintendents pertaining to this situation. We are aware that some schools might have been affected by this and we apologize for any inconvenience or panic that could have happened because of this situation.</p> <p>Apophis Squad's account on Twitter, meanwhile, has been suspended. But a journalist with the Union-Democrat in Sonora, Calif. reportedly made contact with one of the hackers, who said the attack's motive was to taunt law enforcement, adding "We got nothing better to do." The hacker also stated future plans to leak information originating from a U.S. Army database.</p> <p>Reportedly, the same perpetrators previously sent similar threats to UK-based schools in March 2018, using the domain of Zonix competitor VeltPvP.</p> <p>Meanwhile, an unnamed community college in Florida was recently targeted in phishing campaign</p>

	<p>spoofing its campus-wide security alerts, according to a KnowBe4 founder and CEO Stu Sjouwerman, who warns in a company blog post that this scheme could easily spread to additional educational institutions as well as companies and organizations that have established active shooter protocols.</p> <p>The email arrives with a subject line such as "IT DESK: Security Alert Reported on Campus," "IT DESK: Campus Emergency Scare" or "IT DESK: Security Concern on Campus Earlier," and instructs recipients to click a link to a memo containing proper instructions. However, the link leads to a credentials phishing page that imitates the Microsoft log-in process, which many campuses computers require.</p> <p>"What makes this particular attack so infuriating," remarks Sjouwerman, is that it exploits current concerns over active shooters on education campuses, a sensitive issue that could likely generate panicked, reflexive clicks from recipients who are already on edge over the recent shooting at Marjory Stoneman Douglas High School, also in Florida."</p>

<b>HEADLINE</b>	<b>04/13 Federal agency data under siege</b>
<b>SOURCE</b>	<a href="http://www.darkreading.com/attacks-breaches/federal-agency-data-under-siege/a/d-id/1331467">http://www.darkreading.com/attacks-breaches/federal-agency-data-under-siege/a/d-id/1331467</a>
<b>GIST</b>	<p>The US government continues to grapple with the same cybersecurity challenges faced by most organizations, but it has a different set of hurdles to overcome than its private-sector counterparts. As a result, federal agencies are experiencing more data breaches than other industry sectors. Despite skyrocketing IT security spending, successful attacks are escalating across the board. Federal agencies in particular are weathering a perfect storm around data that puts agency secrets — and the personal data of over 330 million American citizens — at risk.</p> <p>According to Thales' 2018 Data Threat Report—Federal Government Edition, 57% of federal respondents reported data breaches, a threefold increase over the 18% recorded back in 2016. As many as 12% experienced multiple breaches in 2017 and in previous years.</p> <p>Many agencies are in a difficult position. Federal agencies must protect sensitive data and both thwart bad guys hunting for citizens' private data and nation-state hackers with their own agendas — in addition to grappling with perennial underfunding, understaffing, and antiquated systems that commercial enterprises tossed into the dumpster years ago. At the same time, they need to make government more accessible and transparent via digital transformation, which inevitably exposes them to more cyber threats.</p> <p>But these factors don't completely explain the growing numbers of breaches at federal agencies.</p> <p><b>Catching Up with the Private Sector</b></p> <p>Despite these troubles, agency IT security professionals are trying to stay positive, partly because spending is sharply increasing this year. "Like most other sectors, data security spending plans in the US federal sector are up compared to last year — way up," says Garrett Bekker, 451 Research's principal analyst for information security, as highlighted in the Thales report. "Perhaps more importantly, for the first time, the US federal government ranks the highest of any US vertical in terms of spending increase plans — more than nine out of 10 (93%) plan to increase security spending in 2018."</p> <p>In fact, a staggering 73% of federal agencies say their IT security spending will be much higher in 2018, according to the report. This comes after several years of IT security spending well below that of commercial enterprises.</p> <p>"The bad news is that reports by US federal respondents of successful breaches last year (57%) are far ahead of the global average (36%), and also the global federal sector (26%). Further, 70% of US federal respondents say their agencies were breached at some point in the past," says Bekker.</p>

<b>HEADLINE</b>	<b>04/16 Woolworths hit by IT glitch</b>
<b>SOURCE</b>	<a href="https://www.zdnet.com/article/woolworths-turning-customers-away-following-it-outage/">https://www.zdnet.com/article/woolworths-turning-customers-away-following-it-outage/</a>
<b>GIST</b>	<p>Woolworths is turning customers away from its stores, following reports the Australian supermarket chain is suffering a nationwide IT outage.</p> <p>Customers took to Twitter Monday afternoon, posting photos of security screens pulled shut at stores around the country, with some reporting being told by store managers that an IT glitch had affected its cash registers.</p> <p>ZDNet understands the glitch didn't make its way to all stores, however, with some operating as usual.</p> <p>Woolworths eventually confirmed the outage, apologising for the inconvenience via Twitter.</p> <p>"We can confirm that an IT issue impacted registers in our supermarkets for a short period of time this afternoon. The registers are now back online in all our stores. We apologise for any inconvenience caused. Thanks," the reply to many reads.</p> <p>Woolworths in August apologised to customers following reports that some experienced a second batch of payments withdrawn from their bank accounts.</p> <p>A Woolworths spokesperson told ZDNet at the time it received confirmation from Cuscal, one of its payment processors that services financial institutions, that due to an error at its datacentre, some Woolworths customers received incorrect transactions on accounts processed by Cuscal.</p>

<b>HEADLINE</b>	<b>04/16 Windows servers targeted to cryptomine</b>
<b>SOURCE</b>	<a href="https://www.bleepingcomputer.com/news/security/windows-servers-targeted-for-cryptocurrency-mining-via-iis-flaw/">https://www.bleepingcomputer.com/news/security/windows-servers-targeted-for-cryptocurrency-mining-via-iis-flaw/</a>
<b>GIST</b>	<p>Hackers are leveraging an IIS 6.0 vulnerability to take over Windows servers and install a malware strain that mines the Electroneum cryptocurrency.</p> <p>Attacks aren't widespread, as they target a quite old IIS version, but they are happening at scale.</p> <p>Hackers using former IIS 6.0 zero-day</p> <p>Hackers are using CVE-2017-7269 to take over servers. This is a vulnerability discovered by two Chinese researchers in March 2017 that affects IIS' WebDAV service. At the time it was discovered last year, the flaw was a zero-day, being under heavy exploitation for almost nine months, since June 2016.</p> <p>Microsoft initially said it was not planning to fix the flaw because IIS 6.0 was end-of-life, and so were the operating systems that shipped with IIS 6.0 by default —Windows XP and Windows Server 2003.</p> <p>But the vulnerability shared some common traits with the EXPLODINGCAN NSA exploit leaked in April 2017 by the Shadow Brokers, and it eventually received a fix in mid-June 2017.</p> <p>Since then, it's been used by at least one threat actor to deploy Monero miners on Windows servers still running the old IIS 6.0 version.</p> <p>Now, F5 Labs says it found another hacker group using the same exploit, but deploying an Electroneum miner instead of Monero.</p> <p>According to experts, the threat actor uses CVE-2017-7269 to deliver an ASCII shellcode which contains a Return-Oriented Programming (ROP) exploit chain that installs a reverse shell on vulnerable hosts.</p>

	<p>Attackers then use the reverse shell to download the miner and start the mining process. The infection process is masked by the use of the Squiblydoo technique and by disguising the miner as the legitimate lsass.exe (Local Security Authority Subsystem Service) process.</p> <p>F5 experts said the Electroneum address they found in attacks stored only \$99, suggesting they either caught the campaign at its beginning, or crooks are rotating address IDs to avoid researchers from tracking their entire operation.</p>

<b>HEADLINE</b>	<b>04/16 'Digital resurrections' bring back dead?</b>
<b>SOURCE</b>	<a href="https://www.nbcnews.com/mach/science/will-digital-resurrections-let-us-bring-back-dead-ncna865806">https://www.nbcnews.com/mach/science/will-digital-resurrections-let-us-bring-back-dead-ncna865806</a>
<b>GIST</b>	<p>Humans have always looked for tangible ways to remember departed loved ones. We save letters and emails they wrote us. We look fondly at photos of them. We watch and rewatch old videos just to see their faces and hear them talk.</p> <p>But the rise of digital technologies may soon give us even more compelling ways to remember lost friends and family. These include apps that let us text with digital representations of the dead — we'd type a message and then get some sort of comforting reply — and maybe even systems that let us speak with and possibly touch realistic avatars of the ones we miss most.</p> <p>Maybe that sounds creepy, but some experts believe we'll find comfort in continuing our interactions with people whose biological existences have come to an end.</p> <p>"Many people visit the headstone of a loved one to help come to terms with their passing, and have a one-sided conversation where they think about the memory of them," says Bruce Duncan, managing director of Terasem Movement Foundation, a Bristol, Vermont-based nonprofit that promotes digital resurrections.</p> <p>"Being able to have a two-way conversation with a digital version of them, where you can be reminded of</p>

their mannerisms or behavioral patterns in an interactive way, could become a natural part of the grieving process.”

Several companies, including Luka, a San Francisco-based startup, and research organizations including the MIT Media Lab, are working on digital resurrection technology.

It goes without saying that the digital version of a person is no match for the living, breathing human being. But scientists are experimenting with algorithms that can take a person's emails and text messages and use them to generate text messages that are at least evocative of a specific person. The messages can use emojis like the dead person once did. And with data pulled from the internet, the texts can even include back-and-forths about topical things like weather and current events.

In coming years, Duncan believes, there may be browser plug-ins capable of capturing an entire life's worth of social media posts, emails, photos, and other digital data and using everything to approximate an individual's personality, complete with values and opinions.

Digital resurrection technology is unlikely to stop with chatbots. Duncan and other experts foresee a time when we'll be able to interact with lost loved ones not just via texts but in virtual reality.

“You'd be able to put on your virtual reality glasses and headset, and experience typical everyday situations with that person, like sitting at the breakfast table or taking a walk in a nearby park,” says Charlotte Runius, CEO of Fenix Begravning, a Stockholm, Sweden-based funeral planning agency that is working with AI experts to develop these technologies. “Hearing their voice and seeing them would allow you to actually feel like you're next to the person again, and you can talk to them and get replies in a much more realistic way.”

By wearing a bodysuit and gloves studded with sensors and actuators, it might even be possible to interact physically with a realistic-looking avatar of a deceased person. The technology could monitor a living person's movements, voice, and facial expressions and then later use them to direct an avatar to respond appropriately — perhaps by offering advice or giving a comforting hug.

In the distant future, one can imagine that it would be possible to create a robotic avatar of a beloved one — a bit like the scenario depicted in a popular episode of the Netflix series "Black Mirror," in which a grieving widow's late partner is resurrected in robotic form with help from his texts, photos, and emails.

The only snag with these scenarios is that much of the data used to resurrect someone would have to be collected while he or she was still alive — for instance, by having him or her speak a thousand or so words and be recorded on video.

#### EMOTIONAL COMFORT — OR PAIN?

What would it be like to interact with someone who's been brought back in digital form? Some experts say it could aid the grieving process. Others worry that interacting with a virtual representation of a person who is no longer alive would only intensify feelings of sadness and loss.

Studies have shown that bereaved people can experience grief hallucinations, and there are concerns that interacting with avatars might raise the risk.

Duncan believes that, at least for most people, the experience will be akin to watching home movies and enjoying the memories that they trigger.

“Enjoying talking to past loved ones via digital media may eventually become the future version of looking through photographs of past events... It's hard to predict the future, but just as we've adjusted to using Skype and cell phones I think we'll consider it valuable to continue some connection with a person we care about.”

HEADLINE	<b>04/15 Pushing back Russia disinformation</b>
SOURCE	<a href="https://www.nbcnews.com/politics/donald-trump/one-tiny-corner-u-s-government-pushes-back-against-russian-n866021">https://www.nbcnews.com/politics/donald-trump/one-tiny-corner-u-s-government-pushes-back-against-russian-n866021</a>
GIST	<p>WASHINGTON — When reports began to emerge last month that Russian mercenaries had attacked a U.S. base in Syria, Russia issued a flat denial, and the U.S. was silent.</p> <p>Then, leaked recordings surfaced on the internet.</p> <p>"We've had our asses f--- kicked. So one squadron f--- lost 200 people ...the Yankees knew for sure that the Russians were coming."</p> <p>The tapes seemed to show Russian guns-for-hire acknowledging a crushing defeat in the Feb. 8 incident. It was an embarrassment for the Kremlin, which was forced to admit that Russian citizens had been killed by the U.S. military — something an American general later confirmed to NBC News.</p> <p>With their election interference and ongoing manipulation of social media platforms like Twitter, the Russians have been regularly outfoxing America in the information realm, U.S. intelligence officials acknowledge. Who turned the tables this time?</p> <p>Not the White House, the State Department or the CIA. The recordings were published by a U.S.-government-funded web site called Polygraph.info, whose reporter says she got them from a source close to the Kremlin.</p> <p>Polygraph is a relatively new fact-checking arm of an obscure, diminutive media effort by the U.S. to highlight Russian misdeeds and counter Russian propaganda.</p> <p>It's an anomaly in the Trump administration — perhaps the only part of the U.S. government whose job is to regularly punch back against what experts say is a stream of Russian disinformation aimed at America and the West.</p> <p>"At the end of the day, the Russians are engaging in information warfare — they're telling lies," said John Lansing, a former television executive who oversees the effort. "And we're confronting them toe-to-toe with fact-based, truthful, professional journalism."</p> <p>Russia's proficiency at information war has been on display in the wake of the U.S.-led military strike Friday night in Syria. Russia called the strikes illegal and said the chemical weapons attacks that prompted them were staged. To get that message out, there was a 2000 percent spike in activity in the hours since the strike by fake Russian propaganda accounts on social media, a Pentagon spokeswoman said Saturday. A web site that tracks a slice of those accounts, Hamilton 68, found that they were pumping out the Russian government narrative in English.</p> <p><b>THEY'RE "EATING OUR LUNCH"</b></p> <p>The U.S. is ill-equipped to respond. Polygraph, part of the tiny corner of the government that's trying, has a staff of five that doesn't usually work on the weekends.</p> <p>"We focus mostly on Russia right now because there is a large flow of disinformation that's coming from Russia," said Jim Fry, a former Dallas television reporter who runs Polygraph from Washington.</p> <p>Polygraph is a joint venture of the Voice of America and Radio Liberty, which are funded by — but independent of — the U.S. government. They fall under the umbrella of the Broadcasting Board of Governors, whose mission is to promote freedom and democracy and "tell America's story" around the world. But they are walled off, editorially, from the administration in power.</p> <p>"The law protects us from interference by U.S. government officials," said Tom Kent, who spent 44 years at The Associated Press before becoming president of Radio Liberty and Radio Free Europe. "They can't</p>

tell us what to broadcast."

During the Cold War, the VOA and Radio Liberty sought to counter communist propaganda and funnel information to the news-starved citizenry behind the Iron Curtain.

Those muscles — and budgets — have long since atrophied. But in recent years, there have been growing calls for a new twist on that old mission.

When Lansing became CEO of the Broadcasting Board of Governors in 2015, he said he was confronted on Capitol Hill and throughout the government with a single question:

"Why are the Russians eating our lunch in terms of information warfare?"

People were talking mainly about RT, the former Russia Today, which spends hundreds of millions of dollars a year on an English language broadcast and web platform that regularly skewers American and the West. The U.S. government has labeled RT a propaganda operation.

The State Department came under criticism earlier this year when news reports highlighted its failure to spend \$120 million that had been allocated to push back on Russian propaganda abroad.

Lost in that conversation was the fact that one month into the Trump Administration, Lansing and his team launched Current Time America, a 24-hour Russian-language broadcasting and web platform. The budget was \$20 million — around one-tenth the size of RT's budget, Lansing says. But one year later, Current Time America is available on TV screens in 30 countries, and officials counted 400 million view views on social media last year.

Still, U.S. information efforts are minuscule compared to the Russian campaign. While Current Time America is available in Russia, the Russian government makes it difficult to find — keeping it off cable systems and requiring special tuning for satellite reception.

The broadcasting board's total budget this year is about \$660 million dollars, about a third of what was spent in 1991, adjusted for inflation.

"I think we should be investing more," Lansing said.

The Russian government labels the entire U.S.-funded journalism operation "propaganda" that is "part of a broader, wide-reaching American system of pressure on our country."

Irina van Dusen, who heads the effort as chief of Voice of America's Russian-language programming, knows what propaganda looks like. She grew up in the Soviet Union, listening to the VOA on an illegal short wave radio for scraps of accurate reporting.

She got her journalism degree in Moscow, but decided that if she wanted to practice real journalism, she would have to move to the West.

During the Cold War, she says, the VOA was trying to break through jamming and censorship. Now there has been a proliferation of Russian TV and web channels that put out a cacophony of news, nearly all of it favorable to Vladimir Putin. The task in 2018 is trying to break through a fog of disinformation.

The prevailing view in Russia, she said, is that "There is no truth. There is only different versions, different narratives... We stand by the fact that there is truth. And there are facts."

From a TV studio near not far from where special counsel Robert Mueller comes to work each day, Current Time America covers Washington, offering live broadcasts of Congressional hearings with simultaneous translations.

"People can listen, see how it's done, how policies are made, what questions asked, what facts are being brought up," she said.

The channel also covers Russia, to "provide Russian speaking audiences with a true portrait of the society, you know? As opposed to state-run Russian television that — interprets everything that is done in the world...as some kind of a United States manipulation and United States meddling in world affairs."

Polygraph.info, and its Russian-language counterpart, Factograph — try to be slightly edgier than a traditional news operation.

"What our reporters do every day is they begin the day looking at Russian media," said Fry. "Looking at what's coming out of Russia. And then we decide whether there's something to fact check. Usually, almost every day, there's more to fact check than we could possibly do with our staff."

The site is modeled after other media fact check efforts, including Politifact and factcheck.org. It highlights a claim, say, by Putin or another Russian official, and brands it for veracity, with labels like "Partially True," "False" or "Misleading."

In March, the site fact-checked a Putin documentary that alleged the Russian leader had always believed that the Ukrainian territory of Crimea was part of Russia. It highlighted remarks by Putin in 2008 in which he said something very different: "Crimea is absolutely not a disputed territory." Six years later, Putin seized Crimea from Ukraine, to international condemnation.

Polygraph also challenged Russia's denial that the nerve agent used to poison a former spy in the UK was made only in Russia, and its assertion that no chemical attack took place in Syria.

Polygraph reporters are not afraid to endorse criticism of the U.S. when it's accurate. When Russian foreign minister Sergei Lavrov criticized a list of Russian oligarchs that the Treasury Department admitted it cribbed from Forbes magazine, Polygraph labeled his comments, "Partially True."

In January, reporters examined a fur coat shown off on Facebook by Russia's foreign ministry spokeswoman. She said it was a fake, bought at a fair in Russia. Polygraph found that the fair didn't sell any coat — and that the coat may have been a fur from an endangered ocelot.

Polygraph's traffic numbers are usually in the low thousands, but that video got 37,000 views, Fry said.

The audio recordings of the Russian mercenaries were a huge coup, even if the site did not seem to get much credit for the scoop. Fry said a Polygraph journalist in Europe, who did not want to be identified, obtained the tapes from a Kremlin source. He acknowledged that he could not rule out U.S. intelligence involvement in distributing the tapes, but that would also be true if the audio had been obtained by a mainstream journalism organization, he said.

The recordings describe an incident in which a number of Russian mercenaries led a group of pro-Assad fighters in an attack on a U.S. base beginning Feb. 7. The mercenaries were from the Wagner Group, it's been widely reported — co-owned by Russian oligarch Yevgeniy Prigozhin, who is close to Vladimir Putin. Prigozhin is also one of the defendants in the indictment brought by Mueller against Russians accused of illegal election activity.

It was the largest ever attack on U.S. troops in Syria, and it was perhaps the first time in many decades that Russian and American troops fought in open combat. Russian mercenaries were among the hundreds who died as the Americans strafed, bombed and shelled the assault force, Army Brig. Gen. Jonathan Braga told NBC's Richard Engel.

The tapes, Fry said, depicted "people who worked for this Russian paramilitary company who were involved in this attack...It showed they knew they were (counterattacked) by Americans. And it showed that there were people who were killed."

	<p>Interestingly enough, he added, "within days of our story, the Russian government started admitting there had been involvement of the private military company, the Russian company, in that attack."</p> <p>Sometimes it's obvious that Russians are more nimble than the Americans at the information game.</p> <p>On Friday, when the Russian defense ministry accused Britain of faking the chemical attack in Syria, RT was leading its web site with an article highlighting the allegations — making no mention of denunciations from the United Nations and U.S. and British officials.</p> <p>Polygraph, meanwhile, was leading with a story fact-checking a statement from Russian state media that Hitler had become more popular than Harry Potter in Latvia. It made no mention of the bogus Russian allegation against Britain.</p> <p>"We didn't get to that today," Fry said, reached by phone. "I wish I could respond as quickly as what they put out."</p>

<b>HEADLINE</b>	<b>04/14 Europol busts bitcoin laundering ring</b>
<b>SOURCE</b>	<a href="https://interestingengineering.com/europol-busts-bitcoin-drug-money-laundering-ring">https://interestingengineering.com/europol-busts-bitcoin-drug-money-laundering-ring</a>
<b>GIST</b>	<p>In what may now seem like an almost prophetic event, the European Union Agency for Law Enforcement Cooperation (Europol) expressed concerns last February that billions in illegal proceeds were hidden in Europe in crypto-cash. Now, Europol in cooperation with global law enforcement agencies has arrested 11 people involved in a cryptocurrency drug trafficking ring that laundered over €8 million.</p> <p>The operation, named Tulipan Blanca, saw Spain's Guardia Civil, Finnish law enforcement authorities and the US Department of Homeland Security come together to investigate 137 individuals. "As a result of the operation, the Spanish Guardia Civil carried out eight searches and seized several computers, devices, and the equipment used to commit the crimes, such as money bags or money counting machines," Europol said in a statement.</p> <p>The statement explained that drug traffickers contacted the criminal ring to launder money obtained from their illicit activities. The ring proceeded to split the money into small cash amounts deposited into 174 bank accounts.</p> <p>From there, the criminals used credit cards linked to the fraudulent bank accounts to withdraw the illegal proceeds from Columbia. However, realizing that these transactions could be tracked, the criminal group then turned to cryptocurrencies.</p> <p>To cover their tracks, the ring used an unnamed Finnish cryptocurrency exchange to turn their cash into bitcoins and then subsequently further converted the bitcoins into Colombian pesos.</p> <p>"With cryptocurrencies increasingly used to finance and carry out criminal activities, Europol will continue to coordinate across EU Member States and beyond, to effectively respond to this rising threat," Europol's statement said.</p>

<b>HEADLINE</b>	<b>04/14 Targeting tax pros w/fraud returns</b>
<b>SOURCE</b>	<a href="https://www.cnbc.com/2018/04/14/cybercriminals-now-targeting-tax-pros-to-cash-in-on-fraudulent-returns.html">https://www.cnbc.com/2018/04/14/cybercriminals-now-targeting-tax-pros-to-cash-in-on-fraudulent-returns.html</a>
<b>GIST</b>	The deadline to file your taxes is rapidly approaching, but cyber criminals have already been hard at work trying to cash in with fraudulent tax returns.

This tax season, experts say instead of targeting individual tax payers, scam artists are targeting tax professionals.

"One of the challenges that we're seeing this year is that as tax professionals and the I.R.S. have become more and more sophisticated, so too have the adversaries," said Caleb Barlow, IBM Security's vice president of threat intelligence.

Tax fraud is big business for cyber criminals. Last year Internet crimes netted the perpetrators \$445 billion, with tax fraud as a primary focus, according to IBM Security, which monitors cyber crimes.

"We had about 75 tax professionals report that they had been victims of some sort of a tax payer breach. So that unfortunately is a 60 percent increase for the same period of time last year," said Cecilia Barreda, an I.R.S. spokeswoman.

The I.R.S. can recognize if a computer of an individual is filing too many tax returns, and will stop them for likely being fraudulent. But the agency expects tax professionals to file dozens, if not hundreds of tax returns on behalf of their clients.

"If they [cybercriminals] can compromise a tax professional, they get access to two key things. One is the private information of that tax professional's clients that can be used to file tax returns on their behalf," Barlow said.

"And in addition to that, they can use the IP address and the computer of the tax professional to actually do the filing with the I.R.S.," he added.

Here is how the scam works: Cyber criminals target tax professionals with what is known as phishing — spam email that seems legitimate, but contains links or attachments laden with malware.

"The minute that you click on that link, well, then you're owned by the adversary. And what this often means is that they can take control of that system that's normally used by that tax professional," Barlow said.

Once a tax professional's computer is compromised, an attacker can steal the numbers and log-in information they use to file.

"It's an I.P. address we seen before, it's a signature of a computer we seen before. We know it's a tax professional, so they are going be submitting lots of returns," said Barlow.

This year's tax season may be the perfect storm. With a new tax code coming in this year, there has been extra confusion.

"This is kind of a perfect storm where you have a lot of misinformation, a dearth of information, and these new techniques that are being widely used by these criminals looking for compromised computers belonging to tax prep professionals," said Roman Sannikov, the director of European research and analysis for Flashpoint, a cybersecurity company.

He added that "they can use to not only steal information, but also to file these returns in a much more successful way."

**HEADLINE** 04/15 Guarding rail against evolving threats

**SOURCE** <http://www.railjournal.com/index.php/technology/cybersecurity-guarding-rail-against-evolving-threats.html>

## GIST

As the railway seeks to harness the benefits of digitalisation and the Internet of Things, the links between information technology and operational technology become ever-more intertwined. However, these trends are completely redefining the railway security environment as systems become vulnerable to new types of threats. Keith Barrow assesses how the industry is responding to the cybersecurity challenge.

ON May 13 2017, passengers at mainline stations in Germany glanced up at the information screens and saw something unusual. Obscuring the lists of departures and arrivals, a ransomware notice demands a \$US 300 payment in Bitcoin.

The WannaCry virus had infected 450 German Rail (DB) computers, bringing down passenger information systems, ticket machines, and CCTV networks.

This was a very public demonstration of rail's vulnerability to cyberattack, and while the target in this case was the company's business systems, the attack also highlighted the need to secure operational systems against hackers.

Until recently, Industrial Automated Control Systems (IACS) were considered relatively well-insulated against external influence with a high degree of immunity to security threats and attacks. However, the threat landscape has altered significantly in recent years with the proliferation of digital technologies and the increasing interconnectivity between the business and operational functions of companies.

Research by IBM shows cyberattacks on ICAS increased by more than 600% between 2012 and 2014, while according to Dell's 2015 cybersecurity report, attacks on supervisory control and data acquisition (Scada) systems surged from 91,676 in January 2012 to 675,186 in January 2014.

Mr François Hausman, mainline cybersecurity manager for Alstom and leader of Shift<sup>2</sup>Rail's cybersecurity work package, told delegates at Railtech's recent Intelligent Rail Summit in Vienna that the characteristics of railway networks make them a potential cyberattack target. These include:

- distributed architecture - electronic components spread along a section of line or a train
- long lifecycles for equipment
- high level of certification for safety-related systems
- diversity of supply chain and technology, and
- small-medium volume production of components.

Mr Domenico Raguseo, technical sales manager, Europe, for IBM says systems are vulnerable to hackers when there is a high degree of integration between IT and operational technology (OT).

"The railway industry is very secure from a cybersecurity point-of-view - hackers would have a lot of difficulty getting into your systems," he says. "With high standards and tonnes of security control, a hacker needs to invest a lot of time if he wants to create a problem for you. Unfortunately, the good news stops here. The safety-first philosophy of rail - that the train stops to protect the lives of the passengers - is good for hackers, because they don't want to kill people, they want to get money. So it would be fantastic for a hacker to stop a train."

As senior managers seek ever more data on the day-to-day performance of the railway, business and operational systems are increasingly interconnected, and wherever there are interfaces, there are potential points of attack.

Mr Lovan Pushparatnam, head of tramway systems and telecoms with Systra, says any cybersecurity strategy must consider people as well as technology. "The best results are achieved when cybersecurity is treated as part of an overall security policy addressing technical aspects and operational procedures, with continuous assessment and measurement," he says. "It's not about protection, it's about process and preparation, monitoring both your assets and your organisation."

Testing the vulnerability of railway systems to cyberattack is a particular challenge because of the difficulty of simulating attacks under realistic operating conditions. "When we model attack patterns, we

need to understand how it is possible to attack,” Raguseo says. “It’s not easy to do penetration testing in a real environment, so you need to create a test environment. Developing a test environment is complicated for IT - I’d say it’s impossible for a complex environment like rail.”

The European Union (EU) Directive on security of network and information systems (NIS Directive) came into force in August 2016, and is intended to boost the overall level of cybersecurity in member states. The NIS Directive is due to be transposed into the legal systems of the member states by next month and specifically identifies train operators and railway infrastructure managers as entities that could be considered “operators of essential services.” Businesses in this category will be required to implement risk management practices, taking “appropriate and proportional technical and organisational measures to manage the risks posed to the security of networks and information systems which they use in their operations.” Significant cyber attacks must be reported to a “competent national NIS authority.”

All of this leaves railway industry stakeholders with the challenge of securing assets which can have a lifespan of several decades against a threat that is constantly evolving. System architecture is therefore a crucial consideration in safeguarding next-generation rail technologies against attack.

<b>HEADLINE</b>	<b>04/15 Experts warn: Russia cyber warfare</b>
<b>SOURCE</b>	<a href="https://www.standard.co.uk/news/world/syria-news-latest-russia-could-launch-cyber-warfare-within-days-after-usled-military-action-expert-a3814226.html">https://www.standard.co.uk/news/world/syria-news-latest-russia-could-launch-cyber-warfare-within-days-after-usled-military-action-expert-a3814226.html</a>
<b>GIST</b>	<p>Russia could “launch cyber warfare within weeks” in retaliation to US-led airstrikes on Syria bringing down City firms, the UK transport network and the NHS, experts have warned.</p> <p>Theresa May hailed “targeted and limited” action on key sites of Syria’s chemical weapons regime “a success” while Donald Trump branded the offensive “perfectly executed”.</p> <p>But Russia warned of “consequences” following the strike which has left the Prime Minister facing questions over why the decision was not put to a parliamentary vote.</p> <p>Now experts have said the action in retaliation to a suspected chemical attack in Douma a week ago could lead to “cyber warfare”.</p> <p>"I suspect Russia will choose not to respond in military terms. But cyber warfare is highly likely," he says.</p> <p>"It will be an attack on national infrastructure, not just upsetting city firms, but getting inside the transport system, or the health system, or air traffic control. It could affect everyone."</p> <p>Mark Almond, director of the Crisis Research Institute, Oxford agreed that the strikes would spark retaliation and said Britain was most vulnerable to a counter-attack.</p> <p>Despite admitting that the "immediate risk of a wider war" has been avoided for now, he warned that sources of potential conflict are still very much active on the ground in Syria.</p> <p>He wrote in the Sunday Telegraph: "Bad relations could easily encourage a reckless Russian freebooter, prompted and paid by Iran, to try his luck getting revenge on the pockets of US and British forces operating in eastern Syria.</p> <p>"Britain is more exposed to potential revenge attacks, despite only four Tornados taking part in the strikes, because they flew from Akrotiri in Cyprus - so close to Syria and to Lebanon."</p>

<b>HEADLINE</b>	<b>04/15 ‘Operation Parliament’ targets Mideast</b>
-----------------	---

SOURCE	<a href="https://www.forbesmiddleeast.com/en/new-cyberattack-operation-parliament-targets-governments-military-and-intelligence-organizations/">https://www.forbesmiddleeast.com/en/new-cyberattack-operation-parliament-targets-governments-military-and-intelligence-organizations/</a>
GIST	<p>A new potentially geopolitically-motivated cyberattack dubbed Operation Parliament has been targeting governmental departments and large private entities across the Middle East, according to global cybersecurity company Kaspersky Lab.</p> <p>Operation Parliament has so far affected an unknown number of organizations in over 27 countries, mostly in the Middle East and North Africa, including Egypt, Iran, Iraq, Jordan, Kuwait, Lebanon, Morocco, Oman, Palestine, Qatar, Saudi Arabia and the U.A.E. Financial impact of the attack has not been disclosed.</p> <p>In a campaign believed to have been active since 2017, the cybercriminals targeted selected victims through malware disguised as legitimate email attachments. Upon opening the attachments victims unwittingly gave the criminals access to their systems, enabling them to remotely gain control over their devices and mine data, as well as activate tools such as webcams. It is believed that the attackers had previously gained access to large databases of contacts for sensitive organisations and targeted non-trained staff.</p> <p>The criminal group “hid in plain sight” accordingly to Kaspersky Lab. The malware was first discovered during an operation to uncover a phishing scam targeting political figures. At first it appeared to be the work of another group already known to officials. However, under further inspection the encrypted malware was found to be very different to any previous attacks.</p> <p>Victims are known to include parliaments, senates, top state offices and officials, political science scholars, military and intelligence agencies, ministries, media outlets, research centres, election commissions, Olympic organizations and large trading companies. Over 130 individual users have been identified as victims so far. Efforts are now underway by law enforcers to find the group behind the attacks and prevent any further damage.</p> <p>“Operation Parliament is another symptom of the continuously developing tensions in the Middle East and North Africa. We are witnessing higher sophistication and smarter techniques used by attackers and it doesn’t look like they will stop or slow down anytime soon” said Mohamad Amin Hasbini, Senior Security Researcher, Global Research &amp; Analysis Team at Kaspersky Lab.</p>

HEADLINE	<b>04/14 UK considers retaliatory cyberattacks</b>
SOURCE	<a href="https://www.reuters.com/article/us-britain-russia-cyber/uk-could-launch-retaliatory-cyber-attack-on-russia-if-infrastructure-targeted-sunday-times-idUSKBN1HL1BT">https://www.reuters.com/article/us-britain-russia-cyber/uk-could-launch-retaliatory-cyber-attack-on-russia-if-infrastructure-targeted-sunday-times-idUSKBN1HL1BT</a>
GIST	<p>LONDON (Reuters) - Britain would consider launching a cyber attack against Russia in retaliation if Russia targeted British national infrastructure, the Sunday Times reported, citing unnamed security sources.</p> <p>Britain’s relations with Russia are at a historic low, after it blamed Russia for a nerve agent attack on former Russian spy Sergei Skripal and his daughter in England, prompting mass expulsions of diplomats.</p> <p>Russia has denied involvement, and on Saturday also condemned strikes against Syria by Western powers, which Britain took part in.</p> <p>Cyber security has become a focal point of the strained relations. On Thursday, a British spy chief said that his GCHQ agency would “continue to expose Russia’s unacceptable cyber behaviour”, adding there would be increasing demand for its cyber expertise.</p> <p>The Sunday Times also said that British spy officials had been preparing for Russia-backed hackers to release embarrassing information on politicians and other high-profile people since the attack on the Skripals.</p>

<b>HEADLINE</b>	<b>04/13 Yahoo, AOL read, share users' emails</b>
<b>SOURCE</b>	<a href="https://www.cnet.com/news/yahoo-aol-oath-privacy-policy-verizon-emails-messages/">https://www.cnet.com/news/yahoo-aol-oath-privacy-policy-verizon-emails-messages/</a>
<b>GIST</b>	<p>Oath, the media division of Verizon that runs both AOL and Yahoo, is finally unifying the privacy policy of its two giant legacy Internet brands. That means an updated set of privacy terms and policies for hundreds of millions of users. And in an online world where privacy expectations have been radically reshaped in light of Facebook's Cambridge Analytica mess, it's more important than ever to read the fine print on those splash screens.</p> <p>When we logged in to a Yahoo Mail account Friday, we were greeted with the privacy policy you see below (Jason Kint had pointed to the policy earlier on Twitter). In it, Oath notes that it has the right to read your emails, instant messages, posts, photos and even look at your message attachments. And it might share that data with parent company Verizon, too.</p> <p>To be clear, Yahoo's previous privacy policy had already stated that Yahoo "analyzes and stores all communications content, including email content," so the company has previously disclosed that it's been able to scan the contents of your emails, at least. (AOL's legacy privacy policy doesn't say anything like that.)</p> <p>When you dig further into Oath's policy about what it might do with your words, photos, and attachments, the company clarifies that it's utilizing automated systems that help the company with security, research and providing targeted ads -- and that those automated systems should strip out personally identifying information before letting any humans look at your data. But there are no explicit guarantees on that.</p> <p>Notably, Google used to scan its Gmail messages for better ad targeting, though it stopped the practice in June of 2017.</p>

	<p>In other words, emails related to your banking and financial transactions appear to be equally in the crosshairs of Oath's ad targeting engine.</p> <p>There appears to be another big change for Yahoo users, too: Oath's previous mutual arbitration clause and class-action waiver has been updated and extended across the company's services to include Yahoo as well. What it means is if you don't like what the company does with your data, you'll have a hard time suing.</p>
<a href="#">Return to Top</a>	

<b>HEADLINE</b>	<b>04/14 Google loses 'right to be forgotten' case</b>
<b>SOURCE</b>	<a href="https://www.cbsnews.com/news/google-loses-right-to-be-forgotten-legal-case-europe/">https://www.cbsnews.com/news/google-loses-right-to-be-forgotten-legal-case-europe/</a>
<b>GIST</b>	<p>A U.K. court has ruled in favor an unnamed businessman who wanted Google to remove search results of his past conviction history in a landmark "right to be forgotten" case. The search engine had previously refused to delete results about his conviction, BBC News reports.</p> <p>Ten years ago, the businessman was convicted of conspiring to intercept communications. He spent six months in jail. He argued that his conviction was no longer relevant to the public.</p> <p>Google said in a statement Friday it would respect the judge's decision. "We work hard to comply with the right to be forgotten," it said, "but we take great care not to remove search results that are in the public interest."</p> <p>However, Justice Mark Warby rejected a separate claim by a businessman who had committed a more serious crime. More than 10 years ago, the second man was convicted of conspiring to account falsely. He spent four years in jail.</p> <p>Warby said the winning businessman had shown remorse, while the other man continued to "mislead the public."</p> <p>In 2014, the European Court of Justice set legal precedent for the "right to be forgotten" after a Spanish man asked Google to remove results about his financial history. Google said it has removed 800,000 pages from its results over similar requests, but companies can decline to remove information if they believe they are in the public interest.</p>

## Terror Conditions

[Top of page](#)

<b>HEADLINE</b>	<b>04/15 Using social media inspire potential terror</b>
<b>SOURCE</b>	<a href="https://theconversation.com/since-boston-bombing-terrorists-are-using-new-social-media-to-inspire-potential-attackers-94944">https://theconversation.com/since-boston-bombing-terrorists-are-using-new-social-media-to-inspire-potential-attackers-94944</a>
<b>GIST</b>	<p>Five years ago, a deadly attack during the Boston Marathon made America's nightmare come true: the radicalized boy next door.</p> <p>The research my colleagues and I conduct at Georgia State University tracks how terrorist organizations expose people – mostly young men – to radical messages and extreme violence on social media. The goal: changing their worldview and eventually guiding them to act.</p> <p>The Boston Marathon bombing marked the beginning of a new trend that is almost impossible to prevent. Before, individuals would receive guidance and training from terrorist organizations in person. Now, these same groups simply inspire individuals to carry out attacks on their own, for which the group can claim credit if they are successful. We call that "self-radicalizing."</p>

### Radicalization of the boy next door

It remains puzzling to many how Dzhokhar Tsarnaev, a 19-year-old stoner who listened to Jay-Z and watched “The Walking Dead,” could – with his older brother, Tamerlan – killed and injured so many innocent civilians. Authorities at least knew more about Dzhokhar because he was taken alive. His brother died during a police chase.

Courtroom sketch of Boston Marathon bomber Dzhokhar Tsarnaev. Jane Flavell Collins via AP  
Dzhokhar did not fit the profile experts have identified as typical of self-radicalized terrorists – either jihadi (a Muslim Holy warrior) or extreme right-wing versions. They were unlike many terrorists who gravitate to extremist ideologies.

According to researchers Alice Marwick and Becca Lewis, people who are radicalized “may have a hard time finding like-minded friends in their day-to-day lives, or connecting with romantic partners.”

Dzhokhar was described by Rolling Stone magazine, for example, as attractive, popular and a student athlete. He was also flunking courses and lost his financial aid at University of Massachusetts-Dartmouth in the semester leading up to the attack. But that hardly explains why he went on to plan the deaths of potentially hundreds of runners and spectators.

Eventually, prosecutors found copies of Inspire magazine on Dzhokhar’s laptop. The magazine is an English-language online publication that was published by al-Qaida in the Arabian Peninsula. They also found videos of sermons by Anwar al-Awlaki, the American-born firebrand jihadi cleric who was killed in 2011 in Yemen by two U.S. drones. Awlaki’s videos are still circulating on social media years after his death.

The evidence and Dzhokhar’s testimony suggest that the brothers were inspired by propaganda. Both Awlaki’s sermons and Inspire magazine advocate and provide specific “how-to” instructions on mass casualty attacks. Dzhokhar and his brother learned how to make the pressure-cooker bombs from one of the most well-known articles published by the magazine: “How to Build a Bomb in the Kitchen of Your Mom.”

For example, the text explains: “Can I make an effective bomb that causes damage to the enemy from ingredients available in any kitchen in the world? The answer is yes. But before how, we ask why? It is because Allah says ... every Muslim is required to defend his religion and his nation.”

In the five years since the Boston bombing, the number of social media platforms disseminating terrorist propaganda has increased tenfold. And thus, so has the scale and scope of possible future attacks.

### Shift to encrypted platforms

As technology evolves, new online platforms provide avenues for terrorist organizations to share information. Platforms have gone from an open interface model, in which anyone can observe what is occurring, to closed and encrypted platforms in which privacy and security settings are protected. These platforms are not readily accessible nor can they be viewed without already being a member of the chat room or channel. When used by terrorist groups, encrypted platforms are harder to police and monitor.

Telegram is an encrypted application developed by Pavel Durov, the inventor of Russia’s Facebook equivalent, VKontakte. Telegram has all but replaced Twitter and Facebook for jihadi communication. Open platforms like Twitter and Facebook have increasingly policed jihadi content, shut down their sites, and taken down their content within minutes of it being posted.

Social media allows terrorist groups to foster a virtual community and a sense of belonging. Research on radicalization suggests that their methods involve taking advantage of individuals’ feelings of loneliness and alienation. However, this doesn’t explain why well-adjusted, well-integrated individuals who appear to have assimilated into Western society – like the Tsarnaevs – gravitate to violent extremist ideologies.

	<p>Research I've done with colleagues on social media demonstrates that terrorist organizations also deliberately foster a type of addiction to the platform and to its content.</p> <p>They do this by creating a schedule of positive reinforcement that modifies behavior, like gambling or playing slot machines. The result changes every time such that one cannot anticipate the outcome and continues to engage in behavior in hopes of a reward the next time around. Not knowing whether you are on the verge of a big win sustains the individual to continue the behavior (in some cases, gambling), whereas not knowing what type of reward the terrorist platform will offer equally sustains user engagement.</p> <p>This keeps the individual tethered to his or her computer, making certain rewards more valuable, limiting how much time you have to join a group or access material, making access exclusive, and varying content to prevent boredom.</p> <p>Through this process, it is possible that ordinarily well-adjusted individuals can be persuaded to channel everyday feelings of frustration, disappointment or anger into acts of extreme violence.</p> <p>As the Islamic state further recedes and loses even more territory, it is adapting to exist almost entirely digitally. Those who fight terrorism need to understand the difference between individuals who are inspired and those who are directly encouraged to engage in violence. Likewise, terrorism researchers need to understand the role of social media in capturing the imagination of young men and instigating them to perpetrate violence.</p>

<b>HEADLINE</b>	<b>04/16 Extremists hamper polio eradication</b>
<b>SOURCE</b>	<a href="http://abcnews.go.com/Health/wireStory/nigerias-boko-haram-extremists-hamper-polio-eradication-54494701?">http://abcnews.go.com/Health/wireStory/nigerias-boko-haram-extremists-hamper-polio-eradication-54494701?</a>
<b>GIST</b>	<p>Islamic extremists made Imana Alhaji Gana's village in northeastern Nigeria too dangerous for health workers to vaccinate against polio. Now that she and her family have fled to a displacement camp, those workers want to catch her children in time.</p> <p>Here in the camps housing thousands of families seeking safety from the extremists, health teams are going from tent to tent, inoculating youngsters against the disease that withers limbs and disables children for life.</p> <p>At first, Gana is afraid to let the outreach workers vaccinate her baby. Eventually they persuade her that the three-week-old child is not too young for immunization, which can take place as early as the day of birth.</p> <p>The complicated fight against polio is yet another way the Nigeria-based extremist group Boko Haram has disrupted life in the northeast, leaving children vulnerable to an entirely preventable disease.</p> <p>"When such children come to the camps or host communities they become a threat to other children," said Almai Some, the field coordinator in Borno state for the vaccination campaign run by Rotary.</p> <p>Some of the families arriving are from areas where polio vaccinators have not been able to visit for as long as six years.</p> <p>Boko Haram's insurgency began in Maiduguri, Borno state's capital, but its reach has expanded beyond Nigeria's borders to neighboring Niger, Chad and Cameroon. Its violence has proved to be a major setback to the international campaign against polio.</p>

	<p>Nigeria is one of just three countries where polio is endemic and has not been eliminated, along with Pakistan and Afghanistan. The final phase to wipe out polio is "proving to be extraordinarily difficult" because "the poliovirus is surviving despite all the good work and in the face of everything that is being thrown at it," said a WHO-appointed monitoring group at the end of last year.</p> <p>In Nigeria, there is little or no surveillance data in Borno state, and "unless there is a breakthrough to reach those areas in Borno, the entire polio (eradication) program is at risk," said the monitoring group. Nigeria had other outbreaks last year including cholera, hepatitis, monkeypox, Lassa and yellow fevers, showing the challenges to the country's health care system. Globally the campaign to eradicate polio has been faced with outbreaks last year in non-endemic countries like Congo and Syria.</p> <p>Now the WHO says it will be spending \$127 million toward eradicating polio in Nigeria between 2018 and 2019. Rotary's program is helping that effort by targeting some 2.1 million children in 24 accessible local governments. But there are still three areas in Borno state that are not included because of ongoing instability: Kala-Balge, Marte and Abadam. For those unreachable areas, the vaccinators train Nigerian soldiers in how to administer the vaccines.</p> <p>In a few cases, villagers have reported being threatened by Boko Haram fighters to avoid the polio vaccine. And in 2013 a number of vaccinators were attacked and killed by the extremists, leading some of their colleagues to disguise their vaccine carriers or hide them under their hijabs.</p>

<b>HEADLINE</b>	<b>04/15 Turkey: US pastor faces terror trial</b>
<b>SOURCE</b>	<a href="http://abcnews.go.com/International/wireStory/us-pastor-trial-alleged-terror-ties-spying-turkey-54478886?cid=clicksource_76_2_hero_headlines_bsq_hed">http://abcnews.go.com/International/wireStory/us-pastor-trial-alleged-terror-ties-spying-turkey-54478886?cid=clicksource_76_2_hero_headlines_bsq_hed</a>
<b>GIST</b>	<p>An American pastor imprisoned in Turkey is going on trial for alleged terror ties and spying in a case that has increased tensions between Washington and Ankara.</p> <p>Andrew Craig Brunson, a 50-year-old evangelical pastor from North Carolina, is facing up to 35 years in prison on charges of "committing crimes on behalf of terror groups without being a member" and "espionage." The trial begins Monday in western Izmir province.</p> <p>Brunson was arrested in December 2016 for alleged links to both an outlawed Kurdish insurgent group and the network of the U.S.-based Muslim cleric who Turkey blames for a masterminding a failed military coup that year. The cleric, Fethullah Gulen, denies the claim.</p> <p>Brunson, who has lived in Turkey for 23 years, has denied all allegations, saying that he solely worked as a pastor.</p> <p>The Turkish government has clearly linked Brunson's case with its determination to force the U.S. to extradite Gulen — and some see the pastor as a diplomatic pawn.</p> <p>The American Center for Law and Justice, a conservative Christian group in the U.S., has called Brunson a "hostage of the Turkish government." A petition has garnered more than half a million signatures, claiming that the case was putting Christianity on trial.</p> <p>Brunson's lawyer, Ismail Cem Halavurt, told The Associated Press on Sunday he expects the pastor's acquittal, arguing that the "weak" indictment lacked sufficient evidence to make the case hold up in court.</p> <p>American officials have repeatedly requested that Brunson be released — President Donald Trump himself asked Turkish President Recep Tayyip Erdogan to have his government "expeditiously" return the pastor to the U.S.</p>

	But Erdogan fired back at Washington, demanding that the U.S. first return Gulen.

<b>HEADLINE</b>	<b>04/14 Syria: eastern Ghouta 'fully liberated'</b>
<b>SOURCE</b>	<a href="http://abcnews.go.com/International/wireStory/latest-syrian-police-units-enter-town-douma-54464281?cid=clicksource_76_4_article%20roll_articleroll_hed">http://abcnews.go.com/International/wireStory/latest-syrian-police-units-enter-town-douma-54464281?cid=clicksource_76_4_article%20roll_articleroll_hed</a>
<b>GIST</b>	<p>The Syrian army has declared the eastern suburbs of the capital Damascus "fully liberated" after the last group of gunmen left the town of Douma.</p> <p>An army statement read by chief military spokesman Brig. Gen. Ali Mayhoub said Saturday that special units are clearing streets and squares of Douma from mines and explosives planted by rebels.</p> <p>Douma is the largest town of the suburbs known as eastern Ghouta and its capture marks the biggest victory for President Bashar Assad's forces since the conflict began seven years ago.</p> <p>The army said that troops discovered weapons factories, arms depots, tunnels and food storage places.</p> <p>It added that the army is preparing eastern Ghouta for tens of thousands who were displaced over the past two months during a crushing government offensive to retake the area.</p>

<b>HEADLINE</b>	<b>04/14 Boko Haram abductions, killings</b>
<b>SOURCE</b>	<a href="http://abcnews.go.com/International/boko-haram-abducted-1000-children-killed-2000-teachers/story?">http://abcnews.go.com/International/boko-haram-abducted-1000-children-killed-2000-teachers/story?</a>
<b>GIST</b>	<p>Boko Haram has abducted more than 1,000 children in northeast Nigeria since 2013, the United Nations' children's agency announced Friday.</p> <p>The number of children kidnapped by the Nigerian terrorist group includes 276 girls snatched from a boarding school in the northeast town of Chibok on the night of April 14, 2014, four years ago today.</p>

Some of the Chibok schoolgirls managed to escape, while others were later rescued or freed following negotiations. But four years on from that fateful night, more than 100 of them have yet to be returned to their families, according to UNICEF.

"The four-year anniversary of the Chibok abduction reminds us that children in northeastern Nigeria continue to come under attack at a shocking scale," Mohamed Malick Fall, UNICEF representative in Nigeria, said in a statement Friday. "They are consistently targeted and exposed to brutal violence in their homes, schools and public places."

Since Boko Haram launched its insurgency in the northeast region nine years ago, at least 2,295 teachers have been killed and over 1,400 schools have been destroyed. Most of these schools haven't been able to reopen due to extensive damage or ongoing insecurity in the area, according to UNICEF.

Most recently, suspected Boko Haram fighters abducted 110 students from an girls' boarding school in the northeast town of Dapchi in the middle of the night on Feb. 19. More than a month later, 104 of the schoolgirls were freed by their captors following "back-channel efforts and with the help of some friends of the country," according to Segun Adeyemi, spokesman for Nigeria's Ministry of Information and Culture.

The relentless onslaughts show not even children and schools are spared from Boko Haram's wrath -- rather, they are the targets.

The Nigerian jihadist group's uprising was fueled largely through the group's systematic campaign of abducting children and forcing thousands of girls and boys into their ranks, according to a report issued in April 2017 by the United Nations Children's Fund (UNICEF).

<b>HEADLINE</b>	<b>04/14 Egypt: suicide bombers Sinai kill 8</b>
<b>SOURCE</b>	<a href="http://abcnews.go.com/International/wireStory/egypt-troops-killed-15-wounded-sinai-clashes-54465542?">http://abcnews.go.com/International/wireStory/egypt-troops-killed-15-wounded-sinai-clashes-54465542?</a>
<b>GIST</b>	<p>Militants wearing explosive belts blew themselves up as they tried to infiltrate a military base in Egypt's central Sinai, killing eight soldiers and wounding 15 others, the military said on Saturday.</p> <p>The clashes at dawn left 14 militants dead. They were armed with rifles and RPGs, the armed forces said in a statement. The attack comes two months after the launch of a massive operation against militants in Sinai as well as parts of Egypt's Nile Delta and Western Desert, along the porous border with Libya.</p> <p>There was no immediate claim of responsibility for the attack which bore the hallmarks of the extremist Islamic State group, whose local affiliate is spearheading an Islamic insurgency in Egypt's Sinai Peninsula.</p> <p>Egypt has for years been struggling to contain the Islamic insurgency in the turbulent Sinai region. It has carried out military operations there that, it says, have killed hundreds of militants.</p> <p>It has also built a buffer zone along the border with Gaza to curb the flow of militants and weapons through a vast tunnel network. The insurgency, however, has shown no signs of abating.</p>

<b>HEADLINE</b>	<b>04/14 'Warranty void if removed' stickers illegal</b>
<b>SOURCE</b>	<a href="https://www.bleepingcomputer.com/news/government/ftc-warranty-void-if-removed-stickers-are-">https://www.bleepingcomputer.com/news/government/ftc-warranty-void-if-removed-stickers-are-</a>

	<a href="#">illegal/</a>
GIST	<p>The US Federal Trade Commission (FTC) sent letters this week to six major companies containing warnings that using "warranty void if removed" or similarly worded stickers on their products is illegal.</p> <p>The FTC said the six companies sell automobiles, cellular devices, and video gaming systems, all industry verticals where such practices are rampant.</p> <p>But besides the use of anti-tampering "warranty void if removed" stickers, the letters also warn companies against forcing customers into using replacement parts or repair services provided by certain companies for users to keep their warranties intact.</p> <p>In other words, the FTC has officially shown its support for the Right To Repair movement that's been becoming popular in the US and Europe.</p> <p>"Provisions that tie warranty coverage to the use of particular products or services harm both consumers who pay more for them as well as the small businesses who offer competing products and services," said Thomas B. Pahl, Acting Director of the FTC's Bureau of Consumer Protection.</p> <p>Limiting repair options illegal under 1975 US law</p> <p>The FTC says that such practices are illegal under the Magnuson-Moss Warranty Act, a law that governs consumer product warranties, and which states that no company can put restrictions on the way users choose to repair their products.</p> <p>The law says that companies can't force users to use only certain types of (astronomically-priced) replacement parts, take produces for repair jobs only at certain repair shops, or can't plaster anti-tampering stickers on products to prevent users from repairing their own products.</p> <p>Over the past two decades, companies in the US have been ignoring this law and have been locking down products and repair practices, using "warranty voiding" as punishment for those users who make modifications to products or dare to find cheaper or faster ways of repairing products.</p> <p>The FTC says this is illegal. The Commission plans to review the six companies it sent letters to after 30 days and see if they have dropped their current practices, threatening legal action if they did not.</p>

HEADLINE	<b>04/15 Fake gov. letters surface in Clark Co.</b>
SOURCE	<a href="https://www.seattletimes.com/seattle-news/politics/fake-inslee-letter-posted-on-doors-around-clark-county/">https://www.seattletimes.com/seattle-news/politics/fake-inslee-letter-posted-on-doors-around-clark-county/</a>
GIST	<p>VANCOUVER — On Thursday morning, Gary Berreth stepped outside his house and found an unexpected letter attached to his front door.</p> <p>The letter featured the Washington state seal and claimed to be from the Office of the Governor. It warned of "an adjustment in property taxes" due to the shutdown of an oil terminal and an agreement with BNSF Railway to prohibit the shipping of oil, lumber and coal by rail through Vancouver.</p> <p>At the end of the letter was a carefully scrawled signature: "Jay Inslee," Washington's Democratic governor. Copied on the letter were Clark County Assessor Peter Van Nortwick and Treasurer Doug Lasher.</p> <p>"I instantly knew that there is no way the government does business like this," said Berreth, who said he saw the same letter attached to other doors throughout his Green Meadows neighborhood.</p> <p>Berreth was correct in assuming the letter was a hoax.</p>

In an era of growing concerns of fake news spreading online, these apparent dirty tricksters have taken up a more old-fashioned approach to spreading misinformation.

Simon Vila, spokesman for Inslee, confirmed that neither the governor nor his staff were out posting notes to residents' doors.

"This is definitely not from our office," he said.

Vila said the governor's office suspects that whoever is behind the fake notes is also behind a series of strange letters directed to supporters of U.S. Sen. Patty Murray, D-Washington. These letters were typically signed by "Titania," a character from the play, "A Midsummer Night's Dream."

Vila noted that the fonts of both letters are similar.

The letter's reference to "shutting down the oil terminal" is a likely reference to Inslee's decision earlier this year to reject a proposed crude-by-rail terminal at the Port of Vancouver.

The letter's claim that BNSF, which operates a large network of railways, has entered an agreement to end the shipment of oil, lumber and coal by rail through Vancouver is also highly questionable.

Courtney Wallace, director of public affairs for BNSF, said in an email that as "a common carrier, we are obligated by federal law to move all regulated goods."

"I'm just surprised someone took the time to write something like this up," said Van Nortwick, a Republican. He took to Facebook to debunk the letter, although pointed out that not all of it was fake news.

"It's very rare that someone gets my name spelled right," he said

<b>HEADLINE</b>	<b>04/15 Newest threat to Calif. redwoods: pot</b>
<b>SOURCE</b>	<a href="https://www.sfgate.com/news/article/The-newest-threat-to-California-s-redwoods-isn-t-12835952.php">https://www.sfgate.com/news/article/The-newest-threat-to-California-s-redwoods-isn-t-12835952.php</a>
<b>GIST</b>	<p>A new industry is thriving in California. It is green in terms of the money being made and the crop itself. Yet it is anything but that when it comes to the environment, posing horrendous ecological threats to the region's redwood forests.</p> <p>Lindgren Lumber and Humboldt Flakeboard are the newest additions to the Medical Marijuana Innovation Zone, an area in Arcata, California, zoned specifically for marijuana cultivation and processing. As businesses like Humboldt Harvest Wellness and Talking Tree Farms apply for the necessary permits to process cannabis in the former mill complex, it is evident that the cannabis business may restore the economy of redwood country.</p> <p>But this new industry might also undermine the environmental activism that has long fought to preserve the redwoods as a natural resource.</p> <p>Not long ago, activists thought they had won this fight. And they had - until now. They successfully dislodged corporate logging, but the old timber mills are being used to churn out marijuana. Marijuana cultivation subjects North Coast forests to a barrage of environmental assaults: soil erosion, heavy pesticide use, stream diversion, irresponsible grading and land clearing, all of which threaten to lay waste to the redwoods.</p> <p>As marijuana businesses repurpose Arcata's remaining lumber mills, a renewed ecological peril haunts</p>

Humboldt County. Just like timber companies in decades past, marijuana interests are positioning themselves to shape regulations that protect the industry, not the environment. Americans only have to look back a few decades to the activism that saved the redwoods to understand just how high the stakes are.

Precipitating the "timber wars," that activism began when logging companies expanded operations during the post-World War II housing boom. Timber yields exploded between 1940 and 1970, and increased demand led logging companies to clear-cut large swaths of North Coast redwood forest. This practice had broad ramifications. Leveling a patch of forest compromised entire watersheds by eroding soil and increasing siltation in streams, which left forests vulnerable to flooding, landslides and myriad other environmental problems.

Efforts at redwood preservation proved ineffective when protected groves were surrounded by denuded land. Consequently, environmental advocates intensified their push to create an expansive national park in Northern California that would protect the redwoods from the damage caused by clear-cutting.

By 1968, the Redwood National Park Act established a federal park that protected 58,000 acres of forest. Preservationists had originally proposed acquiring 90,000 acres to ensure the ecological stability of the region, but fierce resistance from timber companies forced a compromise. Yet because environmental impacts were not confined by man-drawn property lines, this compromise meant clear-cuts on nearby private property ended up threatening protected redwood stands anyway.

Activists requested the National Park Service exercise its discretionary power to create a buffer zone around sensitive groves. Three separate studies confirmed the grave ecological hazards presented by nearby logging operations.

NPS, though, was new to the area, and hoped to avoid making waves as it worked to integrate itself into the community. As a result, jobs and the local economy trumped ecological health. NPS took an approach that empowered private interests, adopting a utilitarian cost-benefit analysis that overrode preservationist policy.

Increased harvests led to new logging roads, clear-cut sites, stream diversion and, perhaps most shocking, aerial spraying of Agent Orange, a herbicide known to contain carcinogens. Roads and clear-cuts interrupted the ecosystem and directly threatened wildlife habitat. Road-building itself led to erosion and presented dangers for aquatic life. The use of Agent Orange compounded these problems not only by poisoning habitats, but also by destroying the roots and undergrowth that stabilized the forest floor.

Nevertheless, passing legislation to protect additional old growth proved difficult because of the political might of corporations like Maxxam, a multinational conglomerate that muscled its way into Humboldt's timber industry during the redwood wars. Activists spent years fighting to save remaining old-growth redwood stands. Finally, the Clinton administration brokered a deal to preserve sensitive groves.

But the victory was short-lived. Although the timber industry fell, a robust pot industry soon sprouted in its place. This was not the same pot industry once concentrated in small, personal gardens and largely associated with hippies, back-to-the-landers and other counterculture migrants. The growing popularity of pot, along with increasing legalization, has turned marijuana cultivation into big business. And despite its reputation as a liberal bastion, California left regulation to local authorities.

The result is a tangled web of lenient laws. Despite the liberalization of marijuana laws in the state, semi-legal and illegal cultivation persists. Marijuana's illegality elsewhere continues to fuel a robust black market. Intending to sell on this market, pot farmers interested in a cash crop have little incentive to seek permits or comply with regulations. In any case, the odd dichotomy under which marijuana is legal in California, but illegal under federal law, makes it hard to enforce regulations as local officials find themselves at odds with federal agencies.

At best, pot farmers loosely adhere to regulations while they operate in a legal gray area. At worst, inconsistent enforcement encourages illegal cultivation - which poses serious environmental consequences as these grow sites often contain banned pesticides and other toxic contaminants.

And that creates real environmental hazards. According to Rep. Jared Huffman, a Democrat, authorities have removed 8,188 pounds of fertilizer, 104 pounds of rodenticide, 560 gallons of insecticide, 50 gallons of garbage and miles of irrigation line from illegal grow sites on the North Coast.

Perhaps the most detrimental contaminant making its way into the forests is carbofuran, a toxic pesticide banned in the United States. These pesticides leach into streams and other waterways, increasing their deadly reach. Chemical runoff from grow sites poisons swimming holes and has the potential to seep into city water supplies, which is alarming because carbofuran is lethal to humans in small doses. Ecologists have also determined that chemicals are endangering wildlife such as the Pacific fisher and the northern spotted owl.

In addition to the impact from toxins, the water usage demanded by marijuana cultivation does serious ecological harm. A marijuana plant requires around 22.7 liters of water a day. Unregulated cultivation can easily deplete surface water sources as farmers divert streams and springs.

Water isn't the only resource that pot devours. The plants require lots of sun, which encourages farmers to clear grow sites of trees and plants that might compete with cannabis for light. Satellite imaging has revealed the alarming rate at which these clearings are breaking up otherwise continuous forest. And grow sites require access, which means additional land is cleared and improperly graded as rogue farmers build roads.

All of these changes in the land accrue: Forest and other habitat is fragmented, streams are buried, diverted or polluted, and wildlife dies.

These trends are disturbing. California produces 60 to 70 percent of the marijuana consumed in the United States, which means the state is shouldering most of the environmental cost. As one study of the North Coast indicates, the danger from marijuana cultivation is particularly concerning because the "region is a recognized biodiversity hotspot." The redwoods constitute an ecosystem that is unique and rare - and now marijuana cultivation even poses a threat to Redwood National Park.

<b>HEADLINE</b>	<b>04/15 China sends warning to Taiwan, US</b>
<b>SOURCE</b>	<a href="https://www.cnn.com/2018/04/15/asia/taiwan-us-china-xi-jinping-drills-intl/index.html">https://www.cnn.com/2018/04/15/asia/taiwan-us-china-xi-jinping-drills-intl/index.html</a>
<b>GIST</b>	<p>(CNN)Chinese President Xi Jinping has sent a clear message of Beijing's disapproval over growing ties between the United States and Taiwan by ordering live-fire drills in the Taiwan Strait.</p> <p>The drills, to be held this coming Wednesday, will mark the first time the Chinese Navy has held drills with live ammunition in the strait since September 2015, in the lead-up to the self-ruled island's presidential election.</p> <p>Prior to those elections, relations between the two were at a high point after Xi met with then-President Ma Ying-jeou, the first such meeting in history between leaders of the two governments.</p> <p>But since then, tensions between China and the island it views as a breakaway province have become strained under Ma's successor, President Tsai Ing-wen.</p> <p>The new Trump administration has sought closer ties to President Tsai's government, angering Beijing by signing two deals in the past month to tighten ties with the island, including a travel act which will allow more official visits between the US and Taipei.</p>

"(China) wants to highlight that the Chinese navy is ever ready and secondly, it is a signal to the government in Taipei you better not go further," Collin Koh, research fellow at the S. Rajaratnam School of International Studies' Maritime Security Program, told CNN.

The planned live-fire exercises follow a massive show of force by the PLA Navy on April 10 and 11, which conducted the country's largest military drills ever in the South China Sea.

Chinese President Xi personally reviewed the troops himself from the deck of the Chinese destroyer Changsha on Thursday, speaking to the troops about the need for the navy to become "world-class."

Responding to the news of the upcoming live-fire drills, the Taiwanese Defense Military said in a statement the drills were taking place in a routine military zone and reiterated their national army could protect the country from any threat.

"Our people please rest assured," the statement said.

<b>HEADLINE</b>	<b>04/15 FDA pulls concentrated caffeine</b>
<b>SOURCE</b>	<a href="https://www.nbcnews.com/health/health-news/fda-acts-pull-concentrated-caffeine-market-n865716">https://www.nbcnews.com/health/health-news/fda-acts-pull-concentrated-caffeine-market-n865716</a>
<b>GIST</b>	<p>Bulk caffeine products may have killed at least two people and they don't belong on the market, the Food and Drug Administration said Friday.</p> <p>The FDA declared concentrated, bulk caffeine products illegal and said it would act to get them off the shelves.</p> <p>"These products present a significant public health threat because of the high risk that they will be erroneously used at excessive, potentially dangerous doses," the FDA said in a statement.</p> <p>"Highly concentrated and pure caffeine, often sold in bulk packages, have been linked to at least two deaths in otherwise healthy individuals."</p> <p>The FDA has been warning about powdered caffeine since 2014, when an Ohio teenager died after using it. It's also specifically asked sellers to stop providing it directly to consumers.</p> <p>"Despite multiple actions against these products in the past, we've seen a continued trend of products containing highly concentrated or pure caffeine being marketed directly to consumers as dietary supplements and sold in bulk quantities, with up to thousands of recommended servings per container," FDA Commissioner Dr. Scott Gottlieb said in a statement.</p> <p>"We know these products are sometimes being used in potentially dangerous ways. For example, teenagers, for a perceived energy kick, sometimes mix dangerously high amounts of super-concentrated caffeine into workout cocktails."</p> <p>It would be easy to get a dangerous dose, the FDA said.</p> <p>"A half cup of a highly concentrated liquid caffeine can contain approximately 2,000 mg of caffeine and just a single teaspoon of a powdered pure caffeine product can contain approximately 3,200 mg of caffeine. This is equivalent to about 20 to 28 cups of coffee, a potentially toxic dose of caffeine," the agency said.</p> <p>"Regardless of whether the product contains a warning label, such products present a significant and unreasonable risk of illness or injury to the consumer," the FDA added.</p> <p>Too much caffeine can cause fatal heartbeat irregularities.</p>

The FDA's action does not include energy drinks or energy products that contain caffeine, or supplements. "Moreover, this guidance does not affect other types of products that might also contain caffeine, such as prescription or over-the-counter drugs or conventional foods, like traditionally caffeinated beverages," it said.

But the bulk products can easily confuse people, who may accidentally overdose on them.

<b>HEADLINE</b>	<b>04/14 MBTA rail safety system off track</b>
<b>SOURCE</b>	<a href="http://www.bostonglobe.com/metro/2018/04/14/who-driving-your-commuter-train-likely-someone-with-wreck-record/sLRyEIPMFvZqDoe6Je8YFI/story.html">http://www.bostonglobe.com/metro/2018/04/14/who-driving-your-commuter-train-likely-someone-with-wreck-record/sLRyEIPMFvZqDoe6Je8YFI/story.html</a>
<b>GIST</b>	<p>Dean Walker's license has been suspended 39 times for everything from driving to endanger to refusing a breathalyzer test. He's been caught speeding 16 times and convicted of drunken driving twice.</p> <p>To fellow motorists, he's a hazard.</p> <p>To the Registry of Motor Vehicles, he's a chronic offender. But to Keolis, the MBTA's commuter rail operator, Walker is something else entirely — an engineer.</p> <p>Despite his appalling driving history, Walker is entrusted with operating six-car trains, at speeds averaging 60 miles per hour, carrying hundreds of commuters to and from the city.</p> <p>Robert Ronquillo III, son of the chief justice of the Boston Municipal Court, was also penalized multiple times for safety violations on the job.</p> <p>And he has plenty of company among his peers. About 110 commuter rail engineers, more than half of them, have driving records that experts described as poor considering the sensitive line of work they're in — at least three infractions such as speeding, causing accidents, and failing to stop.</p> <p>Nearly 50 engineers have had their driver's licenses suspended — 44 of them more than once, according to Registry of Motor Vehicle records reviewed by the Globe.</p> <p>The engineers' supervisors don't set much of an example, either. Manager of engineer training Shawn Monahan, who teaches aspiring engineers what they need to know before they can operate a train, has received 11 speeding tickets and caused two accidents.</p> <p>Keolis's head engineer, Mark Neverett, has 13 speeding tickets, eight accidents, and an operating under the influence on his driving record, though he's had no recorded offenses since 2010.</p> <p>The records obtained by the Globe, which span decades, raise serious concerns about safety on the commuter rail, experts say. Train operators aren't required to have a driver's license, and driving a 144-ton locomotive on fixed tracks is a very different discipline than driving a car. But a history of recklessness on the roads makes it much more likely someone will be reckless on the rails, they say.</p> <p>"Someone who is known to have engaged in multiple incidents of risky and illegal behavior with an automobile should not be permitted to operate a train," said David Hughes, the former chief engineer and acting CEO of Amtrak. "Locomotive engineers aren't allowed mistakes on the job."</p> <p>Many of the engineers with poor driving records have, records show, also faced discipline on the railway — ranging from counseling to suspension — for such on-the-job infractions as running a stop signal, failing drug tests, or causing derailments.</p>

But perhaps the harshest penalty was reserved for the Keolis executive who sounded the alarm about the number of engineers with dismal driving records.

Robert T. McCarthy, the vice president of safety, was dismissed after he warned the company about the potential risks in employing engineers with problematic personal driving histories, according to documents obtained by the Globe.

McCarthy left Keolis last fall, just a year and a half after the company heralded his arrival from the Southern California Regional Rail Authority, where he served as deputy chief operating officer.

Before leaving, McCarthy sent an audit to Keolis's general manager raising a host of safety concerns, including the engineers' driving records. He concluded: "If there were a catastrophic incident, Keolis would be scrutinized and would not fare well in a [federal] investigation."

Keolis, which has operated the commuter rail system for the MBTA since July 2014, said Friday that "nothing is more important" than safety.

Spokesman Tory Mazzola said the company has invested \$15 million into improving safety systems, including a new training simulator and safety technology for engineers. Mazzola noted that its engineer supervisors are "valuable, hard-working employees with excellent work records" and their personal driving records have "absolutely no bearing" on their job performance.

Keolis said it inherited most of its workforce from the Massachusetts Bay Commuter Railroad Company, which ran the system from 2003 to mid-2014, and Amtrak, which ran the system before then. Keolis promised in its bid for the contract to review the qualifications of its workforce. Mazzola said Keolis relied on the employee certification and background checks performed by the prior rail system operators.

Keolis and MBCR officials both have said that commuter rail management is hamstrung by federal rules that allow a railroad to look at an engineer's driving record only for the three-year period prior to certifying him or her as fit for the job. Also, the railroad cannot consider speeding violations, only drunken driving convictions and related license suspensions. And even enforcing that standard is hard; the Brotherhood of Locomotive Engineers and Trainmen union fights the company whenever it seeks to impose discipline on one of its members, they said.

Keolis officials have faced questions about the company's engineers since the Globe reported in February that engineer Roberto Ronquillo III had 10 license suspensions and multiple stops for drunken driving on his record. At the time, Keolis and MBCR officials suggested Ronquillo, the son of a Boston judge, was an anomaly whose driving record was somehow missed during the vetting process.

Newly obtained internal documents suggest otherwise. Commuter rail officials pulled his driving record in 2011 when he was training to be an engineer. MBCR required Ronquillo to undergo enhanced drug and alcohol testing as a condition of getting the new job.

But the broader Globe review found that Ronquillo's alarming driving record barely stands out among commuter rail engineers, who earn around \$100,000 a year.

Among them: Veteran engineer Richard Russell who chalked up 13 speeding tickets, got into three accidents, and had his license suspended 14 times.

And Alcino Fernandes, who ran up 16 speeding tickets, caused 11 accidents, and received four citations for passing a school bus, records show. He is not currently operating a train, according to Keolis officials, and is awaiting a disciplinary hearing. Officials would not provide details.

Fernandes, the only engineer who responded to a Globe request for comment, said that most of his violations were "well over 10 or 20 years ago." However, records show he was caught speeding in 2010 and committed a "state highway violation" in 2015.

“All that stuff took place long before I started with the railroad,” said Fernandes, 51. “I was a young kid when all that ridiculous stuff happened.”

As a group, the system’s engineers racked up a staggering number of violations, including more than 200 license suspensions, according to the Massachusetts Registry of Motor Vehicles. Besides motor vehicle infractions, drivers can lose their license for failing to pay fees or fines.

Eighty-five engineers received more than two speeding tickets. Six have been declared habitual traffic offenders. And more than 85 percent of the engineers have at least one driving infraction.

Hughes, who led national rail operator Amtrak, said locomotive engineers, like other transportation professionals, should have pristine driving records.

“In the trucking industry, you can’t drive a truck if you don’t have a clean record,” said Hughes. “Same with taxi industry. To have 80 percent of your engineers with an operating infraction is appalling. . . . I would imagine you might find 10 percent, maybe.”

In the Massachusetts’ commuter rail system, the opposite is true — fewer than 10 percent had no driving citations and no incidents of discipline.

“Yes, those are by far, the worst engineer records I’ve ever seen in decades of railroading,” said another expert, who asked to remain anonymous because he works for another railroad and fears retaliation.

Inside Keolis, executives had been warned about the problems in their corps of engineers.

In the preliminary safety audit submitted to the Keolis general manager, David Scorey, in November, McCarthy, then the executive in charge of safety, pointed out that motor vehicle regulators had identified many of the company’s engineers as “habitual offenders” because of repeated speeding violations on their personal driving records.

Even so, McCarthy wrote, the company has not decertified — that is, declared unfit for service — any engineers for speeding on the rails during the history of the Keolis contract.

“This is highly suspicious given the propensity of our employees to speed [on the job],” he wrote.

Excessive speed has been the cause of several fatal railroad accidents across the country, including a 2013 crash in the Bronx that killed four and injured 61 and a crash in Philadelphia in 2015 that killed eight and injured more than 200.

About 100,000 people ride Keolis’s commuter rail system each day, completely in the dark about the driving history of the engineer behind the controls.

“I can’t talk now, I’m too shocked,” commuter Mary Connaughton said after hearing a description of some of the engineers’ driving records.

“What’s it going to take, a train wreck for Keolis and the T to get ahead of this and put public safety first?” asked Connaughton — a former Massachusetts Turnpike Authority board member — when she later called back.

While Keolis and MBCR have reported few major incidents, records show at least 80 engineers have committed serious infractions while on the job — safety violations that include failing alcohol or drug tests, running stop signals, and causing derailments, records show.

While the company insists that safety is its top priority, the Federal Railroad Administration and the MBTA itself have raised concerns about its compliance with federal safety rules and the terms of its

contract with the T.

The FRA, which regulates railroads, has fined Keolis some \$350,000 for violations that include leaving trains unsecured, operating moving trains with a door or doors open, and failing to conduct all engineer performance testing required under federal law, records show.

Joe Pesaturo, spokesman for the Massachusetts Bay Transportation Authority, said the agency “steadfastly holds” the commuter rail contractor accountable for providing safe and reliable service.

“Because safety is of paramount importance, the MBTA closely monitors the contract under which Keolis manages a qualified workforce that is in full compliance with all Federal Railroad Administration regulations,” Pesaturo said in a statement. “The commuter rail operator has demonstrated its strong commitment to safety through significant investments in equipment, training, and personnel.”

Some suspect that Keolis may feel financial pressure to keep engineers on the job even when they have problems at work.

Under its operators agreement with the MBTA, the company is penalized when a train is late or canceled. If an engineer is removed from service, the on-time performance may suffer.

A longtime issue

Experts say the problems with the commuter rail and its workforce go way back — before Keolis took over the \$2.7 billion contract in 2014.

Upon taking over the rail operation, Keolis, a French company, had just a few months to decide whom to retain from its inherited workforce, officials from both companies said.

And once hired or retained, employees are rarely, if ever, terminated — regardless of their personal history or work record.

Experts say that if a railroad wanted to impose order and discipline, it could refuse to promote an employee with a poor driving record, or could subject such a driver to increased testing. In extreme cases, the railroad could fire the employee for conduct unbecoming an employee under a clause in the company’s contract with the MBTA.

Governor Charlie Baker has repeatedly expressed dissatisfaction with Keolis’s performance, and transportation officials have said they will not automatically extend the company’s contract when it expires in June 2022.

David Gunn, the former chief executive of Amtrak, which once operated the Massachusetts commuter rail system, said the large number of engineers with bad driving records points to a deep problem.

“You really need to change the culture of the place,” said Gunn, who also ran transit agencies in New York, Washington, D.C., Philadelphia, and Toronto. Of all the places he worked, Gunn said, “the T was the most challenging in terms of controlling the workforce. Not that they were all bad people, but the structure and the union and political meddling in management decision-making was the absolute worst at the T.”

HEADLINE	<b>04/14 Oregon state pension: \$76K per month</b>
SOURCE	<a href="https://www.nytimes.com/2018/04/14/business/pension-finance-oregon.html">https://www.nytimes.com/2018/04/14/business/pension-finance-oregon.html</a>
GIST	A public university president in Oregon gives new meaning to the idea of a pensioner.

Joseph Robertson, an eye surgeon who retired as head of the Oregon Health & Science University last fall, receives the state's largest government pension.

It is \$76,111.

Per month.

That is considerably more than the average Oregon family earns in a year.

Oregon — like many other states and cities, including New Jersey, Kentucky and Connecticut — is caught in a fiscal squeeze of its own making. Its economy is growing, but the cost of its state-run pension system is growing faster. More government workers are retiring, including more than 2,000, like Dr. Robertson, who get pensions exceeding \$100,000 a year.

The state is not the most profligate pension payer in America, but its spiraling costs are notable in part because Oregon enjoys a reputation for fiscal discipline. Its experience shows how faulty financial decisions by states can eventually swamp local communities.

Oregon's costs are inflated by the way in which it calculates pension benefits for public employees. Some of the pensions include income that employees earned on the side. Other retirees benefit from long-ago stock market rallies that inflated the current value of their payouts.

For example, the pension for Mike Bellotti, the University of Oregon's head football coach from 1995 to 2008, includes not just his salary but also money from licensing deals and endorsements that the Ducks' athletic program generated. Mr. Bellotti's pension is more than \$46,000 a month.

The bill is borne by taxpayers. Oregon's Public Employees Retirement System has told cities, counties, school districts and other local entities to contribute more to keep the system afloat. They can neither negotiate nor raise local taxes fast enough to keep up. As a result, pensions are crowding out other spending. Essential services are slashed.

"You get to the point where you can no longer do more with less — you just have to do less with less," said Nathan Cherpeski, the manager of Klamath Falls, a city of about 21,000 in south-central Oregon.

Klamath Falls's most recent biennial bill from the pension system, known as PERS, was \$600,000 more than the one before. PERS has warned that the bills will keep rising. Mr. Cherpeski has had to cut back on repairing streets and bridges.

Even as the American economy is humming, many states and cities are still hurting from the 2008 financial meltdown. The crash hammered their pension funds and tax revenues, but didn't reduce the amounts they owe retirees.

It wasn't until 2016 that average state tax collections returned to pre-2008 levels. In the meantime, states and cities have had to rebuild pension funds to cover the rising numbers of retirees drawing benefits. That has left less money for the police, school sports programs and everything else. Local residents might not know why, but they are paying more taxes and getting scantier services in return.

Costs are rising even in places that previously acted to defuse the problem. Colorado trimmed pensions in 2010, but a new \$32 billion shortfall means more pension cuts and tax increases are likely. Detroit sliced its pension obligations in bankruptcy and persuaded philanthropists to chip in, but it is not clear that the city has an affordable plan.

In San Francisco, the school board wants voters to approve a \$298 "parcel tax" on real estate, ostensibly to raise \$50 million to pay teachers a living wage.

"That's a worthy objective, but it's not the real reason," said David Crane, a former trustee of the

California teachers' pension system. He said the school district's retirement costs had grown by \$50 million over the last five years, devouring resources that would have gone to teachers.

Oregon is a blue state, but in its restive red hinterlands, tax increases are politically off limits and financial distress has been severe since 1994, when logging was curtailed to save an endangered owl. Lately, things have been getting even worse.

When a man was reported yelling and firing his gun on the property of a school in rural Josephine County, it took two hours for a sheriff's deputy to arrive, said Kate Dwyer, chairwoman of the board for the Three Rivers School District.

The county has cut sheriff patrols, closed its mental health department and kept its jail at less than half capacity because of a lack of guards.

Dave Valenzuela, the Three Rivers school superintendent, traces the latest woes directly to PERS. The system is run at the state level, but it is bankrolled in large part by obligatory contributions from local governments.

This year, Three Rivers was poised to receive its first increase in state education funding in years, a reflection of growing enrollment. But Oregon raised by more than 50 percent the amount that Three Rivers had to contribute to PERS. So Mr. Valenzuela had to lop five days off the school year, ask each school to cut its budget by 10 percent and lay off the district librarian and English specialist.

PERS sets the pension bill for each entity — local government, university system and the like — based on the pay and demographics of its workers. Just about everyone's bills are getting bigger.

That includes the state, by far the system's biggest contributor.

Oregon now has fewer police officers than in 1970, is losing foster-care workers at an alarming rate and has allowed earthquake and tsunami preparations to lapse. A 2016 survey turned up "a large number of bridges with critical and near-critical conditions" because of "longstanding inadequate funding."

Even prosperous communities are being pinched. The Beaverton School District, outside Portland, had to get rid of 75 teachers last year when its mandatory pension contribution rose by \$14 million. That was after shedding 340 teachers in 2012.

"I have town hall meetings, and the parents are just confounded by this," said Mark Hass, a Democratic state senator from Beaverton.

#### A Golden Touch

Oregon's unusual method for calculating pensions tends to generate lavish payouts.

For decades, PERS calculated pensions two different ways, and retirees could choose whichever produced the bigger numbers.

The first way was similar to what most states do, basing pensions on each worker's final salary and years of service. But Oregon's lawmakers included a golden touch, redefining "salary" to include remuneration from any source.

That was how Mr. Bellotti, the former football coach, came to be the state's third-highest-paid pensioner, at roughly \$559,000 a year.

Mike Bellotti in 2007, when he was the University of Oregon's head football coach. After retiring as the university's athletic director in 2010, he started drawing the biggest government pension in the state. Since then, two other retirees have surpassed him. Credit Chris Pietsch/The Register-Guard, via Associated Press

When he retired in 2010 as the university's athletic director, the standard pension formula was applied to his salary, plus a share of the outside licensing fees and product endorsements the football program brings in. (His pension details, along with those of other retirees in the system, were first obtained in 2011 from PERS by two newspapers, The Oregonian and The Statesman Journal.)

Mr. Bellotti said he never asked for a supersize pension. In 1995, he said, the university started to include a percentage of all endorsement and licensing fees in coaches' salaries.

"It was basically to augment the university's ability to pay a competitive salary to its coaching staff," he said.

When Mr. Bellotti retired, he was partway through a five-year, \$1.9 million-a-year contract, which he said was still below the league average of about \$3 million.

PERS made up for it with a big pension. "It was pay later as opposed to paying now," he said.

Dr. Robertson, the former Oregon Health & Science University president, said he had retired and started drawing his pension last fall, after learning he had multiple sclerosis. He said he agreed to stay on through the end of the academic year, without pay, "for the sake of continuity."

A spokeswoman for the medical center said Dr. Robertson's pension was based on his salary, incentive payments, clinical pay and unused sick or vacation time.

Oregon's second way of calculating pensions dates back to 1946: For decades, every public worker got a simulated tracking account. It was credited with 6 percent of each paycheck, then left to compound at a predetermined rate.

In the early years, a low rate was used because the pension system invested in bonds that didn't yield much.

But in the 1970s, lawmakers started nudging the rate up, eventually to 8 percent. Then, the system's trustees decided 8 percent should be a guaranteed minimum. In years when markets produced higher returns, the accounts compounded at those rates, after money-management fees. During the 1990s bull market, accounts compounded by up to 21 percent a year.

When workers retired, their employers were required to "match" the account balances, doubling them. Then PERS would base the pensions on the total.

'Planet Tiffany'

Randall Pozdena, an economist who supervised the pension system's investments in the 1990s, gave speeches warning that the situation was unsustainable.

"The only way you're going to get out of this is if the state is hit by a golden asteroid from Planet Tiffany," he recalled saying.

But efforts to change the system, including a 1994 ballot initiative, were blocked by the State Supreme Court, which ruled that accruals could not be reduced during any public worker's career.

So, when lawmakers required government retirees to pay Oregon's 9 percent income tax, as everybody else did, they also increased pensions by 9.89 percent, giving retirees extra money to pay the tax with.

"It's an affront to everybody who pays taxes," said Bruce Dennis, a retired carpenter from outside Portland who earned a \$54,000-a-year pension by swinging a hammer for 45 years. No one gives him extra money to cover his taxes.

Students at Evergreen and other schools in the Three Rivers district, which covers a thinly populated area larger than Rhode Island, spend hours on buses every day. The district has asked Oregon officials to help cover its transportation costs, so far in vain. Credit Leah Nash for The New York Times

“At every step of the way, they’ve made decisions that went against the interests of the public,” he said.

Starting in 2003, the tracking accounts were phased out. But workers who already had the accounts were allowed to keep them. New hires got a more modest retirement plan.

“The cost of this pension system is not caused by the people we are hiring today,” said Steven Rodeman, executive director of the Public Employees Retirement System. “This is a legacy problem from the 1980s and 1990s.”

For workers with the tracking accounts, PERS dialed back the annual returns to 8 percent, then to 7.5 percent in 2016. That is still more than what PERS’s investments have generated over the last decade. And so the pension fund’s financial hole continues to deepen.

Across Oregon, local officials have been told to brace for 15 to 20 more years of rising pension bills. That’s when the current generation of retirees will start dying out.

“All we can do is wait,” said Jay Meredith, finance director of Grants Pass, the seat of Josephine County.

In the meantime, mounting pension costs mean that a generation of schoolchildren is growing up in the area with no theater program, no orchestra, no wood shop and minimal sports, chorus and art.

That’s if they can get to school.

A county road recently washed out, stranding 300 people. Ms. Dwyer, of the Three Rivers School District, reported the problem to a public-works official.

She recalled his response: “I have trucks, but I can’t put gas in them to come to you and dig it out.”

<b>HEADLINE</b>	<b>04/13 Homeless tent blocks school entry</b>
<b>SOURCE</b>	<a href="http://mynorthwest.com/953514/tent-whitman-middle-school/">http://mynorthwest.com/953514/tent-whitman-middle-school/</a>
<b>GIST</b>	<p>KIRO 7’s Gary Horcher first reported that a tent belonging to a homeless person has been sitting on the grounds of Ballard’s Whitman Middle School since Tuesday. Little has been done about it.</p> <p>Whitman Middle School parent Erika Nagy told KIRO Radio’s Dori Monson that the tent sits inside a doorway of the school “literally on school property,” along with drug paraphernalia and other debris.</p> <p>“If there was a fire in the building, if school was happening today, the kids would not be able to get out of that doorway due to this tent,” she said.</p> <p>Whitman Middle School</p> <p>The tent’s occupier left the scene before the Seattle Police Department showed up on Friday, but Nagy said that she has no doubt the person will return. Whitman is currently on spring break, but classes will resume on Monday.</p> <p>According to Nagy, this is not the first time something like this has happened in Ballard. She blames city leadership for letting the homeless problem get out of control to the extent of a tent being set up on the property of a school.</p> <p>“Common sense has absolutely flown out the window,” she said.</p> <p>Nagy said that during a Wednesday evening public meeting with Seattle City Councilmember Mike O’Brien, who represents the Ballard area, O’Brien stressed that more money needed to be spent on the issue. Nagy, however, pointed out that Seattle is already spending more money per homeless person than any other city in the nation.</p> <p>“We are throwing hundreds of millions, almost a billion dollars, at this problem, and it has only gotten worse,” she said. “There is absolutely no accountability with any of our representatives ... Mike O’Brien is absolutely not representing Ballard residents whatsoever.”</p> <p>Elsewhere in Ballard</p> <p>The coming Whittier Heights tiny house encampment is a prime example of the city’s lack of consideration for its residents, Nagy said. The encampment, which allows drug and alcohol consumption, will bring drug use and prostitution within blocks of three Ballard schools, she argued.</p> <p>“For LIHI (the Low-Income Housing Institute) and SHARE (the Seattle Housing and Resource Effort), this is a cash cow,” Nagy said. “There’s no incentive for them to make it better, because the money goes away.”</p> <p>The tiny house encampment is being forced on the Whittier Heights neighborhood “with absolutely no community input whatsoever,” Nagy said.</p> <p>“How is this getting any better, and why is the only solution that Mike O’Brien can put forward more money?” she asked.</p>

<b>GIST</b>	<p>It began with an online video. Andrew Walker had watched as a collector of radioactive objects showed off the items he had procured over the years, such as antiques containing uranium. Walker thought that looking for such pieces 'in the wild' might make an interesting and unusual hobby – so he bought himself a Geiger counter.</p> <p>He quickly realised, as scientists will tell you, that radioactivity is everywhere. The first elevated reading he got was in the parking area at a Mexican fast-food restaurant in Idaho. "I noticed that when we pulled in there, my Geiger counter was going off," he recalls. Something nearby was flinging out the tiny subatomic particles that make up radiation in slightly higher quantities than might be expected – and though he</p>

couldn't figure out what it was, Walker was suddenly aware of this otherwise invisible activity.

After that, he began looking for other intriguing examples.

His pursuit of radioactive objects is still a hobby. By day, Walker is a cinema projectionist and a filmmaker, not a scientist. But he enjoys sharing some of his finds on Twitter and Instagram, where he can discuss them with others who are similarly curious.

Radioactivity is something we live with constantly – it's always there in relatively small amounts. Around the world, naturally occurring, higher-than-average levels of radioactivity are found in various types of beaches and soils, among other places. Meanwhile, most concrete is radioactive, though levels obviously vary. In the US, it is possible to get your home tested for radon gas – which is produced slowly over time by radioactive construction materials. Even the human body is slightly radioactive because we contain elements like potassium-40, which decay.

Walker lives in Bozeman, Montana. He later discovered a curious historical fact: slag containing small amounts of uranium and radium was used in the past for concrete used in construction in his neighbouring state of Idaho. He wonders whether this led to his readings outside the Mexican restaurant.

Walker likes to plan trips to local areas where he thinks he might find interesting material. If he does, he then documents his discoveries. There are plenty of old uranium mines (and now deserted uranium mining towns) in the US and Walker has visited some of these on his travels.

He also began frequenting antique malls. "At every antique shop I have ever gone to so far, I have always been able to find something radioactive," he says.

These items include "Vaseline" glassware, which contains uranium and is a striking yellow-green in colour. But he's also found orange-red plates and bowls that were coloured with a uranium-based dye and which often produce even stronger readings. The US government guidelines advise against using such crockery for food or drink, though the health risk of simply owning these items is negligible.

Then there are watch and clock faces with glow-in-the-dark paint that contains radium. Such objects are relatively safe as long as they are not taken apart, but the women who made them in factories would often hold their paint brushes using their lips. This caused them to ingest small amounts of the radium paint. As a result, many developed serious illnesses including bone cancer in their jaws.

This is why Walker tries not to put himself at any unnecessary risk. Regarding his mildly radioactive crockery, he says, "If they weren't radioactive I'd probably have them out, but they're tucked away."

Still, his new hobby has intrigued friends and family. "They ask why am I going to these places and exploring this stuff," he explains with a laugh. "It's something I'm interested in; it's just fascinating."

He's even found a few local landmarks, including public buildings like train stations, where the tiles produce slightly elevated levels of radioactivity – again, presumably a result of having been made with particular dyes or glazes.

What is radiation?

Radiation is essentially energy. The radiation detected by Geiger counters concerns energy released by decaying atoms – atoms that are constantly expelling a barrage of tiny particles. Some of this radiation can dislodge electrons from other atoms to create charged particles – this is known as 'ionising radiation'. Three key forms of ionising radiation, from largest to smallest, are:

Alpha – A bundle of two protons and two neutrons

Beta – An electron, or positron, which is like a positively charged electron

Gamma – Tiny photons, which at different wavelengths also make up visible light

Radioactive elements that decay producing these forms of radiation include uranium and radium. Alpha particles can be stopped with a sheet of paper, or the outer layer of human skin. But gamma rays can penetrate much further and are often only blocked by very dense materials such as lead.

Geiger counters are easy to make – so much so, in fact, that some hobbyists assemble their own and experiment with finding sources of radioactivity with which to test them. Walker himself bought one for \$1,300 (£930), a RadEye meter that detects alpha, beta and gamma radiation (see box, “What is radiation?”).

Radiochemist Nick Evans at Nottingham Trent University points out that radioactivity can be measured in a variety of different ways. One approach is to observe the rate of nuclei decaying over time; the international unit used for this is the Becquerel. But people may be more familiar with measurements in Sieverts (or indeed Microsieverts or Millisieverts).

This is the effective dose of the radiation and the unit Walker uses. However, Evans says that the standard way of taking these readings is actually to hold the Geiger counter one metre away from the source so that objects’ radioactivity can be compared accurately.

### High energy

The fascinating thing about Walker’s expeditions is the ease with which he has found so many examples. Evans says this is partly a legacy of industries that treated radioactivity as a potential marketing ploy in the decades following its discovery in the late 19th Century. It was quickly capitalised on as a potential selling point for weird and wonderful new products.

“It was very, very different to anything else,” says Evans. “It was sort of mystical and people obviously wanted to try all sorts of things with it, play with it, if you like.”

Some of the things manufacturers came up with are mind-boggling today. Take radioactive suppositories, for example, a ‘treatment’ with no actual grounding in medical science. Surely there are safer ways to restore “your normal manly vigour”.

But that wasn’t the only health-related product seeking to help patients to a dose of decaying atoms. There was also radioactive toothpaste and even condoms.

“I’ve no idea what the thinking behind those was,” says Evans of the latter. “I have a tin of them – not that I use them, I hasten to add.”

The notion that increased doses of radioactivity could somehow be good for you is still with us today. There is a spa in the Austrian Alps called Bad Gastein where people can visit the humid tunnels of a former gold mine and sweat away their ailments – while breathing radon gas.

Many scientists have long bemoaned the public’s instinctive distrust of anything to do with radiation. Anxiety associated with it is exaggerated, argue some. Indeed, dangers like pollution don’t spark the same sense of trepidation and yet pollution kills millions of people every year. One study found that, in stark contrast, only 190 people died between 1980 and 2013 as a direct result of overexposure.

Walker says that many fears increasingly seem “irrational” to him thanks to his explorations. On the other hand, of course, his treks and antique shop visits really just show off how ubiquitous radioactivity really is.

SOURCE	<a href="https://www.nytimes.com/2018/04/13/science/virosphere-evolution.html">https://www.nytimes.com/2018/04/13/science/virosphere-evolution.html</a>
GIST	<p>High in the Sierra Nevada mountains of Spain, an international team of researchers set out four buckets to gather a shower of viruses falling from the sky.</p> <p>Scientists have surmised there is a stream of viruses circling the planet, above the planet’s weather systems but below the level of airline travel. Very little is known about this realm, and that’s why the number of deposited viruses stunned the team in Spain. Each day, they calculated, some 800 million viruses cascade onto every square meter of the planet.</p> <p>Most of the globe-trotting viruses are swept into the air by sea spray, and lesser numbers arrive in dust storms.</p> <p>“Unimpeded by friction with the surface of the Earth, you can travel great distances, and so intercontinental travel is quite easy” for viruses, said Curtis Suttle, a marine virologist at the University of British Columbia. “It wouldn’t be unusual to find things swept up in Africa being deposited in North America.”</p> <p>The study by Dr. Suttle and his colleagues, published earlier this year in the International Society of Microbial Ecology Journal, was the first to count the number of viruses falling onto the planet. The research, though, is not designed to study influenza or other illnesses, but to get a better sense of the “virosphere,” the world of viruses on the planet.</p> <p>Generally it’s assumed these viruses originate on the planet and are swept upward, but some researchers theorize that viruses actually may originate in the atmosphere. (There is a small group of researchers who believe viruses may even have come here from outer space, an idea known as panspermia.)</p> <p>Whatever the case, viruses are the most abundant entities on the planet by far. While Dr. Suttle’s team found hundreds of millions of viruses in a square meter, they counted tens of millions of bacteria in the same space.</p> <p>Mostly thought of as infectious agents, viruses are much more than that. It’s hard to overstate the central role that viruses play in the world: They’re essential to everything from our immune system to our gut microbiome, to the ecosystems on land and sea, to climate regulation and the evolution of all species. Viruses contain a vast diverse array of unknown genes — and spread them to other species.</p> <p>Last year, three experts called for a new initiative to better understand viral ecology, especially as the planet changes. “Viruses modulate the function and evolution of all living things,” wrote Matthew B. Sullivan of Ohio State, Joshua Weitz of Georgia Tech, and Steven W. Wilhelm of the University of Tennessee.</p> <p>“But to what extent remains a mystery.”</p>

<b>HEADLINE</b>	<b>04/15 US helping Mexico fight opium</b>
<b>SOURCE</b>	<a href="https://www.washingtonpost.com/world/the_americas/us-has-been-quietly-helping-mexico-with-new-high-tech-ways-to-fight-opium/2018/04/15/dc18eda0-26d5-11e8-a227-fd2b009466bc_story.html?utm_term=.c04a2468faf5">https://www.washingtonpost.com/world/the_americas/us-has-been-quietly-helping-mexico-with-new-high-tech-ways-to-fight-opium/2018/04/15/dc18eda0-26d5-11e8-a227-fd2b009466bc_story.html?utm_term=.c04a2468faf5</a>
<b>GIST</b>	<p>MEXICO CITY — In the past few opiate-soaked years, U.S. officials say, nearly all the heroin coursing through American cities has come from one place: Mexico.</p> <p>U.S. authorities have expressed alarm at what they call an explosion of opium poppy in their southern neighbor. Echoing a federal drug agency assessment, President Trump has declared that “an astonishing 90 percent of the heroin in America comes from south of the border” and cited that as one reason to build a giant border wall.</p> <p>Yet Mexican and U.S. officials have struggled in recent years to answer some basic questions about Mexico’s illegal poppy crop: How much is actually being grown? How much of it is the Mexican government destroying? And how much is being turned into heroin?</p> <p>Now the Trump administration is intensifying its efforts to help Mexico get a more detailed picture of its poppy problem. It has begun to supply Mexican authorities with drones and geolocation technology and is funding studies to pinpoint how much poppy is being planted and how much heroin is produced from it.</p> <p>The new initiatives emerged from several high-level meetings between Mexican and U.S. officials last year, as well as a trip in July by then-Homeland Security Secretary John F. Kelly, who flew to see poppy fields in Guerrero state with Mexican military leaders, according to Mexican and U.S. officials.</p> <p>Trump’s harsh rhetoric about Mexico on illegal immigration, trade and the wall could jeopardize that kind of security cooperation. On April 9, President Enrique Peña Nieto’s office said he had instructed cabinet secretaries to review their bilateral programs with the United States, following a tense week in which Trump criticized Mexico about a caravan of migrants heading toward the U.S. border.</p> <p>But on certain issues, such as poppy, the two sides have already quietly made progress. With Trump as president, “we thought that there would have been a chilling of relations,” said Juan Carlos Silva, chief of the anti-drug division of Mexico’s federal police. “On the contrary, we have grown closer.”</p> <p>The Drug Enforcement Administration said in a report last year that Mexico supplies 93 percent of all heroin consumed in the United States, up from half of it in 2012 — even though it lags far behind Afghanistan and Burma as an opium poppy producer, according to U.N. figures.</p> <p>The DEA also reported that production more than tripled in Mexico between 2013 and 2016, to 79,000 acres, in part because of “reduced poppy eradication.”</p> <p>But there is no consensus on those estimates, particularly the production numbers.</p>

	<p>Mexican military officials deny that poppy production has tripled and say they have increased eradication efforts, deploying more than 20,000 soldiers on ground or aerial missions.</p> <p>The troops destroyed about 71,000 acres last year and are on pace this year to surpass that, the officials said.</p> <p>A decade ago, Mexico eradicated 27,000 acres, according to the United Nations.</p>

<b>HEADLINE</b>	<b>04/15 FBI: \$20M for 'El Chapo' cartel partner</b>
<b>SOURCE</b>	<a href="https://www.inquisitr.com/4867880/the-fbi-offers-20-million-award-for-the-capture-of-el-chapo-guzmans-partner/">https://www.inquisitr.com/4867880/the-fbi-offers-20-million-award-for-the-capture-of-el-chapo-guzmans-partner/</a>
<b>GIST</b>	<p>The FBI has announced a \$20 million bounty for the capture of a fugitive drug lord, Rafael Caro Quintero, who is also believed to be one of Joaquin "El Chapo" Guzman's partners within the Sinaloa Cartel, as reported by Time. Currently believed to be in his 50s, he's credited as one of the godfathers of the Mexican drug trade. Quintero was initially imprisoned in 1985 but was released on a technicality on August 9, 2013.</p> <p>He had, by that time, spent 28 years in jail. Quintero got his break when a judge ruled that he had been improperly tried in a federal courtroom instead of a state court. Orders for his re-arrest were issued a few days later, but the drug lord had already gone into hiding. His release led to tensions between the Mexican and American governments due to his alleged involvement in the killing of U.S. Drug Enforcement agent, Enrique Camarena Salazar, writer John Clay Walker, and pilot Alfredo Zavala Avelar in 1985.</p> <p>The kingpin fled to Costa Rica after the killings but was soon after apprehended and extradited to Mexico, where he was handed a 40-year sentence for the murders. His cartel, the Guadalajara Cartel, disintegrated after his incarceration, with its members being incorporated into the Juárez Cartel, El Chapo's Sinaloa Cartel, and the Tijuana Cartel.</p> <p>News of renewed interest for his recapture comes in the wake of a new investigative report published by the Huffington Post illustrating the current life of the fallen drug lord. According to the report, he lives in hiding, changing his location every day. He and his henchmen are reportedly always on the lookout for drones and Mexican authorities. Residing in a mountainous region in Mexico, a place known for the growing, harvesting, and processing of drugs, he lives in perpetual fear of apprehension and reportedly suffers from a diseased prostate, but refuses to seek treatment as a result.</p>

<b>HEADLINE</b>	<b>04/14 Quebec mosque shooter's motivation</b>
<b>SOURCE</b>	<a href="https://www.cnn.com/2018/04/14/americas/quebec-shooter-motive/index.html">https://www.cnn.com/2018/04/14/americas/quebec-shooter-motive/index.html</a>
<b>GIST</b>	(CNN)A man who killed six worshippers at a Quebec City mosque told an investigator he carried out the

January 2017 attack after seeing reports the Canadian government would welcome more refugees into the country, according to CNN partner CBC.

A video of Alexandre Bissonnette's interrogation was played in court Friday during the third day of his sentencing hearing, CBC reported. Bissonnette pleaded guilty to six counts of first-degree murder and six counts of attempted murder in March.

In the interrogation video, Bissonnette said he was watching TV reports about the Canadian government's policy of welcoming refugees.

"The Canadian government was, you know, going to take in more refugees, you know, those who couldn't go to the United States would end up here," Bissonnette told Quebec City police Sgt. Steve Girard during an interrogation. "I just lost it."

Bissonnette told Girard he wanted to save people from terrorist attacks, according to CBC, and that "maybe, thanks to what I did, there will be hundreds of people saved." He said he had been obsessing for months over the idea that his parents or twin brother would be victims of a terrorist attack after a string of such attacks in Europe.

"I had to do something, it was torturing me inside."

On January 29, Bissonnette entered the Quebec Islamic Cultural Center and fired indiscriminately into a crowd of men, women and children, according to witnesses.

When it was all over, Bissonnette had killed six Muslim worshippers -- Mamadou Tanou Barry, 42; Abdelkrim Hassane, 41; Khaled Belkacemi, 60; Aboubaker Thabti, 44; Azzeddine Soufiane, 57; and Ibrahima Barry, 39.

<b>HEADLINE</b>	<b>04/14 Teen asked for directions; gets shot at</b>
<b>SOURCE</b>	<a href="https://www.cnn.com/2018/04/14/us/michigan-man-shoots-at-teen-asking-for-directions/index.html">https://www.cnn.com/2018/04/14/us/michigan-man-shoots-at-teen-asking-for-directions/index.html</a>
<b>GIST</b>	<p>(CNN)A Michigan man is out on bail after police said he fired a shotgun at a teenager who had stopped at his house to ask directions.</p> <p>Jeffery Craig Zeigler, 53, was charged Friday with assault with intent to murder and possession of a firearm in the commission of a felony.</p> <p>During Zeigler's arraignment, Judge Julie Nicholson entered a plea of not guilty for him.</p> <p>The teen's mother told CNN affiliate WDIV she thought there was a racial component to the case. The teen is black and the man is white.</p> <p>"It definitely was a hate crime," she said.</p> <p>Brennan Walker, 14, said he was walking alone to school Thursday after he missed the bus. As he trekked the 4 miles to Rochester High School in Rochester Hills, he got lost and knocked on the doors of several houses, he said.</p> <p>The teen said he went up to one home and knocked on the door a few times. A woman came to the door, yelling at him, he told WDIV.</p> <p>"I was trying to explain to that I wanted to get directions to go to my school," he said. The man eventually came out with a shotgun and fired one shot at the teen who was running away.</p>

	<p>The teen said he fled when he saw the man with the shotgun. The teen was not wounded.</p> <p>Deputies responded to a call of a male trying to break into a house, the sheriff's department said in a news release. Both the boy and Zeigler were taken to a police station and questioned. Zeigler was arrested. A prosecutor said at Zeigler's arraignment that there was a surveillance video from the house that caused her to doubt Zeigler's recollection of the incident. His story was not borne out by the video, she said.</p> <p>Zeigler was released Friday from Oakland County Jail on a \$50,000 bond. A judge also ordered the man to stay more than 10 miles from the teenager, which means he will likely have to live elsewhere until trial.</p> <p>He was also ordered to turn over all his firearms and wear a GPS monitor.</p> <p>Zeigler told the judge that there is "a lot more to the story than what's being told."</p>

<b>HEADLINE</b>	<b>04/15 PD chief defends arrests in Starbucks</b>
<b>SOURCE</b>	<a href="https://www.cnn.com/2018/04/14/us/philadelphia-police-starbucks-arrests/index.html">https://www.cnn.com/2018/04/14/us/philadelphia-police-starbucks-arrests/index.html</a>
<b>GIST</b>	<p>(CNN)Philadelphia Police Commissioner Richard Ross is defending the actions of officers seen in a viral video arresting two men at a Starbucks.</p> <p>The video, which has racked up millions of views since it was posted to Twitter on Thursday, shows Philadelphia police officers arresting two African-American men inside a Starbucks location.</p> <p>Melissa DePino, who posted the video, wrote, "The police were called because these men hadn't ordered anything. They were waiting for a friend to show up, who did as they were taken out in handcuffs for doing nothing."</p> <p>In the video a man is seen telling an officer that he was meeting the two men there and asking what they did to warrant police being called.</p> <p>Others off screen are heard saying, "They didn't do anything."</p> <p>Ross said Saturday his officers "did absolutely nothing wrong."</p> <p>Ross recorded a statement on Facebook Live in which he explains that Starbucks employees called 911 to report a trespassing complaint.</p> <p>The employees told officers the two men wanted to use the restroom but were told the facilities are only for paying customers. The Starbucks employees then asked the men to leave, but they refused, Ross says. Officers responded and asked the men three times to "politely to leave the location because they were being asked to leave by employees because they were trespassing." When the men again refused to leave, they were arrested "without incident," Ross says.</p> <p>The men were taken to a police station and released when it became clear Starbucks didn't want to press charges.</p> <p>"They did a service that they were called to do," Ross says of the officers. "And if you think about it logically, that if a business calls and they say that someone is here that I no longer wish to be in my business, (officers) now have a legal obligation to carry out their duties. And they did just that."</p> <p>Ross, who is black, references his own experiences while making his case, saying, "As an African-American male, I am very aware of implicit bias."</p> <p>"We are committed to fair and unbiased policing and anything less than that will not be tolerated in this</p>

	department." In statement posted on Twitter, Starbucks apologized "to the two individuals and our customers."

<b>HEADLINE</b>	<b>04/14 Parkland accounts: chaos, confusion</b>
<b>SOURCE</b>	<a href="http://abcnews.go.com/US/newly-released-accounts-parkland-shooting-relate-chaos-confusion/story?id=54470790">http://abcnews.go.com/US/newly-released-accounts-parkland-shooting-relate-chaos-confusion/story?id=54470790</a>
<b>GIST</b>	<p>New documents released Friday paint the clearest picture to date of the chaos and confusion officers experienced in the early moments of the Feb. 14 school shooting in Parkland, Florida.</p> <p>The incident report includes 11 officers' accounts of their responses in the first few minutes after School Resource Officer Scott Peterson screamed "Shots fired!" over the radio.</p> <p>Despite being the first to report the gunfire, Peterson was accused of failing to enter the school building after hearing those initial shots. He claimed to have thought they were coming from outside the building.</p> <p>In February, President Trump said that the officer "did a poor job," adding that he either "didn't react properly" or was a "coward." Peterson was suspended by the sheriff's office in the weeks following the shooting. He resigned soon after amid public scorn.</p> <p>In one account released by the Broward County Sheriff's Office, an officer said he headed towards a nearby Walmart following a dispatch that suggested the shooter was moving in a "westward" direction. Shortly after arriving, he learned the suspect was possibly already in custody.</p> <p>"I then stayed at my new location ... where I prevented any non-law enforcement traffic from entering the area of the school and assisted in directing traffic," the officer said.</p> <p>Armed with an AR-15 style rifle, 19-year-old Nikolas Cruz shot and killed 17 people at Marjorie Stoneman Douglas High School, prosecutors say. Seventeen others were injured.</p> <p>As the situation developed, another officer said, he did not inform his fellow officers that he would be responding to the scene due to "heavy radio transmissions" following the first mention of an active shooter. Instead, he arrived at the school and entered the building, possibly contributing to some of the uncertainty regarding the number of officers in the school and where they had entered the building.</p> <p>"I attempted to enter building 12 from the west but was confronted by several law enforcement officers who had entered from the east end of the building," said one officer. "To mitigate a crossfire situation, I exited the building and continued to hold cover to the south while the other deputies and officers worked to clear the building and treat the injured."</p> <p>Two officers both reported having accidentally switched off their body cameras in their rush to confront a suspect. They turned them back on later when they realized what had happened. One of them said that had happened several times.</p> <p>"It should be noted that my BWC (body camera) was activated but was turned off accidentally by the on and off button being hit by possibly the rifle sling. Upon noticing it was off I immediately turned it back on," the officer said.</p> <p>"This occurred more than once," he added.</p> <p>Earlier reports of the shooting also indicate confusion about which building the shootings were occurring in and where the assault rifle was left in its aftermath.</p>

HEADLINE	<b>04/13 Supremacist died w/ISIS-type bombs</b>
SOURCE	<a href="https://www.thedailybeast.com/suspected-white-supremacist-died-building-isis-style-bombs?ref=home">https://www.thedailybeast.com/suspected-white-supremacist-died-building-isis-style-bombs?ref=home</a>
GIST	<p>Benjamin Morrow was found dead with white supremacist literature and the ingredients for a notorious bomb known as the “Mother of Satan.”</p> <p>Morrow, 28, died in an explosion in the kitchen of his Beaver Dam, Wisconsin, apartment on March 5. His home was filled with bomb-making substances so volatile that firefighters chose to destroy the 16-unit apartment block in a controlled blaze, rather than let Morrow’s neighbors continue to live in the building.</p> <p>A search warrant unsealed last week revealed that Morrow kept white supremacist literature in his home. Investigators’ application for a second warrant suggests that Morrow had plans, announcing that he was clearing out a rented storage locker just hours before his death.</p> <p>Kevin Heimerl of the Wisconsin Department of Justice called Morrow’s apartment a “homemade explosives laboratory.” When they responded to reports of an explosion at the home, investigators passed “a one gallon metal container of acetone,” an investigator told a judge in a newly unsealed warrant application.</p> <p>Acetone is an explosive substance and ingredient in the “Mother of Satan”: a volatile bomb used by terrorists in ISIS attacks in Manchester, England, and Paris, France, in recent years.</p> <p>Also sitting in plain sight where two white cardboard boxes stamped with the words “mix it, shake it, shoot it,” and three more packages labeled “sonic boom,” Heimerl testified, adding that he suspected the boxes contained materials that would explode when combined. Investigators also found pipes and pipe caps in the apartment.</p> <p>When they entered the kitchen, investigators found Morrow dead in front of a still-lit stove. An “overpressure blast” had destroyed much of the room, blowing out the doors and windows and burying Morrow under the collapsed ceiling. Containers with more chemicals were spilling out an open refrigerator door.</p> <p>The scene was so volatile that authorities barred the rest of the apartment building’s residents from re-entering their homes, and burned the entire building to the ground in a 1,600-degree controlled blaze overseen by 100 firefighters. Residents left their valuables inside. One of Morrow’s neighbors told the Wisconsin State Journal he planned on digging through the rubble to find a dead relative’s World War II dog tags, which had been left inside to burn.</p> <p>At the time of the fire, the contents of Morrow’s apartment remained a mystery. But an unsealed warrant describes Morrow as building a terrifying arsenal.</p> <p>In addition to more bomb-making materials, Morrow also had a collection of guns and accessories including a rifle scope, masks, vests, a ballistic helmet, and thousands of rounds of ammunition.</p> <p>Morrow also had “white supremacist material” in his bedroom, the warrant said.</p> <p>Beaver Dam police said the white supremacist literature didn’t necessarily mean Morrow was a white supremacist.</p> <p>“It does cause me some concern but I want to make very clear just because Mr. Morrow was in the possession of this material, does not categorize in any particular light,” Lt. Terrence Gebhardt told CBS 58. “He could have been an individual that was doing research.”</p> <p>But state investigators suggested the opposite. In an application for a search warrant, Heimerl raised the</p>

possibility that Morrow had worked with or been inspired by others, pointing to the white supremacist literature when a judge asked about “propaganda that raises concern for this kind of collaborative work.”

The investigator who swept Morrow’s room described the literature as relating to white supremacist groups that “will involve multiple members” in potentially violent activities. He did not specify which groups were named in the literature.

Members of Morrow’s church community have pushed back on the idea that Morrow built the bombs in his bedroom and kitchen, for which investigators found handwritten instructions.

“I’d love to defend Ben because he has been described as a bomb maker and he’s not a bomb maker,” Rev. Jerry Marsden, the pastor who conducted Morrow’s funeral told the Associated Press. “He wasn’t a recluse as some have said he is. He was far from that.”

In an obituary, Morrow’s family described him as a religious man, who grew up homeschooled and later studied pre-pharmacy, math, and chemistry at Pensacola Christian College in Florida. The search warrant revealed Morrow had a Bible among his white supremacist literature and bomb-making material.

When he wasn’t building bombs, he worked as a quality control technician at Richelieu Foods, according to his LinkedIn profile. His coworkers told investigators Morrow sometimes came to work with an unpleasant smell on his clothes.

“Some of those co-workers reported that it was common for Benjamin Morrow to arrive for work and he had an odor emitting from his person that co-worker’s described as smelling like moth balls,” Heimerl told a judge in an application for a second warrant. “Those co-workers further stated that they had made comments to Benjamin Morrow about the fact that they could smell moth balls on him.”

Mothballs are made of flammable chemicals, which may explain the smell.

The second warrant application reveals that police were interested in the contents of a storage unit Morrow rented. On the morning of the fatal explosion, Morrow visited the storage company “and notified the business that he would be moving his personal property out of the storage unit by the end of March,” Heimerl told the judge in the warrant application, speculating that Morrow might have rented the storage unit to keep strong-smelling chemicals from his home.

The second warrant, the findings of which are not public, also extend to Morrow’s computers, flash drives, and phone. The records could reveal where Morrow received the white supremacist literature—and whether he was acting alone.

“I am aware that a person could work solely to connect this type of manufacturing homemade explosives themselves,” Heimerl said. “But I am also equally aware that individuals oftentimes communicate, inspire and engage with other persons to manufacture homemade explosives.”

<b>HEADLINE</b>	<b>04/13 Deadly war on drugs in Philippines</b>
<b>SOURCE</b>	<a href="https://www.thedailybeast.com/inside-the-deadly-war-on-drugs-in-the-philippines-where-murder-is-a-meme?ref=home">https://www.thedailybeast.com/inside-the-deadly-war-on-drugs-in-the-philippines-where-murder-is-a-meme?ref=home</a>
<b>GIST</b>	<p>NEW YORK—Philippine journalist Patricia Evangelista does not think a single story she has written has saved anyone’s life, but yet she keeps writing. Her stories about the Philippines’ deadly war on drugs for the online-news network Rappler chronicle murder in cold blood, often carried out in front of families with young children by vigilantes acting out the wishes of the state under Philippine President Rodrigo Duterte.</p> <p>Rappler has been stripped of its official credentials and investigated for bogus crimes, including tax evasion and cyber libel. Evangelista has personally received death and rape threats for reporting the truth</p>

and for trying to humanize the victims.

She described her disturbing work to John Avlon, editor-in-chief of The Daily Beast, at the ninth annual Women in the World summit in New York on Friday morning against a backdrop of photos of dead bodies and blood-stained sidewalks. “Duterte is sensitive to criticism, so those of us who cover stories are told we are not patriots, that we are fake news,” she said.

No one knows exactly how many people have died in Duterte’s war on drugs. The state officially lists the number at around 4,000 people who were killed by police acting in “self defense.” Human Rights Watch estimates that closer to 12,000 people have been murdered in cold blood by police and vigilantes.

Duterte, who enjoys a high approval rating, won his office by promising to kill 100,000 criminals who are pushers and drug users alike. He makes no differentiation between pushers, addicts, and casual users—and those who are killed are often never arrested, and certainly never brought to trial.

Those who do the killing aren’t always police, sometimes they are men working under curious impunity who are never brought to justice, either. There are around 16,000 “killings under investigation” by Philippine authorities, but Evangelista says there is no transparency about those cases.

The killings are often carried out in broad daylight in the slum areas of Manila. The victims are often on a watch list created by the government, which is suspected of paying the vigilantes for each person killed. Evangelista has reported on men who have been shot bound and gagged with packing tape wrapped around their heads. The killers generally leave a note with the body stating that the victim was an addict or pusher. Evangelista recalled one instance in which the killer had drawn a smiley face on the victim’s corpse. Other bodies have been found with hashtag-laden signs that parody internet memes.

Evangelista says that, in reality, the Philippines has half the global average of per capita drug abuse. But when the country’s anti-drug czar reported this statistic, he was fired. What disturbs Evangelista most is that many of the killings target those living in extreme poverty, who are often the primary breadwinners for their families. When those victims die, the future of whole families dies with them.

She recalled a story about a family of six that lived in a cinder block house in a shantytown in the poor suburbs of Manila. The mother, nine-months pregnant, was home with the children one day when the police came looking for the patriarch of the house. He wasn’t home, so police arrested the pregnant woman and took her away instead. When the father returned, the family urged him to leave, too, or he might be killed. He came back early one morning to prepare a surprise birthday breakfast for one of the children. Police, staking out the house, charged in and told the children to get out. They pushed the father’s head down on the sofa, and the second eldest child, Christine, then 12 years old, jumped on her father’s back to try to protect him. Police pulled her away and shot him in the back of the head several times. One of the children later found a bullet in the cushions of the sofa. When Evangelista talked to the traumatized daughter some months later, she said her father’s death was her fault. “If I had hugged him harder, he would still be alive,” she told her.

The family now lives with an elderly grandmother who doesn’t have the financial means to support them. The mother gave birth, but remains in jail, meaning there is one more mouth to feed. It was never clear whether the father had been a user, a dealer, or neither. The official police report identified the father as a “scavenger” and said he was shot because the police were acting “in self defense.” There were no reports of police injuries, and no one official ever talked to Christine, the only witness.

Duterte has been condemned by the international community—which has called his deadly policy a crime against humanity—but Evangelista says the president’s response has always been to ask, “Frankly, are they human?”

Evangelista says the hardest part about telling stories about this bloody war on drugs is the risks those who talk about it face. “The risks for the people who tell their stories are enormous,” she said. “They could be dead the next day. Or their fathers or sons could be dead.”

She is also concerned that journalists are increasingly afraid to expose the truth. She has little optimism things will ever get better. "I'm not sure about hope," she said. "But I believe in journalism. If we tell the stories, we keep them human. They are people. He may have been a user, he may not have been, but he was a human."

<b>HEADLINE</b>	<b>04/13 Judge: Lakewood cops killing trial delay</b>
<b>SOURCE</b>	<a href="http://www.thenewstribune.com/news/local/crime/article208855809.html">http://www.thenewstribune.com/news/local/crime/article208855809.html</a>
<b>GIST</b>	<p>The alleged getaway driver of a man who gunned down four Lakewood police officers in 2009 made an unsuccessful bid for a new attorney Friday.</p> <p>Dorcus Dewayne Allen is awaiting retrial in Pierce County Superior Court, which won't happen until the Washington State Supreme Court finishes reviewing his case.</p> <p>"What I gather is that you're unhappy with the delay," Superior Court Judge Stanley Rumbaugh told Allen on Friday, after reading his motion for a new attorney.</p> <p>That can't be helped, the judge explained, because the Supreme Court's decision determines what charges prosecutors can bring.</p> <p>Division II of the Washington State Court of Appeals said last year that prosecutors couldn't retry Allen for aggravated first-degree murder, which would mean an automatic sentence of life without parole.</p> <p>Prosecutors appealed the decision to the Supreme Court, which accepted the case earlier this year.</p> <p>If the high court upholds the decision, Allen's retrial will be for first-degree murder. If it doesn't, trial for aggravated murder and a possible automatic life sentence would be back on the table.</p> <p>"I'm ready to go, but I just need to know what the charges are," Rumbaugh said.</p> <p>Allen, who turns 47 on Saturday (April 14) and also goes by the first name Darcus, told the court he doesn't believe his "due process issues" are being addressed "while we're in this standstill."</p> <p>He argued that defense attorney Mary K. High seems to be "totally unaware," when it comes to specifics about his Sixth Amendment rights.</p> <p>Rumbaugh said he didn't see anything deficient about High's work on the case, and he pointed out that the work of Allen's defense counsel on his appeal is the reason he's back in court at all.</p> <p>"I'm going to deny your motion," the judge said.</p> <p>High told the court she understood Allen's frustration.</p> <p>"I have endeavored to represent Mr. Allen to the best of my ability," she said. "... As Mr. Allen knows, I have been very committed to this case."</p> <p>And she'll continue to do so, she said.</p> <p>Allen, who has pleaded not guilty, is suspected of driving Maurice Clemmons to the Parkland coffee shop where Clemmons killed the four officers in November 2009, and then driving him away.</p> <p>Clemmons fatally shot police Sgt. Mark Renninger and officers Tina Griswold, Gregory Richards and Ronald Owens.</p>

	<p>A Seattle police officer fatally shot Clemmons after a manhunt.</p> <p>At Allen's initial trial, jurors found him guilty of four counts of first-degree murder and not of the aggravated murder charges.</p> <p>He was sentenced to 400 months in prison, but won an appeal in which he argued there was prosecutorial misconduct during closing arguments in the case.</p> <p>Prosecutors sought to retry Allen for four counts of aggravated murder, but Allen's defense team, including High, argued that would be double jeopardy, because jurors already said no to the aggravated murder charges.</p> <p>Then-Superior Court Judge Katherine Stolz agreed with the defense and prosecutors appealed her decision to Division II. The appellate court agreed with Stolz, and prosecutors appealed to the state Supreme Court in January.</p> <p>Oral arguments are expected later this year.</p>

<b>HEADLINE</b>	<b>04/13 Teen jailed 1yr for deadly fight</b>
<b>SOURCE</b>	<a href="https://www.kiro7.com/news/local/judge-sentences-teen-who-killed-another-teen-in-a-fight-to-more-than-the-maximum/731973913">https://www.kiro7.com/news/local/judge-sentences-teen-who-killed-another-teen-in-a-fight-to-more-than-the-maximum/731973913</a>
<b>GIST</b>	<p>In a move rarely seen in a Snohomish County court, a judge sentenced a Marysville teen who killed another teen in a fight to more than the maximum penalty for the crime.</p> <p>The judge said the kick to the head that killed 16-year-old Robbie Myrick Jr. and the actions that followed last August were so cruel that the boy responsible deserves a harsher punishment.</p> <p>Myrick -- and the teen we are not naming because he is a minor -- had agreed to the fight in these Marysville woods. The teen admitted to punching Robbie so hard he fell and then kicking him so hard he suffered irreversible brain damage. No one called 911 for at least an hour, including four adults watching the fight.</p> <p>"I pray to God Robbie was not cognizant of being left on the ground like some discarded piece of trash," Robbie's uncle Rod Hampton told the Snohomish County judge Friday.</p> <p>At the teen's sentencing, a shattered family pleaded for the judge to give more than the 30-day maximum sentence for second-degree manslaughter committed by a minor.</p> <p>"The defendant in this case claims he didn't intend to end someone's life. I'd be willing to bet that your average drunk driver who ends up killing someone in an accident didn't get behind the wheel with the intention of killing someone, but if they did they would be charged with vehicular homicide, and they wouldn't be looking at a token sentence of 30 days," Robbie's father, Robert Myrick Sr., told the judge.</p> <p>And the judge agreed -- 30 days is not enough.</p> <p>"He was down on the ground, he could do nothing to you — you had won the fight, to put it that way — and for some reason I will never know, you decided to up the ante on your victim and that resulted in his death," Judge Richard Okrent said to the teen, sitting next to his attorney.</p> <p>The teen was sentenced to one year in juvenile detention.</p>

HEADLINE	<b>04/14 Sex workers devastated; eye alternatives</b>
SOURCE	<a href="https://www.azcentral.com/story/news/local/arizona-investigations/2018/04/12/sex-workers-seeking-alternatives-other-websites-after-backpage-closure/507900002/">https://www.azcentral.com/story/news/local/arizona-investigations/2018/04/12/sex-workers-seeking-alternatives-other-websites-after-backpage-closure/507900002/</a>
GIST	<p>When the Department of Justice unceremoniously shut down Backpage last week, it was the first public-facing step in a sweeping criminal case against the website's executives.</p> <p>But before federal authorities could issue a statement, before the classified site's owners would face a judge, and before the public would learn of their charges, the narrative around Backpage had taken on a life of its own.</p> <p>The site had served as a microcosm of a larger debate on prostitution in recent years, and the seizure of what the DOJ called the "Internet's leading forum for prostitution ads" ignited swift reactions on both sides.</p> <p>Anti-sex-trafficking advocates, including Cindy McCain, cheered Backpage's demise as a blow to an abusive industry.</p> <p>Meanwhile, sex workers across the U.S. and Canada swarmed social media to air concerns rarely heard in political discourse: To them, Backpage's demise meant the end of safeguards and a reliable revenue stream in a profession that's not going anywhere.</p> <p>"They're devastated," said Laura Dilley, executive director of PACE, a Vancouver-based nonprofit that advocates for decriminalizing prostitution.</p> <p>If sex workers can't advertise online, they can't screen their clients beforehand and are forced back out to bars and into the street, Dilley said.</p> <p>"I am going to do what I have to do to survive... I might have to work the streets, work the bars; you do what you have to do."</p> <p>While many sex workers told The Arizona Republic they would continue posting on other smaller websites, they also worry about the future. On Wednesday morning, President Trump signed a bill giving prosecutors more power to go after websites that knowingly host sex-trafficking ads. It also gives women who claimed they were trafficked the ability to sue.</p> <p>It's not clear how websites will respond. After the bill passed Congress, for example, Craigslist took down its singles ads. And as the bill was moving through Congress, Backpage restricted postings on singles ads to photos, phone numbers and web links.</p> <p>"There's a lot of uncertainty; a lot of grief and fear," said Jelena Vermilion, a sex worker based outside of Toronto. "A lot of people are essentially planning to be homeless, planning how to fall gracefully as much as possible...From Friday, a lot of these people haven't had any calls."</p> <p>IndyStar columnist Tim Swarens spent more than a year investigating a lucrative business where abused children are bought and sold. USA TODAY</p> <p>After the Backpage closure April 6, an Arizona-based sex worker called Vegas said she relied on her regular clients to get her through that weekend.</p> <p>"I am going to do what I have to do to survive," she said. "I might have to work the streets, work the bars; you do what you have to do."</p> <p>Prostitution is still illegal in 49 states, the exception being certain counties in Nevada. For this reason, The Arizona Republic has agreed to withhold the sex workers' legal names for this story. In Canada, selling sex is legal, but buying it isn't.</p>

Vegas said Backpage afforded her more anonymity than meeting strangers in public. And it gave her a barrier to screen her clients and meet them in a safe place.

“It will push it underground,” Vegas said, noting that Backpage screened for ads that appeared to include someone underage or trafficking victims.

“Backpage had an incentive to review the ads and make sure nothing was going on,” she said. “Now, it’s going to force people out to the streets, where we can’t really fight.”

A Michigan woman who goes by the name Sarah Fenix on Twitter posted a viral thread about how the ability to screen on Backpage saved her from riskier sex work. Fenix told The Republic she used the site to test the client before they met up. She would ask them to text their favorite movie “so I know you’re real,” or to bring her fruit or bagels.

“The guys who could follow that one simple instruction were actually better than the ones who couldn’t,” she said. “It’s not necessarily about the information you get, it’s about gauging someone’s willingness to follow instruction.”

Fenix said she is no longer in the business and now works a "cube" job. Seeing the closure of Backpage though, she said, was like watching a childhood house burn down.

A broader debate

The reactions over Backpage generally boil down to two camps: Those who believe prostitution should be illegal and those who don’t. Advocates for decriminalization say the sex industry will always be around, and regulation would make it safer. Those against it argue that selling sex, by nature, is abusive.

Advocates have succeeded in changing police attitudes about prostitutes from being seen as criminals to women in need of rescue. Many sex workers, however, reject the “victim” label.

In recent years, some anti-trafficking advocacy and political groups have begun blurring the lines between prostitution and sex trafficking: Per the expanded definition, a sex-trafficking victim is someone who enters prostitution by force, fraud or coercion. A minor, by definition is always considered a trafficking victim.

In a press statement, FBI Director Christopher Wray said Backpage’s closing strips traffickers of a key tool.

“This website will no longer serve as a platform for human traffickers to thrive,” he said. “Whether on the street or on the Internet, sex trafficking will not be tolerated.”

Backpage executives are not charged with a sex-trafficking crime, but instead crimes related to facilitating prostitution and money laundering. But the indictment states that many of the ads published on Backpage “depicted children who were victims of sex trafficking.”

Prosecutors say Backpage executives showed a financial incentive to allow the ads to run.

In recent years, law-enforcement actually worked Backpage to conduct prostitution-related sting operations. Police, including those in Phoenix, have previously posted ads on Backpage posing as an underage girl for sale, or as a trafficker searching for victims.

Jonathan Howard, a spokesman for the Phoenix Police Department, rejected the notion that sites like Backpage should remain in place because it confined criminals to one area.

"Just because it's easy doesn't mean it's right," he said. "We knew that that was one of the most prolific

	<p>sites for sex trafficking, but we still have to hold people accountable."</p> <p>Howard said police hope Backpage's closure encourages troubled young women and men to seek options other than prostitution.</p> <p>"It is extremely easy for them to go to sites like Backpage.com, and immediately be drawn into this high-risk lifestyle," he said.</p>

<b>HEADLINE</b>	<b>04/14 Docs keep licenses despite sex abuse</b>
<b>SOURCE</b>	<a href="https://www.yahoo.com/news/ap-investigation-doctors-keep-licenses-despite-sex-abuse-145310788--politics.html">https://www.yahoo.com/news/ap-investigation-doctors-keep-licenses-despite-sex-abuse-145310788--politics.html</a>
<b>GIST</b>	<p>WASHINGTON (AP) — The first time that Dr. Anthony Bianchi came onto a patient, California's medical board alleged, the gynecologist placed a chair against the exam room door, put his fingers into the woman's vagina and exposed his erect penis.</p> <p>The second time, the board claimed, he told a patient that he couldn't stop staring at her breasts and recounted a dream in which he performed oral sex on her in the office.</p> <p>The third time, the board charged, he told a pregnant patient suffering from vaginal bleeding that she shouldn't shave her pubic hair before her next visit, as he was getting too excited.</p> <p>These episodes led to disciplinary actions by the state's medical board in 2012 and in 2016. Bianchi agreed not to contest the charges, and he held onto his medical license. Under a settlement with California's medical board, he agreed to seek therapy and refrain from treating women during five years of probation.</p> <p>Bianchi did not respond to telephone messages from The Associated Press left for him at the workers' compensation clinic in Fresno, California, where he now evaluates occupational health claims.</p> <p>In recent months, Hollywood moguls, elite journalists and top politicians have been pushed out of their jobs or resigned their posts in the wake allegations of sexual misconduct. In contrast, the world of medicine is often more forgiving, according to an AP investigation.</p> <p>When the doctors are disciplined, the punishment often consists of a short suspension paired with mandatory therapy that treats sexually abusive behavior as a symptom of an illness or addiction, the AP found.</p> <p>Decades of complaints that the physician disciplinary system is too lenient on sex-abusing doctors have produced little change in the practices of state medical boards. And the #MeToo campaign and the rapid push in recent months to increase accountability for sexual misconduct in American workplaces do not appear to have sparked a movement toward changing how medical boards deal with physicians who act out sexually against patients or staffers.</p> <p>The sentencing of Larry Nassar, a former doctor for the U.S. Olympic gymnastics program convicted of abusing more than 150 women and girls, has put a high-profile case of physician misconduct in the spotlight. But across the country, most doctors accused of sexual misconduct avoid a medical license review entirely. A study last year found that two-thirds of doctors who were sanctioned by their employers or paid a settlement as the result of sex misconduct claims never faced medical board discipline.</p> <p>"There's been a failure of the medical community to take a stand against the issue," said Azza Abbudagga, a health services researcher with nonprofit advocacy organization Public Citizen.</p> <p>She published a report recently detailing sexual misconduct among physicians. Its findings showed that of the 253 doctors reported to the National Practitioner Data Bank for having been sanctioned by their</p>

respective hospitals or health care organizations for sexual misconduct, or paid a settlement that stemmed from such an allegation, 170 of them were not disciplined by state medical boards, even though all boards have access to the reports filed with the data bank.

"They could tell the public that they will investigate every single case. There are many things that can be done, even just having a policy of zero tolerance," she said. "If every single hospital would just take a stand and issue a statement saying clearly that any sexual misconduct with patients won't be tolerated and that there will be consequences including permanently revoking the medical license of every doctor found guilty."

Current guidelines from the Federation of State Physician Health Programs, which represents doctor rehab programs in 47 states, are largely silent on handling sexual misconduct treatment and describe sexual harassment as a "cause of impairment" in a doctor. Programs to treat doctor impairment are inherently supposed to be "nondisciplinary," per the federation's guidelines.

Linda Bresnahan, who heads the federation, said its guidelines are being rewritten and, despite their language, should not be applied to sexual misbehavior. A statement provided by the federation says only about half of doctor rehab programs nationwide accept doctors accused of sexual misconduct, a choice the group considers to be "a local issue beyond the purview of national guidance."

The harm committed by sexually abusive doctors is aggravated by the personal nature of the doctor-patient relationship, according to experts and doctors' victims.

When Marissa White came to Dr. Gunwant Dhaliwal in 2007 for neck pain after a car accident, he reached under her shirt and into her bra, grabbing her breasts.

A jury convicted him of misdemeanor battery in the case, and Florida's medical board concluded that his crime demonstrated his "lack of good moral character" and "lack of worthiness" to practice medicine. But despite that finding — and at least six other similar allegations made by women patients and employees, both before and after the incident with White, according to court cases and police complaints — Dhaliwal can still be found practicing at his Tampa-area urgent care clinics.

"I had to sit there in front of him, look him in the eye, they made their guilty verdict and that's it, nothing came of it," White told the AP of her experience at trial. She still lives in Florida, but won't even go to the neighborhood where Dhaliwal practices medicine.

"He should have lost his license a long time ago. He should have lost it the first time it happened."

But his office manager told the AP that, while the Florida board referred him to the state's impaired physician network for evaluation, nothing came of it.

"They did an evaluation and did not find anything wrong," the woman told the AP. "They don't do any treatment."

The office manager, who refused to provide the AP with her full name, noted that Dhaliwal had not had any new complaints brought against him since his settlement with the medical board. When the AP asked to speak with Dhaliwal, she said that he was declining on the advice of his lawyers.

Dhaliwal did not respond to requests for comment left with his clinic's staff or a voicemail left with his lawyer.

Examples of problematic behavior are easy to find in states across the country.

In Arkansas, Dr. Robert Rook was allowed to keep his family practice open, so long as he's chaperoned, despite facing multiple criminal charges for rape. Prosecutors subsequently downgraded the charges to more than 20 counts of sexual assault in the second- and third-degree, charges for which Rook says he is

innocent.

Rook did not return phone messages left with a secretary at his Conway office. He is set to face trial later this year.

The Idaho State Board of Medicine in May reinstated the license of Richard Pines, a child and adolescent psychiatrist who lost his license in 2013 after the board accused him of having sexual relationships with four former patients, including taking nude photos of a 14-year-old and convincing the boys that he needed to practice giving naked massages to keep his medical license.

The state's highest court in 2015 ruled that Pines had engaged in sexual misconduct, but determined that two of the four alleged victims were not former patients. The court remanded Pines' case to a lower court and vacated his punishment, instead ordering the board to re-evaluate the scope of disciplinary action based on the charges the court upheld. The court's order also blasted the board for being impartial, accusing its members of "passionately railing" against Pines in its decision.

The AP reached out to Pines' former employers and contacted his most recent attorneys, but was unable to reach him. The AP also left a message for a biller at Sage Health Care, where Pines still processes invoices. The receptionist said Pines bills through the office but was unable to provide more details about his current practice.

State-authorized programs that attempt to oversee the rehabilitation of doctors who have committed sexual misconduct aren't always forthcoming about their methods. In Florida, the Professional's Resource Network, which the state medical board assigned to evaluate Gunwant Dhaliwal after his battery conviction, asked the AP to provide detailed questions and a list of sources before it would answer questions.

After the AP provided the head of the program, Alexis Polles, with basic questions about the program's approach to clearing doctors for return to work after instances of sexual abuse, she declined to answer any of them.

The lenience of penalties for sexually abusive doctors sometimes a source of frustration even for members of the medical board who administer the discipline, according to Jason Rosenberg, a former chairman of the Florida medical board.

"This is incredibly inappropriate," Rosenberg said during one 2013 meeting when Florida's medical board allowed James Yelton-Rossello, a psychiatrist alleged to have molested jailed psychiatric patients, to keep his license. The settlement with the Florida board of medicine did not require Yelton-Rossello to admit guilt.

"You can't do this and serve french fries," Rosenberg said at that meeting, citing fast food restaurants' policies against hiring sex offenders. "I'm ashamed of what's going on here."

Yelton-Rossello's lawyer did not respond to telephone messages or an email request for comment.

Some medical boards blame administrative law judges for tying their hands from seeking harsher punishments.

In an interview last year, Rosenberg said he responded to an administrative law judge's refusal to uphold a different license revocation by attempting to compel that doctor to display a sign stating "I molest patients" in his office.

Rosenberg's effort failed, though some doctors have been required to post signs in their office stating that they must be chaperoned in the presence of female patients.

Bob Cohen, the chief judge in Florida's division of administrative hearings, rejected the idea that

administrative law judges are responsible for watering down the punishments of sexually abusive doctors. He said the board of medicine could seek to override administrative law decisions they disagree with, something the Florida board acknowledged in a statement to the AP.

"One of the reasons they don't always appeal is they have a lot of cases," Cohen said of state health officials. He acknowledged, however, that "consistency" was a goal in punishments, and that past leniency shown to doctors sets a precedent for weaker punishments in the present day.

The question of doctor punishments is part of a larger problem in the medical field. Numerous factors, including hospitals' disinclination to report abusive doctors, to shortfalls in a private, interstate system meant to flag them to future employers, and patients' simple reluctance to challenge a medical professional, skew the field in doctors' favor, according to a 2016 investigation by the Atlanta Journal-Constitution.

Some doctors who are reported to medical boards for sexual misconduct receive reprimands instead of suspensions. G. Eric Nielson, a medical malpractice attorney in Utah, says that's because doctors tend to try to protect other doctors as much as possible.

"There's an institutional bias on the part of the medical review board," he said. "They're generally doctors, they work very hard to get their medical degrees and they're very, very disinclined to yank the license of another doctor. The primary focus is: Let's take care of the doctor and help him get through this problem."

A medical board in California in 2009 revoked the license of Dr. Kamron Hakhamimi after it ruled that his conduct constituted abuse, neglect and exploitation when he prescribed powerful drugs to a woman he met online and then had sex with her; he had previously pleaded no contest to a pair of misdemeanor charges stemming from the incident. But the board stayed the revocation in favor of seven years' probation and a requirement that he complete an ethics class and a course on professional boundaries, though the California Department of Health Care Services barred Hakhamimi from participating in any federally funded programs for 12 years.

When contacted for comment, Hakhamimi said, "Nothing happened in the clinic. No medical malpractice, no suspension." When asked whether the courses were effective, he said, "they're mandatory for a reason: It's a business," and then hung up.

Sexually abusive physicians are not generally required to apologize or even acknowledge having acted inappropriately in order to keep their license. Three years after his misdemeanor battery conviction, for example, Florida doctor Dhaliwal was acquitted of molesting another patient. He took the opportunity to issue a news release calling the women who have accused him of misconduct liars motivated by greed.

In email statement, Florida Medical Board spokesman Brad Dalton said the doctor disciplinary boards "do not have the legal authority to force a physician to speak or place a gag order on them to prevent them from doing so."

In practice, even some lawyers who represent doctors find the physician health programs to be problematic.

David Spicer, who has represented doctors facing medical board discipline in Florida, says the state's doctor rehabilitation program isn't well designed to evaluate or treat sexual misbehavior. The program's key component, he said, is a "one-size-fits-all" requirement that doctors engage in therapy sessions and not get into trouble for a specified period, generally five years.

Spicer said Florida's program, run by an independent organization called the Physician Research Network, does a better job dealing with doctors' who abuse alcohol or drug, but it hasn't been effective at evaluating or treating doctors with sexual problems.

Experts in the treatment of sexual misbehavior question whether the treatments mandated for doctors who

	<p>molest patients are even appropriate for such misconduct.</p> <p>"It's insufficient," said Rory Reid, a UCLA psychology professor who studies addiction and hypersexual behavior. While some types of sexual behavior, such as the compulsive viewing of pornography, might best be addressed through addiction treatment therapy, rehabilitation programs for sex offenders typically focus on restitution and empathy for a person's victims.</p> <p>"We have clinical trials for everything underneath the sun," Reid said. "But there's not one clinical trial that I'm aware of on the efficacy of treatment for doctors who have engaged in sexual misconduct."</p>

<b>HEADLINE</b>	<b>04/13 Backpage CEO pleads guilty</b>
<b>SOURCE</b>	<a href="https://abcnews.go.com/Technology/wireStory/backpage-ceo-pleads-guilty-testify-54437158">https://abcnews.go.com/Technology/wireStory/backpage-ceo-pleads-guilty-testify-54437158</a>
<b>GIST</b>	<p>The chief executive of Backpage.com pleaded guilty to state and federal charges including conspiracy and money laundering, and agreed to testify in ongoing prosecutions against others at the website that authorities have dubbed a lucrative nationwide "online brothel," authorities said.</p> <p>"For far too long, Backpage.com existed as the dominant marketplace for illicit commercial sex, a place where sex traffickers frequently advertised children and adults alike," U.S. Attorney General Jeff Sessions said in a statement. "But this illegality stops right now."</p> <p>Backpage brought in a half-billion dollars since it began in 2004, mostly through prominent risqué advertising for escorts and massages, among other services and some goods for sale, according to federal prosecutors. Authorities allege the site was often used to traffic underage victims, while company officials said they tried to scrub the site of such ads.</p> <p>Chief Executive Officer Carl Ferrer will serve no more than five years in prison under a California agreement in which he pleaded guilty to one count of conspiracy and three counts of money laundering in California. Also Thursday, Texas Attorney General Ken Paxton announced the company pleaded guilty to human trafficking.</p> <p>And a federal judge in Phoenix unsealed an April 5 plea deal revealing that Ferrer pleaded guilty to conspiracy, and Backpage.com pleaded guilty to money laundering conspiracy.</p> <p>Under his plea agreement, Ferrer agreed to make the company's data available to law enforcement as investigations and prosecutions continue. The guilty pleas are the latest in a cascade of developments in the last week against the company founded by the former owners of the Village Voice in New York City, Michael Lacey, 69, and James Larkin, 68.</p> <p>The company founders were among Backpage officials indicted by a federal grand jury in Arizona. Attorneys for the company and Lacey, Larkin and Ferrer did not respond to multiple telephone and email messages from The Associated Press.</p>

#### Electrical Substations Exposed to Attacks by Flaws in Siemens Devices

From Security Week (04.11.2018) Eduard Kovacs

Electrical substations and other power supply facilities are exposed to hacker attacks due to several potentially serious vulnerabilities discovered by researchers in some Siemens protection relays. On March 8, Siemens and ICS-CERT published advisories to warn organizations of the existence of three vulnerabilities in SIPROTEC 4, SIPROTEC Compact, and Reyrolle devices, which provide integrated protection, control, measurement, and automation functions for electrical substations and other applications. The vendor has released patches and mitigations for each of the flaws. Positive Technologies, the company whose researchers discovered the flaws, has now provided information regarding the risk and impact. One of the vulnerabilities, tracked as CVE-2018-4840 and rated high severity, can be exploited by a remote and unauthenticated attacker to modify the device's configuration and overwrite access passwords. Another security hole, CVE-2018-4839, is a medium severity issue that allows a local or network attacker to recover the access authorization password by intercepting network traffic or obtaining data from the targeted device. The password can be used to gain complete access to a relay, Positive Technologies said. [Link](#)

#### \*Microsoft Patches Two Dozen Critical Flaws in Windows, Browsers

From Security Week (04.10.2018) Eduard Kovacs

Microsoft's Patch Tuesday updates for April 2018 resolve a total of 66 vulnerabilities, including nearly two dozen critical issues affecting Windows and the company's web browsers. None of the flaws patched this month appear to have been exploited in the wild, but one privilege escalation vulnerability discovered by a Microsoft researcher in SharePoint has been disclosed to the public. A majority of the critical flaws affecting Internet Explorer and Edge are related to scripting engines and they allow remote code execution. A remote code execution flaw affecting the VBScript engine has also been rated critical. The security hole can be exploited via malicious websites or documents. Trend Micro's Zero Day Initiative (ZDI) noted that while this is similar to browser bugs, the attack surface is broader due to the possibility of exploitation using Office documents. Several critical vulnerabilities that allow remote code execution have also been found in graphics components, specifically font libraries and how they handle embedded fonts. Microsoft also informed customers that its Wireless Keyboard 850 is affected by a security feature bypass vulnerability that can be exploited to simulate keystrokes and send malicious commands to the targeted computer. An attacker could also exploit this flaw to read keystrokes, which can include sensitive information, such as passwords. [Link](#)

\*Microsoft Half-Patches Old Outlook Vulnerability

From Bleeping Computer (04.11.2018) Catalin Cimpanu

Microsoft has published a patch for an Outlook vulnerability first reported in late 2016, but the patch has been deemed incomplete and additional workarounds are needed, according to the security researcher who discovered it. Yesterday's April 2018 Patch Tuesday updates train included a fix for CVE-2018-0950, a vulnerability in Microsoft Outlook discovered by Will Dormann, a vulnerability analyst at the CERT Coordination Center (CERT/CC). According to Dormann, the main problem with CVE-2018-0950 is that Microsoft Outlook will automatically render the content of remote OLE objects embedded inside rich formatted emails without prompting the user, something that Microsoft does in other Office apps such as Word, Excel, and PowerPoint. This leads to a slew of problems that come from automatically rendering OLE objects, a common attack vector for malware authors. Dormann says that during his experiments he was able to exploit this Outlook OLE handling design decision to steal user account passwords (NTLM hashes, to be more precise) from Windows computers. An attacker would only need to collect these hashes, crack them offline, and use them to infiltrate the user's computer and then other parts of the internal network. [Link](#)

\*Adobe patches critical vulnerabilities in Flash, InDesign

From ZDNet (04.11.2018) Charlie Osborne

Adobe has released a new security update which resolves critical vulnerabilities in products including Adobe Flash Player and Adobe InDesign. On Tuesday, the tech giant published a security advisory detailing a total of 19 vulnerabilities in Adobe Flash Player, Adobe Experience Manager, Adobe InDesign CC, Digital Editions, ColdFusion and the Adobe PhoneGap Push plugin. Adobe Flash, a common inclusion in the company's security updates, has received a patch which resolves critical vulnerabilities which affect Adobe Flash Player version 29.0.0.113 and earlier on Windows, Macintosh, Linux and Chrome OS systems. In total, three vulnerabilities are deemed critical. A use-after-free flaw, CVE-2018-4932, and two out-of-bounds write errors, CVE-2018-4935 and CVE-2018-4937, can all lead to remote code execution if exploited. In addition, Adobe has patched two additional out-of-bounds read bugs, CVE-2018-4933 and CVE-2018-4934, as well as a heap overflow issue, CVE-2018-4936. These vulnerabilities can lead to information disclosure. [Link](#)

Pivotal patches holes in the Spring Framework

From Heise Security (04.06.2018) Olivia von Westernhagen

Several versions of Spring, a framework for Java application development, have serious security vulnerabilities. New, fixed versions are available. There are three security holes in the Spring Development Framework, an open-source framework for cross-platform development of Java applications. As can be seen from a Pivotal Software safety note, all versions from 5.0 to 5.0.4 and from 4.3 to 4.3.14 (including the first and last mentioned version numbers) are affected. One of the gaps is described as critical and could be misused to perform a remote code execution attack on applications based on Spring. Among other things, the framework is used in the Confluence wiki software and used to develop applications for Oracles Fusion Middleware. The new Spring versions 5.0.5 and 4.3.15 fill in the gaps. Application developers should move quickly to provide updated versions of existing Spring-based software. Users should check for updates. [Link](#)

[Heise\[.\]de/security/meldung/Pivotal-patcht-Luecken-im-Spring-Framework-4012159\[.\]html](https://www.heise.de/security/meldung/Pivotal-patcht-Luecken-im-Spring-Framework-4012159.html)

FIDO2: Authenticate easily with phishing-resistant security

From Help Net Security (04.11.2018)

The FIDO Alliance and the World Wide Web Consortium (W3C) have achieved a standards milestone in the global effort to bring simpler yet stronger web authentication to users around the world. The W3C has advanced Web Authentication (WebAuthn), a collaborative effort based on Web API specifications submitted by FIDO to the W3C, to the Candidate Recommendation (CR) stage. The CR is the product of the Web Authentication Working Group, which is comprised of representatives from over 30 member organizations. CR is a precursor to final approval of a web standard, and the W3C has invited online services and web app developers to implement WebAuthn. WebAuthn defines a standard web API that can be incorporated into browsers and related web platform infrastructure which gives users new methods to securely authenticate on the web, in the browser and across sites and devices. CTAP enables an external authenticator, such as a security key or a mobile phone, to communicate strong authentication credentials locally over USB, Bluetooth or NFC to the user's internet access device (PC or mobile phone). The FIDO2 specifications collectively enable users to authenticate easily to online services with desktop or mobile devices with phishing-resistant security. Google, Microsoft, and Mozilla have committed to supporting the WebAuthn standard in their flagship browsers and have started implementation for Windows, Mac, Linux, Chrome OS and Android platforms. DHS 'Cyber Storm' exercise tests manufacturing and transportation sectors

From Cyberscoop(04.10.2018) Sean Lyngaas

A global cybersecurity drill hosted Tuesday by the Department of Homeland Security served to “push participants out of their comfort zone” to practice information sharing at a time of heightened risk to critical infrastructure, top DHS cybersecurity official Jeanette Manfra said. This week’s exercise includes participants from the transportation and “critical manufacturing” sectors, the latter which DHS recently warned Russian government hackers were targeting in a multi-stage attack campaign. More than 1,000 people, including corporate executives, law enforcement personnel and intelligence and defense officials, are participating in this sixth iteration of the exercise known as Cyber Storm, which DHS touts as “the most extensive government-sponsored cybersecurity exercise of its kind.” While a group of participants gathered at Secret Service headquarters in Washington, D.C., many others joined the drill from their own offices across the country. The seven participating states are Colorado, Delaware, Iowa, Montana, Texas, Virginia and Washington. The latest version of the congressionally-mandated DHS exercise includes a simulated social media platform that bombards participants with information, which could include reports of a new software vulnerability. Manfra said that some vulnerability researchers have in recent years posted their discoveries to social media rather than going through a disclosure process, presenting a new challenge to government analysts. Phyllis Schneck, DHS’s former deputy undersecretary for cybersecurity and communications, told CyberScoop that the biennial exercise had evolved considerably since its 2006 inception to keep pace with the threat landscape. UK to Invest More Money in Police Efforts Against Online Crime

From ZDNet (04.11.2018) Danny Palmer

Cybercriminals who use the 'anonymity' of the dark web to carry out illegal activities ranging from hacking and malware distribution to selling drugs, firearms and people face a crackdown as part of plans to bolster law enforcement's ability to take the fight to crooks who use underground forums. Figures by the Home Office say that only 30 percent of UK police forces currently meet the minimum cyber capabilities required to investigate and pursue cybercriminals. The funding is set to be announced by UK Home Secretary Amber Rudd during a speech at CYBERUK, the National Cyber Security Centre's conference in Manchester. The NCSC is the specialist cyber security arm of intelligence agency GCHQ. In order to aid the fight against crime on the dark web, the government has announced that a £9m fund is being made available to specialist law enforcement units who deal with cybercrime and dark web activity. The funding is intended to build intelligence services, conduct research into cybercrime, teach police officers new skills to be able to handle dark web and hacking related crimes as well extra training to be able to provide victim support and care. All of the funding comes from an existing £50m designed to ensure police and prosecutors have the capabilities to combat cybercrime at a local, regional and national level. It forms part of the Home Office's National Cyber Security Program, which has seen £150m spent in the fight against cybercrime since 2015. [Link](#)

UFA ATTower simulator to support FAA TFDM

From Air Traffic Management (04.11.2018)

UFA has been selected by Leidos to deliver its ATTower tower simulator to support testing, training, prototyping, and development of the Federal Aviation Administration (FAA) Terminal Flight Data Manager (TFDM) system. TFDM is the FAA program to modernize air traffic control tower equipment at 89 airports in the United States by improving the exchange of electronic flight data, implementing electronic flight strips and other airport surface efficiency tools. ATTower is being integrated with TFDM to provide surface surveillance and flight data, which Leidos uses to test the system during development. ATTower will also be deployed as part of the local test and verification system. The company's ATView image generator and ATVoice voice recognition and response system were used with ATTower during early TFDM hands-on prototyping activities. [Link](#)

Germany's MTU Aero Engines Expands Its High-tech Facility in Poland in Order to Conduct Additive Manufacturing

From Aviation Pros (04.11.2018)

MTU Aero Engines, Germany's leading engine manufacturer, is once again adding new production and assembly capacities at its facility in Rzeszów, Poland. Plans are for MTU Aero Engine Polska's existing floor space to be enlarged by another 11,400 square meters, with groundbreaking for the construction planned in September 2018. The number of employees will increase from nearly 800 today to over 1,000 by 2020. The new jobs being created in this region are primarily for activities related to new technologies. The tremendous advancements in the field of additive manufacturing technologies and the steep increase in production rates within the whole MTU Group are behind this move. For instance, production volumes of components for the latest geared turbofan engines will increase significantly as well as the activities for assembly and production of components and modules for latest widebody propulsion systems powering the 787 Dreamliner and the 777X. The MTU Group's investment in the site so far amounts to €100 million and it is the plan to invest an additional €80 million in the next 5 years (2018-2022). According to plans, the new parts of the facility will be up and running no later than the end of 2019. Of a total of 11,400 square meters of added floor space, 7,500 square meters will be dedicated to production and 3,900 square meters will be used to provide the additional space required to support production. The space in the newly built part of the facility will, first and foremost, house activities in connection with new technologies, like, for example, additive manufacturing, plus activities needed to cope with the increased volumes associated with the production ramp-up now under way. Legislation & Regulation News

EASA warns of possible missile strikes on Syria

From Air Traffic Management (04.11.2018)

Eurocontrol is relaying a warning to airlines to exercise caution in the eastern Mediterranean due to the risk of air strikes into Syria in the next 72 hours. On its Network Operations Portal, air navigation safety agency Eurocontrol has alerted airlines planning to fly near that airspace that the European Aviation Safety Agency (EASA) had issued a Rapid Alert Notification for the Eastern Mediterranean / Nicosia Flight Information Region (FIR). This added that due to the possible launch of air strikes into Syria with air-to-ground and / or cruise missiles within the next 72 hours, and the possibility of intermittent disruption of radio navigation equipment, "due consideration" needs to be taken when planning flight operations in this area and that airlines needed to check any relevant NOTAMs. US President Donald Trump on Monday warned of a 'quick, forceful' response once responsibility for the recent Syria attacks was established. Aviation authorities in countries including the United States, Britain, France and Germany have issued previous warnings against airlines entering Syrian airspace leading most carriers to avoid the area. The United Nations International Civil Aviation Organisation (ICAO) which launched a web page specifically to warn about risks to aircraft operating near conflict zones following the Malaysia Airlines MH17 tragedy, has failed to issue any relevant notice, however. Concerns over risks to civil aviation operating through known conflict zones came to the fore in the wake of the 2014 downing of Flight MH17 over eastern Ukraine. [Link](#)

FAA Says Risk-based Oversight Progressing, But Work Remains

From MRO Network (04.10.2018) Sean Broderick

FAA's transition to a risk-based oversight philosophy is progressing well, but the change remains "in its early days" and the agency is listening to industry feedback as part of making the new approach more effective, FAA Associate Administrator of Aviation Safety Ali Bahrami said. Addressing an aftermarket-focused audience at MRO Americas here April 10, Bahrami said improving the new Safety Assurance System (SAS) tool is a particular focus. Rolled out about five years ago, SAS is the primary tool that FAA inspectors use to collect and share data. In theory, the system will help FAA prioritize surveillance based on what's happening at airlines and repair stations, putting more emphasis on certificate holders that show signs of risk, such as inconsistent procedures. But SAS's most important element--data collection--continues to present challenges. FAA is still training its workforce on how to use the system, and is learning how to better apply it. "The idea behind the system is good, but we're learning," Bahrami said. "We're still in the very early stages." SAS is the core of a major philosophical shift that has FAA working more collaboratively with industry on several fronts. Data-sharing is a major one, and Bahrami emphasized the importance of industry participating in initiatives such as the Aviation Safety Information Analysis and Sharing Program (ASIAS). More than 100 operators participate in the data-sharing program, but only two--AAR Corp. and Haeco Americas--are MRO providers. This needs to change, Bahrami said, especially as aftermarket analytics becomes more prevalent, and issues that could affect safety--such as a part failing regularly that could lead to an in-service incident--are unearthed. Green Bay Packers player arrested for allegedly making false bomb threat at airport

From ANC News (04.10.2018) Emily Shapiro

A Green Bay Packers player has been arrested for allegedly making a false bomb threat at the Los Angeles International Airport, police said. During routine questioning at the Hawaiian Airlines ticket counter Sunday morning, an agent asked wide receiver Trevor Davis, who was with a woman, whether he had packed aerosols or fireworks or other dangerous items. Davis replied "yes" and then "turned to the female companion and said, 'Did you pack the explosives?'" airport police spokesman Rob Pedregon told ABC News. "Based on that statement, he was arrested for making a false bomb threat," a misdemeanor, Pedregon said. Davis, 24, apologized and told the responding officer he was joking, Pedregon said, but the ticket agent said she thought he was serious. Pedregon, the airport police spokesman, said, "You don't scream fire in a theater and you don't talk about bombs at an airport. As it is, people are nervous when they fly." [Link](#)

## Miscellaneous News

Indonesia's Lion Air confirms \$6.2 billion deal for Boeing 737s, flags 787 jet order

From Reuters (04.10.2018) Cindy Silviana

Indonesia's Lion Air Group announced on Tuesday a firm order to buy 50 Boeing Co 737 MAX 10 narrowbody jets worth \$6.24 billion and said it plans to place a provisional order for Boeing 787 widebody jets in the next few weeks. Lion Air, which already has offshoots in Malaysia and Thailand, also plans to establish a new airline in a Southeast Asian country this year, co-founder Rusdi Kirana told reporters. He declined to elaborate on the number of 787s to be ordered or in which country the new airline would be established. A memorandum of understanding (MoU) for the purchase of 787s would be announced in "two to three weeks", he said. His comments came after the privately-owned company earlier in the day confirmed the purchase of the 50 Boeing 737 MAX 10 jets by announcing a firm order. The jets are worth \$6.24 billion at list prices, but airlines usually get discounts for bulk purchases. Kirana said the Indonesian government's infrastructure expansion, which included airports, was fueling Lion's demand for more aircraft. [Link](#)

## Germany risks losing key technology in Chinese takeovers

From Reuters (04.11.2018) Andrea Shalal

Germany's head of domestic intelligence agency urged vigilance about increased moves by Chinese companies to invest in and acquire high-technology German companies, warning the loss of key technologies could harm the German economy. Hans-Georg Maassen said intelligence officials had been initially puzzled by a sharp drop in Chinese cyber espionage activities about two years ago, but then realized Beijing was simply using other, legal tools such as direct takeovers, to gain access to German know-how. "Industrial espionage is no longer necessary if one can simply take advantage of liberal economic regulations to buy companies and then disembowel them or cannibalize them to gain access to their know-how," he told a cyber conference. Maassen said Germany remained open to foreign investment, including from China, but steps were needed to safeguard key technologies. He said he had been particularly concerned about the takeover of German robotics maker Kuka by a Chinese firm in 2016 given the sensitive technology involved. German concerns were stoked by news last month that Chinese grid operator State Grid Corporation of China tried to buy a 20 percent stake in German grid operator 50Hertz, and moves by China's Geely to quietly build up a 10 percent stake in carmaker Daimler. The German economy ministry is also reviewing a Chinese bid for aerospace supplier Cotesa, a move which could lead to Berlin blocking the sale. Karl Wendling, a senior official with the German Economy Ministry, said Chinese acquisitions of German firms had stabilized at a high level, around \$14 billion, a huge increase from the \$530 million value of deals seen in 2015. Maassen said the issue was particularly worrying in China's case, since private Chinese firms were required to share data with the Chinese government, and had to set up party committees that gave the Chinese government control over company decisions. ## U.S. Department of Transportation Crisis Management Center Daily Report

### Commercial In-Flight Incidents

#### \*American 957, B772

- o April 11, 2018 at 12:03 AM EDT
- o Enroute from Miami, FL (Miami International Airport) to Santiago, Chile (Comodoro Arturo Merino Benítez International Airport)
- o Generator problem
- o Returned to Miami, FL; landed without incident at 12:20 AM EDT

#### \*JetBlue 174, A320

- o April 10, 2018 at 5:45 PM EDT
- o Enroute from Punta Cana, Dominican Republic (Punta Cana International Airport) to Fort Lauderdale, FL (Fort Lauderdale-Hollywood International Airport)

- o Minimum Fuel
- o Diverted to Miami, FL (Miami International Airport); landed without incident

\*JetBlue 2394, E190

- o April 10, 2018 at 5:42 PM EDT
- o Enroute from Nassau, Bahamas (Lynden Pindling International Airport) to Palm Beach, FL (Palm Beach International Airport)
- o Fuel problem
- o Diverted to Fort Myers, FL; landed without incident

\*JetBlue 2401, A320

- o April 10, 2018 at 5:31 PM EDT
- o Enroute from New York, NY (John F. Kennedy International Airport) to Fort Myers, FL (Southwest Florida International Airport)
- o Minimum fuel
- o Continued to Fort Myers, FL; landed without incident at 5:38 PM EDT

\*United 1021, B738

- o April 10, 2018 at 4:43 PM EDT
- o Enroute from Newark, NJ (Newark Liberty International Airport) to Panama City, Panama (Tocumen International Airport)
- o Engine problem
- o Returned to Newark, NJ; landed without incident

\*Delta 2981, B752

- o April 10, 2018 at 1:53 PM EDT
- o Enroute from Seattle, WA (Seattle-Tacoma International Airport) to Salt Lake City, UT (Salt Lake City International Airport)
- o Cell-phone was on fire in the cabin; crew extinguished the fire
- o Continued to Salt Lake City, UT; landed without incident at 1:54 AM EDT
- o 0 fatalities; 0 injuries

\*United 761, A319

- o April 10, 2018 at 6:44 AM EDT
- o Enroute from New York, NY (LaGuardia Airport) to Chicago, IL (O'Hare International Airport)

- o Flight control problem
- o Diverted to Newark, NJ; landed without incident at 6:56 AM EDT

<b>HEADLINE</b>	<b>04/05 Homeless riders rack up bus fare fines</b>
<b>SOURCE</b>	<a href="https://www.seattleweekly.com/news/homeless-riders-rack-up-bus-fare-fines/">https://www.seattleweekly.com/news/homeless-riders-rack-up-bus-fare-fines/</a>
<b>GIST</b>	<p>Roughly a quarter of all fines and levied misdemeanor charges for not paying fares on King County Metro's RapidRide bus lines were given to homeless riders in recent years, a recent report from the King County Auditor's office shows.</p> <p>The report, which was released by the Auditor's Office on April 4, states that 25 percent of all financial penalty citations and 30 percent of all misdemeanor charges for fare evasion between 2015 and 2017 were given to individuals experiencing homelessness. The audit also found that of the 19,000 individuals penalized in that time period, 99 riders accounted for 6 percent of all fare evasion penalties. The majority of those who were frequently penalized were either people of color or people experiencing homelessness, or both.</p> <p>Additionally, the report found that fare enforcement on RapidRide lines costs the county \$1.7 million annually—a fifth of which goes toward District Court processing of fare evasion citations. However, the vast majority of these fare evasion citations go unpaid. In 2016, less than three percent of fines were paid.</p> <p>The frequency of fare violations is due in part to the design of the system. Launched by King County Metro in 2010, the RapidRide system provides frequent runs on fixed, high-demand routes where passengers pay their bus fare at terminals before boarding instead of onboard the bus, allowing riders to board from multiple doors on the buses. Rather than the bus drivers enforcing fares, Metro contracts with a private company, Securitas, to do the dirty work.</p> <p>The report comes on the heels of a planned expansion of the RapidRide system, which would increase the number of routes from the six current lines to 19 by 2025 and 26 by 2040.</p> <p>The audit has prompted swift responses from Metro. The day the report was released, General Manager of King County Metro Rob Gannon stated in a blog post that he welcomed the report, and that an internal review by Metro has revealed similar issues.</p> <p>“We fully welcome the auditors’ guidance to improve our fare enforcement program. The program needs to encourage fare payment while also including options that work for people with little or no money,” he wrote.</p> <p>In the blog post, Gannon said that Metro has already adjusted its policies to give juveniles one additional warning before levying a \$124 citation and will temporarily decline to refer repeat fare evasion offenders to the Metro Transit Police who, along with the King County Prosecuting Attorney’s Office, could levy misdemeanor charges.</p> <p>“A lot of things have changed since 2010. We have a severe homelessness crisis,” said Scott Gutierrez, a spokesperson for King County Metro. “We recognize that.”</p> <p>Metro plans to convene a stakeholder group to devise a fare enforcement system that doesn't</p>

	<p>disproportionately penalize low-income and homeless riders, according to Gutierrez. The plan is to have formal recommendations by September.</p> <p>Metro officials have floated the idea of directing repeat offenders who lack the money to pay for transit away from the court system and to a theoretical in-house center where they would be provided access to discounted ORCA Lift cards—a discounted bus pass for low-income riders—and other services.</p> <p>“We really see this as an opportunity to reinvent our fare enforcement model,” Guitierrez said. “We want to explore some other options that don’t needlessly penalize people and send them into the court system.”</p>

<b>HEADLINE</b>	<b>04/05 Officials: Rattlesnake Ridge still moving</b>
<b>SOURCE</b>	<a href="http://www.ifiberone.com/columbia_basin/emergency-officials-rattlesnake-ridge-near-yakima-still-moving/article_0d528f60-3915-11e8-9810-c704e3ee0ab0.html">http://www.ifiberone.com/columbia_basin/emergency-officials-rattlesnake-ridge-near-yakima-still-moving/article_0d528f60-3915-11e8-9810-c704e3ee0ab0.html</a>
<b>GIST</b>	<p>UNION GAP - Yakima County Emergency Management officials recently provided a public update about the situation at Rattlesnake Ridge above Union Gap.</p> <p>Geologists say the slide mass continues to move south in to the quarry at a constant rate that has remained nearly unchanged since January. The land is moving at a rate of 1.4 feet per day.</p> <p>The Pacific Seismic Network and Washington State Department of Transportation continue to monitor the slide. Resident who were evacuated in January have returned.</p> <p>Geologists say the likelihood of the slide happening becomes more probable as the slide rate increases.</p> <p>Experts say the slide will likely happen slowly when the earth finally gives way.</p>

<b>HEADLINE</b>	<b>04/05 Free online courses disaster response</b>
<b>SOURCE</b>	<a href="http://www.govtech.com/em/disaster/Free-Online-Courses-Enable-Training-of-Spontaneous-Volunteers-Before-or-During-Disaster.html">http://www.govtech.com/em/disaster/Free-Online-Courses-Enable-Training-of-Spontaneous-Volunteers-Before-or-During-Disaster.html</a>
<b>GIST</b>	<p>First responders can only do so much during a disaster. Volunteers are increasingly a huge part of the equation, and that includes spontaneous volunteers.</p> <p>There has been little or no training for these responders, but that just changed with the launch of <a href="http://VolunteerReady.org">VolunteerReady.org</a>, an online portal that provides free courses for volunteers or potential volunteers.</p> <p>The video-based courses run from 10 to 15 minutes and are accessible by smartphone, PC or tablet.</p> <p>The initial phase or pilot consists of five graphically driven videos, each with downloadable infographics that outline the key points of the topics. At the end of each video is a knowledge assessment to drive home the key ideas of the subject matter.</p> <p>The videos were developed by software provider Cornerstone OnDemand in collaboration with FEMA, Catholic Charities USA; Emergency Management Institute; Mennonite Disaster Service; Points of Light; Southern Baptist Disaster Relief; Team Rubicon; and The Salvation Army.</p> <p>“We know from working with our working group and the number of organizations in our orbit [Cornerstone OnDemand also previously launched DisasterReady.org] is we have heard consistently from these organizations that are working with spontaneous volunteers that there is a lack of training and resources for this audience,” said Alexis Denny, director of grants and consulting for the Cornerstone OnDemand Foundation.</p>

Denny said the groups with which Cornerstone OnDemand has been affiliated have been mostly focused on affiliated volunteers, who have been given specific training. “For individuals just showing up, most of them have no experience and don’t necessarily understand what they’re stepping into, and there’s really nothing that exists in terms of on-demand training.”

For volunteer coordinators, the scene can be chaotic and dealing with new, spontaneous volunteers who need some direction is difficult. A coordinator can point potential volunteers to the videos to see what they may be getting into, what they may be asked to do and help the potential volunteer decide if it’s really what he/she wants to do at the time.

The courses, so far, include: Spirit of Service; Know Before You Go; Code of Conduct; Rules and Disaster Response; Physical Safety; and Emotional Resiliency. Denny said those five were chosen from a long list of subjects and that more course will be available in the next couple of months.

The Spirit of Service course, Denny said, is a bit of an introduction to volunteering. “A feel-good video, if you will,” she said. “We talk about what contributions someone who isn’t necessarily experienced can bring and how they can work with professional organizations.”

She said the Code of Conduct course teaches safety and effectiveness of volunteers and how to help people during times of need and grief with respect to cultural differences and emotions.

“The energy and enthusiasm of local volunteers is welcomed and encouraged when disasters strike,” read a statement by Team Rubicon’s Deputy Director of Field Operations Pat Ross, on the VolunteerReady.org website. “Pausing to ensure individuals are ready to go, enhances safety, promotes effective integration into volunteer organizations, and ensures an awesome experience for those volunteering,” he continued.

Denny said the idea came to light two years ago when after launching [DisasterReady.org](http://DisasterReady.org), which focusses on training humanitarian workers outside of the country, that the foundation wanted to have an influence in the States also.

With the number of disasters and the high incident of volunteerism, the foundation convened a working group. “The idea is that people can take this training in advance or even onsite,” Denny said.

“It’s intended to provide some basic concepts they need to know and also help people understand if they should show up to help. If you’re a volunteer coordinator, it’s super chaotic and the likelihood you’re going to be able to step away and give someone very clear instruction before you put them into a task is highly unlikely.”

<b>HEADLINE</b>	<b>04/06 Lessons from Philly Super Bowl parade</b>
<b>SOURCE</b>	<a href="https://www.hstoday.us/subject-matter-areas/emergency-preparedness/takeaways-from-big-philly-events-made-super-bowl-parade-success/">https://www.hstoday.us/subject-matter-areas/emergency-preparedness/takeaways-from-big-philly-events-made-super-bowl-parade-success/</a>
<b>GIST</b>	<p>Planning and being prepared for everything from the plausible to the improbable is a standard of emergency management and public safety.</p> <p>If you had asked Philadelphia Eagles fans at the 2017 NFL Draft, coincidentally held in Philadelphia last April, if their city would host a Super Bowl parade at the end of the season, they would have responded with a mix of Philly wit, laughter, and skepticism.</p> <p>But nine months later, the Eagles won the Super Bowl. A championship celebration followed. The Lombardi Trophy, standing tall at 22 inches in front of millions, led a four-hour parade along five-and-a-half miles of Philadelphia streets. The trophy’s journey ended on the same Benjamin Franklin Parkway where only months prior it was posing for photo ops with fans at the NFL Draft.</p>

City planners had no prior Super Bowl Parade plan to go on: this was the city's first Super Bowl win. But as the game clock hit 0:00 and green confetti fell, the Feb. 8 parade became an actuality. With only three days of planning, city partners quickly mobilized to sketch out their strategy for the largest parade in the city's history.

With several recent, successful large-scale events behind it, Philadelphia drew on numerous best practices, operational plans, and experiences to guide the intense, compressed planning effort.

### **Three Takeaways That Helped Eagles Parade Planning**

The Eagles parade plan was a culmination of best practices learned from previous special events along with already established infrastructure and relationships with partner agencies. It was a matter of thoughtful examination of the event route and celebration program along with factoring in a variable: the number of passionate Eagles fans who would attend.

#### **Keep public transportation moving**

The Philadelphia Phillies' World Series parade in 2008 provided takeaways on mass-transit planning. Millions of people descended on Center City Oct. 31. As crowds left, public transit and roadways were overwhelmed in certain locations. This was considered during the papal visit and built upon for the Super Bowl parade.

Philadelphia's mass-transit system, SEPTA, knew what volume it could handle on rail lines while still providing service. A defined quantity of one-day passes were sold for suburban rail lines for both Pope Francis' visit and the Super Bowl parade. The Market-Frankford elevated train was put on a special schedule to shuttle passengers as quickly and safely as possible.

#### **Streamline authoritative communications**

A takeaway from Pope Francis' visit was the importance of relaying information developed inside stakeholder meetings to the public in a positive tone. This allows people to know their role in public safety plans, sets realistic expectations, and helps prepare them for their experience. Messaging also helps government agencies realize and address concerns that people have prior to the event.

Something else that emergency planners learned from Pope Francis' visit: the critical need for a good communications system to be utilized by public safety agencies. This provides one-voice public messaging through media outlets and social media accounts that is truly uniform in order to avoid confusing and contradictory messages.

A best practice that emerged from DNC included creating a crisis communications and social media group within city government that streamlined messaging, authorized spokespersons, and addressed both news media and social media messaging. The communications group model is scalable and used for everyday events.

Press conferences held prior to the parade along with social media messaging let people know about adjustments made to the city's mass transit system to handle anticipated crowds, closures to city streets, expected traffic delays on city roads, and the need for parade attendees to wear comfortable, weather-appropriate clothing for all the walking and standing that they would experience.

#### **Get connected with the public**

City social and digital media platforms are viewed as newsrooms to keep people informed.

A campaign to keep fans apprised of Eagles-related news from the city was launched during the playoffs. This built followers on ReadyPhiladelphia and city social media accounts and helped to further disseminate details released by the city. The Office of Emergency Management's Twitter account, @PhilaOEM, added 2,500 followers during the Super Bowl itself.

ReadyPhiladelphia, an Everbridge product, has a community engagement text-to-enroll feature which

makes signing up for alerts quick and easy. The keyword “ReadyEagles” was decided upon to add to the appeal. Due to an established campaign prior to the Super Bowl, messaging quickly transitioned that set ReadyEagles as the place to get very important parade details and public safety information. Nearly 100,000 subscribers signed up for ReadyEagles text messages in the days leading up to the parade.

ReadyEagles was not only used for public safety information, but kept parade-goers informed of the movement of the team from their departure from Lincoln Financial Field all the way to the steps of the Philadelphia Museum of Art. This was useful to those who waited hours along long stretches of the route, so they were aware of when they may be able to catch a glimpse of the Lombardi Trophy. Pertinent information was also sent out pertaining to mass-transit updates, road re-openings, and post event clean-up.

Through social media, parade-goers thanked city departments and partners who helped keep them informed and safe in what they deemed a successful event, one that the Office of Emergency Management looks to build on for the future.

<b>HEADLINE</b>	<b>04/05 Coastal counties practice tsunami alert</b>
<b>SOURCE</b>	<a href="http://kuow.org/post/coastal-counties-put-heads-together-avoid-future-tsunami-alert-glitches">http://kuow.org/post/coastal-counties-put-heads-together-avoid-future-tsunami-alert-glitches</a>
<b>GIST</b>	<p>Emergency managers from Washington coastal counties and tribes practiced tsunami alert communication and coordination with state and federal partners Thursday. They're trying to smooth out glitches revealed after an undersea earthquake in Alaska in January.</p> <p>When that magnitude 7.9 quake hit off the coast of Alaska, it triggered a tsunami watch along the Oregon, Washington and California coasts. Most people slept right through the alert because it came in the middle of the night.</p> <p>Coastal residents who did get the alert were often confused about what to do in a tsunami watch, said Pacific County Emergency Management Director Scott McDougall.</p> <p>"We had people who were self-evacuating as a result of the watch, which just basically said, 'Pay attention, we're going to tell you what to do later.' But they thought that meant they needed to go," he said.</p> <p>McDougall said the difference in messaging a tsunami watch and a tsunami warning needs to be clearer. The warning alert means waves are incoming and you should move inland or to higher ground immediately. A tsunami watch is less urgent than a warning, and it does not set off sirens.</p> <p>City of Ocean Shores Mayor Crystal Dingler said during the January incident information didn't filter down as quickly and as well as she would have liked. She said she and many other Northwest coast residents have updated their NOAA weather radios since then or checked to make sure they were opted in to county telephone notification services.</p> <p>There are many ways to get tsunami alerts, most of which require a person to sign up for something such as texts, email or an automated telephone call. Even if people don't opt in, the highest alert level will set off warning sirens along the coast and trigger emergency messages on radio and TV.</p> <p>The tsunami generated by the January 23 Alaska earthquake ended up being barely noticeable on the Pacific Northwest coast and did not cause any damage.</p> <p>On Thursday, more than 50 local, state and federal emergency managers and responders gathered at the state Emergency Operations Center at Camp Murray near Tacoma for a tabletop exercise using a dire scenario of a distant tsunami generated by a magnitude 9.2 Alaska subduction zone earthquake.</p> <p>Coastal areas of the Pacific Northwest would have three to five hours of advance warning in this instance.</p>

	<p>During the exercise, participants reviewed who would be notified at each stage of the evolving situation and the correct response to imperfect knowledge of whether a damaging wave was coming.</p> <p>"This way, we've practiced, we've tested, we've refined, we're on the same page," Washington Emergency Management Earthquake Program Manager Maximilian Dixon said.</p>

<b>HEADLINE</b>	<b>04/04 In eastern Europe, EU faces rebellion</b>
<b>SOURCE</b>	<a href="https://www.washingtonpost.com/world/europe/in-eastern-europe-the-eu-faces-a-rebellion-more-threatening-than-brexit/2018/04/04/310a6d8e-2604-11e8-a227-fd2b009466bc_story.html?utm_term=.1f4f180287d0">https://www.washingtonpost.com/world/europe/in-eastern-europe-the-eu-faces-a-rebellion-more-threatening-than-brexit/2018/04/04/310a6d8e-2604-11e8-a227-fd2b009466bc_story.html?utm_term=.1f4f180287d0</a>
<b>GIST</b>	<p>BUDAPEST — It was a continent-wide party to mark the end of history.</p> <p>On a spring night in 2004, a chorus sang in a Warsaw square. Beethoven's "Ode to Joy" — the anthem of the European Union — echoed across once-bloody frontiers. Midnight fireworks sparkled along the Mediterranean. The next morning, organizers set a white-tablecloth breakfast on Budapest's Chain Bridge for revelers still celebrating the dawn of a new era for Europe.</p> <p>"The divisions of the Cold War are gone — once and for all," declared then-European Commission President Romano Prodi as he welcomed 10 new members to the E.U., eight from the former communist East.</p> <p>And yet, 14 years later, new divisions are emerging — many of them following old lines. The triumph of liberal democracy is being attacked from within by E.U. members that openly deride the club's values, principles and rules. The bloc, meanwhile, has been incapable of fighting back, its weakness a side effect of the optimism with which it grew.</p> <p>Ground zero for the rebellion is here in Hungary, where Prime Minister Viktor Orban is running for reelection Sunday with boasts of his illiberalism, swipes at the hostile E.U. "empire" and promises to further tighten his grip on a country dancing ever closer to the edge of autocracy.</p> <p>Orban's defiance presents the E.U. with a far different threat than the one it faced in 2016, when Britain voted to exit and speculation swirled over who might go next. It may be more serious than that — a challenge that endangers the character of the union.</p> <p>"Orban doesn't want to leave the E.U.," a senior German official said. "He really wants to change the E.U."</p> <p>By some measures, he's succeeding. Far from being a pariah, Orban has found imitators in Poland and admirers in the Czech Republic, Austria and even at top political levels in Germany.</p> <p>Orban's European opponents, meanwhile, have proved unable to curb his behavior. Rather than punish Hungary for its intransigence, Brussels continues to supply the government with billions of euros in E.U. subsidies — money that Orban's domestic critics say is vital to his survival because it boosts the economy and puts cash in the pockets of favored cronies.</p> <p>"Orban is waging his freedom fight against the E.U. with huge amounts of E.U. money," said Peter Kreko, executive director of the Budapest-based policy research firm Political Capital. "Lenin said, 'Capitalists will sell the rope to us with which we'll hang them.' Well, the E.U. is not selling. It's giving it to Orban for free."</p> <p>The E.U. never gave itself adequate tools for dealing with a wayward leader such as Orban because it never imagined needing them, even as the alliance spread far beyond its original Western European core to</p>

countries with scant experience of democratic governance.

At the start of the millennium, the bloc had just 15 members — none of them east of the old Iron Curtain. But after the fall of communism, East European countries that had been in the orbit of the Soviet Union looked to the E.U. and NATO as institutions that could bind them to the West and keep them out of Moscow's grasp. Prosperous Western neighbors spotted an opportunity to spread their influence across the continent.

Everyone assumed that, with time, differences would recede as the new members grew to adopt the values, rules and institutions of the old ones.

“We wanted to believe it. History would go on and we would be on the right side of it,” said the German official, who spoke on the condition of anonymity because he was not authorized to speak for the record. “We never imagined that history could go the other way.”

For Hungarians, too, there were expectations that, in retrospect, look naively optimistic.

“It was a fantastic constellation. We wanted it. The West wanted it. It was back wind in every respect,” said Peter Balazs, a former Hungarian diplomat who was deeply engaged in the E.U. accession process. “And the follow-up was in the fairy tales: They live happily ever after.”

Balazs, who would go on to become the country's foreign minister, said Hungary spent a decade proving to the E.U. that it was worthy of membership, working assiduously to meet the club's strict rules for entry.

But once Hungary had joined, the union's best leverage to keep the country on a free and democratic path evaporated. Meanwhile, no one had seriously planned for what would happen after Hungary and others joined the bloc — a failure that Balazs attributed to parallel illusions.

“A Hungarian illusion that the E.U. would do it, that somebody else would solve our problems,” he said. “And for Europe, the illusion that they would be like us.”

The result was fertile ground for Orban. Since coming to power in 2010, he has simultaneously used the bloc as a rhetorical foil and cash spigot — all without fear of meaningful consequences.

“I have, in fact, more respect for the decency of Euroskeptics who at least say, ‘Well, I don't like the European Union, and I don't like the values, and I'll go out,’ ” Guy Verhofstadt, who was prime minister of Belgium when Hungary joined the E.U., told Orban last year when the Hungarian leader came to speak at the European Parliament. “You want to continue the money of European funds, the money of the European Union, but not the European values.”

Verhofstadt, who is now the leader of a centrist bloc of the European Parliament, has condemned fellow E.U. leaders for refusing to hit Hungary with sanctions.

Orban openly brags of his aim to build “an illiberal state based on national foundations” and cites Russia and China as exemplary models.

He has consolidated his party's influence over formerly independent arms of the Hungarian state and society, including prosecutors' offices, government auditors and the media. If he wins reelection, as is widely expected, the 54-year-old Orban has promised to press ahead with legislation that would allow the banning of aid groups that work on behalf of refugees or other immigrants.

On the campaign trail, he delights crowds by lashing out at Brussels, part of a trinity of enemies that also includes Muslim refugees and the Hungarian American investor George Soros.

As recently as 2011, Hungary scored the highest rating possible from Freedom House, an international nongovernmental organization, but it is now the least free of all E.U. members. The corruption monitor

Transparency International ranks it the second most corrupt country in the bloc, just behind Bulgaria.

Yet Hungary is also among the greatest net beneficiaries of E.U. funds, receiving 4.5 billion euros (or \$5.5 billion) in 2016 — equivalent to 4 percent of the country’s economic output — while contributing less than 1 billion euros, or \$1.23 billion.

The money has helped to buoy the Hungarian economy, which has been growing at a healthy clip. It also has found its way into the pockets of friends, allies and family members of the prime minister.

“It’s E.U. taxpayers that feed the system and allow Orban to grow strong,” said Sandor Lederer, chief executive of the Budapest-based anti-corruption watchdog K-Monitor. “He’s decided it’s not enough for you to be the political leader. You also have to be the leader of the thieves, and this is the only way you can really exercise power.”

The mayor of Orban’s home village, a gas-fitter by trade, has become one of Hungary’s richest men during his schoolmate’s run leading the nation. Much of his wealth has been fueled by government contracts.

Companies owned or operated by Orban’s son-in-law have also fared well in the competition for government work, winning lucrative E.U.-funded contracts to upgrade street lighting in towns and cities across the nation. In January, the E.U.’s anti-fraud monitor found “serious irregularities” and “conflicts of interest” in the awarding of those contracts, which totaled more than 40 million euros, or nearly \$50 million.

But Brussels-based investigators are virtually powerless to do anything about it. Authority to pursue the matter resides in Hungary, with prosecutors who are widely perceived to do the bidding of the ruling party.

That is typical of the E.U.’s dilemma in how to address Hungary’s piece-by-piece moves against the rule of law and democratic norms.

Until recently, the bloc did not even have measures to address rule-of-law violations that fell short of triggering the bloc’s nuclear option — E.U. sanctions that would suspend a country’s voting rights.

In 2013, as a direct reaction to Orban’s moves, the E.U. enacted new rules that gave policymakers in Brussels the power to flag developments in member countries that set off rule-of-law concerns and force a dialogue with national leaders. But the new powers were not retroactive, and Hungary had already enshrined many of its legal changes. The rules also lacked teeth. Although E.U. officials searched for ways to open investigations, they found Orban was an excellent tactician, walking right up to their lines without crossing them.

“We can’t just go in there flippantly,” said a senior E.U. official who is involved in monitoring violations of European treaties and who spoke on the condition of anonymity to describe backroom discussions.

Other countries, too, may have Hungary’s back. Away from the campaign trail, Orban can often be seen joking around with fellow leaders at E.U. summits in Brussels. If they were to move against Orban, it would cost them comity and allies at an already fractious time.

<b>HEADLINE</b>	<b>04/06 Palestinians heading to Gaza border</b>
<b>SOURCE</b>	<a href="https://apnews.com/bfc315e966cd4d2ba2e4a589fadd4756/Palestinians-streaming-toward-Gaza-border-protest-camps">https://apnews.com/bfc315e966cd4d2ba2e4a589fadd4756/Palestinians-streaming-toward-Gaza-border-protest-camps</a>
<b>GIST</b>	KHUZAA, Gaza Strip (AP) — Palestinians streamed on Friday to tent camps along the Gaza-Israel border ahead of what the territory’s Hamas rulers hope will be the second mass protest in a week.  As Israel and the Hamas-led protesters geared up for another showdown along the border fence, concerns

grew about more bloodshed. Last week, more than a dozen protesters were killed by Israeli fire and hundreds injured, Gaza health officials said.

Just before Muslim noon prayers Friday, hundreds of people arrived at one of the tent camps, near the community of Khuzaa.

Activists plan to burn large numbers of tires in hopes that thick black smoke will block the view of Israeli snipers deployed on the other side of the border fence.

At one point on Friday, Israeli forces fired tear gas that landed inside the encampment, briefly sending people fleeing.

Yehia Abu Daqqa, a 20-year-old student, said he had come to demonstrate and honor those killed in the past.

“Yes, there is fear,” he said of the risks of advancing toward the fence. “We are here to tell the occupation that we are not weak.”

Protesters also moved toward other camps, including east of Gaza City, where a senior Hamas leader, Mahmoud Zahar, greeted the crowd. Nearby, smoke from burning tires rose into the sky.

Friday’s march is the second in what Gaza’s Hamas rulers said would be several weeks of protests against a decade-old border blockade of the territory.

Israel has accused Hamas of trying to carry out border attacks under the cover of large protests and said it will prevent a breach of the fence at all costs.

Israel’s defense minister has warned that protesters approaching the border fence endanger their lives, drawing condemnation from rights groups that said such seemingly broad open-fire rules are unlawful.

<b>HEADLINE</b>	<b>04/05 Puerto Rico to close 283 schools</b>
<b>SOURCE</b>	<a href="https://apnews.com/642ea22aa7cf48dba088ce9c7992a8f4/Puerto-Rico-to-close-283-schools-amid-sharp-enrollment-drop">https://apnews.com/642ea22aa7cf48dba088ce9c7992a8f4/Puerto-Rico-to-close-283-schools-amid-sharp-enrollment-drop</a>
<b>GIST</b>	<p>SAN JUAN, Puerto Rico (AP) — Puerto Rico’s Department of Education announced Thursday that it will close 283 schools this summer following a sharp drop in enrollment amid the island’s long economic slump and the continued departure of families after Hurricane Maria.</p> <p>Education Secretary Julia Keleher said there would be no layoffs, with teachers and other employees being reassigned to other schools as part of a fiscal plan that aims to save the department some \$150 million.</p> <p>The U.S. territory currently has more than 1,100 public schools that serve 319,000 students.</p> <p>“We know it’s a difficult and painful process,” Keleher said. “Our children deserve the best education that we are capable of giving them taking into account Puerto Rico’s fiscal reality.”</p> <p>Keleher said that enrollment has dropped by more than 38,700 students since just last May and that nearly half of the schools are using only 60 percent of their capacity.</p> <p>After the closures, 828 public schools will remain operational. Keleher said she has invited mayors in the island’s 78 municipalities to propose new uses for the shuttered schools.</p> <p>The announcement of closures came two weeks after Gov. Ricardo Rossello signed a bill for implementing a charter schools pilot program in 10 percent of public schools and offering private school</p>

	vouchers to 3 percent of students starting in 2019-2020 as part of an education overhaul.
	Aida Diaz, president of a union that represents some 30,000 teachers, said she and others would fight the closures.

<b>HEADLINE</b>	<b>04/05 Interview with the Saudi crown prince</b>
<b>SOURCE</b>	<a href="http://time.com/5228006/mohammed-bin-salman-interview-transcript-full/?xid=homepage">http://time.com/5228006/mohammed-bin-salman-interview-transcript-full/?xid=homepage</a>
<b>GIST</b>	<p>As Karl Vick writes in the <a href="#">April 16 issue of TIME</a>, the United States hasn't seen a visit from a foreign leader like the Crown Prince of Saudi's ongoing three-week trip since Soviet Premier Nikita Khrushchev arrived in America nearly 60 years ago. The kingdom Mohammed bin Salman, 32, essentially rules—as iron-fisted regent of his ailing, 82-year-old father, King Salman—defines frenemy.</p> <p>The Crown Prince's U.S. itinerary is as wide-ranging as the American distrust of his homeland: 55% of Americans disapprove of Saudi Arabia, according to the latest Gallup survey.</p> <p>He is in the United States to sell skeptical Americans on his audacious, risky plan to modernize Saudi Arabia and reassert its primacy in the Middle East. Over the course of three years since his father became King, MBS, as he is known, has brutally consolidated control over all the kingdom's economic and security power centers. He has used his ascendancy to introduce modest liberalization and sharply escalate a wide-ranging proxy war with Iran across the region. And he proposes to wean the kingdom off oil exports and diversify its economy for a post-petroleum future.</p> <p>On March 29, TIME interviewed the Crown Prince at New York City's Plaza Hotel, which had been taken over by the Crown Prince's traveling party. When told that the hotel had once been owned by President Donald Trump, who the Crown Prince had visited in Washington the week before, replied, "Really? Oh." Ahead of planned visits to Seattle, Los Angeles, San Francisco and Houston, the Crown Prince made his pitch during a 75-minute conversation.</p> <p>The Crown Prince defended his handling of foreign affairs, urging <a href="#">President Trump to keep troops in</a></p>

[Syria](#) and backing Israel's "right to live and coexist" with a Palestinian state. He laid out his ambitions for the Saudi economy all the while portraying himself as a man in a hurry.

"I don't want to waste my time," he says. "I am young."

An edited and condensed transcript of the conversation follows.

**TIME: How long have you been thinking about doing this [tour], and what's your rationale behind this?**

MOHAMMED BIN SALMAN: When I started to think about doing a tour, we had a plan for Saudi Arabia. And we do whatever we should do to deliver and implement these plans. And to implement what we are doing, we have to have a lot of partners around the world. The United States of America is one of our oldest allies in the whole world, and we are the oldest ally of the United States of America in the Middle East. And the economic relationship between both countries is very deep.

**You spent some time in Washington. How was that? It seems like you have a pretty good personal relationship with the President and his family.**

Of course we have a good relationship with President Trump, with his team, with his family, with all the key people in his administration, and also we have a very good relationship with many members of Congress from both parties and a lot of people in the United States of America. And everyone believes in the importance of both countries to face the dangers facing us and also to continue growing and getting a better future for both countries.

**Coming off of the previous administration, things had gotten pretty thorny at the end, specifically about the Yemen conflict.**

Yeah. Well, we might disagree on some things that President Obama—some of President Obama's views, but also we agree on a lot of things. So we worked together to fight terrorism with President Obama in the beginning of 2016 we had the same views of the Iranian regime and the danger of the Iranian regime. The only difference was in the tactics of how we should deal with that evil narrative of the Iranian regime. So it's not a big difference. We are aligned 99 percent. The difference is only 1 percent. But, you know, people try to focus on the 1 percent and avoid the 99 percent that we agreed on.

**You brought up Iran. You saw I'm sure that President Trump had recently named John Bolton to be his National Security Advisor. And he shares a lot of the views that you have specifically on Iran. What was your response was when he was named?**

Well, we deal with the United States of America, whoever represents America, we will work with him. And we believe that our interest is aligned with those American interests. And I believe we can, we work with him of course. We don't get into much in his view because it is his personal view. It's not the views of the United States of America. I'm sure when he's appointed he will represent the views of the United States of America, and we will deal with him and we will see what happens. But of course we will support him.

**I'm really curious about how you came to your plan for Saudi Arabia.**

We are now in the third Saudi Arabia which was established by King Abdulaziz, also known as Ibn Saud, my grandfather. And the first Saudi Arabia was established before 300 years, so after the time of King Abdulaziz and King Saud the establishment of the third Saudi Arabia, King Faisal came with a really great young team, and among his team were King Khaled, King Fahd, King Abdullah, King Salman, Prince Sultan, Prince Nayef, and many other people. And they've transformed the country from mud houses to world standard modern cities, modern infrastructure, a country among the G20, among the top 20 economies around the world, a lot of things. And it's too hard to convince them that there is something more to do because what happened in their time, in that 50, 60 years, it's like what happened in the last 300, 400 years history of the United States of America. And they've seen the whole movement in their lifetime.

But for us as a young generation, we've not seen this, because we were born in that great modern city. We lived in an economy that is already among the top 20 economies of the world, and our eyes are focusing on

what we are missing, what we can't do. And we believe that Saudi Arabia until today used only 10 percent of its capacity, and we have 90 percent to go.

So the plans and the vision is shaped around this missing 90 percent: How can we implement it as much, as soon as possible. And we are shaping our plan based on our strength. Not trying to copy things. We are not trying to build a Silicon Valley. There's some media houses talking about Saudi Arabia building Silicon Valley in Saudi Arabia. This is not true. We are shaping our economy based on our strengths: oil downstream petrochemicals, materials, mobility, transportation, minerals, and gas. We have a lot of gas explorations in the Red Sea, we have local content, balance of payment. We spend \$230 billion US a year outside Saudi Arabia. If we do nothing, it will go up in 2030 to between \$300-400 billion US spent outside of Saudi Arabia.

The plan is to spend half of it in Saudi Arabia. We have many programs to do this. We have privatization. At the top of the pyramid we have the IPO of Aramco, pushing this money, pushing other government assets, pushing other assets, and other cash reserves into the public investment fund, and pushing it to be the biggest fund in the whole world, above \$2 trillion. Two years ago, the size of public investment fund was \$150 billion US. Today it's \$300 billion US. At the end of 2018 it will be around \$400 billion US. In 2020, it will be something between \$600-700 billion US, and in 2030 it will be above \$2 trillion. We will invest half of this money to empower Saudi Arabia, and the other 50 percent we will invest it abroad to be sure that we are part of the emerging sectors around the world.

**How much of your challenge is putting investment in the right places, and how much of it is changing the nature of education in Saudi Arabia and of cultural expectations around who does the work?**

So first of all, our education, it's not bad. It's good. We are ranked 41 among education systems around the world. France is ranked 40, so we are almost like France, as to the quality of the education system. And no big country or big economy can be among the top 10. It's too hard. Because if you see the top 10 best education systems, you will see Singapore and you will see small countries that they can easily focus on their education system. But our ambition is not to continue to be next to France. Our ambition is to be in the top 30 to 20 in the next coming years. Especially the method of education is changing in the world. So if we still want to keep even the rank 41 and do nothing, with the new change of the method of education and understanding of education, the next 10 years we'll not be among the top 100. So we are working on that. We are watching that carefully and don't want to maintain our position. We want to be in a better position in the next 12 years. This is talking about education.

In terms of culture and social aspects: We want to drive the best talent, to get the best talent to live and come abroad to work in Saudi Arabia, you have to have good social and cultural standards. You cannot have bad livability standards and cultural standards if you want to grow and to be much bigger economically. So this is a very important thing that we are trying to improve. And I believe in the last three years, Saudi Arabia did more than in the last 30 years. And that's because it's aligned with our interest as Saudis to be competitive in livability and cultural and social. And Islam it's open. It's not like what the extremists are trying to represent Islam after '79.

So we are working hard in this area and we are trying to do our best. We have more than 10 million foreigners in Saudi Arabia, most of them working and others families of those employees. And we believe it will not decrease, it will increase because we believe Saudi Arabia for its ambition it needs a lot of human resource and human power, so a lot of jobs will be created for Saudis and for foreign people to deliver what we are trying to build in Saudi Arabia.

**Do you think you can get a culture of work?**

Of course. We have to do that. We have to be competitive.

**The Islam you describe is not necessarily the one that everyone associates with your country.**

We believe the practice today in a few countries, among them Saudi Arabia, it's not the practice of Islam. It's the practice of the people who have hijacked Islam after '79. And also it's not the practice of the social life in Saudi Arabia even before '79. And even it's not aligned with the idea of Saudi Arabia that it's a

country following the religion of Islam from the first Saudi Arabia. You see the idea that the first Saudi Arabia tried to tackle. For Islam it's totally different from what the extremists are trying to promote today.

In the first Saudi Arabia, they are trying to let people not worship a palm tree, to worship god, because at that time people were worshipping a palm tree to have a kid. Extremists tried to promote that the first Saudi Arabia is coming to promote their ideas, that what they were building after '79, especially that they've hijacked the education system and a lot of areas to manipulate that.

And this is what we are trying to show to the Saudi people and to challenge them with the practice of the First, Second, Third Saudi Arabia before '79 and also the practice of the Prophet himself in his days. So if someone comes and says "women cannot participate in sport," we tell them how about the Prophet raced with his wife. If someone comes and say "women cannot do business," the wife of the Prophet, she is a businesswoman and he used to work for her as a Prophet. So also the Prophet's practice, it is in our side.

So I believe we can do it very fast. We are not wasting time. I don't want to waste my time. I am young. I don't want 70 percent of the Saudi population to waste their lives trying to get rid of this. We want to do it now. We want to spend 70 percent of our time building things, improving our economy, creating jobs, creating new things, making things happen.

**Do you see it being dangerous in any way for your own well-being in terms of trying to make that break from the Wahhabists?**

What's Wahhabist? You've got to explain what's Wahhabist. Because there is nothing called Wahhabist. And this is one of the ideas of the extremists after '79 to put the Wahhabist things, to let the Saudis be part of something that they are not part of it. So I need someone to explain to me what are the teachings of Wahhabism. There is nothing called Wahhabist. In Saudi Arabia we have Sunni and Shiite sects. We have four schools of thought of Sunni, we have a lot of schools of thought of Shiite, and they are living normally in Saudi Arabia. They are living as Saudis in Saudi Arabia. And our laws are derived from the Qur'an and the practices of the prophet. These laws do not specify any one specific sect or school of thought.

There is member of the cabinet, the council of ministers in Saudi Arabia who is Shiite. There are members of the parliament who are Shiite. The CEO of Aramco, the biggest company in the whole world is Shiite. The most important university in the whole Middle East, west of Saudi Arabia, KAUST, who's the head of it? Shiite. So we don't differentiate among Saudis based on sects. We live in Saudi Arabia as Saudis in Saudi Arabia.

So the idea of Wahhabism, it's promoted by two sides. Extremists who want Saudi Arabia to be hijacked by the idea that they are not promoting something new, that they wanted something old, that this is the foundation of Saudi Arabia so we have to stick to it. So this is one. Two, by the Iranian regime to isolate us from the whole Muslim world by claiming that we are coming with a different sect in Saudi Arabia. And if you look at the council of clerics which is like the fatwa board you will find it comprised of people who might be closer to the Hanbali school of thought and others who are closer to the Hanafi school of thought or the Shafai'i or the Maliki. We encourage this mix of different schools in Saudi Arabia.

**Do you have any concern about trying to break away there?**

Fears from what?

**Personal security.**

No. We are doing the right things. No reasonable person can argue with what's right and what's true and what's of interest. So what we are doing is Islam, what we are doing the prophet's practice, what we are doing our ancestors practiced in the First, Second, Third Saudi Arabia before '79. Second, what we are doing is in the interest of the whole people and public. And the majority of humans, the big majority of humans, they are realistic. And of course if we work well, people understand that. And of course without people's support we wouldn't be able to do what we have been doing in the last three years. Actually we thought it would take more than 10 years to do it. But why we do it in three years? Because people support the movement.

I'll give you an example. The last national day. You know, people in Saudi Arabia they weren't used to celebrating the national day because a lot of extremists told them it was forbidden to celebrate the national day. When the Saudi officials programmed the national day planning in each city and town in Saudi Arabia, extremists attack that, that this is against Islam, no one will go, it's against the will of the people. And the national day, the people are seen and we have millions in the street celebrating the national day. So it's clear that the people are supporting that. Without the support of the people, no way, no way we would achieve anything.

**Can you see the country progressing to less than an absolute monarchy in the future? King Abdullah of Jordan says he'd like to be a constitutional monarch someday?**

What we should focus on is the end, not the means, and these ends are the rule of law, freedom of speech, freedom to work and security. These are the ends that everyone agrees on, that we agree on in Saudi Arabia in our own way. We should take the means that get us to this end.

And just to remind Americans, if it's not about absolute monarchy, you will not have the United States of America today. Three hundred years who helped in the independence of America? It was the absolute monarchy of France. Without their help, this will be a different country, different area, different history. So what we should focus on in any kind of regime that it could be a risk for the United States of America, like the Soviet Union, then you have to deal with it. But if there is any kind of regime that could create opportunity and progress with the United States of America or other countries, that means it's a regime representing what their people think is working. And we can see it in 2011 [with the Arab Spring], the regimes and the establishment of countries that didn't fit with the people, what happened to them?

**You not only represent the skipping a generation, but also only one family. So it looks to people like you might be more precarious, maybe less stable. And yet you've made very strong moves.**

No, actually, first of all, the king has the right to choose the crown prince and the deputy crown prince, and he cannot become the crown prince and the deputy crown prince without the vote among 34 voters representing King Abdulaziz' sons. So I get the highest vote in the history of Saudi Arabia, more than anyone before me. I got 31 from 34 votes of the Allegiance Council. So this is the highest. The second highest is 22 in Saudi Arabia. So historically I made a record in approval votes among the royal family. And their roles end when they vote. I become officially crown prince or deputy crown prince.

Second, I am not working alone. I'm working with all of my generation of really smart people from the royal family. We have for example more than 13 princes working in 13 regions at my age, at my generation, and also in the cabinet we have a few of them working very hard, and also in different positions in different government departments we have a lot. So I'm working with more than 40 people from the royal family from different lines to make things happen in Saudi Arabia.

**I want to get back to the Iran deal. Did you talk to the White House about that and possible decertification? And also you mentioned before that if Iran sprints for a weapon that Saudi will as well. Have you directed your government to do some research on what that would take and how quickly you could obtain one?**

Well, I can't speak about that, but I can tell you that the Iranians, they're the cause of problems in the Middle East, but they are not a big threat to Saudi Arabia. But if you don't watch it, it could turn into a threat. They are the main cause of problems, but they are not a threat to Saudi Arabia.

Why? Simple. Iran is not among the five largest economies in the Muslim world. Saudi Arabia's economy is double the size of the Iranian economy. It's growing at least two times or three times faster than the Iranian economy. UAE's economy is bigger than the Iranian economy. Egyptian economy is larger than the Iranian economy. Turkey's economy is larger than the Iranian economy... There are a lot of economies in the Muslim world larger than the Iranian economy.

Same thing goes for the army. They are not among the top five armies in the Middle East. So they are far away. But the regime's problem is that they hijack the country. They use the country's assets for their own ideological sake. And they've seen that every day from '79 to today, that they are spreading their ideology.

Even in the United States of America. And when they do that, the hidden Imam he will appear from hiding to rule the whole world: United States of America, Japan, the whole world. And they are believing in this and they are saying this loud and clear. And if they are not saying this, the Supreme Leader can prove me wrong after this interview to say I don't believe in what I'm saying.

They are doing that from '79, and if you see any problem in the Middle East, you will find Iran. Iraq? Iran's there. Yemen? Iran is there. Syria? Iran is there. Lebanon? Iran's there. Where is the stable country? Egypt? Iran is not there. Sudan? Iran's not there. Jordan? Kuwait? Iran is not there. Bahrain? Iran's not there. So all the stable countries they are stable because Iran didn't engage in it.

And it's not between Iran and Saudi Arabia. It's between Iran and Saudi Arabia and UAE and Egypt and Kuwait and Bahrain and Yemen, a lot of countries around the world. So what we want to be sure of is that whatever they want to do, they do it within their borders. We drove them out of Africa heavily, more than 95 percent. Same thing goes for Asia. Same thing goes for Yemen. And we can see in Iraq 70,000 Iraqis raising the Saudi and Iraqi flag at the game between the two national teams: Iraqi team and Saudi Arabia. So they're almost pushed back inside Iran. We hope that the Iranian people and Iran as a nation have better future without those leaders. And if that changes, of course Iran will be close to us as it used to be before '79. But if that doesn't change, they can enjoy themselves for a very long time 'til they change.

**And you have to defend your country and be prepared in that case.**

Of course.

**So have you begun to look into obtaining a weapon?**

You mean nuclear?

**Yes.**

No, regarding nuclear weapons, we have not started to do anything, and we will not start to do anything until we see Iran announce that they have a nuclear weapon. So this will not happen until that happens. And of course we are preparing our army. We have a very strong army, well-equipped army, the best in quality and mixing of quality and size of armies in the Middle East. You may find bigger armies in the region but their equipment is very low in quality. You will find only one army they has better technology than us, but we are much bigger in scale, five times. So one considering quality and size Saudi Arabia has the best army but what we want to make sure of is that whatever happens of course it's there.

But what we want to be assured is that whatever happens, the Saudi people shouldn't feel it. The economy shouldn't be harmed or even feel it. So we are trying to be sure that we are far away from whatever escalation happens, it doesn't affect the normal social life and the normal economic life in Saudi Arabia. We have that, but we want to be far away assured on that.

**So would you use ground troops in Yemen?**

Yemen, it's a battle between Yemeni people, Yemeni government trying to get rid of the terrorists who hijacked their country and their normal life. And it's their battle. Whatever they ask us in Saudi Arabia or the other 12 countries in the coalition, we'll provide. Until today they didn't ask for soldiers on the ground.

**So you would consider it?**

If it's needed, if they ask for it, we will help them and we will answer the call of the legitimate elected Yemeni president recognized by all the countries around the world, supported by the Security Council.

**The UN has said that 10,000-some civilians have been killed in this conflict, and members of Congress and independent humanitarian groups have said that air strikes carried out by your country have risen to the level of war crimes. How you would respond to those criticisms?**

Well, first of all, in any military operation mistakes happen. We cannot fight any military operation around the whole world, even United States of America, even Russia, all the countries, without mistakes. The question is are these mistakes are accidents or by mistake or intentional. Of course any mistakes made by Saudi Arabia or the coalition are unintended mistakes.

And we're working with other countries around the world to increase our rules of engagement to be sure that there are no civilian casualties in these military operations. We are the biggest donor in the history of Yemen. We are still doing our best to be sure that the humanitarian need in Yemen and the interests of the people, health care, education, whatever, it's supported. And any initiative made from the UN or any other groups around the world, immediately we help and we try to do our best to push positively in that side.

But sometimes in the Middle East, not all the choices it will be between good and bad choices. Sometimes we are between bad and worse choice. But let me tell you one important thing. The humanitarian problem in Yemen didn't start in 2015. It started in 2014 when the Houthis started to move. But what if the coalition and the Security Council didn't answer the call of the Yemeni president and the Yemeni legitimate government? You would see Yemen divided between two terrorist groups: the Houthis, the new Hezbollah in the north, and Al Qaeda in the south, they are trying to take advantage of what's happening there and they are trying to grow in 2015. So you will see Yemen split between those two terrorist groups.

It would have been much, much worse than Iraq. Because in Iraq in 2013 you have ISIS occupying half of Iraq and in the other half you have a legitimate government with an army and it took five years to get rid of those bad guys. And during these five years, we saw millions of refugees and a lot of operations, terrorist operations around the world.

So imagine kicking them out from Iraq and giving them better haven in Yemen without any ally, without any government, without any army to help us inside Yemen, how much will it take? It will take more than 5 years. It will take more than 10 years. It will take around 20 years. And it will take a coalition of more than 60 countries, a coalition more than that. And it will block 13 percent of the world trade through Babel-Mandeb [the straight between Yemen and the Arabian Peninsula]. And this 13 percent, they've tried to block it, the terrorist group, and they couldn't because of the work of the coalition. 13 percent of world trade, what does that mean? That means 13 percent of American trade, 13 percent of China trade, 13 percent of everyone's trade. That means it could harm the world economy.

So seeing that, should we wait 'til it happens? So we prove it, then we engage. Then it will be tough. There won't be any problem for the next 20 years? Or should we act? That's why there's intelligence in Saudi Arabia. That's why there is CIA in US of America. That's why there's intelligence everywhere: to read the future, to see what's happening, to see the scenarios and to avoid it from happening. And this is what happened in Yemen. We try our best to push for positive solution. We know it will not end without political solution. But until that day comes, we have no choice but to continue the military operation.

**The air strikes are intended to get them to the negotiating table, and you've been pounding them for three years to do just that. And it seems that increasingly they're lobbing ballistic missiles towards your capital. So what does it take to end this conflict? I mean, you're saying 20 years. That's a generation of Saudis that will perpetually be at war.**

No, no. I'm saying 20 years if we didn't act. And it will not take us 20 years. It will take the whole world 20 years. The Houthis don't care about interests, they don't care about Yemen interests. They only care about their ideology, the Iranian ideology, the Hizbollah ideology. Or they want to die. This is what they care about. So that's why it's hard to negotiate with them, to settle with them. The UN announced that, and the envoy announced that very clearly, that who was running away from the negotiation table is the Houthis. It's not the Yemeni government and the other Yemeni party. But of course we have to open the window for them if they want to come back and negotiate.

But today, and I'm saying that loud, that we are working through intelligence to divide the Houthis themselves. So we want to give opportunity. If there is in the second line of leaders, or the third line, or people among the Houthis who want to have different future, we will help them to split from the first line of ideological leaders of Houthis.

**How much do Saudi Arabia's interests align with Israel's interests? Would there be room for Israel in your development plan?**

Well, it seems that we have a common enemy, and it seems that we have a lot of potential areas to have economic cooperation. And we cannot have a relation with Israel before solving the peace issue, the

Palestinians, because both of them they have the right to live and coexist. And since that day happen, we will watch. We will try to support a peace solution. And when it happens, of course next day we'll have good and normal relations with Israel and it will be the best for everyone.

**Is the story true Abu Mazen was summoned to you to be told to take it or leave it, this is the best you would do?**

We have great relation with Abu Mazen. And ... and I believe Abu Mazen answered that rumor himself, that it's not true.

**It's not true. What is right in there?**

Actually King Salman told him that there is a saying in Saudi Arabia. We say the people of Mecca know best their ways. So always King Salman reminds him and tells him, you know, Abu Mazen, the people of Mecca know best their ways. And we say the people of Palestine know best their ways. So we told him that whatever you think is good for you, we will support it. Whatever we hear from our allies, from the Americans we will try to explain it, we will try to support it, to make things happen. But if it doesn't work for you, that means it doesn't work.

**But what Trump has done with Jerusalem, it kind of leaves you as the new broker.**

Actually we are trying to do our best. I try to focus positively and I try to focus on what's the opportunity, what's next, how you take things in a better situation, not how to argue with any mistakes.

**Syria for a minute. What is the realistic end to that tragedy?**

I don't know if some people will be angry if I answer that question, but I don't lie. I believe lying to people is really shameful, especially that in the year 2018, it's almost impossible to hide something from people. I believe Bashar is staying for now. And Syria has been part of the Russian influence in the Middle East for a very long time. But I believe Syria's interest is not to let the Iranians do whatever they want in Syria for the mid-term and long-term because if Syria changes ideologically, then Bashar, will be a puppet for Iran.

So better for him is to have his regime strengthened in Syria, and also it's good for Russia. Russia, better for them is to have direct strength and they empower Bashar and have direct influence in Syria and not through Iran. So these interests could reduce the Iranian influence significantly, but we don't know how much of a percentage. But Bashar for the time being is not leaving. I don't believe Bashar will leave without a war, and I don't believe that anyone wants to launch this war because it will get conflict between the United States of America and Russia and no one wants to see that.

**So you'd like to see the fighting stop because it's already a foregone conclusion.**

I think it's almost there. Now we have territory controlled by Bashar, other territory controlled by the Syrian people supported by the United States of America. And we are trying to focus in Saudi Arabia how can we help people through aid and we don't send it directly, we send it through the UN, we send it through the United States of America and through our allies, and we hope things stop as soon as possible. Because people are suffering there.

**So the President said I think today, that they're going to pull out American troops from Syria. Is that something that you applaud?**

Well, we believe the American troops should stay for at least the mid-term if not the long-term because United States of America need to have cards to negotiate and to apply pressure. If you get these troops out, you lose this card. Two, you need to have a checkpoint in the corridor between Iran and Hizbollah. If you take those troops out from east Syria, you will lose that checkpoint and this corridor could escalate other things around the region.

**So that's something you fear, that direct corridor.**

Of course. But we will handle it – but it will be tougher.

**I wanted to go back to Yemen. Under the Trump Administration, you mentioned targeting being improved. So what has been the change under this administration that has enabled you to**

**either improve your targeting, your intelligence gathering and that sort of thing?**

We don't get a lot of support from the United States of America and we don't ask for a lot of support from United States of America. We are doing this ourselves by the coalition from the Middle East and we believe we are doing it in the interests of the whole world, most of the countries around the world, economically, security, as we explained in the beginning of this interview.

**Sure. But there is a U.S. role of course.**

They are watching what's happening there. We are fighting together Al Qaeda. We have a lot of operation going in Saudi Arabia to do that, a lot of planning, a lot of programs, and we are increasing our work to hit Al Qaeda heavily in Yemen. And there is a lot of areas, a lot of cities people can't walk freely. There are cities now that are under the ruling of the legitimate government for the first time in 15 years that used to be under the control of Al Qaeda. So Al Qaeda they take a lot of hits in the last three years, more than what they took in the last 15 years, and they are almost disappearing and hiding in the caves and different areas in Yemen. And the role that we are focusing in with the United States of America is to work more and more against Al Qaeda in Yemen and do more and more and be sure that we erase them totally as soon as possible.

**The extremism question. What can be done to reverse that? I understand what you're trying to do inside your kingdom. What about outside?**

Yeah. First of all, Saudi doesn't spread any extremist ideology. Saudi Arabia is the biggest victim of the extremist ideology. If I am Osama bin Laden or any extremist or any terrorist, and I want to spread my ideology and I want to recruit, where will I recruit? Should I go to Morocco to recruit and spread my ideology or should I do it in Malaysia? Definitely not. If I want to spread my ideology I will have to go to Saudi Arabia. I have to go to the Qibla of Muslims. I have to go to the country that hosts the holy mosque. Because if I spread it there, it will reach everywhere.

And this is what happened after '79. All those extremist groups, terrorists targeting our country to recruit more from our country, to spread their ideology in our country because they want it to be spread around the world. And that's happened and we've paid the first country and the biggest debt in that. The first operations around the world happened in Saudi Arabia and Egypt in the '90s. And Osama bin Laden is manipulating the people in the beginning of the '90s. And we've asked that Osama bin Laden, should get arrested. He was outside Saudi Arabia. He should have been arrested. And The Independent answered us in '93 that Osama bin Laden was a freedom fighter practicing free speech. You can go back to this article in The Independent in '93, Osama bin Laden! That was before 9/11, 10 years before 9/11. We were saying that he was a dangerous guy. He was a terrorist. That he had to be arrested immediately. We had terrorist attacks in Saudi Arabia. We had terrorist attacks in Egypt in the '90s but we were accused of repressing freedom of speech until 9/11 happened. So it's very clear that we are the victims, and it's very clear that we are on the front line because they cannot continue recruiting people and spreading ideology if they cannot do it in Saudi Arabia, if we stood up and fight the war. And we are doing that today in Saudi Arabia.

So there's a lot of things to do. One, fighting terrorists, get them, kill them or arrest them. Two, fighting extremists. So all the extremist organizations in Saudi Arabia, we treat them as terrorist organizations, like the Muslim Brotherhood. They are very dangerous, and they are classified in Saudi Arabia, Egypt, UAE and a lot of countries in the Middle East as a terrorist organization.

So the person, he doesn't get from normal to terrorist. He gets from normal to a little bit conservative, to a little bit extreme then more extreme 'til he's ready to turn into a terrorist. And the Muslim Brotherhood network, it's part of this movement. So if you see Osama bin Laden, he used to be in the Muslim Brotherhood. . .If you see Baghdadi the leader of ISIS, he used to be from the Muslim Brotherhood. Actually if you see any terrorist, you will find that he used to be from the Muslim Brotherhood.

And you know what's the biggest danger? They're not in the Middle East because they know that the Middle East is taking good strategy against them in Saudi Arabia, Egypt, UAE, Jordan, and a lot of countries. Their main target is to radicalize Muslim communities in Europe. They hope that Europe in 30 years will turn to a Muslim brotherhood continent, and they want to control the Muslims, in Europe by

manipulating the Muslim Brotherhood. So this will be much more dangerous than the Cold War, than ISIS, than Al Qaeda, than whatever we've seen in the last hundred years of history.

So fighting extremism is not only by going against them, spreading moderation, this is part of it. But there is also a lot of things that have to be done: recognizing those groups, putting laws to fight those groups, spreading what do you think it will take us to make people as a terrorist. That doesn't mean freedom of speech. You have to pay attention because this is the route of taking people to terrorism.

So there is a lot of things that have to be tackled a different way. We are trying to do our part in Saudi Arabia and our laws and our achievements in the security planning, security strategy and also in our media strategy and our education system, we did a lot. In the last three years we did a lot, also before that, and we are doing more in the future, and also we are doing a lot of things with a lot of countries around the world. But we feel that the Western countries, they are only trying to fight those extremists by just announcing opportunity of moderation and openness in the West. If you want to fight them, you have to put them as a criminal in your laws.

**Is that what's happening in Saudi?**

Yeah. The Muslim Brotherhood have been classified as a terrorist organization for many years.

We have the Muslim Brotherhood including the Saruris. So a lot of documentaries around the world, are calling the Saruris as Wahhabis — actually we call them in Saudi Arabia Saruris. So those ahead a little bit within the Muslim Brotherhood, viewing things more extremely in the Middle East. So we have the Muslim Brotherhood including the Saruris. But in our law they are criminals and whenever we have enough evidence against any one of them, they will face a court.

**What do you think has been the biggest American mistake in the Middle East in the last 15, 20 years?**

First of all, mistakes happen. Mistakes will not stop because we are human. So a country will make mistakes, individual will make mistakes. Our mission is how to minimize these mistakes as much as we can. I believe two big mistakes. Getting into Iraq, it's a big mistake. I believe the United States of America should stop after they finish the job in Afghanistan and they should have focused on how to turn Afghanistan from an inferior state to a normal state. So this is one mistake. The other mistake is taking the American forces out of Iraq and disbanding the Iraqi army.

So these are the two biggest mistakes that created other things today in the Middle East.

**I want to go back to the internal. I was wondering if you were making any moves in respect to ending or rolling back public beheadings and executions.**

You mean executing extremist people?

I believe until today the United States of America and a lot of states, they have capital punishment. We've tried to minimize that so we have clear laws that we can change, like if a person kills a person, they have to be executed in our law. But there are few areas that we can change it from execution to life in prison. His Majesty, the King, doesn't wake up and just sign whatever he wants to sign. He works by the law, by the book. So there are laws also how the king functions as a king or as a prime minister.

So we are working for two years through the government and also the Saudi parliament to build new laws in that area. And we believe it will take one year, maybe a little bit more, to have it finished.

**So it is an initiative.**

Yeah, of course it's an initiative. But we will not get it 100 percent, but to reduce it big time.

**And in the same realm of law, human rights groups point to people who they consider political activists who are put in jail or bloggers. Are you sensitive to that subject? You talk about the ideal of freedom of speech**

We used to call them — in the '90s, they used to call Osama bin Laden the same thing and he turned out to

be the biggest danger for the whole world. And they call them today the same thing, and we call them the Muslim Brotherhood Party or the Saruris Party or people that are linked to agencies and working for different countries. And in each case, when the investigation ends, we announce the details publicly.

**Is there — the delay with the IPO, why have you delayed that and are you still considering putting it on the New York Stock Exchange?**

We do not delay it. We said we will be ready to IPO around 2018. And we are ready. We did all the laws. We did all the steps that are making us ready to IPO it. Now it's a matter of choosing the right time. So we believe oil prices will get higher in this year and also get higher in 2019, so we are trying to pick the right time. But we are ready to IPO it now if the time is right.

**Are you still considering putting it on the New York Stock Exchange?**

We are looking into all options, and the team who's working in Aramco IPO keep telling me, "Don't say anything about that."

**I was wondering with all these initiatives that you have, the solar initiative and some of the reforms at home, I was wondering how dependent that is on the finite nature of oil.**

Yeah.

**So how big of a role does it play?**

I don't believe it will harm the role of oil. Let's talk a little bit about oil then we will talk about the initiative, if it's okay. First of all, oil demand is rising and according to Aramco's estimate's they believe that demand will continue to grow until 2040. But according to the most conservative estimates from around the world they believe that it will continue growing till 2030. And to continue raising to 2030 an amount 1.5 percent every year. And after that it will decline.

So today the demand is around 100 million barrels per day. In 2030 it will be around 120 million barrels per day. In 2040 it will go back to something around 100 million barrels per day. Then in 2050, '60 it will be something around 80, 70 million barrels per day. 85 percent — 85 million barrels from this demand approximately it's going to fuel. 30-40 million barrels for cars fuel and the rest is fuel for airplanes and ships.

What's changing today, it's the cars, because of the electric car, but the effect we will not see it until after 2030. But the ships and the planes it seems it will continue for quite a long amount of time because no one today is talking about electric planes or ships. When they start talking about it, we will see it materialize after 20 years.

From the other side, the 50 million barrels or less of demand for petrochemicals and materials, it's increasing every year 3.5 percent. So it will be in 2030 around 20 million barrels. And in 2050, 2060, it will be around 50 million barrels. So this is a new demand for oil.

Just to give example, every one of you is wearing part of these petrochemicals and materials. In your buttons and your pen and your shoes and your phones you have some of these materials, and more will come such as carbon fiber. Carbon fiber is one of the best materials around the world. It's expensive, but we are investing in that. That will lower the price so we will see it used in planes, in ships, and in cars. So there is a new growing demand and continuity of demand.

The other side is the supply. A lot of supply will disappear in the next 20 years. After five years, China will produce nothing. Today they produce around 4 million barrels per day. They will produce nothing in five years. And other countries after 10 years, a lot of countries disappear. A lot of the supply coming from the United States of America will disappear after ten years.

After 18 years, the whole Russian supply will disappear, 11 million barrels. It will turn to zero after 18 years. So it seems that we are not only keeping the 10 million barrels we're producing, it seems that we will produce much, much, much — a lot of barrels in the future. So it's very clear the sustainability of oil if we take the conservative estimates not Aramco's estimates.

So solar energy doesn't harm oil because it's not used for fuel to airplanes or ships and it will not go against the growing of the petrochemical demand. Actually we believe that pushing in that direction, it will help that the oil play more of a good role to protect the environment because if you produce plastic, you shouldn't throw it away. You should treat it and recycle it in an environmentally friendly way, better than producing oil for cars.

The opportunity now, what we are doing in Saudi Arabia is in solar energy is that we believe that we are the only country that can make a breakthrough in this field and solar manufacturing field is Saudi Arabia because we have all the elements of success. So a lot of countries have sun: Algeria, India, name it. We have sun. But not all countries have the local demand. So fewer countries have local demand. No country can have a demand of 150 gigawatts, 200 gigawatts. It's us, India, and a few countries. Other countries in the Middle East couldn't even reach 30 gigawatts of demand. So the huge demand push for things to make it happen.

Three, we have more than that. We have the whole supply chain for manufacturing solar panels in Saudi Arabia. Four, we have the whole kind of material for that. So we have silica, a lot of silica, but it's not like the silica in Algeria and Africa and other countries, even UAE and other countries. The silica in the north side of Saudi Arabia, it's purity can reach 99.7%. The other silica around the world, it doesn't even reach 90 percent. So the silica in Saudi Arabia costs nothing to manufacture it and to build it. It costs nothing. So this is not just material. It's also cheap and high quality material.

And the other countries who have a lot of silica, much lower quality and expensive... we will have the other kind of material. So part of the material, the cables, the cable cover, and we have a lot of cable in Saudi Arabia, a lot. To manufacture this to do the solar panel, you need a lot of gas, and we have a lot of discovery of gas in the Red Sea.

So the mix of the materials, supply chain, demand, sun are all available in Saudi Arabia. It doesn't exist anywhere around the world. So if we say, "We cancel the project. We will not do the 200 gigawatts," no one will do it. So we worked very hard in the last few months to gather the best partners for that from different areas from the world, from America, from China, from Japan, and now we are in the final stage to shape the new Aramco Saudi Arabia. Maybe since the biggest partner is Japan, we could maybe call it Jaramco or something like that.

So this it will help Saudi Arabia to save \$40 billion every year. It will increase Saudi Arabia GDP by \$20 billion. It will create 100,000 jobs, and it will help us to export because we will export for the whole world the cheapest solar panel and the highest efficient solar panel. So we are helping the whole world to produce energy, continuous energy cheaper than they ever have. And we are taking the risk to push all of our demand in that area.

<b>HEADLINE</b>	<b>04/05 NYC settles w/Muslim groups</b>
<b>SOURCE</b>	<a href="https://www.washingtontimes.com/news/2018/apr/5/new-york-city-settles-american-muslims-after-years/">https://www.washingtontimes.com/news/2018/apr/5/new-york-city-settles-american-muslims-after-years/</a>
<b>GIST</b>	<p>New York City has reached a settlement giving Muslims a say in police training and policies, and the city agreed to pay mosques and businesses who said they were illegally targeted for surveillance because of their religion, Muslim groups said Thursday.</p> <p>The groups said they've been targeted for years following the Sept. 11, 2001 terrorist attack, and they hope this settlement sends a message to the Trump administration to be careful about its own plans, such as the president's travel ban.</p> <p>The Muslim groups said roughly 20 mosques, two Muslim student organizations in New Jersey, 14 restaurants, two grade schools and 11 retail stores faced surveillance. Visitors and customers were</p>

photographed and undercover officers and informants infiltrated some of the organizations during a decade-long period.

The organizations sued, saying they were being singled out purely because of their religion. A federal district court ruled against them in 2014 but the 3rd U.S. Circuit Court of Appeals stepped in a year later and said their lawsuit could proceed, comparing the surveillance to targeting of the Japanese during World War II.

That led to Thursday's settlement, in which the New York Police Department agreed not to engage in surveillance on the basis of religion or ethnicity, to meet with the plaintiffs to talk about their concerns, and to pay damages to mosques and businesses that suffered from the surveillance.

"The message to police departments from coast to coast is loud and clear: you cannot treat someone as a suspect based on their faith," said Farhana Khera, executive director of Muslim Advocates, a legal advocacy group that represented the plaintiffs.

The city, while acknowledging the settlement, said it wasn't admitting to any misconduct or violations of law.

"The resolution of this case affirms and enhances the NYPD's commitment to conducting effective investigations to prevent crime and terrorism," said James P. O'Neill, the police commissioner.

The city will pay \$47,500 to businesses and mosques who suffered financially from the surveillance, as well as \$25,000 to the individual plaintiffs. The city will also pay \$950,000 in fees to the lawyers for the Muslim plaintiffs.

Under the agreement, the plaintiffs' lawyers will also be able to review and make recommendations on policy and training guidelines surrounding religious and First Amendment activities.

<b>HEADLINE</b>	<b>04/05 Time for the Daffodil Parade</b>
<b>SOURCE</b>	<a href="http://www.thenewstribune.com/news/local/article207805374.html">http://www.thenewstribune.com/news/local/article207805374.html</a>
<b>GIST</b>	Newly crowned Queen Allie Brooks will preside over Saturday's Daffodil Festival Grand Floral Parade.

	<p>More than 180 entries, including marching bands and floats decorated with thousands of daffodils, will travel through Tacoma, Puyallup, Sumner and Orting. The theme of this year's parade, the 81st, is "Traditions in Bloom."</p> <p>The Daffodil Festival is 85 years old this year, and there have been parades every year since 1934, except in 1943, 1944 and 1945 during World War II.</p> <p>Start times for the parades are:</p> <ul style="list-style-type: none"> <li>▪ Tacoma: 10:15 a.m.</li> <li>▪ Puyallup: 12:45 p.m.</li> <li>▪ Sumner: 2:30 p.m.</li> <li>▪ Orting: 5 p.m.</li> </ul> <p>Brooks, a senior at Lincoln High School in Tacoma, was crowned queen of this year's Daffodil Festival at a ceremony Saturday at Tacoma's Rialto Theater. Her duties will include a year of community service and appearances. Brooks was selected from a court of 23 students from Pierce County high schools.</p>

<b>HEADLINE</b>	<b>04/05 Seattle PD expands Naloxone program</b>
<b>SOURCE</b>	<a href="http://mynorthwest.com/947220/seattle-pd-expands-naloxone-program-amid-opioid-crisis/">http://mynorthwest.com/947220/seattle-pd-expands-naloxone-program-amid-opioid-crisis/</a>
<b>GIST</b>	<p>It's a move that the Seattle Police Department hopes will help save people struggling with opioid addiction.</p> <p>On Thursday, SPD announced the expansion of their Naloxone program. Naloxone is designed to rapidly reverse an overdose.</p> <p>Interim Police Chief Carmen Best says during the last two years of the program, officers have saved approximately two dozen people.</p> <p>Amid the opioid epidemic, Chief Best says it is the department's responsibility to step up.</p> <p>"There is still so much to do," she said.</p> <p>The department will receive 100 Naloxone donations. Chief Best says eventually they want a kit for every patrol car.</p> <p>Prior to SPD's announcement, Surgeon General Dr. Jerome Adams called on more Americans to carry Naloxone. He said he wants more federal funding to increase access to the medication. It can cost around \$80 for one dose.</p> <p>"You don't have to be a policeman or a firefighter or a paramedic to save a life," Adams said.</p> <p>More than 42,000 Americans died from opioid overdoses in 2016. That is double the number who died in 2010.</p>

<b>HEADLINE</b>	<b>04/05 Marysville police prevented massacre?</b>
<b>SOURCE</b>	<a href="http://mynorthwest.com/947303/how-marysville-police-used-erpo-to-prevent-possible-vegas-style-">http://mynorthwest.com/947303/how-marysville-police-used-erpo-to-prevent-possible-vegas-style-</a>

	<a href="#">massacre/</a>
GIST	<p>Marysville Police may have prevented a Vegas-style massacre after initiating their first Extreme Risk Protection Order.</p> <p>Extreme Risk Protection Orders (ERPO) are Washington state’s version of a red flag law. They allow police or family members to ask courts to temporarily remove someone’s gun rights, even if they haven’t committed a crime when they exhibit certain dangerous behavior.</p> <p>Investigators say the case in Marysville is exactly how ERPOs are meant to be used.</p> <p>It all started a few weeks ago when police received a 911 call from a woman saying her husband was acting strangely. She said he was extremely paranoid and possibly having some sort of mental breakdown.</p> <p>Marysville Police Commander Mark Thomas says that’s when officers went to the home.</p> <p>“When we arrived on scene we got more information that he thought he was being watched and followed and possibly poisoned by government sources and other individuals and sent her out of the house,” he said.</p> <p>The woman’s husband hadn’t made a threat to his family or his wife at that point. “We were on scene for over an hour trying to contact him. We did see him through the window, we knew that he had an AR-15 assault rifle that he was carrying with him and a gas mask that he was carrying with him.”</p> <p>After trying to engage the man for more than an hour to get him some help or services, police made the decision to pull out to keep from escalating the situation and let things calm down.</p> <p>“He didn’t make any threats to harm a family member or anything so there’s no domestic violence situation, he actually asked his wife to leave for her own protection, so we didn’t have a crime. And what we didn’t want to do is force a confrontation and get in a position where we’d have to use force or even deadly force to resolve the situation where we have someone who has not committed a crime and in their house carrying a firearm.”</p> <p>And that firearm was completely legal. The man has a concealed pistol license and bought the AR-15 legally.</p> <p>The next day the man’s family called the police again, with new information.</p> <p>“Basically saying, that he has rented two hotel rooms at the Tulalip Casino Resort, that he has firearms with him and that he is still really paranoid, people following him, very agitated. Those kinds of things.”</p> <p>Commander Thomas says that raised serious red flags.</p> <p>“Of course I am thinking Las Vegas and those kinds of incidences. The fact that he has access to lots of weapons — we know for a fact that at least one of them is an assault weapon. His state of mind, his paranoia, you just don’t know what he’s seen, right? I mean, it’s potentially one of those things that if we don’t act then what can we live with after the fact?”</p> <p>At that point, the man had been talking with his daughter on the phone, telling her he rented hotel rooms. Police began talking with police at Tulalip, but the man was not there and nobody knew where he was. His daughter tracked his phone to help police locate him.</p> <p>Eventually, they found him at a friend’s house in Seattle.</p> <p>“They get the address, they set up, and then we dispatched two units down there to hopefully contact him in a safe manner which eventually happens,” Thomas said.</p> <p>When police arrived, he had a loaded firearm on him. They confiscated the gun and took him into custody.</p>

He was involuntarily committed to the hospital for a 72-hour mental health evaluation.

“During that process, the family members give us permission to search the house and we search the house and we find eleven other firearms,” Thomas explained. “Some of them are hidden, secreted around the house. That in and of itself is disconcerting; that he’s staged weapons around the house. So we recovered those weapons, we recovered a weapon that was on him at the time, and there were additional weapons in his truck. We eventually take possession for safekeeping all of the weapons.”

Police were allowed to take those weapons for safe keeping because the family asked them to, but the man had not committed a crime so it was just a temporary fix.

Police used an Extreme Risk Protection Order to ensure he couldn’t get his hands on a gun after he left the hospital.

“It took us a day to put together all of the information and then talking to the family to get updates and things like that and then we produced our affidavit,” Marysville Prosecuting Attorney Jennifer Millett. “Then when we went to our court, our court was very quick with it. We filed it in the morning. We had a hearing at eleven o’clock, and by 11:30 we had the ex parte order to go and serve him and get transferred to superior court.”

Millett says this particular case is exactly what ERPOs are for.

“I can’t think of a better example than the facts that we had in this case in regards to using this law.”

As for whether getting the ERPO prevented a mass shooting, Thomas says, “personally, I’d feel horrible if we could have done something and didn’t do anything if somebody got hurt. It’s hard to say if having done what we’ve done we’ve saved people or saved injury because you just don’t know. He might have come to his senses or the family might have been able to convince him to seek out medical attention and you just don’t know. But when you’re dealing with firearms — large-capacity type firearms — it’s not worth the risk.”

<b>HEADLINE</b>	<b>04/05 Kashmir students clash w/India police</b>
<b>SOURCE</b>	<a href="http://abcnews.go.com/International/wireStory/kashmir-students-clash-india-police-lockdown-ends-54250671?">http://abcnews.go.com/International/wireStory/kashmir-students-clash-india-police-lockdown-ends-54250671?</a>
<b>GIST</b>	<p>Students protesting Indian rule in disputed Kashmir clashed with government forces on Thursday after authorities reopened schools following the killings of 13 rebels and five civilians.</p> <p>Government forces fired tear gas to stop students from marching at several colleges in Indian-controlled Kashmir’s main city of Srinagar. The students chanted anti-India slogans and marched on the streets in the city center while demanding an end of Indian rule over the region.</p> <p>Clashes also erupted in other parts of Kashmir as students hurled rocks at police and paramilitary soldiers. They also burned a police bunker in Srinagar.</p> <p>Some students were reportedly injured in the clashes.</p> <p>The students were protesting the killings of 13 rebels and five civilians on Sunday in fighting with Indian troops. At least three Indian soldiers were also killed in the fighting, which was followed by a security clampdown and a strike called by separatists who challenge India’s sovereignty over Kashmir.</p> <p>Authorities shut schools and colleges and canceled university exams in an attempt to stop protests by students.</p>

<b>HEADLINE</b>	<b>04/05 China tops global solar energy investment</b>
<b>SOURCE</b>	<a href="http://abcnews.go.com/International/wireStory/china-leads-global-solar-energy-investment-us-europe-54255420?">http://abcnews.go.com/International/wireStory/china-leads-global-solar-energy-investment-us-europe-54255420?</a>
<b>GIST</b>	<p>A U.N.-backed report shows more money was invested in solar energy last year than in any other power source, with China responsible for much of the boom.</p> <p>Overall, a record 98 gigawatts of new solar capacity were installed worldwide in 2017. Global investment in solar topped \$160 billion, an increase of 18 percent compared to the previous year.</p> <p>China alone spent \$86.5 billion on solar installations, adding 53 gigawatts of capacity.</p> <p>The report, published Thursday, found renewable energy investments in the United States, Europe and Japan declined noticeably in 2017, partly due to falling prices.</p> <p>Total renewable energy investments reached almost \$280 billion last year. Coal and gas accounted for \$103 billion, while spending on large hydropower dams and nuclear plants stood at \$45 billion and \$42 billion respectively.</p>

<b>HEADLINE</b>	<b>04/05 UK opens military base in Bahrain</b>
<b>SOURCE</b>	<a href="http://abcnews.go.com/International/wireStory/uk-opens-persian-gulf-naval-base-bahrain-54254619?">http://abcnews.go.com/International/wireStory/uk-opens-persian-gulf-naval-base-bahrain-54254619?</a>
<b>GIST</b>	<p>Britain opened its first permanent military base in the Middle East in more than four decades on Thursday in the Persian Gulf country of Bahrain, giving the U.K. an expansive presence along key international shipping routes.</p> <p>The HMS Juffair naval facility can house up to around 500 Royal Navy personnel, including sailors, soldiers and airmen, in a region where maritime security ensures oil shipments and goods make it from Asia to Europe. British officials have described it as the first permanent British base east of the Suez Canal since 1971.</p> <p>"The aim of the Royal Navy being out here anyway is to enhance and ensure the maritime security in the region, and whether or not that's law and order on the high seas, countering piracy, countering terrorism, making sure that the high seas are all safe for the free-flow of commerce, the free flow of trade to be able to take place," said Commodore Steve Dainton, U.K. Maritime Component Commander.</p> <p>Bahrain, located off the coast of Saudi Arabia and just west of its rival Iran, also plays host to the U.S. Navy's 5th Fleet. Tense encounters have occurred between U.S. and Iranian naval forces in the Persian Gulf, though military officials say provocations of U.S. navy ships in recent months have halted.</p> <p>The new British hub makes it easier for the Royal Navy to conduct longer-term deployments in the Persian Gulf and will offer engineering and logistical support for ships. The facility includes sleeping accommodations, sport facilities and recreational areas for troops.</p> <p>"It offers us a much better base than we've had before, a much more permanent presence and a real infrastructure for our people who are working and operating here all the time," said Commander of the Joint Forces Command of the U.K. Gen. Chris Deverell.</p> <p>The port would also be able to service mine sweepers and aircraft carriers, though carriers like the HMS Queen Elizabeth will not be able to dock there because the water is too shallow.</p>

HEADLINE	<b>04/05 When Native activists invaded Ft Lawton</b>
SOURCE	<a href="http://q13fox.com/2018/04/05/when-native-americans-invaded-fort-lawton/">http://q13fox.com/2018/04/05/when-native-americans-invaded-fort-lawton/</a>
GIST	<p>SEATTLE -- Randy Lewis was 23 years old when he invaded Magnolia's Fort Lawton. He was fresh off occupying Alcatraz Island, where he had met Bernie Whitebear, another Native American activist from the Colville reservation in northeast Washington.</p> <p>Lewis recalled when Whitebear came to him with news the government planned to make Fort Lawton a federal surplus, meaning it would be offered to non-federal groups at a steep discount.</p> <p>"So Bernie said, 'If it's gonna be declared federal surplus, then Native Americans have first refusal rights,'" Lewis said.</p> <p>They tried to stake a claim on the land as a place to serve their struggling population of urban Indians.</p> <p>"We needed an educational center, we needed a health care center, so many things," Lewis said.</p> <p>According to Lewis, they applied for the federal surplus but were ignored. At the time, Whitebear had said that if it took an occupation to get their point across, then that's what they would do.</p> <p>"The plan was just to come in originally. See, we didn't expect to be attacked," Lewis said.</p> <p>It was March 8, 1970, and it was chaos. When about 100 Native Americans and supporters scaled the fort, the military police quickly outnumbered them.</p> <p>"All hell was breaking loose," Lewis said. "The Jeeps were trying to run people down. Jeeps were flipped, vehicles destroyed. Little kids had run and hidden under the barracks. The MPs were trying to flush them out so they were throwing grenades underneath."</p> <p>"Did they know they were kids?" asked Q13 reporter Simone Del Rosario.</p> <p>"I don't know," Lewis replied. "I don't think they really cared at that point."</p> <p>The military police kicked out the women and children and locked up the men. Lewis said they were beaten, bones were broken and they were only released when a human rights lawyer stepped in.</p> <p>"He had to come in and, literally, with a writ, get us out."</p> <p>The first invasion had failed but the movement was gaining ground with public opinion. The activists had given the media front-row access to their cause. Actress Jane Fonda was there and helped draw international attention.</p> <p>They readied for their second strike, this time climbing the cliffs.</p> <p>"I went up to the berm to look and as far as I could see, stretched out MPs in riot gear, big shields," Lewis said.</p> <p>They were hauled off again and dozens were arrested. One more attempted invasion later and their fight was no longer physical.</p> <p>"From then on it became the battle in the public media," he said.</p> <p>It was a battle they would eventually win. They didn't get all 1,100 acres, many of which would become today's Discovery Park. But United Indians for All Tribes secured 20 acres, and with it they created a cultural center, family services, education classes and a preschool. It opened in 1977.</p>

	<p>"If you can imagine what the celebration was like when we opened this building, when we had the pow wow, it was incredible. What was once thought of as a fantasy became reality," Lewis said.</p> <p>The cultural center remains as a tangible result of their civil rights movement to pass on to the next generation.</p>

<b>HEADLINE</b>	<b>04/05 Seattle home median nears \$820,000</b>
<b>SOURCE</b>	<a href="https://www.seattletimes.com/business/real-estate/home-prices-have-risen-fastest-in-south-seattle-as-citywide-median-nears-820000/">https://www.seattletimes.com/business/real-estate/home-prices-have-risen-fastest-in-south-seattle-as-citywide-median-nears-820000/</a>
<b>GIST</b>	<p>South Seattle neighborhoods have taken the brunt of the region's biggest home-price increases, pricing some people out of an area that had long been an affordable option for those not making huge incomes.</p> <p>Every neighborhood in King County has seen home costs balloon since the region's real-estate market first started to catch fire six years ago. But the rise hasn't been completely even.</p> <p>In the first three months of 2012, the cost of a typical home in Southwest Seattle, which includes Sodo and Beacon Hill, was \$222,000. In the first few months of this year? \$661,000.</p> <p>In Southeast Seattle, which includes Rainier Valley and Mount Baker, home costs have grown from \$275,000 to \$650,000 during that span.</p> <p>In all, home prices nearly tripled in some southern neighborhoods since the bottom of the recession, while home values in the pricier central and northern parts of the city roughly doubled.</p> <p>The figures come from the Northwest Multiple Listing Service, which on Thursday released its latest monthly home-sales report showing the region's homebuying market has, yet again, gotten even hotter.</p> <p>Citywide, Seattle home prices topped \$800,000 for the first time. The median cost of a single-family house, now just under \$820,000, smashes the old record of \$777,000, which was set just one month prior.</p> <p>South Seattle remains the most affordable option — if you can call it that — in the city. But median homes in South Seattle are now more expensive than the typical house in pricey cities like Boston, Washington, D.C., Miami and Denver.</p> <p>South Seattle homes are even 65 percent more expensive than they were right before the housing bubble burst a decade ago.</p> <p>The housing market's effects on South Seattle have been well-documented: The black population has plummeted, gentrification fears have grown and development has transformed neighborhoods.</p> <p>A big part of what's been lost is the promise of an affordable home inside the city limits for working-class people. Six years ago, the household income required to afford a mortgage on a home in South Seattle was about \$50,000; now, it's about \$130,000.</p>

<b>HEADLINE</b>	<b>04/05 Germany denies Spain extradition request</b>
<b>SOURCE</b>	<a href="https://www.upi.com/Top_News/World-News/2018/04/05/German-court-grants-Puigdemont-bail-rejects-Spains-extradition-request/8701522953952/?utm_source=fp&amp;utm_campaign=ts_tn_int&amp;utm_medium=6">https://www.upi.com/Top_News/World-News/2018/04/05/German-court-grants-Puigdemont-bail-rejects-Spains-extradition-request/8701522953952/?utm_source=fp&amp;utm_campaign=ts_tn_int&amp;utm_medium=6</a>
<b>GIST</b>	April 5 (UPI) -- A German court granted bail to former Catalan President Carles Puigdemont on Thursday

and denied Spain's request for extradition on the grounds of rebellion.

The Higher Regional Court in Schleswig said it would not accept Spain's extradition request because the country doesn't have a comparable law. The court said it would consider an extradition request based on allegations of corruption, though.

The court ordered Puigdemont's release on about \$90,000 bail.

German police arrested Puigdemont in March while he was crossing into the country from Denmark on his way from Finland to Belgium. Puigdemont had been living in self-imposed exile in Brussels after the Catalan Parliament unilaterally declared independence from Spain in October.

After a referendum in Catalonia, the central government in Madrid voided the Catalan regional government, imposed direct rule and called new elections. Spain's Supreme Court determined 25 Catalan leaders should be tried for rebellion, embezzlement or disobeying the state. Spain issued a European Arrest Warrant for Puigdemont in March, shortly before his arrest in Germany.

Also Thursday, Spanish police arrested Josep Lluís Traperó, the former head of the Catalan police force, for his alleged role in the independence bid.

Spanish national court judge Carmen Pamela said the regional police force "shared a common goal of bringing about Catalonia's secession and the proclamation of a republic, and in this manner changing the political organization of the state and the government, contrary to the Constitution and the statute of autonomy."

<b>HEADLINE</b>	<b>04/06 Army: program cuts likely in reorg</b>
<b>SOURCE</b>	<a href="https://www.upi.com/Top_News/US/2018/04/06/Program-cuts-likely-under-Army-secretarys-new-Futures-Command/6821522958394/?utm_source=fp&amp;utm_campaign=ts_tn_us&amp;utm_medium=1">https://www.upi.com/Top_News/US/2018/04/06/Program-cuts-likely-under-Army-secretarys-new-Futures-Command/6821522958394/?utm_source=fp&amp;utm_campaign=ts_tn_us&amp;utm_medium=1</a>
<b>GIST</b>	<p>April 6 (UPI) -- The secretary of the U.S. Army said Thursday he plans to build a more lethal force under the Futures Command.</p> <p>Secretary Mark Esper described the plans at the Heritage Foundation, and said they will likely include cutting some of the 800-plus Army programs to finance modernization.</p> <p>The Futures Command is the first Army reorganization effort since 1973 and will use technologies to make the branch more successful through six tactics that include improving manned and unmanned vehicles, updating missiles and improving helicopter and air defenses.</p> <p>In order to support production for these prototypes, Esper said he'll have to free up funds for the new initiatives.</p> <p>"We can't continue to ramble along funding 800 programs when we have higher priority needs," he said. "That's spreading the peanut butter, as we like to say, and I think the days of spreading peanut butter are over."</p> <p>Esper did not say which programs would be shut down, but said he will avoid arbitrary cuts.</p> <p>The secretary also said while he is not concerned for the 2018 and 2019 fiscal years, he wants to start looking ahead to the 2020 and 2021 budgets -- that could finance new technologies like directed-energy weapons, hypersonics and cybersecurity</p> <p>Dan Grazier of the Project on Government Oversight said restructuring initiatives like the Futures Command is a tactic to cut into existing programs to fund larger budgets that use money to unnecessarily</p>

	<p>upgrade equipment.</p> <p>"I would hope everyone is careful about what they cut and they actually evaluate things not just on their age but on their effectiveness and contribution to the overall mission," Grazier said.</p> <p>Introducing newer equipment can induce extra complicity, Grazier said. He also mentioned that innovative systems can distract from a military mission because newer prototypes do not always equal efficiency.</p> <p>"We actually spend more time fiddling with our own systems than facing outward, thinking about what we are trying to accomplish and what we are going to do with the enemy," he said.</p> <p>Esper said new technologies are necessary to advance military success against adversaries on the ground and in increasing cybersecurity threats.</p> <p>"We need to make the leap to the next generation of technologies," he said. "That's why we want to move things left in terms of prototyping and production."</p> <p>Jacob Cohn of the Center for Strategic and Budgetary Assessments said he agrees with the secretary's logic to cut programs for the benefit of the Futures Command.</p> <p>"The choices might not be easy, but it's necessary to fund the kind of transformation that the Army needs to make," Cohn said.</p> <p>Esper also talked about recruiting civilian talent to support technological advancements, saying he plans to headquarter the command in an urban environment where the Army can recruit a team of engineers and other industry forces whose expertise can help predict what future threat environments will look like.</p>

<b>HEADLINE</b>	<b>04/06 Calif. 'sanctuary laws' roil DOJ in fight</b>
<b>SOURCE</b>	<a href="https://www.upi.com/Top_News/US/2018/04/06/Sanctuary-laws-roil-California-in-fight-with-Justice-Department/2741522290007/?utm_source=fp&amp;utm_campaign=ls&amp;utm_medium=1">https://www.upi.com/Top_News/US/2018/04/06/Sanctuary-laws-roil-California-in-fight-with-Justice-Department/2741522290007/?utm_source=fp&amp;utm_campaign=ls&amp;utm_medium=1</a>
<b>GIST</b>	<p>April 6 (UPI) -- California has become ground zero in a battle over so-called "sanctuary laws" aimed at protecting people from arrest and deportation amid a Trump administration crackdown on illegal immigration.</p> <p>State laws that took effect Jan. 1 aim to circumvent local responsibility for immigration enforcement. But some California cities, counties and towns are revolting, instead taking measures to support enforcement.</p> <p>"Overall what's at stake is many states and localities have been experimenting with different policy efforts to protect immigrants and to get their local government officials out of the business of immigration enforcement," said Annie Lai, co-director of the Immigrant Rights Clinic at the University of California-Irvine.</p> <p>On March 6, the U.S. Department of Justice sued California over three state laws passed last year:</p> <ul style="list-style-type: none"> <li>-- One that prohibits state and local law enforcement agencies from using public funds to "investigate, interrogate, detain, detect or arrest persons for immigration enforcement purposes."</li> <li>-- One that requires Immigration and Customs Enforcement to obtain a judicial warrant to enter a place of business that has non-public space without consent and restricts employers from sharing information with ICE without ensuring they have a warrant or subpoena.</li> <li>-- A public safety omnibus that includes provisions preventing state and local agencies from entering into contracts with the federal government to detain immigrants and allowing the state attorney general to</li> </ul>

monitor federal immigration detention facilities.

"Federal law is the supreme law of the land," U.S. Attorney General Jeff Sessions said during a recent speech in Sacramento. "A refusal to apprehend and deport those, especially the criminal element, effectively rejects all immigration law."

Beyond California, some cities have declared themselves safe spaces, including New Orleans, Philadelphia, Las Vegas, Miami, Milwaukee, New York and Cook County, Ill., which includes Chicago. In July, the Justice Department announced it would withhold federal funding from sanctuary cities.

Federal judges in Chicago and San Francisco issued nationwide injunctions preventing the Trump administration from adding conditions to Justice Department grant funding and a federal judge in Philadelphia ruled to block efforts to interfere with funds.

DOJ threatened subpoenas against 23 counties, cities and states demanding records of their sanctuary policies. But California, which has a history of pro-immigration legislation and Democratic leadership who have feuded with Trump, was the only state to face legal action seeking to block the measures.

"The state overall is pretty Democratic and so it has a lot of support in passing these sanctuary laws," Rob Robinson, an assistant professor in political science at California State University-Fullerton, said. "It's not surprising to me that this is the state where the sanctuary city issue is the strongest and because it is the strongest, that's part of what drives the pushback."

New state laws

Senate Bill 54 is the most comprehensive of the three laws included in the lawsuit.

"The idea with SB 54 is to limit the circumstances under which local government institutions or officials would be either providing information that ICE is demanding or access to people in a local jail or otherwise facilitate their transfer of custody to ICE," Lai said.

The law contains some provisions based on a person's criminal history under which communication and facilitation of transportation is permitted but it also provides localities the opportunity to further limit interaction between law enforcement and ICE.

"SB 54 does make clear that it is the new state standard, but it is not the ceiling," Grisel Ruiz, staff attorney at the Immigrant Legal Resource Center, told UPI. "So while all cities, counties and law enforcement have to comply with SB 54 they are more than welcome to pursue and adopt stronger policies."

Assembly Bill 450 deals with worksite raids and audits.

"If ICE came to a workplace today and wanted to enter into a private area such as an office, the employer wouldn't be allowed to give ICE consent unless ICE has a warrant," Ruiz said.

AB 450 also requires employers to notify employees if ICE is preparing to conduct an audit.

"That's not unlawful, in fact it can be useful for clearing up misunderstandings," Lai said.

Assembly Bill 103 on public safety includes provisions preventing state and local agencies from entering into contracts with the federal government to detain immigrants and allowing the state attorney general to monitor federal immigration detention facilities.

The law makes California the only U.S. state that provides local oversight of immigration jails, Ruiz said.

Local laws

Since the state laws took effect, some municipalities have taken steps to further limit interaction with ICE, while others have sought new ways to provide federal immigration officials with information about undocumented immigrants.

On Tuesday, the Board of Supervisors of Orange County -- California's third-largest county -- voted unanimously to join Sessions in the lawsuit claiming the laws are unconstitutional.

"Senate Bill 54 prohibits state and local police agencies from notifying federal officials before immigrants in their custody who may be subject to deportation are released," Supervisor Lisa Bartlett said. "I took an oath to uphold the Constitution of the United States, not the unconstitutional actions of the state of California."

Trump tweeted in support of Orange County as "defending their rights against California's illegal and unconstitutional sanctuary policies."

"California's sanctuary laws release known dangerous criminals into communities across the state. All citizens have the right to be protected by federal law and strong borders," he said.

The City of Huntington Beach voted 6 to 1 on Monday to file a lawsuit against the state over the sanctuary laws.

In March, the small Southern California town of Los Alamitos voted 4 to 1 to be exempt from SB-54 as Councilman Warren Kusumoto, who introduced the legislation, said it was "looking out for the constituents in our city."

On Feb. 25, Oakland Mayor Libby Schaaf warned residents about a potential ICE raid after receiving information from "credible sources" about an impending sweep.

Sessions said Schaaf was actively seeking to help undocumented immigrants avoid apprehension by ICE.

"Her actions support those who flout our laws and boldly validate the illegality," he said.

The sanctuary law case will be tried by Magistrate Judge Kendall Newman of the U.S. District Court for the Eastern District of California in Sacramento. ICE director Thomas Holman is set to testify before April 13 at the request of the state.

Robinson said such moves by California municipalities are largely examples of "symbolic politics" as the cities and counties have no independent power to resist state law.

"This is a way they can kind of be with the president, but not in a way that would make people as angry as being with the president would in California," Robinson said.

<b>HEADLINE</b>	<b>04/05 Study: college students hungry, homeless</b>
<b>SOURCE</b>	<a href="http://www.kansascity.com/news/local/article207845959.html">http://www.kansascity.com/news/local/article207845959.html</a>
<b>GIST</b>	<p>Sarah Barrett didn't need a grand study to tell her a bunch of students on Kansas State University's campus had been going without food.</p> <p>As an assistant dean of students, she had heard enough of them talk about choosing books or housing costs over food to know that the university needed to do something to help its hungry students.</p> <p>K-State students are not alone. The problem of college students' inability to afford food is common on campuses across the country.</p>

According to a first-of-its-kind survey of two- and four-year private and public schools, 36 percent of students on college campuses in the U.S. do not get enough to eat.

On Wednesday afternoon just after the noon lunch hour, the UMKC Kangaroo Pantry opened its doors to a short line of students needing food. Katie Garey, who manages the pantry, and a student volunteer were busy stuffing plastic bags with nonperishable food items requested by the handful of students who filled out order forms that day.

"We are pretty busy," Garey said. "At the end of the semester, we start recognizing that students no longer have food on their meal plans or maybe their financial aid has run out or they have given up a job so they can study, so they no longer have that income."

And that lost income could also impact housing. Nearly as many of those who are food insecure don't have secure housing. The U.S. Department of Education describes the homeless as "lacking fixed, regular, adequate housing," which includes those living in shelters, hotels, cars, tents or "couch surfing" at friends' houses.

While it found that 36 percent of university students and nearly half of community college students surveyed fit the category of "housing insecure" in the past year, it also found that 9 percent of university students were fully homeless, as were 12 percent of community college students.

The study led by Temple University Professor Sara Goldrick-Rab and her team at the Wisconsin HOPE Lab speaks to a national trend impacting students in Missouri and Kansas, but only the University of Central Missouri was among the 65 colleges and universities that participated in the survey.

Those examining the national situation don't place the blame on rising college costs alone. Other factors may include inadequate financial aid packages and the fact that today more low-income students have access to college through the help of tuition grants, federal loans and scholarships that don't always pay for food or housing.

There are also a number of international students who don't qualify for federal aid and older students who are trying to go to school while working part-time jobs to care for a family.

Some colleges are unwilling to admit they have students enrolled at their school who don't have permanent housing or who go hungry, the study says.

The study refers to the condition these students find themselves in as being "food insecure." The USDA defines it as not having consistent access to adequate food and being limited by financial challenges.

"A lot of folks tend to associate attending college with a certain amount of privilege, but that is not necessarily true," said Jonathan Pryor, the assistant director of LGBT services at the University of Missouri-Kansas City. Pryor also coordinates the campus food pantry, opened in 2015 after university leaders heard repeated complaints from students struggling to afford groceries.

"Mac and cheese every night may not be what's considered adequate nutritious food," Barrett said.

The Washington Post reports that the survey report, out Tuesday, says that one in 10 community college students report having gone an entire day without food. About 6 percent of four-year university students have made the same report.

Experts have long known that kids in elementary, middle and high school who come to class hungry are less likely to perform well academically. The study found the same to be true for college students.

Students who take on the rigors of college study while experiencing basic needs insecurities are clearly committed to school and are trying to work to make ends meet. "But their academics still suffer," the

report says. "Among students who reported receiving D's and F's in college, more than half were food insecure, with more than 40 percent at the very lowest level of food security."

Education experts say that in many cases, those students end up dropping out.

In 2014, Barrett and some of her colleagues launched a survey of their own at K-State to assess the need for help with food on the Manhattan, Kan., campus. It revealed that 39.4 percent of "students who were experiencing financial hardship also experienced difficulty finding food," Barrett said.

Studies at other universities had similar findings. The University of California found that 40 percent of its students were missing meals, and four universities in Illinois found the number to be 35 percent on their campuses.

The national survey report said: "While university students are more likely than community college students to have access to on-campus housing and meal plans, even these supports do not shield students from these challenges."

Evelyn "Evie" Craig, president and chief executive officer of ReStart, a nonprofit agency that provides services for homeless young people in the Kansas City area, recalled being contacted by colleges to house homeless students who had no home to go to during holidays and campus breaks, when dormitories are shut down.

"We have some 'Leave It to Beaver' notion that because a kid is in college, every kid has a home with a white-picket fence to go to," Craig said.

"In the five-county Kansas City metro area, 6,000 students identify as homeless. That's K-12, but you have to assume that if a student is homeless as a senior in high school, that is not suddenly going to change as they enter college. There is so little support directed at these young adults age 18 to 24."

To help combat the food insecurity problem, universities here began opening food pantries, like the ones at K-State and at UMKC.

"We realized that this supports what has become a growing trend across the country," Pryor said, adding that the UMKC pantry "gets pretty consistent use" during the months school is in session.

Much of the UMKC pantry is stocked with food bought at discount prices from Harvesters. And like at other college food pantries, some of the food comes from donations and food drives held by faculty and student groups.

Even though a fairly sizable number of students share in the predicament, many of them still worry about the stigma attached to needing to get food from a food pantry. So, universities tend to tuck their pantries away in an inconspicuous location to protect their students' privacy. UMKC's Kangaroo Pantry is located in the converted office space in a university building just north of campus.

K-State opened its pantry in 2014, when it hauled shelving in to a computer lab and stocked it with food and toiletries after assessing the school had a real need.

When K-State had asked students whether they ever considered leaving school because of financial needs, more than 50 percent said yes, Barrett said. More recently, more than 90 percent of students who experience some financial struggle said in a subsequent survey that having the food pantry — called the Cat's Cupboard — has helped alleviate some of that financial stress.

University officials at Northwest Missouri State University in Maryville notice a growing number of their students were going hungry and opened a pantry in 2016. Every year more students are using it. In March 2016, 19 students sought help at the pantry. In March 2017, 47 students used the pantry.

	<p>"I think there is more need," said Sue Nickerson, who is executive secretary of Student Affairs and coordinator for the Northwest Missouri State pantry. She said a recent assessment at her school showed about 35 percent of students there need help with food or are having to decide between eating and paying bills.</p> <p>"That should not be a decision our students have to make," Nickerson said.</p>

<b>HEADLINE</b>	<b>04/05 Elderly 'hooked' on vitamins</b>
<b>SOURCE</b>	<a href="https://californiahealthline.org/news/older-americans-are-hooked-on-vitamins-despite-scarce-evidence-they-work/">https://californiahealthline.org/news/older-americans-are-hooked-on-vitamins-despite-scarce-evidence-they-work/</a>
<b>GIST</b>	<p>More than half of Americans take vitamin supplements, including 68 percent of those age 65 and older, according to a 2013 Gallup poll. Among older adults, 29 percent take four or more supplements of any kind, according to a Journal of Nutrition study published in 2017.</p> <p>Often, preliminary studies fuel irrational exuberance about a promising dietary supplement, leading millions of people to buy in to the trend. Many never stop. They continue even though more rigorous studies — which can take many years to complete — almost never find that vitamins prevent disease, and in some cases cause harm.</p> <p>“The enthusiasm does tend to outpace the evidence,” said Dr. JoAnn Manson, chief of preventive medicine at Boston’s Brigham and Women’s Hospital.</p> <p>There’s no conclusive evidence that dietary supplements prevent chronic disease in the average American, Manson said. And while a handful of vitamin and mineral studies have had positive results, those findings haven’t been strong enough to recommend supplements to the general U.S. public, she said.</p> <p>The National Institutes of Health has spent more than \$2.4 billion since 1999 studying vitamins and minerals. Yet for “all the research we’ve done, we don’t have much to show for it,” said Dr. Barnett Kramer, director of cancer prevention at the National Cancer Institute.</p> <p>A big part of the problem, Kramer said, could be that much nutrition research has been based on faulty assumptions, including the notion that people need more vitamins and minerals than a typical diet provides; that megadoses are always safe; and that scientists can boil down the benefits of vegetables like broccoli into a daily pill.</p> <p>Vitamin-rich foods can cure diseases related to vitamin deficiency. Oranges and limes were famously shown to prevent scurvy in vitamin-deprived 18th-century sailors. And research has long shown that populations that eat a lot of fruits and vegetables tend to be healthier than others.</p> <p>But when researchers tried to deliver the key ingredients of a healthy diet in a capsule, Kramer said, those efforts nearly always failed.</p> <p>It’s possible that the chemicals in the fruits and vegetables on your plate work together in ways that scientists don’t fully understand — and which can’t be replicated in a tablet, said Marjorie McCullough, strategic director of nutritional epidemiology for the American Cancer Society.</p> <p>More important, perhaps, is that most Americans get plenty of the essentials, anyway. Although the Western diet has a lot of problems — too much sodium, sugar, saturated fat and calories, in general — it’s not short on vitamins, said Alice Lichtenstein, a professor at the Friedman School of Nutrition Science and Policy at Tufts University.</p> <p>And although there are more than 90,000 dietary supplements from which to choose, federal health agencies and advisers still recommend that Americans meet their nutritional needs with food, especially</p>

	<p>fruits and vegetables.</p> <p>Also, American food is highly fortified — with vitamin D in milk, iodine in salt, B vitamins in flour, even calcium in some brands of orange juice.</p> <p>Without even realizing it, someone who eats a typical lunch or breakfast “is essentially eating a multivitamin,” said journalist Catherine Price, author of “Vitamina: How Vitamins Revolutionized the Way We Think About Food.”</p> <p>That can make studying vitamins even more complicated, Price said. Researchers may have trouble finding a true control group, with no exposure to supplemental vitamins. If everyone in a study is consuming fortified food, vitamins may appear less effective.</p> <p>The body naturally regulates the levels of many nutrients, such as vitamin C and many B vitamins, Kramer said, by excreting what it doesn’t need in urine. He added: “It’s hard to avoid getting the full range of vitamins.”</p> <p>Not all experts agree. Dr. Walter Willett, a professor at the Harvard T.H. Chan School of Public Health, says it’s reasonable to take a daily multivitamin “for insurance.” Willett said that clinical trials underestimate supplements’ true benefits because they aren’t long enough, often lasting five to 10 years. It could take decades to notice a lower rate of cancer or heart disease in vitamin takers, he said.</p>

<b>HEADLINE</b>	<b>04/05 China’s foreign companies restrictions</b>
<b>SOURCE</b>	<a href="http://money.cnn.com/2018/04/05/news/economy/china-foreign-companies-restrictions/index.html">http://money.cnn.com/2018/04/05/news/economy/china-foreign-companies-restrictions/index.html</a>
<b>GIST</b>	<p>China is vital for many top international brands, but doing business there often comes with a high entry fee.</p> <p>Some major US companies including GM (GM) and Qualcomm (QCOM) sell more of their products in China than anywhere else in the world.</p> <p>"Our economic interests with China are significant and growing," said Jacob Parker, vice president of the US-China Business Council, a trade group that represents US companies' interests in China. "China is a \$600 billion market for the American economy."</p> <p>But the Chinese government is now coming under increased pressure over the demands it makes of foreign firms seeking to gain access to that vast market. The Trump administration is pointing to unfair practices by Beijing as the reason for US plans to slap tariffs on around \$50 billion of Chinese goods, a move that has intensified fears of a trade war between the two countries.</p> <p>International companies have long complained that China has strong-armed them into handing over trade secrets in exchange for market access. In some sectors, Beijing will only let foreign firms operate through joint ventures in which Chinese partners have the majority stake.</p> <p>'Training their future competitors'</p> <p>That's the case in the auto industry, where many top brands like GM (GM), Volkswagen (VLKAF) and Toyota (TM) have teamed up with local players rather than face steep tariffs on imported vehicles.</p> <p>The partnerships have often delivered blockbuster sales, but they have also raised concerns that they lead to Chinese companies getting their hands on their foreign partners' technologies.</p> <p>International automakers are "training their future competitors and receiving only a fraction of what their intellectual property would earn" if they were allowed to go it alone in China, said Mary Lovely, a</p>

professor at the Peterson Institute for International Economics.

"It's no surprise that some domestic Chinese brands resemble American or European models" because of this practice, said Scott Kennedy, a China expert at the Center for Strategic & International Studies.

New technology at stake

The race to develop the cutting-edge technologies that power electric vehicles has intensified concerns.

A report published last week by US Trade Representative Robert Lighthizer claimed that Chinese government rules mean foreign firms have to hand over all of the key technologies used in electric vehicles if they want to sell them in China.

Foreign companies often have to "make difficult choices about managing the trade-off of technology sharing and market access," said Parker, the US-China Business Council executive. He said that about a fifth of American companies operating in China have been asked to transfer technology to Chinese partners in the past three years.

The true figure could be even higher. Surrendering key technologies and intellectual property to Chinese firms is a sensitive topic.

"Firms currently operating in China may be reluctant to speak out against the practice because they fear it will hurt their current business," Lovely said.

Companies that refuse to play ball are left on the outside, forced to pay potentially hefty tariffs at the border for the goods they ship to China.

That's the case with electric car maker Tesla (TSLA), which has been trying for years to strike a deal to build a factory inside China without a local partner.

CEO Elon Musk voiced his frustration earlier this month, tweeting at President Donald Trump that "the current rules make things very difficult. It's like competing in an Olympic race wearing lead shoes."

Boeing's success

There are exceptions to the rule, though. Boeing (BA) has enjoyed bumper sales in China without having to surrender key technologies or expertise.

China is Boeing's second biggest market after the United States, generating revenues of almost \$12 billion for the company last year. But the plane maker only does a small amount of manufacturing in China and doesn't have any major joint ventures there.

The company runs a Chinese factory in partnership with the country's state-owned jet maker Comac, but it only puts the finishing touches on planes, like installing seats and stapling carpets. There's "no real technology transfer," said Richard Aboulafia, a vice president at the Teal Group, an aviation consultancy.

That's most likely because China needs Boeing's planes for its rapidly growing air travel industry. Its airlines have very limited alternatives to Boeing and European plane maker Airbus (EADS).

Unlike in the auto sector, China has had difficulty cultivating jet manufacturers that can compete with foreign rivals. Comac's ARJ21, the Chinese government's first attempt at building its own jetliner, has struggled commercially.

"Getting into the car industry is much easier than getting into the jetliner industry," Aboulafia said.

Even Beijing's new proposed tariffs of 25% on American aircraft imports may leave Boeing largely

unscathed. The tariffs would only apply to planes below a certain weight, suggesting most Boeing jets on order in China would be unaffected, according to analysts at equity research firm Vertical Research Partners.

#### Beijing's defense

Many foreign companies that are already established in China are also unhappy about how things work there.

In its latest annual survey, the American Chamber of Commerce in China found that almost half of its members feel foreign businesses are treated unfairly by the Chinese government compared with local ones.

They complain about regulations being inconsistently applied and continuing restrictions on their ability to invest across wide swathes of the economy.

Some recent Chinese deals have been blocked in the United States over national security concerns. But international business leaders have pointed out that Chinese companies are often able to carry out takeovers in Europe and North America in sectors that are off limits to foreign investors in China.

Chinese government officials have rejected accusations that foreign companies are treated unfairly and dismissed the findings of the US Trade Representative's report on intellectual property theft as "unfounded."

Beijing argues that any tech secrets that firms handed over in the country were part of deals that had been mutually agreed upon. And it insists that it is working to strengthen intellectual property protection in the country more broadly.

"We are ready to look at the specific cases if there is any violation of intellectual property rights ... We are ready to deal with these issues in accordance with our own laws," Cui Tiankai, China's ambassador to the United States, said this week.

<b>HEADLINE</b>	<b>04/05 China aims at soybean farmers</b>
<b>SOURCE</b>	<a href="http://money.cnn.com/2018/04/05/news/economy/soybeans-china-trade-us/index.html">http://money.cnn.com/2018/04/05/news/economy/soybeans-china-trade-us/index.html</a>
<b>GIST</b>	<p>American soybean farmers are worried about their best customer.</p> <p>China was the United States' largest buyer last year, gobbling up \$12.3 billion worth of soybeans, according to the Department of Agriculture. But China is planning to make US farmers pay a 25% tariff to sell beans in the country in retaliation for President Trump's proposed tariffs on Chinese goods.</p> <p>Chinese tariffs would hit farm states and more than 300,000 soybean jobs. Illinois, Iowa, Minnesota, Indiana and Nebraska were the largest soybean producers in 2016, according to the Agriculture Department.</p> <p>"For those farmers that are operating on thin lines of profit and credit and are already financially unstable, it easily has the ability to be the straw that breaks the camel's back," said Brent Bible, who grows soybeans and corn on 5,000 acres in Lafayette, Indiana. Bible is also a member of Farmers for Free Trade, a group that opposes Trump's tariffs.</p> <p>China has "the ability to be stubborn for a lot longer than we can remain solvent," he said.</p> <p>Tariffs would cause Bible to re-evaluate his planting strategy and possibly cut back on growing soybeans. "Do I want to plant a crop that looks more likely [to] lose money?" he wondered.</p>

Soybeans are America's leading agricultural export, with \$21.6 billion in sales last year. Nearly 60% of the beans went to China, followed by Mexico and Japan, according to Panjiva, a research firm.

American soybean production exceeds this country's demand for the crop, forcing producers to look overseas. More than half of the US soy crop is exported every year, according to the American Soybean Association, an industry trade group.

China has been an eager buyer.

Chinese companies buy raw beans from US producers and crush them up to use as a protein source in animal feed. The average soy bean seed is 36% protein, said Bill Nelson, an economist at Doane Advisory Services. Soybeans are also processed into cooking oil, used for diesel production and blended into foods like tofu and milk.

China is "trying to improve the diet of the average Chinese person. That has involved a phenomenal increase in the amount of protein meals they are consuming," Nelson said.

Farmers have benefited as China puts muscle on pigs, cows and chickens with the help of US soybeans. US bean exports to China have nearly tripled in the past decade to 32 million tons, according to the Agriculture Department.

But Brazil has overtaken the United States as China's largest soybean importer, and tariffs targeting American beans could widen Brazil's lead or boost Argentina, the third largest supplier to China.

Tariffs would make US beans less competitive to Chinese buyers and Brazil's crop more attractive. "World demand will remain roughly the same, but all these extra expenses will have to pass through," Nelson said. "Farmers are going to be the victim."

Brazil has already ramped up its crop for 2018, and its beans are slightly richer in protein than the United States' -- points that "likely underscore the Chinese government's confidence to retaliate," Barclays' Adam Seiden wrote in a note Wednesday.

Weather can influence soybeans' protein proportion, and Brazil has experienced warmer seasons, Nelson noted.

<b>HEADLINE</b>	<b>04/06 Oklahoma teachers continue walkout</b>
<b>SOURCE</b>	<a href="https://www.cnn.com/2018/04/06/us/oklahoma-teachers-walkout/index.html">https://www.cnn.com/2018/04/06/us/oklahoma-teachers-walkout/index.html</a>
<b>GIST</b>	<p>(CNN)For the fifth consecutive day, Oklahoma teachers will pack the state Capitol as lawmakers discuss three measures that affect education funding on Friday.</p> <p>Schools in Oklahoma City and Tulsa will be closed Friday because of the walkout.</p> <p>Teachers will be back in the Capitol's rotunda and the grounds outside, to pressure lawmakers on three bills.</p> <ol style="list-style-type: none"> <li>1. A bill amendment would require sales from third-party retailers selling through internet outlets such as Amazon to be subject to sales tax. The Senate could vote on the Amazon sales tax bill that was passed in the House earlier in the week, which could bring in about \$20 million annually in education funding.</li> <li>2. The "ball and dice" tax for gambling would also bring in about \$20 million.</li> <li>3. Also at play is the hotel and motel tax that was repealed by the House after it had passed as part of Bill 1010XX last week. The state Senate will consider whether to remove the fee.</li> </ol> <p>The Oklahoma Education Association says the motel tax, which it says would be paid by mostly non-Oklahomans, would add \$42 million in revenue and opposes its repeal.</p>

"We strongly disagree with this repeal and are asking senators to vote no on the repeal of the hotel/motel tax," said Katherine Bishop, vice president of the OEA in a Facebook message Thursday. "This is a valuable revenue source that could provide much needed additional funding for our kids and is widely supported by the public."

The OEA wants the Senate to approve the first two measures -- the Amazon tax and the "ball and dice" tax.

If those two pass, "this would make a major victory for our students that would not have happened without the thousands of people who have come to the Capitol to make their voices heard," Bishop said. "To be clear, this is why we are here, because we all want to do more for our students."

Teachers in Oklahoma say more spending on education is needed, asserting that things such as facilities, equipment and textbooks are run down, outdated or in short supply.

They and the state government are at odds over salaries and funding. Gov. Mary Fallin recently signed a bill that raises the average teacher salary by \$6,100, but the teachers' union wanted that figure to be \$10,000.

The state ranks 49th in the nation in teacher salaries, according to the National Education Association, in a list that includes Washington, DC. Two states, Mississippi and South Dakota rank lower than Oklahoma.

Fallin also signed a bill that raises education funding by \$50 million; the teachers' union wanted that number to be higher.

Since Monday, teachers have swarmed the Capitol with signs and slogans.

"I think they thought we were not going to come out in the forces that we did especially throughout the week... but we're holding strong and you don't mess with teachers when we're trying to fight for our kids," Amanda Girdler, a fourth grade teacher told CNN.

<b>HEADLINE</b>	<b>04/05 Atlantic hurricane season forecast</b>
<b>SOURCE</b>	<a href="https://www.cbsnews.com/news/2018-atlantic-hurricane-season-colorado-state-university/">https://www.cbsnews.com/news/2018-atlantic-hurricane-season-colorado-state-university/</a>
<b>GIST</b>	<p>The Atlantic hurricane season will be slightly above-average this year, Colorado State University (CSU) hurricane researchers predicted Thursday. The researchers cited a "relatively low likelihood of significant El Niño" conditions as a main factor.</p> <p>In total, the team believes there will be 14 named storms. Hurricane researchers predict seven of the storms will become hurricanes and three will reach "major hurricane strength with sustained winds of 111 miles per hour or greater."</p> <p>They explained why El Niño patterns are likely to make a difference.</p> <p>"El Niño tends to increase upper-level westerly winds across the Caribbean into the tropical Atlantic, tearing apart hurricanes as they try to form," the researchers said.</p> <p>CSU hurricane researchers believe this season's activity will be about 135 percent of the average season. For reference, last year's hurricane activity -- which included one major storm after another -- was nearly two and a half times greater than average.</p> <p>The team forms their forecasts by using 60 years of data, referencing sea surface temperatures, vertical wind shear levels, sea level pressures, El Niño conditions and other factors. They plan to provide updates</p>

	on May 31, July 2 and Aug. 2. The 2018 Atlantic hurricane season runs from June 1 to Nov. 30.

<b>HEADLINE</b>	<b>04/05 States sue EPA over methane delay</b>
<b>SOURCE</b>	<a href="https://www.reuters.com/article/us-usa-epa-methane/epa-sued-by-14-states-over-delay-in-methane-emission-standards-idUSKCN1HC2X9">https://www.reuters.com/article/us-usa-epa-methane/epa-sued-by-14-states-over-delay-in-methane-emission-standards-idUSKCN1HC2X9</a>
<b>GIST</b>	<p>(Reuters) - Fourteen states filed suit on Thursday accusing the U.S. Environmental Protection Agency of failing to issue regulations for curbing emissions of methane, a potent greenhouse pollutant, from existing oil and gas operations as required under the Clean Air Act.</p> <p>The legal challenge, led by New York state, came nine months after a federal appeals court sided with environmental activists who sued to block the EPA from freezing enforcement of its own rules to control methane leaks from new or modified fossil fuel facilities.</p> <p>In both instances, EPA chief Scott Pruitt has been accused of putting the interests of oil and gas companies ahead of the agency’s obligation to protect air quality, including the control of heat-trapping pollutants that scientists blame for global climate change.</p>

Pruitt, who was a leading EPA critic as attorney general of the oil-producing state of Oklahoma before beginning his tenure as head of the EPA, has said he does not believe greenhouse gas emissions are the principal driver of climate change.

As EPA administrator, Pruitt has moved to carry out U.S. President Donald Trump's campaign pledge to roll back or reconsider a slew of environmental protections deemed burdensome by the industry, including climate change regulations.

In March 2017 Trump signed an order to undo climate rules. And the EPA that month halted efforts to collect data from fossil fuel operations to prepare performance standards that states would have to follow in devising methane-control measures for existing wells, pipelines, storage tanks, pumping stations and other facilities.

It was EPA's "unreasonable delay" in developing those standards that Thursday's lawsuit, filed in U.S. District Court in Washington, cited as a Clean Air Act violation.

<b>HEADLINE</b>	<b>04/05 Can National Guard troops go to border?</b>
<b>SOURCE</b>	<a href="https://www.nbcnews.com/politics/politics-news/does-trump-have-power-send-national-guard-troops-border-n862891">https://www.nbcnews.com/politics/politics-news/does-trump-have-power-send-national-guard-troops-border-n862891</a>
<b>GIST</b>	<p>President Donald Trump announced this week that he was sending the National Guard to the U.S.-Mexico border to fight illegal immigration, signing a proclamation Wednesday invoking a part of the U.S. Code called Title 32 to do so. He estimated on Thursday that he could send anywhere from 2,000 to 4,000 troops, and that they would remain indefinitely.</p> <p>"Well probably keep them or a large portion of them until the wall is built," Trump told reporters aboard</p>

Air Force One.

Rep. Ted Lieu, D-Calif., argued earlier Thursday that Trump wasn't actually "sending" the National Guard to the border, but simply requesting individual states to do so.

Does Trump have the authority to deploy the National Guard himself? Here's how it's worked before.

The military has no legal mandate to deal with immigration issues, but there are two ways for the federal government to use the National Guard to enhance the country's border efforts.

Under the provisions of U.S. Code Title 10, the one Lieu cited in his tweet, the movement of federally funded National Guard troops is controlled by the secretary of defense. This is in effect the "federalization" of the Guard.

However, under U.S. Code Title 32, which Trump used as the basis for his proclamation, the federally funded troops remain under state control, sent only at the determination of a participating state's governor.

Presidents Barack Obama and George W. Bush both used Title 32 to direct National Guard forces to the southern border. In addition, the authority of Title 10 has for decades been used to federally fund military groups fighting transnational gangs that attempt to cross U.S. borders, according to a 2012 Government Accountability Office report.

#### WHY USE TITLE 32, NOT TITLE 10?

Title 32 broadens the scope of what National Guard personnel can do at the border.

National Guard troops under control of the federal government, as they would be under Title 10, are prohibited by the Posse Comitatus Act (PCA) from enforcing domestic laws. The PCA bars military forces from getting involved with domestic issues like immigration. The troops can only take a support role, such as training or loaning and operating equipment, as well as being involved in certain counterdrug and counterterrorism efforts.

State National Guard personnel are not subject to the PCA. In 2004, Congress passed a law that previous administrations have used to allow the federal government to fund National Guard troops participating in border security operations triggered by "homeland defense activity" under Title 32, according to a 2013 Congressional Research Report.

NBC News reported Wednesday that it is unlikely the Guard troops will have physical contact with immigrants at the border. The exact number of troops and how long they will be deployed to the border will be firmed up in the coming days, officials said.

Border states can fund and send their own National Guard troops to secure their borders, though historically many have requested Title 32 efforts so that the federal government, not the states, picks up the tab.

They can also refuse to send troops, as then-Gov. Arnold Schwarzenegger, R-Calif., did in 2006 when Bush requested that his state more than double the number of National Guard personnel deployed to the border.

Homeland Security Secretary Kirstjen Nielsen said Wednesday the administration had already started talking with states about utilizing their National Guard.

Arizona Gov. Doug Ducey and Texas Gov. Greg Abbott, both border-state Republicans, welcomed the deployments, while a spokesman for California Gov. Jerry Brown, a Democrat who has been sharply critical of the president, told reporters the request will be reviewed promptly.

Oregon's Democratic Gov. Kate Brown said she would say no.

<b>HEADLINE</b>	<b>04/06 China vows to fight tariffs 'to the end'</b>
<b>SOURCE</b>	<a href="https://www.bloomberg.com/news/articles/2018-04-05/trump-orders-consideration-of-100-billion-in-new-china-tariffs">https://www.bloomberg.com/news/articles/2018-04-05/trump-orders-consideration-of-100-billion-in-new-china-tariffs</a>
<b>GIST</b>	<p>China said it would counter U.S. protectionism "to the end, and at any cost," as a war of words over President Donald Trump's proposed tariffs on Chinese imports escalated.</p> <p>After Trump ordered his administration to consider tariffs on an additional \$100 billion in Chinese goods on Thursday, sending U.S. stock futures tumbling, China's Commerce Ministry said in a statement in Beijing Friday that the nation doesn't want a trade war, but is ready to fight one.</p> <p>Trump's unexpected move threatens to unravel efforts by top U.S. and Chinese trade officials to lower the heat and reach an agreement that could stave off an escalating conflict, after the release of a list of tariff targets earlier this week prompted immediate threats of retaliation from Beijing.</p> <p>U.S. stock futures dropped on Trump's latest trade directive to the U.S. Trade Representative. S&amp;P 500 Index futures slid as much as 1.6 percent, after the underlying gauge ended up 0.7 percent Thursday. Asian equities were mixed, while the yen rose before retracing most of the move.</p> <p>"In light of China's unfair retaliation, I have instructed the USTR to consider whether \$100 billion of additional tariffs would be appropriate under section 301 and, if so, to identify the products upon which to impose such tariffs," Trump said in a statement issued by the White House.</p> <p>A White House official later said the \$100 billion figure Trump used in the statement referred to the value of the imports that would be covered by the additional tariffs, not the total amount of tax that would be charged on the products.</p> <p>"The Chinese side will follow suit to the end and at any cost, and will firmly attack, using new comprehensive countermeasures, to firmly defend the interest of the nation and its people," the Commerce Ministry said in a statement on its website, without further detailing any planned measures.</p> <p>"This is starting to feel like the beginnings of a trade war, if simply each proposal is matched with a retaliation," said Patrick Bennett, a Hong Kong-based strategist at Canadian Imperial Bank of Commerce. "The U.S. risks isolating itself from global trade in this process and we think the U.S., USD and U.S. asset markets have more to lose."</p> <p>China said Wednesday it would levy a 25 percent tariff on about \$50 billion of U.S. imports including soybeans, automobiles, chemicals and aircraft. That was in response to the release by the U.S. of a list of proposed tariffs a day earlier, covering \$50 billion in Chinese products.</p> <p>Were China to want to match Trump's latest threat in kind, it wouldn't have enough American goods imports to target. It could still take other measures -- like curbing package tours or student transfers to the U.S., or steps against American companies' operations in China.</p>

<b>HEADLINE</b>	<b>04/05 Poisoned daughter Russian spy recovery</b>
<b>SOURCE</b>	<a href="https://www.usatoday.com/story/news/world/2018/04/05/yulia-skripal-says-she-glad-say-my-strength-growing-daily/488731002/">https://www.usatoday.com/story/news/world/2018/04/05/yulia-skripal-says-she-glad-say-my-strength-growing-daily/488731002/</a>
<b>GIST</b>	LONDON — Police in the British capital say Yulia Skripal, who was poisoned with nerve agent along with her ex-Russian spy father, is in recovery.

Yulia Skripal, 33, said in a statement carried by the Metropolitan Police Service on Thursday that she woke up over a week ago and "am glad to say my strength is growing daily."

Sergei Skripal, 66, an ex-Russian military intelligence colonel, was found unconscious on March 4 with Yulia Skripal on a bench in Salisbury, a city in southern England. The United Kingdom has blamed Russia for the poisoning with Novichok nerve agent while the Kremlin denies any responsibility.

Yulia Skripal said she had "many people to thank" for her recovery, "and would especially like to mention the people of Salisbury that came to my aid when my father and I were incapacitated." Her father remains in the hospital.

She also thanked the staff at Salisbury District Hospital "for their care and professionalism."

She asked for the public to respect her privacy at this time.

"I am sure you appreciate that the entire episode is somewhat disorientating, and I hope that you'll respect my privacy and that of my family during the period of my convalescence," Yulia Skripal said in her statement.

A state-owned Russian TV channel released a recorded phone call earlier Thursday that it claimed took place between Yulia Skripal and her cousin Viktoria.

In the conversation played on the 60 Minute program on Rossiya 1, a woman said to be Yulia allegedly said: "Everything is ok. He (Sergei Skripal) is resting now, having a sleep. Everyone's health is fine, there are no irreparable things. I will be discharged soon. Everything is ok."

The program's hosts said they couldn't confirm if the call was authentic.

<b>HEADLINE</b>	<b>04/05 NYPD defends fatal shooting</b>
<b>SOURCE</b>	<a href="https://www.newsmax.com/newsfront/saheed-vassell-brooklyn-shootings-protests/2018/04/05/id/852892/">https://www.newsmax.com/newsfront/saheed-vassell-brooklyn-shootings-protests/2018/04/05/id/852892/</a>
<b>GIST</b>	<p>Police seeking to quell simmering anger over their shooting of a mentally disturbed black man on a New York City street released a montage of security videos Thursday that showed him minutes earlier thrusting a metal object that looked like a gun into the faces of several people — including a woman holding the hand of her child.</p> <p>A final video snippet showed the man raising the object in a two-handed shooting stance as police arrived, the edited video frozen just before officers unleashed 10 shots that left 34-year-old Saheed Vassell dead. His weapon turned out to be nothing more than an L-shaped section of pipe.</p> <p>The shooting in Brooklyn on Wednesday evening prompted two nights of protests among many who felt police should have known that Vassell, a fixture in the Crown Heights neighborhood, had emotional problems.</p> <p>But Mayor Bill De Blasio didn't lay blame on the officers, who were not from the local precinct and were passing through at the time. He said they had no information that the person they were confronting was mentally ill.</p> <p>"It's a tragedy because a man with a profound mental health problem ... was doing something that people perceived to be a threat to the safety of others," de Blasio said at a news conference shortly before the images and a partial transcript of 911 calls were released.</p> <p>"What we have seen from the images that are publicly available, people in the community thought he had a</p>

weapon and was aiming it at residents," the mayor said. "That's the kind of calls, multiple calls, that NYPD received."

According to the transcripts, one caller to 911 reported that Vassell "looks like he's crazy but he's pointing something at people that looks like a gun."

"Where is the gun?" a dispatcher asked one caller. "His hand," the caller replied.

In police radio traffic posted online, dispatchers directing officers to the scene said 911 callers were reporting only that a person was pointing a gun at people. After the shooting, the officers can be heard frantically calling for dispatchers to send an ambulance.

The release of the edited material on the New York Police Department's Twitter account — the full videos and transcripts weren't immediately provided — was meant to back up claims by the police department that the four plainclothes and two uniformed officers who responded had a legitimate reason to believe they needed to move swiftly to stop a deadly threat.

The material released by the department didn't answer questions about whether the officers had identified themselves or ordered the victim to drop the object before they opened fire. The city's medical examiner found he was hit seven to nine times, including one shot to the head.

At a vigil Thursday night, Vassell's mother, Lorna, said her son "came from a good home" and that he was not homeless.

Vassell's father, Eric, told reporters that his son had been hospitalized several times for psychiatric problems, some involving encounters with the police, but that he was polite and kind.

"Police had a choice. They always have a choice. They should not train them to kill. They should train them to protect life, to save life," Eric Vassell said in an interview with WABC-TV.

<b>HEADLINE</b>	<b>04/05 US considers additional tariffs on China</b>
<b>SOURCE</b>	<a href="https://www.newsmax.com/politics/china-tariffs-trade-war-trade-negotiations/2018/04/05/id/852884/">https://www.newsmax.com/politics/china-tariffs-trade-war-trade-negotiations/2018/04/05/id/852884/</a>
<b>GIST</b>	<p>President Donald Trump on Thursday ordered U.S. Trade Representative Robert Lighthizer to consider placing \$100 billion in additional tariffs on Chinese goods.</p> <p>"In light of China's unfair retaliation, I have instructed the USTR to consider whether \$100 billion of additional tariffs would be appropriate under section 301," Trump said in a statement issued by the White House.</p> <p>"If so, to identify the products upon which to impose such tariffs," the president said.</p> <p>Lighthizer called Trump's action "an appropriate response to China's recent threat of new tariffs."</p> <p>"The president is right to ask for additional appropriate action to obtain the elimination of the unfair acts, policies, and practices identified in USTR's report," he said in a statement.</p> <p>Beijing on Wednesday announced tariffs on 106 American products — including soybeans, pork, whiskey, and automobiles — the day after Trump slapped duties on \$50 billion in Chinese imports.</p> <p>Trump cited unfair trade practices as rationale for the tariffs, as well as to punish China for its theft of trade secrets, including software, patents, and other technology.</p> <p>President Trump has repeatedly slammed China for its unfair trade practices and for devaluing its currency</p>

against the American dollar.

The tariffs have sent Wall Street stocks tumbling in recent sessions on fears of a trade war and have threatened to unravel efforts by top U.S. and Chinese officials to reach an agreement to prevent harm to the world's two largest economies.

However, both Trump and chief economic adviser Larry Kudlow have denied a trade war would erupt with China.

"I think we're going to come to agreements," Kudlow told Neil Cavuto on Fox News on Wednesday. "I believe that the Chinese will back down and will play ball."

Commerce Secretary Wilbur Ross also said he expected trade actions between the United States and China to end in a negotiated deal.

But President Trump continued the attacks on China earlier Thursday during a roundtable on tax reform in West Virginia.

"For many years, no president wanted to go against China economically," Trump told the White Sulphur Springs Civic Center. "We're going to do it.

"We had a trade deficit of almost \$500 billion last year with China.

"It was time that we did something," he said, referring to the initial round of tariffs. "We can't continue to allow this to happen.

"We can't be taken advantage of any longer," the president said. "So, we're at a point where we had to do this.

"You have to go after the people that aren't treating you right," Trump said.

In his statement, Lighthizer said "after a detailed investigation, USTR found overwhelming evidence that China's unreasonable actions are harming the U.S. economy.

"In the light of such evidence, the appropriate response from China should be to change its behavior, as China's government has pledged to do many times.

"Economies around the world, including China's own, would benefit if China would implement policies that truly reward hard work and innovation, rather than continuing its policies that distort the vital high-tech sector," he continued.

"Unfortunately, China has chosen to respond thus far with threats to impose unjustified tariffs on billions of dollars in U.S. exports, including our agricultural products.

"Such measures would undoubtedly cause further harm to American workers, farmers, and businesses," Lighthizer said.

Trump's proposed tariffs would not take effect until after the administration holds a public hearing May 15 for U.S. businesses to comment on the plan.

"No tariffs will go into effect until the respective process is complete," Lighthizer said.

<b>GIST</b>	<p>A magnitude 5.3 earthquake struck Thursday under the ocean off Southern California and was felt widely along the mainland coast, but there were no reports of damage except to a chimney on one of the Channel Islands.</p> <p>The U.S. Geological Survey said the quake occurred at 12:29 p.m. in the Channel Islands region, about 38 miles (61 kilometers) southwest of the mainland city of Ventura.</p> <p>Some bricks fell from a chimney at an 1860s ranch on Santa Cruz Island, but no one was hurt, said Yvonne Menard, spokeswoman for Channel Islands National Park.</p> <p>The quake's epicenter was 17 miles (27 kilometers) from Santa Cruz Island, which is largely unpopulated but does have some staff and is visited by campers.</p> <p>Authorities in Los Angeles and Ventura counties did not report any immediate damage.</p> <p>The Los Angeles Fire Department said it went into "earthquake mode" and firefighters from all 106 of its firehouses began surveys of their territories, including bridges, dams, large buildings and power lines.</p> <p>"We currently have no reports of damage or injuries," spokeswoman Margaret Stewart said.</p> <p>Scientists at the California Institute of Technology's seismology laboratory in Pasadena said the earthquake warning system under development for the West Coast gave about 10 seconds of warning before shaking arrived.</p> <p>Earthquakes of such size usually occur about once a year in Southern California, although the most recent one was in 2014, according to veteran seismologist Lucy Jones, recently retired from the USGS.</p>

<b>HEADLINE</b>	<b>04/05 Hawaii: medically-assisted suicide legal</b>
<b>SOURCE</b>	<a href="http://abcnews.go.com/Health/wireStory/hawaii-legalizes-medically-assisted-suicide-54267794?">http://abcnews.go.com/Health/wireStory/hawaii-legalizes-medically-assisted-suicide-54267794?</a>
<b>GIST</b>	<p>Hawaii became the latest liberal-leaning state to legalize medically assisted suicide Thursday as the governor signed a measure into law allowing doctors to fulfill requests from terminally ill patients to prescribe life-ending medication.</p> <p>"It is time for terminally ill, mentally competent Hawaii residents who are suffering to make their own end-of-life choices with dignity, grace and peace," Gov. David Ige said.</p> <p>Ige said the law was written to ensure the patient is in full control and it provides just one option available for end-of-life care, knowing assisted suicide is not for everyone.</p> <p>"But we know that we have gotten to a point in our community that it does make sense to give the patient a choice to request the medication, obtain it and take it, or ultimately change their mind," the governor said.</p> <p>Hawaii's heavily Democratic lawmakers approved the legislation late last month. The state joins California, Colorado, Oregon, Vermont, Washington state and the District of Columbia in allowing the practice.</p> <p>Critics say they are concerned that the option will lead to hasty decisions, misdiagnoses and waning support for palliative care, in which dying people can be sedated to relieve suffering.</p> <p>The law has safeguards to prevent abuse. Two health care providers are required to confirm a patient's diagnosis, prognosis, ability to make decisions and that the request is voluntary.</p>

	<p>A counselor also must determine that the patient isn't suffering from conditions that may interfere with decision-making, such as a lack of treatment of depression.</p> <p>The patient must make two oral requests for the life-ending medication, with a 20-day waiting period in between, and sign a written request witnessed by two people, one of whom can't be a relative.</p> <p>Criminal penalties will apply to anyone who tampers with a request or coerces a prescription for life-ending medication.</p>

<b>HEADLINE</b>	<b>04/05 Mexico slams US Nat'l Guard border plan</b>
<b>SOURCE</b>	<a href="http://abcnews.go.com/International/wireStory/mexican-senate-candidates-slam-deployment-us-guardsmen-54256890?">http://abcnews.go.com/International/wireStory/mexican-senate-candidates-slam-deployment-us-guardsmen-54256890?</a>
<b>GIST</b>	<p>Mexican politicians put aside differences Thursday to condemn U.S. President Donald Trump's decision to deploy National Guard troops to the border.</p> <p>In the midst of a hotly contested campaign ahead of the July 1 presidential elections, President Enrique Pena Nieto praised even opposition candidates he usually quarrels with, as they joined in criticizing Trump's latest move.</p> <p>"The presidential candidates, independently of their natural differences, all of them coincided in rejecting these measures that run counter to good relations between neighbors," Pena Nieto said in a broadcast message.</p> <p>He mentioned all four candidates, including front runner Andres Manuel Lopez Obrador, at whom he has levelled veiled criticism in the past, in part because Lopez Obrador has pledged to undo some of Pena Nieto's market-oriented reforms if elected.</p> <p>Lopez Obrador said on Wednesday that "we will not accept the use of force, the militarization of the border. Problems aren't solved that way; peace and tranquility are derived from justice." Lopez Obrador said Mexico should send a line of white-clad peace demonstrators to the border.</p> <p>Pena Nieto added, addressing Trump, "if your recent statements are derived from your frustration with (U.S.) domestic politics, with your laws or your congress, deal with them, not with us Mexicans. We will not allow any negative rhetoric to define our actions."</p> <p>The country's Senate passed a resolution Wednesday calling on Mexico's government to suspend cooperation with the U.S. on illegal immigration and drug trafficking in retaliation for Trump's move.</p> <p>Presidential candidate Ricardo Anaya went further, saying Mexico should limit anti-terrorism cooperation until the National Guard is withdrawn. Anaya is the candidate of a left-right coalition in the country's July 1 presidential election.</p> <p>Ruling party candidate Jose Antonio Meade said that "independently of our political differences, it is time for all the presidential candidates to unite in defense of the sovereignty and dignity of the nation ... to reject and repudiate thus kind of measure."</p> <p>Others took Trump's decision with a grain of salt after the Mexican government said Guard troops "will not carry weapons or have immigration or customs duties."</p> <p>The newspaper El Heraldo said in a headline Thursday "U.S. deploys National Guard ... tin soldiers."</p> <p>On the border, Mexicans unanimously rejected the measure, but also agreed it wouldn't have much practical effect.</p>

	<p>"The attitude of militarization seems to us like just one more insult that we Mexicans don't deserve," said Ramon Galindo, the state government representative in Ciudad Juarez, across the border from El Paso, Texas.</p> <p>"Having soldiers on the other side won't make absolutely any difference at all," Galindo said, noting that migration, trade and cross-border exchanges are a reality.</p>

<b>HEADLINE</b>	<b>04/05 Panama pulls ambassador out Venezuela</b>
<b>SOURCE</b>	<a href="http://abcnews.go.com/International/wireStory/venezuela-suspends-panamanian-businesses-airline-54269119?">http://abcnews.go.com/International/wireStory/venezuela-suspends-panamanian-businesses-airline-54269119?</a>
<b>GIST</b>	<p>Panama pulled its ambassador from Venezuela on Thursday, retaliating after the South American nation banned key Panamanian businesses from operating within its borders.</p> <p>Tension between the two countries began escalating in recent days when Panama put President Nicolas Maduro on a list of Venezuelan officials as being at "high risk" for laundering money.</p> <p>Venezuela on Thursday announced a temporary ban for a group of Panamanian businesses and leaders. That included President Juan Carlos Varela and Copa, one of the few airlines still operating within Venezuela.</p> <p>In announcing the withdrawal of its envoy, Panama's government described the Venezuelan move as being "a political reaction lacking substance." Panama also asked Venezuela to call home its ambassador from Panama, officials said.</p> <p>The dispute comes as Venezuela is mired in economic and political crisis and finds itself increasingly isolated from the global community.</p> <p>The 90-day ban restricts commercial activities within Venezuela by 22 business leaders and 46 companies in Panama.</p> <p>Caracas justified the suspension by saying it adds a "measure of protection of the financial, economic and commercial system."</p> <p>Panama has named 16 Venezuelan companies and 55 individuals suspected of money laundering.</p> <p>The list also includes Venezuela's vice president, socialist party leader Diosdado Cabello and Attorney General Tarek William Saab.</p> <p>The United States has sanctioned Maduro and dozens of top officials, accusing the country of human rights abuses and sliding into a dictatorship.</p> <p>The European Union has also imposed economic and travel sanctions on seven senior Venezuelan officials accused of breaching the rule of law.</p>

<b>HEADLINE</b>	<b>04/06 Russia: Britain 'playing w/fire' in spy case</b>
<b>SOURCE</b>	<a href="http://abcnews.go.com/International/wireStory/russia-britain-playing-fire-spy-case-54276345?">http://abcnews.go.com/International/wireStory/russia-britain-playing-fire-spy-case-54276345?</a>
<b>GIST</b>	The international furor over the poisoning of a former Russian spy and his daughter intensified, with Russia warning Britain that it was "playing with fire."

At a U.N. Security Council meeting on Thursday, Russia's U.N. Ambassador Vassily Nebenzia claimed that Russia was the victim of a hasty, sloppy and ill-intentioned defamation campaign by London and its allies.

Britain has blamed Russia for the March 4 poisoning of Sergei Skripal and his daughter. In response, more than two dozen Western allies including Britain, the U.S. and NATO have ordered out over 150 Russian diplomats in a show of solidarity. Moscow has fiercely denied its involvement in the nerve agent attack and expelled an equal number of envoys. The diplomatic turmoil has hit lows unseen even at the height of the Cold War.

Moscow assumes "with a high degree of probability" that the intelligence services of other countries are likely responsible for the incident, Nebenzia said at the U.N.

"Everything confirms this is a coordinated, very well-planned campaign" intended "to discredit and even delegitimize Russia," he added.

Britain's U.N. Ambassador Karen Pierce shot back that Russia has come up with 24 theories on who bears responsibility for the poisoning, but the United Kingdom has only one — that it's highly likely Russia was responsible.

Nebenzia refused to name the intelligence services that Russia suspects, but said their goal is to accuse Moscow of using "a horrible, inhumane weapon, of concealing the arsenal of this substance," of violating the Chemical Weapons Convention, and putting in question Russia's "role not only in finding a solution in Syria, but anywhere else."

He warned: "We have told our British colleagues that you are playing with fire and you will be sorry."

Britain's Pierce said Russia's 24 theories for the attack include blaming it on terrorists and saying Britain wanted to distract from Brexit, its departure from the European Union.

Adding to the intrigue was a recording aired Thursday by Russian state Rossiya TV of a purported phone call between Yulia Skripal and her cousin in Russia. In the call, Yulia Skripal allegedly said she and her father were both recovering and in normal health, and that her father's health was not irreparably damaged.

Rossiya TV said Skripal's niece, Viktoria, who lives in Moscow, gave it the purported recording, although the broadcaster said it could not verify its authenticity.

Moscow has steadfastly hammered away at Britain's account of what befell the Skripals on March 4, especially the claim that their exposure to a Novichok nerve agent developed by the Soviet Union meant the attack was carried out by Russia.

During the Security Council meeting, Nebenzia questioned the British government's claims of Russian responsibility by posing a series of questions.

He asked why the British policeman was affected by the nerve agent immediately when it took four hours for Skripal and his daughter to be affected. He asked what antidotes for exposure to Novichok the Skripals were given, where the Skripals were for four hours without cellphones on the day of the attack, and what happened to two cats and two guinea pigs in the Skripal's house.

Russia has said it never produced Novichok and completed the destruction of its chemical arsenals under international control last year. Nebenzia insisted that Britain is required to allow Russia to cooperate in the investigation.

"Great Britain refuses to cooperate with us on the pretext that the victim does not cooperate with the criminal," he said. "A crime was committed on British territory, possibly a terrorist act, and it is our citizens who are the victims."

	<p>He said both Skripal and Yulia are Russian citizens, and Moscow must be granted access to them.</p> <p>Pierce said the U.K. has left it to Yulia to decide whether to give Russia consular access to her.</p> <p>The British government says it relied on a combination of scientific analysis and other intelligence to conclude that the nerve agent came from Russia. But the Foreign Office on Wednesday deleted a tweet from last month that said scientists at Britain's defense research facility, the Porton Down laboratory, had identified the substance as "made in Russia."</p>

<b>HEADLINE</b>	<b>04/06 Israel deploys tanks to Gaza border</b>
<b>SOURCE</b>	<a href="http://abcnews.go.com/International/wireStory/latest-israeli-snipers-tanks-deploy-gaza-border-54278382?">http://abcnews.go.com/International/wireStory/latest-israeli-snipers-tanks-deploy-gaza-border-54278382?</a>
<b>GIST</b>	The Latest on the Gaza Palestinians protest march and the violence along the Gaza-Israel border (all times local):

10:20 a.m.

Israeli snipers and tanks have taken up positions ahead of an expected mass protest by Palestinians along the Gaza-Israel border fence.

In one location, protesters burned several tires near the border on Friday, sending clouds of black smoke into the air. Palestinian activists plan to burn many tires in hopes the smoke will block the view of snipers.

The planned march is the second in what Gaza's Hamas rulers have said would be weeks of protests against a decade-old border blockade of the territory. Israel alleges Hamas is trying to carry out border attacks under the cover of protests and says it will prevent a breach of the fence at all costs.

The Gaza death toll since last week rose to 22, after a 30-year-old man died on Friday of injuries from last week's demonstrations.

\_\_\_\_\_

8 a.m.

Israel and Hamas are gearing up for another showdown on the Gaza-Israel border, amid concerns about more bloodshed after more than a dozen Palestinians were killed in a mass protest last week.

Israel says it will prevent a border breach at all costs, warning that protesters approaching the border fence will endanger their lives. Rights groups have denounced such seemingly broad open-fire rules as unlawful.

Friday's march is the second in what Gaza's Hamas rulers say will be weeks of protests against a decade-old border blockade. Activists say they will burn tires to block the view of Israeli snipers with black smoke.

Turnout has been driven by desperation among Gaza residents and Hamas' tight organization. The group has promised to pay compensation to the families of those killed and wounded.

<b>HEADLINE</b>	<b>04/06 Pakistan PM arrives in Afghanistan</b>
<b>SOURCE</b>	<a href="http://abcnews.go.com/International/wireStory/pakistani-prime-minister-afghanistan-ease-tensions-54277720?">http://abcnews.go.com/International/wireStory/pakistani-prime-minister-afghanistan-ease-tensions-54277720?</a>
<b>GIST</b>	<p>Pakistan's prime minister arrived in Afghanistan on Friday for a day-long visit many see as an effort to ease strained relations between the two neighbors and revive a push for peace talks with the Taliban.</p> <p>Shahid Khaqan Abbasi was welcomed by Afghan President Ashraf Ghani and the two inspected an honor guard at the Presidential Palace in Kabul before heading in for meetings.</p> <p>Abbasi, accompanied by several other top Pakistani officials on the trip, his first to Kabul since becoming prime minister last year, is to hold meetings with a string of Afghan officials, according to Ghani's spokesman, Shah Hussain Murtazawi.</p> <p>Pakistan has been under pressure from Kabul and Washington to stop offering safe havens to militants blamed for attacks in Afghanistan, a charge Islamabad denies.</p> <p>Pakistan, widely believed to be the only party that can bring the Taliban to the negotiating table, also insists its influence over the insurgents has been exaggerated.</p> <p>Kabul and Islamabad regularly trade accusations of harboring the other country's militants and the harsh language has underscored the strains between them.</p>

	<p>Late on Thursday, Pakistan's Ministry of Foreign Affairs issued a statement rejecting a claim made by Kabul of Islamabad having violated Afghan airspace with Pakistani Air Force raids inside Afghan territory during counter-terrorism operations earlier in the week.</p> <p>The statement said information about the ongoing "operations is shared with the Afghan security forces on a regular basis." In the latest military actions, Pakistan told the Afghan about them and stressed that these operations were on Pakistani side of the border, it said.</p> <p>Islamabad accuses Kabul of failing to take action against militant groups who continue to attack Pakistan from their sanctuaries across the border in Afghanistan.</p> <p>"Pakistan urges Afghanistan to focus on taking effective counter-terrorism actions, including plugging in of large gaps existing along the Afghan side of Pakistan-Afghanistan border," the statement said, adding that "it is also important that the Afghan government should refrain from the blame game."</p> <p>Also on Thursday, Javid Faisal, deputy spokesman for Afghanistan's chief executive, Abdullah Abdullah, said that Pakistan's support was critical to talks with the Taliban and that Abbasi's visit would help improve the troubled Afghan-Pakistan relations.</p>

<b>HEADLINE</b>	<b>04/05 China files complaint US tariff measures</b>
<b>SOURCE</b>	<a href="http://abcnews.go.com/International/china-files-complaint-us-tariff-measures/story?id=54259862&amp;cid=clicksource_76_2_hero_headlines_bsq_hed">http://abcnews.go.com/International/china-files-complaint-us-tariff-measures/story?id=54259862&amp;cid=clicksource_76_2_hero_headlines_bsq_hed</a>
<b>GIST</b>	<p>China has formally filed a complaint against planned U.S. tariffs on Chinese goods, the World Trade Organization said today.</p> <p>China "requested consultations" over the Trump administration's plans to impose tariffs, officially initiating a dispute with the WTO, the global trade body said.</p> <p>"Consultations give the parties an opportunity to discuss the matter and to find a satisfactory solution without proceeding further with litigation," the WTO said. "After 60 days, if consultations have failed to resolve the dispute, the complainant may request adjudication by a panel."</p> <p>The United States on Tuesday proposed adding a 25 percent tariff to \$50 billion of goods imported from China, and China said the next day it would impose its own 25 percent tariff on approximately \$50 billion of U.S. exports and that it had initiated a dispute settlement procedure against the U.S.</p> <p>Both countries have listed specific products from the other country that they said they planned to tax.</p>

<b>HEADLINE</b>	<b>04/05 Experts: danger of open work spaces</b>
<b>SOURCE</b>	<a href="http://abcnews.go.com/US/youtube-shooting-spotlights-danger-open-work-spaces-expert/story?">http://abcnews.go.com/US/youtube-shooting-spotlights-danger-open-work-spaces-expert/story?</a>
<b>GIST</b>	<p>Tuesday's shooting at YouTube headquarters has highlighted the vulnerabilities in workplace security -- especially in the open campus model often favored by Silicon Valley tech companies.</p> <p>"There are some companies, particularly in the tech sector, that try to create a work environment that's open, that's more relaxed," said John Cohen, an ABC News contributor and former U.S. counterterrorism coordinator for the Department of Homeland Security. "The whole idea is that in addition to the stressful work that employees are involved in every day, that there are parts of the environment that's meant to be conducive to relaxation."</p>

"Most companies have embraced security protocols that restrict access" to these open campuses, Cohen told ABC News. However "once you're in the campus, they're designed to be free and open spaces because that's conducive to the type of environment they want to have in place to foster creativity and productivity."

"The problem is, from a security perspective, the more open, the more that an individual can move around and come into contact with other people, the easier it is for an attacker to operate in that environment, as well," Cohen said.

With open work spaces, employees "aren't in self-contained offices with doors that can lock -- they're instead in these huge rooms. There may be controlled access to get into that work space," Cohen said, but "that controlled access can be bypassed by someone who is really committed to do it." And once you get inside the open space, there is "tremendous accessibility," he added.

The Silicon Valley is unique in that it is peppered with big-name tech companies with wide open campuses meant to be a relaxing environment for their employees.

Some Silicon Valley companies are reluctant to talk about the open campus security issues in the wake of Tuesday's shooting. But the YouTube attack does have some companies reviewing security procedures.

Google, YouTube's parent company, said in a statement that it is reviewing the events of Tuesday and taking action worldwide.

In the wake of the shooting, San Bruno Police Chief Ed Barberini said officers have "trained with YouTube regarding critical incidents."

"There is security on site," Barberini told reporters today. "We just have to figure out the area where she entered, what level of security existed at that point."

Chief Barberini said, "From a law enforcement perspective we're always advocating for heightened security."

"I know we might measure that with people having to operate a business," Barberini said, "so, I guess from a law enforcement perspective it's just a little biased. We're always looking for opportunities to harden targets or making environments as safe as possible for folks that work there."

Workplace security goes beyond open campuses and has evolved over time.

Before 9/11, "Security was generally seen as a cost and it was not typically a priority for the business leadership," said Cohen.

"After 9/11 there was growing recognition among security professionals that more needed to be done to secure private businesses," Cohen added.

However, Cohen said, "There was always sort of a conflict -- security professionals who wanted to secure locations ... and business leaders from those corporate entities who were concerned about the perception that oversecritization [like physical security personnel and building upgrades] might create." And it was still seen as a "cost on the balance sheet," he added.

Now, business leaders are increasingly recognizing the damage to their brand should a successful attack take place at one of their facilities, Cohen said.

"We're beginning to see those same business leaders come to understand that creating a safe environment for the workers and for visitors not only can enhance your brand but can make people more comfortable and more productive," Cohen said.

To Cohen, the main security threat for businesses right now is an individual with a vendetta against an employee or company gaining access to the building and then using a knife or gun to target employees.

Cohen said the two key places where business professionals should focus their attention are: controlling access to the building and then controlling access to the interior of the building or campus.

And as business leaders address the security points, they must also communicate with their employees, finding the delicate balance of not creating a fearful environment or negatively impacting productivity, but still making the employees prepared through tools like active shooter training and online classes.

To Cohen, not investing in security may be "short-sighted" because a successful attack could dramatically undermine the company by: impacting the brand, hurting the ability to bring in employees and interrupting the ability to conduct business and generate revenue.

"Not every company is going to have the resources to hire security intelligence analysts," Cohen said, "but in this current threat environment, every company has to have some awareness into these security issues and they have to factor that into their business planning."

<b>HEADLINE</b>	<b>04/05 Minneapolis PD new body-cam policy</b>
<b>SOURCE</b>	<a href="http://abcnews.go.com/US/minneapolis-police-beefing-body-cam-policy-scrutiny/story?">http://abcnews.go.com/US/minneapolis-police-beefing-body-cam-policy-scrutiny/story?</a>
<b>GIST</b>	<p>Minneapolis police issued new body camera regulations in the wake of a controversial case in which they were not activated -- when a woman was fatally shot by a police officer in July 2017.</p> <p>The new rules allow the department to discipline officers who do not comply, which was not done in the case of Justine Ruszczuk Damond.</p> <p>But John Elder, the department's public information officer, denied that the policy change was a "knee-jerk" reaction to the Damond case.</p> <p>"I won't say that it's a coincidence" that the policy changes are coming after the public scrutiny over the officer-involved shooting, Elder told ABC News. "What I can say is, in fact, we've learned a lot over the totality of the use of body cameras and we made changes and we may continue to make changes to better serve everybody the policy is intended to serve."</p> <p>The city's police department has been using body cameras for a little over a year, Elder said, and the new policies reflect some changes they believe are needed.</p> <p>"We knew as any new policy starts there's going to be tweaks to it and there are going to be different and better ways to serve," he said.</p> <p>Under the new rules, after receiving a 911 call or call for service, officers are required to activate their body cameras within two blocks of the destination. If the call comes within two blocks of the destination, they must activate it immediately.</p> <p>Elder said that by shortening the activation period to within two blocks of the destination as opposed to when the call is received, the department will save money on storage of the footage.</p> <p>"The fact of the matter is we're spending a great deal of money in storage of this data and we're able to accomplish the same outcome if we have the officers activate it at the minimum two blocks away," he told ABC News.</p> <p>The potential disciplinary actions under the rules range from a 40-hour suspension to termination, according to The Star Tribune.</p>

	<p>"For the first time, we're going to give it teeth," Minneapolis Mayor Jacob Frey said at a news conference Wednesday, according to The Star Tribune.</p> <p>The Damond shooting put a spotlight on the use of body cameras. Damond had called 911 to report a possible assault behind her house and she ended up being fatally shot by one of the responding officers.</p> <p>Neither of the officers had activated their body cameras. The officer who fired the fatal shots, Mohamed Noor, was charged with murder. He was released on bail last month and it was not clear if he entered a plea.</p>

<b>HEADLINE</b>	<b>04/05 Secret Service warns of chip card scheme</b>
<b>SOURCE</b>	<a href="https://krebsonsecurity.com/2018/04/secret-service-warns-of-chip-card-scheme/">https://krebsonsecurity.com/2018/04/secret-service-warns-of-chip-card-scheme/</a>
<b>GIST</b>	<p>The U.S. Secret Service is warning financial institutions about a new scam involving the temporary theft of chip-based debit cards issued to large corporations. In this scheme, the fraudsters intercept new debit cards in the mail and replace the chips on the cards with chips from old cards. When the unsuspecting business receives and activates the modified card, thieves can start draining funds from the account.</p> <p>Signs of a card with an old or invalid chip include heat damage around the chip or on the card, or a small hole in the plastic used to pry the chip off the card. Image: U.S. Secret Service.</p> <p>According to an alert sent to banks late last month, the entire scheme goes as follows:</p> <ol style="list-style-type: none"> <li>1. Criminals intercept mail sent from a financial institution to large corporations that contain payment cards, targeting debit payment cards with access to large amount of funds.</li> <li>2. The crooks remove the chip from the debit payment card using a heat source that warms the glue.</li> <li>3. Criminals replace the chip with an old or invalid chip and repackage the payment card for delivery.</li> <li>4. Criminals place the stolen chip into an old payment card.</li> <li>5. The corporation receives the debit payment card without realizing the chip has been replaced.</li> <li>6. The corporate office activates the debit payment card; however, their payment card is inoperable thanks to the old chip.</li> <li>7. Criminals use the payment card with the stolen chip for their personal gain once the corporate office activates the card.</li> </ol> <p>The reason the crooks don't just use the debit cards when intercepting them via the mail is that they need the cards to be activated first, and presumably they lack the privileged information needed to do that. So, they change out the chip and send the card on to the legitimate account holder and then wait for it to be activated.</p> <p>The Secret Service memo doesn't specify at what point in the mail process the crooks are intercepting the cards. It could well involve U.S. Postal Service employees (or another delivery service), or perhaps the thieves are somehow gaining access to company mailboxes directly. Either way, this alert shows the extent to which some thieves will go to target high-value customers.</p>

HEADLINE	<b>04/06 Cyberattacks more organized, structured</b>
SOURCE	<a href="https://www.helpnetsecurity.com/2018/04/06/2018-trustwave-global-security-report/">https://www.helpnetsecurity.com/2018/04/06/2018-trustwave-global-security-report/</a>
GIST	<p>Trustwave released the 2018 Trustwave Global Security Report which reveals the top security threats, breaches by industry, and cybercrime trends from 2017. The report is derived from the analysis of billions of logged security and compromise events worldwide, hundreds of hands-on data-beach investigations and internal research.</p> <p>Findings depict improvement in areas such as intrusion to detection however, also showed increased sophistication in malware obfuscation, social engineering tactics, and advanced persistent threats.</p> <p><b>North America and retail lead in data breaches</b> Although slightly down from the previous year, North America still leads in data breaches investigated by Trustwave at 43% followed by the Asia Pacific region at 30%, Europe, Middle East and Africa (EMEA) at 23% and Latin America at 4%. The retail sector suffered the most breach incidences at 16.7% followed by the finance and insurance industry at 13.1% and hospitality at 11.9%.</p> <p><b>Compromise and environment type matters</b> Half of the incidents investigated involved corporate and internal networks (up from 43% in 2016) followed by e-commerce environments at 30%. Incidents impacting point-of-sale (POS) systems decreased by more than a third to 20% of the total. This is reflective of increased attack sophistication and targeting of larger service providers and franchise head offices and less on smaller high-volume targets in previous years.</p> <p><b>Social engineering tops methods of compromise</b> In corporate network environments, phishing and social engineering at 55% was the leading method of compromise followed by malicious insiders at 13% and remote access at 9%. This indicates the human factor remains the greatest hurdle for corporate cybersecurity teams. “CEO fraud”, a social engineering scam encouraging executives to authorize fraudulent money transactions continues to increase.</p> <p><b>All web applications found to be vulnerable</b> One hundred percent of web applications tested displayed at least one vulnerability with 11 as the median number detected per application. 85.9% of web application vulnerabilities involved session management allowing an attacker to eavesdrop on a user session to commandeer sensitive information.</p> <p><b>Web attacks becoming more targeted</b> Targeted web attacks are becoming prevalent and much more sophisticated. Many breach incidents show signs of careful preplanning by cybercriminals probing for weak packages and tools to exploit. Cross-site scripting (XSS) was involved in 40% of attack attempts, followed by SQL Injection (SQLi) at 24%, Path Traversal at 7%, Local File Inclusion (LFI) at 4%, and Distributed Denial of Service (DDoS) at 3%.</p> <p><b>Malware using persistence techniques</b> Although 30% of malware examined used obfuscation to avoid detection and bypass first line defenses, 90% used persistence techniques to reload after reboot.</p> <p><b>Service providers are now in the crosshairs</b> Of great concern is a marked increase at 9.5% in compromises targeting businesses that provides IT services including web-hosting providers, POS integrators and help-desk providers. A compromise of just one provider opens the gates to a multitude of new targets. In 2016, service provider compromises did not register in the statistics.</p> <p><b>Large disparity when breaches are detected internally versus externally</b> The median time between intrusion and detection for externally detected compromises was 83 days in 2017, a stark increase from 65 days in 2016. Median time between intrusion and detection for compromises discovered internally however, dropped to zero days in 2017 from 16 days in 2016, meaning businesses discovered the majority of breaches the same day they happened.</p>

**Payment card data is still king**

Down from the previous year, payment card data at 40% still reigns supreme in terms of data types targeted in a breach. The figure is split between magnetic stripe data at 22% and card-not-present (CNP) at 18%. Surprisingly, incidents targeting hard cash is on the rise at 11% mostly due to fraudulent ATM transaction breaches enabled by compromise of account management systems at financial institutions.

**Necurs keeps malware-laced spam high**

Several major Necurs botnet campaigns for propagating ransomware (including WannaCry), banking trojans and other damaging payloads kept spam containing malware high at 26%, down from 34.6% in 2016. Interestingly, more than 90% of spam-borne malware are delivered inside archive file such as .zip, .7z and RAR, typically labeled as invoices or other types of business files.

**Database and network security, a year of critical patching**

The number of vulnerabilities patched in five of the most common database products was 119, down from 170 in 2016. Fifty three percent of computers with SMBv1 enabled were vulnerable to MS17-010 "ETERNALBLUE" exploits used to disseminate the WannaCry and NotPetya ransomware attacks.

<b>HEADLINE</b>	<b>04/05 Atlanta shuts water dept. website</b>
<b>SOURCE</b>	<a href="https://www.reuters.com/article/us-usa-cyber-atlanta-water/atlanta-takes-down-water-department-website-two-weeks-after-cyber-attack-idUSKCN1HC2WB">https://www.reuters.com/article/us-usa-cyber-atlanta-water/atlanta-takes-down-water-department-website-two-weeks-after-cyber-attack-idUSKCN1HC2WB</a>
<b>GIST</b>	<p>(Reuters) - Atlanta took down its water department website indefinitely on Thursday, two weeks after a ransomware cyber attack tore through the city's computer systems in one of the most disruptive hacks ever to strike a U.S. local government.</p> <p>"The Department of Watershed Management's website ... will be offline for server maintenance and updates until further notice," the City of Atlanta wrote on Twitter.</p> <p>Atlanta's watershed department was among the operations hard-hit by the March 23 attack that continues to block access to databases, postpone municipal court dates and stifle the city's ability to collect some payments for public services.</p> <p>Employees with the water department said they were unable to turn on their work computers or gain wireless internet access for roughly a week after the attack, but they were instructed to report to their offices at City Hall anyway.</p> <p>Many of the department's systems have lumbered back to life in recent days, but there is still disruption, said one employee, who asked not to be identified.</p> <p>"There's definitely work not being done and there's definitely bills not being able to be paid," the employee said.</p> <p>Hackers used a potent computer virus known as SamSam to encrypt large swaths of city data in the attack and demanded a payment of six bitcoins, worth \$51,000 at the time, to release the information.</p> <p>Atlanta Mayor Keisha Lance Bottoms, who took office in January, has declined to say whether the city was negotiating with the hackers.</p>

<b>HEADLINE</b>	<b>04/05 Retail sector top cyberattack target</b>
<b>SOURCE</b>	<a href="https://www.computerweekly.com/news/252438382/Retail-sector-top-cyber-attack-target">https://www.computerweekly.com/news/252438382/Retail-sector-top-cyber-attack-target</a>

**GIST**

The retail sector suffered the most breach incidences (16.7%) in 2017 as attackers became more organised, the latest Trustwave security report shows.

The retail sector was followed by the finance and insurance industry (13.1%) and hospitality (11.9%), according to the 2018 Trustwave global security report, which is based on the analysis of billions of security events worldwide, hundreds of data-breach investigations and internal research.

However, despite the high volume of attacks on the retail sector, the report shows that incidents impacting point-of-sale (POS) systems decreased by more than a third to 20% of the total, which is attributed to increased attack sophistication and targeting of larger service providers and franchise head offices rather than smaller high-volume targets.

The report notes a marked increase of 9.5% in compromises targeting businesses that provides IT services including web-hosting providers, POS integrators and help-desk providers. A compromise of just one provider opens the gates to a multitude of new targets. In 2016, service provider compromises did not register in the statistics, the report said.

Phishing and social engineering was the top method of compromise (55%), followed by malicious insiders (13%) remote access (9%). This indicates the human factor remains the greatest hurdle for corporate cyber security teams, the report, noting that “CEO fraud”, a social engineering scam encouraging executives to authorise fraudulent money transactions continues to increase.

All web applications tested displayed at least one vulnerability with 11 as the median number detected per application. Most of the web application vulnerabilities (85.9%) involved session management allowing an attacker to eavesdrop on a user session to commandeer sensitive information.

Targeted web attacks are becoming prevalent and much more sophisticated, the report shows, with many breach incidents showing signs of careful preplanning by cyber criminals probing for weak packages and tools to exploit

Cross-site scripting (XSS) was involved in 40% of attack attempts, followed by SQL injection (SQLi) at 24%, path traversal at 7%, local file inclusion (LFI) at 4%, and distributed denial of service (DDoS) at 3%.

Although 30% of malware examined used obfuscation to avoid detection and bypass first line defences, 90% used persistence techniques to reload after reboot, the report said.

The median time between intrusion and detection for externally detected compromises was 83 days in 2017, up from 65 days in 2016. However, the median time between intrusion and detection for compromises discovered internally dropped to zero days in 2017 from 16 days in 2016, meaning businesses discovered the majority of breaches the same day they happened.

Although down from the previous year, payment card data is still the most highly targeted type of data in breaches, accounting for 40% of data stolen in all the breaches analysed.

The data shows that several major Necurs botnet campaigns were responsible for propagating ransomware, banking trojans and other damaging payloads, with spam containing malware remaining high at 26%, although down from 34.6% in 2016. More than 90% of spam-borne malware is delivered inside archive file such as .zip and is typically labeled as invoices or other types of business files the report said.

#### Computers vulnerable

Although the number of vulnerabilities patched in five of the most common database products was 119 – down from 170 in 2016 – the report said 53% of computers with server message block protocol version 1 enabled were vulnerable to the Eternalblue exploit used to disseminate the WannaCry and NotPetya attacks.

Vulnerabilities have seen a sharp surge in the past decade, the report said, with a marked increase in

	<p>vulnerability disclosures from 2012 and a dramatic spike in 2017.</p> <p>“This is in part due to the doubling of internet users over the course of a decade. The technically savvy, including both security researchers and criminals, are now actively looking for vulnerabilities with the latter selling corresponding exploits on the dark web to make hefty profits. More vulnerabilities equate to greater potential for exploitations,” the report said.</p> <p>The report shows that cyber criminals and their attacks are becoming more methodical and organised, said Steve Kelley, chief marketing officer at Trustwave. “As long as cyber crime remains profitable, we will continue to see threat actors quickly evolving and adapting methods to penetrate networks and steal data.</p> <p>“Security is as much a ‘people’ issue as it is a technology issue. To stay on par with determined adversaries, organisations must have access to security experts who can think and operate like an attacker while making best use of the technologies deployed,” he said.</p>

<b>HEADLINE</b>	<b>04/06 Russia sues to block Telegram app</b>
<b>SOURCE</b>	<a href="https://www.reuters.com/article/us-russia-telegram/russia-files-lawsuit-to-block-telegram-messaging-app-idUSKCN1HD143">https://www.reuters.com/article/us-russia-telegram/russia-files-lawsuit-to-block-telegram-messaging-app-idUSKCN1HD143</a>
<b>GIST</b>	<p>MOSCOW (Reuters) - Russia’s state communications watchdog said on Friday it had filed a lawsuit to limit access to the Telegram messaging app after the company refused to give Russian state security services access to its users’ secret messages.</p> <p>Ranked as the world’s ninth most popular mobile messaging app, Telegram is widely used in countries across the former Soviet Union and Middle East. Active users of the app reached 200 million in March.</p> <p>As part of its services, Telegram allows users to communicate via encrypted messages which cannot be read by third parties, including government authorities.</p> <p>But Russia’s FSB Federal Security service has said it needs access to some messages for its work, including guarding against terrorist attacks. Telegram has refused to comply with its demands, citing respect for user privacy.</p> <p>Russia’s Roskomnadzor communications watchdog said it had filed a lawsuit at a Moscow court on Friday “with a request to restrict access on the territory of Russia to the information resources of ... Telegram Messenger Limited Liability Partnership.”</p> <p>It said the suit was connected to statements by the FSB that Telegram was not complying with its legal obligations as an “organizer of information distribution.”</p>

<b>HEADLINE</b>	<b>04/06 Facebook secretly deletes some messages</b>
<b>SOURCE</b>	<a href="https://www.thedailybeast.com/facebook-secretly-deletes-some-of-zuckerbergs-private-messages-1?ref=home">https://www.thedailybeast.com/facebook-secretly-deletes-some-of-zuckerbergs-private-messages-1?ref=home</a>
<b>GIST</b>	<p>Lots of us have sent a message on Facebook we wish we could delete, but, unlike other messaging apps such as WhatsApp, you can’t take back sent messages on the site—unless, that is, you’re Mark Zuckerberg.</p> <p>Facebook has confirmed some of the Facebook founder’s messages to users have disappeared from their inboxes, with the company claiming it was done to protect corporate security.</p> <p>Facebook never publicly disclosed the removal of messages from users’ inboxes, nor privately informed</p>

	<p>the recipients, news site TechCrunch reported.</p> <p>A spokesperson for Facebook said: “After Sony Pictures’ emails were hacked in 2014, we made a number of changes to protect our executives’ communications. These included limiting the retention period for Mark’s messages in Messenger. We did so in full compliance with our legal obligations to preserve messages.”</p> <p>Normal Facebook users cannot delete their messages from recipients’ inboxes, indicating Zuckerberg and other executives receive special treatment in being able to pull back their sent messages.</p>
<a href="#">Return to</a> <a href="#">Top</a>	

<b>HEADLINE</b>	<b>04/05 Facebook scans users private messages</b>
<b>SOURCE</b>	<a href="https://www.hackread.com/mark-zuckerberg-admits-facebook-scans-user-private-messages/">https://www.hackread.com/mark-zuckerberg-admits-facebook-scans-user-private-messages/</a>
<b>GIST</b>	<p>If you thought your conversations on Facebook Messenger are private then think again.</p> <p>In a recent interview founder and CEO of Facebook Mark Zuckerberg admitted that the social media giant scans user messages to block any content that goes against the company’s rules and regulations.</p> <p>This was revealed by Zuckerberg during a podcast interview with Ezra Klein, Vox’s editor at large in which he recalled a situation where the company detected that people were trying to spread “sensational messages” in Myanmar concerning the Rohingya community and the incitement of violence on both sides. As a result, Facebook detected and stopped them from reaching its destination.</p> <p>“It is clear that people [are] trying to use our tools in order to incite real harm,” said Zuckerberg. “Our systems detect what’s going on ... We stop those messages from going through.”</p> <p>“On Messenger, when you send a photo, our automated systems scan it using photo matching technology to detect known child exploitation imagery or when you send a link, we scan it for malware or viruses,” a Facebook spokesperson confirmed to Bloomberg.</p> <p>“Facebook designed these automated tools so we can rapidly stop abusive behavior on our platform.” The scanned data is not used for advertising, the spokesperson claimed.</p> <p>Although not surprising, Zuckerberg’s admission did disappoint Facebook users to some extent. The news came days after Facebook users on Android devices while downloading their Facebook data, found out that the company collected their personal data including call and SMS logs.</p>

<b>HEADLINE</b>	<b>04/05 The Pirate Bay is down once again</b>
<b>SOURCE</b>	<a href="https://www.hackread.com/yes-the-pirate-bay-is-down-once-again/">https://www.hackread.com/yes-the-pirate-bay-is-down-once-again/</a>
<b>GIST</b>	<p>You are not alone – The Pirate Bay has been down for last seven hours.</p> <p>It is just another day with just another disappointing news for The Pirate Bay fans. Yes, you are not alone, the torrent search and downloading giant is down for everyone.</p> <p>Those visiting The Pirate Bay right now can see “Error 522 Connection timed out” message generated by Cloudflare since The Pirate Bay uses its CDN and DDoS protection service.</p> <p>According to Cloudflare, Error 522 indicates that the service was unable to reach the origin web server at all. It could be so because the server was overloaded or down, its firewall was blocking requests or misconfiguration with DNS and IP addresses.</p> <p>Is It Down Right Now noted that The Pirate Bay is facing service outage for almost 7 hours, however,</p>

	<p>there are several The Pirate Bay alternatives available here. Another good news is that the dark web domain of The Pirate Bay is still up and available for visitors.</p> <p>Remember, The Pirate Bay has been suffering service outage every now and then since its .SE domain was taken from the company on the orders of a Swedish court. But the reason for its increasing downtime still remains unclear.</p>

<b>HEADLINE</b>	<b>04/05 Report: 100% web apps w/vulnerabilities</b>
<b>SOURCE</b>	<a href="https://www.infosecurity-magazine.com/news/100-of-web-apps-contain/">https://www.infosecurity-magazine.com/news/100-of-web-apps-contain/</a>
<b>GIST</b>	<p>A totality – a full 100% – of web applications are vulnerable to hackers.</p> <p>According to Trustwave’s 2018 Global Security Report, derived from the analysis of billions of logged security and compromise events worldwide, all apps tested displayed at least 1 vulnerability, with 11 as the median number detected per application. A majority (85.9%) of web application vulnerabilities involved session management, allowing an attacker to eavesdrop on a user session to commandeer sensitive information.</p> <p>Vulnerabilities overall have seen a sharp surge, the report found. After remaining relatively level from 2008 to 2011, a marked increase in vulnerability disclosures began in 2012, with a dramatic spike in 2017. This is in part due to the doubling of internet users over the course of a decade, Trustwave pointed out: The technically savvy, including both security researchers and criminals, are now actively looking for vulnerabilities with the latter selling corresponding exploits on the dark web to make hefty profits. More vulnerabilities of course equate to greater potential for exploitations.</p> <p>The report also found that web attacks are becoming more targeted, more prevalent and much more sophisticated. Many breach incidents show signs of careful preplanning by cybercriminals probing for weak packages and tools to exploit. Cross-site scripting (XSS) was involved in 40% of attack attempts, followed by SQL injection (SQLi) at 24%, path traversal at 7%, local file inclusion (LFI) at 4%, and distributed denial of service (DDoS) at 3%.</p>

<b>HEADLINE</b>	<b>04/05 Sears, Kmart, Delta hit w/3<sup>rd</sup> party breach</b>
<b>SOURCE</b>	<a href="https://www.infosecurity-magazine.com/news/sears-kmart-and-delta-hit-with/">https://www.infosecurity-magazine.com/news/sears-kmart-and-delta-hit-with/</a>
<b>GIST</b>	<p>Customers of Sears, Sears subsidiary Kmart and Delta Airlines have had their customer payment information stolen, thanks to a cybersecurity breach at a software provider that they all use.</p> <p>The firm, called [24]7.ai, provides online customer support services based on artificial intelligence and machine learning. The breach affected users processed through its platform starting on September 26, 2017; the issue persisted until its discovery on October 12, 2017. It is, however, just now notifying its customers; Sears said it wasn’t notified of the incident until mid-March, and Delta only found out on March 28. Other details are scant.</p> <p>“The unknown factor is whether or not that information was encrypted, or how,” said Lee Munson, security researcher at Comparitech.com. “From an incident response point of view, it is a shame to learn [that] the attack has only now come to light, having occurred and been spotted last year, though we are, of course, unaware of when affected customers were notified.”</p> <p>The department store said that hackers were able to access credit-card information of about 100,000 of its customers across Sears and Kmart. Delta didn’t provide numbers but characterized the number of affected users as a “small subset” of its customer base. The airline also said that personal details related to passport, government identification, security and SkyMiles information were not impacted.</p>

	<p>It's unclear if other clients are also affected, but the issue has the potential to be far-reaching. The company said itself that the "world's largest and most recognizable brands are using intent-driven engagement from [24]7.ai to assist several hundred million visitors annually, through more than 1.5 billion conversations, most of which are automated."</p> <p>The issue, unlike other payment-card breaches, doesn't involve point-of-sale malware or a network compromise at the affected companies but rather a weak link at a partner. Third-party contractors are just a fact of today's corporate life, meaning that businesses need to be aware of the security profile of one's technology partners.</p>
<p><a href="#">Return to Top</a></p>	

<b>HEADLINE</b>	<b>04/05 New macOS backdoor w/cyber espionage</b>
<b>SOURCE</b>	<a href="https://www.securityweek.com/new-macos-backdoor-linked-cyber-espionage-group">https://www.securityweek.com/new-macos-backdoor-linked-cyber-espionage-group</a>
<b>GIST</b>	<p>A recently discovered macOS backdoor is believed to be a new version of malware previously associated with the OceanLotus cyber-espionage group, Trend Micro says.</p> <p>Also known as APT 32, APT-C-00, SeaLotus, and Cobalt Kitty, OceanLotus is believed to be operating out of Vietnam and has been targeting high-profile corporate and government organizations in Southeast Asia. Well-resourced and determined, the group uses custom-built malware and already established techniques.</p> <p>Some of the group's targets include human rights organizations, media organizations, research institutes, and maritime construction firms.</p> <p>The newly discovered macOS backdoor, which Trend Micro detects as OSX_OCEANLOTUS.D, has been observed on machines that have the Perl programming language installed.</p> <p>The malware is being distributed via malicious documents attached to emails. The document masquerades as the registration form for an event with HDMC, an organization in Vietnam that advertises national independence and democracy.</p> <p>The document contains malicious, obfuscated macros with a payload written in Perl. The macro extracts an XML file from the Word document. This file is an executable acting as the dropper for the final payload, which is the backdoor.</p> <p>The dropper, which has all of its strings encrypted using a hardcoded RSA256 key, is also used to establish the backdoor's persistence on the infected systems. The dropper checks whether it runs as root or not, and uses different path and filename based on that.</p> <p>The dropper sets the backdoor's attributes to "hidden" and uses random values for the file date and time, and deletes itself at the end of the process.</p> <p>The backdoor has two main functions, which collect platform information and sending it to the command and control (C&amp;C) server. It can also receive additional C&amp;C communication information, which is encrypted before being sent.</p> <p>"Malicious attacks targeting Mac devices are not as common as its counterparts, but the discovery of this new macOS backdoor that is presumably distributed via phishing email calls for every user to adopt best practices for phishing attacks regardless of operating system," Trend Micro concludes.</p>
<p><a href="#">Return to Top</a></p>	

<b>HEADLINE</b>	<b>04/06 Best Buy reveals payment card breach</b>
<b>SOURCE</b>	<a href="https://www.securityweek.com/best-buy-hit-247ai-payment-card-breach">https://www.securityweek.com/best-buy-hit-247ai-payment-card-breach</a>

<b>GIST</b>	<p>After Delta Air Lines and Sears Holdings, Best Buy has also come forward to warn customers that their payment card information may have been compromised as a result of a breach suffered by online services provider [24]7.ai.</p> <p>Similar to Delta and Sears, Best Buy contracted [24]7.ai for online chat/support services. The retailer says it will contact impacted customers and provide free credit monitoring if needed.</p> <p>Best Buy has not specified exactly how many of its customers are impacted, but noted that “only a small fraction of our overall online customer population could have been caught up in this [24]7.ai incident, whether or not they used the chat function.”</p> <p>San Jose, CA-based [24]7.ai provides customer acquisition and engagement solutions to organizations in a wide range of sectors and any of them could be impacted by this incident. Its website lists several major firms, but some of them apparently no longer do business with the company.</p>
	<p><a href="#">Return to</a></p> <p><a href="#">Top</a></p>

<b>HEADLINE</b>	<b>04/05 Intel urges: delete remote keyboard app</b>
<b>SOURCE</b>	<a href="https://www.scmagazine.com/intel-finds-critical-flaw-in-remote-keyboard-app-halts-spectre-fixes/article/756540/">https://www.scmagazine.com/intel-finds-critical-flaw-in-remote-keyboard-app-halts-spectre-fixes/article/756540/</a>
<b>GIST</b>	<p>Intel is instructing users of its remote keyboard to delete the app after a critical flaw was found and also the firm is halting Spectre fixes on older chips.</p> <p>Escalation of privilege vulnerabilities in all version of the keyboard app allow a network attacker to inject keystrokes as a local user, inject keystrokes into another remote keyboard session and allow an authorized local attacker to execute arbitrary code as a privileged user, according to a recent notification post.</p> <p>The vulnerabilities CVE-2018-3641, CVE-2018-3645 and CVE-2018-3638 were rated 9.0 Critical, 8.8 High, and 7.2 High respectively.</p> <p>As a result Intel issued a Product Discontinuation notice and recommended all users of the application uninstall the app as soon as possible.</p> <p>The chip manufacturer also announced it is halting Spectre fixes on older chips citing limited ecosystem support.</p> <p>Intel decided to not release microcode updates for these products for one or more reasons which may have included Micro-architectural characteristics that preclude a practical implementation of features mitigating Variant 2 (CVE-2017-5715).</p> <p>Other possible explanations included limited Commercially Available System Software support, and based on customer inputs, most of these products are implemented as “closed systems” and therefore are expected to have a lower likelihood of exposure to these vulnerabilities, the firm said in its microupdate.</p>
	<p><a href="#">Return to</a></p> <p><a href="#">Top</a></p>

<b>HEADLINE</b>	<b>04/05 Microsoft: cyberthreat tools w/Office 365</b>
<b>SOURCE</b>	<a href="https://www.scmagazine.com/microsoft-adds-ransomware-protection-recovery-tools-to-office-365/article/756577/">https://www.scmagazine.com/microsoft-adds-ransomware-protection-recovery-tools-to-office-365/article/756577/</a>
<b>GIST</b>	<p>Microsoft has rolled out a series of new tools to protect its Office 365 Home and 365 Personal customers from a variety of cyberthreats, including ransomware.</p> <p>Kirk Koenigsbauer, Microsoft's corporate vice president for Office, said subscribers to these two Office productivity suites will receive additional measures to protect against ransomware, email-based threats,</p>

stronger password protection and advanced link checking in Office products.

The first new ransomware defense has the company bringing its File Restore feature over from OneDrive for Business to the consumer-level OneDrive accounts. Files Restore allows you to restore an entire OneDrive account to a previous point in time within the last 30 days. This would allow a person to rebuild or replace any files encrypted by a ransomware attack, Koenigsbauer wrote in a blog.

Microsoft's next step is adding the ability to detect a ransomware attack in progress in Office 365 and then lead the victim through the recovery process.

“If an attack is detected, you will be alerted through an email, mobile, or desktop notification and guided through a recovery process where you'll find the date and time of attack preselected in Files Restore,” he said.

For 365 users who share important information via email or through links, Microsoft will enable password protection for these actions. If the subscriber so chooses he or she can set a password that has to be input to access a shared file. Microsoft believes this will protect a document if it is accidentally shared with an unauthorized person.

Also on the email front, Outlook.com will now offer end-to-end email encryption and an Outlook user can now prevent an email, and any attached documents, from being forwarded beyond its intended recipient.

The final security upgrade has the company bringing its advanced link checking technology to Word, Excel and PowerPoint from Outlook.com. Microsoft Word has recently become a popular conduit for cyberattackers who used the documents and their various vulnerabilities to launch fileless attacks.

“Starting later this year, links you click in Word, Excel and PowerPoint will also be checked in real-time to determine if the destination website is likely to download malware onto your computer or if it's related to a phishing scam. If the link is suspicious, you will be redirected to a warning screen recommending you don't access the site,” Koenigsbauer said.

Microsoft added this advanced protection to Outlook last fall.

<b>HEADLINE</b>	<b>04/05 Supply chain attacks in healthcare</b>
<b>SOURCE</b>	<a href="http://www.darkreading.com/perimeter/supply-chain-attacks-could-pose-biggest-threat-to-healthcare/d/d-id/1331468">http://www.darkreading.com/perimeter/supply-chain-attacks-could-pose-biggest-threat-to-healthcare/d/d-id/1331468</a>
<b>GIST</b>	<p>Healthcare organizations often overlook the part of their operations where they are most vulnerable. Supply chain attacks pose a greater threat than exposed medical devices, report researchers who have analyzed the industry's risk since WannaCry hit in May 2017.</p> <p>WannaCry may not have been built to target healthcare but the massive ransomware operation still left its mark on the industry, blocking National Health Service (NHS) trust hospitals from accessing patient records and forcing doctors to reschedule appointments and surgeries.</p> <p>The profound effect on the healthcare industry prompted researchers at Trend Micro and the Healthcare Information Trust Alliance (HITRUST) to investigate healthcare network risks flying under the radar. They specifically looked into how supply chain cyberthreats, and exposed connected medical systems and devices, affected organizations' security posture.</p> <p>Connected medical devices demand scrutiny as cybercriminals can take advantage of their exposure to break into organizations, run botnets, take data, or launch ransomware attacks.</p> <p>"There's definitely more devices now, and wider exposure brings a greater landscape, greater aperture for</p>

attack," says Greg Young, vice president of cybersecurity at Trend Micro. Confidentiality, integrity, and availability are always considered in device security but with healthcare devices, safety must be considered as well, he adds. It's not a stretch to recognize an IoT attack on medical devices could cause physical harm to patients.

### Diagnosing Supply Chain Threats

Industries like telecom, financial services, and consumer technology know all too well the risk of supply chain attacks. As healthcare relies more heavily on supply chain vendors, third-party service providers, and cloud-based systems, its organizations are also recognizing the risk.

Attackers can abuse third-party goods and services to steal confidential information, change data, install malicious software, introduce an unapproved function or design, or bring counterfeit devices into the organization. The risk of supply chain attacks in healthcare has grown along with the number of devices as attackers see an opportunity to manipulate them.

Researchers highlight several entry points an attacker can use to compromise a hospital's supply chain. A key one is the device manufacturer; a hospital has no control over whether a device is tampered with during the manufacturing process. They also lack insight into the security of distribution centers, suppliers, software developers, and shipping companies.

"Globally, supply chain and counterfeit devices are an increased risk," says Young. Older, harder-to-patch devices, many of which aren't subject to protective inspections like a regular operating system, are a "stepping stone" into the rest of the IT environment.

The industry has started to buckle down on device security to prevent certain types of supply chain attacks. For example, the FDA now mandates Unique Device Identification codes for all medical devices. This code indicates a device's version, model, manufacturing date and batch number, expiration date, and serial number. All this data is entered in a global, publicly accessible database so patients can check if a device is counterfeit.

### Ransomware Down, Targeting Up

Researchers found cybercriminals are narrowing their focus on the healthcare space, opting for more focused attacks as opposed to broader campaigns.

Young points out how ransomware attacks on healthcare organizations steadily declined between October and December 2017. High-risk indicators of compromise (IoCs) dropped from 4,330 to 2,354 between November and December, and total IoC have also declined from October through December. The shift is a sign that attackers are changing tactics.

"The broad splashing of random kinds of attacks is down, but how much they're targeted is definitely up," he explains. The number of ransomware families has been growing since 2012, with a major spike from 29 families in 2015 to 247 families in 2016, and 327 in 2017.

Massive campaigns waste resources and are more likely to be tracked, says Young. Cybercriminals are using specific attacks to maximize their impact on each organization. For example, if they know an organization has a Windows 10 environment, they'll use a Windows 10-based attack.

"My own belief is the level of targeted attack is increasing more rapidly than the granularity of defenses," he notes.

### Healing Healthcare Security

Young warns not to get too distracted by healthcare-specific needs. Patching, response capabilities, and monitoring are essential: "Those are the basics and the things almost everybody gets wrong today, but

	<p>those are the high-impact areas," he says.</p> <p>It's also important to pay attention to non-medical IoT devices entering the hospital, which could also prove a risk. Smart televisions in patients' rooms, smartboards, or smart devices in labs that aren't part of normal testing could all be a jumping-off point for attack.</p>

<b>HEADLINE</b>	<b>04/05 Mirai variant botnet targets financials</b>
<b>SOURCE</b>	<a href="http://www.darkreading.com/attacks-breaches/mirai-variant-botnet-takes-aim-at-financials/d/d-id/1331472">http://www.darkreading.com/attacks-breaches/mirai-variant-botnet-takes-aim-at-financials/d/d-id/1331472</a>
<b>GIST</b>	<p>Criminals, like carpenters, hate to see a good tool go unused. It's no surprise, then, that the Mirai botnet has been in action once again, this time in concert with other botnets and with targets in the financial sector.</p> <p>Insikt Group, the threat research group within Recorded Future, found that a Mirai botnet variant was used to attack a company, or companies, in the financial sector in January. And it might not have been alone; they found that it was possibly linked to the IoTroop or Reaper botnet.</p> <p>Three financial companies were hit by DDoS attacks on Jan. 28: two at the same time, and the third a few hours later. On Jan. 29, ABN Amro, a Dutch bank, reported that they had been hit by a DDoS attack the previous day and that other Dutch banks had also been hit. Insikt Group says that the DNS amplification attack used against one of the first targets hit 30 Gbps - highly disruptive, but not the largest attack seen.</p> <p>According to the researchers, the botnet involved in the first company attack was 80% compromised MikroTik routers and 20% various IoT devices. Those devices range from Apache and IIS web servers to webcams, DVRs, TVs, and routers. Manufacturers of the recruited devices include companies from the very small up to Cisco and Linksys.</p> <p>Irfan Saif is cyber risk services principal for Deloitte Risk and Financial Advisory. In an interview with Dark Reading he points out that the IoT devices brought into the botnets have processing, communication, and networking capabilities, so it's not surprising that they're being recruited for nefarious purposes. "It will be a continuing problem and the intricacies and complexities will continue to evolve," he says.</p> <p>"There's an ever-increasing set [of IoT applications] in industries and for facilities management that will broaden the set of devices that can be taken," Saif says, adding, "The complexity of devices that can be taken will continue to increase."</p> <p>The analysts at Insikt Group say that, while many of the devices used in the attacks were previously available for use in other botnets, many others were not known to be subject to existing botnet malware.</p>

<b>HEADLINE</b>	<b>04/05 Researchers: 1.5B sensitive files exposed</b>
<b>SOURCE</b>	<a href="https://www.zdnet.com/article/1-5-billion-sensitive-files-exposed-by-misconfigured-servers-storage-and-cloud-services/">https://www.zdnet.com/article/1-5-billion-sensitive-files-exposed-by-misconfigured-servers-storage-and-cloud-services/</a>
<b>GIST</b>	<p>Researchers have discovered over 1.5 billion sensitive files including payroll information, credit card details, medical data, and patents for intellectual property are exposed online, putting consumers and businesses at risk of theft, cybercrime, and espionage.</p> <p>But the information exposed online -- which amounts to a total of 12,000 terabytes of data -- isn't there as a result of hacking or other cybercriminal activity, it has been stored in publicly available locations ranging from Amazon Simple Storage Service (Amazon S3) buckets, rsync, SMB and FTP servers, misconfigured websites, and unsecured NAS drives.</p>

In just the first three months of 2018, a total of 1,550,447,111 exposed files have been detected by researchers at Digital Shadows, who outlined the findings in a new report.

While data has been left exposed by organisations in almost all countries around the world, it's the US that is the country most affected by the problem, with 239,607,590 files exposed, accounting for 16 percent of the total.

However, when combined into one entity, the countries of the European Union were found to have exposed the most data, with 537,720,919 files available publically online -- accounting for 37 percent of the total data.

One of the most common forms of identifiable personal data found to be exposed were payroll and tax return files, which accounted for 700,000 and 60,000 files respectively. If abused, this sensitive information could be used to commit fraud, identity theft, or other financial crime.

However, the exposed data isn't restricted to financial information: researchers found over two million .dcm -- Digital Imaging and Communications in Medicine -- files exposed on a single open SMB port in Italy.

These could potentially contain health information -- highly personal data which patients would definitely not appreciate being left exposed.

However, in one instance, a patent for a yet-to-be released renewable energy product was found in a document labelled as 'strictly confidential' and containing detailed pictures and information about the patent.

This marks just one instance of confidential plans being publically uploaded as a result of accidental backing up of data onto open SMB and FTP servers, rsync and Amazon S3 buckets.

So while organisations might worry that hacking groups and other sophisticated threat actors could be targeting their IP, the reality is they could have already released that information themselves.

"While we often hyperfocus on responding to adversaries conducting intrusions into our environments and silently exfiltrating our data, we aren't focusing on our external digital footprints and the data that is already publicly available via misconfigured services," said Rick Holland, chief information security officer at Digital Shadows.

"The volume of this sensitive data exposure should be a major cause for concern for any security and privacy conscious organisation. In addition, with GDPR fast approaching, there are clear regulatory implications for any organization with EU citizen data," he added.

<b>HEADLINE</b>	<b>04/05 CDN subdomains hijacked in experiment</b>
<b>SOURCE</b>	<a href="https://www.bleepingcomputer.com/news/security/researchers-hijack-over-2-000-subdomains-from-legitimate-sites-in-cloudfront-experiment/">https://www.bleepingcomputer.com/news/security/researchers-hijack-over-2-000-subdomains-from-legitimate-sites-in-cloudfront-experiment/</a>
<b>GIST</b>	<p>Security experts from MindPoint Group, an information security firm, have hijacked over 2,000 subdomains from legitimate websites while researching possible security flaws in Amazon's CloudFront CDN service.</p> <p>Experts found that CloudFront's CDN routing mechanism that linked a site's domain and subdomains to a specific server contained a flaw that allowed attackers to point misconfigured subdomains to their own endpoint instead, effectively hijacking the subdomain from legitimate CloudFront users.</p>

	<p>MindPoint security analyst Matt Westfall coded and deployed a proof-of-concept Python script that automatically scanned CloudFront domains and hijacked vulnerable subdomains, pointing the servers to a demo page he created.</p> <p>Westfall says he hijacked over 2,000 subdomains over the period of a few days just by using his script. Some of the most high-profile subdomains belonged to companies such as the Red Cross, Bloomberg, Reuters, Dow Jones, Harvard, University of Maryland, the Commonwealth Bank of Australia, and two US government agencies.</p> <p>"When subdomains from a high-trust domain are hijacked, they can be set up as a watering hole for delivering malware that has a high likelihood of bypassing filtering mechanisms," Westfall says.</p> <p>Furthermore, these subdomains are perfect for spear-phishing attacks, being almost impossible to detect even by the most astute and security-hardened user.</p> <p>The researcher says he notified Amazon of his findings, and in the span of three days, he transferred ownership of these vulnerable subdomains back to Amazon, who is now running a warning on the subdomains, hoping that the legitimate owners rectify the misconfigured CDNs.</p>

<b>HEADLINE</b>	<b>04/05 Strange story of WhiteRose ransomware</b>
<b>SOURCE</b>	<a href="https://www.bleepingcomputer.com/news/security/the-whiterose-ransomware-is-decryptable-and-tells-a-strange-story/">https://www.bleepingcomputer.com/news/security/the-whiterose-ransomware-is-decryptable-and-tells-a-strange-story/</a>
<b>GIST</b>	<p>A new ransomware has been discovered by MalwareHunterTeam that is based off of the InfiniteTear ransomware family, of which BlackRuby and Zenis are members. When this ransomware infects a computer it will encrypt the files, scramble the filenames, and append the .WHITEROSE extension to them.</p> <p>It is not currently known for sure how this ransomware is being distributed, but reports indicate it is being manually installed by hacking into Remote Desktop services. Furthermore, based on the submissions to ID-Ransomware, the developer of this ransomware appears to be targeting European countries, with a strong focus on Spain.</p> <p>The good news is this ransomware appears to be decryptable by Michael Gillespie. So if you become infected with WhiteRose, do not pay the ransom, and instead post a request for help in our WhiteRose Support &amp; Help topic. You may also be able to receive help through Dr.Web, but that is a paid for service.</p> <p>The WhiteRose ransom note reads like a poem</p> <p>Both the BlackRuby Ransomware and now WhiteRose have ransom notes that read more like an assignment from a creative writing course rather than a ransom demand.</p> <p>In WhiteRose's ransom note, the developer tells the story of an isolated and lonely hacker surrounded by white roses in a garden. They go on to state that they want to share their white roses with the world by encrypting your computer and transforming it into a flower.</p> <p><i>I do not think about selling white roses again. This time, I will plant all the white roses of the garden to bring a different gift for the people of each country. No matter where is my garden and where I am from, no matter if you are a housekeeper or a big company owner, it does not matter if you are the west of the world or its east, it's important that the white roses are endless and infinite. You do not need to send letters or e-mails to get these roses. Just wait it tomorrow. Wait for good days with White Rose.</i></p> <p><i>I hope you accept this gift from me and if it reaches you, close your eyes and place yourself</i></p>

*in a large garden on a wooden chair and feel this beautiful scene to reduce your anxiety and everyday tension.*

*Thank you for trusting me. Now open your eyes. Your system has a flower like a small garden; A white rose flower.*

This is definitely a step up from BlackRuby's ransom note, which was nonsense.

<b>HEADLINE</b>	<b>04/05 Hacker exploited Verge network bug</b>
<b>SOURCE</b>	<a href="https://www.bleepingcomputer.com/news/cryptocurrency/hacker-uses-exploit-to-generate-verge-cryptocurrency-out-of-thin-air/">https://www.bleepingcomputer.com/news/cryptocurrency/hacker-uses-exploit-to-generate-verge-cryptocurrency-out-of-thin-air/</a>
<b>GIST</b>	<p>An unknown attacker has exploited a bug in the Verge cryptocurrency network code to mine Verge coins at a very rapid pace and generate funds almost out of thin air.</p> <p>The Verge development team is preparing a hard-fork of the entire cryptocurrency code to fix the issue and revert the blockchain to a previous state before the attack to neutralize the hacker's gains.</p> <p>The incident took place yesterday, and initially, users thought it was a "&gt;51% attack," an attack where a malicious actor takes control over the more than half of the network nodes, giving himself the power to forge transactions.</p> <p>Rumors swirled around all day yesterday, as users feared the attacker might use his dominant network position to siphon funds from their accounts.</p> <p>The Verge team eventually came out and clarified the details surrounding the incident, denouncing rumors of a 51% attack, but not revealing additional info about the real cause of the incident.</p> <p>Nonetheless, users who looked into the suspicious network activity eventually tracked down what happened, revealing that a mysterious attacker had mined Verge coins at a near impossible speed of 1,560 Verge coins (XVG) per second, the equivalent of \$78/s.</p> <p>Under normal circumstances, a single miner wouldn't have ever been able to receive such a high reward for processing Verge blockchain computations.</p> <p>The malicious mining lasted only three hours, according to the Verge team, who promised to fix the bug in a hard-fork that's expected later today.</p> <p>According to unofficial estimations, some users who tracked the illegally mined funds on the Verge blockchain said the hacker appears to have made around 15.6 million Verge coins, which is around \$780,000.</p>

<b>HEADLINE</b>	<b>04/05 Twitter: 1.2M accounts dropped for terror</b>
<b>SOURCE</b>	<a href="http://www.latimes.com/business/la-fi-twitter-terrorism-accounts-20180405-story.html">http://www.latimes.com/business/la-fi-twitter-terrorism-accounts-20180405-story.html</a>
<b>GIST</b>	<p>Twitter Inc. said Thursday it suspended 1.21 million accounts from its social media platform between August 2015 and the end of 2017 for "violations related to the promotion of terrorism."</p> <p>Twitter also said the suspensions were on a downswing.</p> <p>They included 274,460 suspended accounts in the second half of 2017, which were down 8.4% from the previous reporting period and the second consecutive period "in which we've seen a drop in the number of</p>

accounts being suspended for this reason," Twitter said in a blog post covering its 12th biannual "transparency report."

Twitter also said 74% of the accounts involved in the latest reporting period "were suspended before their first tweet."

"We continue to see the positive, significant impact of years of hard work making our site an undesirable place for those seeking to promote terrorism, resulting in this type of activity increasingly shifting away from Twitter," the company said.

Twitter said that 93% of the 274,460 accounts suspended in the last half of 2017 "were flagged by [the company's] internal, proprietary tools" and that government reports of such violations accounted for only 0.2% of all suspensions.

Twitter began mass suspensions of such accounts in early 2014 as the San Francisco-based company responded to criticism that it wasn't doing enough to crack down on users who promote or are linked to terrorist groups.

In December 2015, after the mass shooting in San Bernardino that left 14 dead, President Obama called on Twitter and other tech leaders to "make it harder for terrorists to use technology to escape from justice."

Last year, relatives of the victims of the attack filed a federal lawsuit against Twitter, Google and Facebook, accusing the tech giants of knowingly supporting Islamic State and its extremist agenda.

The lawsuit contends the companies allowed Islamic State to build an outsized online presence and propagate its extremist beliefs and draw recruits, such as the couple who carried out the attacks on the San Bernardino social services center.

In the fourth quarter of last year, Twitter reported 330 million average monthly users of its platform overall.

HEADLINE	<b>04/05 Facebook faces global backlash</b>
SOURCE	<a href="https://www.washingtonpost.com/news/worldviews/wp/2018/04/05/as-facebook-confronts-tough-questions-on-data-misuse-europe-might-force-real-change/?utm_term=.ff29761f3173">https://www.washingtonpost.com/news/worldviews/wp/2018/04/05/as-facebook-confronts-tough-questions-on-data-misuse-europe-might-force-real-change/?utm_term=.ff29761f3173</a>
GIST	<p>BERLIN — These days, you might get more applause for not being on social media than for reaching a follower milestone in Europe's liberal hubs such as Berlin or Paris. Concerns over privacy and ethics have triggered an unprecedented debate here that revolves around how, and not whether, to regulate U.S. tech giants.</p> <p>Europe's more loyal users of Facebook and other social media advocates may have felt comforted that major scandals over privacy settings and the platform's business model appeared to mainly affect its U.S. side, such as the recent outcry over how Cambridge Analytica's personal data collection affected "30 million profiles of American Facebook users."</p> <p>But now, Facebook says that Cambridge Analytica may have obtained data on far more users — with about 20 percent of them estimated to in fact live outside of the United States. In a separate revelation, Facebook also had to acknowledge on Wednesday that "malicious actors" were able to discover the identities and collect data on most of its 2 billion global users.</p> <p>The mechanisms used by Cambridge Analytica and the "malicious actors" cited by Facebook appear to have been legal and do not constitute a data hack, but rather a deliberate exploitation of information through tools or loopholes Facebook itself provided in the past. While tens of millions of U.S. consumers are affected in both cases, the misuse of foreign users' data could now turn out to be the real problem for</p>

Facebook since other countries take privacy issues more seriously than the U.S. government.

In Australia, the government watchdog organization opened an investigation into Facebook's practices on Thursday, writing in a statement that it "will consider whether Facebook has breached the Privacy Act 1988 (Privacy Act)."

"Given the global nature of this matter, the OAIC will confer with regulatory authorities internationally," the watchdog wrote.

In India, where over a half-million users are estimated to be affected, the allegations have resulted in a governmental request to Facebook and Cambridge Analytica for more detailed information, with a Saturday deadline.

Even though India is now Facebook's biggest market — ahead of the United States — no Indian media outlets were able to ask questions in a conference call with CEO Mark Zuckerberg on Wednesday. The heavy U.S.-focus immediately triggered criticism because privacy advocates are still looking into reports that Cambridge Analytica may have used Facebook data to influence Indian politics, as well.

Facebook's acknowledgments in recent weeks have also triggered furious reactions in a privacy-conscious Europe that has long sought ways to rein in U.S. social media and tech giants. European Union regulators have always been much tougher on the tech companies than their U.S. counterparts, for instance forcing them to give users more control, imposing fines for noncompliance and requiring platforms to spot and delete illegal content. The latest revelations could serve as a pretext to toughen existing rules further and force social media companies to implement broader changes worldwide.

Germany's justice minister, Katarina Barley, recently said it was unacceptable that users "were being spied on against their will, in order to bombard them with deliberate political adverts or hatred against political opponents." Barley called Facebook's practices a "threat to democracy." The European Union's justice commissioner, Vera Jourova, similarly said Facebook had facilitated "deep manipulation." Both remarks came before Wednesday's announcement that Europeans had been targeted, too.

That's why two countries included in Facebook's acknowledgment on Wednesday are likely to cause the social media company a particular headache: Britain and Germany.

Perhaps even more damaging to Facebook's business model than tumbling shares may be the sort of E.U.-style regulation efforts that have been introduced here in recent years. Nevertheless, Zuckerberg applauded the European efforts in a conference call with journalists on Wednesday, calling them "very positive," in a somewhat surprising assessment.

His praise for Europe's tough data rules — that have so far been considered detrimental to the company's business model — may either indicate a real strategy change or could be an effort to calm Europe's nervous regulators by promising eventual change. Zuckerberg has struck an unusually humble tone in recent weeks, as his company has gone through its worst crisis so far, even as critics say that the company has shied away from some key issues.

"We intend to make all the same controls and settings available everywhere, not just in Europe," Zuckerberg said on Wednesday, referring to a major new online privacy law that will take effect in May. Introduced as the General Data Protection Regulation (GDPR), the massive overhaul will force all companies operating here to tell their European users which data they have stored on them and provide them with an option to delete that information, among other changes.

While European social media skeptics have celebrated the law as almost revolutionary, Zuckerberg stopped short on Wednesday of promising the same rights to users in the United States or other countries disproportionately affected by the latest revelations, including the Philippines, Indonesia, Mexico and Canada.

	“Is it going to be exactly the same format? Probably not. We need to figure out what makes sense in different markets with the different laws and different places. But — let me repeat this — we’ll make all controls and settings the same everywhere, not just in Europe,” Zuckerberg said.

<b>HEADLINE</b>	<b>04/05 Russia blasts Facebook ‘censorship’</b>
<b>SOURCE</b>	<a href="https://www.cbsnews.com/news/russia-facebook-troll-factory-content-internet-research-agency-censorship/">https://www.cbsnews.com/news/russia-facebook-troll-factory-content-internet-research-agency-censorship/</a>
<b>GIST</b>	<p>The Kremlin on Thursday blasted Facebook's move to remove content created by more than 100 accounts deemed to be linked to a Russian "troll farm" as hostile censorship. Under intense scrutiny, the social media giant announced Wednesday that it was scrubbing even more accounts, ads and other content generated by the Russia-based Internet Research Agency (IRA).</p> <p>As CBS News' Olivia Victoria Gazis reported Wednesday, Facebook's chief security officer Alex Stamos wrote that 70 Facebook accounts, 65 Instagram accounts and 138 Facebook Pages linked to the IRA would be scrubbed from the company's platforms.</p> <p>The "vast majority" (95 percent) of the content was written in Russian, Stamos said, and targeted audiences in Russia or in neighboring, former Soviet countries. In total, roughly 1.5 million unique users followed at least one of the purged accounts, according to Stamos' post.</p> <p>The IRA garnered intense scrutiny after media reports and assessments by the U.S. intelligence community revealed how professional trolls at the Kremlin-linked company sought to sow discord and disinformation via online influence operations during the 2016 U.S. presidential election.</p> <p>On Thursday, President Vladimir Putin's spokesman Dmitry Peskov agreed with a journalist from one of the media organizations which had content removed from Facebook who asked whether the Russian government viewed the action as censorship.</p> <p>"Yes it is," Peskov said on a conference call with journalists. "We are of course following this and we regret it."</p> <p>Facebook's move this week followed a previous purge in September of 470 IRA accounts and pages that the company deemed "inauthentic" and said were designed to spread divisive content.</p>

<b>HEADLINE</b>	<b>04/05 Slack allows employers to read texts</b>
<b>SOURCE</b>	<a href="https://www.nbcnews.com/better/business/slack-updates-privacy-policy-employers-can-read-private-dms-without-ncna862811">https://www.nbcnews.com/better/business/slack-updates-privacy-policy-employers-can-read-private-dms-without-ncna862811</a>
<b>GIST</b>	<p>Digital technology makes it easy for your employer to monitor everything you do — the email, instant messages or texts you send and receive — on any company-provided digital devices or work platforms.</p> <p>Even so, it’s easy to see how employees could assume — mistakenly — that by using Slack, the popular instant-messaging workplace collaboration tool, their direct messages (DMs) are limited to those in their small user group.</p> <p>The company, based in San Francisco, says more than 6 million U.S. workers use its service every day.</p> <p>Slack, which stands for “Searchable Log of All Conversations and Knowledge” was originally a way for team members to communicate, but it has “expanded to become a more social platform as well,” as noted in a recent news report in the Daily Mail. Slack has chat rooms (called channels) and users can include emojis in their messages to express reactions.</p>

	<p>“Slack is a work collaboration tool, plain and simple,” said attorney Bradley Shear, founder of Digital Armour, a privacy consulting service based in Bethesda, Maryland. “It’s definitely not a watercooler area or any type of place where you should be saying inappropriate things – whether it’s about your boss or other people, or talking about politics, religion or anything of that nature. Slack is something that should only be used specifically for productivity and work purposes.”</p> <p>Since 2014, Slack customers who bought its premium “Plus” plan have been able to download and read communications transmitted via Slack through what’s called a “Compliance Export.” This cannot be done in real time, but the archive downloaded can go back to when that Slack group was created. When an export is done, employees in that Slack group are automatically notified that the boss is watching.</p> <p>Automatic notices to employees will be discontinued. The employer will now decide whether users will be told their conversations are being exported.</p> <p>Slack says its policy changes are related to the pending implementation of the European Union’s General Data Protection Regulation (GDPR) which takes effect on May 25. This is an attempt “to achieve a balance across regulatory requirements, user expectations and customer needs,” the company said in a statement to NBC News BETTER.</p>

## Terror Conditions

[Top of page](#)

<b>HEADLINE</b>	<b>04/06 UK purges extremist transport workers</b>
<b>SOURCE</b>	<a href="https://www.standard.co.uk/news/london/purge-of-extremist-workers-on-london-transport-a3807521.html">https://www.standard.co.uk/news/london/purge-of-extremist-workers-on-london-transport-a3807521.html</a>
<b>GIST</b>	<p>A purge of potential terrorists working on London’s transport system is being carried out to protect the public from another Islamic State attack, Britain’s security minister revealed today.</p> <p>Ben Wallace said that extremists who “would pose a risk to London and its transport network” had already been removed from their posts during an intensive drive to identify potential attackers.</p> <p>He revealed that the new action was intended to help police and the intelligence agencies cope with the “acute” threat and suggested that further removals would take place as part of the continued effort to disrupt would-be terrorists before they could strike. His comments came during an interview with the Evening Standard in which Mr Wallace also disclosed that:</p> <p>Some foreign fighters from Britain were “re-engaging” in the conflict in Syria and only a “tiny” number were attempting to return.</p> <p>“A number” of other UK Islamists were detained in Syria in addition to the two so-called “Beatles” Alexander Kotey and El Shafee Elsheikh held by Kurdish fighters.</p> <p>In Britain, IS and far-Right extremists have been grooming people with autism to turn them towards violence.</p> <p>But his most significant comments were on the ongoing effort to remove potentially dangerous extremists from jobs on London’s transport network and in other “sensitive” areas.</p> <p>The problem was highlighted following the London Bridge attack last year when it emerged that Khurram Butt, one of the three killers, had previously worked for London Underground.</p> <p>Mr Wallace said that with about 3,000 terror suspects under active scrutiny and a further 20,000 logged as former “subjects of interest”, police and MI5 needed other methods, beyond arresting suspects, to keep the</p>

	<p>public safe. Disrupting potential attackers through early intervention was one way, particularly when they could use their jobs for malign purposes. “We’ve done a lot of work over the last year about people working in sensitive areas who shouldn’t be, and removing their ability to do so,” Mr Wallace said.</p> <p>“It’s reducing the insider threat. There are definitely people who have worked in sensitive areas that we have now removed who would pose a risk to London and its networks of transport.</p> <p>“We’ve got to protect as well as pursue. There are more things we can do around where these people work.” Mr Wallace said that other methods to disrupt potential terrorists included targeting them through immigration powers or welfare policies.</p> <p>He added: “We have an acute number of people in this country who are attracted to extremism or violent extremism. You can’t arrest your way out of that so you have to develop a way that you can early intervene with some people. Disruption is really important.</p> <p>“There are some people whose immigration status may be rightly examined to remove them from threat and there are people involved in normal crime who we could take off the streets. There are people who have social issues — are they neglecting their families, are they a troubled family that the troubled family scheme could deal with, are they being exposed to non-regulated school settings?</p> <p>“We seize a number of these people who have autism, who are targeted and groomed by IS and the far-Right — so are we doing enough in mental health to identify vulnerable people?”</p>

<b>HEADLINE</b>	<b>04/05 Somalia emergency declaration extended</b>
<b>SOURCE</b>	<a href="http://allafrica.com/stories/201804060369.html">http://allafrica.com/stories/201804060369.html</a>
<b>GIST</b>	<p>U.S President Donald Trump has signed an executive order extending a national emergency declaration for Somalia, which had been slated to expire in May, the White House said in a statement on Wednesday.</p> <p>It also cited the nation's continued threat to U.S. national security and foreign policy.</p> <p>"The situation with respect to Somalia continues to pose an unusual and extraordinary threat to the national security and foreign policy of the United States.</p> <p>"For this reason, the national emergency declared on April 12, 2010, and the measures adopted on that date and on July 20, 2012, to deal with that emergency, must continue in effect beyond April 12, 2018," the release said.</p> <p>It said the emergency was first declared in 2010 and had been extended several times due to piracy off the Somali coast and internal attacks by al-Shabab, a terrorist group affiliated with al-Qaeda (both are banned in Russia).</p> <p>According to the release, Wednesday's action extended the emergency declaration for one year.</p>

<b>HEADLINE</b>	<b>04/05 Police train to swarm London 'terror targets'</b>
<b>SOURCE</b>	<a href="https://news.sky.com/story/hundreds-of-specially-trained-police-ready-to-swarm-terror-targets-in-london-11318002">https://news.sky.com/story/hundreds-of-specially-trained-police-ready-to-swarm-terror-targets-in-london-11318002</a>
<b>GIST</b>	<p>Hundreds of specially-trained police will be ready to deploy to potential London terror targets at short notice under a new plan called Project Servator.</p> <p>The officers could be sent to patrol locations like shopping centres, transport hubs and tourist attractions in</p>

	<p>a move aimed at deterring, detecting and disrupting possible attacks.</p> <p>The plans involve undercover and highly visible police trained in how to spot people planning such acts.</p> <p>Project Servator has already been used for four years by City of London Police, and was trialled in Wandsworth and Lambeth last year.</p> <p>In the past four years under Servator deployments, the force has carried out 938 searches leading to 547 arrests.</p> <p>Superintendent Nick Aldworth said traditional techniques for stopping terrorism have not worked against new, simpler terrorist attack methods such as using vehicles as weapons.</p> <p>He said: "When we look globally and nationally, we have seen that terrorists now use simple methodologies that perhaps have evaded some of our traditional techniques for countering terrorism.</p> <p>"In terms of specific methodologies, we put a lot of time and energy into future forecasting.</p> <p>"We look at Syria and some of the things that are happening there, and how that might be migrated back into the UK.</p> <p>"That's an ongoing piece of work, not only by us but through our intelligence services colleagues as well."</p> <p>The London Bridge and Finsbury Park attacks both saw rented vans hit and kill members of the public, while a car was used to kill people on Westminster Bridge last year.</p>

<b>HEADLINE</b>	<b>04/05 France poised to expel radical imam</b>
<b>SOURCE</b>	<p><a href="https://www.nytimes.com/2018/04/05/world/europe/france-extremism-doudi.html?hp&amp;action=click&amp;pgtype=Homepage&amp;clickSource=story-heading&amp;module=second-column-region&amp;region=top-news&amp;WT.nav=top-news">https://www.nytimes.com/2018/04/05/world/europe/france-extremism-doudi.html?hp&amp;action=click&amp;pgtype=Homepage&amp;clickSource=story-heading&amp;module=second-column-region&amp;region=top-news&amp;WT.nav=top-news</a></p>
<b>GIST</b>	<p>MARSEILLE, France — No ordinary preacher, El Hadi Doudi is perhaps France’s leading proponent of fundamentalist Islam. His influence extends throughout Europe, where his lawyer says the cleric is the only imam authorized to issue fatwas. Over 37 years, he has often berated Jews, women and the modern world, yet the authorities have tolerated his hard-line sermons and occasionally cultivated him as an ally.</p> <p>That was until now.</p> <p>The government of President Emmanuel Macron appears poised to expel the preacher in one of the most striking examples of its hardening stance toward radical Islam. Mr. Macron has already used his huge majority in Parliament to inscribe into law some government tactics — searches and seizures, house arrests, shutting down mosques — that had been applied before only as part of the state of emergency put in place after terrorist attacks in Paris killed 130 people in November 2015.</p> <p>The case of Imam Doudi, 63, who was born in Algeria and is not a French citizen, is part of a high-profile effort by the Macron administration to intensify scrutiny of Muslim clerics and, in some cases, to deport them. Some analysts say that Mr. Macron is using it to display toughness, as European governments struggle for tools to battle radical Islam, and as he fends off political challenges from the far right.</p> <p>“They want to make an example of him,” said Vincent Geisser, an Islam expert at the University of Aix-Marseille. “It’s got more to do with communicating firmness.”</p> <p>The tough line is another example of the unique stance Mr. Macron has taken since winning office almost a year ago. He is hailed globally as a great defender of liberal democracy, a voice of reason in a Europe</p>

awash in angry populism. Yet he has also assumed great executive powers, alarming critics who have charged the Macron government with overreaching in areas like immigration, and who now worry about his approach to fighting terrorism.

France was hardly passive toward extremism in the past; the Interior Ministry kicked out 40 Muslim clerics from 2012 to 2015, and another 52 people, including clerics, over the last 28 months. Not all of those recent expulsions have come during Mr. Macron's time in office, yet his government seems determined to make clear that France now has a far lower tolerance for radical preaching.

"It's not just the terrorist organizations, the armies of Daesh, the imams of hate and death that we are fighting," Mr. Macron said, referring to the Islamic State, in a speech last week honoring Lt. Col. Arnaud Beltrame, a police officer who died in terrorist attack at a supermarket in southern France after swapping himself with a hostage.

"What we are fighting is also is this subterranean Islamism, which advances through social networks, which accomplishes its task invisibly, which works silently on the weak and the unstable, betraying even those it claims to represent, who, on our very soil, indoctrinate through proximity and daily corrupt," Mr. Macron said.

The expulsion of Imam Douidi was recommended by the Marseille authorities under a French law regarding "deliberate acts tending to provoke discrimination, hatred and violence toward an individual or a group."

In a confidential investigative report seen by The New York Times, the authorities blamed Imam Douidi's "patient and insistent proselytizing" for helping to turn a quarter of Marseille's practicing Muslims — the largest concentration in France — into practitioners of Salafism, an ultraconservative movement within Sunni Islam. For the country as a whole, the proportion of Muslims who are Salafists is much lower, about 5.5 percent.

Imam Douidi's influence, the report noted, extends all over France and even "goes well beyond the country's frontiers" and throughout Europe, as other countries, in particular Germany, have had their own troubles with Salafist preachers and monitor them carefully.

<b>HEADLINE</b>	<b>04/05 US 'mismanaged' Afghan power project</b>
<b>SOURCE</b>	<a href="https://www.stripes.com/news/middle-east/report-army-corps-of-engineers-mismanaged-60-million-afghan-power-project-1.520506">https://www.stripes.com/news/middle-east/report-army-corps-of-engineers-mismanaged-60-million-afghan-power-project-1.520506</a>
<b>GIST</b>	<p>A \$60 million power project overseen by the U.S. Army Corps of Engineers in Afghanistan couldn't be powered up for fear it would put Afghan lives at risk, and shoddy work could leave the system structurally unstable, a government watchdog found.</p> <p>The third phase in the Corps' North East Power System project strung high-voltage power lines through 32 miles of Parwan and Kapisa provinces as part of an international effort to build up Afghanistan's power grid and bring electricity to communities and military installations throughout the beleaguered country.</p> <p>But when the system was turned over to the Afghan government, residents in some areas were still living and farming on land used for the project, perhaps dangerously close to the transmission towers and high-voltage power lines — in some cases, directly under them — according a review by the Special Inspector General for Afghanistan Reconstruction, published Wednesday.</p> <p>Inspectors also found what they said were signs of poor workmanship at some of the 18 transmission towers inspected last fall, which the report said could lead to their collapse from crumbling concrete foundations or erosion.</p>

	<p>A Corps official at Bagram Air Field said officials reviewed the structural concerns raised in the report and found they do not pose a risk to the system's long-term operation. Spokeswoman Britney Walker said other issues noted in the report had been resolved and the power would be turned on in seven days.</p> <p>In an official response included in the SIGAR report, the Corps rejected most of the report's findings and recommendations — including its title, which accused the Corps of “mismanagement.”</p> <p>Officials said SIGAR ignored the fact that some features of the power system, such as connecting the third phase of the project to its power source, were supposed to be done by other organizations involved in building out the grid, such as the U.S. Agency for International Development, the Asian Development Bank or the governments of Afghanistan, France or India.</p> <p>“The SIGAR report appears to suggest that if (the Corps) finished a project before another critical piece of the grid was available, (it) should build the incomplete segment or terminate the contract,” the response said.</p> <p>Acknowledging the difficulty of completing power projects in the embattled country, where insurgents control, influence or contest more than half of the districts, Walker said officials “are confident the Afghan government can operate these systems safely.”</p>

<b>HEADLINE</b>	<b>04/05 Evacuations rebel-held town suspended</b>
<b>SOURCE</b>	<a href="http://abcnews.go.com/International/wireStory/evacuation-syrias-douma-suspended-disagreements-54255072?">http://abcnews.go.com/International/wireStory/evacuation-syrias-douma-suspended-disagreements-54255072?</a>
<b>GIST</b>	<p>Evacuations from the rebel-held town of Douma near the Syrian capital were suspended on Thursday, days after hundreds of opposition fighters and their relatives left for areas of the country's north as part of a surrender deal following a massive government offensive.</p> <p>State news agency SANA said the suspension was the result of disagreements within the Army of Islam rebel group, adding that buses that entered Douma for the evacuations on Thursday returned without passengers.</p> <p>Douma is the last town held by rebels in the eastern Ghouta suburbs of Damascus. Other rebel groups agreed to relocate to the north after a Russia-backed government offensive in February and March that killed hundreds of people and caused catastrophic destruction.</p> <p>The Army of Islam appears to have reached a deal with Russia to relocate to parts of northern Syria controlled by Turkey-allied opposition forces. On Wednesday, 650 fighters and civilians escorted by the Syrian Arab Red Crescent left Douma and headed north toward the town of Jarablus, according to SANA and opposition activists.</p> <p>The Army of Islam has never publicly confirmed the agreement, and is said to be divided on whether to leave Douma, with hard-liners wanting to stay and fight.</p> <p>The Britain-based Syrian Observatory for Human Rights said the suspension was triggered by measures taken by Turkish troops in areas where opposition fighters are arriving. It said there are about 14,000 Army of Islam fighters in Douma and the nearby eastern Qalamoun region.</p> <p>On Thursday, a reporter for Syrian state TV speaking from an area on the edge of Douma said no Army of Islam fighters have left so far, adding that those who departed over the past three days belonged to other groups.</p>

<b>HEADLINE</b>	<b>04/05 Iraq PM in Japan; seeks assistance</b>
<b>SOURCE</b>	<a href="http://abcnews.go.com/International/wireStory/iraq-leader-japan-talks-peace-reconstruction-54249661">http://abcnews.go.com/International/wireStory/iraq-leader-japan-talks-peace-reconstruction-54249661</a>
<b>GIST</b>	<p>Iraqi Prime Minister Haider al-Abadi sought international support in Japan on Thursday to restore peace and prosperity in his country, torn by extremism.</p> <p>Al-Abadi co-hosted a meeting in Tokyo with Japanese Prime Minister Shinzo Abe to discuss ways to improve public safety in Iraq while promoting the country's sustainable economic development.</p> <p>Abe announced a 35 billion yen (\$330 million) loan for irrigation projects in Iraq during talks with al-Abadi later Thursday and pledged Japan's continuing support. The loan is part of Japan's \$6 billion pledge to stabilize the Middle East, the source of 80 percent of its oil imports.</p> <p>The conference was aimed at helping Iraq reconstruct by establishing a system to eliminate weapons held by many civilians. The goal is to create jobs, provide vocational training and motivate people to return to their ordinary lives, Japanese officials said.</p> <p>The Iraqi government in December announced the end of its operations against the militants. But automatic rifles and other weapons are widespread in Iraq and have been used by Islamic extremists in recent years, officials said.</p> <p>"We have fought the fight against terrorism with strong determination. Now we shift toward making the country safer and we are moving to an excellent level of development," al-Abadi told a joint news conference.</p> <p>Iraqi officials cited unemployment among youth and other vulnerable groups as a potential source of violent extremism, and said organizing vocational training appropriate for the labor market is a challenge.</p> <p>Japan hopes to contribute its expertise from a U.N.-led disarmament and demobilization project in Afghanistan that ended in 2006.</p> <p>Officials from 30 countries and international organizations attended the conference.</p>

<b>HEADLINE</b>	<b>04/05 US slams Houthis attack on shipping</b>
<b>SOURCE</b>	<a href="https://www.hstoday.us/subject-matter-areas/maritime-security/white-house-slams-houthis-attack-commercial-shipping/">https://www.hstoday.us/subject-matter-areas/maritime-security/white-house-slams-houthis-attack-commercial-shipping/</a>
<b>GIST</b>	<p>The White House slammed the Iran-backed Houthi rebels in Yemen for threatening critical shipping lanes with their rocket attack on an oil tanker Tuesday off of Yemen's key port city Al Hudaydah.</p> <p>The attack on the Saudi tanker happened at about 1:30 p.m. local time in international waters. The Saudis said the ship sustained "a slight but ineffective hit," with no crew members injured, before moving on its way toward the Red Sea with a warship escort.</p> <p>The Houthis claimed they "targeted a battleship belonging to the coalition" in revenge for a Monday airstrike in Al Hudaydah that killed several civilians.</p> <p>Saudi-led Arab coalition spokesman Col. Turki Al-Maliki told reporters that there are deeper fears for maritime traffic in the Bab Al-Mandab strait, including threats of boats laden with explosives targeting vessels in the busy waterway.</p> <p>The official Saudi Press Agency said Al-Maliki vowed that the coalition "will continue taking the necessary measures and means to keep the security and stability of the region, and the continuation of the freedom of regional and international navigation in the Red Sea and Bab-Al-Mandab strait, as part of its</p>

	<p>commitment to make Yemen a safe and secure place.”</p> <p>A statement from White House press secretary Sarah Huckabee Sanders said the United States “is very concerned about the Houthis’ latest attempt to escalate the war in Yemen, this time by attacking a commercial vessel while it transited one of the world’s busiest shipping lanes, the Bab al-Mandab, in international waters.”</p> <p>“A significant portion of global trade moves through the Bab al-Mandab every day, including key energy and food supplies. In January, the Houthis publicly threatened to attack international commercial maritime traffic in the Red Sea, and launched this attack near the vital port of Hodaydah,” Sanders said.</p>

<b>HEADLINE</b>	<b>04/05 Pulse nightclub attack survivors lawsuit</b>
<b>SOURCE</b>	<a href="http://www.foxnews.com/us/2018/04/06/pulse-nightclub-attack-survivors-sue-google-facebook-twitter-over-material-support-to-isis.html">http://www.foxnews.com/us/2018/04/06/pulse-nightclub-attack-survivors-sue-google-facebook-twitter-over-material-support-to-isis.html</a>
<b>GIST</b>	<p>Survivors of the Pulse nightclub massacre in Orlando, Fla., perpetrated by a supporter of the Islamic State terror group, are suing Google, Facebook, and Twitter, alleging that the tech firms allowed the group to proliferate and spread propaganda.</p> <p>In a lawsuit filed Wednesday in Orlando’s federal courthouse, 16 victims of the June 12, 2016 shooting -- the second deadliest in American history -- claim that the three tech giants were responsible for letting ISIS disseminate propaganda on their platforms, thus providing “material support” to the terror group, in violation of the Justice Against Sponsors of Terrorism Act (JASTA).</p> <p>Such support, the suit alleges, let gunman Omar Mateen carry out his attack, which left 49 people dead and another 58 injured, the Orlando Sentinel reported. Mateen was killed in a shootout with responding police officers.</p> <p>“By the time of the terror attacks in this case, ISIS had become one of the largest and most widely recognized and feared terrorist organizations in the world ... due in large part to its use of the Defendants’ social media platforms to promote and carry out its terrorist activities,” wrote Ari Kresch and Keith Altman, the Michigan attorneys who filed the lawsuit.</p> <p>“The expansion and success of ISIS is in large part due to its use of the defendants’ social media platforms to promote and carry out its terrorist activities,” the lawsuit reads. “But for ISIS’s postings using defendants’ social media platforms, Mateen would not have engaged in his Orlando attack.”</p> <p>The survivors of the attack also argue that the tech giants profited from content created by ISIS and that the terror group may have received money from Google-owned YouTube in the form of ad revenue.</p> <p>The suit requests a judge to declare that the three companies “have violated, and are continuing to violate, the Anti-Terrorism Act” and force them to pay “compensatory damages in amounts to be determined at trial” in addition to covering legal costs and other relief.</p>
<p><a href="#">Return to</a></p> <p><a href="#">Top</a></p>	

<b>HEADLINE</b>	<b>04/05 Brain injury center opens at JBLM</b>
<b>SOURCE</b>	<a href="http://www.king5.com/article/news/local/brain-injury-center-opens-at-joint-base-lewis-mcchord/281-535733736">http://www.king5.com/article/news/local/brain-injury-center-opens-at-joint-base-lewis-mcchord/281-535733736</a>
<b>GIST</b>	<p>The wars in Afghanistan and Iraq have brought the issue of brain injury into sharper focus.</p> <p>Once called "shell shock" or "having your bell rung," soldiers would often shake off blast injuries and head back to their units, only to have headaches, depression, other psychological and family problems</p>

emerge weeks, months and even years later.

In too many cases, soldiers take their own lives.

The Madigan Army Medical Center is now the recipient of a \$12 million fully equipped facility to deal directly with Traumatic Brain Injury (TBI). TBI is often associated with the blast forces from Improvised Explosive Devices (IED) triggered close to troops on foot or in vehicles. While many IED explosions lead to horrific physical as well as brain injuries, many times the injuries are not obvious because they are contained within the skull.

The facility is known as the Intrepid Spirit Center, and the one now officially opened at Joint Base Lewis-McChord is the sixth of nine such centers around the country. Another West Coast location at Camp Pendleton, California, also opened Thursday. The centers are built with private donations raised by the Intrepid Fallen Heroes Fund, then the entire center is donated to the Department of Defense.

When a soldier comes in, they are treated by an integrated team of specialists and therapists who work on a comprehensive treatment plan.

"It really covers maybe seven or eight domains," said Col. Beverly Scott, M.D., a neurologist who runs the center and has also dealt with brain injuries in Afghanistan.

Col. Scott says those areas "include medical, psychological, intellectual, spiritual and social." Often soldiers are reached through their creative side; there is art as well as physical therapy.

One goal of the centers is to help restore soldiers to active duty. The Intrepid Center at Ft. Campbell, Kentucky, opened in 2014 and claims a 94 percent success rate.

But Scott says that's just one measure, adding that some soldiers come in shortly before retiring from the military.

"It's never too late to help our service members, it's never too late for them to seek care and enter our program," said Scott.

<b>HEADLINE</b>	<b>04/05 ISIS attempts to re-emerge in Syria</b>
<b>SOURCE</b>	<a href="http://abcnews.go.com/International/wireStory/trump-mulls-pullout-attempts-emerge-syria-54263846?">http://abcnews.go.com/International/wireStory/trump-mulls-pullout-attempts-emerge-syria-54263846?</a>
<b>GIST</b>	<p>Even as President Donald Trump mulls a U.S. pullout from Syria, insisting that the Islamic State group is "almost completely defeated," the extremist group is showing signs of a revival.</p> <p>Despite being kicked out of the main towns they once occupied near the Iraqi border, the militants have regrouped elsewhere and revised their tactics, recently mounting a brazen attack on a border city in eastern Syria and expanding their footprint inside the Syrian capital itself.</p> <p>Talk of a U.S. troop withdrawal has alarmed the United States' main ally in Syria, the Kurds, who fought alongside the Americans to roll back the Islamic State group. They fear not only an IS resurgence, but also that without U.S. troops in the country, Turkey, Russia and Iran will fill the void and wrest control of northern and eastern Syria.</p> <p>The White House said Wednesday that the U.S. military mission against IS in Syria is coming to a "rapid end," but offered no timetable for the withdrawal of the 2,000 U.S. troops other than to say they will leave just as soon as the last remaining IS fighters can be vanquished.</p> <p>Trump, however, has signaled to his advisers that ideally, he wants all troops out within six months, according to three U.S. officials, who spoke on condition of anonymity because they weren't authorized to discuss what transpired in a meeting with the president.</p> <p>Developments on the ground, however, suggest it will be difficult, if not impossible, to completely snuff out the group before then.</p> <p>"Daesh is not over," said the commander of the U.S.-backed Manbij Military Council, the joint Kurdish-Arab body administering this strategic northern Syrian town.</p> <p>"Daesh still has cells present in all areas and every now and then there are problems in areas where the cells are still operating," said the commander, who spoke on condition he be identified only by his nom de guerre, Mohammed Abu Adel, in line with regulations, and referred to IS by its Arabic acronym.</p> <p>Speaking to the Associated Press on Wednesday, he said the U.S. statements about a pullout were a cause for "concern on the street level" but that Kurdish officials were receiving reassurances from U.S. generals on the ground that American troops were staying.</p> <p>Last week, an explosion killed two coalition personnel, an American and a Briton, during an operation to capture a known IS member in Manbij, where U.S. troops maintain a large presence. It was the first such blast to hit the U.S.-led coalition since it deployed in the town months after the U.S.-backed forces liberated it from IS in 2016 following fierce battles that lasted nearly three months.</p> <p>Since then, the town has served as a model of stabilization, but officials are now expressing concern about IS attempting to re-emerge.</p>

The U.S.-backed forces — a mix of Kurdish and Arab fighters known as the Syrian Democratic Forces, or SDF, — routed IS militants from almost all the territory the extremists controlled in northern Syria, including the group's de facto capital of Raqqa, in October. In November, a coalition of Iranian, Iraqi, Syrian and Russian forces secured the militant's last urban stronghold, Boukamal, in eastern Syria on the border with Iraq.

That seemed to herald victory over the militants. The various sides then turned their attention to pursuing their own interests in the disintegrated country.

The IS militants kept a sliver of territory along the Euphrates River near Boukamal, and some nebulous zones of control in the desert of eastern Syria and on the border with Iraq — but nothing that seemed beyond containment.

But in a surprise attack, the militants stormed Boukamal on Monday, triggering heavy fighting before Iranian-backed Shiite militias beat them out, according to a war monitoring group and Syrian opposition activists with connections to the region. Approximately 400 Islamic State fighters crossed the Euphrates River and ambushed the town, according to the Syrian Observatory for Human Rights monitoring group, killed 11 pro-government fighters in clashes, and losing five of their own.

From their desert territory the IS militants have harassed forces at oil stations, as well, according to Mohammad al-Ayed, director of the Palmyra News Network.

U.S. and Kurdish officers had warned of an IS resurgence when Turkey attacked the town of Afrin in northwestern Syria in March to drive out the main Kurdish militia, known as the YPG.

The YPG forms the backbone of the Syrian Democratic Forces, America's main partner in Syria, which then shifted hundreds of fighters from operations against IS in eastern Syria to the front lines against Turkey in Afrin.

That forced a pause in operations against the main IS holdout in Syria. The U.S.-led coalition has cut its airstrikes against IS by half since the Kurdish-led fighters moved away from eastern Syria, said coalition spokesman Col. Ryan Dillon.

The U.S. relies on ground maneuvers by the Syrian Democratic Forces to flush out IS fighters and expose them to airstrikes, Dillon said. "If the SDF are not constantly putting pressure on ISIS elements, that allows them to quietly reconsolidate," he added, using an alternate acronym for the Islamic State group.

Meanwhile, with the Syrian government focused on vanquishing the rebels in their stronghold of eastern Ghouta, near Damascus, IS militants surged from a pocket of territory they hold on the southern edge of the capital to snatch a neighborhood right from under the government's nose.

IS has lost almost all the territory it once controlled in Syria and Iraq, land that had encompassed a third of those countries. But the pockets it still holds provide protection.

IS fighters have excellent knowledge of the desert areas along the Syria-Iraq border, dating back to the early days of the Islamic State group and even before, when the group was called al-Qaida in Iraq, said Jalal al-Hamad, a Europe-based Syrian activist who monitors the war with an organization called Justice for Life.

IS has extensive tunnels there and can move relatively undetected, avoiding Syrian and Russian airstrikes, al-Hamad said, though American planes can detect them. The militants use bad weather, particularly dust storms, to cross the Euphrates, he said.

The Kurdish-led Syrian Democratic Forces control about 25 percent of Syria, and the Kurds are hoping to emerge from the conflict with a degree of self-rule in their territory.

	<p>But they fear that an American withdrawal will leave them unable to hold on to much of that. It would allow Turkey, which succeeded in capturing Afrin, to carry out its threat to attack Manbij and try to take other Kurdish-held territory along the Syrian-Turkish border.</p> <p>It would also, they warn, cede the east completely to Damascus' allies Russia and Iran, which have set up a series of bases in the country during seven years of war.</p> <p>Ilham Ahmed, a senior Kurdish official in Syria's Raqqa province, said an American pullout would open the way for "total chaos in Syria."</p>

<b>HEADLINE</b>	<b>04/05 Seattle homeless erect 'tent mansion'</b>
<b>SOURCE</b>	<a href="http://mynorthwest.com/947212/seattle-homeless-tent-mansion-low-priority-for-city-cleanup/">http://mynorthwest.com/947212/seattle-homeless-tent-mansion-low-priority-for-city-cleanup/</a>
<b>GIST</b>	<p>Two days after Melissa Burns' tent encampment was swept by City of Seattle workers from the small triangle city park at Third Avenue and Broad Street, a small crew of homeless volunteers helped her begin to build a much larger wood and tarp structure half a block away, on a busy Third Avenue sidewalk.</p> <p>The structure, complete with glass French doors connected to wooden-pallet walls, surrounding their interior furniture, can be easily seen by Seattle tourists heading up and down the Space Needle elevators.</p> <p>"When in Rome, you modify, adapt and overcome," said one of the homeless carpenters who built the structure, which passers-by have dubbed the "Tent Mansion."</p> <p>Melissa Burns is friendly to everyone who passes by with questions.</p> <p>"We're homeless, so we're solving that problem," she said. "We are creating a home here."</p> <p>Burns told KIRO 7 she's a former children's social worker who moved to Seattle from West Virginia. "We appreciate Seattle's liberal vibe," she said.</p> <p>She and her boyfriend say when city workers swept them out of a homeless camp a block away, they moved to this highly visible space for a number of reasons.</p> <p>"We're not going to cower in our tent like we're scared of the world," she said. "We're going to come out and live and we're going to help other people, because we feed other homeless people with food bank food, and we plan to set these up all over town."</p> <p>KIRO 7 sent photos of Burns' sidewalk structure to four Seattle agencies, including the mayor's office. The city's homeless navigation team contacted KIRO 7 four hours later, saying Burns and everyone else who lives in the encampment refused offers for shelter days ago.</p> <p>The city navigation team says only 37 percent of homeless people they contact accept offers of shelter. Burns says few shelters accept couples to live together, and she and her boyfriend don't want to comply with a typical shelter's rigid rules.</p> <p>"We don't want to change our lifestyle to fit their requirements," she said.</p> <p>The city of Seattle told KIRO 7 they've gotten complaints about 400 illegal unsanctioned encampments. They say their outreach teams are stretched so thin they average removing only two to three per day.</p> <p>Burns says she asked the navigation team questions.</p>

“The options that I asked them for at the last sweep was information,” she said. “Where is it safe to set up? We don’t use drugs, so where would we be able to go and not have needles all around us, and where would we able to go and not get robbed or be in a position where if someone attacked us that we could still receive emergency services?”

The city says they expect complaints—they expect to reach out to Burns again, and they’ll keep offering services — and housing — before they give her 72 hours’ notice to move again. They say the encampment could be there for days – or weeks — because they prioritize encampments which are safety hazards first — and there are hundreds on their list before this one.

When asked if she would accept permanent housing offers, Burns said she would not likely accept them.

“We intend to stay here,” she said. “This is the solution to the homeless problem. We want autonomy, right here.”

<b>HEADLINE</b>	<b>04/05 Hamas pays for protest deaths, injuries</b>
<b>SOURCE</b>	<a href="https://www.yahoo.com/news/israeli-fire-kills-palestinian-gaza-border-more-protests-094735729.html">https://www.yahoo.com/news/israeli-fire-kills-palestinian-gaza-border-more-protests-094735729.html</a>
<b>GIST</b>	<p>GAZA (Reuters) - Israeli fire killed a Palestinian at the Gaza border on Thursday and another died of wounds suffered several days ago, health officials said, bringing to 19 the number of Palestinian dead from a week of frontier protests.</p> <p>The Israeli military said one of its aircraft targeted an armed militant near the security fence along the Gaza Strip.</p> <p>Tens of thousands of Palestinians are holding a six-week-long protest in tent encampments along the fenced border of the Israeli-blockaded Gaza Strip, an enclave of two million ruled by the militant Hamas Islamist group.</p> <p>The demonstrators are pressing for a right of return for refugees and their descendants to what is now Israel.</p> <p>Many of the demonstrators who turned out for the first wave of protests along the border returned to their homes and jobs over the week. But organisers expect large crowds again on Friday, the Muslim sabbath.</p> <p>Protesters on Thursday were bringing more tents and thousands of tyres to burn, in what has become known as “The Friday of Tyres.” They say they intend to use mirrors and laser pointers to distract Israeli sharpshooters.</p> <p>“Friday is going to be a special day, they will see that we are not afraid,” said one Palestinian youth as he delivered tyres to the area. But Ahmed Ali, a 55-year-old teacher, said that while he wanted his family to see the tent camp, but would not come back on Friday.</p> <p>“I taught my children one day we will be returning to Jaffa, our home, but I can’t allow them to throw stones because the Israelis won’t hesitate to kill them,” he said.</p> <p>Hamas said on Thursday it would pay \$3,000 to the family of anyone killed in the protests, \$500 for critically injuries and \$200 for more minor injuries. Israeli leaders say that such payments serve to instigate violence.</p> <p>Visiting the frontier this week, Israeli Defence Minister Avigdor Lieberman warned protesters that "every person who comes close to the fence is endangering their lives."</p>

	<p>The protest action is set to wind up on May 15, when Palestinians mark the "Naqba", or "Catastrophe", when hundreds of thousands fled or were driven out of their homes during violence that culminated in war in May 1948 between the newly created state of Israel and its Arab neighbours.</p> <p>Israel has long ruled out any right of return, fearing it would lose its Jewish majority.</p>

<b>HEADLINE</b>	<b>04/05 Bottlenose dolphins in Puget Sound</b>
<b>SOURCE</b>	<a href="http://q13fox.com/2018/04/05/rare-visitors-bottlenose-dolphins-living-in-puget-sound/">http://q13fox.com/2018/04/05/rare-visitors-bottlenose-dolphins-living-in-puget-sound/</a>
<b>GIST</b>	<p>SEATTLE -- There's been a rare sighting in Puget Sound recently. A group of bottlenose dolphins has been spotted regularly over the past seven months.</p> <p>Researchers at the nonprofit Cascadia Research tell us this has never happened before. Aside from a few random sightings in the years since 2008, they've never seen the dolphins hang around in the area for this long. Bottlenose dolphins tend to live in warmer, tropical waters, not the cold waters of Puget Sound.</p> <p>"People don't see bottlenose dolphins here," said Laurie Shuster, a volunteer research assistant with the Olympia-based Cascadia Research. "Pacific white-sided dolphins are native to this area so in the past that's the type of dolphin people would be likely to see, so it is unusual for them (bottlenose) to be up here."</p> <p>People first spotted the bottlenose dolphins in September 2017. Researchers say based on the sightings and images, they estimate five or six are living in Puget Sound, but only three bottlenose dolphins have been identified.</p> <p>Researchers believe the dolphins are part of the California coastal stock. One of the dolphins has been identified as a well-known dolphin first photographed by researchers in 1983 named "Miss." This is the first time that an individual bottlenose dolphin in the Puget Sound has been traced to a specific population.</p> <p>"Miss" has been moving all her life. She was first spotted in Southern California in the 1980s, Monterey Bay in the 1990s and then in San Francisco Bay area in 2012. Now she's in Puget Sound.</p> <p>So why are they here? Cascadia Research says they don't know why just yet.</p> <p>"I'd like to pin it on something that easy, but there's really no definitive connections right now to climate change or global warming," said Shuster. "It could be that they are looking for prey, that they're looking for a different habitat. We have no idea why they're up here."</p>

<b>HEADLINE</b>	<b>04/05 'Feel better' fad sweeping Los Angeles</b>
<b>SOURCE</b>	<a href="http://www.latimes.com/business/la-fi-fitness-fads-20180405-story.html">http://www.latimes.com/business/la-fi-fitness-fads-20180405-story.html</a>
<b>GIST</b>	<p>When Amber Dodson needs a break from her rigorous workout regimen, she steps nearly naked into a high-tech machine that looks like a giant energy drink can. Only her head is visible as the temperature in the chamber plummets to minus 292 degrees Fahrenheit for three minutes, liquid nitrogen vapor billowing down the sides.</p> <p>"I tend to get extremely inflamed and I don't like taking days off," said Dodson, 36, who pays \$299 a month for up to 30 sessions at Coast Cryo in Marina del Rey. "It's been a lifesaver because I can't deal with sore muscles and bad sleep."</p> <p>Cryotherapy, a freezing treatment used by elite athletes such as LeBron James and Michael Phelps, is just one of the pricey injury recovery and prevention strategies that are exploding in popularity in Los Angeles — despite a lack of scientific evidence in many cases to support their efficacy. Cryotherapy alone is</p>

expected to grow to a \$5.6-billion global industry by 2024, up from \$2.5 billion in 2016, according to Grand View Research, a market research and consulting company.

The remedies — which also include IV therapy drips, vitamin-infused booster shots, hyperbaric oxygen chambers and compression therapy — cater to workout fanatics who insist an old-fashioned ice pack and a Gatorade won't suffice. They're now being offered at so-called wellness boutiques dedicated to administering the treatments; medical offices, weight loss clinics and traditional spas are also getting in on the craze.

Drip Doctors in downtown Los Angeles, for example, offers more than two dozen intravenous drips and booster shots to increase energy, promote faster recovery and aid in weight loss.

There's an \$89 Hydroboost IV vitamin drip "perfect for those who need instant hydration," a \$30 Supercharged booster shot for customers who are looking for "an intense burst of oomph" or a wallet-busting \$220 Limitless IV vitamin drip. That one is billed as "an 'all in one' concoction" that will "optimize performance, neurological function, immune support, detox, and keep you feeling rejuvenated."

Skeptics contend that there is little benefit to IV drip therapy for people who are essentially healthy, saying people are capable of hydrating sufficiently and getting the nutrients they need through food. They instead point to a placebo effect.

"This is Los Angeles after all, where anything that promises to make you feel better becomes the latest fad," said Dr. Michael Gottlieb, a specialist in internal medicine who practices in Los Angeles.

True believers, however, counter with the argument that IV therapy works and beats dependence on painkillers. The global market for IV tubing and related equipment is expected to grow at a steady rate of just under 4% to more than \$1.2 billion by 2025, according to a new report from Persistence Market Research.

"It's taking a more natural and preventive approach to health," said Dr. Anthony Ho, a co-founder and chief of business operations at Drip Doctors, which also provides house calls. "It started out being more at the high end, with celebrities, corporate types. We wanted to make it available to the masses."

Even hyperbaric oxygen chambers have gone beyond the traditional use of saving the lives of deep-sea divers who surface too quickly. Sessions claim to boost energy, reduce pain and inflammation, and speed injury recovery times, and they can cost \$350 to \$450 per treatment.

Postal worker Nicholas Howard Hayes, 28, uses the hyperbaric oxygen chamber at Infusio in Beverly Hills to help alleviate sore muscles after long days at work.

"Not only am I walking 12 to 15 miles a day on my routes, I'm also lifting a lot of heavy, awkward packages, like small refrigerators, microwaves, even small beds," he said. After his day job is done, Hayes hits the gym, where he works as a personal trainer.

"I'm constantly overexerting myself," Hayes said. But after a session in the hyperbaric chamber, where the air pressure is increased to allow the lungs to gather more oxygen, "it's amazing how I feel after 20 minutes. I feel so good that I go the gym to work out" afterward.

Infusio describes itself as "a sports optimization medical clinic specializing in integrative medical and cutting-edge stem cell therapy."

"We can use it for all sorts of problems for patients who have issues, like with their joints," said Suzanne Kim, one of the clinic's doctors.

Other fitness recovery businesses tout compression therapy. At HM Sports Performance and Recovery in Santa Monica, customers slip into pairs of bulky NormaTec boots that extend all the way to the upper

thighs.

At \$45 for a 30-minute session (or \$350 for a package of 10), customers "recover faster between trainings and after performance by increasing blood flow and flushing metabolites from the workout out of the body," according to the company website.

Industry professionals say the fitness recovery fad stems from the rise in more intense workouts, especially in cities like L.A. The two are so closely linked that many recovery boutiques have opened up next door to fitness studios, and some cryotherapy businesses are now offering appointments on popular workout app ClassPass.

Dodson is an example. She has memberships at two gyms — Gold's and Equinox — because, as she puts it, "one gym just isn't enough." At the Marina del Rey home she shares with her restaurateur husband and her three young children, there's also a \$1,995 Peloton spin bike, with its \$39-per-month online classes.

So shelling out a few hundred dollars a month for whole-body cryotherapy "sounds expensive, but it absolutely isn't" when considering the benefits, she said.

But some of the unconventional therapies, while no doubt trendy among the bootcamp-spinning-yoga-kombucha crowd, have been heavily criticized by those who doubt the purported benefits and say providers are making misleading and potentially dangerous claims.

A consumer update by the Food and Drug Administration in 2016 deemed cryotherapy — now offered at boutiques in Santa Monica, Beverly Grove and Costa Mesa — "a 'cool' trend that lacks evidence, poses risks." It said despite claims that cryo helps treat conditions like Alzheimer's, fibromyalgia, migraines, rheumatoid arthritis, multiple sclerosis, stress, anxiety or chronic pain, "this so-called 'treatment' hasn't been proven to do any of these things."

Some studies suggest one can get as much localized benefit from a simple ice pack. But a study conducted by the France-based National Institute of Sport, Expertise and Performance focused mainly on sports injuries and found that whole body cryotherapy reduced inflammation and aches, and aided in faster muscle injury recovery.

Matt Sarbello, 41, owner of Coast Cryo, first tried cryotherapy in Texas, when he was working out so intensely to lose weight that he woke up barely able to move some mornings.

"I started doing cryo four or five times a week," Sarbello said. "I moved out here and I was like, 'How is there no cryotherapy available on the Westside?'" He went on to open Coast Cryo in late 2015.

Less controversial are stretch labs, where customers pay for one-on-one stretch sessions. They're designed to help gain more mobility and flexibility than one can get on his or her own.

Costa Mesa-based StretchLab, for example, charges \$35 for 25 minutes with a "flexologist" and \$65 for 50 minutes. Monthly rates range from \$119 to \$229 depending on the length of the sessions.

Business is booming. "We opened our first location in 2015 and we're already about to open our fourth," said Saul Janson, a co-owner of StretchLab, which operates boutiques in Venice, Santa Monica and the West Hollywood area.

Social media and Hollywood have also fueled the boutique fitness recovery fad.

Actress Mandy Moore, "Dancing with the Stars" Derek Hough and Mark Ballas, and athletes Floyd Mayweather and Shaquille O'Neal are just some of the celebrities who have touted the benefits of cryotherapy, posting photos on Instagram of them emerging from the chambers.

Two years ago, "Beverly Hills, 90210" actress Shannen Doherty shared a photo of herself lying in a

	<p>hyperbaric chamber as part of what she called an "outside of the box" treatment for cancer recommended by her surgeon.</p> <p>And Madonna once told a radio station about how she gave Justin Timberlake a B12 shot in the butt when they were working together "because we only had a certain amount of days in the studio" and she wanted his energy levels to be high.</p>

<b>HEADLINE</b>	<b>04/05 UK 'sin taxes' are working</b>
<b>SOURCE</b>	<a href="http://money.cnn.com/2018/04/05/news/economy/sin-tax-sugar-diesel-plastic-uk/index.html">http://money.cnn.com/2018/04/05/news/economy/sin-tax-sugar-diesel-plastic-uk/index.html</a>
<b>GIST</b>	<p>First it was plastic. Then diesel cars. Soda is next.</p> <p>The United Kingdom is on a mission to change people's behavior by slapping new taxes on products deemed harmful to health and the environment.</p> <p>The government has, in quick succession, introduced new or higher taxes on plastic bags, diesel cars and sugary soft drinks in an attempt to undermine their popularity.</p> <p>The moves have prompted some criticism. The Institute of Economic Affairs, a free market think tank, ranked the United Kingdom as the second worst country in the European Union for "nanny state oppression," after Finland.</p> <p>There are signs, however, that the taxes are producing exactly the results policymakers were hoping for:</p> <p><b>1. Plastic bags</b></p> <p>Customers at large UK retailers have been paying 5 pence (7 cents) for plastic shopping bags since 2015.</p> <p>The government wanted to reduce the number of bags used, while also cutting down on waste, litter and environmental degradation.</p> <p>In the year leading up to April 2017, top retailers gave out around 83%, or 6 billion, fewer bags as a result of the tax, according to government research. That translates to 25 bags per person instead of 140.</p> <p>The big payoff? A study published Thursday in the journal Science of the Total Environment showed a decline in the number of plastic bags found in coastal waters.</p> <p><b>2. Sugary soft drinks</b></p> <p>The United Kingdom will implement a new tax on sugary soft drinks on Friday.</p> <p>Drinks with total sugar content above 5 grams per 100 milliliters will be affected by the levy, with a higher rate for drinks with more than 8 grams.</p> <p>The new tax was announced in 2016 as part of an effort to reduce sugar consumption and childhood obesity -- and evidence shows it's already working.</p> <p>The government said Thursday that more than 50% of manufacturers have already cut the sugar content of their drinks.</p> <p><b>3. Diesel cars</b></p> <p>A higher tax on diesel vehicle purchases was introduced on April 1.</p>

	<p>The government said the measure was aimed at improving air quality by getting dirty cars off the road.</p> <p>The new levy is discouraging purchases. Plans to ban sales of new gasoline and diesel cars starting in 2040 and the Volkswagen diesel emissions scandal have also scared away buyers.</p> <p>UK diesel car sales slumped 37% over the previous year in March, according to the Society of Motor Manufacturers and Traders. Declines in January and February were in the 25% range.</p> <p>Analysts said the new tax has created confusion among buyers because some very clean models that would be exempt are not yet for sale.</p> <p>Colin Couchman, the director of global automotive sales forecasting at IHS Markit, said that many are buying gasoline cars or simply holding off their purchases because "clean" models remain very expensive.</p>

<b>HEADLINE</b>	<b>04/05 First theme park certified autism center</b>
<b>SOURCE</b>	<a href="https://www.cbsnews.com/news/sesame-place-becomes-worlds-first-theme-park-designated-as-a-certified-autism-center/">https://www.cbsnews.com/news/sesame-place-becomes-worlds-first-theme-park-designated-as-a-certified-autism-center/</a>
<b>GIST</b>	<p>Sesame Place -- Pennsylvania's "Sesame Street"-themed amusement park -- has just become the world's first amusement park designated as a certified autism center. The park announced the news on Facebook this Monday, in honor of Autism Awareness Day, writing: "It's our goal to provide every family with an enjoyable and memorable visit, and we are proud to offer specialized services to guests with autism and other special needs."</p> <p>The theme park partnered with The International Board of Credentialing and Continuing Education Standards (IBCCES) to ensure that all its staff members received autism sensitivity and awareness training in areas like sensory awareness, motor skills, program development, social skills, communication, environment and emotional awareness. All of its rides are now ranked on a special sensory guide from one to 10.</p> <p>Sesame Place offers a Ride Accessibility Program to help visitors determine which rides are an appropriate match. The goal is to maximize both enjoyment and safety for visitors with special needs. To enroll a child in the RAP program, parents simply have to fill out the Ride Accessibility Questionnaire on the amusement park's website. Once the form is validated, a personalized list of rides and attractions, tailored to the individual child's physical and mental attributes, will be provided.</p> <p>The park has also unveiled a number of new features for guests who may be suffering from sensory overstimulation throughout the day. There are two newly-renovated quiet rooms with adjustable lighting, where autistic children can take a break from all the sensory stimulation of the park. There are also two areas of the park now designated as "low sensory areas" for guests in need of some quiet time, who want to remain within the park while migrating to areas that may be a bit less populated. Noise-canceling headphones are also now available on a first come, first served basis for guests with auditory sensitivity.</p> <p>Guests who want to take in one of the park's signature parades, but wish to do so without direct character interaction such as "hugs" or "high fives," are encouraged to sit close to where the parade begins or several rows back from the parade viewing line. There are also now special instructions on the park's website for guests who would prefer to dine in quieter environments or who would like to book special "character dines" with limited character interaction or seating furthest away from the performances.</p> <p>Last but not least, parents can take their autistic children to meet Julia, the adorable "Sesame Street" character that debuted in 2017. Julia is the first muppet to be on the autism spectrum.</p>

<b>HEADLINE</b>	<b>04/05 Vermont: making tourists into residents</b>
<b>SOURCE</b>	<a href="https://www.bloomberg.com/news/articles/2018-04-05/this-weekend-aging-vermont-will-try-to-make-tourists-into-residents">https://www.bloomberg.com/news/articles/2018-04-05/this-weekend-aging-vermont-will-try-to-make-tourists-into-residents</a>
<b>GIST</b>	<p>It's not only the ski slopes that are white in Vermont. It's the hair on the heads of many state residents, whose median age, 42.6 in 2016, is the second-highest in the nation after Maine's. With young people moving away, the state's labor force is smaller than it was before the last recession, so labor shortages are serious. The unemployment rate in February was 2.8 percent, tied for fourth-lowest in the nation.</p> <p>To rejuvenate its population, Vermont is starting a Stay to Stay Weekend tourism program that combines sightseeing and other standard tourist stuff on Saturdays and Sundays with a networking reception on Friday nights and visits on Mondays to employers, chambers of commerce, real estate agents, and incubators and makerspaces. Governor Phil Scott announced the program last month. The first one is April 6-9.</p> <p>Other states have pitched tourists on becoming residents, but Vermont is the first to make a formal program out of it, says Wendy Knight, commissioner of the Department of Tourism and Marketing, who came up with the idea. "I got to thinking, visitors are an ideal captive audience," she says.</p> <p>The aim is not only to fill vacancies at local employers but to attract people who might want to start businesses or work remotely for employers in, say, New York or San Francisco. Lots of people dream about living in Vermont, with its postcard scenery and tranquility, Knight says. "We want to take down some of the barriers" that have prevented them from going ahead and doing so, she says.</p> <p>A dozen people are attending the first program, which Knight calls "a pilot of a pilot." One chamber representative told her that if not enough people show up to justify a networking reception, "maybe I'll take them out for a beer."</p> <p>The state's goal is to expand to about 1,000 visitors a year. The first participating cities are Bennington, Brattleboro, and Rutland, which are in southern Vermont and relatively accessible by car from population centers such as Albany, N.Y., Boston, Hartford, and New York City. She says other parts of Vermont are already expressing interest in getting in on the action.</p>

	Vermont isn't the only place that's getting creative to deal with labor shortages. Bloomberg Businessweek recently featured the efforts of three cities with ultralow unemployment rates: Ames, Iowa; Marietta, Ga.; and Portland, Maine.

<b>HEADLINE</b>	<b>04/05 Unclear cause CDC worker drowning</b>
<b>SOURCE</b>	<a href="http://abcnews.go.com/Health/wireStory/authorities-unclear-caused-cdc-worker-drown-54274754?cid=clicksource_26_2_hero_headlines_bsq_hed">http://abcnews.go.com/Health/wireStory/authorities-unclear-caused-cdc-worker-drown-54274754?cid=clicksource_26_2_hero_headlines_bsq_hed</a>
<b>GIST</b>	<p>Now that authorities have found the body of a Centers for Disease Control and Prevention employee who disappeared more than seven weeks ago, they will focus on piecing together his final moments.</p> <p>Timothy Cunningham's body was found by fishermen partially submerged in water and mud on the west bank of the Chattahoochee River in northwest Atlanta, fire-rescue department spokesman Sgt. Cortez Stafford said at a news conference Thursday.</p> <p>Stafford said rescue crews had to use boats and special equipment to reach Cunningham's body after it was first found Tuesday because it was in difficult terrain in a "remote area not easily accessible."</p> <p>Fulton County Chief Medical Examiner Jan Gorniak determined the cause of death as drowning, but said she couldn't provide additional information because she was still awaiting toxicology reports.</p> <p>"Since the investigation is ongoing, we do not have ... whether it was an accident, a suicide, or anything other than that" Cunningham drowned, Gorniak said.</p> <p>Gorniak said the decomposing body was positively identified using dental records.</p> <p>Fishermen first discovered Cunningham's body and called authorities, said Stafford, who noted that the body was found in an area authorities had searched in February without finding anything. The site where the body was found was not far from Cunningham's house, Maj. Michael O'Connor of the Atlanta Police Department's Major Crimes Section said. He did not elaborate.</p> <p>O'Connor said investigators were satisfied that they had spoken to everyone of importance in the case.</p>

<b>HEADLINE</b>	<b>04/06 Vietnam jails democracy advocates</b>
<b>SOURCE</b>	<a href="http://abcnews.go.com/International/wireStory/vietnam-harsh-jail-terms-activists-subversion-54273610?">http://abcnews.go.com/International/wireStory/vietnam-harsh-jail-terms-activists-subversion-54273610?</a>
<b>GIST</b>	<p>Six human rights activists were sentenced to harsh prison terms in Vietnam after being convicted of attempting to overthrow the government by advocating a multiparty democracy.</p> <p>Prominent human rights lawyer Nguyen Van Dai received the most severe penalty of 15 years in prison and five years of house arrest at the one-day trial Thursday, said his lawyer Nguyen Van Mieng. The others received sentences from seven to 12 years.</p> <p>They were charged with affiliating with a group called Brotherhood for Democracy, whose purpose was to change the leadership of the Communist Party and build a multiparty system.</p> <p>"The sentences are too harsh to the defendants," Mieng said. "They fought for human rights, they fought for the rights of multi-party system ... which are recognized achievements of mankind, but the court sees it as serious (threat) to the regime."</p>

	<p>Five of the defendants including Dai maintained they were innocent because what they did was right, Mieng said. One defendant confessed to the crime and got the most lenient sentence, he added.</p> <p>"The purpose of the group is to change the leadership of the Communist Party of Vietnam, build a multi-party system," the official Vietnam News Agency quoted the verdict as saying. "The defendants' act is not fight for democracy, but acts that aim at overthrowing the people's administration."</p> <p>"The defendants' act is especially serious because it directly impacts the survival of the people's administration," it said.</p>

<b>HEADLINE</b>	<b>04/05 Wisc. police: explosive lab, guns, ammo</b>
<b>SOURCE</b>	<a href="https://www.cbs58.com/news/white-supremacist-material-guns-ammunition-found-in-apartment-of-man-killed-in-beaver-dam-explosion">https://www.cbs58.com/news/white-supremacist-material-guns-ammunition-found-in-apartment-of-man-killed-in-beaver-dam-explosion</a>
<b>GIST</b>	<p>BEAVER DAM, Wis. (CBS 58) – Newly unsealed search warrants are detailing what investigators found inside the Beaver Dam apartment where police say they found bomb-making materials.</p> <p>On March 5, officials were called to an apartment complex on Knaup Drive for an explosion. Inside, they found 28-year-old Benjamin Morrow dead and volatile chemicals inside the apartment.</p> <p>Investigators call Morrow’s apartment a “homemade explosive laboratory and in addition to bomb-making equipment, they found literature about white supremacist groups in his bedroom.</p> <p>According to the court documents, Morrow was found dead in front of the stove, which was on, and investigators testified they believe he was making explosive at the time of the blast.</p> <p>Inside the apartment, investigators found a fridge full of homemade explosives along with other explosive chemicals, pipes, fuses, and chemistry equipment.</p> <p>They also found several guns and hundreds of rounds of ammunition along with a ballistics helmet and vest. Morrow also had white supremacist materials but police say they’re still investigating what role that played in Morrow’s apartment full of deadly devices.</p> <p>“It does cause me some concern but I want to make very clear just because Mr. Morrow was in the possession of this material, does not categorize in any particular light. He could have been an individual that was doing research,” said Lt. Terrence Gebhardt, Beaver Dam Lieutenant of Detectives.</p> <p>The FBI is reviewing those white supremacy documents. A spokesman for the FBI said they cannot comment on open investigations.</p> <p>Beaver Dam residents say it is scary learning what was inside Morrow’s apartment.</p> <p>Residents and police say they never thought something like this would happen in Beaver Dam. Detectives say the materials found in the apartment are relatively easy to get and it’s disturbing how easy it can be to make explosives. Officials also found instructions on how to make the bombs as well.</p> <p>“We would not expect anything like this in the city of Beaver Dam. In my 25-year career, I’ve never encountered anything of this magnitude. It causes concern and pause and reflecting on my career,” said Gebhardt.</p>

<b>HEADLINE</b>	<b>04/05 Belgium: Netherlands organized crime</b>
<b>SOURCE</b>	<a href="https://nltimes.nl/2018/04/05/belgium-blames-netherlands-organized-crime-violence-spikes">https://nltimes.nl/2018/04/05/belgium-blames-netherlands-organized-crime-violence-spikes</a>
<b>GIST</b>	<p>Increasing violence and drug trafficking in Antwerp has its roots in Netherlands organized crime, according to Antwerp mayor Bart de Wever. "The drug problems in terms of cocaine trafficking have moved from Rotterdam to Antwerp in recent years. Which means that the Netherlands owes a debt to the rest of Europe", he said to Nieuwsuur.</p> <p>"Due to the Dutch tolerance policy, organized crime has become deeply entrenched in the Netherlands. And now we share in that, with a port that is also very important for South America", De Wever said. The extreme violence of Dutch drug gangs - cocaine is known to be traded by the gangs involved in multiple assassinations in Amsterdam and Utrecht over the past years - has moved into Belgium, according to the mayor.</p> <p>Half of all cocaine seized in Europe arrives at the port of Antwerp. The Belgian city has thus become the main import port for cocaine in Europe. "Five years ago it was still 5 thousand kilos, last year 40 thousand kilos", De Wever said to Nieuwsuur. "And our efforts to search for drugs have not increased. The flow has really shifted from Rotterdam to Antwerp."</p> <p>The growing problems with organized crime in Antwerp led De Wever to declare a 'war on drugs'. "It has already yielded many results, such as reducing drug problems, thousands of arrests and closing dozens of drug buildings." In a second phase the Antwerp city government wants to start working more on tackling money flows from the drug environment, because according to De Wever, drug gangs are still gaining influence in his city. "Organized crime is in the Netherlands, but they are looking for accomplices here in Antwerp."</p>

<b>HEADLINE</b>	<b>04/05 London struggles to fight crime spike</b>
<b>SOURCE</b>	<a href="https://www.washingtontimes.com/news/2018/apr/5/london-struggles-to-fight-crime-spike-as-2018-murd/">https://www.washingtontimes.com/news/2018/apr/5/london-struggles-to-fight-crime-spike-as-2018-murd/</a>
<b>GIST</b>	<p>LONDON (AP) — Friends say Israel Ogunsola was a bubbly young man with a knack for making people laugh.</p> <p>This week the 18-year-old became London's 53rd murder victim of 2018. The British capital is being shaken by a spike in deadly violence, much of it involving young people with knives caught up in gang feuds.</p> <p>If the trend continues, London will far surpass the 130 murders it saw in 2017 and reach a number not seen since the early 2000s.</p> <p>Police and community workers say London's surge in violence is partly driven by battles over control of the illegal drug trade and a "postcode war" between street gangs.</p> <p>The crime wave has multiple causes, from cuts in police budgets to social media posts that can incite violence.</p>

<b>HEADLINE</b>	<b>04/05 Federal Way grocery store shooting</b>
<b>SOURCE</b>	<a href="http://www.thenewstribune.com/news/local/crime/article208098534.html">http://www.thenewstribune.com/news/local/crime/article208098534.html</a>
<b>GIST</b>	<p>A person was shot in the leg at a Federal Way grocery store Thursday afternoon, according to police.</p> <p>The shooting happened about 5 p.m. at the store in the 2100 block of Southwest 336th Street, police spokesman Kurt Schwan said.</p>

The 19-year-old man was conscious and speaking with police after they arrived, Schwan said. He was transported to Harborview Medical Center in Seattle with the non-life-threatening gunshot wound to his lower leg.

The man is believed to have been in a fight with another man in his late teens or early 20s before he was shot, Schwan said. The suspect fled the scene before police arrived.

<b>HEADLINE</b>	<b>04/06 New Zealand immigration data collection</b>
<b>SOURCE</b>	<a href="https://www.zdnet.com/article/nz-immigration-rejects-racial-profiling-claims-in-visa-data-modelling-project/">https://www.zdnet.com/article/nz-immigration-rejects-racial-profiling-claims-in-visa-data-modelling-project/</a>
<b>GIST</b>	<p>The New Zealand government kicked off a pilot program 18 months ago that uses data collected through the country's visa application process to determine firstly those in breach of their visa conditions before deciding who should be asked to leave.</p> <p>Speaking on Radio New Zealand this week, Immigration Minister Iain Lees-Galloway explained that the process seeks people that are "over-stayers" or are in the country unlawfully due to breaching visa conditions, rather than filtering people based on their age, gender, and ethnicity.</p> <p>"This is not about trying to predict who will commit a crime, this is about looking at the over 11,000 people who are in New Zealand unlawfully and prioritising where best to use Immigration New Zealand's resources to make sure that they are deporting the people who impose the greatest risk to New Zealand," the minister said.</p> <p>"We need to maintain the integrity of our immigration system and where people are in New Zealand unlawfully ... then we need to be doing everything we can to make sure these deportations go ahead."</p> <p>Rejecting the idea the data-collection project is racial profiling, Lees-Galloway said Immigration looks at a range of issues, including at those who have made -- and have had rejected -- multiple visa applications.</p> <p>"It looks at people who place the greatest burden on the health system, people who place the greatest burden on the criminal justice system, and uses that data to prioritise those people," he continued.</p> <p>"It is important that we protect the integrity of our immigration system and that we use the resources that immigration has as effectively as we can -- I do support them using good data to make good decisions about where best to deploy their resources."</p> <p>While the minister might support the department he oversees, he only became aware of the data-modelling project on Thursday morning when he received a briefing before his radio appearance.</p> <p>"I am disappointed that I was not informed," he added.</p> <p>"We do collect data -- obviously we do collect a lot of data when people make a visa application, there's nothing new about that, we also do have some data around people who are in New Zealand illegally who are making use of the health system and we do have some idea of who those people are and that's useful data to use when trying to determine which over-stayers Immigration New Zealand should use its resources to enforce those deportation liability notices on."</p>

**HEADLINE** 04/05 Turkey: gunman kills 4 at university

**SOURCE** <http://abcnews.go.com/International/wireStory/turkey-staff-members-killed-attack-university->

	<a href="#">54253122?</a>
<b>GIST</b>	<p>A research assistant shot and killed four staff members at a university in central Turkey, the university's president said Thursday.</p> <p>Prof. Hasan Gonen of Osmangazi University, in the city of Eskisehir, some 250 kilometers west of Ankara, told reporters that the gunman shot and killed a deputy dean, a secretary and two teaching staff at the university's faculty of education.</p> <p>The attacker, identified as Volkan Bayar, was apprehended by police as he left the scene, Gonen said.</p> <p>Gonen said the motive of the attack appeared to be a personal dispute. The attacker's main target appeared to be the university dean, who was not in his office when the gunman arrived, he added.</p> <p>He said the gunman, who was studying for a doctor's degree, had been under investigation at the university after he accused a number of staff members of being followers of U.S.-based cleric Fethullah Gulen, whom Turkey blames for a failed coup in 2016.</p>

<b>HEADLINE</b>	<b>04/05 Pot shops call for state's help</b>
<b>SOURCE</b>	<a href="https://www.kiro7.com/news/local/after-a-string-of-robberies-pot-shops-call-for-states-help/727885863">https://www.kiro7.com/news/local/after-a-string-of-robberies-pot-shops-call-for-states-help/727885863</a>
<b>GIST</b>	<p>Three pot stores were broken into within the last week in the Puget Sound area -- the latest, happened Thursday morning in Tacoma.</p> <p>Have a Heart's Greenwood location in Seattle got robbed again on Friday. Now, it's calling for lawmakers to do something. They want more help from the state to get out of being a cash-based business.</p> <p>Robbers go for both cash and marijuana products. Shops say there would be a simple way to get rid of half the incentive - if they had access to banks and shoppers could just use their credit cards.</p> <p>Right now, transactions with customers, paying vendors, and employees – it's all still cash for pot shops.</p> <p>"Would-be crooks and thieves view our shops and other shops as fish in a barrel," said Marcelo Ramirez of Have a Heart.</p> <p>Its Greenwood location was robbed Friday by three men who rammed their door down with a car and filled duffel bags full of products.</p> <p>An attempted robbery happened at the Highway 7 Recreational Marijuana Store Thursday morning, and there was a burglary at Port Orchard's Kitsap Cannabis Wednesday.</p> <p>"It is on the rise for sure," Ramirez said.</p> <p>Have a Heart says it has five locations in the Seattle area. But among three of their stores, they've been robbed more than 10 times.</p> <p>Their loss? About a quarter-million dollars. And with no liability insurance offered to the industry, the loss is all out of pocket.</p> <p>"It's kind of sad," Ramirez said. "If this happened to a liquor store, we wouldn't be having this conversation," he said.</p> <p>Pot stores say they have generated a lot of money for the state, but say they don't feel like they have the support of lawmakers.</p>

The state earned nearly \$315 million dollars from a 37 percent excise tax on pot product sales in 2017. Marijuana shops also pay the 10 percent sales tax that goes to both the state and county.

Have a Heart says it's contributing a great deal to Washington's economy and it's time for the state to step up.

Ramirez says all the cash is an unnecessary risk. He wants something like a state-run credit union, an option that California lawmakers are looking into.

"There needs to be some sort of netting that helps us maintain a level of safety," Ramirez said.

Lawmakers say they are trying.

State Senator Mark Mullet (D-WA District 5) chairs the Financial Institutions and Insurance Committee for the Senate.

"My goal is to figure out how every retail marijuana shop or processing shop or growing shop has access to banking services," Mullet said.

State legislators passed a bill last session that says Washington State won't go after any banks or credit unions for working with the legal cannabis industry. But he says with the Trump administration, taking that further is a challenge.

"Everything is really frustrating. It's not safe for our communities and it's not good for our tax base, and I don't see anybody wining from having this business be predominately cash," Mullet said.

The WA Liquor and Cannabis Board says its representatives just returned from a trip to D.C. to speak with congress about the many challenges of being a cash-based business. Mullet and the LCB say a big step toward making banking services available to pot shops would be getting marijuana reclassified, so it's no longer a "Schedule 1" drug – currently the same category as heroin.

KIRO7 also reached out to U.S. Rep. Denny Heck (D-WA 10th District) who is on the House Financial Services Committee.

His office says Heck has been working for the past three sessions to get a "Safe Banking Act" passed, where banks would be exempt for working with legal pot shops. His office is hopeful there will be another chance to get that passed in 2019, and bring another level of safety for stores in the marijuana business.

The Seattle Police Department says its responded to four robberies/burglaries in the city so far this year, and there does seem to be an uptick – but it also points out there are more pot shops entering the market.

<b>HEADLINE</b>	<b>04/06 London crime wave: 6 stabbings 90min.</b>
<b>SOURCE</b>	<a href="http://www.king5.com/article/news/nation-now/london-crime-wave-shock-as-six-teenagers-stabbed-in-90-minutes/465-8c974ef3-094a-43bd-83be-6f224bf7d177">http://www.king5.com/article/news/nation-now/london-crime-wave-shock-as-six-teenagers-stabbed-in-90-minutes/465-8c974ef3-094a-43bd-83be-6f224bf7d177</a>
<b>GIST</b>	<p>LONDON — Shocked residents of the British capital are calling for an end to a surge in violence that has now seen six teenagers stabbed in the space of 90 minutes.</p> <p>The incidents came days after London's murder rate surpassed New York City's for the first time. At least 55 people have been killed in London in 2018, over 30 of them in stabbings.</p> <p>Police in the Tower Hamlets borough of east London said Thursday that two 15-year-old boys were taken to the hospital with serious injuries after they were stabbed at about 6 p.m. local time Thursday. A 16-year-old who was treated for minor knife injuries was arrested for conspiracy to commit grievous bodily</p>

harm, and another male was arrested on suspicion of attempted murder, police said.

In a separate incident in the Newham borough of east London, police said three juveniles were arrested after a 13-year-old boy was stabbed. The victim is in serious but stable condition.

Elsewhere in the city, a teenager was taken to hospital when he was stabbed in Ealing Broadway, west London, and a 15-year-old boy was stabbed in Westferry, east London, but suffered no serious injury.

Also Thursday, a crowd gathered to commemorate stabbing victims at a train station in the east London area of Hackney, near the scene of the fatal stabbing Wednesday of Israel Oguniola, 18.

Local youth worker Janette Collins, 58, told the London Evening Standard: "We need to stop this. Everybody keeps asking the same question, but the answers are in the young people. We the organisations are only trying to come out, to come together, and we are here to talk to young people and try to stop the violence."

David Lammy, the opposition Labour Party's member of Parliament for the Tottenham area of north London, accused Prime Minister Theresa May and Home Secretary Amber Rudd, both of the ruling Conservative Party, of failing to act on the rising murder rate. He said four young people have been killed in his area since Christmas.

The number of police officers in England and Wales has fallen by 21,500 as part of a government drive to cut spending since May became home secretary in 2010. May became prime minister in 2016.

<b>HEADLINE</b>	<b>04/05 Gang violence rattles Burien</b>
<b>SOURCE</b>	<a href="http://www.king5.com/article/news/local/gang-violence-rattles-burien-residents-ask-for-help/281-535797219">http://www.king5.com/article/news/local/gang-violence-rattles-burien-residents-ask-for-help/281-535797219</a>
<b>GIST</b>	<p>The shooting deaths of two teenagers more than a week ago has Burien residents looking for help and answers from King County leaders and sheriff's deputies.</p> <p>Eveona Cortez, 19, and a 13-year-old girl were murdered in the 13700 block of Ambaum Boulevard SW on Wednesday, March 28. No arrests have been made yet.</p> <p>According to the King County Sheriff's Office, the shooting appears to be gang-related and that rattles people who live and work here, especially because the victims are so young.</p> <p>Dee Thoman works steps away from where the shooting happened. Now a memorial marks the spot, and serves as a daily reminder for her.</p> <p>"I just couldn't believe it when I heard it, that they were so young. That is just not right," said Thoman.</p> <p>Liz Giba with the North Highline Unincorporated Area Council, included the topic of gang violence and the impact on youth in the group's monthly meeting on Thursday night.</p> <p>"It very much brought it home because that is something we have been trying to tell our elected officials for years," said Giba.</p> <p>Giba says the neighborhoods in Burien and White Center need more attention from County leaders. She claims part of the problem is fair housing laws are not enforced, and kids are raised in unhealthy neighborhoods.</p> <p>"I think there is a concentration of poverty in those neighborhoods that do not have opportunities for their young people," said Giba.</p>

	In response to the teens' deaths, the City of Burien is inviting the community to a town hall discussion on Monday night. The focus will be on how to engage youth and prevent future violence.

<b>HEADLINE</b>	<b>04/05 Bellingham cop charged w/abuse</b>
<b>SOURCE</b>	<a href="http://q13fox.com/2018/04/05/bellingham-cop-charged-with-repeatedly-abusing-woman-since-late-2016/">http://q13fox.com/2018/04/05/bellingham-cop-charged-with-repeatedly-abusing-woman-since-late-2016/</a>
<b>GIST</b>	<p>BELLINGHAM, Wash. (AP) — A Bellingham police officer is facing a total of 16 charges related to the alleged repeated abuse of a woman.</p> <p>The Bellingham Herald reports 33-year-old Brooks Laughlin of Everson was arrested March 27. Additional charges were filed Wednesday in Whatcom County Superior Court.</p> <p>Charging documents say Laughlin is charged with multiple counts of assault, tampering with a witness, harassment, violating a no-contact order, one count of stalking and one count of criminal trespass.</p> <p>Documents say Laughlin has been abusing the woman, who is known to him, since September 2016. Documents say he became increasingly physically aggressive toward the woman and beat her in the head, face and body.</p> <p>He's currently in Skagit County Jail on \$200,000 bail.</p> <p>Laughlin has been with the police department for 13 years.</p>

<b>HEADLINE</b>	<b>04/05 Arrest in Calif. store explosive device</b>
<b>SOURCE</b>	<a href="http://www.foxnews.com/us/2018/04/05/explosive-device-detonates-in-california-sams-club-suspect-in-custody.html">http://www.foxnews.com/us/2018/04/05/explosive-device-detonates-in-california-sams-club-suspect-in-custody.html</a>
<b>GIST</b>	<p>Authorities in California have a suspect in custody after an explosive device detonated inside of a Sam's Club in California on Thursday afternoon.</p> <p>Hugo Gonzalez, 49, of Fontana, was identified as the man suspected of detonating the device, the Ontario Police Department tweeted, noting it's believed he acted alone and a motive remains unclear.</p> <p>Law enforcement was dispatched to the Sam's Club store in Ontario after it was reported around 2 p.m. that someone heard a "popping sound," KABC reported.</p> <p>"Responded to a possible fire structure at [Sam's Club]," the Ontario Police Department tweeted earlier Thursday. "It has been determined the suspect detonated a small explosive device in the store."</p> <p>A follow-up tweet stated, "There appears to be no structural damage or any injuries at this point," and noted that "All employees and customers are accounted for."</p> <p>Miles from the store, Gonzalez was pulled over and detained, police said. Within his car, investigators found "[additional] materials" that were "similar to those used in the devices" found inside Sam's Club.</p> <p>Police are now investigating an apartment in Fontana, "which is believed to be associated w/Gonzalez."</p>

HEADLINE	<b>04/06 Ex-SKorea leader gets 24yr prison term</b>
SOURCE	<a href="http://abcnews.go.com/International/wireStory/south-korean-leader-park-due-corruption-verdict-54273612?">http://abcnews.go.com/International/wireStory/south-korean-leader-park-due-corruption-verdict-54273612?</a>
GIST	<p>Former South Korean President Park Geun-hye was formally convicted and sentenced to 24 years in prison on Friday, a year after she was driven from office and arrested over a corruption scandal that saw months of massive street rallies calling for her ouster.</p> <p>The conviction, which she can appeal, is the latest hit in a dramatic fall for South Korea's first female president. Once seen as the darling of South Korean conservatives, she was dubbed "Queen of Elections" by local media for her track record of leading her party to victory in tight races and still has a small group of fierce supporters who regularly stage rallies calling for her release.</p> <p>Park maintains she's a victim of "political revenge" and has been refusing to attend court sessions since October. She didn't attend Friday's verdict, citing a sickness that wasn't specified publicly.</p> <p>In a nationally televised verdict, the Seoul Central District Court convicted Park of bribery, extortion, abuse of power and other charges. "It's inevitable that the defendant should be held strictly responsible for her crimes, if only to prevent the unfortunate event of (a president) abusing the power given by the people and causing chaos in state affairs," chief judge Kim Se-yun said.</p> <p>Along with the prison sentence, Park was also fined 18 billion won (\$16.8 million), Kim said.</p> <p>Both Park and the prosecutors have one week to appeal. Park has previously maintained her innocence; prosecutors in February demanded a 30-year prison term.</p>

HEADLINE	04/05 Some in caravan won't stop in Mexico
SOURCE	<a href="https://www.cnn.com/2018/04/05/americas/caravan-mexico-migrants/index.html">https://www.cnn.com/2018/04/05/americas/caravan-mexico-migrants/index.html</a>
GIST	<p>Puebla, Mexico (CNN)The caravan of Central American migrants going through Mexico to the US border isn't ending. Instead, its participants will disperse into smaller groups after reaching Mexico City.</p> <p>While some will stay in Mexico to try to get refugee status there, others will continue north to the US border.</p> <p>Organizers of the caravan estimate that some 200 or so people will proceed all the way to the US border in the coming days, although the number could be higher. Last year, about 150 went all the way to the border, they said.</p> <p>Pueblo Sin Fronteras caravan or People Without Borders has organized the event for years. The caravan has always dispersed into separate, smaller groups at some point along the journey. What has been striking is that this year's event has the largest number of people ever, with more than 1,100.</p> <p>Poverty, violence and political unrest in their home countries forced them to make the journey, migrants say. Many are from Honduras, where organized crime fuels widespread violence and protesters recently took to the streets after a contested election.</p> <p>Those who seek a new life in the US often present themselves at ports of entry and are taken into custody. While they rarely succeed in winning asylum, their cases can take years to make their way through the backlogged system.</p>

HEADLINE	04/04 FEMA 'blunt' new message to public
SOURCE	<a href="https://federalnewsradio.com/management/2018/04/fema-has-a-blunt-new-message-it-wont-be-there-for-every-future-disaster/">https://federalnewsradio.com/management/2018/04/fema-has-a-blunt-new-message-it-wont-be-there-for-every-future-disaster/</a>
GIST	<p>Last year's severe hurricanes and wildfires were devastating and historic, but they did prompt some good at the Federal Emergency Management Agency.</p> <p>FEMA took advantage of a dire situation and piloted in the field in Texas, Florida, the U.S. Virgin Islands and Puerto Rico several new innovative ways to streamline its work — and change its strategic plan for the next four years.</p> <p>"FEMA is not a first responder," Daniel Kaniewski, the agency's deputy administrator, said in a speech Wednesday at George Washington University's Center for Cyber and Homeland Security. "We are going</p>

to be very blunt with the American public about what FEMA can and can't do, about what the federal government can and can't do, and I hope state and local governments take this forward as well.”

FEMA, can't, for example, manage and lead emergency response efforts for every single disaster.

“FEMA will continue to fund the recovery for smaller disasters, but increasingly, we will be looking for state and local governments to manage those programs,” Kaniewski said. “I will assert, maybe that's a high goal. It depends on what state or what community you're talking about — whether or not they can step up and manage those programs.”

To that end, FEMA wants to help states reach a point where they can successfully take on some of this work on their own. It wants to foster a “culture of preparedness” and spread those messages as part of a new national campaign, Kaniewski said.

FEMA is hosting disaster planning seminars for its other federal partners, Kaniewski said. The Health and Human Services and Transportation Departments lent a hand in Texas, Florida and Puerto Rico.

The Surge Capacity Force, which the Homeland Security Department originally piloted and expanded to other cabinet-level agencies, is one example. DHS last fall sourced employees from 15 other agencies to help with translating or registering disaster survivors for assistance.

“Thank you to the federal workforce who stepped up to the plate and volunteered for that mission,” said Kaniewski, who described his experience meeting a NASA employee who spoke with confidence about his disaster relief work in Puerto Rico.

It's also speaking about current disaster assistance programs in a new way. They're “federally supported, state managed and locally executed recovery programs,” Kaniewski said.

The agency instead wants to focus its attention and resources on the truly catastrophic events — like Hurricanes Harvey and Maria. When Harvey hit in Texas last August, FEMA already had personnel deployed in 32 other disasters across the country.

Simplifying FEMA's recovery programs is another strategic goal for the agency.

<b>HEADLINE</b>	<b>04/04 W. Va. fusion center marks 10yr. service</b>
<b>SOURCE</b>	<a href="http://www.fayetttribune.com/news/w-va-intelligence-fusion-center-honored-for-th-anniversary/article_c33a5c76-36aa-11e8-9a50-2be359041c5b.html">http://www.fayetttribune.com/news/w-va-intelligence-fusion-center-honored-for-th-anniversary/article_c33a5c76-36aa-11e8-9a50-2be359041c5b.html</a>
<b>GIST</b>	<p>CHARLESTON — It helps police locate killers and unmask multi-state crime rings.</p> <p>It thwarts human traffickers and aids keeping crowds safe at Bridge Day, the National Scout jamboree and other events.</p> <p>And on March 17, the W.Va. Intelligence Fusion Center marked its first decade of service.</p> <p>Governor Jim Justice has honored the Fusion Center for its 10th anniversary with a proclamation, presented March 16 to Director Jessica Griffith by Deputy Chief of Staff Ann Urling.</p> <p>The Fusion Center was formed on March 17, 2008 to apply a bitter lesson from Sept. 11. As a result, an array of local, state and federal law enforcement and public safety agencies as well as private sector partners now share information, resources and expertise. This approach harnesses their respective strengths to prevent, detect, investigate and respond to all hazards — including but not limited to terrorist and criminal activity.</p>

Also taking part in the ceremony at the Governor’s Mansion were U.S. Sen. Joe Manchin, who was governor when the Fusion Center began, and Secretary of State Mac Warner, who has enlisted the center in his mission to defend digital democracy.

“The West Virginia Intelligence Fusion Center is extremely proud of the dedicated service by its men and women both past and present,” Governor Justice wrote. “During the past decade, the Fusion Center has been nationally recognized countless times for its accomplishments.”

Governor Justice also signed an Executive Order last month declaring, for the first time, the Fusion Center to be a criminal justice entity — a critical designation under federal law that enhances its capabilities.

The analysts and specialists who staff the Fusion Center routinely provide effective, behind-the-scenes assistance both in the Mountain State and across the country. The center’s numerous successes including locating the killers of a North Carolina couple as they drove through West Virginia, and a Putnam County homicide suspect after he had fled to a Boston suburb; linking a bogus check to a multi-state fraud ring targeting casinos; and educating everyone from law enforcement to hairdressers on how to spot would-be human traffickers and their victims.

Recent achievements include helping law enforcement identify more than 70 persons of interest and multiple drug trafficking operatives to aid the fight against the opioid crisis and resulting crime in Huntington.

The Fusion Center’s well-honed skill sets and high-tech tools play similarly critical roles in preventing or avoiding hazards. It helps conduct pre-event threat and security assessments and then provides on-site support for all manner of gatherings, from the Greenbrier Classic and this winter’s congressional retreat at the resort to Bridge Day and the jamborees hosted at the Summit Bechtel Reserve.

Much of this assistance occurs below-the-radar and without fanfare. But the Fusion Center’s contributions to public safety and homeland security have still been recognized by numerous organizations and partners, including the U.S. attorneys for both of West Virginia’s federal court districts and the International Association of Special Investigation Units.

Director Griffith, a veteran analyst for the office, became just the second person to earn that title last month. She succeeded Thom Kirk, whose hiring in 2008 marked the center’s creation. Kirk was also honored at Friday’s ceremony, and remains Deputy Secretary and General Counsel of the W.Va. Department of Military Affairs and Public Safety. The Fusion Center is part of WV DMAPS.

“During its 10-year history, the Fusion Center has accomplished so much behind the scenes,” said DMAPS Secretary Jeff Sandy. “The Fusion Center concept is simple in its purpose of protecting Americans from domestic and international threats to our way of life, but complex in its methods to achieve those goals. The citizens of West Virginia owe it a world of thanks.”

<b>HEADLINE</b>	<b>04/04 For Puerto Rico hurricane season looms</b>
<b>SOURCE</b>	<a href="https://www.washingtonpost.com/national/in-puerto-ricos-last-mile-power-is-still-elusive-as-next-hurricane-season-looms/2018/04/04/00dc0cb4-1e69-11e8-b2d9-08e748f892c0_story.html?utm_term=.8511e9bbac35">https://www.washingtonpost.com/national/in-puerto-ricos-last-mile-power-is-still-elusive-as-next-hurricane-season-looms/2018/04/04/00dc0cb4-1e69-11e8-b2d9-08e748f892c0_story.html?utm_term=.8511e9bbac35</a>
<b>GIST</b>	<p>CAYEY, Puerto Rico — Norma Ramos and Helga Marrero stood outside, chatting, as a Thursday afternoon dusk diluted the last bits of blue sky and sunshine in La Merced.</p> <p>Nearly every cement-block house along their meandering mountain road flickered to life as indoor lighting flashed on. A girl ran through the barrio and yelled, “Luz!” Power had returned. But the electrification only went as far as the bakery on the corner, where the linemen piled into bucket trucks and called it a day.</p>

For Ramos and Marrero, one more long-suffering day. Who knew how much longer it would be until they, too, could rejoice at flipping a switch?

“Sunday,” Ramos said, reaching for a flashlight. “They promised we’d have electricity by Sunday. I guess I can wait. I’ve waited this long.”

The neighbors belong to a community along Puerto Rico’s “last mile,” the cluster of communities marking Hurricane Maria’s destructive path across difficult and isolated terrain, from the island’s southeast corner through the central mountains and out the northwest coast. They are among the last people on the island still without power, more than six months after the storm.

The hurricane knocked down the frail power grid that distributes wattage from generation plants in the south across transmission towers spread like dominoes along the peaks of the island’s mountains. The local public utility, which struggled to maintain normalcy in good times, has been trying alongside the U.S. Army Corps of Engineers to restore electrical service since September.

It has been a wearisome operation tainted by allegations of corruption and coordination, meltdowns, and the cacophony of politics, experts say. Many residents report that having been without power for so long has led them to lose faith in the state-owned power company and, ultimately, the island’s government.

“There has been no sense of urgency,” said Josian Santiago, the mayor of Comerio, whose town still has outages in its more isolated sections; some might never have their municipal power restored and will have to resort to alternatives. “The problem is not that we don’t have a lightbulb to turn on or a refrigerator to cool. . . . They are torturing the people.”

Left out of those statistics: More than 1,200 FEMA-provided generators are still the primary source of power for most of the island’s hospitals, more than two dozen police and fire stations, correctional facilities, and water pumps throughout Puerto Rico.

For every electric meter that fires back to life, there also is the fear — inevitable, at this point — that it will go dead again because of a substation fire, a transformer explosion or a snapped line. In mid-February, an explosion at a power plant plunged nearly 1 million people into darkness around San Juan, and rolling blackouts are common.

And another hurricane season looms just months away.

Crews are working against the clock to shore up a dilapidated system that took way longer to repair than anyone expected, and their work is largely returning the grid to its prior state, which everyone knows couldn’t handle a big storm.

“It’s going to fall again,” said Aníbal Díaz Collazo, a Puerto Rican politician representing Cayey, in the central mountains about 30 miles south of San Juan. “There will be new cables and new poles but no significant infrastructure improvements for a system that has already proven too weak to withstand.”

PREPA’s chief of technical operations, Carlos Alvarado, said the utility is working to improve construction standards and is making changes that will help the power grid be more resilient. It could take a decade to completely harden the system, he said.

“The way the authority’s system was designed does not make it apt to withstand another Category 5 storm,” Alvarado said. “But we are studying how we can improve it. We have been mitigating by installing metal poles, higher-quality cables and relocating certain lines and cutting down vegetation.”

For many Puerto Ricans and their political leaders, the haphazard nature of the repairs has been puzzling at times and infuriating at others. They have demanded answers about the plan for power restoration and have been told they will have better information soon. PREPA just recently started giving mayors maps and timelines of its work schedule.

Federal officials asked the Army Corps of Engineers in late September to lead a temporary power-restoration mission — a job it previously had never done — and took control over contracting companies and ordering materials for work with which they had little experience.

In the early days of the island-wide blackout, PREPA did not activate the mutual-aid agreements that would have brought equipment and thousands of public-utility workers from the mainland United States onto the island quickly to begin the work. Instead, it sought help from a private contractor, Whitefish Energy, which promised to act quickly and efficiently, even if its going hourly rates were much higher than what linemen would normally receive.

The bulk of the workers from outside Puerto Rico did not start on the job until November — two months after the storm — according to contracting documents obtained by The Washington Post. Whitefish, a small Montana firm with little documented experience, was awarded a \$300 million contract that drew scrutiny in part because of its size. The no-bid contract was canceled, and PREPA's executive director was removed.

To Puerto Ricans, it looked like chaos, a confusing hodgepodge of work that resulted in one neighborhood street getting its power back while the next block, a few hundred yards away, remained dark.

PREPA was officially in charge of setting the priorities for restoration. A unified command met in San Juan with Carlos Torres, the governor's appointee to coordinate the mission, along with the Energy Department, engineering corps leaders and FEMA, which worked to assign specific lines to each crew. But power struggles, finger-pointing and a lack of trust hampered the pace and direction of the operation.

"Yes, it can be messy, and yes, partners can have arguments about a problem, but you needed this complement of forces," said Col. Jason A. Kirk, who is leading the corps in Puerto Rico. He then cited Gen. Dwight D. Eisenhower: "Coalitions are not the most efficient, but in the long term it is the most effective."

Contractors and industry experts observing the power mission in Puerto Rico said in interviews that it was unclear who was in charge, leading to confusion and citizen reports of crews waiting around for assessments or for a line to be de-energized, or for tools to show up.

Mayors grew increasingly frustrated as they saw protests develop in their communities, and they had no information to help ease tensions. Municipal leaders stormed out of a meeting with PREPA and government officials in late February when they didn't receive the detailed plan of action they were seeking.

Examples of the chaos were abundant. Jesús Colón Berlingeri, the mayor of Orocovis, said he once learned from PREPA's Twitter account that the public utility was sending four brigades to his town. When the mayor called the power company's main office to find out where they were, he was told the real presence in town was just a driver and one worker, but they were nowhere to be found.

"We are the ones who have to answer to the people," said Colón, whose criticism earned him a rebuke by text message from Gov. Ricardo Rosselló. "We don't believe them."

The governor has been critical of the corps from the start. As his administration was pummeled by the Whitefish scandal and calls from Congress to investigate other PREPA contracts, Rosselló lashed out. Echoed by members of his administration, he accused the corps of moving too slowly.

"I don't see the urgency," Rosselló said during a news conference on Feb. 28 following a meeting with island mayors, the corps and PREPA. "Today was the day the Army Corps of Engineers was supposed to give account for the work they've done. It was also supposed to be an opportunity for the mayors to express their concerns. I share those concerns and join in their demands for urgency so that the necessary materials and brigades can be assigned to restore the power grid."

Alvarado, PREPA's chief of technical operations, said the utility has improved its communication procedures, and days after Colón's comments, top officials met privately with community leaders to lay out when crews would be there. The corps is now providing mayors with maps of the house-level plans for line work.

"Let's see what happens," Colón said as he emerged from the meeting.

Out in the field, line workers needed conductors, wiring and concrete poles, but they were difficult to come by on the island. Many pieces, including customized transformers, had to be shipped in by barge from U.S. factories.

The Army corps took control of ordering the estimated 35 million pieces of material to avoid competition and duplication. Officials relied on PREPA and contractors to tell them what was needed, and the corps submitted orders through the Defense Department.

But a supply crunch among mainland manufacturers left crews in Puerto Rico waiting for weeks for barges to arrive with new wires, poles and custom parts.

The governor and his surrogates publicly blamed the corps for delays and material shortages that kept brigades from repairs. Contractors had to buy electrical tape from local hardware stores, cables strewn across the ground were recycled on the fly, and workers pieced together transformers with parts salvaged from broken ones.

Amid the shortage, the corps confiscated previously undisclosed equipment sitting in a PREPA warehouse, causing some locals to call it a raid. The utility declined to explain the unused materials, noting that a Puerto Rico Department of Justice investigation found no violations of law on the part of the public utility regarding its storage of materials.

The corps' largest contractor, Fluor, is leaving the island while restoration efforts are still incomplete. People close to the Puerto Rican government and involved in power restoration on the island said Fluor's exit is tied to slow performance. Lines given to Fluor's contractors in the east and southeast of the island have been reassigned.

"There were expectations created that have not been completely fulfilled," Alvarado said about the corps and its contractors.

The Texas-based global contractor said the scarcity of needed materials was a "limiting factor" but noted that Fluor restored power to more than 232,000 customers since October. Demobilization is a "normal part of the life cycle" when reaching the end of a government contract, the company said in a statement.

Puerto Rico's geography made the restoration work daunting, contractors said. Road access to transmission towers often was nonexistent, overgrown with trees, or too narrow or rocky to support large work trucks. Workers were unaccustomed to the terrain, weather and topographical diversity.

"If we were working an ice storm in New England, we expect a certain type of terrain," said Aaron Strickland, an executive with another corps contractor, PowerSecure. "In Texas and Florida, you're in flat land. But in Puerto Rico, you had flat lands, mountains, hills, swamps and everything in between."

He noted one accident as emblematic of the issue: While contractors were working on power restoration, a road caved in, sending their truck down a steep embankment. While there were no injuries, the linemen were shaken — and knew they faced similar conditions elsewhere in the mountains.

"It pushes our limits just about every way you can look at pushing worker limits," Strickland said.

The conditions of PREPA's electrical grid before the storm hit magnified the difficulty afterward, said

FEMA deputy regional administrator Ahsha Tribble. It was clear from the outset that to fix Puerto Rico's long-term energy problems, simply restoring what existed before the storm would not be good enough.

But the engineering corps and FEMA have little wiggle room within federal regulations — specifically the Stafford Act, which directs federal agencies to restore what existed to its pre-disaster condition — to harden PREPA's entire system to be more resilient. When possible, authorities have used steel or concrete poles to replace wooden ones. Lines that hadn't been serviced in years were reinforced. New towers in some cases replaced those brittle from decades of rust.

The restoration will not modernize the technology into a smart-grid system that could allow authorities to more easily monitor and distribute power, nor will it create microgrids that could power regions individually if one part of the system fails. PREPA's power grid uses few renewable energy sources, and outdated power plant machinery will not see design enhancements.

"I want to get Puerto Rico to the point where it says, 'Bring it on!' to future storms," FEMA's federal coordinating officer, Michael Byrne, told contractors in late February.

PREPA, which is bankrupt, had fallen behind in modernizing its grid, especially in terms of infrastructure. The system's reliance on fossil fuels and an outdated design gave Puerto Rico's system a reputation for poor efficiency, low reliability and high costs, according to Lisa Donahue, who was hired to restructure PREPA between 2014 and 2017 and testified about the issue before Congress.

Tribble said FEMA is working with a commission of industry experts and engineers to redesign the electrical grid from a 1950s centralized distribution system to one that includes regional microgrids and renewable energies. Changes to the law after Hurricane Sandy gave the agency some flexibility to fund projects that build more resilient infrastructure rather than just replace what was damaged.

But those funds are part of a fairly new program through the Department of Housing and Urban Development that are tied to fixed-cost estimates for each project; if costs are any higher than the estimates developed by the federal government, the jurisdiction must foot the bill — something Puerto Rico cannot afford.

In an effort to move forward, Rosselló is selling off some of PREPA's assets and is privatizing parts of its operation. It is a plan demonized by the governor's critics and union members who say there is no guarantee that a private company will run the system more efficiently. They also fear that customer rates would increase and that transparency would worsen. The governor's allies see PREPA as an outdated monopoly and bloated bureaucracy that offers poor service and is plagued by corruption; they view privatization as the best solution.

PREPA has a new executive director, industry veteran Walter Higgins, who came out of retirement after running a power company in Bermuda.

"We have a real opportunity here, not just to restore power but to eventually deliver lower-cost, reliable power for all the citizens of Puerto Rico," Higgins said in a statement.

There are still vast stretches of the island where there are no signs of improvement and the desperation is palpable.

During his daily radio program, host Luis Francisco Ojeda takes call after call from sobbing and angry residents reporting which barrios still have outages despite public pronouncements from PREPA that power has been restored.

"I don't know where they got 10 percent?" said Carlos Collazo, a resident of Yabucoa who regularly listens to Ojeda's show. "People from all over still don't have power. I'm an accountant, and I don't understand how they do their numbers."

	In Collazo's community, the water pumps are powered by generators the mayor bought from a local businessman. A main road has power, but the surrounding neighborhoods don't. Residents have protested by candlelight.

<b>HEADLINE</b>	<b>04/05 What's behind US-China trade fight?</b>
<b>SOURCE</b>	<a href="https://apnews.com/abb3a62ad3e84209b5a9a67baf5e2297/AP-News-Guide:-What's-behind-the-US-China-trade-fight">https://apnews.com/abb3a62ad3e84209b5a9a67baf5e2297/AP-News-Guide:-What's-behind-the-US-China-trade-fight</a>
<b>GIST</b>	<p>WASHINGTON (AP) — The United States and China, the world's two largest economies, have roiled financial markets and fueled fears of a protracted trade war by threatening tariffs this week on each other's goods.</p> <p>The United States on Tuesday said it would impose 25 percent duties on \$50 billion of imports from China, and China quickly retaliated by listing \$50 billion of products that it could hit with its own 25 percent tariffs. Earlier in the week, Beijing announced separate import duties on \$3 billion of U.S. goods in response to the Trump administration's duties on all steel and aluminum imports, including from China.</p> <p>U.S. officials sought to downplay the threat of a broader trade dispute, saying a negotiated outcome is still possible. Even so, economists warned that the tit-for-tat moves bear the hallmarks of a classic trade rift that could escalate.</p> <p>"The seeds of a more serious conflict are there," said Adam Slater, lead economist at Oxford Economics, a consulting firm.</p> <p>Some of the largest American brands, from Apple to Boeing to Kentucky Fried Chicken, are increasingly intertwined with the Chinese market. They either sell billions of dollars of goods there or make some of their products in China, or both.</p> <p>So h did we get here, and what might the impact be?:</p> <p>—</p> <p><b>WHY DID THIS DISPUTE BLOW UP?</b></p> <p>President Donald Trump says Beijing is violating its free-trade commitments by pressuring foreign companies to hand over technology to potential Chinese competitors in exchange for market access.</p> <p>A U.S. trade official said Wednesday that the administration was moved by concerns that China is increasing its use of unfair trade practices, expanding them from industries such as steel to high-tech industries where U.S. companies dominate.</p> <p>A key irritant is Beijing's long-range industry plan, dubbed "Made in China 2025." It calls for establishing Chinese global leadership in electric cars, robotics and other fields. Foreign companies complain that the initiative will limit or outright block their access to those industries.</p> <p>Trump has also pledged to narrow the U.S. trade deficit with China, which Washington estimated at \$337.2 billion last year, a record for any country.</p> <p>—</p> <p><b>WILL U.S. CONSUMERS END UP PAYING MORE?</b></p> <p>Not yet. The United States plans to impose tariffs on mostly machinery and high-tech goods typically purchased by businesses. The duties would mostly steer clear of the billions of dollars of consumer goods that the U.S. imports from China, such as iPhones, toys, and shoes. Only about one-tenth of China's goods exports to the United States would be affected.</p>

Still, economists say many companies might try to pass their extra costs from the tariffs onto consumers. Prices would rise, though likely only slightly. Kathy Bostjancic, an economist at Oxford Economics, estimates they could raise inflation by just one-tenth of a percentage point.

—

#### WILL THE DISPUTE HURT U.S. ECONOMY?

The steps taken so far shouldn't have much of an impact. Only about 2.5 percent of all U.S. imports are affected by the tariffs. And imports from all countries amount to just 15 percent of the economy.

Mark Zandi, chief economist at Moody's Analytics, estimates that the tariffs threatened so far could slice U.S. growth by just one or two-tenths of a percentage point this year.

"So far, at least, this is relatively minor," he said. "It's going to take a lot to derail this economy."

Still, specific industries would feel some pain if threats of higher tariffs are carried out. China is the top overseas market for U.S. soybeans. And China has included soybeans on its list of 106 products that would be hit by retaliatory tariffs.

Automakers such as Tesla, BMW and Mercedes-Benz would also be hit. BMW exports 89,000 cars a year from the U.S. to China, while Mercedes-Benz sends 65,000 cars, according to analysts at Sanford C. Bernstein. Tesla expects to sell about 15 percent of its Model S and Model X cars in China this year.

—

#### WHAT WILL LIKELY HAPPEN NEXT?

So far, no tariffs have actually been imposed. And some U.S. officials say they're at least partly intended as a negotiating ploy. U.S. officials say they'll hold hearings on the administration's proposed target list of 1,300 products in mid-May and haven't set a deadline for when the tariffs would take effect.

Nor has China set a date for imposing tariffs on the 106 products it has targeted.

"It will be a couple months before tariffs on either side would go into effect and be implemented, and we're hopeful that China will do the right thing," White House press secretary Sarah Huckabee Sanders said.

<b>HEADLINE</b>	<b>04/05 Koreas begin preparatory talks for summit</b>
<b>SOURCE</b>	<a href="https://apnews.com/eadba8403f194b058ad20a13685437bc/Koreas-begin-preparatory-talks-to-set-up-Kim-Moon-summit">https://apnews.com/eadba8403f194b058ad20a13685437bc/Koreas-begin-preparatory-talks-to-set-up-Kim-Moon-summit</a>
<b>GIST</b>	<p>SEOUL, South Korea (AP) — The rival Koreas on Thursday began preparatory talks to set up a summit later this month between North Korean leader Kim Jong Un and South Korean President Moon Jae-in amid a global diplomatic push to resolve tensions over the North's nuclear program.</p> <p>The meeting of working-level officials at the border village of Panmunjom was to discuss security, protocol and media coverage issues for the April 27 summit.</p> <p>The Koreas after a high-level meeting last week agreed on the date of the summit. South Korean officials have said the summit will be focused on disarming North Korea of nuclear weapons, although the North hasn't officially confirmed this through its state-run media.</p> <p>A summit between Kim and President Donald Trump is anticipated by the end of May.</p>

	<p>It may take more than one meeting for the Koreans to work out the details of the summit that will take place on the South Korea-controlled side of Panmunjom. The Koreans would need to agree on how Kim would arrive at the venue, including whether he would cross the military demarcation line that bisects the Koreans by foot in a symbolic gesture. The Koreans also need to determine how many times he and Moon would meet on that day and also whether parts of their meeting would be broadcast on live television.</p> <p>The Koreans have held only two summits since the 1950-53 Korean War.</p>

<b>HEADLINE</b>	<b>04/04 Wanted: big city school superintendents</b>
<b>SOURCE</b>	<a href="https://www.usnews.com/news/the-report/articles/2018-04-04/big-cities-struggle-to-fill-school-superintendent-positions">https://www.usnews.com/news/the-report/articles/2018-04-04/big-cities-struggle-to-fill-school-superintendent-positions</a>

GIST

LOS ANGELES, Washington, Houston, Las Vegas, Oklahoma City and Seattle are just a handful of the big cities looking to fill one of the most important jobs on their payroll – that of the school superintendent.

Also on the hunt: Columbus, Ohio; Newark, New Jersey; Jackson, Mississippi; Raleigh, North Carolina; and Jacksonville, Florida. Until last month, New York City and Boston were also in the market.

The annual school superintendent hunting season is open, and as usual, about a dozen cities are jockeying to woo an ever-shrinking pool of qualified candidates for a demanding job that requires one part managerial skills, one part political savvy and one part education-policy acumen for a tenure that, on average, lasts barely more than three years.

"These jobs are difficult. They take a real toll on people," says Michael Casserly, executive director of the Council of the Great City Schools, a coalition of the country's largest urban public school systems. "They are extremely demanding and whoever takes them has precious little in the way of personal and family time."

The number of openings, while striking, isn't out of the normal range. At one point in 2014, for example, more than 20 big city school superintendent openings were up for grabs. What's unusual this year, however, is the high-profile nature of many of them, including three of the top 10 biggest school districts in the country, and two, Washington and Newark, where the politics of education reform efforts often make national headlines.

Moreover, the openings come at a critical time for many of the cities, nearly all of which are grappling with funding issues, major achievement gaps between students of color and their white peers, a seemingly never-ending pipeline of low-performing schools, and, like every school district in the country, next school year they'll be operating new accountability systems and faced with new reporting requirements, thanks to the final stage of implementation of the federal K-12 law, the Every Student Succeeds Act.

"There's not very many positions either in the public or private sector where you have this unusual stew of race and religion and income and language needs with everyone struggling over the one thing they care about the most, which is their children," Casserly says. "So it makes the balancing act and the political demands, plus the demands for results, more acute than almost any other CEO-like position in any field one can imagine."

Research from AASA, the School Superintendents Association, shows, for example, that when asked what chases people away from superintendent jobs, 76 percent of superintendents reported inadequate state and local funding, 68 percent reported job stress, another 50 percent reported excessive time requirements, and 48 percent reported the intrusion of federal regulations.

Of course some cities come with more baggage than others: Houston is still recovering from last year's hurricane season, D.C. is still in free fall after its recent graduation rate scandal, and Los Angeles continues its roiling debate over the future of charter schools in the city.

So who is attracted to a job where the failure rate soars above that of even incremental success?

Turns out, a shrinking number of people. Big-city superintendent positions, which used to draw anywhere from 50 to 100 applicants, are now lucky to receive 10 to 20, Casserly says.

That's one of the reasons for an ever-revolving cast of characters that tend to leapfrog from city to city. New York City, for example, recently stole Richard Carranza away from Houston Independent School District, leaving the hurricane-handicapped city with its opening. Prior to Houston, Carranza was head of schools in San Francisco, and before that was superintendent of the northwest region of Clark County schools, which includes Las Vegas.

But when it comes to the anatomy of a successful big-city school superintendent, there are some qualities they tend to have in common.

For starters, candidates must have some grounding in education policy – something that in decades past wasn't as much of a requirement as managerial skills – and also be open to a mix of policy solutions. Any candidate with roots in the city is a plus, though not necessary, and prioritizing community input is a must. Candidates must also be politically savvy, able to cull the support of city government, the school board as well as community organizations, all while taking heat for any district misstep, big or small.

In short, it's the balancing act of all balancing acts.

"The superintendent shouldn't come into any city as a man on horseback with a complete solution, nor should they come in as someone to hold the lid on and keep everyone from fighting," says Paul Hill, founder of the Center on Reinventing Public Education and professor at the University of Washington.

Also of top importance is a superintendent's ability to build a strong coalition to support his or her plans for the district.

"We can think about the urban superintendents as a political operator – someone who builds coalitions across sectors, including the city government, but also with foundations and universities, and someone who wants to open up the K-12 system to the best the city can offer," says Hill, who points to places like Cleveland, Denver and Indianapolis as cities where superintendents have been doing just that.

"They have to start building a constituency that's outside the orbit of a union and a school board," he says. "That doesn't mean you defy them. That means you have people on your side in addition to them."

Robert McCord, professor in residence at AASA, where he conducts research on superintendents for the association, underscores the value in recruiting educators who have a track record being successful principals.

"The line is very, very direct and if you create a cadre of really well qualified principals, you will create a pool of well qualified superintendents," says McCord, who worked for more than 30 years in Clark County Nevada and has been a headhunter and consultant on superintendent hiring for years. "Without doing the first one you cannot get the second one."

He also emphasized the importance of hiring someone who has spent a lot of time in the classroom and is seen as an instructional leader.

"You can hire a politically savvy individual, you can hire a great finance individual who can put the numbers together, you can hire someone who can run referenda and such, but if you really want to get the heart of the institution, people in the public and we in the business should never lose focus on the fact that the individual needs to be an instructional leader."

Perhaps even more important than the qualifications of the candidate, however, is an agreement among the school board about the direction in which they want a superintendent to take the city's schools.

"I think what's more important is that the board of education pick a superintendent whose vision for the future is aligned with theirs so that there isn't a surprise when a new superintendent comes on board what it is he or she is going to do," says Casserly, whose organization represents the majority of cities that are currently seeking a superintendent.

"Sometimes that really undermines the tenure of superintendents when the board hasn't been clear with itself about where it is they want to take the school district," he says. "Then the board and superintendent sooner rather than later look up at one another and say, 'Gee, this is not what I had in mind.'"

To be sure, big-city school superintendents are paid handsomely. In 2014, the salaries of superintendents at cities that are part of the Council for the Great City Schools ranged from \$99,000 to \$339,000, in addition to platinum health care, pensions, life insurance and other related benefits. Most superintendents

	<p>of the biggest school districts clear \$300,000 easily, with the job of helming New York City schools drawing upward of \$500,000.</p> <p>"Anybody who gets into this knows full well that the demands are extremely high," Casserly says. "The context in which you do this job now is probably more difficult now than it's ever been. It does give some people pause."</p>

<b>HEADLINE</b>	<b>04/04 DHS: illegal immigration up 200%</b>
<b>SOURCE</b>	<a href="https://www.washingtontimes.com/news/2018/apr/4/illegal-immigration-200-percent-march-along-us-mex/">https://www.washingtontimes.com/news/2018/apr/4/illegal-immigration-200-percent-march-along-us-mex/</a>
<b>GIST</b>	<p>Illegal immigration across the southwest border surged 200 percent in March compared to the same month last year, according to Homeland Security statistics released late Wednesday that back up White House's claims that things are quickly deteriorating on the border.</p> <p>The year-over-year surge is by far the largest in the records, which date back to 2011, and it could be a signal that the Senate's debate on legalizing illegal immigrants earlier this year has sparked a new wave of migration.</p> <p>The Border Patrol and officers at the ports of entry nabbed 50,308 people in March — up from less than 37,000 in February, and three times the 16,588 people apprehended in March 2017, when President Trump's tough enforcement talk had sparked a major drop in illegal immigration attempts.</p> <p>That drop only lasted a few months and since last summer the numbers have been steadily increasing again, reaching back to levels not seen since the middle of the illegal immigration surge during the Obama administration.</p> <p>The numbers were released just as Mr. Trump was signing an order deploying National Guard troops to the southwest border to assist in enforcement. The government couldn't yet say how many troops were being sent, what their duties would be, nor how much it would cost — though Homeland Security Secretary Kirstjen Nielsen said they could be deployed as early as Wednesday night.</p> <p>According to the new numbers, the Border Patrol caught 37,393 illegal immigrants in March. Customs and Border Protection Officers, who man the ports of entry, encountered another 12,915 people who showed up without permission to enter.</p> <p>Those numbers are considered a rough yardstick for the overall flow of illegal traffic, so increases in the number of people caught signals an increase in overall illegal immigration.</p> <p>Analysts say that migration is seasonal, so comparisons to the same time in previous years gives the best sense for where things are headed.</p> <p>Particularly troubling for officials was a major jump in the number of illegal immigrants traveling as families. Nearly 9,000 were nabbed by the Border Patrol and another 5,100 were stopped at ports of entry. By contrast, in March 2017 the Border Patrol caught just 1,125 immigrants traveling as families, and the officers at the ports of entry stopped just 768.</p>

<b>HEADLINE</b>	<b>04/04 Seattle mayor wants congestion tolling</b>
<b>SOURCE</b>	<a href="http://mynorthwest.com/946087/report-seattle-mayor-wants-road-tolls-by-end-of-first-term/">http://mynorthwest.com/946087/report-seattle-mayor-wants-road-tolls-by-end-of-first-term/</a>
<b>GIST</b>	Seattle Mayor Jenny Durkan wants to implement congestion pricing in the city by 2021.

The Seattle Times first reported the city will create a plan based on a study of downtown neighborhoods. Results from the study could be released this year.

A press release sent less than an hour after the Times story published online said Durkan will announce “bold short- and long-term steps that the City will take to advance towards its greenhouse gas reduction goals to reach its commitment to the Paris Climate Agreement.” Part of that plan is the development of a “congestion pricing strategy,” the mayor’s office confirmed. The press release only mentions easing mobility “through the downtown core.”

The city will do what Durkan called “deep outreach” as it works to create a policy around congestion pricing. During a press conference mid-morning on Wednesday, Durkan said it will not be “top-down government.”

Prior to her election, Durkan and mayoral candidate Cary Moon said the city should consider congestion pricing. Durkan said the city will need a “range” of solutions to deal with the current traffic problem.

In an interview with KIRO Radio last year, Durkan said the city needs a “more holistic way” to get traffic flowing. That holistic approach, according to Durkan, includes staggered start times for large employers, to incentivize carpooling, and encouraging the use of public transportation.

On Tuesday, April 3, Durkan’s office posted a blog titled “Ahead of Mega Gridlock Expected Downtown, Mayor Jenny Durkan Commits to Additional Actions to Lessen Impact on Commuters and Businesses.” The post does not mention congestion pricing. However, it does point to the need to reduce traffic as mega projects also lead to “mega gridlock.”

Citing the 2017 Center City Modesplit Survey, Durkan’s office says transit use has increased in the last seven years in downtown during the morning commute. As did walking, biking, and rideshares. Meanwhile, there are approximately 4,500 fewer single-occupancy vehicles in the city.

It’s unclear what form of congestion pricing the mayor will push for. That may all depend on the study. Durkan told the Times the money generated from tolling the city’s roads would be pumped back into public transit.

<b>HEADLINE</b>	<b>04/04 New Seattle public schools superintendent</b>
<b>SOURCE</b>	<a href="http://mynorthwest.com/946733/ex-montana-education-leader-picked-as-seattle-superintendent/">http://mynorthwest.com/946733/ex-montana-education-leader-picked-as-seattle-superintendent/</a>
<b>GIST</b>	<p>HELENA, Mont. (AP) — Montana’s former Superintendent of Public Instruction Denise Juneau has been selected as the next superintendent of Seattle Public Schools.</p> <p>The Independent Record reports that Juneau was selected Wednesday night. She was one of the three finalists Seattle’s school board interviewed for the job.</p> <p>Juneau will manage a district of nearly 54,000 students. She oversaw about 150,000 students in Montana.</p> <p>Juneau will be responsible for closing large achievement gaps and coping with a significant budget shortfall. But until that happens, Juneau told the public she is prepared to have tough conversations about where to put limited resources.</p> <p>The Seattle Times reported that Juneau will be the school district’s fifth superintendent in 10 years and is expected to earn around \$300,000.</p>

<b>HEADLINE</b>	<b>04/04 Oregon didn’t warn on Hart family issues</b>
-----------------	---

SOURCE	<a href="http://www.king5.com/article/news/why-oregon-didnt-warn-washington-about-child-welfare-issues-with-hart-family/281-535180981">http://www.king5.com/article/news/why-oregon-didnt-warn-washington-about-child-welfare-issues-with-hart-family/281-535180981</a>
GIST	<p>Before Jennifer Hart drove her family’s SUV off of a California cliff, killing her wife, Sarah, and at least three of their six children, there were several child welfare complaints against the mothers with allegations ranging from withholding food as a punishment to beating one of their daughters with a belt.</p> <p>The family moved from Minnesota, to Oregon, and then to Washington. In each state, either neighbors or teachers reported possible child abuse and authorities investigated the complaints.</p> <p>But when the Harts left Oregon and moved to Washington less than a year ago, Oregon never told Washington officials about the issues. And when the Harts moved to Oregon from Minnesota, it’s likely that state didn’t report anything amiss, either.</p> <p>Information about specific child welfare cases is difficult to come by because much of the information is protected under privacy laws as the cases involve minors.</p> <p>But in general, Oregon’s Department of Human Services explained when they would, and would not, report child welfare concerns to other states.</p> <p>“If a case is closed and a family moves, the Department of Human Services would not notify the other state as we don’t track families once cases are closed,” said Christine Stone, spokeswoman for DHS.</p> <p>Stone said if the family moves when a case is still open, Oregon would notify the other state if there were child safety issues that officials believe still need to be addressed.</p> <p>“If the assessment were closing and children were determined safe in our state, a new report to the other state would not likely need to occur,” she said.</p> <p>In addition, there is no national database for child welfare cases, so one state can’t search any kind of master database to find out whether a family has a history of alleged abuse.</p> <p>States are required to keep a database of child welfare reports, but states don’t have access to each other’s databases.</p> <p>Stone said other states will sometimes reach out when they open a new child welfare case.</p> <p>“It is common for Oregon as well as other states to request Child Protective Services information on families when they have an open assessment/open case and there is reason to believe they resided in another state,” she said.</p> <p>A domestic abuse case involving Sarah Hart in 2011 was closed before she moved from Minnesota to Oregon.</p> <p>Another child welfare complaint was filed by a neighbor in Oregon against the Harts in 2013 but the neighbor said she was told that Oregon officials determined there was not enough evidence to make a case. Because of this, Oregon would not have notified Washington state of any child welfare concerns when the Harts moved in 2017.</p> <p>The Hart’s neighbors in Washington reported the family to Washington state’s Child Protective Services on March 23, 2018. After CPS visited the home, the family left for California.</p> <p>Sarah, Jennifer and three of their children were found dead at the base of a cliff three days later. The Hart’s three other children are missing and presumed dead.</p>

<b>HEADLINE</b>	<b>04/04 Seattle police new inspector general</b>
<b>SOURCE</b>	<a href="https://www.seattletimes.com/seattle-news/crime/tucson-police-official-tapped-for-key-oversight-job-in-seattle-police-department/">https://www.seattletimes.com/seattle-news/crime/tucson-police-official-tapped-for-key-oversight-job-in-seattle-police-department/</a>
<b>GIST</b>	<p>After a 10-month nationwide hunt, the Tucson Police Department’s longtime legal adviser has been nominated to serve as the Seattle Police Department’s first civilian inspector general, Councilmember M. Lorena González and the search committee who chose her announced Wednesday.</p> <p>The selection of Lisa Judge, who has held the Tucson post for 20 years, is subject to confirmation by the City Council.</p> <p>If confirmed, Judge will oversee an office created as part of historic police-accountability legislation passed by the council last year.</p> <p>The office is viewed as having a critical role in sustaining federally mandated, court-ordered reforms to address excessive force and biased policing under the city’s 2012 consent decree with the U.S. Justice Department.</p> <p>The inspector general will provide broad oversight of the management, practices and policies of the Police Department and the Office of Police Accountability, which conducts internal investigations.</p> <p>In Tucson, Judge’s duties “put her on the forefront of many issues that communities in Seattle face today, including innovations in interactions with people suffering with mental illness or in crisis,” according to a news release on her nomination.</p> <p>She also oversaw officers as they put a priority on treatment over incarceration in a department with a Critical Incident Review Board and Force Review Board built around transparency and community participation, the release said.</p> <p>In accepting this position, Judge said, “This is a very exciting time for law-enforcement reform, and this endeavor provides an important opportunity to do work of real value in furtherance of that reform. I am eager to work for the community of Seattle, and I look forward to a fruitful partnership with the Community Police Commission, the Office of Police Accountability, and the Seattle Police Department that is equal parts respect, trust, and healthy skepticism.”</p> <p>González, who heads the council committee overseeing public safety, and Mayor Jenny Durkan cited the importance of the position as the city enters a two-year period where it must show its court-approved compliance with the federal reforms is locked in place.</p> <p>“Ms. Judge has a background in police reform, an understanding of police culture and policing, a commitment to procedural justice and an articulated vision on how accountability and community coexist,” González said.</p> <p>Judge is Latina and identifies as a member of the LGBTQ community, according to the news release. She will appear at 9:30 a.m. on April 25 before González’s Gender Equity, Safe Communities, New Americans and Education committee to begin her confirmation process in council chambers.</p>

<b>GIST</b>	<p>JERUSALEM – Health officials in the Gaza Strip say a Palestinian man was killed in an Israeli airstrike near the Gaza-Israel border.</p> <p>The Israeli military says its aircraft targeted an "armed terrorist adjacent to the security fence" in the northern part of the coastal territory on Thursday. The Gaza Health Ministry confirmed the man's death but did not immediately release his identity.</p> <p>Also, a Palestinian wounded in the mass protest along the border last week died of his wounds on Thursday.</p> <p>The two fatalities raise the number of Palestinians killed by Israeli fire in Gaza since last Friday to 21.</p> <p>The Israeli military is on high alert as more mass demonstrations are expected along the border on Friday.</p>

<b>HEADLINE</b>	<b>04/04 Pentagon looking to expand border duties</b>
<b>SOURCE</b>	<a href="https://www.militarytimes.com/news/your-military/2018/04/04/dod-looking-at-ways-to-expand-border-duties/">https://www.militarytimes.com/news/your-military/2018/04/04/dod-looking-at-ways-to-expand-border-duties/</a>
<b>GIST</b>	<p>The Pentagon is looking at ways it can fulfill President Donald Trump's request to have the military guard the U.S.-Mexico border, spokesman Dana White said.</p> <p>"There are a number of ways the Department of Defense is already supporting the [Department of Homeland Security] border security mission," White said. "We are still in consultation with the White House about ways we can expand that support."</p> <p>As it has become apparent that Congress was not going to give Trump the full funding he has requested to build a border wall, the president has looked to the military to fill the gap.</p> <p>Last week Trump suggested on Twitter that the Pentagon could spend some of its just-signed 2018 budget to help pay for the wall, which is estimated to cost about \$25 billion.</p> <p>Then on Monday, Trump said he'd spoken to Defense Secretary Jim Mattis about how the military could further support the wall beyond funding.</p> <p>"I've been speaking with General Mattis. We're going to be doing things militarily," Trump said. "Until we can have a wall and proper security, we're going to be guarding our border with the military. That's a big step. We really haven't done that before, or certainly not very much before."</p>

	A defense official who spoke on the condition of not being identified suggested that one possibility is that National Guard forces could be used to secure the border as they did in the 2006 to 2008 Operation Just Cause, but the official had no additional details beyond that.

<b>HEADLINE</b>	<b>04/04 Calif. DMV: 1M illegals w/licenses</b>
<b>SOURCE</b>	<a href="http://www.sacbee.com/news/politics-government/capitol-alert/article207939584.html">http://www.sacbee.com/news/politics-government/capitol-alert/article207939584.html</a>
<b>GIST</b>	<p>More than 1 million undocumented immigrants have received driver's licenses, the California Department of Motor Vehicles announced Wednesday.</p> <p>Assembly Bill 60, authored by then-Assemblyman Luis Alejo in 2013, required California DMV offices to issue driver's licenses to undocumented immigrants as long as they can prove their identity and residence within the state. The law has led to 1,001,000 undocumented immigrants receiving licenses as of March 31 but doesn't give the licensees carte blanche to drive outside of California or fly across state or federal borders.</p> <p>"Immigrants are getting tested, licensed and insured and this is making our roads safer for everyone," said Alejo, now a Monterey County supervisor, in a prepared statement. "Today, we see the law working the way it was intended to and has dramatically improved the lives of a million immigrants and their families."</p> <p>Twelve states plus Washington, D.C., and Puerto Rico allow undocumented immigrants to obtain driver's licenses. Undocumented immigrants were free to receive driver's licenses anywhere in the U.S. until 1993, when California became the first state to restrict access and 45 others followed suit.</p> <p>In 2015, the first year the law took effect, approximately 605,000 undocumented immigrants received licenses. Fewer people applied after an initial spike, and the DMV now issues about 10,000 AB 60 licenses statewide per month.</p> <p>A study published in Proceedings of the National Academy of Sciences showed hit-and-run accidents dropped in California after AB 60 went into effect, and had no discernible impact on the total number of crashes or auto-related fatalities in the state. The California Research Bureau's required January 2018 report found no AB 60 license holders had filed complaints with state agencies alleging discrimination related to their license ownership.</p>

<b>HEADLINE</b>	<b>04/05 Russia pushes back accusations at UN</b>
<b>SOURCE</b>	<a href="https://www.cbsnews.com/news/russia-pushes-back-at-united-nations-against-poisoning-accusations-sergei-skripal/">https://www.cbsnews.com/news/russia-pushes-back-at-united-nations-against-poisoning-accusations-sergei-skripal/</a>
<b>GIST</b>	<p>UNITED NATIONS -- At the United Nations on Thursday, Russia will be pushing back after the U.K. accused Moscow of using a nerve agent to poison a former spy and his daughter in Britain last month. Russia called for an open meeting Thursday afternoon of the U.N. Security Council to refute the poisoning allegations.</p> <p>Requesting the meeting, Russia's ambassador to the U.N. Vassily Nebenzia wrote to the Security Council president, saying the use of chemical weapons by anyone anywhere is "inadmissible and must be investigated and punished."</p> <p>Russia's requested meeting Thursday takes place one week before the results of tests of samples collected from individuals exposed to a nerve agent in Salisbury are expected to be sent to the UN's Secretariat by the Organization for the Prohibition of Chemical Weapons (OPCW).</p> <p>On the basis of the investigation, the U.N. Secretariat will produce a report, Ahmet Üzümcü, the Director-</p>

General of the OPCW said.

The OPCW report comes after Russia and the U.K. traded barbs this week Wednesday at the Organization's meeting in The Hague in which Moscow accused British and U.S. secret services of being responsible for the poisoning of the former Russian spy.

In addition to the samples collected from Sergei Skripal and his daughter, samples were also collected from a third individual – a police official – reportedly exposed to the chemical.

Russia's ambassador said the meeting was called on the basis of a letter sent by British Prime Minister Theresa May, which states that the British government believes that it is "highly likely" that the Russian Federation was responsible for this attack.

"The United Kingdom police have conducted a thorough investigation, which has identified that the chemical that was used in Salisbury was a specific nerve agent from a class of chemical warfare agents known as novichok. These were originally developed by the Soviet Union, and then inherited by the Russian Federation," the letter stated.

According to Russia's state television, RT, Russia's U.N. Ambassador was prompted to request the meeting after the British Foreign and Commonwealth Office deleted a March 22 tweet in which it claimed experts at their chemical weapons laboratory confirmed the substance that allegedly poisoned the former Russian spy and his daughter was military-grade nerve agent produced in Russia.

Russian officials, including its Foreign Minister, have said that Russia had nothing to do with the poisoning of the former Russian spy in Britain.

<b>HEADLINE</b>	<b>04/04 Britain: nerve agent source found</b>
<b>SOURCE</b>	<a href="https://www.cbsnews.com/news/sergei-skripal-poisoning-britain-believes-it-has-found-russian-lab-that-made-nerve-agent-salisbury/">https://www.cbsnews.com/news/sergei-skripal-poisoning-britain-believes-it-has-found-russian-lab-that-made-nerve-agent-salisbury/</a>
<b>GIST</b>	<p>British security forces believe they have found the Russian lab that made the nerve agent novichok, which was used in the attack on ex-spy Sergei Skripal and his daughter in Salisbury on March 4, the Times of London reported Wednesday. Security sources told the London newspaper that while they are not 100 percent certain, they have a "high degree of confidence in the location."</p> <p>A government source told the Times that security forces "knew pretty much by the time of the first Cobra [the emergency co-ordination briefing that took place the same week] that it was overwhelmingly likely to come from Russia."</p> <p>Security sources told the Times they believe Russians conducted tests to see whether novichok could be used for assassinations.</p> <p>The international chemical weapons watchdog on Wednesday rejected Russia's call for a joint investigation into the Salisbury poisoning. But Russia said the number of countries that abstained from the vote suggested many have doubts about Britain's allegations that Moscow was behind the attack and now plans to take its denials of involvement to the U.N. Security Council.</p> <p>Britain said Russia's proposal for a joint investigation received only six votes at a special session of the executive council of the Organization for the Prohibition of Chemical Weapons. The council has representatives from 41 countries.</p> <p>Russia requested the session in The Hague, Netherlands, to push its repeated rejection of Britain's claim that Moscow orchestrated the poisonings of Sergei Skripal and his daughter, Yulia. The British government has invited experts from OPCW to help identify the substance that sickened the Skripals on</p>

March 4.

"The purpose of Russia's ludicrous proposal at The Hague was clear - to undermine the independent, impartial work of the international chemical weapons watchdog," British Foreign Secretary Boris Johnson said in a statement.

Russia's OPCW envoy Alexander Shulgin said the 17 abstentions from Wednesday's vote meant "more than half of the members of the executive council refused to support the U.S. and U.K. position."

The United States and more than two dozen British allies have expelled more than 150 Russian diplomats in a show of solidarity over the attack. Moscow has responded in kind.

Russia's U.N. ambassador called for an open meeting Thursday of the U.N. Security Council about the case. Ambassador Vassily Nebenzia made the request at the end of his speech Wednesday to a council meeting on chemical weapons in Syria.

Russia requested the Security Council meeting because it shares the principle that the use of chemical weapons "is not acceptable and must be investigated and perpetrators punished," Nebenzia said.

Kuwait's U.N. ambassador, Mansour Al-Otaibi, told reporters the meeting is scheduled at 3 p.m. EDT Thursday.

At the special meeting in The Hague, Russia and Britain traded accusations of duplicity and untrustworthiness.

The British envoy said that a joint investigation, as proposed by Russia, would force "a victim to engage the likely perpetrator."

"To do so would be perverse," acting U.K. Permanent Representative John Foggo said, adding that Moscow's demand showed "disdain."

But Russia complained that Britain's work with the agency has lacked transparency.

"Russia, as well as other states that are members of the executive committee, have been pushed aside from this investigation," Shulgin told reporters.

"They tell us that they can inform us of the results of this investigation ... only with the good will of Great Britain," Shulgin said. "But, knowing how our so-called partners have conducted themselves, we are not going to count on their good will."

The United States and many of Britain's European allies have supported the U.K. in assigning blame for the poisonings to Russia. Moscow has worked strenuously to undermine the allegation and pressured Britain to provide evidence backing its claim that Russia was responsible.

A spokeswoman for the Russian Foreign Ministry said Wednesday that Britain needed to provide information about the pets that lived in Sergei Skripal's house in Salisbury, England.

Wednesday that Russia has reliable information that there were pets in the Salisbury residence of Sergei Skripal.

"Where are the pets? What is their condition?" ministry spokeswoman Maria Zakharova said. "This is about living creatures, and if a toxic chemical agent was indeed used in their house, these living creatures should have been hurt."

The chief of Britain's defense research lab, the Porton Down laboratory, acknowledged Tuesday it has not been able to pinpoint the precise source of the nerve agent.

Gary Aitkenhead said scientists there identified the substance used on Sergei and Yulia Skripal as a Soviet-developed nerve agent known as Novichok. But he added "it's not our job to say where that was actually manufactured."

The British government says it relied on a combination of scientific analysis and other intelligence to conclude that the nerve agent came from Russia.

Britain is standing by its assessment, but the Foreign Office on Wednesday deleted a tweet from last month saying Porton Down scientists had identified the substance as "made in Russia."

Still, Russian President Vladimir Putin had quickly seized on Aitkenhead's comments as proof that British accusations against Russia were baseless. He noted that at least 20 other nations now have the capacity to produce Novichok.

Asked Wednesday if Russia expects an apology from Britain, Putin said "we are not expecting anything like that."

"We are just expecting reason to prevail so that international relations don't sustain damage like what we have seen recently," he said after a summit in Ankara, Turkey.

"This not only concerns the assassination attempt on Skripal, but also all other aspects of international relations," he said. "We need to work within the framework of sound political processes, founded on fundamental norms of international law, and this will make the world a more stable and predictable place."

<b>HEADLINE</b>	<b>04/04 Sagging school funding fuels protests</b>
<b>SOURCE</b>	<a href="https://www.reuters.com/article/us-usa-education-funding-analysis/sagging-school-funding-fuels-u-s-teacher-protests-idUSKCN1HB35W">https://www.reuters.com/article/us-usa-education-funding-analysis/sagging-school-funding-fuels-u-s-teacher-protests-idUSKCN1HB35W</a>
<b>GIST</b>	<p>CHICAGO (Reuters) - U.S. teacher demonstrations are likely to spread as more educators hit the streets to take on states that they claim are choosing tax cuts over the education of students in elementary and secondary public schools.</p> <p>Protests have erupted in states with some of the lowest teacher salaries in the nation, leading to multi-day job actions in a few states.</p> <p>Educator unrest began in West Virginia, where teachers ended a nine-day strike last month after the state approved a 5 percent pay hike.</p> <p>This week, massive teacher protests closed schools in Oklahoma.</p> <p>American Federation of Teachers President Randi Weingarten said the demonstrations, which have so far taken place in right-to-work states with weak labor laws, underscore how fed up teachers have become over the deprivation caused by inadequate funding due to tax cuts.</p> <p>Meanwhile, teacher unrest is growing in Arizona.</p> <p>Median teacher salaries in the Grand Canyon state are among the lowest in the nation, leading to a retention problem. A report last year by the Morrison Institute for Public Policy at Arizona State University found that almost a quarter of teachers hired between 2013 and 2015 were no longer teaching after a year, while 42 percent of teachers hired in 2013 lasted no more than three years.</p> <p>Dan Hunting, a senior policy analyst at the institute, said taxes in Arizona as a percentage of the economy have been reduced by about a third since the early 1990s, resulting in less state money for schools.</p>

“It’s going to take a while for us to get out of this. There’s not going to be a magic bullet,” Hunting said.

The common thread in all three states is tax cuts that were undertaken in the years before and after the Great Recession, according to Michael Leachman, director of state fiscal research at the Center on Budget and Policy Priorities. The group describes itself as a nonpartisan research institute.

“Teacher compensation is the biggest part of school budgets,” he said. “If you cut the revenue that’s available to spend on schools it makes it hard to pay for qualified teachers.”

On a national basis, 47 percent of funding for public schools comes from states, with 45 percent raised locally and 8 percent coming from the federal government, Leachman said. In more than half of the states, per-pupil funding from state and local sources from 2008 through 2015 was below 2008 levels.

Leachman said problems could be brewing in the low-teacher pay states of North Carolina and Mississippi.

For example, North Carolina is projecting budget shortfalls topping \$1 billion starting in fiscal 2020 as income tax cuts are phased in, according to a July five-year forecast.

When state funding falls, some mostly poorer school districts are unable to make up the difference, leading to inequities among districts.

Funding inequities have fueled lawsuits in 46 states over the last 45 years, according to Michael Rebell, who heads the Center for Educational Equity at Columbia University’s Teachers College, which tracks school funding litigation. He said districts and other plaintiffs that have sued states have prevailed 60 percent of the time.

To remedy those cases, states tend to hold rich districts harmless and give poor districts a bigger funding increase, he said.

<b>HEADLINE</b>	<b>04/05 Media: China will never back down</b>
<b>SOURCE</b>	<a href="https://www.reuters.com/article/us-usa-trade-china/china-says-it-never-backs-down-in-the-face-of-threats-after-trade-salvos-with-u-s-idUSKCN1HC0S2?il=0">https://www.reuters.com/article/us-usa-trade-china/china-says-it-never-backs-down-in-the-face-of-threats-after-trade-salvos-with-u-s-idUSKCN1HC0S2?il=0</a>
<b>GIST</b>	<p>BEIJING (Reuters) - China has never surrendered to external pressure and it will win any trade war with the United States, the nation’s state media stressed in a series of editorials and columns in the hours after the world’s two top economies targeted each other with steep tariffs.</p> <p>While China’s Ambassador to the United States Cui Tiankai stressed in comments to reporters in Washington that Beijing’s preference was to resolve the trade dispute through negotiations, Beijing’s official mouthpieces were taking a more belligerent line.</p> <p>The ruling Communist Party’s People’s Daily newspaper said Beijing’s quick counter-move had caught the Americans off guard.</p> <p>“Within 24 hours of the U.S. publishing its list, China drew its sword, and with the same strength and to the same scale, counterattacked quickly, fiercely and with determination,” the paper said in a commentary on Thursday.</p> <p>“The confidence to know that [China] will win the trade war comes from the scale of [China’s] consumer market,” the paper said, noting that China’s market potential is incomparable to other economies.</p> <p>Many American consumer product and industrial companies see the Chinese market as a big source for</p>

future growth given the continued rise in the number of people joining both the middle class and the wealthier levels of Chinese society.

The United States' proposed list of \$50 billion in duties on Chinese goods is aimed at forcing Beijing to address what Washington says is deeply entrenched theft of U.S. intellectual property and forced technology transfer from U.S. companies.

China hit back within hours with its own threatened tariffs on U.S. imports including soybeans, planes, cars, whiskey and chemicals.

The official Xinhua news agency said late on Wednesday that the U.S. tariffs proposal would cost the United States "dearly".

"China will not be afraid or back down if a trade war is unavoidable. The country has never surrendered to external pressure, and it will not surrender this time either," Xinhua said.

The apparent determination not to retreat is at the polar opposite of comments by White House National Economic Council Director Larry Kudlow, who told Fox News Channel on Wednesday: "I believe that the Chinese will back down and will play ball."

"China's counter tariffs are a spectacular way of standing up to America's bullying tactics, not only for itself, but for other countries threatened by the United States' new trade policies," the nationalist Global Times said in an editorial on Thursday.

While Beijing's claims that Washington is the aggressor and spurring global protectionism, China's trading partners for years have complained that it abuses WTO rules, and practices unfair industrial policies at home that lock foreign companies out of crucial sectors with the intent of creating domestic champions.

China has repeatedly pledged that it would open up sectors such as financial services, including promises to the Trump administration last year that it would give "full and prompt market access" to U.S. payment network operators.

But despite a 2012 WTO ruling that China was discriminating against foreign payment card companies, no U.S. firm has yet been granted a license.

Trump has said in speeches that the United States will no longer let China take advantage of it on trade, and bipartisan support has been steadily building in Washington to address what are seen as Chinese abuses.

<b>HEADLINE</b>	<b>04/04 Amazon to open Spheres twice month</b>
<b>SOURCE</b>	<a href="https://www.geekwire.com/2018/amazon-open-spheres-public-twice-month-turning-new-leaf-seattle-landmark/">https://www.geekwire.com/2018/amazon-open-spheres-public-twice-month-turning-new-leaf-seattle-landmark/</a>
<b>GIST</b>	<p>The Amazon Spheres have proven to be a hit with employees of the tech giant, who have enjoyed exclusive access to the glass orbs — designed specifically for them as a unique office space in downtown Seattle — since CEO Jeff Bezos officially opened them on Jan. 29. Now the public will get a closer look at what's going on inside the plant-filled structures.</p> <p>Amazon is opening the Spheres to visitors on two Saturdays per month. Just like the workers who stroll the walkways, sit beside the waterfalls, stare up at the 4,000-square-foot living wall or down from the 55-foot-high treetops, the general public will be allowed unguided access.</p> <p>This is a change from Amazon's original plan, which was to allow curious plant lovers and architecture</p>

geeks an inside look only on official campus HQ tours. That was a tough pill to swallow for Seattleites who had seen the dramatic domes take shape between the company's Doppler and Day 1 office towers and figured they would be able to just walk right in.

A visitor center located on Seventh Avenue at the base of the Spheres, called Understory, teases non-Amazonians with limited access and a museum-style exhibit — but no view of the 40,000 plants in their tropical environment, dashing the hopes of people who thought they were getting full access.

Amazon certainly didn't want its new employee space, featuring a delicate ecosystem, to be overrun in the early going. Even employees had to use a reservation system when the structures opened. John Schoettler, Amazon's vice president of global real estate and facilities, told GeekWire before the Spheres opened about the vision for who would get inside.

"There's an amazing teaching moment here, and we envision being able to open these Spheres to the public occasionally for field trips and for educational purposes with different schools and universities," Schoettler said. "This is our office space, and we don't invite the public into any of the towers. This is just an alternative working space for our employees."

But a couple months into the process, the plants are thriving and Amazon is ready for more visitors.

<b>HEADLINE</b>	<b>04/04 Wild ride becomes new normal US stocks</b>
-----------------	---

<b>SOURCE</b>	<a href="https://www.bloomberg.com/news/articles/2018-04-04/stocks-wild-ride-the-new-normal-as-trump-agenda-roils-markets">https://www.bloomberg.com/news/articles/2018-04-04/stocks-wild-ride-the-new-normal-as-trump-agenda-roils-markets</a>
---------------	---

<b>GIST</b>	Stunned by the about-face in U.S. stocks? Get used to it.
-------------	---

The S&P 500 Index roared back from a 1.5 percent plunge at the open to close higher, marking the sixth intraday reversal of at least 1 percent since January. That equals the total of the past two years, when stocks went virtually straight up on rising optimism in the economy.

Investors have been whipsawed by Washington's changing policy priorities following President Donald Trump's legislative wins on traditional pro-business policies like tax cuts. The administration's now pushing protectionist proposals that are less eagerly supported by many corporate leaders, while the president ratchets up attacks on individual companies. The result is a market that's grown increasingly reactive to tweets.

"This is very much headline driven," said Quincy Krosby, chief market strategist at Prudential Financial Inc. "You can see how -- absent something that the market can focus on squarely, such as earnings -- the market is vulnerable to headlines, both for moving higher and moving lower."

Wednesday's turnaround had everything to do with trade talk. U.S. investors awoke to a 2 percent drop in S&P 500 futures after China issued a rapid response to American tariff proposals. By midmorning, officials from China and the Trump administration were leaving the door open to a negotiated solution that would avoid levies, which wouldn't take effect for months.

Stocks got a boost when National Economic Council Director Larry Kudlow suggested on Fox Business that Trump's bluster was part of a negotiating strategy to win better trade terms. He call the list of tariffs "a first step."

"Investors are trying to come to terms with the understanding that the market is not going to go up in straight line forever," said James Gaul, a portfolio manager at Boston Advisors LLC, which oversees about \$5.1 billion. "There are changes coming, whether it's in monetary policy, trade policy or regulation, some of which have unknown element to it."

HEADLINE	04/04 Thousands march to 'keep dream going'
SOURCE	<a href="https://www.newsmax.com/newsfront/martin-luther-king-march-memphis-civil-rights/2018/04/04/id/852652/">https://www.newsmax.com/newsfront/martin-luther-king-march-memphis-civil-rights/2018/04/04/id/852652/</a>
GIST	<p>With thoughts on the past and eyes to the future, thousands marched and sang civil rights songs Wednesday to honor the Rev. Martin Luther King Jr., the "apostle of nonviolence" silenced by an assassin 50 years ago.</p> <p>At events ranging from a jubilant concert to a solemn wreath-laying, admirers across the country took time to both reflect on King's legacy and discuss how his example can apply to racial and economic divides still plaguing society.</p> <p>Among the largest gatherings was a march through the Mississippi River city where the civil rights leader was shot dead on a motel balcony in 1968. Memphis police estimated a crowd of about 10,000.</p> <p>The Rev. James Lawson, who invited King to Memphis 50 years ago to assist with a strike by underpaid sanitation workers, helped lead the march and said more progress is needed toward King's goal of equality for all.</p> <p>"I'm still anxious and frustrated," said Lawson, his black hair turned gray. "The task is unfinished."</p> <p>Speaking in King's hometown of Atlanta, the Rev. Bernice King recalled her father as a great orator whose message of peaceful protest was still vital decades later.</p> <p>"We decided to start this day remembering the apostle of nonviolence," she said during a ceremony to award a prize named for her father.</p> <p>As painful as losing her father was, she said she wouldn't change history.</p> <p>"Actually, I'm glad that everything happened the way that it happened because I can't imagine the world that we live in without the contributions of Martin Luther King Jr. and Coretta Scott King and the sacrifice that they made," she said.</p> <p>Before the Memphis march, the rapper Common and pop singer Sheila E had the crowd dancing and bobbing their heads. Then, as the march began, people locked arms or held signs as they chanted and sang songs such as "We Shall Overcome."</p> <p>"We know what he worked hard for, we know what he died for, so we just want to keep the dream going," said Dixie Spencer, who came to the march from nearby Hardeman County, where she's an NAACP leader. "We just want to make sure that we don't lose the gains that we have made."</p> <p>Martin Luther King III addressed marchers at the end of their route, focusing on the triple evils of poverty, racism and war. "There's something wrong in our nation where a minimum of 48 million people are living in poverty. That's unacceptable. We must do better. America should be embarrassed about having people living in poverty."</p> <p>In the evening, ringing bells marked the moment King was gunned down at age 39. Members of King's family pulled a rope together to ring a bell 39 times at the pool surrounding the Atlanta crypt of King and his wife. The family then laid a wreath of multicolored flowers in front of the crypt. The crowd gathered outside Memphis' old Lorraine Motel fell silent as the bell began to ring there. A red and white wreath was placed on the balcony where King had been standing when he was shot.</p> <p>Small-time criminal James Earl Ray pleaded guilty to the killing and quickly recanted, claiming he was set up. The conviction stood, and Ray died in prison in 1998.</p>

	<p>Marking the anniversary of the assassination, President Donald Trump issued a proclamation in honor of the slain leader, saying: "In remembrance of his profound and inspirational virtues, we look to do as Dr. King did while this world was privileged enough to still have him."</p> <p>The president has been the target of veiled criticism by some speakers at King commemorations in recent days as they complained of fraught race relations and other divisions since he was elected.</p> <p>Observances marking King's death were planned coast-to-coast. In New York, the Dance Theatre of Harlem planned an evening performance in his honor. Another march was scheduled in Yakima, Washington.</p>

<b>HEADLINE</b>	<b>04/04 Puerto Rico sues Pharma for opioid crisis</b>
<b>SOURCE</b>	<a href="http://abcnews.go.com/International/wireStory/puerto-rico-sues-purdue-pharma-opioid-crisis-54239884?">http://abcnews.go.com/International/wireStory/puerto-rico-sues-purdue-pharma-opioid-crisis-54239884?</a>
<b>GIST</b>	<p>Puerto Rico's Justice Department has filed a lawsuit against Purdue Pharma accusing the drugmaker of causing an opioid crisis in the U.S. territory.</p> <p>Officials said Wednesday that they are seeking to hold the company responsible for all government costs incurred as a result of the damage opioids have caused. The suit also accuses the company of misrepresenting the risk of abuse and addiction, among other things.</p> <p>The lawsuit says that opioid distribution more than doubled in Puerto Rico from 1999 to 2013 and that 1,661 fatal overdoses were reported from January 2007 to March 2016.</p> <p>A Purdue Pharma spokesman denies the allegations and says the company is collaborating to solve the abuse crisis.</p> <p>Dozens of states, cities and counties in the U.S. mainland have filed similar lawsuits.</p>

<b>HEADLINE</b>	<b>04/05 Lebanon seeks funds to aid economy</b>
<b>SOURCE</b>	<a href="http://abcnews.go.com/International/wireStory/lebanon-seeks-funds-troubled-economy-paris-conference-54248765?">http://abcnews.go.com/International/wireStory/lebanon-seeks-funds-troubled-economy-paris-conference-54248765?</a>
<b>GIST</b>	<p>Lebanon hopes to secure billions of dollars for infrastructure this week at an international donor conference in Paris, as it grapples with low growth and soaring debt.</p> <p>Some 50 countries and international organizations are expected at the CEDRE (Cedar) conference that begins Friday, where Beirut will request up to \$22 billion for an eight to 12 year investment program. Lebanon hopes an influx of cash will help revive the economy, which has been hammered by political unrest and spillover from the war in neighboring Syria.</p> <p>Lebanon is home to some 1.2 million refugees, accounting for nearly a quarter of its population. The civil war next door has also hindered land exports to Jordan, Iraq and oil-rich Gulf nations.</p> <p>From 2007 until 2010, Lebanon's economy grew at an average of 9 percent annually. But it hit a major downturn in 2011, when a political crisis brought down the government and the Syrian uprising stoked unrest among Lebanese factions.</p> <p>Since then, growth has averaged a mere 1.5 percent, according to government estimates, and rampant corruption has hollowed out infrastructure and basic services. Nearly three decades after the end of the 1975-1990 civil war, Lebanon still experiences frequent cutoffs of water and electricity. With public</p>

	<p>transport networks virtually non-existent, its aging roads are clogged with traffic. Chronic problems with waste management have sparked mass protests in recent years.</p> <p>"Lebanon currently is facing major economic challenges, and these challenges range from budgetary problems to balance of payment to growth to unemployment," said Nadim Munla, senior adviser to Prime Minister Saad Hariri.</p> <p>"It has been characterized by many as a very difficult time," with some calling it a "doomsday scenario," he said.</p>

<b>HEADLINE</b>	<b>04/04 NYPD cops fatally shot man holding pipe</b>
<b>SOURCE</b>	<a href="http://abcnews.go.com/US/police-shoot-kill-man-pointed-pipe/story?">http://abcnews.go.com/US/police-shoot-kill-man-pointed-pipe/story?</a>
<b>GIST</b>	<p>A man with a pipe was fatally shot in New York today by officers who believed he was pointing a gun, police said.</p> <p>At just before 5 p.m., the New York Police Department received multiple 911 calls about a man described as "pointing what is described as a silver firearm at people on the street," Chief of Department Terence Monahan said in a statement, noting that three different callers said the man had a gun.</p> <p>Officers responded to the corner of Utica Avenue and Montgomery Street in Brooklyn, Monahan said, where they found a man who matched the suspect's description.</p> <p>As officers approached him, the man "took a two-handed shooting stance," pointing the object he was holding at the officers, Monahan said. The officers opened fire, hitting the suspect.</p> <p>They "immediately" called an ambulance and administered aid to the man, Monahan said. The suspect was then transported to a local hospital, where he was pronounced dead.</p>

<b>HEADLINE</b>	<b>04/05 Military: 3<sup>rd</sup> aviation accident 48hrs</b>
<b>SOURCE</b>	<a href="http://abcnews.go.com/US/pilot-condition-unknown-16-crash-nevada/story?">http://abcnews.go.com/US/pilot-condition-unknown-16-crash-nevada/story?</a>
<b>GIST</b>	<p>A pilot with the U.S. Air Force's elite Thunderbirds flight-demonstration team died Wednesday when the pilot's F-16 crashed near Nellis Air Force Base outside Las Vegas.</p> <p>The Thunderbirds pilot died during a routine training flight at the Nevada Test and Training Range around 10:30 a.m., the Air Force confirmed in a statement.</p> <p>The Air Force is not yet identifying the pilot so his family can be notified, according to the statement, which added that "an investigation is being conducted into the cause of the mishap."</p> <p>The Thunderbirds have canceled their appearance at this weekend's "March Field Air &amp; Space Expo" at March Air Reserve Base in California, and "it is unknown how this accident will impact the remainder of the 2018 Thunderbirds Season," according to the statement.</p> <p>Wednesday's crash was the third aviation incident for the U.S. military in the last 48 hours.</p> <p>On Tuesday, a Marine Corps Harrier crashed shortly after takeoff near the runway at Camp Lemonnier in Djibouti. The pilot ejected to safety.</p> <p>That same day, a Marine Corps CH-53E Super Stallion helicopter crashed near El Centro, California. All four crew members on board were killed, the Marine Corps said.</p>

	<p>This latest crash in Nevada follows a string of incidents at or near Nellis Air Force Base.</p> <p>In January, an aircraft was required to abort its takeoff and subsequently caught fire. No personnel were harmed.</p> <p>In September, a pilot was killed during a crash at the Nevada Test and Training Range.</p> <p>On June 2, 2016, a Thunderbirds jet crashed outside of Colorado Springs, Colorado, following a flyover at the Air Force's commencement exercises. The pilot ejected to safety. A later investigation revealed that the F-16 crashed because of an equipment malfunction.</p> <p>That incident occurred the same day that 32-year-old Jeff Kuss, a member of with the Navy's elite Blue Angels team, crashed his F/A-18 and died while preparing for an airshow in Tennessee.</p>

<b>HEADLINE</b>	<b>04/04 National Guard to southern border</b>
<b>SOURCE</b>	<a href="http://abcnews.go.com/Politics/trump-signs-proclamation-ordering-national-guard-southern-border/story?id=54242454&amp;cid=clicksource_4380645_1_hero_headlines_bsq_hed">http://abcnews.go.com/Politics/trump-signs-proclamation-ordering-national-guard-southern-border/story?id=54242454&amp;cid=clicksource_4380645_1_hero_headlines_bsq_hed</a>
<b>GIST</b>	<p>Speaking at the White House Wednesday to follow up on President Donald Trump's surprise announcement that he would order the military to help secure the southern border, Homeland Security Secretary Kirstjen Nielsen refused to detail the size, scope or cost of a planned deployment of National Guard troops, but said it was hoped they could be deployed "immediately" – as early as Wednesday night.</p> <p>Wednesday evening, a senior administration official said the president had signed a proclamation authorizing the National Guard to assist the border patrol.</p> <p>While the president could order active duty military personnel or federalized National Guard troops to assist with border security operations, they would not be allowed to carry out law enforcement duties like detaining migrants crossing the border illegally.</p> <p>"The Department of Defense and the Department of Homeland Security have been directed to work together with our governors to deploy the National Guard to our southwest border, to assist the Border Patrol," Nielsen said.</p> <p>She said the administration hopes the deployment of the National Guard will begin immediately and Trump officials are in touch and coordinating with governors in impacted states. She also said that the U.S. has also been in touch with Mexico about the decision and that Mexicans “understand and respect our national sovereignty.”</p> <p>President George W. Bush in 2006 and President Barack Obama in 2010 also sent thousands of National Guard troops to assist with border operations, primarily in administrative and surveillance roles, in order to free up Customs &amp; Border Protection personnel to focus on enforcement.</p>

<b>HEADLINE</b>	<b>04/04 US floats talks after China retaliates</b>
<b>SOURCE</b>	<a href="https://www.reuters.com/article/us-usa-trade-china/u-s-floats-talks-after-china-strikes-back-in-trade-fight-idUSKCN1HB0G6?il=0">https://www.reuters.com/article/us-usa-trade-china/u-s-floats-talks-after-china-strikes-back-in-trade-fight-idUSKCN1HB0G6?il=0</a>
<b>GIST</b>	<p>WASHINGTON/BEIJING (Reuters) - President Donald Trump's administration said on Wednesday talks with Beijing could resolve an escalating U.S.-China trade fight after China retaliated against U.S. proposals to slap tariffs on \$50 billion in Chinese goods by targeting key American imports with similar duties.</p>

	<p>Just 11 hours after the Trump administration proposed 25 percent tariffs on some 1,300 Chinese industrial, technology, transport and medical products, China responded with a list of similar duties on key American imports including soybeans, planes, cars, beef and chemicals.</p> <p>Global stock markets, fearful of a trade war between the world's two economic superpowers, were shaken by the salvos between China and the United States but have since regained some lost ground.</p> <p>Trump, who contends his predecessors served the United States badly in trade matters, rejected the notion that the tit-for-tat moves amounted to a trade war.</p> <p>"We are not in a trade war with China that war was lost many years ago by the foolish, or incompetent, people who represented the U.S.," he wrote on Twitter.</p>

<b>HEADLINE</b>	<b>04/04 OPCW rebuffs Russia probe request</b>
<b>SOURCE</b>	<a href="http://abcnews.go.com/International/wireStory/russia-points-finger-uk-us-agencies-poisoning-54224593?cid=clicksource_76_4_article%20roll_articleroll_hed">http://abcnews.go.com/International/wireStory/russia-points-finger-uk-us-agencies-poisoning-54224593?cid=clicksource_76_4_article%20roll_articleroll_hed</a>
<b>GIST</b>	<p>An international chemical weapons watchdog rebuffed Russia's request Wednesday to join Britain's investigation of the nerve-agent poisonings of an ex-spy and his daughter in England. Undeterred, Moscow next plans to take its denials of involvement to the U.N. Security Council.</p> <p>Britain said Russia's proposal for a joint investigation received only six votes at a special session of the executive council of the Organization for the Prohibition of Chemical Weapons. The council has representatives from 41 countries.</p> <p>Russia requested the Wednesday session in The Hague, Netherlands, to push its repeated rejection of Britain's allegation that Moscow was behind the March 4 poisonings of Sergei Skripal and his daughter, Yulia. The British government has invited experts from OPCW to help identify the substance that sickened the Skripals.</p> <p>"The purpose of Russia's ludicrous proposal at The Hague was clear — to undermine the independent, impartial work of the international chemical weapons watchdog," British Foreign Secretary Boris Johnson said in a statement.</p> <p>Seeking a different international stage, Russia's U.N. ambassador called for an open meeting of the U.N. Security Council Thursday on the case that has chilled relations between Moscow and the West. Ambassador Vassily Nebenzia made the request at the end of his speech Wednesday to a council meeting on chemical weapons in Syria.</p>

	Nebenzia said Russia requested the council meeting because it shares the principle that the use of chemical weapons anywhere "is not acceptable and must be investigated and perpetrators punished, and that impunity is unacceptable."

<b>HEADLINE</b>	<b>04/04 Experts: NYC vulnerable moderate quake</b>
<b>SOURCE</b>	<a href="http://www.dailymail.co.uk/news/article-5577117/New-York-overdue-earthquake-destroy-6-000-buildings.html">http://www.dailymail.co.uk/news/article-5577117/New-York-overdue-earthquake-destroy-6-000-buildings.html</a>
<b>GIST</b>	<p>New York City could be hit with a \$39 billion in damage with 30 million tons of debris clogging the streets if a long-overdue earthquake hit.</p> <p>The city of 8.5 million people is not thought of as a tremor hot spot, but the five boroughs are riddled with fault lines that could bring dozens of buildings down.</p> <p>Because the city is so dense and littered with thousands of tall buildings, even a 5.0 magnitude earthquake nearby would cause such damage, experts fear.</p> <p>New York statistically gets a quake like that every 100 years and the last one was in 1884 - making it well overdue for another.</p> <p>The city also statistically gets a 6.0 about every 670 years, and a 7.0 about every 3,400 years, both of which would do massive damage.</p> <p>If a 7.0 magnitude quake hit, more than 6,000 older unreinforced masonry buildings would almost certainly crumble in a huge disaster.</p>

The biggest fault line runs down 125th Street all the way from New Jersey to the East River running past Central Park and into Roosevelt Island.

The Dyckman Street Fault runs from Inwood over to Morris Heights in the Bronx with the Mosholu Parkway Fault farther north.

The long East River Fault runs down the western side of Central Park before turning at 32nd Street and heading to the East River.

Some of these were big enough to alter the course of the Hudson River when the last Ice Age defrosted thousands of years ago.

They are complemented by dozens of others making up a 'brittle grid' under the streets of Manhattan and the other boroughs.

Nearby bigger faults in other states could also have their own earthquakes that could radiate shocks into New York through its faults.

The biggest danger is the thousands of older buildings not subject to stringent anti-earthquake codes from 1995 onwards.

Even a moderate quake would shake them enough to dislodge bricks and masonry, littering the streets and preventing emergency services from bringing help.

A 5.0 or higher could see many of those buildings come down like a house of cards, destroying homes and trapping people in the rubble.

<b>HEADLINE</b>	<b>04/04 More Americans avoiding the doctor</b>
<b>SOURCE</b>	<a href="https://www.marketwatch.com/story/why-americans-are-avoiding-the-doctor-2018-04-04">https://www.marketwatch.com/story/why-americans-are-avoiding-the-doctor-2018-04-04</a>
<b>GIST</b>	<p>Between a third and a half of people age 45 to 59 and a quarter of those 60+ went without needed health care in the past year due to its cost, according to a troubling new survey from the West Health Institute and NORC at the University of Chicago.</p> <p>“We were surprised by the magnitude of the findings,” said Dr. Zia Agha, chief medical officer at the West Health Institute, a nonprofit applied medical research organization based in San Diego. “And 80% of the people we surveyed had health insurance, so just having insurance does not make you immune to health care costs.”</p> <p>The researchers at West Health Institute and NORC at the University of Chicago (a nonpartisan research institution) interviewed 1,302 adults. Their findings were released at the American Society on Aging’s 2018 Aging in America conference in San Francisco.</p> <p><b>Age 45 to 59 skipping health care</b></p> <p>Specifically, the survey found these results for people age 45 to 59 (members of Generation X and boomers) as a result of health care costs:</p> <ul style="list-style-type: none"> <li>• 49% didn’t go to the doctor last year when they were sick or injured</li> <li>• 45% skipped a recommended medical test or treatment</li> <li>• 43% didn’t go to a dentist when they needed treatment</li> <li>• 40% went without a routine physical or other preventive health care</li> <li>• 30% didn’t fill a prescription or took less than the prescribed dose of medicine</li> </ul>

**Age 60+ skipping health care**

The percentages were less dramatic for people 60 + (boomers aged 60 to 72 and Americans older than 72) — perhaps partly because those 65 and older have Medicare. But they are still concerning:

- 30% didn't go to a dentist last year when they needed treatment
- 27% went without a routine physical or other preventive health care
- 25% didn't fill a prescription or took less than the prescribed dose of medicine
- 25% skipped a recommended medical test or treatment
- 24% didn't go to the doctor when they were sick or injured

Younger Americans were even more likely to go without health care due to costs last year, the survey found.

“The younger generations have lower savings, are less financially stable and are more likely to be not insured or underinsured,” said Agha. “As you get older, you understand the importance of health care more and you're more likely to seek care.”

**A problem that spans all ages**

But, Agha added, the survey's findings show that “this problem spans all ages. It's not an old person problem or a young person problem.”

Given how much boomers and Gen Xers realize the importance of taking care of their health and their greater financial wherewithal to do so, it's especially striking that so many are letting their health go.

But it's also understandable, given ever-rising health care costs.

In Kaiser Health Foundation polls, since 2015, a growing percentage of the public has said they've had a difficult time affording medical costs. Last year, 37% reported having trouble affording health insurance premiums, up from 27% in 2015; 43% had trouble affording deductibles, up from 34% and 31% had trouble affording copays for doctor visits and prescription drugs, up from 24%.

And the West Health Institute survey found that most Americans don't feel they're getting a good value for their health care dollars.

**The danger for older Americans' health**

Agha worries that forgoing medical appointments, treatments and prescriptions could lead to worsening health outcomes in the future.

“I can't tell you what will happen to these particular 1,300 people. But as a physician I know that one of the largest problems we face is the burden of chronic diseases like hypertension and diabetes. For those, early detection and intervention is where medical science can help the most,” he said. By letting such diseases go untreated or undertreated, Agha added, “those problems become much more magnified and can lead to heart disease, kidney failure and a risk for getting a stroke.”

Overall, 53% of survey respondents say they had at least one of the following situations due to health care costs in the past year: they depleted their savings; they racked up credit card debt; they had to decide between paying medical bills and basic necessities or they couldn't save any money.

**Lack of health cost transparency**

The survey also found that, overall, 54% of Americans say they received a medical bill in the past year that they thought was covered by insurance and 53% got one where the amount they owed was higher than expected.

Speaking at the American Society on Aging's 2018 Aging in America conference Monday, Agha attributed those findings, in part, to a lack of price transparency and a lack of health care competition.” He said: “Combine those two and most consumers don't have choices. We need to figure out how to let

	<p>choices flourish.”</p> <p>In my interview with Agha before the conference, he explained: “As a health care consumer, you have very little information about the cost of care and the choices you should be making that will impact costs. The transparency issue is a huge problem in driving the cost of health care up.”</p> <p>Health care prices are much easier to get and compare in many other countries, according to experts at the recent West Health Institute 2018 Healthcare Costs Innovation Summit in Washington, D.C., that Next Avenue reporter Holly Lawrence covered.</p> <p>“There are prices on walls in doctors’ offices in France. In Australia, people are entitled to binding estimates before they go in for elective surgery,” Dr. Elisabeth Rosenthal, editor in chief of Kaiser Health News, said at that summit.</p>

<b>HEADLINE</b>	<b>04/04 Silicon Valley grapples w/security</b>
<b>SOURCE</b>	<a href="https://www.bloomberg.com/news/articles/2018-04-04/silicon-valley-grapples-with-security-risks-after-youtube-shooting">https://www.bloomberg.com/news/articles/2018-04-04/silicon-valley-grapples-with-security-risks-after-youtube-shooting</a>
<b>GIST</b>	<p>A shooting outside the offices of YouTube on Tuesday prompted an outpouring of support from fellow technology workers, as well as a sense of dread over whether other corporate headquarters in Silicon Valley were vulnerable to similar attacks.</p> <p>YouTube’s campus in San Bruno, California, where three people were injured by gunfire, is laid out much like other tech offices nearby. It consists of a group of buildings within close proximity, spread across a suburban area. There’s outdoor seating and grassy pastures inviting colleagues to congregate. Visitors and employees can wander freely together in the vicinity, and security guards typically stay at desks inside the buildings.</p> <p>“Companies invest in security but purposefully keep physical security measures discreet because the vibe is casual and relaxed,” said Joe Sullivan, the former chief security officer at Uber Technologies Inc. and Facebook Inc. who’s now an independent consultant. “Leaders want to stay connected with their teams, generally choosing less visible security than you would see in traditional finance or media companies.”</p> <p>A woman -- identified by police as Nasim Aghdam -- shot and injured at least three people before killing herself. She was found at the scene and appeared to be dead of “a self-inflicted” gunshot wound, San Bruno Police Chief Ed Barberini said at a press conference Tuesday. No motive was given for the shooting.</p> <p>In an American age where shooting rampages have become increasingly common, openness can work against companies, said Jeff Harp, a retired agent at the U.S. Federal Bureau of Investigation in San Francisco who consults for technology companies. While employees are required to badge into buildings, access to many outdoor areas is generally accessible to all.</p> <p>The episode could prompt executives to tighten security, Harp said. “Companies are going to be asking themselves, ‘Maybe our guard services need to be where they pull into the parking lot.’</p> <p>The modern tech office park is modeled after a college campus. At Google and Facebook, employees walk or ride bikes between meetings. Executives take pride in showing off their architecture to the public. Facebook has a Frank Gehry-designed building with a garden roof where employees can walk along a half-mile track, and YouTube has a red slide connecting its second and third floors that can accommodate three people at a time. Alphabet Inc., YouTube’s parent company, is working on a giant terrarium-like campus spanning more than 60 acres.</p> <p>Visitors are tolerated and sometimes welcomed. Tourists regularly stop to pose for photos in front of the</p>

	<p>large thumbs-up sign in front of the Facebook campus or the Android statues at Google.</p> <p>Even as shootings have mushroomed across the U.S., gun violence at work is rare, especially in Silicon Valley. A decade ago, a man who was fired from Santa Clara, California, chipmaker SiPort killed three people, including the chief executive officer and a human resources manager.</p> <p>Harp, the security consultant, said companies watch every incident closely. "We always learn something you should be doing better."</p>

<b>HEADLINE</b>	<b>04/04 Migrant caravan in Mexico abandons plan</b>
<b>SOURCE</b>	<a href="https://www.afp.com/en/news/826/migrant-caravan-abandons-plan-travel-us-border-doc-13p1ry3">https://www.afp.com/en/news/826/migrant-caravan-abandons-plan-travel-us-border-doc-13p1ry3</a>
<b>GIST</b>	<p>A caravan of Central American migrants whose trek across Mexico infuriated President Donald Trump has decided not to travel to the US border, leaders said Tuesday.</p> <p>"We will wrap up our work in Mexico City," said Irineo Mujica, the head of the migrant advocacy group People Without Borders (Pueblo sin Fronteras).</p> <p>"We have support teams at the border if there are people who need assistance there, but they would have to travel on their own," he told AFP in the town of Matias Romero, in the southern Mexican state of Oaxaca.</p> <p>The just over 1,000 migrants who currently make up the caravan -- many traveling in families of up to 20 people -- have been camped in the southern town since the weekend, deciding their next move in the face of daily attacks from Trump.</p> <p>The Republican president vowed to send the US military to secure the border and threatened to axe the North American Free Trade Agreement (NAFTA) if Mexico did not stop the caravan.</p> <p>The caravan is in fact a yearly event whose goal is more to raise awareness about the plight of migrants than to reach the United States -- though some participants have traveled to the border in the past.</p> <p>Mujica said this year's caravan was so large it would have been dangerous to travel to the border by train-hopping.</p> <p>"There are too many children -- 450 in all. There are lots of babies. Hopping the train, as we did in the past, would have been crazy," he said.</p> <p>The caravan now plans to travel to the central city of Puebla for a conference, then on to Mexico City for a series of demonstrations -- and end its journey there.</p> <p>The group, mainly Hondurans, also includes Salvadorans, Guatemalans and Nicaraguans, mostly fleeing the brutal gang violence that has made Central America home to some of the highest murder rates in the world.</p> <p>Organizers say Mexican immigration authorities are working with the migrants to get them papers to stay in Mexico.</p>

<b>HEADLINE</b>	<b>04/04 Once a target, always a target</b>
<b>SOURCE</b>	<a href="https://www.zdnet.com/article/once-a-target-always-a-target-if-youre-hit-by-hackers-youre-likely-">https://www.zdnet.com/article/once-a-target-always-a-target-if-youre-hit-by-hackers-youre-likely-</a>

	<a href="#">to-be-hit-again/</a>
<b>GIST</b>	<p>If you're unlucky enough to fall victim to hackers, you're likely to fall victim to a similar cyber-attack or data breach in the months following the initial problem.</p> <p>According to the newly-released FireEye M-Trends annual report for 2018, 56 percent of organisations that were targets of a significant attack in the last year and a half were targeted a second time in that period. That figure is up from 38 percent in 2013.</p> <p>Almost half of those who fell victim to an additional attack (49 percent) were successfully attacked within the first 12 months following the initial incident and 86 percent of those who fell victim to additional 'significant' attacks were found to have more than one unique attacker active in their networks and systems.</p> <p>While falling victim to repeated attacks is a problem for organisations around the world, those in the Asia-Pacific region are far more likely to succumb to this threat: FireEye found that 91 percent of APAC organisations fell victim to another attack, compared with 44 percent of organisations in the Americas and 47 percent in Europe and the Middle East.</p> <p>One of the key reasons for breached organisations falling victim to additional attacks is that hacking groups are keen to finish the work they've started, even if they've been discovered in the network.</p> <p>"Attackers rarely randomly target organisations; once the reconnaissance has been conducted on a target the attacker will want to complete their attack. For nation-state actors, they will be tasked with gaining access or regaining access if it has been lost," Stuart McKenzie, VP of Mandiant at FireEye, told ZDNet.</p> <p>But the second attack isn't necessarily going to be anything to do with the original hackers -- it could be a separate attack by a different hacking group eager to take advantage of what they perceive to be a weak target.</p> <p>According to analysis in the report, organisations in the high-tech, communications and education sectors are viewed as the most valuable for attackers to attempt to breach, and could therefore have multiple groups within the network at any one time. That's especially the case if the organisation is known to have previously suffered a breach.</p> <p>"Unfortunately, if you've been breached, our statistics show that you are much more likely to be attacked and suffer another breach. If you have not taken steps to enhance your security posture, you are taking a significant risk," said the report.</p>

<b>HEADLINE</b>	<b>04/04 Cyberattack behind police car shortage</b>
<b>SOURCE</b>	<a href="http://www.fox5atlanta.com/news/apd-cruiser-shortage-may-be-due-to-cyberattack-on-city">http://www.fox5atlanta.com/news/apd-cruiser-shortage-may-be-due-to-cyberattack-on-city</a>
<b>GIST</b>	<p>ATLANTA - Police supervisors in Atlanta are scrambling to find vehicles to put officers in for service. A car shortage developed as a result of a slowdown at the city shop responsible for parts and repairs.</p> <p>What caused the slowdown is the hacking of computers at City Hall. The shop computers are still down. Workers there have to make other arrangements to secure the car parts.</p> <p>The problem got so bad in the Buckhead zone that some officers were put on a foot beat. Usually, that step is taken at holiday time to show presence around the shopping centers.</p> <p>The shrinking number of working cruisers is also acute in southeast Zone 3.</p> <p>The director of the police union in Atlanta said the situation has to be corrected very soon. Vince Champion said foot beats cannot be a replacement for squad cars positioned all over the city for the</p>

	<p>quickest response.</p> <p>However, Carlos Campos, a department spokesperson, said citizens can rely on the 911 dispatch system. He said the law enforcement work is getting done despite the City Hall hack.</p>

<b>HEADLINE</b>	<b>04/04 Atlanta continues cyberattack recovery</b>
<b>SOURCE</b>	<a href="http://www.govtech.com/security/Nearly-Two-Weeks-Post-Cyberattack-Atlanta-Continues-Its-Recovery.html">http://www.govtech.com/security/Nearly-Two-Weeks-Post-Cyberattack-Atlanta-Continues-Its-Recovery.html</a>
<b>GIST</b>	<p>Its major emergency response systems were unaffected by a ransomware cyberattack that shuttered many computers at city hall, but some areas of Atlanta municipal government are still recovering from the March 22 breach, which made national news.</p> <p>To date, officials have not publicly discussed the origin of the attack. And the FBI, U.S. Secret Service and Department of Homeland Security have all assisted the city's incident response team, as have units from Microsoft, Cisco and security solutions provider Secureworks.</p> <p>Service at Hartsfield-Jackson Atlanta International Airport, the nation's busiest airport, was never disrupted, Nikki Forman, press secretary in Mayor Keisha Lance Bottoms' office, said via email.</p> <p>The airport's Wi-Fi, which "was voluntarily disabled out of an abundance of precaution," Forman said, was restored on April 2 according to the airport's Twitter account.</p> <p>Similarly, "Atlanta Police Department's ability to respond to 911 calls and emergencies has not been impacted," the press secretary said.</p> <p>"We temporarily returned to handwritten incident reports but have begun using our incident report database, allowing officers to resume filing incident reports electronically. Additionally officers are able to take out arrest warrants and check for outstanding warrants," Forman said.</p> <p>"I want to be clear that for many services, telephone and paper options were always available and not simply the default due to the cyberattack," Forman added.</p> <p>City hall employees "have been instructed to turn on their computers," the press secretary said, declining comment on the extent to which computers and electronic archives remain affected "as this is an ongoing investigation." According to a news release, city hall computers and printers were first activated again on March 27, roughly five days after the attack.</p> <p>Forman also declined to discuss the attack's origin or type, whether officials have paid a ransom demand believed to be around \$50,000, and how the city's short-term cybersecurity posture has changed since the attack.</p> <p>Asked via email how the city would update or strengthen its longer-term cybersecurity position, Forman referred to the mayor's March 26 press conference. During that event, Bottoms indicated "everything" could be on the table, with respect to the city's restoration of its infrastructure.</p> <p>"I think what we see is that more work remains to be done with our digital infrastructure in the city of Atlanta. Certainly this has sped things up," said the mayor, who characterized the breach as "much bigger than a ransomware attack."</p> <p>"This is an attack on our government, which means it's an attack on all of us. We need to make sure we're doing all we need to do to keep secure," Bottoms added.</p> <p>Elsewhere across Atlanta's spectrum of city services, the city announced on March 30 that the Atlanta</p>

	<p>Municipal Court was still unable to process online or in-person ticket payments, and Failure to Appear walk-in Court “will not resume until systems are restored.”</p> <p>The city’s online business license payment and renewal platforms were also inaccessible as of March 30, as was the portal used to create an electronic version of a business license. Businesses were given until April 20 to pay for their business licenses without penalty.</p> <p>Online and telephone water and sewer bill payments were unavailable as of March 30, but its departments of Watershed Management and Finance were able to accept water and sewer bill, and business license payments in person at city hall. No late fees will be levied until all payment options and billing cycles are restored.</p> <p>New water meter sales, which had been interrupted, were resumed by cash payment. Similarly some Department of City Planning processes, including inspection assignments, could be “slower than normal,” but were fully operational the city said and employment applications had resumed at the Department of Human Resources.</p>

<b>HEADLINE</b>	<b>04/04 Gas pipeline network vulnerable</b>
<b>SOURCE</b>	<a href="https://www.nytimes.com/2018/04/04/business/energy-environment/pipeline-cyberattack.html">https://www.nytimes.com/2018/04/04/business/energy-environment/pipeline-cyberattack.html</a>
<b>GIST</b>	<p>HOUSTON — A cyberattack on a shared data network forced four of the nation’s natural-gas pipeline operators to temporarily shut down computer communications with their customers over the last week.</p> <p>No gas service was interrupted, the companies said, and the interruption of customer transactions was merely a precaution. It was unclear whether any customer data was stolen.</p> <p>The attack highlighted the potential vulnerability of the nation’s energy system, cyberexperts say. Beyond consumer and business data — energy companies possess much proprietary information about their holdings, trading strategies and exploration and production technologies — the increasing dependence of pipeline infrastructure on digital systems makes them a particularly ripe target. Control valves, pressure monitors and other equipment connected to wireless networks are vital to daily functions of everything from refineries to oil wells.</p> <p>With nearly 2.5 million miles of oil, gas and chemical pipelines crisscrossing the country, intrusions into control systems could do more than disrupt deliveries, said Andrew R. Lee, a cybersecurity expert at the law firm Jones Walker in New Orleans. The risks include “explosions, spills, or fires, which easily will threaten human life, property and the environment,” he said.</p> <p>Nothing close to that kind of disaster happened this time. But the pipeline industry leaders Oneok; Energy Transfer Partners; Boardwalk Pipeline Partners; and Eastern Shore Natural Gas, a Chesapeake Utilities subsidiary, all reported communications system interruptions.</p> <p>The attack’s target appears to have been Latitude Technologies, a Texas-based provider of electronic data-sharing between pipeline companies and their gas producer and utility customers. The company handles the critical computer communications of gas storage facilities, as well as sales contracts and shipment scheduling.</p> <p>Chris Bronk, a cybersecurity expert at the University of Houston, said such attacks on the gas marketing communications hub is a way to gather intelligence on the entire gas industry.</p> <p>“If I compromise their operations, I can see all the buyers and sellers,” he said. “If I can persistently be in their network I can issue fake transactions.” In that way, Mr. Bronk added, hackers could potentially jumble gas shipments, and even cause electricity production outages.</p>

Latitude Technologies, a unit of Energy Services Group, declined to discuss the disruption in detail. In a statement, it said, “We do not believe any customer data was compromised.”

The Department of Homeland Security was investigating the attack, and no suspect has been publicly identified. But the attack came shortly after the department and the F.B.I. issued a report alleging that Russia was taking aim at the electric grid and other critical infrastructure with cyber probes.

The House Committee on Science, Space and Technology released a staff report this month that described Russian efforts to influence American energy markets and energy policy through inflammatory posts on social media. The motivation for such efforts appeared to be the increase in exports of liquefied natural gas from the United States, a challenge to Russian dominance in European markets.

Cybercriminals, frequently suspected of working for foreign governments, have been increasingly active in the energy sector in recent years. Last fall, hackers penetrated safety systems of a petrochemical plant in Saudi Arabia, the latest in a spate of increasingly sophisticated attacks on the kingdom’s energy infrastructure. An attack on Ukraine’s grid in 2015 led to extensive blackouts.

American gas pipeline companies were targeted in 2012, although the damage was believed to have been limited. Employees of several pipeline companies have been targets of spear-phishing attacks — efforts to lure them to click on email attachments containing malicious code.

The Trump administration has announced that it is establishing an office within the Department of Energy to shore up cybersecurity for critical infrastructure like nuclear plants, refineries and pipelines.

<b>HEADLINE</b>	<b>04/04 Facebook: ‘malicious actors’ took data</b>
<b>SOURCE</b>	<a href="https://www.washingtonpost.com/news/the-switch/wp/2018/04/04/facebook-said-the-personal-data-of-most-its-2-billion-users-has-been-collected-and-shared-with-outsiders/?utm_term=.39b3c0ac1ac3">https://www.washingtonpost.com/news/the-switch/wp/2018/04/04/facebook-said-the-personal-data-of-most-its-2-billion-users-has-been-collected-and-shared-with-outsiders/?utm_term=.39b3c0ac1ac3</a>
<b>GIST</b>	<p>Facebook said Wednesday that “malicious actors” took advantage of search tools on its platform, making it possible for them to discover the identities and collect information on most of its 2 billion users worldwide.</p> <p>The revelation came amid rising acknowledgement by Facebook about its struggles to control the data it gathers on users. Among the announcements Wednesday was that Cambridge Analytica, a political consultancy hired by President Trump and other Republicans, had improperly gathered detailed Facebook information on 87 million people, of whom 71 million were Americans.</p> <p>But the abuse of Facebook’s search tools -- now disabled -- happened far more broadly and over the course of several years, with few Facebook users likely escaping the scam, company officials acknowledged.</p> <p>The scam started when malicious hackers harvested email addresses and phone numbers on the so-called “Dark Web,” where criminals post information stolen from data breaches over the years. Then the hackers used automated computer programs to feed the numbers and addresses into Facebook’s “search” box, allowing them to discover the full names of people affiliated with the phone numbers or addresses, along with whatever Facebook profile information they chose to make public, often including their profile photos and hometown.</p> <p>“We built this feature, and it’s very useful. There were a lot of people using it up until we shut it down today,” Chief Executive Mark Zuckerberg said in a call with reporters Wednesday.</p> <p>Facebook said in a blog post Wednesday, “Given the scale and sophistication of the activity we’ve seen, we believe most people on Facebook could have had their public profile scraped.”</p>

Facebook users could have blocked this search function, which was turned on by default, by tweaking their settings to restrict finding their identities by using phone numbers or email addresses. But research has consistently shown that users of online platforms rarely adjust default privacy settings and often fail to understand what information they are sharing.

Hackers also abused Facebook's account recovery function, by pretending to be legitimate users who had forgotten account details. Facebook's recovery system served up names, profile pictures and links to the public profiles themselves. This tool could also be blocked in privacy settings.

Names, phone numbers, email addresses and other personal information amount to critical starter kits for identity theft and other malicious online activity, experts on Internet crime say. The Facebook hack allowed bad actors to tie raw data to people's real identities and build fuller profiles of them.

Privacy experts had issued warnings that the phone number and email address lookup tool left Facebook users' data exposed.

Facebook didn't disclose who the malicious actors are, how the data might have been used, or exactly how many people were affected.

The revelations about the privacy mishaps come at a perilous time for Facebook, which since last month has wrestled with the fallout of how the data of tens of millions of Americans ended up in the hands of Cambridge Analytica. Those reports have spurred investigations in the United States and Europe and sent the company's stock price tumbling.

The news quickly reverberated on Capitol Hill, where lawmakers are set to grill Zuckerberg at a series of hearings next week.

"The more we learn, the clearer it is that this was an avalanche of privacy violations that strike at the core of one of our most precious American values – the right to privacy," said Sen. Ed Markey (D-Mass.), who serves on the Senate Commerce Committee, which has called on Zuckerberg to testify at a hearing next week.

Perhaps the most urgent question for Facebook is whether its practices ran afoul of a settlement it brokered with the Federal Trade Commission in 2011 in response to previous controversies over its handling of user data.

At the time, the FTC faulted Facebook for misrepresenting the privacy protections it afforded its users and required the company to maintain a comprehensive privacy policy and ask permission before sharing user data in new ways. Violating the terms could result in many millions of dollars of fines.

The FTC said last week that it would open a new investigation in light of the Cambridge Analytica news, and Wednesday's revelations are likely to complicate the legal situation, said David Vladeck, a former FTC director of consumer protection who oversaw the 2011 consent decree.

"This is a company that is, in my view, likely grossly out of compliance with the FTC consent decree," said Vladeck, now a Georgetown University Law professor. "I don't think that after these revelations they have any defense at all." He called the numbers "just staggering."

The data Cambridge Analytica obtained relied on different techniques and was more detailed and extensive than what the hackers collected using Facebook's search functions. The Cambridge Analytica data set included user names, hometowns, work and educational histories, religious affiliations and Facebook "likes" of users and their friends, among other data. Other users affected were in countries including the Philippines, Indonesia, U.K., Canada and Mexico.

Facebook said it banned Cambridge Analytica last month because the data firm improperly obtained profile information.

Personal data on users and their Facebook friends was easily and widely available to developers of apps before 2015.

Facebook in March declined to say how much user data went to Cambridge Analytica, saying only that 270,000 people had responded to a survey app created by the researcher in 2014. The researcher was able to gather information on the friends of the respondents without their permission, vastly expanding the scope of his data. That researcher then passed the information on to Cambridge Analytica.

Facebook declined to say at the time how many other users may have had their data collected in the process. A Cambridge Analytica whistleblower, former researcher Christopher Wylie, said last month the real number of affected people was at least 50 million.

Wylie tweeted on Wednesday afternoon that Cambridge Analytica could have obtained even more than 87 million profiles. “Could be more tbh,” he wrote, using an abbreviation for “to be honest.”

Cambridge Analytica on Wednesday responded to Facebook’s announcement by saying that it had licensed data on 30 million users, and deleted it upon Facebook’s request. It has denied any wrongdoing in collecting or using Facebook data.

Cambridge Analytica was funded by a multimillion-dollar investment by hedge-fund billionaire Robert Mercer and headed by his daughter, Rebekah Mercer, who was the company’s president, according to documents provided by Wylie. Serving as vice president was conservative strategist Stephen K. Bannon, who also was the head of Breitbart News. He has since left both jobs and also his post as top White House adviser to Trump.

With its moves over the past week, Facebook is embarking on a major shift in its relationship with third-party app developers that have used Facebook’s vast network to expand their businesses. What was largely an automated process will now involve developers agreeing to “strict requirements,” the company said in its blog post Wednesday. The 2015 policy change curtailed developers’ abilities to access data about people’s friends networks but left open many loopholes that the company tightened on Wednesday.

“This latest revelation is extremely troubling and shows that Facebook still has a lot of work to do to determine how big this breach actually is,” said Rep. Frank Pallone Jr. (D-N.J.), the top Democrat on the House Energy and Commerce Committee, which will hear from Zuckerberg next Wednesday.

“I’m deeply concerned that Facebook only addresses concerns on its platform when it becomes a public crisis, and that is simply not the way you run a company that is used by over 2 billion people,” he said.

Facebook announced plans on Wednesday to add new restrictions to how app developers, data brokers and other third parties can gain access to this data, the latest steps in a years-long process to improve its damaged reputation as a steward of the personal privacy of its users.

Developers who in the past could get access to people’s relationship status, calendar events, private Facebook posts, and much more data, will now be cut off from access or be required to endure a much stricter process for obtaining the information, Facebook said.

Until Wednesday, apps that let people input a Facebook event into their calendar could also automatically import lists of all the people who attended that event, Facebook said. Administrators of private groups, some of which have tens of thousands of members, could also let apps scrape the Facebook posts and profiles of members of that group. App developers who want this access will now have to prove their activities benefit the group. Facebook will now need to approve tools that businesses use to operate Facebook pages. A business that uses an app to help it respond quickly to customer messages, for example, will not be able to do so automatically. Developers’ access to Instagram will also be severely restricted.

	Facebook is now banning apps from accessing users' information about their religious or political views, relationship status, education, work history, fitness activity, book reading habits, music listening and news reading activity, video watching and games. Data brokers and businesses collect this type of information to build profiles of their customers' tastes.

<b>HEADLINE</b>	<b>04/04 Cyber security: keeping safe, up to date</b>
<b>SOURCE</b>	<a href="https://www.hackread.com/cyber-security-developments-keeping-safe-up-to-date/">https://www.hackread.com/cyber-security-developments-keeping-safe-up-to-date/</a>
<b>GIST</b>	<p>Cyber security is the backbone any online businesses – Here are some quick tips to keep yourself informed about the latest threats surrounding your business.</p> <p>Within a standard nine to five working day, it's said that there are <a href="#">almost two million data records lost or stolen</a>. Cybercrime has become something of an epidemic in recent years – and it's no exaggeration to say that everyone is at risk.</p> <p>Hackers operate in an increasingly complex way and are happy to target small businesses and individuals, who are most likely to be <a href="#">vulnerable to attack</a>. The nature of the threat changes as technology advances and so the only way to stay safe is to stay up to date.</p> <p>But that's easier said than done, right? How do you keep up to date with the <a href="#">latest cybersecurity developments</a>?</p> <p><b>Follow the news</b></p> <p>When it comes to cyber security, ignorance is not bliss – it's a recipe for disaster. It's imperative that you identify and follow <a href="#">a news feed</a> that you can trust. By doing so, you can keep on top of any fresh threats that have emerged, learn lessons from other cyber attacks and pick up the latest tips and advice from influencers and experts in this field.</p> <p>News from this sector really shouldn't be seen as the preserve of <a href="#">IT specialists</a> – the scale and nature of the threat suggest that this should be of interest to everyone. There's a burgeoning band of podcasts available on the subject for people who prefer to digest content in this way too.</p> <p><b>Bring up the 'security question'</b></p> <p>If you think that installing an <a href="#">anti-virus program</a> is enough, then you're mistaken. Don't just presume that you're safe because you have this because this is merely the first line of defense to root out attacks. By adopting a safety first mindset you can ensure that the way you handle your data is less risky.</p> <p>Whether it's securing your Wi-Fi network at home, managing and updating your passwords on a regular basis or the way you collect, collate and analyze data through <a href="#">the point of sale software</a> at work, continually ask yourself 'is this safe?' Just as ignorance isn't bliss, complacency could prove your undoing. Place 'security' high on the list of credentials to consider when buying new software or hardware, don't just go for the cheapest option.</p> <p><b>Training</b></p> <p>Even the experts are constantly having to refresh their understanding of the threat posed by cyber attacks. It pays to search out training opportunities, especially if you're a business. You are, after all, only as safe as the people operating your software and systems and you don't want to put the security of your business in the hands of someone who is unsure about what they are doing. Individuals and businesses alike can find <a href="#">free learning materials on Cybrary</a> to help plug any knowledge gaps they have.</p> <p><b>It's good to talk</b></p> <p>Cyber attacks are incredibly common – but people don't often enough talk about their experiences. Perhaps you're afraid or embarrassed to have been caught out? There's no need to be. In fact, talking with friends and colleagues could really help you to stay safe. Pass on tips about new apps, good software, neat</p>

	<p>tips and tricks and any new cyber attack tactics you have come across and you can help to do your own bit to combat the criminals.</p> <p>By keeping up to speed with <a href="#">security news</a>, refreshing your training, sharing tips and tricks and adopting a safety first attitude you'll give yourself the best possible chance of staying on top of cyber security developments and, best of all, safe.</p>
<p><a href="#">Return to Top</a></p>	

<b>HEADLINE</b>	<b>04/04 Claim: 20,000 new software flaws 2017</b>
<b>SOURCE</b>	<a href="https://www.infosecurity-magazine.com/news/flexera-20000-new-software-flaws/">https://www.infosecurity-magazine.com/news/flexera-20000-new-software-flaws/</a>
<b>GIST</b>	<p>The number of new software vulnerabilities discovered by Flexera in 2017 reached nearly 20,000 – an all-time high.</p> <p>The firm's Secunia Research division monitors more than 55,000 applications, appliances and operating systems to gain valuable insight into the level of potential risk organizations are exposing themselves to.</p> <p>Its Vulnerability Review 2018 revealed an increase in software flaws of 14% – up from 17,147 in 2016 to 19,954 last year. Some 17% were rated as “highly critical,” although this figure was largely unchanged from the previous year.</p> <p>As per the previous year, the primary attack vector used to trigger a vulnerability was via a remote network (55%), followed by a local network (32%).</p> <p>The good news for firms is that avoiding attacks which exploit these vulnerabilities is possible, as patches were available for 86% on the day of disclosure. In fact, zero-day threats are increasingly rare: just 14 of the 19,954 known vulnerabilities in 2017 were zero-days, a 40% decrease from 2016.</p> <p>However, organizations are not making the most of available intelligence on vulnerabilities, which would help them prioritize which ones to patch, the report claimed.</p> <p>In addition, deficiencies in operational processes can create major disruptions when big breaches hit the headlines.</p> <p>“There's no question based on this year's results, the risks remain high,” said Kasper Lindgaard, director of research and security at Flexera. “As the potential for breaches expands, the pressure is on executives to increase vigilance through better operational processes – instead of reacting to risks that hit media headlines and cause disruption. The Equifax breach and WannaCry attacks taught us that.”</p> <p>He added that the gap between identifying and fixing vulnerable applications must close.</p>
<p><a href="#">Return to Top</a></p>	

<b>HEADLINE</b>	<b>04/04 EMEA attack dwell time hits 175days</b>
<b>SOURCE</b>	<a href="https://www.infosecurity-magazine.com/news/emea-dwell-time-hits-175-days/">https://www.infosecurity-magazine.com/news/emea-dwell-time-hits-175-days/</a>
<b>GIST</b>	<p>EMEA organizations take around 2.5 months longer to spot hackers inside their networks than the global average, but are getting better at discovering breaches internally, according to FireEye.</p> <p>The security vendor's annual M-Trends report put the global median dwell time at 101 days, growing to 175 days for EMEA, but standing at just 75.5 days in the Americas.</p> <p>Dwell time is important as the longer an adversary is inside an organization's network, the more information they could lift, the deeper into private systems they could penetrate and the more expensive the eventual clean-up and remediation may be.</p>

	<p>On the plus side, global organizations are getting better at finding the attackers themselves, rather than being notified by law enforcement or another party.</p> <p>Globally the median dwell time for internally discovered incidents was 57.5 days, dropping to 42.5 days in the Americas and just 24.5 days in EMEA.</p> <p>Stuart McKenzie, vice-president of Mandiant at FireEye, claimed the growth in EMEA median dwell time of 40% from the previous year was disappointing, especially given the imminent arrival of the General Data Protection Regulation (GDPR), which mandates that organizations get better at spotting and preventing breaches.</p>
<a href="#">Return to Top</a>	

<b>HEADLINE</b>	<b>04/04 UK businesses open to IoT attacks</b>
<b>SOURCE</b>	<a href="https://www.infosecurity-magazine.com/news/27m-uk-businesses-wide-open-iot/">https://www.infosecurity-magazine.com/news/27m-uk-businesses-wide-open-iot/</a>
<b>GIST</b>	<p>About 2.7 million businesses in the UK are leaving themselves vulnerable to internet of things (IoT) hacks.</p> <p>ForeScout worked with CensusWide to conduct an independent survey of 500 CIOs and IT decisionmakers to see how prepared they are for IoT cybersecurity and the results were concerning: 47% admitted to not updating default passwords on all IoT devices when they are added to corporate networks; 15% admitted to not keeping security patches up to date.</p> <p>With 5.7 million registered businesses in the UK, that means nearly 2.7 million are still leaving obvious vulnerabilities in the system for bad actors to exploit.</p> <p>Making matters worse, UK businesses have a blind spot when it comes to the number of devices connected to their network. Only 54% of respondents had total confidence that they have full visibility and can identify every device on their network.</p> <p>The visibility challenge for business is only set to increase, with 40% of respondents stating that they are planning to increase their operational technology (OT) spend on connected devices. However, 72% IT managers are concerned about the security implications of adding additional OT devices to their company's network.</p> <p>“The convergence between IT and OT is where businesses are looking to drive some major efficiency gains in 2018, but it makes the challenge of knowing exactly what devices are on your network that much harder,” explained Myles Bray, vice president of EMEA at ForeScout.</p> <p>“IoT has expanded the attack surface considerably for all firms, and without basic security hygiene it is easy for bad actors to gain a foothold and then move laterally on a network to reach high-value assets and cause business disruption. With GDPR just around the corner businesses need to act now.”</p>
<a href="#">Return to Top</a>	

<b>HEADLINE</b>	<b>04/04 Breaches increasingly found internally</b>
<b>SOURCE</b>	<a href="https://www.securityweek.com/breaches-increasingly-discovered-internally-mandiant">https://www.securityweek.com/breaches-increasingly-discovered-internally-mandiant</a>
<b>GIST</b>	<p>Organizations are getting increasingly better at discovering data breaches on their own, with more than 60% of intrusions in 2017 detected internally, according to FireEye-owned Mandiant.</p> <p>The company’s M-Trends report for 2018 shows that the global median time for internal detection dropped to 57.5 days in 2017, compared to 80 days in the previous year. Of the total number of breaches investigated by Mandiant last year, 62% were discovered internally, up from 53% in 2016.</p> <p>On the other hand, it still took roughly the same amount of time for organizations to learn that their</p>

systems had been compromised. The global median dwell time in 2017 – the median time from the first evidence of a hack to detection – was 101 days, compared to 99 days in 2016.

Companies in the Americas had the shortest median dwell time (75.5 days), while organizations in the APAC region had the longest dwell time (nearly 500 days).

Data collected by Mandiant in 2013 showed that more than one-third of organizations had been attacked again after the initial incident had been remediated. More recent data, specifically from the past 19 months, showed that 56% of Mandiant customers were targeted again by either the same group or one with similar motivation.

In cases where investigators discovered at least one type of significant activity (e.g. compromised accounts, data theft, lateral movement), the targeted organization was successfully attacked again within one year. Organizations that experienced more than one type of significant activity were attacked by more than one threat actor.

Again, the highest percentage of companies attacked multiple times and by multiple threat groups was in the APAC region – more than double compared to the Americas and the EMEA region.

When it comes to the most targeted industries, companies in the financial and high-tech sectors recorded the highest number of significant attacks, while the high-tech, telecommunications and education sectors were hit by the highest number of different hacker groups.

Last year, FireEye assigned names to four state-sponsored threat groups, including the Vietnam-linked APT32 (OceanLotus), and the Iran-linked APT33, APT34 (OilRig), and APT35 (NewsBeef, Newscaster and Charming Kitten).

<b>HEADLINE</b>	<b>04/04 NKorea hackers behind online casino attack</b>
<b>SOURCE</b>	<a href="https://www.securityweek.com/north-korean-hackers-behind-online-casino-attack-report">https://www.securityweek.com/north-korean-hackers-behind-online-casino-attack-report</a>
<b>GIST</b>	<p>The infamous North Korean hacking group known as Lazarus is responsible for attacking an online casino in Central America, along with various other targets, ESET says.</p> <p>The Lazarus Group has been active since at least 2009 and is said to be associated with a large number of major cyber-attacks, including the \$81 million cyber heist from Bangladesh's account at the New York Federal Reserve Bank.</p> <p>Said to be the most serious threat against banks, the group has shown increased interest in cryptocurrencies and has recently updated its arsenal of tools.</p> <p>ESET now reports that an attack on an online casino in Central America and assaults on various other targets last year are the doings of this group. The attackers used a similar toolset in all incidents, including the KillDisk wiping tool.</p> <p>Also referred to as Hidden Cobra, the Lazarus Group is said to be backed by the North Korean government. The hackers use a broad range of custom tools, but also leverage various projects that are either available from GitHub or provided commercially.</p> <p>In the attack against an online casino in Central America, the hackers used various tools alongside the destructive KillDisk disk-wiper. Almost all of the malicious tools were designed to run as a Windows service and require administrator privileges for that, meaning that the attackers expected such privileges, ESET points out.</p> <p>Detected as NukeSped, one of the tools is a TCP backdoor. The malware dynamically resolves the</p>

	required DLL names during initial execution, and also constructs dynamically the procedure names of Windows APIs. The backdoor listens to a specific port that it ensures is not blocked by the firewall.

<b>HEADLINE</b>	<b>04/04 Cryptomix ransomware gets face lift</b>
<b>SOURCE</b>	<a href="https://www.scmagazine.com/cryptomix-ransomware-receives-face-lift/article/756120/">https://www.scmagazine.com/cryptomix-ransomware-receives-face-lift/article/756120/</a>
<b>GIST</b>	<p>The malicious actors behind Cryptomix ransomware have pushed out a new variant, with the primary change being the inclusion of a new extension and minor alterations to the contact info and ransom note.</p> <p>Bleeping Computer, with a hat tip to MalwareHunterTeam for making the initial discovery, noted the new variant attaches a .MOLE66 extension to all encrypted files, however the encryption methodology remains the same. There is also no known decryptor at this time so victims must either pay the ransom or use their backup files to restore the impacted system.</p> <p>There is also a new email address, alpha2018a@aol.com, that the victim can use to contact the attacker and pay the ransom, and the note itself is now labeled _HELP_INSTRUCTIONS_.TXT and appears as a notepad document.</p> <p>The people behind this ransomware campaign appear intent on keeping their malware fresh, as two month ago they rolled out a similar update changing the extension and contact emails.</p>

<b>HEADLINE</b>	<b>04/04 DHS: unauthorized foreign Stingrays D.C.</b>
<b>SOURCE</b>	<a href="https://www.scmagazine.com/dhs-acknowledged-the-use-of-foreign-cell-site-simulators-in-near-capital/article/756273/">https://www.scmagazine.com/dhs-acknowledged-the-use-of-foreign-cell-site-simulators-in-near-capital/article/756273/</a>
<b>GIST</b>	<p>The United States government for the first time publicly acknowledged the existence of what appear to be stingray devices used by a foreign intelligence service in the U.S. capital region.</p> <p>U.S. Senator Ron Wyden wrote a letter to the Department of Homeland Security in November 2017 requesting information about the use of unauthorized foreign cell-site simulators, aka stingrays, in the area.</p> <p>On March 26, 2018, Christopher C. Krebs, DHS Senior Official Performing the Duties of the Under Secretary, responded acknowledging that the agency had “observed anomalous activity in the National Capital Region (NCR) that appears to be consistent with International Mobile Subscriber Identity (IMSI) catchers.”</p> <p>The DHS went on to say the agency has not validated or attributed the activity to any specific entities or devices and that the information was reported to unnamed “federal partners” at the time it was observed.</p> <p>When questioned on whether or not the DHS has the technical capability to detect foreign stingray devices, Krebs told Sen. Wyden that the DHS doesn't have the capability and would require additional funding to obtain such capability.</p> <p>An anonymous DHS official told the Associated Press the unauthorized stingray activity was detected during a 90-day trial beginning in January 2017 with equipment from ESD America, a Las Vegas-based DHS contractor.</p> <p>This isn't the first time legislators have raised concerns about the use of stingray devices near the capital. In 2014 researchers conducted public sweeps that found suspected unauthorized devices near the White House, the Supreme Court, the Commerce Department and the Pentagon and other high profile buildings.</p> <p>Krebs also said that the DHS is aware of rogue stingray activity outside the NCR and that the agency also</p>

	<p>doesn't have the technical capabilities to detect 4G/LTE IMSI catchers which are currently being openly advertised by surveillance technology companies.</p> <p>“To support such a capability, DHS would require funding to procure, deploy, operate and maintain the capability, which includes the costs of hardware, software, and labor,” even though malicious use of the devices may threaten U.S. national and economic security, Krebs said.</p>

<b>HEADLINE</b>	<b>04/04 Rarog cryptominer flies under the radar</b>
<b>SOURCE</b>	<a href="https://www.scmagazine.com/named-after-a-slavic-mythology-fire-demon-the-malware-is-primarily-used-to-mine-monero-but-has-other-capabilities-as-well/article/756298/">https://www.scmagazine.com/named-after-a-slavic-mythology-fire-demon-the-malware-is-primarily-used-to-mine-monero-but-has-other-capabilities-as-well/article/756298/</a>
<b>GIST</b>	<p>A relatively unknown cryptomining malware dubbed “Rarog” is giving cybercriminals an affordable way for entry level players to enter the field.</p> <p>Named after a Slavic mythological fire demon, the malware is primarily used to mine Monero, but also has the capability to mine other currencies. To accomplish these tasks it employs several botnet techniques, such as, downloading and executing other malware, levying DDoS attacks against others, and being able to auto update itself, according to an April 4, 2018 blog post.</p> <p>Rarog also provides mining statistics to users, configures various processor loads for the running the miner, has the ability to infect USB devices, and can load additional DLLs onto a victim.</p> <p>The malware was first noticed on different Russian-speaking criminal underground forums in June 2017 and is sold for 6,000 Rubles, or roughly \$104 at today's exchange rate.</p> <p>Researchers identified 2,500 unique Rarog samples, connecting to 161 different command and control (C2) servers and confirmed over 166,000 Rarog-related infections worldwide, the majority of which were in the Philippines, Russia, and Indonesia.</p> <p>The malware also offers a guest administration panel to allow potential buyers the chance to “test drive” the malware by interacting with its interface.</p> <p>Researchers linked the malware to the twitter handles “arsenkoo135” and “foxovsky” and tied one of the handles to a Github repository that hosts various other malware families. Researchers said the evidence point to these two handles as the individuals behind the threat.</p>

<b>HEADLINE</b>	<b>04/04 Flaw leaves Cisco switches vulnerable</b>
<b>SOURCE</b>	<a href="https://thehackernews.com/2018/04/cisco-switches-hacking.html">https://thehackernews.com/2018/04/cisco-switches-hacking.html</a>
<b>GIST</b>	<p>Security researchers at Embedi have disclosed a critical vulnerability in Cisco IOS Software and Cisco IOS XE Software that could allow an unauthenticated, remote attacker to execute arbitrary code, take full control over the vulnerable network equipment and intercept traffic.</p> <p>The stack-based buffer overflow vulnerability (CVE-2018-0171) resides due to improper validation of packet data in Smart Install Client, a plug-and-play configuration and image-management feature that helps administrators to deploy (client) network switches easily.</p> <p>Embedi has published technical details and Proof-of-Concept (PoC) code after Cisco today released patch updates to address this remote code execution vulnerability, which has been given a base Common Vulnerability Scoring System (CVSS) score of 9.8 (critical).</p> <p>Researchers found a total of 8.5 million devices with the vulnerable port open on the Internet, leaving</p>

approximately 250,000 unpatched devices open to hackers.

To exploit this vulnerability, an attacker needs to send a crafted Smart Install message to an affected device on TCP port 4786, which is opened by default.

"To be more precise, the buffer overflow takes place in the function `smi_ibc_handle_ibd_init_discovery_msg`" and "because the size of the data copied to a fixed-size buffer is not checked, the size and data are taken directly from the network packet and are controlled by an attacker," Cisco explain in its advisory.

The vulnerability can also result in a denial-of-service condition (watchdog crash) by triggering indefinite loop on the affected devices.

Researchers demonstrated the vulnerability at a conference in Hong Kong after reporting it to Cisco in May 2017.

The vulnerability was tested on Catalyst 4500 Supervisor Engines, Cisco Catalyst 3850 Series Switches, and Cisco Catalyst 2960 Series Switches devices, as well as all devices that fall into the Smart Install Client type are potentially vulnerable, including:

- Catalyst 4500 Supervisor Engines
- Catalyst 3850 Series
- Catalyst 3750 Series
- Catalyst 3650 Series
- Catalyst 3560 Series
- Catalyst 2960 Series
- Catalyst 2975 Series
- IE 2000

<b>HEADLINE</b>	<b>04/04 Iran as 'new China' hacking threat</b>
<b>SOURCE</b>	<a href="http://www.darkreading.com/perimeter/iran-the-new-china-as-a-pervasive-nation-state-hacking-threat/d/d-id/1331450">http://www.darkreading.com/perimeter/iran-the-new-china-as-a-pervasive-nation-state-hacking-threat/d/d-id/1331450</a>
<b>GIST</b>	<p>Of the four new advanced persistent threat (APT) groups christened by FireEye last year, three were out of Iran.</p> <p>Mandiant, the incident response services arm of FireEye, witnessed a major increase in nation-state hacking activity by Iranian attackers in 2017, especially on the cyber espionage side of things. Iranian groups now are maintaining and keeping a foothold in victim organizations for months and sometimes years, demonstrating their sophistication, according to Mandiant's newly published M Trends Report on its incident investigations in 2017.</p> <p>"In a way, it felt like Iran was the new China," notes Charles Carmakal, a vice president at Mandiant. "There were so many Chinese threat actors in operations [in previous years], it felt like everyone had at least one Chinese actor" attacking them, he notes.</p>

This time, it was Iran, which was one of the most prolific and pervasive nation states last year, he says. "In 2017, it felt like Iran was all over the place."

Security researchers and incident responders from various organizations have been well aware of Iran's increasing sophistication and expansion of its cyber operations. It's come a long way from its unsophisticated yet effective distributed-denial-of-service (DDoS) hacktivist-style attack MO that came to a head in late 2011 through 2013, when a DDoS campaign crippled US bank networks. The DDoS campaign hit a crescendo in September of 2012, in some cases reaching 140-gigabits-per-second of unwanted data traffic to the banks' networks, resulting in hundreds of thousands of banking customers unable to access their bank accounts online. The attacks cost victims tens of millions of dollars.

"When I first started tracking Iran groups in 2012, it felt like we were dealing with a bunch of amateurs with no real technical capability. They could have been confused with Anonymous ... their weapon of choice was DDoS," Carmakal says. "Today, they've figured out how to organize, fund, and develop tools and are very successful in their offensive operations."

Adam Meyers, vice president of intelligence at CrowdStrike, says it's not so much that Iran is employing more sophisticated cyberattack weapons: they are just more savvy in how they employ them. "It's the sophistication around their tradecraft, methodologies, and operations," he says. "Their weapons are not that much more advanced. It's the way they use them [now]."

Iranian attackers in 2012 deployed the data-destruction Shamoan attacks on two Middle East targets including Saudi Aramco, which was the first signs of a more aggressive and evolving Iranian threat, he says. Today, the geopolitical cloud of questions over whether the US will continue the Iranian nuclear deal or reinstitute sanctions against Iran could ultimately elicit more destructive attacks against US financial organizations if things don't go Iran's way. "If they want to hurt us, they want to go after financial" institutions, Meyers says.

Mandiant now considers Iran nation-state groups on par with other nation-states in terms of the pace and scale of their attacks, including employing Web server attacks that gather multiple victims. "Rather than relying on publicly available malware and utilities, they develop and deploy custom malware. When they are not carrying out destructive attacks against their targets, they are conducting espionage and stealing data like professionals," according to the M Trends Report.

Carmakal says it's known that some Iranian groups have access to Western organizations, so the US could be next in line as a target of a destructive-type attack from Iran.

That's something that Tom Kellermann, chief cybersecurity officer at Carbon Black, is predicting to occur in the wake of the Trump administration's tough rhetoric and possible policy changes against Iran. "Iran and North Korea never had true A teams," he says, but Iran's operations have evolved and could well be turned on US targets in the near-term.

Iran's destructive bent is where it's very different from Chinese APTs, which typically focus on cyber espionage and stealing intellectual property.

Mandiant investigated a security incident targeting an energy company early last year that illustrated Iran's more strategic cyber espionage capabilities. APT35 – aka Newscaster and newly added to Mandiant's list of APT groups – was the culprit. APT35 typically gathers intel from US and Middle Eastern military, as well as diplomatic, government, media, energy, defense industrial base, engineering, business services, and telecommunications sector targets.

In the energy company attack, APT35 infected the target via a spear phishing email with a link to a phony resume that was hosted on a compromised, but legitimate website. The resume was infected with the PUPYRAT backdoor, and the attackers dropped a custom backdoor called BROKEYOLK onto the compromised system that allowed the attackers to use the victim's VPN credentials to log into their

	<p>company systems. In all, APT35 stole credentials from 500 systems in the victim's network.</p> <p>That was all APT35 needed to read emails and steal data on Middle East organizations that they later targeted in data-destruction attacks, according to Mandiant.</p> <p>"Like Chinese [APTs], they stole gigabytes of data," Carmakal says. It wasn't clear why they stole some of the information, however, he says.</p> <p>In addition to APT35, Mandiant also named two other Iranian threat groups officially last year, APT33 and APT34, plus one out of Vietnam, APT32 aka Ocean Lotus.</p>

<b>HEADLINE</b>	<b>04/04 White House emails poorly protected</b>
<b>SOURCE</b>	<a href="http://www.darkreading.com/endpoint/authentication/report-white-house-email-domains-poorly-protected-from-fraud/d/d-id/1331454">http://www.darkreading.com/endpoint/authentication/report-white-house-email-domains-poorly-protected-from-fraud/d/d-id/1331454</a>
<b>GIST</b>	<p>If you want to stop email-based phishing, the Domain Message Authentication Reporting &amp; Conformance (DMARC) protocol is a recognized tool for the job. According to DMARC.org it's a tool being used by nearly 200,000 organizations to secure their email. But according to a report from the Global Cyber Alliance, it's a tool that's not being used very effectively by the White House.</p> <p>The Alliance surveyed the domains under the control of the Executive Office of the President (EOP) and found that only one - Max.gov - has implemented the protocol at the highest level, which protects most completely against delivery of spoofed email. Seven other domains, including whitehouse.gov and eop.gov have implemented the protocol at the lowest level, which includes only monitoring.</p> <p>The other 18 domains under the office's control have not implemented any level of DMARC at all. This could be important for those in government and the general public because these government domains are frequent choices for spoofed addresses in phishing campaigns.</p> <p>Last year, the US Department of Homeland Security mandated that all federal agencies implement DMARC. The Global Cyber Alliance report indicates that not all agencies have embraced the mandate. The private sector has not fully embraced DMARC, either: A recent survey by Agari Data shows that only 8% of businesses have implemented the protocol.</p>

<b>HEADLINE</b>	<b>04/04 Misconfigured clouds compromised</b>
<b>SOURCE</b>	<a href="http://www.darkreading.com/cloud/misconfigured-clouds-compromise-424--more-records-in-2017/d/d-id/1331457">http://www.darkreading.com/cloud/misconfigured-clouds-compromise-424--more-records-in-2017/d/d-id/1331457</a>
<b>GIST</b>	<p>Insider mistakes like networked backup incidents and misconfigured cloud servers caused nearly 70% of all compromised records in 2017, according to new data from IBM X-Force. These types of incidents affected 424% more records last year than the year prior, they report.</p> <p>It wasn't all bad news from the IBM X-Force Threat Intelligence Index, which pulls insights on data from millions of endpoints across hundreds of countries. Researchers found 2.9 billion records were reported breached, nearly 25% less than the 4B reported in 2016. Frequently targeted industries saw a decline in attacks (18%) and security incidents (22%) since 2016, a drop that can be primarily attributed to a decline in Shellshock attacks throughout 2017.</p> <p>Hackers aren't slowing down but they are changing their strategies, researchers say, swapping data breaches for ransomware. Instead of compromising large amounts of data, they decided it was more lucrative to lock down data access and demand ransom in return.</p>

"Attackers are pretty much following the money," says Paul Griswold, director of strategy and product management at IBM X-Force. The shift to ransomware "wasn't super surprising," he says, since ransomware can be more profitable than stealing data. This idea extends to attacks like WannaCry and NotPetya, where the goal was seemingly destruction, not financial gain.

"Chances are, those guys were being paid by somebody," says Griswold of these attacks. While they didn't profit from the ransomware directly, he anticipates the threat actors didn't launch global ransomware campaigns "just for fun." They still earned money for the attacks.

The most common class of attack vector between 2016-2017 was injection attacks, which accounted for 79% of malicious activity on enterprise networks - nearly double what it was last year. Researchers say the reason injection attacks increased is because both botnet-based command injection local file inclusion attacks and command injection attacks used embedded coin-mining tools.

#### Still Foggy on Cloud Configuration

Businesses struggle to properly configure cloud servers, and cybercriminals know it. Inadvertent mistakes are costing companies big-time as attackers discover and target misconfigured cloud environments, IBM researchers report, and poorly configured systems were responsible for exposing more than 2 billion records that X-Force tracked in 2017.

Cloud misconfigurations are split into three categories: misconfigured cloud databases, which caused 566.4M breached records, publicly accessible cloud storage (345.8M), and improperly secured rsync backups or open Internet-connected network area storage devices (393.4M).

"I think this just goes to show the inexperience in doing that," says Griswold of moving to the cloud. "Chances are with on-prem, people understand how the data is stored and how the server is configured because they're the ones who did it ... with cloud, it's a little bit different."

<b>HEADLINE</b>	<b>04/04 How YouTube creators get paid</b>
<b>SOURCE</b>	<a href="https://www.usatoday.com/story/tech/news/2018/04/04/how-youtube-creators-get-paid-ads-and-why-">https://www.usatoday.com/story/tech/news/2018/04/04/how-youtube-creators-get-paid-ads-and-why-</a>

GIST	<p><a href="#">some-have-been-angry/485032002/</a></p> <p>A shooting at YouTube's headquarters in California has sparked questions about recent changes the video service made to how its creators get paid.</p> <p>Authorities <a href="#">have identified the suspect</a> as Nasim Aghdam, 39, accused of shooting three people before apparently taking her own life.</p> <p>Police say Aghdam's apparent motive for the shooting was frustration with the policies and practices of YouTube. Social media posts made by Aghdam, along with comments made by her father, suggest the shooter was "angry" because YouTube had stopped paying her for videos.</p> <p>Although YouTube does not directly pay its content creators, users can make money through ads that run on their video or subscriptions collected by YouTube Red premium service. However, recent policy changes have rankled many creators.</p> <p>Here's a breakdown of how YouTube creators can make money:</p> <p><b>What is monetization?</b> For YouTube, it's a way for creators to make money off their videos. YouTube hosts a Partners Program where creators earn money from ads appearing on their videos or Red subscriptions. The ads run through AdSense, Google's platform for serving ads to websites including YouTube.</p> <p>For its bigger names, making a living through YouTube can prove lucrative. <a href="#">According to Forbes</a>, the highest-paid YouTube star, Daniel Middleton, raked in \$16.5 million in income last year thanks to his channel <a href="#">DanTDM</a>.</p> <p><b>What are the changes users seem upset about?</b> Last April, <a href="#">YouTube updated its Partners Program</a> to no longer serve ads on videos until a channel reaches 10,000 lifetime views. It also revealed work on a review process for new members of the program. The change was made in response to tactics such as channels taking original videos and uploading them again to rake in ad money.</p> <p>"We want creators of all sizes to find opportunity on YouTube, and we believe this new application process will help ensure creator revenue continues to grow and end up in the right hands," Ariel Bardin, YouTube's vice president of product management, said in a blog post last April.</p> <p>In January, <a href="#">YouTube boosted those thresholds</a> to 4,000 hours of watch time over the last 12 months and 1,000 subscribers. As of Feb. 20, any channels below these requirements could no longer make money through ads.</p> <p><b>Why did YouTube make these changes?</b> Major advertisers including AT&amp;T and Verizon <a href="#">started pulling their business from YouTube in March 2017</a> after discovering their ads were appearing on offensive or extremist videos. YouTube parent company Google said it would start an "extensive review" of its ad policies. Last August, <a href="#">YouTube said it was working more quickly to pull terrorist content</a> from its site.</p> <p><b>What did this mean for YouTube creators?</b> If you were an established YouTube star with millions of followers, the policy didn't change things. But smaller channels on the edges of YouTube's thresholds were shut out, <a href="#">as this Guardian piece from January details</a>.</p> <p>Although YouTube acknowledged in January a significant number of channels would be affected by the change, it said 99% of affected channels were making less than \$100 per year in the last year.</p> <p>Those changes arrived <a href="#">as it weathered controversy surrounding one of its biggest names</a>, Logan Paul. In February, the vlogger <a href="#">saw ads on his channel suspended temporarily</a> after uploading a video of him</p>

<b>HEADLINE</b>	<b>04/04 Twitter cracks down fake news accounts</b>
<b>SOURCE</b>	<a href="http://abcnews.go.com/US/twitter-cracks-accounts-accused-spreading-false-youtube-shooting/story?">http://abcnews.go.com/US/twitter-cracks-accounts-accused-spreading-false-youtube-shooting/story?</a>
<b>GIST</b>	<p>Multiple Twitter accounts appear to have been suspended or curtailed in the wake of Tuesday's shooting at YouTube headquarters in San Bruno, California.</p> <p>The actions come amid continued concerns over the online spread of false information that occurs on social media around shootings and other major news events, much of which involves the naming of false suspects.</p> <p>On Tuesday, BuzzFeed reporter Jane Lytvynenko identified numerous tweets purporting to identify the assailant in the YouTube shooting, which left four people injured. Many of the tweets, Lytvynenko pointed out, resurfaced false claims from previous mass casualty incidents; one even misidentified the shooter as Lytvynenko herself.</p> <p>An ABC News analysis shows 19 of the 34 disputed tweets Lytvynenko found have been deleted, while 11 of the accounts appear to have been suspended.</p> <p>Law enforcement identified the suspect as 39-year-old Nasim Aghdam, who was found dead at the scene of an apparent self-inflicted gunshot wound. On Wednesday, San Bruno officials said her motive was believed to be dissatisfaction over YouTube's practices and policies.</p> <p>Less than two hours after the shooting was first reported on Tuesday, Twitter tweeted that it was reacting to the spread of false information.</p> <p>"We are also aware of attempts by some people to deceive others with misinformation around this tragedy," Twitter said. "We are tracking this and are taking action on anything that violates our rules."</p> <p>Requiring tweet deletion "is the approach we take during situations where misnaming someone could put those individuals in harm's way," a Twitter spokesperson told ABC News.</p>

<b>HEADLINE</b>	<b>04/04 Judge: Massachusetts can sue Equifax</b>
<b>SOURCE</b>	<a href="https://www.reuters.com/article/us-equifax-cyber/massachusetts-can-sue-equifax-over-data-breach-judge-rules-idUSKCN1HB2QQ">https://www.reuters.com/article/us-equifax-cyber/massachusetts-can-sue-equifax-over-data-breach-judge-rules-idUSKCN1HB2QQ</a>
<b>GIST</b>	<p>BOSTON (Reuters) - Massachusetts can move forward with a lawsuit accusing credit reporting firm Equifax Inc (EFX.N) of failing to safeguard its databases or provide prompt notice of a breach that exposed the personal data of 147 million people, a state court judge has ruled.</p> <p>Suffolk County Superior Court Judge Kenneth Salinger in Boston, in a decision made public on Wednesday, denied a motion by Equifax to dismiss a lawsuit that Massachusetts Attorney General Maura Healey filed in September after the breach was disclosed.</p> <p>Salinger wrote that the lawsuit stated a plausible claim that Equifax breached its legal duties to address all reasonably foreseeable risks to its data security and to implement reasonably up-to-date fixes to its software.</p> <p>The lawsuit alleged that Equifax knew or should have known by March 2017 that a serious security vulnerability existed in computer code that the company used in its systems but failed to patch or upgrade its software to eliminate it.</p>

	The lawsuit is one of several legal challenges facing Equifax related to the data breach. It also faces class action lawsuits, investigations by more than 40 state attorneys general and a probe by the U.S. Federal Trade Commission.

<b>HEADLINE</b>	<b>04/04 The ISIS files</b>
<b>SOURCE</b>	<a href="https://www.nytimes.com/interactive/2018/04/04/world/middleeast/isis-documents-mosul-iraq.html">https://www.nytimes.com/interactive/2018/04/04/world/middleeast/isis-documents-mosul-iraq.html</a>
<b>GIST</b>	<p><i>On five trips to battle-scarred Iraq, journalists for The New York Times scoured old Islamic State offices, gathering thousands of files abandoned by the militants as their 'caliphate' crumbled.</i></p> <p>MOSUL, Iraq — Weeks after the militants seized the city, as fighters roamed the streets and religious extremists rewrote the laws, an order rang out from the loudspeakers of local mosques.</p> <p>Public servants, the speakers blared, were to report to their former offices.</p> <p>To make sure every government worker got the message, the militants followed up with phone calls to supervisors. When one tried to beg off, citing a back injury, he was told: "If you don't show up, we'll come and break your back ourselves."</p>

The phone call reached Muhammad Nasser Hamoud, a 19-year-veteran of the Iraqi Directorate of Agriculture, behind the locked gate of his home, where he was hiding with his family. Terrified but unsure what else to do, he and his colleagues trudged back to their six-story office complex decorated with posters of seed hybrids.

They arrived to find chairs lined up in neat rows, as if for a lecture.

The commander who strode in sat facing the room, his leg splayed out so that everyone could see the pistol holstered to his thigh. For a moment, the only sounds were the hurried prayers of the civil servants mumbling under their breath.

Their fears proved unfounded. Though he spoke in a menacing tone, the commander had a surprisingly tame request: Resume your jobs immediately, he told them. A sign-in sheet would be placed at the entrance to each department. Those who failed to show up would be punished.

Meetings like this one occurred throughout the territory controlled by the Islamic State in 2014. Soon municipal employees were back fixing potholes, painting crosswalks, repairing power lines and overseeing payroll.

“We had no choice but to go back to work,” said Mr. Hamoud. “We did the same job as before. Except we were now serving a terrorist group.”

The disheveled fighters who burst out of the desert more than three years ago founded a state that was acknowledged by no one except themselves. And yet for nearly three years, the Islamic State controlled a stretch of land that at one point was the size of Britain, with a population estimated at 12 million people.

At its peak, it included a 100-mile coastline in Libya, a section of Nigeria’s lawless forests and a city in the Philippines, as well as colonies in at least 13 other countries. By far the largest city under their rule was Mosul.

Nearly all of that territory has now been lost, but what the militants left behind helps answer the troubling question of their longevity: How did a group whose spectacles of violence galvanized the world against it hold onto so much land for so long?

Part of the answer can be found in more than 15,000 pages of internal Islamic State documents I recovered during five trips to Iraq over more than a year.

The documents were pulled from the drawers of the desks behind which the militants once sat, from the shelves of their police stations, from the floors of their courts, from the lockers of their training camps and from the homes of their emirs, including this record detailing the jailing of a 14-year-old boy for goofing around during prayer.

The New York Times worked with outside experts to verify their authenticity, and a team of journalists spent 15 months translating and analyzing them page by page.

Individually, each piece of paper documents a single, routine interaction: A land transfer between neighbors. The sale of a ton of wheat. A fine for improper dress.

But taken together, the documents in the trove reveal the inner workings of a complex system of government. They show that the group, if only for a finite amount of time, realized its dream: to establish its own state, a theocracy they considered a caliphate, run according to their strict interpretation of Islam.

The world knows the Islamic State for its brutality, but the militants did not rule by the sword alone. They wielded power through two complementary tools: brutality and bureaucracy.

ISIS built a state of administrative efficiency that collected taxes and picked up the garbage. It ran a

marriage office that oversaw medical examinations to ensure that couples could have children. It issued birth certificates — printed on Islamic State stationery — to babies born under the caliphate's black flag. It even ran its own D.M.V.

The documents and interviews with dozens of people who lived under their rule show that the group at times offered better services and proved itself more capable than the government it had replaced.

They also suggest that the militants learned from mistakes the United States made in 2003 after it invaded Iraq, including the decision to purge members of Saddam Hussein's ruling party from their positions and bar them from future employment. That decree succeeded in erasing the Baathist state, but also gutted the country's civil institutions, creating the power vacuum that groups like ISIS rushed to fill.

A little more than a decade later, after seizing huge tracts of Iraq and Syria, the militants tried a different tactic. They built their state on the back of the one that existed before, absorbing the administrative know-how of its hundreds of government cadres. An examination of how the group governed reveals a pattern of collaboration between the militants and the civilians under their yoke.

One of the keys to their success was their diversified revenue stream. The group drew its income from so many strands of the economy that airstrikes alone were not enough to cripple it.

Ledgers, receipt books and monthly budgets describe how the militants monetized every inch of territory they conquered, taxing every bushel of wheat, every liter of sheep's milk and every watermelon sold at markets they controlled. From agriculture alone, they reaped hundreds of millions of dollars. Contrary to popular perception, the group was self-financed, not dependent on external donors.

More surprisingly, the documents provide further evidence that the tax revenue the Islamic State earned far outstripped income from oil sales. It was daily commerce and agriculture — not petroleum — that powered the economy of the caliphate.

The United States-led coalition, trying to eject the Islamic State from the region, tried in vain to strangle the group by bombing its oil installations. It's much harder to bomb a barley field. It was not until last summer that the militants abandoned Mosul, after a battle so intense that it was compared to the worst combat of World War II.

While the militants' state eventually crumbled, its blueprint remains for others to use.

"We dismiss the Islamic State as savage. It is savage. We dismiss it as barbaric. It is barbaric. But at the same time these people realized the need to maintain institutions," said Fawaz A. Gerges, author of "ISIS: A History."

"The Islamic State's capacity to govern is really as dangerous as their combatants," he said.

### **Land for the Taking**

The day after the meeting, Mr. Hamoud, a Sunni, returned to work and found that his department was now staffed 100 percent by Sunnis, the sect of Islam practiced by the militants. The Shia and Christian colleagues who previously shared his office had all fled.

For a while, Mr. Hamoud and the employees he supervised at the agriculture department went on much as they had before. Even the stationery they used was the same, though they were instructed to use a marker to cover up the Iraqi government's logo.

But the long-bearded men who now oversaw Mr. Hamoud's department had come with a plan, and they slowly began to enact it.

For generations, jihadists had dreamed of establishing a caliphate. Osama bin Laden frequently spoke of it and his affiliates experimented with governing in the dunes of Mali, in the badlands of Yemen and in

pockets of Iraq. Their goal was to recreate the society that existed over a millennium ago during the time of the Prophet Muhammad.

In Mosul, what had been called the Directorate of Agriculture was renamed Diwan al-Zera'a, which can be translated as the Ministry of Agriculture. The term "diwan" harks back to the seventh-century rule of one of the earliest caliphs.

ISIS printed new letterhead that showed it had branded at least 14 administrative offices with "diwan," renaming familiar ones like education and health. Then it opened diwans for things that people had not heard of: something called the hisba, which they soon learned was the feared morality police; another diwan for the pillaging of antiquities; yet another dedicated to "war spoils."

What began as a cosmetic change in Mr. Hamoud's office soon turned into a wholesale transformation.

The militants sent female employees home for good and closed the day care center. They shuttered the office's legal department, saying disputes would now be handled according to God's law alone.

And they did away with one of the department's daily duties — checking an apparatus, placed outside, to measure precipitation. Rain, they said, was a gift from Allah — and who were they to measure his gift?

Employees were also told they could no longer shave, and they had to make sure the leg of their trousers did not reach the ankle.

Glossy pamphlets, like the one below, pinpointed the spot on the calf where the hem of the garb worn by the companions of the Prophet around 1,400 years ago was said to have reached.

Eventually, the 57-year-old Hamoud, who wears his hair in a comb-over and prides himself on his professional appearance, stopped buying razors. He took out the slacks he wore to work and asked his wife to trim off 5 centimeters.

But the biggest change came five months into the group's rule, and it turned the hundreds of employees who had reluctantly returned to work into direct accomplices of the Islamic State. The change involved the very department Mr. Hamoud headed, which was responsible for renting government-owned land to farmers.

To increase revenue, the militants ordered the agriculture department to speed up the process for renting land, streamlining a weekslong application into something that could be accomplished in an afternoon.

That was just the beginning.

It was then that government workers got word that they should begin renting out property that had never belonged to the government. The instructions were laid out in a 27-page manual emblazoned with the phrase "The Caliphate on the Path of Prophecy." The handbook outlined the group's plans for seizing property from the religious groups it had expelled and using it as the seed capital of the caliphate.

"Confiscation," the manual says, will be applied to the property of every single "Shia, apostate, Christian, Nusayri and Yazidi based on a lawful order issued directly by the Ministry of the Judiciary."

Islamic State members are exclusively Sunni and see themselves as the only true believers. Mr. Hamoud's office was instructed to make a comprehensive list of the properties owned by non-Sunnis — and to seize them for redistribution.

The confiscation didn't stop at the land and homes of the families they chased out. An entire ministry was set up to collect and reallocate beds, tables, bookshelves — even the forks the militants took from the houses they seized. They called it the Ministry of War Spoils.

It was housed in a stone-faced building in western Mosul that was hit by an airstrike in the battle to retake the city. The ensuing fire consumed the structure and blackened its walls. But the charred shapes left behind still told a story. Each room served as a warehouse for ordinary household objects: kerosene heaters in one; cooking ranges in another; a jumble of air coolers and water tanks in yet another.

The few papers that did not burn up showed how objects seized from the religious groups they had chased out were offered as rewards to ISIS fighters.

“Please kindly approve the request of the family of the late Brother Durayd Salih Khalaf,” says one letter written on the letterhead of the Islamic State’s Prisoners and Martyrs Affairs Authority. The request was for a stove and a washing machine. A note scribbled at the bottom says: “To be provided with a plasma TV and stove only.”

Another application from the General Telecommunications Authority requested, among other things, clothes hangers.

The Islamic State’s promise of taking care of its own, including free housing for foreign recruits, was one of the draws of the caliphate.

“I’m in Mosul and it’s really the top here,” Kahina el-Hadra, a young Frenchwoman who joined the group in 2015, wrote in an email that year to her secondary school teacher, according to a transcript contained in a report by the Paris Criminal Brigade, which was obtained by The Times.

“I have an apartment that is fully furnished,” Ms. Hadra gushed. “I pay no rent nor even electricity or water lol. It’s the good life!!! I didn’t buy so much as a single fork.”

When her concerned teacher wrote back that the apartment had probably been stolen from another family, she shot back: “Serves them right, dirty Shia!!!”

Ms. Hadra, according to police records, was the pregnant wife of one of the suicide bombers who blew himself up in the packed Bataclan concert hall during the Paris attacks of 2015.

### **The Paper Trail**

I got into the habit of digging through the trash left behind by terrorists in 2013, when I was reporting on Al Qaeda in Mali. Locals pointed out buildings the group had occupied in the deserts of Timbuktu. Beneath overturned furniture and in abandoned filing cabinets, I found letters the militants had hand-carried across the dunes that spelled out their vision of jihad.

Those documents revealed the inner workings of Al Qaeda, and years later I wanted to investigate the Islamic State in the same way.

When the coalition forces moved to take Mosul back from the militants in late 2016, I rushed to Iraq. For three weeks, I tried — and failed — to find any documents. Day after day, my team negotiated access to buildings painted with the Islamic State logo, only to find desk drawers jutting out and hard drives ripped out.

Then, the day before my return flight, we met a man who remembered seeing stacks of paper inside the provincial headquarters of the Islamic State’s Ministry of Agriculture in a small village called Omar Khan, 25 miles southeast of the city. The next day we traveled to the town, no more than a speck on the map of the Nineveh Plains, and entered House No. 47.

My heart sank as we pushed open the door and saw the closets been flung open — a clear sign that the place had already been cleared.

But on the way out, I stopped at what seemed to be an outhouse. When we opened the door, we saw piles of yellow folders cinched together with twine and stacked on the floor.

We pulled one out, laid it open in the sun — and there was the unmistakable black banner of the Islamic State, the flag they claim was flown by the Prophet himself.

Folder after folder, 273 in all, identified plots of land owned by farmers who belonged to one of the faiths banned by the group. Each yellow sleeve contained the handwritten request of a Sunni applying to confiscate the property.

Doing so involved a step-by-step process, beginning with a report by a surveyor, who mapped the plot, noted important topographical features and researched the property's ownership. Once it was determined that the land was owned by one of the targeted groups, it was classified as property of the Islamic State. Then a contract was drawn up spelling out that the tenant could neither sublet the land nor modify it without the group's permission.

The outhouse discovery taught me to stay off the beaten track. I learned to read the landscape for clues, starting with باقية — “baqiya” — the first word of the Islamic State slogan. It can be translated as “will remain,” and marked the buildings the group occupied, invoking its claim that the Islamic State will endure.

Once we confirmed that a building had been occupied by the group, we lifted up the mattresses and pulled back the headboards of beds. We rifled through the closets, opened kitchen cupboards, followed the stairs to the roof and scanned the grounds.

The danger of land mines and booby-traps hung over our team. In one villa, we found a collection of records — but could search only one set of rooms after security forces discovered an unexploded bomb.

Because the buildings were near the front lines, Iraqi security forces nearly always accompanied our team. They led the way and gave permission to take the documents. In time, the troops escorting us became our sources and they, in turn, shared what they found, augmenting our cache by hundreds of records.

The Times asked six analysts to examine portions of the trove, including Aymenn Jawad al-Tamimi, who maintains his own archive of Islamic State documents and has written a primer on how to identify fraudulent ones; Mara Revkin, a Yale scholar who has made repeated trips to Mosul to study the group's administration; and a team of analysts at West Point's Combating Terrorism Center who analyzed the records found in Bin Laden's hide-out in Pakistan.

They deemed the records to be original, based on the markings, logos and stamps, as well as the names of government offices. The terminology and design were consistent with those found on documents issued by the group in other parts of the caliphate, including as far afield as Libya.

As lease after lease was translated back in New York, the same signature inked at the bottom of numerous contracts kept reappearing: “Chief Technical Supervisor, Mahmoud Ismael Salim, Supervisor of Land.”

On my first trip back to Iraq, I showed the leases to a local police officer. He recognized the angular signature and offered to escort me to the home of the ISIS bureaucrat.

The officer shrugged when asked why a man who had taken part in the group's organized land theft had not been arrested. His men were overwhelmed investigating those who had fought and killed on behalf of the terrorist group, he said. They didn't have time to also go after the hundreds of civil servants who had worked in the Islamic State's administration.

Hours later, the man whose signature appeared on the lease for farmland seized from a Christian priest, on the contract for the orchards taken from a monastery, and on the deed for land stolen from a Shia family allowed us into his modest home.

The only decoration in his living room was a broken clock whose hand trembled between 10:43 and 10:44.

A stooped man with thick glasses, the 63-year-old Salim was visibly nervous. He explained that he had spent years overseeing the provincial office of the government of Iraq's Directorate of Agriculture, where he reported to Mr. Hamoud, whom we contacted for the first time a few days later.

Mr. Salim acknowledged that it was his signature on the leases. But speaking haltingly, he claimed to have been forcibly conscripted into the bureaucracy of the terrorist state.

"They took our files and started going through them, searching which of the properties belong to Shia, which of them belong to apostates, which of them are people who had left the caliphate," he said.

He described informants phoning in the addresses of Shias and Christians.

Sunnis who were too poor to pay the rent upfront were offered a sharecropping agreement with the Islamic State, allowing them to take possession of the stolen land in return for one-third of the future harvest.

On busy days, a line snaked around his office building, made up of Sunni farmers, many of them resentful of their treatment at the hands of a Shia-led Iraqi government. In the same compound where we found the stacks of yellow folders, Mr. Salim received men he knew, whose children had played with his. They came to steal the land of other men they all knew — whose children had also grown up alongside theirs.

With the stroke of his pen, farmers lost their ancestors' cropland, their sons were robbed of their inheritance and the wealth of entire families, built up over generations, was wiped out.

"These are relationships we built over decades, from the time of my father, and my father's father," Mr. Salim said, pleading for understanding. "These were my brothers, but we were forced to do it."

### **A Clean Sweep**

As 2014 blurred into 2015 and Mr. Hamoud and his colleagues helped keep the machinery of government running, Islamic State soldiers set out to remake every aspect of life in the city — starting with the role of women.

Billboards went up showing an image of a woman fully veiled. The militants commandeered a textile factory, which began manufacturing bales of regulation-length female clothing. Soon thousands of niqab sets were delivered to the market, and women who didn't cover up began to be fined.

Mr. Hamoud, who is known as "Abu Sara," or Father of Sara, gave in and bought a niqab for his daughter.

As he walked to and from work, Mr. Hamoud began taking side streets to dodge the frequent executions that were being carried out in traffic circles and public squares. In one, a teenage girl accused of adultery was dragged out of a minivan and forced to her knees. Then a stone slab was dropped onto her head. On a bridge, the bodies of people accused of being spies swung from the railing.

But on the same thoroughfares, Mr. Hamoud noticed something that filled him with shame: The streets were visibly cleaner than they had been when the Iraqi government was in charge.

Omar Bilal Younes, a 42-year-old truck driver whose occupation allowed him to crisscross the caliphate, noticed the same improvement. "Garbage collection was No. 1 under ISIS," he said, flashing a thumbs-up sign.

The street sweepers hadn't changed. What had was that the militants imposed a discipline that had been lacking, said a half-dozen sanitation employees who worked under ISIS and who were interviewed in three towns after the group was forced out.

"The only thing I could do during the time of government rule is to give a worker a one-day suspension without pay," said Salim Ali Sultan, who oversaw garbage collection both for the Iraqi government and

later for the Islamic State in the northern Iraqi town of Tel Kaif. “Under ISIS, they could be imprisoned.”

Residents also said that their taps were less likely to run dry, the sewers less likely to overflow and potholes fixed more quickly under the militants, even though there were now near-daily airstrikes.

Then one day, residents of Mosul saw earthmovers heading toward a neighborhood called the Industrial Area in the eastern half of the city. Laborers were seen paving a new blacktop road that would eventually run for roughly one mile, connecting two areas of the city and reducing congestion.

The new highway was called “Caliphate Way.”

The new government did not concern itself only with administrative matters. For morality, as for everything else, there was a bureaucracy.

Citizens stopped in the street by the hisba, the morality police, and accused of an offense were ordered to hand over their IDs in return for a “confiscation receipt.” The ID was taken to the group’s office, where residents were forced to appear and face judgment. Religious specialists weighed the crime, filling out a form.

Afterward, the offender was made to sign another form: “I, the undersigned, pledge not to cut or trim my beard again,” said one. “If I do that again, I will be subject to all kinds of punishments that the Hisba Center may take against me.”

The zeal with which the Islamic State policed the population is reflected in the 87 prison transfer records they abandoned in one of their police stations. Citizens were thrown into jail for a litany of obscure crimes, including eyebrow plucking, inappropriate haircuts, raising pigeons, playing dominoes, playing cards, playing music and smoking the hookah.

In early 2016, Mr. Hamoud’s daughter Sara ran out for a quick errand without covering her eyes.

She was spotted by an officer from the morality police. Before she could explain, he smashed his fist into her eye.

From then on, her father forbade her to leave the house, except to drive to the hospital for the appointments that followed the assault, which left her with vision loss, the family said.

With change sweeping the region, residents were forced to make fraught choices, among them: Stay or leave, rebel or accommodate.

Mr. Hamoud decided to try to escape. He and his eldest son, 28-year-old Omar, had set aside over \$30,000 to buy a new home. The morning of their planned departure, Omar withdrew all but around \$1,000 from the bank account.

Not even two hours later, a unit of masked fighters banged down the family’s front door. One of them was holding the bank slip Omar had signed.

“Try this again and we’ll kill every last one of you,” the militants warned.

### **The Money Machine**

On the western banks of the Tigris River, in a pulverized building, I found an abandoned briefcase.

The documents that spilled out revealed that the briefcase belonged to Yasir Issa Hassan, a young professional whose photo identification shows a balding man with a large, aquiline nose. He was the administrator of the Trade Division inside the Islamic State Ministry of Agriculture.

The group’s outsize ambitions and its robust bureaucracy hinged on its ability to generate funds. Bulging

with accounting forms, budget projections and receipts, as well as two CD-ROMs containing spreadsheets, the briefcase shed light on the scope of the organization's revenue machine and offered a blueprint for how it worked.

The financial reports tallied over \$19 million in transactions involving agriculture alone.

The documents describe how it made money at every step in the supply chain: Before a single seed of grain, for example, was sown, the group collected rent for the fields it had confiscated. Then, when the crops were ready to be threshed, it collected a harvest tax.

It did not stop there.

The trucks that transported the grain paid highway tolls. The grain was stored in silos, which the militants controlled, and they made money when the grain was sold to mills, which they also controlled. The mills ground the grain into flour, which the group sold to traders.

Then the bags of flour were loaded onto trucks, which traversed the caliphate, paying more tolls. It was sold to supermarkets and shops, which were also taxed. So were the consumers who bought the finished product.

In a single 24-hour period in 2015, one of the spreadsheets in the briefcase shows, the Islamic State collected \$1.9 million from the sale of barley and wheat.

Another table shows that the militants earned over \$3 million in three months from gross flour sales in just three locations in Mosul.

The organization appeared intent on making money off every last grain — even crops that were damaged.

On just one day, according to another statement, it took in over \$14,000 from wheat described as having been scorched in a bombing, and \$2,300 from the sale of spoiled lentils and chickpeas. It also took in over \$23,000 from grain that had been scraped off the bottom of a tank, according to one spreadsheet.

The Islamic State's tax arm reached into every facet of life in Mosul. Households in Iraq were taxed 2,000 dinars per month (less than \$2) for garbage collection, 10,000 dinars (about \$8) for each 10 amperes of electricity, and another 10,000 for municipal water.

Businesses wishing to install a landline paid a 15,000-dinar (about \$12) installation fee to the group's telecommunications office, followed by a 5,000-dinar monthly maintenance fee.

Municipal offices charged for marriage licenses and birth certificates.

But perhaps the most lucrative tax was a religious tax known as zakat, which is considered one of the five pillars of Islam. It is calculated at 2.5 percent of an individual's assets, and up to 10 percent for agricultural production, according to Ms. Revkin, the Yale researcher. While some of these fees had been charged by the Iraqi and Syrian governments, the mandatory asset tax was a new development.

Ordinarily in Islamic practice, the zakat is a tithe used to help the poor. In the Islamic State's interpretation, an act of charity became a mandatory payment, and while some of the funds collected were used to help needy families, the Ministry of Zakat and Charities acted more like a version of the Internal Revenue Service.

Most accounts of how the Islamic State became the richest terrorist group in the world focus on its black-market oil sales, which at one point brought in as much as \$2 million per week, according to some estimates. Yet records recovered in Syria by Mr. Tamimi and analyzed by Ms. Revkin show that the ratio of money earned from taxes versus oil stood at 6:1.

Despite hundreds of airstrikes that left the caliphate pocked with craters, the group's economy continued to function, fed by streams of revenue that could not be bombed under international norms: the civilians under their rule, their commercial activity and the dirt under their feet.

According to estimates from the Food and Agriculture Organization of the United Nations, the land that the militants seized was Iraq's most fertile, and at the group's height, the fields that were harvested accounted for 40 percent of the country's annual wheat production and more than half of its barley crop. In Syria, the group at one point controlled as much as 80 percent of the country's cotton crop, according to a study by the Paris-based Center for the Analysis of Terrorism.

It all added up to astonishing sums, as much as \$800 million in annual tax revenue, according to the study.

Still, the group's ambition of running a state meant it also had large bills.

On a single day in the summer of 2016, the owner of the briefcase handed over \$150,000 to one of the group's accountants to pay for the transport of wheat from one town to another, according to one financial report.

In a two-week period the same year, he paid over \$16,000 to the Islamic State trade division in the Dijlah district and \$14,000 to the one in Kirkuk. He gave an \$8,400 cash advance to the group's Hawija office, \$16,800 to the land department and \$8,400 to the Islamic State province straddling the Euphrates River.

Tax collection continued until the very end. At least 100 documents labeled "Daily Gross Revenue" that showed incoming cash were dated November 2016, a month after the start of the coalition's push to take back the city.

Even as tanks were rolling in and taking surrounding neighborhoods, the trade division continued to make money, pocketing \$70,000 in a single sale.

### **After ISIS**

One day in late 2016, a flier decorated with the Iraqi flag floated down onto the Hamoud family's home.

The agricultural department official and his extended family were hunkered down inside the living room, sitting elbow-to-elbow on an L-shaped couch, he recalls. By then, the militants had banned both cellphones and satellite dishes. They were cut off from the world.

The flier was one of millions dropped over Mosul warning the population to take cover. The military assault was about to begin.

"Could this really be happening?" Mr. Hamoud wondered. Then he used a lighter to incinerate the flier.

The fighters whose plans of building a state had been met with ridicule proved surprisingly good at it. It took nine months to wrest Mosul from the militants' grip, a slog that one senior American general said was the most difficult battle he had witnessed in 35 years.

Since then, the militants have lost all but 3 percent of the territory in Iraq and Syria they once held. But they clung so tightly to their caliphate that block after city block was leveled during the battle to take back cities and towns. Thousands of people have lost their homes. New mass graves are being discovered every month. One of them contains the remains of four of Mr. Hamoud's cousins.

His daughter Sara now wears thick glasses to correct her vision, which has been blurry since the day she was punched by the hisba. Even through her compromised eyesight, she can see the mountain of trash rising in the empty lot across from her family's home.

Few have anything good to say about their old rulers — unless prodded to talk about the services they provided.

“We have to be honest,” Mr. Hamoud said. “It was much cleaner under ISIS.”

Though the militants are gone, reminders of the Islamic State and their particular style of governance remain.

In the northern town of Tel Kaif, for example, residents recall how the militants conscripted a committee of electrical engineers to fix an overloaded power grid. They installed new circuit breakers, and for the first time, residents who had been accustomed to at most six hours of electricity a day could now reliably turn on lights.

In early 2017, Iraqi soldiers reclaimed the town, and were welcomed as heroes. But then they disconnected the Islamic State circuit breakers — and the power failures resumed.

“If the government was to go back to the system that ISIS put in place, we would go so far as to kiss their foreheads,” Mr. Younes, the truck driver, said at the time.

Within a few months, the government did just that.

The irony that it had taken a terrorist group to fix one of the town’s longstanding grievances was not lost on its citizens.

“Although they were not recognized as a state or a country,” said one shopkeeper, Ahmed Ramzi Salim, “they acted like one.”

<b>HEADLINE</b>	<b>04/04 ISIS militants renew loyalty pledge</b>
<b>SOURCE</b>	<a href="https://uk.reuters.com/article/uk-mideast-crisis-islamic-state/islamic-state-militants-renew-loyalty-pledge-to-caliph-baghdadi-idUKKCN1HB1XK">https://uk.reuters.com/article/uk-mideast-crisis-islamic-state/islamic-state-militants-renew-loyalty-pledge-to-caliph-baghdadi-idUKKCN1HB1XK</a>
<b>GIST</b>	<p>BAGHDAD (Reuters) - Islamic State militants have restated their loyalty to the group’s leader Abu Bakr al-Baghdadi, in what is believed to be their first public pledge of allegiance to him since his “caliphate” in Syria and Iraq collapsed last year.</p> <p>The group continues to carry out bombings, ambushes and assassinations in both countries, as well as in Libya. However, Baghdadi’s whereabouts have been unknown since the cross-border “caliphate” he declared in 2014 disintegrated with the fall of Mosul and Raqqa, its strongholds in Iraq and Syria respectively.</p> <p>“To infuriate and terrorise the infidels, we renew our pledge of loyalty to the commander of the faithful and the caliph of the Muslims, the mujahid sheikh Abu Bakr al-Baghdadi al-Hussaini al-Qurashi may god preserve him,” militants said in a statement posted on their social media groups.</p> <p>Hisham al-Hashimi, who advises several governments including Iraq’s on Islamic State affairs, said this was the first known pledge of loyalty to Baghdadi since Iraqi forces recaptured Mosul in July and an alliance of Kurdish and Arab militias took Raqqa in November, in both cases backed by a U.S.-led coalition.</p> <p>There have been conflicting reports over whether Baghdadi, an Iraqi, is still alive.</p> <p>However, Hashimi told Reuters that he was believed to be hiding in the vast desert area that straddles the Syria-Iraq border,</p> <p>U.S. airstrikes killed most of his top lieutenants, including Islamic State’s “war minister” Abu Omar al-Shishani, “governor of the Iraqi region” Abu Muslim al-Turkmani, group spokesman Abu Mohammed al-</p>

	Adnani and “governor for Syria” Abu Ali al-Anbari.

<b>HEADLINE</b>	<b>04/05 Inside the Google of counter-terrorism</b>
<b>SOURCE</b>	<a href="https://www.bloomberg.com/news/articles/2018-04-05/once-snubbed-by-fbi-europol-is-now-google-of-counter-terrorism">https://www.bloomberg.com/news/articles/2018-04-05/once-snubbed-by-fbi-europol-is-now-google-of-counter-terrorism</a>
<b>GIST</b>	<p>Shortly after taking over Europol a decade ago, former British MI5 officer Rob Wainwright met with then-FBI Director Robert Mueller to pitch the idea of sharing data, figuring he couldn't turn the European Union's budding criminal-intelligence service into a global force without America's help.</p> <p>Mueller wasn't interested, so the Welshman says he winged it.</p> <p>“If the FBI doesn't engage here with their equivalents, the leading lights of the police world in Europe, then you're a second-rater basically,” Wainwright said in his corner office at Europol's headquarters in The Hague, a state-of-the-art complex with bulletproof windows. “I had to do something about that.”</p> <p>Milking cooperation accords with hundreds of other agencies across Europe and abroad, Wainwright, who's stepping down in May, has turned Europol into a transnational clearing house for information on terrorism, trafficking, laundering and hacking that now has 38 U.S. attaches—including four from the FBI. Often confused with Interpol, which operates more like the United Nations, Europol has a bigger budget, more staff and arguably greater impact than its better-known cousin.</p> <p>In the last year, Europol has worked with U.S. officials to take down two of the dark web's largest bazaars, the result of an elaborate sting that Wainwright announced in Washington alongside U.S. Attorney General Jeff Sessions. Europol and the FBI have also helped arrest 900 people linked to a global pedophile ring and, just two weeks ago, assisted Spanish authorities in capturing the Ukrainian who allegedly masterminded a malware scheme that stole 1 billion euros (\$1.2 billion), including by hijacking ATMs across Europe.</p> <p>But it's Wainwright's obsession with expanding a kind of in-house Google for terrorism that paved the way for greater cooperation with U.S. law enforcement. Recruited by MI5 after graduating from the London School of Economics in the 1980s, the affable and fit 50 year-old said learning the art of counter-terrorism at a time when Irish nationalists were still bombing English towns taught him an invaluable lesson: always work to maximize your knowledge.</p> <p>When he was named executive director in 2009, Europol's database of suspected terrorists and their networks held fewer than 6,000 “objects,” a term that refers to everything from names and addresses to phone numbers and license plates. Now it contains more than half a million, including more than 46,000 individuals.</p> <p>“Europol was not really prominent in our minds seven or eight years ago, but Rob's ability to make people aware of its capabilities has made it relevant,” said Kumar Kibble, the U.S. Department of Homeland Security's lead representative in The Hague. “It's taken on a momentum of its own. He's been a visionary.”</p> <p>Wainwright said Europol's reputational arrival came hours after the attacks on Paris in November 2015, when teams of gunmen and suicide bombers killed more than 130 people at six different locations. Europe had never seen an assault like that and the French were desperate for leads, so they asked Europol to join the probe and arrange assistance from Washington.</p> <p>“It takes events and live cases like that to really break the mold of what your reputation is,” Wainwright, who stands 6'5 (1.96 meters), said after a late-night flight from Bulgaria, where he was awarded the Foreign Ministry's highest honor. “And from that, they said, ‘Ok, well what else can you do?’”</p>

Europol, which doesn't have arrest powers, has played a key role in major terrorism investigations since, including the bombing of American singer Ariana Grande's concert in Manchester, England, last May. The agency, which has a staff of about 1,200 and a budget of 123 million euros, was formally founded in 1999 to combat the most sophisticated criminal networks, a mandate that now includes coordinating the cyberdefenses of the bloc's 28 members.

The agency is currently helping with probes into the Wannacry ransomware attack that crippled parts of Britain's National Health Service and NotPetya, which caused two companies losses of about \$300 million. While not surprising to Europol's cybercrime sleuths, Wainwright said these and other digital assaults, including Russia's alleged burrowing into the U.S. electric grid, have served as belated wake-up calls in capitals throughout Europe.

"We recognized there was a gap in our collective systems," he said. Each country already has a team ready to respond to major cyber incidents "and now we're trying to network them across Europe in a more effective way."

Wainwright, who will help run Deloitte LLP's cybersecurity unit later this year, pointed to a recent series of bank heists as a prime example of the ever-expanding arsenal of tech weaponry that criminal groups are continuously deploying.

A gang that's been active since at least 2013, first in conjunction with mafia in Russia and then in Moldova, infected more than 100 financial institutions in Moscow and around the globe with malware called Carbanak and Cobalt that allowed the criminals to manipulate payment systems and commandeer cash machines.

All over Central and Eastern Europe, he said mules would show up at ATMs in the middle of the night and fill up suitcases with bills that spewed out at designated times. Then they'd move down the street to the next machine and do it again a few minutes later.

It was a "brilliant, Hollywood-type scene," he said, "probably the most advanced form of social engineering that we've seen."

As the Europol chief prepares to pivot to the private sector after fighting crime on behalf of the public for 28 years, he'd like to say that he's helped make Europe a safer place, but that would be naively optimistic.

In the last year, 18 months, there's been "a perceptible trend towards a blending of state-actor capability with the criminal community," Wainwright said without elaboration. "It's therefore becoming a more dangerous game."

<b>HEADLINE</b>	<b>04/05 Yemen fear: deadly attacks target clerics</b>
<b>SOURCE</b>	<a href="http://abcnews.go.com/International/wireStory/fear-grips-yemens-aden-deadly-attacks-target-clerics-54248489?">http://abcnews.go.com/International/wireStory/fear-grips-yemens-aden-deadly-attacks-target-clerics-54248489?</a>
<b>GIST</b>	<p>A spate of deadly drive-by shootings targeting Muslim clerics and preachers has sparked panic and fear in Yemen's southern port city of Aden, prompting some imams to quit and abandon their mosques while dozens have fled the country.</p> <p>The killings have also brought attention to a rivalry that has emerged in Aden as yet another layer to Yemen's complex civil war.</p> <p>Since 2015, the conflict has pitted a Saudi-led coalition of mostly Arab states against the country's Shiite rebels, known as Houthis, who control much of northern Yemen and its capital, Sanaa. The coalition is fighting to restore Yemen's internationally recognized President Abed-Rabbo Mansour Hadi to power.</p>

The United Arab Emirates joined the war as a key partner in the coalition, sending forces to southern Yemen and managing to carve out a zone of influence across the region. The UAE has set up heavily-armed militias in a challenge to forces loyal to Hadi, who has been in self-imposed exile in Saudi Arabia for most of the past two years.

In several instances, UAE-trained militiamen, some operating under the umbrella of the Southern Transitional Council — which many see as a secessionist force fighting for an independent Southern Yemen — have engaged in deadly clashes with Hadi's forces. The UAE has also been linked to secret prisons where terror suspects are tortured and held without trial, a charge the Emiratis deny.

The Gulf Arab state also holds deep enmity toward Hadi's top ally in the south, the Muslim Brotherhood branch in Yemen, known as the Islah party.

Many of the slain clerics belonged to the Islah party. In most cases, they were shot by gunmen while leaving their mosques after Friday prayers, or outside their homes.

A tally by The Associated Press shows that at least 25 clerics, preachers, and religious scholars have been gunned down since 2016 in Aden and the southern provinces, with over 15 killed in the past six months alone.

The slayings have stoked anger against the UAE in Aden. Recently, graffiti saying, "Down with the UAE occupation" surfaced in the streets. On Tuesday, a joint statement by 12 political parties and movements denounced the "evil hands behind the assassinations" of the clerics. It said those killed are all supporters of Hadi's government.

Minister of Religious Endowment Ahmed Attiya said the killings are "systematic" and that over 50 clerics have left Yemen so far, fleeing to countries such as Egypt and Jordan.

"If this continues, we will ask the clerics to stay home and stop going to mosques," he said from Riyadh.

Hadi's government, which operates mostly out of exile with only a few ministers on the ground in Aden, has denounced the slayings as "desperate attempts by terrorist elements and outlaws" against Yemen's legitimate government.

No group has claimed responsibility for the killings. Security authorities in Aden would only say that they are investigating and that they have rounded some suspects.

<b>HEADLINE</b>	<b>04/04 Afghan airstrikes hit school graduation</b>
<b>SOURCE</b>	<a href="https://www.nbcnews.com/news/world/children-feared-dead-afghan-airstrikes-targeting-taliban-kill-dozens-n862651">https://www.nbcnews.com/news/world/children-feared-dead-afghan-airstrikes-targeting-taliban-kill-dozens-n862651</a>
<b>GIST</b>	<p>KABUL, Afghanistan — Dozens of Afghan civilians, including children, were feared dead Wednesday after government airstrikes hit a religious school graduation in the north of the country, witnesses told NBC News.</p> <p>In the hours after Monday's bombing, the Afghan Ministry of Defense insisted that the strikes had exclusively targeted senior Taliban insurgents plotting an attack on the military, before conceding the next day that civilians had died.</p> <p>There are conflicting accounts as to casualty numbers, and the volatility of the region — much of which is held or contested by the insurgent group — makes independent reporting difficult.</p> <p>However, attendees of the event that included families from the area said they had seen dozens of fatalities in the aftermath of the bombing. A chef who had been working at the ceremony told NBC News that he</p>

	<p>had been preparing food for 2,000 people.</p> <p>Describing the attack in the Dasht-e-Archi district of Kunduz, another witness, Qari Abdul Rahim, told NBC News that he had been sitting in the third row when aircraft appeared overhead.</p> <p>"I looked to the sky and saw smoke under the aircraft, and I dropped myself to the ground and managed to escape the building," he said in a phone call.</p> <p>"I managed to get close to the building later on," he added. "I saw a lot of dead bodies, including children, on the road. While they were trying to escape, they were all hit."</p> <p>Footage and photographs released by the Taliban purported to show dead and injured children being buried or carried away from the rubble on stretchers. The Taliban, which has a history of exaggerating its battlefield victories and underplaying its defeats, insisted none of their forces had been present at the ceremony.</p>

<b>HEADLINE</b>	<b>04/04 US warns Syria on chemical weapons</b>
<b>SOURCE</b>	<a href="https://www.cbsnews.com/news/chemical-weapons-nikki-haley-united-states-united-nations-syria/">https://www.cbsnews.com/news/chemical-weapons-nikki-haley-united-states-united-nations-syria/</a>
<b>GIST</b>	<p>Despite pleas, sanctions, international condemnation and even a recent U.S. airstrike, the international community has been unable to stop the use of chemical weapons against civilians in Syria. During a meeting at the U.N. Wednesday, Ambassador Nikki Haley was clear where the U.S. places the blame.</p> <p>"The Assad regime continued using chemical weapons against the Syrian people," she said. "One member of this council shielded the Assad regime from any consequences, and then blocked us from renewing the Joint Investigative Mechanism (JIM). Our consensus broke down."</p> <p>After the attack, a UN-OPCW report concluded that the "leadership panel is confident that the Syrian Arab Republic is responsible for the release of sarin at Khan Shaykhun."</p> <p>The frustration at the council, particularly in light of the poisoning attack in Britain, took a new turn: accountability for the attacks.</p> <p>"The OPCW-United Nations JIM was created for this purpose, but regrettably, its mandate was not renewed," Thomas Markram, director and deputy to the High Representative for Disarmament Affairs, told the council while referring to the veto by Russia. "While allegations of the use of chemical weapons have not stopped, consideration of a mechanism for accountability has apparently slowed, if not come to a standstill. The Secretary-General and the High Representative for Disarmament Affairs have repeatedly underlined the need to avoid impunity to ensure that those responsible for the use of chemical weapons are identified and held responsible."</p> <p>"Perpetrators of such crimes must be held accountable. We cannot accept impunity," added Sweden's alternative Ambassador Carl Skau.</p> <p>The threats of prosecution come as the Syrian government is making strides in the battle in Syria. Syrian forces have reclaimed parts of eastern Ghouta and President Trump has indicated a possible withdrawal of the 2,000 troops on the ground, which includes U.S. special forces and the waging of air strikes.</p> <p>Lama Fakih, deputy Middle East director at Human Rights Watch lamented the lack of action by saying in part: "One year after the horrific sarin attack on Khan Sheikhoun, neither the UN Security Council nor the Organization for the Prohibition of Chemical Weapons has acted to uphold the prohibition against chemical weapon attacks."</p> <p>Markram told the Council that "efforts have continued toward the destruction of the two remaining</p>

	<p>chemical weapons production facilities, by the Syrian Arab Republic."</p> <p>"Destruction of these facilities, which will be verified by the OPCW, is expected to be completed within two to three months from the start of destruction," Markram said.</p> <p>At the council meeting, Haley brought Dr. Mamoun Morad who is the doctor that was on duty in Khan Sheikhoun last year and was featured in a "60 Minutes" broadcast.</p> <p>Last month, Haley warned that Washington "remains prepared to act if we must." On Wednesday, she issued a new warning.</p> <p>"Even as the Security Council has remained deadlocked, some have stood up to demand accountability for the use of chemical weapons," Haley said. "The General Assembly overwhelmingly approved the creation of the International, Impartial and Independent Mechanism on crimes committed in Syria, which is collecting evidence for future prosecutions."</p> <p>French Ambassador Francois Delattre added to the warning by saying in part: "Let us not be mistaken, the use of chemical weapons brings to the fore the threat to the international nonproliferation regime."</p>

<b>HEADLINE</b>	<b>04/04 US to withdraw from Syria 'in months'?</b>
<b>SOURCE</b>	<a href="https://www.cbsnews.com/news/dni-dan-coats-says-decision-on-u-s-troop-withdrawal-from-syria-has-been-made/">https://www.cbsnews.com/news/dni-dan-coats-says-decision-on-u-s-troop-withdrawal-from-syria-has-been-made/</a>
<b>GIST</b>	<p>Director of National Intelligence Dan Coats said Wednesday morning that a decision was made Tuesday about U.S. troops in Syria and whether they will be withdrawn, CBS News' Mary Walsh reports, and he said that a statement would be released shortly.</p> <p>But soon after Coats made the remark, White House press secretary Sarah Sanders issued a statement that said nothing about troop removal from Syria. Nor did it offer a timeline.</p> <p>"The military mission to eradicate ISIS in Syria is coming to a rapid end, with ISIS being almost completely destroyed," the statement said. "The United States and our partners remain committed to eliminating the small ISIS presence in Syria that our forces have not already eradicated. We will continue to consult with our allies and friends regarding future plans. We expect countries in the region and beyond, plus the United Nations, to work toward peace and ensure that ISIS never re-emerges."</p> <p>CBS News "Face the Nation" anchor Margaret Brennan reports that at the all-hands-on-deck Syria meeting Tuesday, President Trump was seized by the idea of a complete U.S. military withdrawal from Syria. He had said earlier in the day that he would decide "very quickly" whether to remove troops from Syria, declaring that their primary mission had been to defeat the Islamic State insurgents, and "we've almost completed that task."</p> <p>Despite the opposition of Defense Secretary Jim Mattis and Joint Chiefs Chairman Joseph Dunford, as well as his entire national security team, Mr. Trump said he wants to completely pull out of Syria within "months." Brennan reports that Dunford and Mattis tried to intervene, and when Mattis said that this would be an inadequate amount of time to complete the mission, he was told the decision had been made. The president also does not want to continue the U.S. stabilization efforts and believes the Saudis will for the bill for efforts to de-mine and clear the areas liberated from ISIS. Those efforts also include restoring water, power and other infrastructure.</p> <p>Mr. Trump did not seem to be convinced by arguments that a rapid withdrawal will result in handing the territory over to Iran and Russia or that ISIS has not been dealt an "enduring defeat." He was complaining that the U.S. is doing it all and needs to get out.</p>

The Syria meeting did not provide the clarity the State Department was looking for on Friday's decision by the White House to halt \$200 million funding for U.S. reconstruction efforts in Syria, CBS News' Kylie Atwood reports, based on her conversations with three State Department officials. The projects to restore essential services for Syrians -- including de-mining -- will continue only until the 2017 money runs out, which should be in a matter of weeks.

Mr. Trump has said that he wants other countries to foot the bill for reconstruction and stabilization efforts, but no other country or body has yet officially agreed. The State Department is not part of those discussions at this time. They are being led by Trump. Before Tuesday's meeting, the State Department tried to remind the Pentagon ahead of the White House meeting that the stabilization programs often create a safer environment for U.S. boots on the ground. The fact that these programs were not a focal part of the discussion indicates that the military had its own fight to consider -- Mattis focused on making the case for giving military operations more time in Syria, which Mr. Trump is resisting.

Before former Secretary of State Rex Tillerson left office, he gave a speech laying out the administration's Syria policy. That included a commitment to staying in Syria until the fight against ISIS is finished. He also described efforts to take on Iran in the region, as a whole. He warned that "disengagement from Syria would provide Iran a golden opportunity to further strengthen its position in Syria. Mr. Trump was said not to have receive that open-ended speech well.

President Trump has asked Saudi Arabia to contribute more money to the efforts on the ground in Syria, though there is no formal commitment on that yet. A Saudi official told CBS News that, as of March 2018, the Kingdom of Saudi Arabia has donated nearly \$820 million to support Syria since the inception of the Syrian civil war. This aid has been in the form of food and water security, sanitation projects, emergency relief, shelters for displaced Syrians, education, among others, and has been distributed in a concentrated manner across various locations, including: Syria, Jordan, Lebanon, and Turkey."

The Pentagon is also not convinced that the fight against ISIS is over.

<b>HEADLINE</b>	<b>04/04 Egypt jails 35 for life on terror charges</b>
<b>SOURCE</b>	<a href="http://abcnews.go.com/International/wireStory/egypt-sentences-35-life-terror-charges-54225524?cid=clicksource_76_4_article%20roll_articleroll_hed">http://abcnews.go.com/International/wireStory/egypt-sentences-35-life-terror-charges-54225524?cid=clicksource_76_4_article%20roll_articleroll_hed</a>
<b>GIST</b>	<p>Egypt on Wednesday sentenced 35 alleged Muslim Brotherhood members to life in prison for allegedly forming "terrorist cells" to attack security forces and state institutions.</p> <p>The Sohag Criminal Court in central Egypt sentenced another 155 defendants to three to 15 years on similar charges, including plotting to kill public figures and security officials, and joining an outlawed group, a reference to the Brotherhood. The verdict can be appealed, and 124 suspects who remain at large will be re-tried once they are apprehended.</p> <p>Also on Wednesday, an Egyptian military court sentenced four suspected Muslim Brotherhood members to life imprisonment on terror-related charges, a defense lawyer said. Two of the suspects were sentenced in absentia and they will be re-tried once they are apprehended, Khaled el-Masry told The Associated Press.</p> <p>The court sentenced two others to 10 years each and acquitted 13, he said. The charges include plotting militant attacks against the security personnel and bombing malls in Cairo in addition to belonging to the Muslim Brotherhood group, he said.</p> <p>The Brotherhood won a series of free elections after Egypt's 2011 uprising, and a senior Brotherhood figure, Mohammed Morsi, was elected president in 2012. A year later, the military overthrew Morsi amid mass protests against his rule. Authorities have since branded the Brotherhood a terrorist organization.</p>

HEADLINE	<b>04/04 US forces in Syria set up new positions</b>
SOURCE	<a href="http://abcnews.go.com/International/wireStory/us-forces-syria-setting-front-line-positions-54236331?cid=clicksource_76_4_article%20roll_articleroll_hed">http://abcnews.go.com/International/wireStory/us-forces-syria-setting-front-line-positions-54236331?cid=clicksource_76_4_article%20roll_articleroll_hed</a>
GIST	<p>A week ago, there was just a single house where U.S. soldiers had hoisted an American flag on a hill not far from a tense front line in Syria.</p> <p>On Wednesday, there was a growing fortified position with a perimeter of large sand barriers and barbed wire, a new watch tower and a half-dozen armored vehicles.</p> <p>Even as U.S. President Donald Trump spoke of pulling out of Syria "very soon," an Associated Press team saw American forces setting up front-line positions outside the strategic northern town of Manbij, west of the Euphrates River.</p> <p>The area is the scene of a tense standoff. U.S.-backed Kurdish-led forces who hold Manbij are facing off against Turkish-backed Syrian fighters.</p> <p>Turkey has vowed to retake Manbij and other Kurdish-held territory along the Syrian-Turkish border; the U.S. troops stationed here are a key reason why they are holding back.</p> <p>The U.S.-led coalition in Syria said last week that there were no U.S. bases in the area and that U.S. patrols were not fixed in one place.</p> <p>In response to an AP query, Pentagon spokesman Eric Pahon said the coalition cannot discuss specific movements and locations of forces in Syria.</p> <p>He said that commanders are delegated the authority and the responsibility to position people and resources needed to accomplish the mission and to protect themselves.</p> <p>"Occasional modifications to force size would therefore be normal," Pahon said in an email.</p> <p>The AP team, which was escorted by Kurdish fighters, saw that the new U.S. outpost was a work in progress.</p> <p>A half-dozen armored vehicles sat on opposite sides of the outpost, each with a soldier on watch. A couple of soldiers at one end plowed the ground to lay sandbags, while another group worked out at the other end. Inside an observation post atop a roof, a soldier scanned the horizon through binoculars. A forklift was parked near some wooden planks, indicating more work remains to be done.</p> <p>The outpost was clearly visible from a main road, with civilians and a mosque nearby.</p> <p>A front-line commander in Manbij and a member of the Manbij Military Council, the joint Kurdish-Arab body leading the U.S.-allied forces here, said the post went up a week ago.</p> <p>"We are 1 kilometer from (the village of) Datat, the front line. There is a new U.S. position constructed here. It has been here for seven or eight days here," said the commander, who spoke on condition of anonymity in line with the Kurdish-led force's regulations but goes by the nom de guerre of Ali Manbij.</p> <p>Previously, the U.S. forces only patrolled the front line and kept one position near Manbij, but now more forces are expected at the new post, the local commander said.</p> <p>"Before, it was only patrols. Now it is better," he said. "It is to protect the area and to ensure that there is no attack from Turkey or from the mercenaries in the area."</p>

	A Kurdish official on the site said more such posts are expected to be built along the more than 50-kilometer front line with Turkey-backed Syrian fighters.

<b>HEADLINE</b>	<b>04/04 Turkey: oust Kurds from northern Syria</b>
<b>SOURCE</b>	<a href="http://abcnews.go.com/International/wireStory/leaders-russia-iran-turkey-meet-syria-54223537?cid=clicksource_76_4_article%20roll_articleroll_hed">http://abcnews.go.com/International/wireStory/leaders-russia-iran-turkey-meet-syria-54223537?cid=clicksource_76_4_article%20roll_articleroll_hed</a>
<b>GIST</b>	<p>Turkish President Recep Tayyip Erdogan said Wednesday that his military "won't stop" trying to oust Syrian Kurdish fighters from northern Syria, as he met with the leaders of Russia and Iran for talks on trying to resolve the conflict.</p> <p>The three countries, which have teamed up to work for a Syria settlement despite their differences, reaffirmed their commitment to Syria's territorial integrity and the continuation of local cease-fires. They called on the international community to provide more aid for war-ravaged Syria.</p> <p>Erdogan, President Vladimir Putin of Russia and Iranian President Hassan Rouhani were holding their second summit to discuss Syria's future since attending a similar meeting in Sochi, Russia, in November. Russia and Iran have provided crucial support to President Bashar Assad's forces, while Turkey has backed the rebels seeking to overthrow him.</p> <p>Speaking at a joint news conference, Erdogan said Turkish troops, which last month took control of the northwestern Kurdish enclave of Afrin, would move eastward into Manbij and other areas controlled by the U.S.-backed militia, the Peoples' Protection Units, or YPG, which Turkey considers to be terrorists.</p> <p>"I say here once again that we will not stop until we have made safe all areas controlled by the (YPG), starting with Manbij," Erdogan said.</p> <p>He stressed that Turkey's fight against the YPG would not distract from efforts to eliminate the remnants of Islamic State group from the country.</p>

<b>HEADLINE</b>	<b>04/05 Big crack: East Africa splitting in two?</b>
<b>SOURCE</b>	<a href="https://www.cnn.com/2018/04/05/africa/crack-africa-rift-valley-continent-splitting-two/index.html">https://www.cnn.com/2018/04/05/africa/crack-africa-rift-valley-continent-splitting-two/index.html</a>
<b>GIST</b>	<p>(CNN)A large crack, stretching several kilometres, made a sudden appearance recently in south-western Kenya.</p> <p>The tear, which continues to grow, caused part of the Nairobi-Narok highway to collapse and was accompanied by seismic activity in the area.</p> <p>The Earth is an ever-changing planet, even though in some respects change might be almost unnoticeable to us. Plate tectonics is a good example of this. But every now and again something dramatic happens and leads to renewed questions about the African continent splitting in two.</p> <p>The Earth's lithosphere (formed by the crust and the upper part of the mantle) is broken up into a number of tectonic plates.</p> <p>These plates are not static, but move relative to each other at varying speeds, "gliding" over a viscous asthenosphere.</p> <p>Exactly what mechanism or mechanisms are behind their movement is still debated, but are likely to include convection currents within the asthenosphere and the forces generated at the boundaries between plates.</p> <p>These forces do not simply move the plates around, they can also cause plates to rupture, forming a rift and potentially leading to the creation of new plate boundaries. The East African Rift system is an example of where this is currently happening.</p> <p>The East African Rift Valley stretches over 3,000km from the Gulf of Aden in the north towards Zimbabwe in the south, splitting the African plate into two unequal parts: the Somali and Nubian plates.</p> <p>Activity along the eastern branch of the rift valley, running along Ethiopia, Kenya and Tanzania, became</p>

evident when the large crack suddenly appeared in south-western Kenya.

When the lithosphere is subject to a horizontal extensional force it will stretch, becoming thinner. Eventually, it will rupture, leading to the formation of a rift valley.

This process is accompanied by surface manifestations along the rift valley in the form of volcanism and seismic activity. Rifts are the initial stage of a continental break-up and, if successful, can lead to the formation of a new ocean basin.

An example of a place on Earth where this has happened is the South Atlantic ocean, which resulted from the break up of South America and Africa around 138m years ago -- ever noticed how their coastlines match like pieces of the same puzzle?

The East African Rift is unique in that it allows us to observe different stages of rifting along its length. To the south, where the rift is young, extension rates are low and faulting occurs over a wide area. Volcanism and seismicity are limited.

Towards the Afar region, however, the entire rift valley floor is covered with volcanic rocks. This suggests that, in this area, the lithosphere has thinned almost to the point of complete break up.

When this happens, a new ocean will begin forming by the solidification of magma in the space created by the broken-up plates. Eventually, over a period of tens of millions of years, seafloor spreading will progress along the entire length of the rift.

The ocean will flood in and, as a result, the African continent will become smaller and there will be a large island in the Indian Ocean composed of parts of Ethiopia and Somalia, including the Horn of Africa.

Dramatic events, such as sudden motorway-splitting faults or large catastrophic earthquakes may give continental rifting a sense of urgency but, most of the time, it goes about splitting Africa without anybody even noticing.

<b>HEADLINE</b>	<b>04/04 Why female shooters are rare</b>
<b>SOURCE</b>	<a href="https://www.cnn.com/2018/04/04/health/female-shooters-youtube/index.html">https://www.cnn.com/2018/04/04/health/female-shooters-youtube/index.html</a>
<b>GIST</b>	<p>(CNN)As the investigation continues into why a female shooter opened fire at YouTube headquarters, data show that it's rare for women to carry out such shootings -- making Tuesday's incident unusual.</p> <p>The shooting unfolded at the San Bruno, California, company premises when a woman shot and injured three people, and then apparently took her own life, officials said.</p> <p>She appeared to have killed herself with a handgun, San Bruno Police Chief Ed Barberini said. The woman has been identified as Nasim Najafi Aghdam, a 39-year-old from San Diego, California.</p> <p>The motive remains unclear.</p> <p>Women are rarely behind active shooting incidents, according to data from an FBI study.</p> <p>The FBI examined active shooter incidents, defined as "an individual engaging in killing or attempting to kill people in a confined and populated area" in the United States. Nine of the 220 incidents that had been identified by the FBI (about 4%) had female shooters, according to the FBI list from 2000 to 2016.</p> <p>The women in those shootings were usually armed with handguns and opened fire inside colleges, businesses, their current or former workplaces, according to the list.</p>

The latest incident at YouTube may not qualify as a mass shooting or murder as three of the victims are hospitalized with injuries.

But in general, there are less female shooters when it comes to firearm homicides, said Adam Lankford, criminal justice professor at the University of Alabama.

FBI data from 2016 showed that 7.6% murder offenders in 2016 were female.

"Research shows that basically males commit more homicides than females, regardless of the subtype of homicide," Lankford said.

When it comes to mass shootings, there isn't one accepted definition. The Gun Violence Archive, which compiles data, defines it as an incident in which an offender shoots or kills four or more people. And the Congressional Research Service's defines it as when the perpetrator kills four or more people, selecting victims randomly and attacks in a public place.

But in those incidents, female mass shooters are rare.

"Men commit the overwhelming majority of mass shootings for basically the same reasons they commit most violent crimes," Dewey G. Cornell, a licensed forensic clinical psychologist and director of the Virginia Youth Violence Project at the University of Virginia, wrote in an email to CNN on Tuesday night.

"Men tend to be more violent than women because of a complex interaction of evolutionary and psycho-social factors. Men tend to be more aggressive and less inhibited by empathy, and men in distress seem to be less willing to turn to others for help," he wrote.

None of the perpetrators behind the 28 mass attacks in 2017 were female, according to a report by the US Secret Service.

A study led by Lankford, published in the journal *Violence and Victims*, looked at 292 public mass shooters worldwide from 1966 to 2012 and found that only one of those was female.

When asked why women are rarely mass shooters, Lankford said: "We can't really answer that question of differences between male and female offenders because we don't have enough female offenders. The problem, or the good news, is we don't have enough female offenders for a statically significant sample."

But there have been cases where women have carried out deadly mass shootings.

A married couple, Syed Rizwan Farook, and his wife, Tashfeen Malik massacred 14 people at a holiday party in 2015 in San Bernardino, California. Farook had worked with the San Bernardino County health department, which was hosting the party when the attack took place. They were both killed in a shootout with police.

On January 30, 2006, Jennifer San Marco visited her former place of employment, a postal distribution center in Goleta, California, and fatally shot six employees after killing a one-time neighbor.

She then killed herself.

HEADLINE	04/05 Retiring with \$1M nest egg is enough?
SOURCE	<a href="https://www.cbsnews.com/news/will-1-million-be-enough-in-retirement/">https://www.cbsnews.com/news/will-1-million-be-enough-in-retirement/</a>
GIST	When talking about saving for retirement, we're often told that a \$1 million nest egg is the magic number to aim for. But depending on where you live as a senior, \$1 million may not get you very far.

GOBankingRates analyzed the buying power of \$1 million across all 50 states and found that it might last for less than 12 years in retirement, or it might last upward of 26 years, depending on your zip code. It pays to review this data because it could not only inform your decision on where to retire, but also prompt you to boost your savings efforts during your working years.

#### **Where \$1 million won't get you very far**

Those states that tend to have the highest cost of living in general are also the least retiree-friendly, monetarily speaking. In Hawaii, for example, a \$1 million nest egg will last just 11 years and 11 months on average when you factor in costs such as housing and groceries, which are higher there than in any other state in the nation.

Meanwhile, a \$1 million nest egg will typically last for 16 years and five months in California and 17 years in Alaska. Chalk it up to high housing prices for the former and high food and consumer goods costs for the latter.

Moving over to the East Coast, we find that a \$1 million nest egg in New York will last for 17 years and one month on average, mostly due to outrageous housing costs. And retirees won't fare much better in Massachusetts, where \$1 million will last 17 years and four months for the typical retiree.

#### **Where \$1 million will last much longer**

On the other hand, a \$1 million nest egg will serve you pretty well in Mississippi, where you'll get a good 26 years and 4 months of covered expenses out of that sum. In Arkansas, \$1 million will enable the average senior to cover living expenses for 25 years and six months, and in Oklahoma, that sum will last for 25 years and two months.

If you don't mind the cold, you'll do pretty well with a \$1 million savings balance in Michigan. That sum will last the typical senior for a full 25 years. The same holds true for retirees who choose to settle down in Tennessee.

#### **Make sure your savings last**

If you're intent on retiring comfortably (which you should be), you can take certain steps to ensure that your savings hold up, regardless of where you live. For one thing, save more. There's no rule stating that once you hit the \$1 million threshold, it's time to stop, so aim to max out your IRA or 401(k) during the latter part of your working years, even if you have saved nicely to date.

Those 50 and over can contribute up to \$6,500 a year to an IRA and \$24,500 a year to a 401(k). Max out the latter for just five years, and you'll boost your nest egg by \$122,500 without factoring in investment performance.

Once you've established your nest egg, you'll want to keep it invested smartly to ensure an appropriate amount of growth during retirement. To this end, resist the urge to dump your stocks the minute you stop working. Holding stocks as a senior will allow your savings to grow even once you're no longer actively contributing, thus allowing that money to last longer.

But don't go crazy with stocks, either. If the market takes a major dip and you're forced to sell investments at a loss because you need the money, you'll risk running out of it later in life. Rather, aim for a relatively equal distribution of stocks and bonds during your earlier retirement years, and gradually shift away from stocks over time.

Finally, if you are going to retire in a more expensive state, you may need to get creative about generating extra income as a senior since your nest egg itself will only get you so far. Thankfully, you have plenty of options in this regard. You can try renting out a portion of your home, monetizing a hobby or consulting part-time in your former field, to name just a few.

Knowing how well your savings will hold up can help you make smart decisions about where to retire.

That said, don't give up on living out your dream just because your ideal locale is pricier than some of its counterparts. If you've always wanted to retire in Hawaii, you may have other means of generating income that allow you to live there comfortably, even if you've only amassed \$1 million to date.

The key is to be informed as well as flexible in your approach to spending and earning money.

<b>HEADLINE</b>	<b>04/04 Experts: sin taxes worth the effort</b>
<b>SOURCE</b>	<a href="https://www.nbcnews.com/health/health-news/taxing-sodas-junk-food-tobacco-works-task-force-argues-n862816">https://www.nbcnews.com/health/health-news/taxing-sodas-junk-food-tobacco-works-task-force-argues-n862816</a>
<b>GIST</b>	<p>Taxing junk food, sodas, tobacco and other unhealthy products work to cut both disease and the cost to society and are well worth the effort, experts argued on Wednesday.</p> <p>A global analysis of such “sin” taxes show they discourage people from smoking and from eating and drinking unhealthy foods, and raise money to help fight and treat the diseases they cause.</p> <p>And, contrary to popular belief, these taxes do not disproportionately hurt the poor, the experts found.</p> <p>“Taxes are an underused instrument for the prevention of premature death and disease because they can discourage consumption of products like tobacco, alcohol, and sugary beverages that contribute to cardiovascular disease, cancers, diabetes, mental health problems, and injuries,” wrote Larry Summers, a former treasury secretary and an emeritus professor at Harvard University.</p> <p>“Tobacco and alcohol taxes consistently raise prices, reduce consumption, and save lives, while generating additional revenues to support public services,” Summers added in a commentary on the study, published in the Lancet Medical Journal.</p> <p>Several U.S. cities have tried to tax or otherwise limit sodas and other sugary drinks. The American Beverage Association has succeeded in taking Philadelphia’s tax to the Pennsylvania state supreme court. San Francisco, Oakland, and Boulder, Colorado as well as other cities have small, one to two-cent per ounce taxes.</p> <p>Studies show the taxes work to reduce consumption. Tobacco taxes are less controversial than taxes on foods and drink, but sugary drinks and junk food have been shown to cause cancer, heart disease, stroke, diabetes and other so-called non-communicable diseases, which are also the biggest killers globally.</p> <p>An argument against the taxes is that they hit poorer people harder, but Louis Niessen of the Johns Hopkins Bloomberg School of Public Health and colleagues reviewed dozens of studies and found the argument does not hold up.</p> <p>“The poor, with already shorter life expectancies and bearing the brunt of undernutrition, malnutrition, childhood diseases, major infections, and pregnancy-related conditions, are the most likely to be affected by non-communicable diseases,” Niessen said in a statement.</p> <p>“Compared with richer households, people with lower incomes get sick more often and die earlier from consuming tobacco, alcohol, and non-essential energy dense foods,” Summers added.</p> <p>And, the researchers said the evidence shows that richer people spend more on alcohol, soft drinks and snacks than do the poor.</p> <p>The World Health Organization said in 2016 that a 20 percent price increase could reduce consumption of sweet drinks by the same proportion.</p>

HEADLINE	<b>04/05 Missionaries spread Christianity to NKorea</b>
SOURCE	<a href="http://abcnews.go.com/International/wireStory/missionaries-border-spread-christianity-north-korea-54248253?">http://abcnews.go.com/International/wireStory/missionaries-border-spread-christianity-north-korea-54248253?</a>
GIST	<p>To the North Koreans gathered beneath a crucifix in an apartment in this northeastern Chinese border region, she is known as "mom." She feeds them, gives them a place to stay and, on occasion, money.</p> <p>In return, the 69-year-old Korean-Chinese woman asks them to study the Bible, pray and sing hymns. She also has a more ambitious, and potentially dangerous, goal: She wants the most trusted of her converts to return to North Korea and spread Christianity there.</p> <p>Along the North Korean border, dozens of such missionaries are engaged in work that puts them and their North Korean converts in danger. Most are South Koreans, but others, like the woman, are ethnic Koreans whose families have lived in China for generations. In recent years, 10 such front-line missionaries and pastors have died mysteriously, according to the Rev. Kim Kyou Ho, head of the Seoul-based Chosen People Network, a Christian group that runs a memorial hall in the South Korean capital for the victims. North Korea is suspected in all those deaths.</p> <p>Hundreds of other missionaries have been imprisoned or expelled by China, which bans foreigners from proselytizing.</p> <p>It is perilous work. Li Baiguang, a Chinese human rights lawyer whose work defending Christian pastors and farmers had prompted repeated death threats, died on Feb. 26, hours after being admitted to a Chinese military hospital for what his relatives described as a minor stomach ailment.</p> <p>The case has prompted calls for an independent investigation from Amnesty International and the Washington-based National Endowment for Democracy, which noted Li had been "detained and physically attacked many times" for his work and cited reports he had recently appeared to be in good health.</p> <p>The Korean-Chinese woman said she is monitored by both North Korean and Chinese authorities, yet, despite the risks, has carried out 20 years of missionary work with North Koreans, mostly women who are in China legally after being granted visas to visit relatives living there.</p> <p>"I always pray and I'm with God, so I'm not worried," said the woman, who despite that assertion asked that her name not be published because of safety concerns for herself, her family and the North Koreans to whom she ministers.</p> <p>She lives so close to North Korea that it is common to see women doing laundry on the other side of the Yalu River or workers riding bicycles past rundown North Korean buildings just a stone's throw away.</p> <p>The border missionaries provide their North Korean visitors with room and board, and those escaping with places to hide. In return, they ask them to memorize the Lord's Prayer, the Apostles' Creed and other prayers. Some of the most trusted converts return home to North Korea and covertly share what they've learned, sometimes carrying Bibles.</p> <p>It's almost impossible to determine what happens when those North Koreans return home to evangelize. From the outside, there is no indication that Christianity has grown in any serious manner in the North in recent years, let alone that it's helping shake North Korean leader Kim Jong Un's power.</p> <p>The North accuses South Korea's spy agency of using missionaries to gather information about North Korea's secretive nuclear program and other sensitive topics, as well as to smuggle propaganda materials via leaflets, CDs and USB sticks, and to build underground churches to undermine Kim's leadership — allegations the Seoul government strongly denies.</p> <p>At least two South Korean pastors are detained in the North on such charges.</p>

	Officially, North Korea says it guarantees freedom of religion to its 24 million people. But in reality, people involved in Bible distribution, secret prayer services and underground church networks are imprisoned or executed, according to activists and defectors. The North has five government-sanctioned churches in Pyongyang, but critics say they are showpiece facilities opened only for foreign visitors.

<b>HEADLINE</b>	<b>04/05 Sumo uproar w/female first responders</b>
<b>SOURCE</b>	<a href="http://abcnews.go.com/International/wireStory/sumo-uproar-women-responders-ordered-ring-54247915?">http://abcnews.go.com/International/wireStory/sumo-uproar-women-responders-ordered-ring-54247915?</a>
<b>GIST</b>	<p>The head of Japan's sumo association has apologized over an incident in which women first responders were asked to get out of the ring as they attempted to revive an official who collapsed.</p> <p>In sumo's tradition, the ring is considered sacred and women are prohibited from entering.</p> <p>That posed a problem Wednesday when Ryoza Tatami, the 67-year-old mayor of Maizuru in northern Kyoto, collapsed during a ring-top speech. Two women, apparently medical experts, rushed in and started performing first aid as several male sumo officials surrounding the mayor looked on.</p> <p>When two more women rose to the ring trying to join the first aid effort, announcements demanded the women get out of the ring.</p> <p>"Ladies, please get off the ring," a sumo referee said, determinedly. "Only gentlemen go up."</p> <p>Footage posted on social media triggered outrage, with many criticizing sumo officials and saying they were choosing tradition over life.</p> <p>Sumo chief Nobuyoshi Hakkaku called the announcement inappropriate and apologized late Wednesday, while thanking the women for working to save the mayor.</p> <p>In a statement, Hakkaku said the announcement was made by an official who panicked after seeing the women in the ring, but never touched on the divisive tradition.</p> <p>"It was an inappropriate response in a life-threatening situation," Hakkaku said.</p> <p>The mayor, who had an acute cerebral hemorrhage, survived and was in stable condition Thursday after receiving emergency surgery at a hospital, city officials said.</p> <p>The footage posted on YouTube was shown on major Japanese networks and other media as the news topped headlines Thursday.</p>

<b>HEADLINE</b>	<b>04/04 NFL player credited in flagging threat</b>
<b>SOURCE</b>	<a href="http://abcnews.go.com/US/england-patriots-receiver-lauded-flagging-school-shooting-threat/story?id=54239920">http://abcnews.go.com/US/england-patriots-receiver-lauded-flagging-school-shooting-threat/story?id=54239920</a>
<b>GIST</b>	<p>The New England Patriots' Julian Edelman, known for his quick feet on the turf, is now being praised for his quick thinking off the field, which may have thwarted another school shooting.</p> <p>In March, an Instagram user notified the NFL wide receiver of a comment posted to Edelman's Instagram account, threatening to shoot up a school.</p> <p>"Dude," the Instagram user said. "There is a kid in your comment section says he [is] going to shoot up a</p>

school, I think you should alert the authority."

Edelman immediately reached out to his assistant in Boston, who reportedly pored over comments in search of the post. She eventually found it. The post said: "I'm going to shoot my school up watch the news."

According to The New York Times, Edelman said he was moved to do something in the wake of the Parkland school shooting in Florida.

"With the emotions of what happened, and I have a kid now, I said, 'Holy Toledo, what is going on?'" he told the Times.

His assistant then reached out to the police in Boston.

"Boston PD reached out to our department. Our on-duty supervisors immediately started looking into the information that was provided," said Capt. Joe Platzer of the Port Huron Police Department in Michigan. "We take these threats very seriously. We look into them very thoroughly. Like we tell everybody, if you see something, if you hear something, say something."

According to Platzer, police traced the message back to a 14-year-old boy in Port Huron, Michigan. He said the teen was brought in for questioning and admitted to writing the threat.

Police also said they found two rifles in the teen's home that belonged to his mother.

The teen, whom police have not identified, was arrested and charged with making a false report of a threat of terrorism, which is a four-year felony in the state.

According to Platzer, Port Huron detectives spoke to Edelman and credited him with bringing the threat forward. Without Edelman's reaction to the alarming social media post, police said, it's likely they would not have known about the threat.

According to authorities, 79 percent of mass casualty attacks last year came with warning signs that were either missed or ignored.

<b>HEADLINE</b>	<b>04/04 Unlikely anthem of teachers' movement</b>
<b>SOURCE</b>	<a href="https://www.cbsnews.com/news/were-not-gonna-take-it-twisted-sister-hit-becomes-unlikely-anthem-of-teachers-movement/">https://www.cbsnews.com/news/were-not-gonna-take-it-twisted-sister-hit-becomes-unlikely-anthem-of-teachers-movement/</a>
<b>GIST</b>	<p>A day after 36,000 Oklahoma teachers took part in a massive walkout demanding higher pay and an increase in school funding, the music teachers among them picked up their instruments and blasted out an unlikely anthem: "We're Not Gonna Take It" by Twisted Sister.</p> <p>"If I didn't have a second job, I'd be on food stamps," Rae Lovelace, a single mom and a third-grade teacher at Leedey Public Schools in northwest Oklahoma told CBS News. She works 30 to 40 hours a week at a second job teaching online courses for a charter school, and she isn't alone.</p> <p>Inside the state capitol on Tuesday, hundreds of teachers boomed as members of the Oklahoma House adjourned without taking up Senate-approved revenue-raising measures for public school classrooms. And outside, protesters let their brass instruments do the talking.</p> <p>Thanks to its catchy and direct refrain, teachers in Kentucky, New Jersey, West Virginia and Pennsylvania have also taken up the metal anthem as a sort of rallying cry over the past several months, prompting Twisted Sister frontman Dee Snider to tweet about the peculiarity of the song choice.</p>

	"While I totally support underpaid teacher's cause, it is kind of weird that a song that was on the "Filthy 15" is now every oppressed groups battlecry," the singer wrote on Twitter.

<b>GIST</b>	<p>SACRAMENTO, Calif. (AP) — Hundreds of federal and local law enforcement agents have seized roughly 100 Northern California houses purchased with money wired to the United States by a Chinese-</p>

based crime organization and used to grow massive amounts of marijuana illegally, authorities said Wednesday.

The raids culminated a monthlong investigation focusing on dozens of Chinese nationals who bought homes in seven counties. Most of the buyers were in the country legally and were not arrested as authorities investigate if they were indebted to the gang and forced into the work, U.S. Attorney McGregor Scott said.

Much of the pot was shipped to Georgia, Illinois, New York, Ohio and Pennsylvania through Atlanta, Chicago and New York City, he said. The drug is legal in California but requires permits to grow and can't be sent across state lines. It is still banned by the U.S. government.

Black-market pot-growing houses have proliferated in the inland California region where authorities carried out the raids, and many of them were traced to Chinese criminal organizations from the San Francisco Bay Area in the mid-2000s, Scott said. The high number of grow houses in the area may be because of low property prices compared with the Bay Area and the state's large Chinese population, the prosecutor said.

Scott called the recent crackdown "a game-changer" that may have cost the criminal organization "hundreds of millions of dollars" in lost drug profits and the money it spent on the homes.

"It hits the criminals right where it counts — in the pocketbook," he said.

Authorities tracked at least 125 wire transfers totaling \$6.3 million from Fujian Province in China, all just below the \$50,000 limit imposed by the Chinese government.

Officials are trying to learn if the homebuyers are what Scott called "indentured servants" — indebted to the Chinese gang and brought to the United States to buy and tend the grow houses. Many speak only Mandarin Chinese.

"We're treating them as victims" who may have been "forced or coerced" to work in what can be toxic environments, FBI Special Agent in Charge Sean Ragan said.

The buyers generally used the same Sacramento real estate agents, borrowed from private lenders instead of traditional banks, and used straw buyers who purchased the properties on behalf of the real owners.

The U.S. crackdown comes as California is months into creating the world's largest legal marijuana market amid uncertainty about whether the U.S. government will try to shut it down.

More than 500 officers, including SWAT teams, fanned out over two days to search and seize 81 houses and two real estate businesses. Another 25 houses were raided previously.

They seized more than 61,000 marijuana plants, 200 kilograms (440 pounds) of processed marijuana, at least \$100,000 in cash and 15 firearms, including one that had been stolen.

The U.S. Department of Justice said it was one of the largest residential forfeiture operations ever. Prosecutors will now ask judges to transfer ownership of the houses to the U.S. government to resell while they track the enterprise back to its roots, Scott said.

Most of the suburban houses were valued at \$300,000 to \$700,000, though some were in rural areas and some in more upscale neighborhoods.

U.S. Attorney General Jeff Sessions said in a statement that transnational criminal organizations are "a blight on our communities, bringing dangerous drugs to our streets and trying to impose a false sovereignty over our neighborhoods."

	The Chinese consulate general's office in San Francisco did not respond to multiple requests for comment.

<b>HEADLINE</b>	<b>04/05 Mosque bombing suspects indicted</b>
<b>SOURCE</b>	<a href="https://apnews.com/2123f101c5a7425c8ac597bacf725cc3/Mosque-bombing-suspects-indicted-on-weapons-charges">https://apnews.com/2123f101c5a7425c8ac597bacf725cc3/Mosque-bombing-suspects-indicted-on-weapons-charges</a>
<b>GIST</b>	<p>URBANA, Ill. (AP) — A federal grand jury in central Illinois has indicted three men suspected of bombing a Minnesota mosque on a charge of possessing a machine gun. A fourth man not linked to the bombing was also indicted.</p> <p>Forty-seven-year-old Michael Hari, 29-year-old Michael McWhorter, 22-year-old Joe Morris and 18-year-old Ellis Mack were arrested on March 13 on the weapons charge. On the same day, Hari, McWorter and Morris, all of Clarence, Illinois, were charged in Minnesota with bombing the Dar al Farooq Islamic Center in Bloomington last August. The explosion caused fire damage, but no injuries.</p> <p>Wednesday's indictment alleges the four men possessed a machine gun from October 2017 through Feb. 27, 2018.</p> <p>U.S. attorney spokeswoman Sharon Paul says the dates of their initial appearances on the indictment have yet to be determined. It wasn't immediately known if the four have attorneys to comment on their behalf.</p>

<b>HEADLINE</b>	<b>04/04 Scientist in smuggling plot jailed</b>
<b>SOURCE</b>	<a href="https://www.washingtontimes.com/news/2018/apr/4/chinese-national-sentenced-121-months-stealing-gen/">https://www.washingtontimes.com/news/2018/apr/4/chinese-national-sentenced-121-months-stealing-gen/</a>
<b>GIST</b>	<p>A Chinese scientist was sentenced to 121 months in federal prison Wednesday for conspiring to steal genetically-modified rice seeds from a Kansas research facility, the Justice Department said.</p> <p>Weiqian Zhang, 51, a Chinese national and U.S. legal permanent resident living in Manhattan, Kansas, was convicted on Feb. 15, 2017, of one count of conspiracy to commit interstate transportation of stolen property and one count of interstate transportation of stolen property.</p> <p>Zhang, who worked as a rice breeder at Ventria Bioscience in Junction City, Kansas. The company develops genetically programmed rice for use in medicine and therapeutics.</p> <p>During his time at Ventria, Zhang stole hundreds of the company's rice seeds and stored them at his residence, according to court documents. Zhang had planned to give the seeds to a Chinese crop research institute, prosecutors allege. Members of that research institute meet Zhang at his Kansas residence in the summer of 2013.</p> <p>On August 7, 2013, U.S. Customs and Border Protection officers found Ventria rice seeds in the luggage of the research institute members as they prepared to return to China, the Justice Department said.</p> <p>“Weiqliang Zhang betrayed his employer by unlawfully providing its proprietary rice seeds to representatives of a Chinese crop institute,” said acting Assistant Attorney General John Cronan. “Today’s sentence demonstrates the significant consequences awaiting those who would steal trade secrets from American companies. The Criminal Division and its law enforcement partners will continue to work closely with companies like Ventria to protect American intellectual property — which is essential to our economy and way of life—against all threats both foreign and domestic.”</p>

<b>HEADLINE</b>	<b>04/04 Lakewood: man tries to run over cop</b>
<b>SOURCE</b>	<a href="http://www.thenewstribune.com/news/local/crime/article207972104.html">http://www.thenewstribune.com/news/local/crime/article207972104.html</a>
<b>GIST</b>	<p>A Lakewood police officer had pulled a man over early Tuesday along Tacoma Mall Boulevard when a 65-year-old Tacoma man ran across the street toward the officer, waving his hands and screaming at the officer before stopping in the middle of the road.</p> <p>The officer told the man that he needed to get out of the street, then returned to the first man's car to continue with his traffic stop.</p> <p>Moments later, the 65-year-old got into his minivan, gunned the engine and attempted to run down the officer before leading him on a chase through two cities, Pierce County prosecutors say.</p> <p>The 65-year-old was arraigned Wednesday afternoon in Pierce County Superior Court on charges of attempted first-degree assault and eluding police. Court Commissioner Meagan Foley set the man's bail at \$500,000 and ordered him to resolve pending warrants in Grays Harbor County, Tacoma and Bonney Lake before being released.</p> <p>The man had pleaded guilty to harassment in Pierce County Superior Court in September 2017 and received a suspended 364-day jail sentence. He has been arraigned three times since then for failing to comply with the terms of the suspended sentence, which was revoked March 16.</p> <p>Once he was handcuffed, read his Miranda rights and placed in the back of the patrol car, the man started yelling that he hated the police officer for ruining his life two weeks before the incident, but he kept using the wrong officer's name. He started praying that the officer would drop dead in the car.</p> <p>The officer had never seen the man before.</p>

<b>GIST</b>	<p>SEATTLE, Wash. -- The FBI says it has found additional packages likely tied to an Everett man charged with shipment of explosives and that the total number of packages stands at 18.</p> <p>An FBI spokeswoman in Seattle said the additional packages "appear similar to those allegedly mailed by" Thanh Cong Phan. Phan, 43, was arrested last week and accused of sending packages to government offices and military installations. Last week, the count of packages tied to him had reached 13.</p> <p>Court documents say several of the packages were tested and found to have small amounts of black explosive powder. There have been no reports that any of the packages exploded.</p> <p>The additional packages were safely recovered and more work needs to be done to establish a definite connection to Phan, the FBI said.</p> <p>The packages were sent to government facilities.</p> <p>The FBI said it doesn't have any information that there are other packages in the mail.</p>

<b>HEADLINE</b>	<b>04/04 Bellingham: cache guns, bombs in home</b>
<b>SOURCE</b>	<a href="http://komonews.com/news/local/search-uncovers-makeshift-bombs-guns-at-felons-home-in-bellingham">http://komonews.com/news/local/search-uncovers-makeshift-bombs-guns-at-felons-home-in-bellingham</a>
<b>GIST</b>	BELLINGHAM, Wash. -- Investigators discovered a cache of guns, ammunition and three makeshift

	<p>explosive devices at the Bellingham home of a convicted felon who is a suspect in a drive-by shooting last month, the Whatcom County Sheriff's Office said.</p> <p>The suspect, Robert K. Chase, has been in jail since he and an accused accomplice were arrested on March 7 following the shooting that nearly wounded a 17-year-old boy, the Bellingham Herald reported. Chase has pleaded not guilty.</p> <p>During the investigation, detectives learned there might be illegal guns and explosives at Chase's home in the 2600 block of Cagey Road.</p> <p>A search warrant served Tuesday morning uncovered three explosive devices -- two described as a makeshift grenade and a third that was a dual-triggered bomb containing pellets and large screws, police said. Bomb squad technicians destroyed the explosive devices.</p> <p>In addition, investigators found two rifles, a handgun, parts and tools used to make fully automatic guns, additional bomb making materials, and thousands of rounds of ammunition.</p> <p>Deputies say state and federal prosecutors are now considering additional charges against Chase, who as a convicted felon is prohibited from owning guns. For now, he remains held on charges related to the drive-by shooting.</p>

<b>HEADLINE</b>	<b>04/04 Sheriff: SUV crash no longer accident</b>
<b>SOURCE</b>	<a href="https://www.cnn.com/2018/04/04/us/hart-family-search/index.html">https://www.cnn.com/2018/04/04/us/hart-family-search/index.html</a>
<b>GIST</b>	<p>(CNN)The mysterious California seaside crash in which at least five members of a family were killed is being labeled a crime by the man heading up the investigation.</p> <p>Mendocino County Sheriff Tom Allman told HLN's "Crime &amp; Justice with Ashleigh Banfield" on Wednesday that Jennifer Hart was driving her family's SUV when it went over a California cliff last week.</p>

The sheriff said Jennifer Hart and spouse Sarah Hart were found dead wearing seat belts, but three children found near the vehicle had not been belted in.

"I'm to the point where I no longer am calling this an accident; I'm calling it a crime," Allman told HLN.

The sheriff said investigators were also looking at a cell phone found near the accident scene on the Northern California coast.

The bodies of Jennifer and Sarah Hart were found on March 26 inside the family's SUV, which had crashed at the rocky shoreline below a cliff. The bodies of three of their children -- Markis, 19, Jeremiah, 14, and Abigail, 14 -- were found nearby.

But their three other children -- Devonte, 15, Hannah, 16, and Sierra, 12 -- are missing, officials said.

A large-scale search and rescue operation for the three missing children continued Wednesday, with about 80 people combing the surrounding area.

A tip led authorities to have divers search the water near the coastline about 30 or 40 miles south of the scene, but Allman said there was nothing yet to report from the search there.

Earlier Wednesday, the California Highway Patrol released a photo of Jennifer Hart shopping at a grocery store a day before her family's SUV plunged off a cliff.

Police also released a fuller timeline of the Hart family's movements before the fatal crash. The Hart family was in and around the Newport, Oregon area around 8:15 a.m. on March 24, and officials believe they then drove south along US 101 until they reached Leggett, California.

The family then traveled south along state Route 1 until they reached Fort Bragg around 8 p.m. that night, and remained there for about a day, police said. California Highway Patrol released an image from surveillance cameras of Jennifer Hart at a Safeway in Fort Bragg on the morning of March 25.

Police had earlier said that several facts led them to believe the crash may have been intentional.

"At this point in our investigation, that is the direction we are going," said Greg Baarts of the California Highway Patrol's Northern Division.

There were no skid marks in the area leading up to the fatal crash.

And there were no witnesses to help guide police on what happened. The SUV was discovered only after a passerby saw the mangled wreckage at the foot of the cliff.

Data from the vehicle's software air bag module suggests the car had stopped at the scenic highway outcrop overlooking the cliff and then accelerated off the road, Baarts said.

<b>HEADLINE</b>	<b>04/04 Police: YouTube shooter 'cooperative'</b>
<b>SOURCE</b>	<a href="https://www.usatoday.com/story/news/2018/04/04/youtube-shooting-suspect-nasim-aghdam/484699002/">https://www.usatoday.com/story/news/2018/04/04/youtube-shooting-suspect-nasim-aghdam/484699002/</a>
<b>GIST</b>	Eleven hours before Nasim Aghdam launched a terrifying attack at YouTube's California headquarters, police found her sleeping in her car about 30 miles away — a "calm and cooperative" woman during a 20-minute interaction.  A few hours later, she would practice shooting at a gun range. And then she opened fire on people after

decades of commitment to animal rights and veganism.

Wednesday brought those stunning revelations as federal investigators searched houses connected with the Iranian-born Aghdam and tried to piece together the final hours of someone apparently filled with fury at the popular video-sharing service. The incident prompted YouTube officials to boost security at their offices worldwide.

Aghdam, 39, killed herself after shooting three people at the San Bruno campus on Tuesday afternoon, sending thousands of tech workers fleeing and shocking Silicon Valley. Police say the only connection they can find between Aghdam and YouTube is her anger that the service had recently changed how she was compensated for posting videos.

Aghdam, an animal rights activist, posted a mishmash of workout videos, rants against animal cruelty and vegan cooking tips online. Her father told police she was upset because she felt YouTube was making it harder for her to earn money via advertising on her videos.

"They only care for personal short term profits and do anything to reach their goals..." Aghdam posted on her website. "There is no free speech in the real world and you will be suppressed for telling the truth that is not supported by the system."

The ongoing investigation aims to understand Aghdam's motivations and actions, including how and where she acquired the 9mm handgun used in the shooting, and her movements and social media posts in the days before the attack.

Aghdam described herself on her Instagram account as "Athlete Artist Comedian Poet Model Singer Host Actor Director Producer," and the videos she made mix satire, glamour shots and dark humor to rail against authority, capitalism and popular culture. She posted videos in English, Turkish and Farsi.

Wednesday, police in the town of Mountain View, Calif., disclosed that officers there found Aghdam sleeping in her car the night before the shooting, contacting her at the request of her parents. Mountain View is about 30 miles south of San Bruno, and Aghdam in a conversation at approximately 1:40 a.m. told officers she was looking for work in the area.

Because she didn't appear to be a danger to herself or others, Mountain View police left her alone: "At no point during our roughly 20-minute interaction with her did she mention anything about YouTube, if she was upset with them, or that she had planned to harm herself or others. Throughout our entire interaction with her, she was calm and cooperative."

Eleven hours later, police said, Aghdam walked into the YouTube building and opened fire. Three people were shot and a fourth suffered an ankle injury while fleeing, San Bruno Police Chief Ed Barberini said. He told reporters on Wednesday that Aghdam visited a local gun range on Tuesday morning and that she gained access to the YouTube campus through a parking garage. In a statement, YouTube officials said Aghdam never actually entered the building itself.

Police said there was no evidence she knew the victims or that individuals were specifically targeted. "Whether that rises to the level of terrorism will be determined over the next few weeks," Barberini added.

<b>HEADLINE</b>	<b>04/05 Motive: YouTube shooter's videos</b>
<b>SOURCE</b>	<a href="https://abcnews.go.com/Technology/wireStory/youtube-shooters-bizarre-videos-key-suspected-motive-54248523?">https://abcnews.go.com/Technology/wireStory/youtube-shooters-bizarre-videos-key-suspected-motive-54248523?</a>
<b>GIST</b>	The woman whom police say shot three people at YouTube's headquarters was prolific at producing videos and posting them online, many of them bizarre such as a clip in which she removes a revealing purple dress to expose fake breasts with the message, "Don't Trust Your Eyes."

In others, Nasim Aghdam exercises, promotes animal rights and explains the vegan diet, often in elaborate costumes or carrying a rabbit.

The videos have become central to the motive authorities have settled on for the shooting: Aghdam's anger with the policies of YouTube — the world's biggest online video website.

Nasim Aghdam, who was in her late 30s, posted the videos under the online name Nasime Sabz, and a website in that name decried YouTube's policies, saying the company was trying to "suppress" content creators.

"Youtube filtered my channels to keep them from getting views!" one of the messages said. "There is no equal growth opportunity on YOUTUBE or any other video sharing site, your channel will grow if they want to!!!!!"

People who post on YouTube can receive money from advertisements that accompany their videos, but the company "de-monetizes" some channels for reasons including inappropriate material or having fewer than 1,000 subscribers.

YouTube had no comment about any actions related to Aghdam's videos.

Nasim Aghdam also ran a Farsi-language public channel on the messaging app Telegram, which had 6,000 followers. Telegram reportedly has some 40 million users in Iran. In one post she says, "Internet crackdown and filtering is increasing in the West."

Police who found Nasim Aghdam sleeping in her car early Tuesday in the city of Mountain View about 25 miles (40 kilometers) from YouTube headquarters said she was calm and said nothing about being angry with YouTube or having any plans to harm others or herself.

"It was a very normal conversation. There was nothing in her behavior that suggested anything unusual," said Mountain View Police Chief Max Bosel.

Later that day, Aghdam went to a gun range before walking through a parking garage into a courtyard at YouTube's campus south of San Francisco, where she opened fire with a handgun and wounded three people, police said. She then killed herself.

Two women wounded in the shooting were released Wednesday from a San Francisco hospital. The third victim, a 36-year-old man, was upgraded from critical to serious condition.

The suspect's father, Ismail Aghdam, told the Bay Area News Group he warned police the day before the attack that his daughter was upset with how YouTube handled her videos and might be planning to go to its offices.

<b>HEADLINE</b>	<b>04/04 Florida police arrest 'fake veteran'</b>
<b>SOURCE</b>	<a href="http://abcnews.go.com/US/man-arrested-pretending-veteran-claimed-earned-20-medals/story?id=54232971">http://abcnews.go.com/US/man-arrested-pretending-veteran-claimed-earned-20-medals/story?id=54232971</a>
<b>GIST</b>	<p>A Florida man who posed as a U.S. military veteran and claimed to have earned more than 20 medals and badges has been arrested, according to police.</p> <p>Port St. Lucie Police had been investigating 46-year-old Edward Louis Liroff for three weeks before they arrested him after he allegedly tried to apply for a job using a fraudulent DD214 form, a certificate of release from active duty, said Master Sgt. Frank Sabol.</p>

	<p>On March 8, Liroff applied for a code compliance officer position with the City of Port St. Lucie, Sabol said. The city's assistant director of neighborhood services then contacted Port St. Lucie Officer Joseph Byrne -- a military veteran -- to help review the form.</p> <p>Byrne began an investigation into Liroff after noting several irregularities in the form, Sabol said.</p> <p>On the form, Liroff stated that he served in the U.S. military from 1988 to 2004 and listed that he was the recipient of more than 20 medals and badges, included the Distinguished Service Medal, the Silver Star Medal, the Purple Heart Medal and the Air Medal for Valor, according to authorities.</p> <p>As a result of the investigation, Byrne discovered that Liroff had never served in the U.S. military, Sabol said. In addition, Byrne discovered that Liroff had been receiving treatment from the Veteran's Administration and had fraudulently obtained a Florida driver's license with a veteran designation and a Purple Heart vehicle registration, Sabol said.</p> <p>The DD214 form claiming veteran's preference Liroff submitted with his job application was also determined to be fake, according to authorities.</p> <p>Liroff was arrested on Wednesday after Byrne presented his findings to the Florida State Attorney's Office. He has been charged with uttering a forged instrument, unlawful use of uniforms, medals or insignia and fraudulently obtaining a driver's license, jail records show.</p>

<b>HEADLINE</b>	<b>04/04 DOJ sues Bosnia war criminals</b>
<b>SOURCE</b>	<a href="https://www.upi.com/Top_News/US/2018/04/04/Justice-Dept-sues-Bosnia-war-criminals-to-strip-US-citizenship/4801522863588/?utm_source=fp&amp;utm_campaign=ts_tn_us&amp;utm_medium=3">https://www.upi.com/Top_News/US/2018/04/04/Justice-Dept-sues-Bosnia-war-criminals-to-strip-US-citizenship/4801522863588/?utm_source=fp&amp;utm_campaign=ts_tn_us&amp;utm_medium=3</a>
<b>GIST</b>	<p>April 4 (UPI) -- The Justice Department filed lawsuits Wednesday against two convicted Bosnian war criminals, who it says fraudulently gained naturalized U.S. citizenship.</p> <p>According to the lawsuits, Edin Dzeko, 46, and Sammy Rasema Yetisen, 45, were part of an elite unit of the Army of the Republic of Bosnia and Herzegovina.</p> <p>U.S. officials said during the Bosnian war in the 1990s, the two killed civilians and prisoners of war due to their religion and ethnicity, concealed their crimes and fraudulently obtained refugee status and eventual naturalized U.S. citizenship.</p> <p>The lawsuits say Dzeko and Yetisen participated in the April 16, 1993, Trusina massacre, an attack that killed 22 unarmed civilians. The attackers targeted Bosnian-Croats because of their Christian religion and Croat ethnicity.</p> <p>A Bosnian court found that Dzeko and Yetisen played key roles in the massacre and were both part of a firing squad that also executed six unarmed prisoners of war and civilians.</p> <p>To make sure they all died, Yetisen shot them repeatedly -- while Dzeko killed a crippled elderly man and shot his wife because she wouldn't stop crying, according to the lawsuits.</p> <p>"Dzeko and Yetisen concealed and affirmatively misrepresented their criminal history, military service, and persecutory acts throughout their immigration proceedings," the department said. "Such benefits would have been denied had immigration authorities known about the defendants' roles in the Trusina massacre."</p> <p>U.S. Attorney General Jeff Sessions said the United States will not be a safe haven for war criminals.</p>

<b>HEADLINE</b>	<b>04/04 Police: YouTube shooter at gun range</b>
<b>SOURCE</b>	<a href="https://www.cbsnews.com/news/youtube-shooting-officials-update-san-bruno-california-headquarters-suspect-nasim-najafi-aghdam-live-updates-today-4-4-2018/">https://www.cbsnews.com/news/youtube-shooting-officials-update-san-bruno-california-headquarters-suspect-nasim-najafi-aghdam-live-updates-today-4-4-2018/</a>
<b>GIST</b>	<p>SAN BRUNO, Calif. -- A Southern California woman went to a gun range Tuesday prior to opening fire at the YouTube campus, injuring three people before allegedly killing herself, authorities said Wednesday. San Bruno Police Chief Ed Barberini gave an update Wednesday following the shooting at the sprawling headquarters in San Bruno, California.</p>

	<p>San Bruno police identified the suspect late Tuesday as Nasim Najafi Aghdam, 39. She was found dead at the scene from what authorities believe is a self-inflicted gunshot wound. Three people were transported to local hospitals with gunshot wounds.</p> <p>Barberini said the motive appears to be that Aghdam was upset with the "policies and practices" of YouTube, but they are continuing to investigate. In several videos posted to the platform, Aghdam accused YouTube of censoring her and expressed anger to the company.</p> <p>Barberini told reporters Aghdam went to a "local" gun range before the shooting, but didn't name the facility. Aghdam legally purchased and owned the handgun with which she opened fire on a campus patio while workers were eating lunch, according to police.</p> <p>Aghdam is believed to have accessed the building by a parking garage after parking her car at an adjacent business, Barberini said. Police are still working to determine the level of security in the location where she entered the campus.</p>

<b>HEADLINE</b>	<b>04/04 Iran: supporter Sufi leader faces death</b>
<b>SOURCE</b>	<a href="http://abcnews.go.com/International/wireStory/report-supporter-sufi-leader-sentenced-death-54235447?cid=clicksource_76_4_article%20roll_articleroll_hed">http://abcnews.go.com/International/wireStory/report-supporter-sufi-leader-sentenced-death-54235447?cid=clicksource_76_4_article%20roll_articleroll_hed</a>
<b>GIST</b>	<p>Iran's semi-official ISNA news agency is reporting that a supporter of a Sufi Islam leader who rammed a bus into a group of policemen, killing three and injuring 30 before being arrested, has been sentenced to death.</p> <p>The incident in Tehran took place during February clashes between the Sufi leader's followers and police.</p> <p>Mohammad Salas testified during hearings in March that he had no intention of killing the policemen but was trying to flee the clashes.</p> <p>Sufi leader Nourali Tabandeh's supporters had rallied near his residence fearing he would be arrested, despite police assurances he would not.</p> <p>Iran's clerically overseen government frowns on Sufism, the mystical strain of Islam. Many conservatives view it as a deviation from the faith.</p>

<b>HEADLINE</b>	<b>04/04 Cameroon: 18 seized hostages freed</b>
<b>SOURCE</b>	<a href="http://abcnews.go.com/International/wireStory/cameroon-security-forces-free-18-hostages-separatists-54226860?cid=clicksource_76_4_article%20roll_articleroll_hed">http://abcnews.go.com/International/wireStory/cameroon-security-forces-free-18-hostages-separatists-54226860?cid=clicksource_76_4_article%20roll_articleroll_hed</a>
<b>GIST</b>	<p>Cameroon security forces have freed 18 hostages, including 12 European tourists, who had been seized by separatists fighting for the independence of English-speaking regions, the government said Wednesday.</p> <p>Seven Swiss and five Italian hostages were freed Monday in Manyu in the southwest after heavy exchanges of gunfire, said spokesman Issa Tchiroma Bakary. Residents helped the military locate the hostages, whose vehicle had been seized while they were visiting a lake in the region several days earlier, he said.</p> <p>"Many hostage-takers were neutralized," he said.</p> <p>Six municipal counsellors in Cameroon's northwest who were kidnapped by separatists also have been freed, the spokesman said.</p>

	<p>Separatists had warned the council members not to vote in March 25 senatorial elections, saying that English-speaking parts of Cameroon were now an independent state called Ambazonia and would not accept any election organized by a foreign country.</p> <p>Tchiroma said at least a dozen other people, including two senior state officials, are still being held hostage by the separatists.</p> <p>The tensions in Cameroon started in 2016 when English teachers and lawyers went on strike against the use of the French language. Violence has intensified in Anglophone regions since then. Hundreds of people, including 30 policemen and soldiers, have been killed this year, the government said.</p>

HEADLINE	<b>04/04 Claim: DHS profiled leftist protesters</b>
SOURCE	<a href="https://www.thedailybeast.com/wearing-black-feds-say-you-may-be-an-anarchist-newly-released-documents-show">https://www.thedailybeast.com/wearing-black-feds-say-you-may-be-an-anarchist-newly-released-documents-show</a>
GIST	<p>Counterprotesters at white supremacist rallies risk being characterized as “anarchist extremists,” even if they have nothing to do with the movement, Department of Homeland Security documents show.</p> <p>A September 2016 DHS report describes law enforcement action during clashes between white supremacists and antifascists (commonly known as “antifa”). The report, obtained by the government transparency nonprofit Property of the People and shared with The Daily Beast, reveals how the Obama DHS profiled leftist protesters. Just months after the report’s release, the Trump Justice Department would use similar, overbroad profiles to prosecute hundreds of people who protested at President Donald Trump’s inauguration ceremony.</p> <p>The DHS report highlights “two violent clashes in 2016 in Sacramento and Anaheim between anarchist extremists and lawfully protesting white supremacists at legally permitted rallies.”</p> <p>The report uses those cases to describe how law enforcement might target future “anarchist extremists” who protest at white supremacist rallies. But the agency’s description of “anarchist extremists” is dubious and suggests the DHS might be conflating multiple distinct social movements.</p> <p>Anarchists want to abolish the government. Some anarchists also participate in the antifascist movement, although the latter also includes leftists and liberals who support support the idea of a state.</p> <p>The report’s guide to “symbols often associated with anti-racist anarchist extremists” includes an “A” in a circle (a popular anarchist symbol), but also images associated with the broader leftist movement. One symbol, three downward arrows in a circle, originated in 1930s Germany among opponents to the Nazi party. Originally designed to plaster over swastikas, the symbol has become common among antifascists and other anti-Trump protesters. Another antifascist symbol in the report is a pair of flags: one black in reference to the anarchist movement, and another red to symbolize other leftist affiliations. The list of symbols also includes a crossed-out swastika, and the “Good Night White Pride” symbol: the silhouette of a man kicking a Nazi.</p> <p>The report also includes a list of “potential indicators of planned violence” that law enforcement can use to “justify increased suspicion” of counterprotesters. The list includes things like carrying knives, but also innocuous activity like wearing dark clothing or bandanas, scouting a marching route in advance, and carpooling to a demonstration—actions that could apply to a wide swath of protesters.</p> <p>The DHS’ inclusion of generalized behavior is “troubling and consistent with what we’ve seen of the FBI targeting and surveilling environmentalists, civil rights activists, and lumping them together based on a few incidents,” Vera Eidelman, a Brennan fellow at the ACLU’s Speech, Privacy, and Technology Project</p>

told The Daily Beast. “There’s a tendency to sweep up a huge group of people who might not even share an ideology.

“The carpooling example is particularly interesting because all people are doing is pooling resources. You could argue that going with friends is part of the appeal,” Eidelman said, adding that the scrutiny might chill political activism by large groups.

Already, sweeping definition of left-wing extremism has had real consequences. On Jan. 20, 2017, three months after the DHS report’s publication, D.C. police arrested hundreds of people at a protest outside Trump’s inauguration. Prosecutors initially pressed charges against 200 people, accusing them of conspiring to riot based on evidence as thin as the defendants allegedly walking with a group or wearing dark clothing.

Six defendants were later found not guilty on all charges in December. The U.S. attorney’s office subsequently dropped charges against 129 other defendants but is still pushing charges against 59 people, including a journalist who was arrested while covering the anti-Trump protests, and an activist who was arrested at his home after the protests. He previously told The Daily Beast he wasn’t even at the demonstrations when the mass arrests occurred.

<b>HEADLINE</b>	<b>04/03 Report: 11.8M enrolled in 2018 ACA</b>
<b>SOURCE</b>	<a href="https://www.washingtonpost.com/national/health-science/nearly-12-million-people-enrolled-in-2018-health-coverage-under-the-aca/2018/04/03/247d3496-377c-11e8-8fd2-49fe3c675a89_story.html?utm_term=.d004a65cb83a">https://www.washingtonpost.com/national/health-science/nearly-12-million-people-enrolled-in-2018-health-coverage-under-the-aca/2018/04/03/247d3496-377c-11e8-8fd2-49fe3c675a89_story.html?utm_term=.d004a65cb83a</a>
<b>GIST</b>	<p>A total of 11.8 million Americans signed up for Affordable Care Act health insurance for 2018, a drop of just 400,000 from the previous year despite widespread predictions that enrollment would plummet amid political and insurance industry turbulence surrounding the law.</p> <p>The final figures, released Tuesday by the Centers for Medicare and Medicaid Services, show that the proportion of first-time customers for this year dipped slightly, from 31 percent to 27 percent, while the high proportion qualifying for government subsidies that help consumers afford their insurance premiums stayed level at 83 percent.</p> <p>The enrollment total in the new federal report is identical to that from a compilation issued in February by an outside group, the National Academy for State Health Policy.</p> <p>In an uncharacteristic move, CMS Administrator Seema Verma announced the fifth-year tally in a series of tweets shortly before the report was issued late Tuesday afternoon. The tweets were a blend of praise for what she called “the most cost-effective and successful open enrollment to date” and the Trump administration’s characteristic naysaying about the marketplaces that were created by the sprawling 2010 health-care law it has been seeking to dismantle.</p> <p>Verma noted that, without taking subsidies into account, the average monthly premium for 2018 health plans was \$621, or 30 percent more than last year’s average of \$476. But the data show that customers with incomes too high to be eligible for a subsidy tended to choose less expensive health plans, averaging \$522 per month.</p> <p>A greater share of the 2018 customers picked the lowest tier of coverage, known as bronze plans, compared with the year before.</p> <p>The federal report also shows that 70 percent of customers had incomes between the federal poverty level and 250 percent of that — roughly the same as a year ago. This is the group that previously qualified for less expensive deductibles and other lower out-of-pocket expenses because of cost-sharing reduction subsidies to ACA insurers — payments that President Trump ended last fall.</p>

	<p>The report makes clear that all of the enrollment drop occurred in the 39 states that rely on the federal insurance marketplace and HealthCare.gov. In states operating their own marketplaces under the law, enrollment was flat.</p> <p>ACA proponents reacted to Tuesday’s statistics by saying they provide fresh evidence that Americans want the insurance the law’s marketplaces offer, which is intended for people who cannot get access to affordable health benefits through a job.</p> <p>Josh Peck, co-founder of the pro-ACA group Get America Covered, said, “While enrollment remained steady because of high consumer satisfaction and more affordable premiums for those who qualify for tax credits, enrollment would have outpaced previous years’ if the administration had focused on signing people up instead of derailing open-enrollment efforts.”</p>
<p><a href="#">Return to Top</a></p>	

<b>HEADLINE</b>	<b>04/04 China imposes tariffs on 106 US products</b>
<b>SOURCE</b>	<p><a href="https://www.washingtonpost.com/world/asia_pacific/china-fires-back-at-trump-with-tariffs-on-106-us-products-including-soybeans-cars/2018/04/04/338134f4-37d8-11e8-b57c-9445cc4dfa5e_story.html?utm_term=.18f7661f4e98">https://www.washingtonpost.com/world/asia_pacific/china-fires-back-at-trump-with-tariffs-on-106-us-products-including-soybeans-cars/2018/04/04/338134f4-37d8-11e8-b57c-9445cc4dfa5e_story.html?utm_term=.18f7661f4e98</a></p>
<b>GIST</b>	<p>BEIJING — China responded to Trump’s latest trade move by announcing tariffs on 106 U.S. products, including soybeans, airplanes and cars, in the latest escalation of what risks becoming a tit-for-tat trade war between the world’s two largest economies.</p> <p>The plan, which was announced Wednesday, would see China slap 25 percent levies on a range of U.S. goods worth about \$50 billion dollars. Though China said the timing depends on U.S. moves, the news is likely to have an impact on markets, including the soybean market.</p> <p>The announcement came just a day after the White House unveiled plans for tariffs on \$50 billion in Chinese imports across 1,300 categories, targeting 25 percent levies on Chinese goods ranging from electronics, aerospace and machinery to phones, shoes and furniture.</p> <p>Though a Chinese response was widely expected, the speed of the announcement came as a surprise, deepening fears of a rapid escalation that could hurt both sides.</p> <p>The targeting of U.S. soybean exports by China could have a major political impact stateside. Soybeans are the top U.S. agricultural export to China and U.S. soybean farmers and their allies fought hard to prevent tariffs.</p> <p>In late March, the U.S. announced steel and aluminum tariffs that would penalize China to the tune of about \$3 billion a year. On Monday, China returned fire by imposing similar measures on \$3 billion dollars worth of U.S. pork, fruit and other items.</p> <p>Then, on Tuesday, the White House went ahead with tariffs that target manufacturing technology, arguing that Chinese trade practices have unfairly hurt U.S. business. China vowed a swift response — and followed through.</p>

<b>HEADLINE</b>	<b>04/03 Supervised injection sites a solution?</b>
<b>SOURCE</b>	<p><a href="https://www.usnews.com/news/healthiest-communities/articles/2018-04-03/as-donald-trump-calls-for-war-on-drugs-a-push-for-safe-injection-sites">https://www.usnews.com/news/healthiest-communities/articles/2018-04-03/as-donald-trump-calls-for-war-on-drugs-a-push-for-safe-injection-sites</a></p>
<b>GIST</b>	<p>AMID A PRESIDENTIAL call for ominous commercials and increased use of the death penalty to curb the U.S. opioid crisis, areas around the country are toying with a different idea to stop the deadly scourge:</p>

letting people use drugs freely, but under supervision.

The notion of so-called safe injection or consumption sites butts heads with what critics of President Donald Trump's recently announced plan to battle the epidemic consider a return to the "war on drugs" policies of the past. Such facilities allow people to use previously obtained drugs like heroin in a sterile environment under the supervision of medical professionals or trained staff, who would be available to educate on safe drug use, administer the counteracting drug naloxone in the event of an overdose and offer access to treatment or other social services if requested.

#### The Per Capita Cost of Opioid Crisis

Approximately 100 of these types of legally sanctioned sites exist around the world, with the first established in Bern, Switzerland, in 1986. Vancouver's Insite, which opened in 2003, was the first sanctioned supervised injection facility in North America.

While none exist in the U.S., officials in places like San Francisco; Seattle; Philadelphia; New York City; Portland, Maine; and Ithaca, New York, all have considered opening or allowing one, despite the threat of likely legal action by the federal government.

In January, Philadelphia officials announced the city would encourage private-sector development of consumption sites by nonprofits or medical organizations, and since have met with residents in neighborhoods that could host the sites – such as Kensington and Fox Chase – to discuss concerns about them. They have not announced a date for when a site might open.

Across the country, officials in Seattle and King County, Washington, approved the opening of two sites – including one in the city itself – more than a year ago and allocated \$1.3 million in budget funding to help them do so. They, too, have faced opposition and are stuck on picking a location.

Another front-runner to be first in the country is San Francisco, where safe-use facilities could open as soon as this summer. They may be backed initially by private funding to avoid liability issues.

"We are still working out legal and siting issues and are not in a position to announce locations or partner organizations yet," Rachael Kagan, a spokeswoman for the San Francisco Department of Public Health, tells U.S. News.

On average, 115 Americans die each day from an opioid overdose, according to the Centers for Disease Control and Prevention. Studies have said safe injection sites mitigate risky drug behavior, reduce the frequency of overdoses, curb the spread of HIV and viral hepatitis, do not increase drug use or local crime and have the potential to save millions of dollars in the U.S. public health sector.

Proponents say the sites are proven tools that hold enormous potential for battling opioid abuse in the U.S. And they contend a return to a "war on drugs" strategy – initially touched off by President Richard Nixon in the 1970s, taken up by President Ronald Reagan in the 1980s, and recently revisited by Trump and Attorney General Jeff Sessions – will only deepen a punitive mentality that has proved ineffective in the past.

"There is something fundamentally wrong with the way that we approach drug policy [in] that, number one, this has been a problem for so long, and number two, that we keep pretending that it's a new problem, which also has been going on for 100 years or more," says David Herzberg, an associate professor of history at the University at Buffalo-State University of New York, who's working on a book about the history of addiction to pharmaceuticals in the U.S.

While government officials and critics have argued safe injection sites could encourage increased drug use and expose populations to more drug activity, Herzberg says drugs are already around, and the sites instead would provide safety and potential help for drug users while moving their activities out of the public eye.

"It provides them with contact with people who know stuff about drugs, and if they want help, they're seeing someone every day – it's not like they wanted help on Thursday, and, you know, by next Tuesday when they saw somebody, that moment was over," Herzberg says. "They stay in contact with people who care about their lives, and if opportunities to help them get better come up, then they get to take them – that's awesome."

Shilo Murphy, an activist behind the push for a Seattle injection site, says there have been "zero deaths in any consumption room in the entire world in all 30 years they've been in operation."

"On top of that, there've been hundreds of thousands of people referred to detoxing treatment and services," says Murphy, founder of Urban Survivors Union and The People's Harm Reduction Alliance. "They're not moralistic enough for people, but they are incredibly successful."

However, Dr. Jay Butler, chief medical officer in the Alaska Department of Health and Social Services, says he's unsure if the evidence surrounding safe injection sites shows an actual, overall shift toward decreasing drug use and increasing treatment access.

Notably, Canada is grappling with a fentanyl-fueled opioid crisis of its own, and British Columbia – home to Vancouver and the Insite facility – has seen a spike in illicit-drug overdose deaths from approximately 500 in 2015 to nearly 1,000 in 2016 and more than 1,400 last year. Vancouver police also say around 200 potential overdose deaths were reversed at five safe consumption sites in a roughly two-month period from the end of 2016 to early 2017.

"It's definitely a harm-reduction tool. Is it ready for prime time? I'm not sure. We've talked a lot with our colleagues in Vancouver. What I haven't seen from Vancouver is data that it's making an impact [on its drug use epidemic], and I really struggle with that," Butler says.

"It's intriguing in terms of doing something to save lives, but ... it's a tourniquet," he continues. "A gunshot wound to the leg, you put a tourniquet on it, but you don't then walk away and say, 'Hey, good luck with that.' You get people into definitive care. We're talking about things that will save lives, but they're not solving that person's problem, much less the larger public health issue."

Aside from the debate over their effectiveness, the sites would appear to run afoul of federal law. A portion of U.S. Code known as the "crack house statute" makes it illegal to "knowingly open or maintain ... any place" for the use of a controlled substance. Clients using the clinic also would be testing the federal prohibition on illicit drug possession.

"It's enabling and continuing people to use, and with all the fentanyl that's in the region right now, there is no safe way to use fentanyl, period. There just isn't," says Patrick Trainor, a spokesman for the Drug Enforcement Agency's Philadelphia Division. "To say that these safe injection sites are a way to use safely is not something that we agree with."

Trainor says he also remains unconvinced that supervised injection sites would result in a big push for people who use drugs to enter treatment, especially if they're only on-site for a limited period of time.

"To think that they're going to be engaged in that time period is just not a realistic thing in our experience," Trainor says.

Other federal authorities have come out against the potential sites as well. The U.S. Attorney's Office for the District of Vermont, for example, warned local advocates late last year that opening the sites would expose users, site workers and overseers to criminal charges, and could result in "federal forfeiture" of the venues themselves.

"Such facilities would also threaten to undercut existing and future prevention initiatives by sending exactly the wrong message to children in Vermont: the government will help you use heroin," a statement

	<p>from the office said. "It is a crime, not only to use illicit narcotics, but to manage and maintain sites on which such drugs are used and distributed."</p> <p>Still, Urban Survivors Union's Murphy contends there's no silver bullet for solving the opioid crisis, but that safe consumption sites are a piece of the puzzle that means fewer people dying from fatal overdoses. With medically trained staff on hand, people can continue to use drugs until they may be ready to seek treatment, at which point they'd have the opportunity and access to do so immediately, rather than having to wait days or weeks.</p> <p>"The idea that we would choose not to use a piece of the puzzle has always surprised me," Murphy says.</p> <p>He also says he's not afraid of the likely legal battles looming over opening such a site, predicting the fight eventually will go all the way to the U.S. Supreme Court.</p>

<b>HEADLINE</b>	<b>04/03 Tariffs on China electronic imports?</b>
<b>SOURCE</b>	<a href="http://time.com/5227104/trump-tariffs-50-billion-chinese-electronics-imports/?xid=homepage">http://time.com/5227104/trump-tariffs-50-billion-chinese-electronics-imports/?xid=homepage</a>
<b>GIST</b>	<p>WASHINGTON (AP) — The Trump administration on Tuesday escalated its aggressive actions on trade by proposing 25 percent tariffs on \$50 billion in Chinese imports to protest Beijing’s alleged theft of American technology.</p>

The Office of the U.S. Trade Representative issued a list targeting 1,300 Chinese products, including industrial robots and telecommunications equipment. The suggested tariffs wouldn't take effect right way: A public comment period will last until May 11, and a hearing on the tariffs is set for May 15. Companies and consumers will have the opportunity to lobby to have some products taken off the list or have others added.

The latest U.S. move risks heightening trade tensions with China, which on Monday had slapped taxes on \$3 billion in U.S. products in response to earlier U.S. tariffs on steel and aluminum imports.

“China’s going to be compelled to lash back,” warned Philip Levy, a senior fellow at the Chicago Council on Global Affairs and an economic adviser to President George W. Bush.

Indeed, China immediately threatened to retaliate against the new U.S. tariffs, which target the high-tech industries that Beijing has been nurturing, from advanced manufacturing and aerospace to information technology and robotics.

Early Wednesday in Beijing, China’s Commerce Ministry said it “strongly condemns and firmly opposes” the proposed U.S. tariffs and warned of retaliatory action.

“We will prepare equal measures for U.S. products with the same scale” according to regulations in Chinese trade law, a ministry spokesman said in comments carried by the official Xinhua News Agency.

The U.S. sanctions are intended to punish China for using strong-arm tactics in its drive to become a global technology power. These include pressuring American companies to share technology to gain access to the Chinese market, forcing U.S. firms to license their technology in China on unfavorable terms and even hacking into U.S. companies’ computers to steal trade secrets.

The administration sought to draw up the list of targeted Chinese goods in a way that might limit the impact of the tariffs — a tax on imports — on American consumers while hitting Chinese imports that benefit from Beijing’s sharp-elbowed tech policies. But some critics that American will end up being hurt.

“If you’re hitting \$50 billion in trade, you’re inevitably going to hurt somebody, and somebody is going to complain,” said Rod Hunter, a former economic official at the National Security Council and now a partner at Baker & McKenzie LLP.

Even representatives of American business, which have complained for years that China has pilfered U.S. technology and discriminated against U.S. companies, were critical of the administration’s latest action.

“Unilateral tariffs may do more harm than good and do little to address the problems in China’s (intellectual property) and tech transfer policies,” said John Frisbie, president of the U.S.-China Business Council.

Even some technology groups contending directly with Chinese competition expressed misgivings.

<b>HEADLINE</b>	<b>04/03 Russia warns: NATO crossed ‘red line’</b>
<b>SOURCE</b>	<a href="https://www.washingtontimes.com/news/2018/apr/3/russia-claims-nato-has-crossed-red-line-boosting-e/">https://www.washingtontimes.com/news/2018/apr/3/russia-claims-nato-has-crossed-red-line-boosting-e/</a>
<b>GIST</b>	NATO has recently crossed a “red line” and aggravated relations with Russia by bolstering its air defenses in Eastern Europe, according to Russian officials.  “NATO countries are trying to find a balance between defense and dialogue, but they have crossed a red line,” Russian deputy foreign minister Alexander Grushko told the state-run RIA Novosti news agency on

Tuesday in Moscow.

In the past week, Russian military operatives have conducted ballistic missile and interceptor missile test-launches in response to reports that NATO is conducting a major military build-up along its borders.

“Not only in politics, but also in the field of military development, NATO began resorting to Cold War schemes that should have been left in the past,” Mr. Grushko said.

Relations between the Kremlin and the West have soured dramatically ever since a nerve-agent attack last month on former Russian spy, Sergei Skripal, in Britain last month — which British intelligence has blamed on Moscow.

Last week, NATO joined a wave of countries and groups expelling Russian diplomats in response to the attacks, expelling seven Russian diplomats. Overall more than 20 countries expelled a total of more than 150 Russian diplomats, including 60 kicked out by the U.S.

Russia denounced the actions as “boorish” and retaliated by expelling a roughly equal number of Western diplomats.

On the NATO defense front — alongside last week’s expulsions — reports also emerged from Warsaw that its officials had agreed to purchase \$4.75 billion worth of Patriot missile defense systems from the U.S..

“There is no justification for NATO’s military building up near the borders of Russia,” Mr. Grushko told Pravda on Tuesday.

<b>HEADLINE</b>	<b>04/02 IG: ATF not adequately tracking weapons</b>
<b>SOURCE</b>	<a href="https://www.washingtontimes.com/news/2018/apr/2/atf-not-adequately-tracking-weapons-ig-report-says/">https://www.washingtontimes.com/news/2018/apr/2/atf-not-adequately-tracking-weapons-ig-report-says/</a>
<b>GIST</b>	<p>The ATF’s inadequate record-keeping policies creates a risk of ammunition, explosives and less-lethal devices such as smoke canisters being lost or stolen without the bureau knowing, according to a report released Monday by the Justice Department’s inspector general.</p> <p>In fact, the poor record-keeping has already resulted in 23 firearms issued to agents being either lost or stolen between 2014 and 2017, the inspector general reported.</p> <p>A total of 26 weapons were reported lost, stolen or missing, although three of them disappeared during shipment and thus were not the Bureau of Alcohol, Tobacco, Firearms and Explosives’ fault, the inspector general said. One of those three weapons was used in a crime.</p> <p>Of the 26 missing firearms, 15 would eventually be recovered, according to the report.</p> <p>However, that number of guns lost during that three-year period actually represents a “substantial improvement” over what a similar report uncovered in 2008, said Michael Horowitz, the Justice Department’s inspector-general.</p> <p>Marino Vidoli, assistant director of office field operations for the ATF, said in a letter to Mr. Horowitz that the bureau concurs with his recommendations.</p> <p>A survey of 13 ATF field offices found inconsistent or lacking records for munitions and explosives, and also found mixing different types of ammunition on tracking records, the report said.</p> <p>The field offices underestimated total ammunition by nearly 31,000 rounds in just those 13 office — a</p>

number likely many times greater nationwide across the ATF's roughly 275 field offices, the report said.

Mr. Horowitz said the lack of proper record-keeping, despite the lower number of missing guns, is still troubling because audits in 2002 and 2008 raised similar concerns that led to new ATF storage policies.

“Our findings are particularly concerning because prior audits identified similar issues and recommended corrective actions,” he said.

The ATF field offices surveyed were not following ammunition storage protocols, the report said. Specifically, six ATF locations were missing ammunition records from periods ranging between 15 and 38 months over the past four years. The Nashville field office did not begin using the required ammunition records until OIG investigators asked for copies before their site visit.

Furthermore, 11 of the 13 ATF sites audited found that officials had not consistently documented additions or withdrawals on ammunition records. For example, the Cheyenne, Wyoming, office cataloged 1,800 rounds of 5.56-caliber rifle ammunition on July 7, 2014. The next entry, dated Oct. 1, 2014, shows a balance of 900 rounds, but no records documented what happened to the other 900 rounds of ammunition.

The inspector general blamed the inventory discrepancy on misinterpretation of ATF policy. For example, field office officials said some of the inventory discrepancies occurred because the ATF requires offices to only account for full cases of ammunition. Thus, once a case is opened, the entire case is removed from the records regardless of how many rounds are in that case. But the inspector general said the requirement to count full cases of ammunition applies only to biannual ATF-wide property inventories.

Although the inspector general found that the ATF had strong physical control of its explosives, it identified two types of explosives at the bureau's National Center for Explosive Training and Research that had incorrect balances, according to the report. The discrepancies were because ATF officials relied upon the quantities handwritten on the outside of the explosive box rather than the counting the actual amount inside.

“As a result, ATF cannot provide evidence that the explosives were not lost or stolen either prior to or after the donated explosives were received,” the report said.

<b>HEADLINE</b>	<b>04/03 DACA program grows after restart order</b>
<b>SOURCE</b>	<a href="https://www.washingtontimes.com/news/2018/apr/3/daca-program-grows-after-judges-ordered-restart/">https://www.washingtontimes.com/news/2018/apr/3/daca-program-grows-after-judges-ordered-restart/</a>
<b>GIST</b>	<p>More than 64,000 illegal immigrant Dreamers have applied to renew their status under the Obama-era DACA program since a federal judge ordered the Trump administration to restart the program, the government said in new numbers released Tuesday.</p> <p>About half of them have already been approved, with the others pending, according to the data from U.S. Citizenship and Immigration Services.</p> <p>All told, nearly 694,000 people were being protected from deportation under the Deferred Action for Childhood Arrivals program as of last week.</p> <p>The numbers suggest significant interest in the program, which President Trump tried to cancel last year, announcing a six-month phaseout he hoped would pressure Congress to come up with a more permanent solution for the Dreamers.</p> <p>But a federal judge in California, followed by another judge in New York, ruled the phaseout illegal, saying Homeland Security cut too many corners. Both judges ordered Mr. Trump to restart the program by allowing those who had been protected before to apply for renewals — though no first-time applications</p>

	<p>are allowed.</p> <p>Immigrant-rights groups had grappled with how to approach the renewal process, with many Dreamers wary of engaging with the Trump administration at this point.</p> <p>DACA grants a two-year amnesty from deportation and allows Dreamers to get work permits, which then allow them to get Social Security cards, apply for driver’s licenses and access some taxpayer benefits.</p> <p>President Obama announced the DACA program in 2012, and since then nearly 815,000 people have been approved. Of those, some have found other more permanent legal status, while others have left the country or dropped out of the program, and several thousand were kicked out for criminal behavior — leaving 694,000 people covered as of March 31.</p> <p>The chaos of the phaseout and the judges’ subsequent restart has complicated matters, and left Dreamers scrambling.</p> <p>Some 2,200 Dreamers are slated to have their DACA status expire this month. Of those, 1,020 have renewal applications pending. For May, 7,010 people could lose status — and 2,680 have applied for renewal.</p> <p>Those who have renewal applications pending are safe from deportation even if they haven’t been officially reapproved, the government says.</p>

<b>HEADLINE</b>	<b>04/03 Military to guard border until wall is up?</b>
<b>SOURCE</b>	<a href="https://www.washingtontimes.com/news/2018/apr/3/trump-says-hell-guard-mexican-border-military/">https://www.washingtontimes.com/news/2018/apr/3/trump-says-hell-guard-mexican-border-military/</a>
<b>GIST</b>	<p>President Trump said Tuesday that he will deploy the U.S. military to the Mexican border to plug security gaps until his border wall is completed and that his increasingly tough talk has already forced Mexican officials to break up the massive caravan of migrants who were en route to the U.S.</p> <p>“Until we can have a wall and proper security, we’re going to be guarding our border with the military. That’s a big step. We really haven’t done that before, or certainly not very much before,” the president said with Defense Secretary James Mattis at his side.</p> <p>The White House later elaborated on Mr. Trump’s plans, saying he envisions “mobilization of the National Guard” — though what tasks they would perform remains unclear.</p> <p>His demand for the military to assist on the border surprised Mexico, which lodged an official demand for more details, but said it would not welcome whatever he had in mind.</p> <p>Officials said Mr. Trump, who last week floated the idea of using Pentagon money to fund construction of the border wall, explored his plans in a Tuesday afternoon meeting with Mr. Mattis, Homeland Security Secretary Kirstjen Nielsen and Gen. Joseph F. Dunford, chairman of the Joint Chiefs of Staff.</p> <p>The president’s ire has been stoked over the past week as the “Viacrucis Migrantes” caravan, consisting of perhaps 1,500 migrants from Central America, makes its way across Mexico intent on reaching the U.S.</p> <p>The caravan is a symbol of flaccid U.S. laws and weak enforcement by Mexico, Mr. Trump said. Unless Mexico does more to divert the caravan, he said, he will cancel the North American Free Trade Agreement and take other steps to punish Latin American nations.</p> <p>The Mexican government responded late Monday. It said it wouldn’t be bullied but insisted that it was working to handle the caravan.</p>

Mexican officials said in a statement that the caravan's participants were in the country illegally and some 400 had been deported. Mexico also said it was reaching out to screen others in the caravan and offer some of them refugee status, which would allow them to remain in Mexico.

Still, reports on the ground in Mexico this week suggested that the Mexican government's intervention was having an effect and the caravan was losing steam. Some splinter groups said they would try to reach the U.S., and others were planning to pursue humanitarian visas in Mexico.

The president, in his appearances Tuesday, also cut the size of his planned border wall, saying he envisions "700 to 800 miles of the 2,000-mile stretch" covered by a wall when all is said and done.

That is down from the 900-mile maximum Mr. Trump suggested in July and is less than the 1,000 miles of barrier that the Homeland Security Department requested in a report to Congress this year laying out \$25 billion in border security needs.

The land border, which stretches 1,954 miles, currently has 354 miles that are protected by pedestrian fencing and another 300 miles with vehicle barriers, which can hinder cars and trucks but not people and wildlife.

Much of that fencing was erected during the past decade, when President George W. Bush deployed the National Guard to do a massive round of fence-building and to plug gaps in surveillance and intelligence gathering while the Border Patrol staffed up.

It's not clear whether that is how Mr. Trump envisions using the military this time.

Mexico seemed surprised by the president's declaration Tuesday and asked the Trump administration for clarity on its military plans.

"It's certainly not something the Mexican government welcomes," Geronimo Gutierrez, Mexico's ambassador to the U.S., told CNN.

Under the Posse Comitatus Act, signed into law in 1878, U.S. troops are severely restricted in what actions they can take on U.S. soil.

<b>HEADLINE</b>	<b>04/03 DNR supports 'Dreamer' firefighters</b>
<b>SOURCE</b>	<a href="http://www.thenewstribune.com/news/local/news-columns-blogs/matt-driscoll/article207690624.html">http://www.thenewstribune.com/news/local/news-columns-blogs/matt-driscoll/article207690624.html</a>
<b>GIST</b>	<p>Most people run away from fires.</p> <p>Noe Vazquez decided to run toward them.</p> <p>In 2016 Vazquez, a 20-year-old "Dreamer" from Tonasket — a small town of just over 1,000 residents near Washington's northern border — began what he hoped would be a career with the state Department of Natural Resources wildland firefighting team.</p> <p>What Vazquez couldn't have realized at the time was that only a year later that career would be jeopardized after his DACA status was rescinded. Eventually, Vazquez found himself hundreds of miles from home, detained at Tacoma's Northwest Detention Center and facing the very real prospect of deportation to a country he's never known.</p> <p>Amidst an increasingly contentious national DACA debate, something very unusual happened next — the state Department of Natural Resources stepped up and went to bat for Vazquez and the thousands of Dreamers just like him.</p>

“When I read about Noe’s story, it really sort of put a face on this issue as we watch the debate about DACA,” said Public Lands Commissioner Hilary Franz. “It was absolutely critical that I share this story.”

That’s why in early March she called a press conference to highlight Vazquez’s plight. Together with Vazquez’s legal team from Colectiva Legal and the Washington Immigrant Solidarity Network, Franz gathered in front of TV cameras and a contingent of journalists in an attempt to explain what was at stake not just for Vazquez but for the state’s largely volunteer wildland firefighting team.

Franz’s office brought the issue to the attention of U.S. Senator Murray, who dispatched a representative to the press conference.

“For a lands commissioner, this was a pretty extraordinary step to take,” a DNR spokesman said bluntly.

Considering the highly politicized and partisan immigration debate, taking a high-profile stance in support of Dreamers didn’t come without risks for Franz and the agency she leads. Tasked with managing more than 3 million acres of land, it would have been easier, and certainly far simpler, for DNR to stay silent.

According to Franz, the decision to speak up was an uncomplicated one.

Vazquez isn’t the only Dreamer on DNR’s wildland firefighting team, she said, and each are important, valued members of a team that makes significant sacrifices each year to keep the state safe.

Franz said DNR must recruit more than 500 seasonal firefighters each season to help battle blazes across the state. Dreamers like Vazquez often bring a skillset to the job — including the ability to communicate important information to rural, Spanish-speaking communities — that’s essential to success.

Vazquez — thanks to his year of experience fighting wildfires in 2016 — had already proven to be up to the job.

“The reality is we need more people who are willing to put their lives on the line and be brave and strong and have the kind of work ethic and commitment ... that we see in Noe,” Franz said.

After spending three weeks in Tacoma, Vazquez was released on bond while his case proceeded. Luckily, two weeks ago, his DACA status was renewed — thanks in part to the legal assistance he received.

The good news is Vazquez is once again free to live without fear and free to get back to fighting fires.

At least for now.

That’s because on Easter President Donald Trump took to Twitter to deliver his latest incendiary and somewhat incoherent immigration rant, further stoking the DACA debate and — once again — putting the future of Dreamers at risk.

“NO MORE DACA DEAL!” the commander-in-chief declared in his typical all caps, no-nuance style.

When I saw the news, I couldn’t help but think of Vazquez. I thought about the contributions he’s made and the impact he hopes to have for his small, rural community.

“(Dreamers are) trying to do something for our communities and trying to be someone for this country,” Vazquez said. “I’m just hoping that a permanent solution gets put into place and something gets worked out.”

<b>HEADLINE</b>	<b>04/03 Avalanche forecasters in uphill battle</b>
<b>SOURCE</b>	<a href="https://crosscut.com/2018/04/avalanche-forecasters-grapple-deadly-season">https://crosscut.com/2018/04/avalanche-forecasters-grapple-deadly-season</a>
<b>GIST</b>	<p>On the morning of Monday, Feb. 26, Jeremy Allyn got the kind of call he dreads. An avalanche had killed two teenagers in Snoqualmie Pass the day before. As a professional observer with the Northwest Avalanche Center, Allyn and a co-worker were tapped to investigate the cause of the fatal slide.</p> <p>They arrived at the Alpentel Valley parking lot just as the ambulance was pulling out with the bodies of 18-year-old Niko Suokko and 17-year-old Declin Ervan, both of Bellevue, who were asphyxiated by a crushing quantity of snow that buried them on a steep area known as the Snow Lake Divide.</p> <p>After a debriefing from the search-and-rescue team, the pair skied two miles into the valley to the avalanche site. Like a forensic team investigating a crime scene or a plane crash, they snapped photos and gathered technical information about the avalanche’s depth and the snowpack on which it slid. The accident report was published last week.</p> <p>The tail end of winter made for a tragic season in the Cascades, one that has claimed multiple lives and stretched the Northwest Avalanche Center thin at a time when it is aiming, over the long term, to see everybody come home safely from a day in the mountains. The Feb. 26 incident was the first of a string of deadly local avalanches over the last month, with snowshoers, skiers and snowmobilers among the victims in three consecutive weekends of fatalities.</p> <p>Altogether, Washington is responsible for seven of the 19 avalanche deaths in the U.S. so far this season, more than any other state. That startling statistic has cast a spotlight on the Northwest Avalanche Center (NWAC), the nation’s second oldest, which operates out of the National Weather Service station in Seattle’s Sand Point.</p>

Even though snow on the ground outside the office window is rare, the center, which is under the auspices of the U.S. Forest Service, employs three meteorologists and two avalanche specialists to produce daily forecasts during the winter season and periodic forecasts in the spring for the Cascades, Olympics and Mt. Hood.

Some people start their day with a quick scan of a favorite weather app, but for the legions of Northwest residents who recreate in our snowy mountains, reading the avalanche forecast on the NWAC app is a regular ritual from mid-November until the end of May — and it has far more life-or-death consequences than the day's chance of rain.

NWAC has been vigilant in advising backcountry skiers, snowshoers and snowmobilers about an elevated risk of avalanches for most of the winter, but not everyone has adequately heeded those warnings.

The forecast combines a host of information from meteorological satellites, 25 remote weather stations at key mountain locations, updates from the Washington Department of Transportation crews that clear mountain passes and reports from ski resorts and national park rangers.

The center's forecasts have become ever more important as winter backcountry travel grows. At weekend information booths this winter at popular trailheads, center staff counted 400 people traveling into the Alpentel Valley backcountry on a single sunny weekend day, part of some 2,000 backcountry users they counted over 10 visits. Website traffic to the center's forecasts have grown about 3 percent annually.

In the pre-dawn hours, the avalanche center's Allyn, 49, saddles up his pick-up truck with ski gear like he does roughly three times a week each winter to make the reverse commute from his Green Lake home to the mountains.

Allyn has worked in Washington's outdoor industry since he moved here from Massachusetts to study at the University of Puget Sound in the late 1980s. He took a year off from college to ski patrol at Crystal, then worked his way into mountain guiding. A climbing accident in Canada that broke both his feet ended his guiding career, but he found a niche in avalanche education — teaching courses on how to identify and avoid avalanche hazards — and eventually, in professional observation. He works as a carpenter in the off-season, but hopes to return to NWAC full-time next winter.

Allyn's field observations are essential to the forecast's mix, and last week he took a routine trip to the backcountry near Crystal Mountain ski resort. Responsible for the central and southern Cascades, including Snoqualmie Pass, Mt. Rainier, and White Pass, some reports of skier-triggered avalanches — with no burials — had piqued his interest to check out conditions firsthand.

The bumper-to-bumper headlights on I-5 North soon melded into the strip mall detritus of Auburn, which gave way to Enumclaw horse country. Outside of Greenwater, the rain turned to light snow and blanketed the evergreens with a white sheen.

"I'm pretty tired right now, to be honest," Allyn, who has the taciturn nature of someone who spends a lot of solitary time in the mountains, admitted on the way. "The last month has been quite busy and we've had a lot of near-misses and a number of avalanche fatalities. The combination of physical, mental and emotional fatigue is definitely setting in."

The day before, Allyn had attended two celebrations of life in the same day: one for Suokko and another for his girlfriend's co-worker, who perished in the Methow Valley slide. After the heavy load this season, the avalanche center is looking to put a trauma and grief counselor on retainer for future incidents.

But there was still a job to do, and Allyn was on the trail using alpine touring skis with climbing skins even before Crystal's lifts began operating for the day. Over the course of four hours, Allyn explored the weekend's avalanches in Bullion Basin, where two crowns, the clearly visible line left on the snow when a slope slides, stood out with ski tracks running above and below.

Equipped with a pack stocked with avalanche observation gear, Allyn picked two spots to dig four-foot deep pits. Allyn has the lean build one would expect from someone who climbs mountains for a living, and he had the pit dug and shaved to a clean surface in minutes — one suspects he'd be handy to dig out a buried car — revealing a snow profile like a sedimentary rock or tree-ring growth: a cross-section that reveals change over time.

Thin lines running horizontally indicated rain storms over the last few months of winter weather that were buried in the snowpack. On the surface, skiers might know these as rain crusts that make for bad skiing. Once buried, these so-called “weak layers” might not hold when skiers or a snowmobile glide on top of them, causing the entire snowpack above to slide.

In 30 years of mountain travel, Allyn has never been caught in an avalanche that buried him — setting off small, controlled avalanches is sometimes part of the job — though he says he did help rescue a guiding client once in British Columbia's Valhalla Mountains.

Using the shovel to tap the snow and see its reaction to pressure, it took three tries and maximum force to get a foot-deep cube of snow to slide off the most recent rain crust — a good sign the fresh powder was bonding well to the snowpack beneath it, at least at this elevation and aspect.

The day's field work completed, Allyn transitioned into downhill mode and zipped down the face of Blue Bell Knoll, a slope already laced with s-marks from the weekend's backcountry ski crowd — the kind that depend on NWAC's forecasts to make decisions about how to balance avalanche risk with good-quality skiing.

And by mid-afternoon, camped out at an Enumclaw coffee shop, Allyn filed his daily report so that the forecasters back at Sand Point could add it to the list of data points that would inform the next day's forecast.

While the idea of getting paid to traipse around the mountains might sound appealing to aspiring ski bums, Allyn must be out there even in frigid cold or soaking rain. Over the course of a season, especially one with multiple avalanche investigations, that routine takes its toll.

Although Allyn mostly sticks to the technical language of his craft, regularly using phrases like “party members,” “uphill mode,” and “mitigate your hazard,” he does get a bit more personal. He admits that the life-and-death decisions that result from his contribution to the forecast are “constantly” on his mind.

“Last year was the first time I was doing a lot of incident reporting and wrapping my brain around the human side of what can happen,” he said. “Interviewing loved ones and partners and fully investigating these incidents, you can't help but look at them from a perspective of, hey, this could be my friends or my partners, or me.”

The avalanche center has grown considerably from its humble roots as a University of Washington project that issued its first avalanche advisory in 1975. While the Forest Service pays for the office-based staff's \$360,000 annual cost, nonprofit Friends of the Northwest Avalanche Center raises another \$480,000 from corporate and individual donations to pay for the team of eight professional observers, half in Seattle and half in outposts like Bellingham, Mt. Hood, Leavenworth and the Methow Valley.

NWAC has a robust social media presence and runs a series of avalanche awareness lectures at REI for first-timers as well as continuing education talks for backcountry users who have already taken the industry-standard level-one course.

Despite its blizzard of outreach, the center is up against a factor perhaps just as dangerous as a touchy snowpack: human desire.

“We've still got a long way to go in terms of how we get people to change their behavior,” Scott Schell,

executive director of the nonprofit side, said, describing an ideal risk candidate as “the person who works five days a week sitting behind a computer who’s dreaming of getting outside on the weekend and skiing that line they’ve read about on the forums.”

This season’s deaths have been a setback on the road to the avalanche industry’s goal of no fatalities by 2025, but Schell is heartened by long-term trends.

“Fatal accidents have been pretty flat over last 20 years, and at the same time it’s safe to assume that backcountry use in the U.S. has increased somewhere around tenfold,” he said.

Although a 1910 Stevens Pass avalanche was the deadliest in U.S. history, Washington’s high share of avalanche fatalities this season is a recent historical anomaly. Alaska, Colorado, and Montana all have had more avalanche accident reports and fatalities, while Utah is about on par with Washington, according to the Avalanche Accident Database, whose records date back to the 1998-1999 season.

Schell attributes this year’s exceptional number of deaths to “an unusual snowpack” that featured what in avalanche-speak are called “deep persistent weak layers,” or places buried way down in the snowpack that, while unlikely to trigger a slide, will lead to a catastrophic avalanche if they do. Investigations fingered those layers as the likely culprit in most of the fatal avalanches over the last month, although Allyn stressed the goal of investigations is not to assign blame but rather to educate and contribute to the industry’s collective knowledge on snow science.

Convincing local skiers, snowshoers and snowmobilers to heed the danger has been the cardinal challenge of the 2017-2018 winter season, Schell said.

“As an avy center that’s where we have a lot of progress to make,” Schell said, calling it an “uphill battle,” just like the slog his team’s observers make every winter day.

<b>HEADLINE</b>	<b>04/03 States sue to stop citizenship question</b>
<b>SOURCE</b>	<a href="https://www.washingtontimes.com/news/2018/apr/3/ny-16-other-states-sue-stop-citizenship-question/">https://www.washingtontimes.com/news/2018/apr/3/ny-16-other-states-sue-stop-citizenship-question/</a>
<b>GIST</b>	<p>New York Attorney General Eric Schneiderman filed a lawsuit Tuesday challenging the Trump administration’s decision to ask about citizenship on the 2020 census, saying the question will ruin the upcoming count, violating the Constitution’s demand for an accurate count.</p> <p>The challenge, joined by attorneys general from 16 states and attorneys from big cities such as Philadelphia, San Francisco and D.C., says that immigrants — both legal and illegal — and others will be scared away from taking part in the 2020 count because they don’t want to answer their citizenship status.</p> <p>That, the challengers said, will skew the census, undercutting the Constitution’s requirement of an “actual Enumeration” of the whole population every decade.</p> <p>The citizenship question has become the latest explosive dividing line in immigration and race under President Trump, with the full array of anti-Trump organizations lining up to oppose the 2020 census decision.</p> <p>That was on display Tuesday in New York, where Democratic lawmakers and immigrant-rights groups staged a rally to announce the lawsuit.</p> <p>“Are you ready to do this fight? Are you ready to take on Trump,” said Steven Choi, executive director of the New York Immigrant Community.</p> <p>Asking about citizenship used to be standard on the full decennial census up through the middle of the 20th century. It was then shifted to the census “long form,” which went to about one in six households</p>

	<p>during the decennial count.</p> <p>The long form has now been discontinued and instead the census relies on the American Community Survey, which is sent to between 1 and 2 percent of households each year, for citizenship estimates.</p> <p>Mr. Schneiderman said those estimates are good enough for government work, and there's no good reason to ask about the question of everyone.</p> <p>"Decade after decade, census officials have said very clearly that simply asking about immigration status would create an environment of fear and mistrust in immigrant communities, communities of color," he said.</p> <p>He also said procedurally the Trump administration added the question in without putting it through the full array of tests that are usually required before any new questions are added.</p> <p>The crux of the legal battle is likely to turn on what the Constitution requires when it demands the government conduct an "actual Enumeration" every decade.</p> <p>The Constitution says the count is used to apportion congressional districts between the states, but in reality the information is used for much more, including drawing the district lines for Congress and state legislatures, and for doling out hundreds of billions of dollars in federal cash assistance for education, infrastructure and other needs.</p>

<b>HEADLINE</b>	<b>04/03 City removes Confederate name streets</b>
<b>SOURCE</b>	<a href="https://www.cbsnews.com/news/confederate-names-removed-from-residential-street-signs-hollywood-florida/">https://www.cbsnews.com/news/confederate-names-removed-from-residential-street-signs-hollywood-florida/</a>
<b>GIST</b>	<p>HOLLYWOOD, Fla. -- The names of Confederate generals are being removed from street signs in one Florida city. The Hollywood city commission voted in August to remove the names of Robert E. Lee, Nathan Bedford Forrest and John Bell Hood from residential streets.</p> <p>In a Sun Sentinel report, officials said about half the signs have been replaced so far. The rest should be replaced by the end of April.</p> <p>The streets were renamed Freedom, Hope and Liberty. Mayor Josh Levy said the new signs display a message that is "a lot better than the message the prior names were sending."</p> <p>Laurie Schecter was one of the residents who petitioned for the sign changes in 2017. She said the new names "better represent the character of our city and the people who live here."</p> <p>The debate over Confederate street names, statues and other symbols is being conducted in several communities around the nation.</p>

<b>HEADLINE</b>	<b>04/03 Israel PM retracts migrant resettlement</b>
<b>SOURCE</b>	<a href="https://www.nbcnews.com/news/world/israel-s-netanyahu-changes-his-mind-migrant-resettlement-plan-n862266">https://www.nbcnews.com/news/world/israel-s-netanyahu-changes-his-mind-migrant-resettlement-plan-n862266</a>
<b>GIST</b>	<p>JERUSALEM — Israeli Prime Minister Benjamin Netanyahu said on Tuesday he was canceling an agreement with the U.N. refugee agency to relocate thousands of African migrants, bowing to right-wing pressure to scrap the deal.</p> <p>The pact would have given thousands of other migrants the right to stay in Israel.</p>

Hours after announcing the arrangement on Monday, Netanyahu posted on his Facebook page that he was putting its implementation on hold until a further review.

He then declared the agreement dead at a meeting on Tuesday with representatives of residents of south Tel Aviv, a poor area that has attracted the largest migrant community. Many of its inhabitants want the Africans out.

"I have listened carefully to the many comments on the agreement. As a result, and after I again weighed the advantages and disadvantages, I decided to cancel the deal," a statement from the prime minister's office quoted Netanyahu as saying at the session.

The fate of about 37,000 Africans in Israel has posed a moral dilemma for a state founded as a haven for Jews from persecution and a national home.

The right-wing government has been under pressure from its nationalist voter base to expel the migrants. It had been moving ahead with plans to deport many of them to Rwanda when Israel's Supreme Court intervened and froze such deportations in March.

According to the agreement with the U.N. refugee agency that Netanyahu outlined on Monday, about 16,250 African migrants, most of them from Eritrea and Sudan, would have been relocated to Western nations.

"Despite legal restraints and international difficulties that are piling up, we will continue to act with determination to explore all of the options at our disposal to remove the infiltrators," Netanyahu said in the statement on Tuesday.

Netanyahu's backtrack was largely seen in Israel as an attempt to appease his voter base and keep its support at a time of political uncertainty.

Since 2005, around 64,000 Africans have entered Israel illegally over its border with Egypt, although thousands have since left. A fence Israel has built over the past few years along the frontier has largely stemmed the flow.

HEADLINE	<b>04/02 N.C. 'disturbing' police videos released</b>
SOURCE	<a href="https://www.cnn.com/2018/04/02/us/asheville-police-body-camera/index.html">https://www.cnn.com/2018/04/02/us/asheville-police-body-camera/index.html</a>
GIST	<p>(CNN)The city of Asheville, North Carolina, released "disturbing, difficult to watch" videos from nine body-worn cameras related to the beating and tasing of a man who was suspected by police of jaywalking, the city said.</p> <p>One video from an officer on the scene shows Asheville police officer Christopher Hickman wrap his arms around the man's neck from behind as police attempt to subdue him.</p> <p>The footage provides greater insight into the August 2017 arrest of Johnnie Jermaine Rush, the man Asheville police arrested for jaywalking.</p> <p>Hickman, 31, was removed from patrol duty a day after the incident. He resigned from the department in January, the same day that he was to be terminated, according to a timeline of the case released by the city council.</p> <p>Video of the arrest recorded by Hickman's body camera was published by the Asheville Citizen-Times on February 28, setting off outrage in the western North Carolina city. The newspaper has not revealed how it obtained the video.</p> <p>Hickman was taken into custody on March 8 and charged with one count each of assault by strangulation, assault inflicting serious injury and communicating threats, the city said.</p> <p>"Christopher Hickman served the City of Asheville for 10 years and received numerous commendations," Thomas Amburgey, an attorney for Hickman, said in a statement. "It's unfortunate that so many individuals have rushed to judge my client. I am confident that when a fair and impartial jury hears the whole story that Mr. Hickman will be acquitted. Any notion that my client had any criminal intent to harm Mr. Rush is without basis."</p> <p>The city on Monday also released video recorded a little more than an hour after Rush's arrest, in which he, Hickman and an officer in training can be heard candidly discussing the incident as they are standing outside a hospital.</p> <p>"No disrespect with you sir, I understand that I ran and whatnot, but you didn't have to keep punching me and choking me," Rush said.</p> <p>"Yeah, I did," Officer Hickman said. "Because you never complied with my order."</p> <p>Rush said he wasn't able to comply and put his hands behind his back because he was on the ground being choked.</p> <p>"I didn't start choking you until after I probably punched you ten times," Hickman responded.</p> <p>In another of the videos taken after the use of force, Hickman speaks to a supervisor, Sgt. Lisa Taube, on the scene and admits to using the taser to punch the man in the face several times.</p> <p>"I hit him in the face as if it was a club like three times. That was effective," Hickman says. "That's what happened to his left side, I punched him in the face with it about as hard as I could."</p> <p>A Buncombe County Superior Court Judge granted the City of Asheville's petition to release the video, which was made public Monday at 2 p.m.</p> <p>In an open letter from the Asheville City Council, Interim City Manager Cathy Ball and Police Chief Tammy Hooper said the videos were being released in the interest of transparency.</p> <p>"This incident has created a loss of trust within the community, particularly among people of color. The</p>

City of Asheville understands that there is substantial work to do to restore the public's trust," they said in a statement.

Rush initially was charged with second-degree trespassing and resisting a public officer. He filed a complaint with police the day he was arrested alleging Hickman used excessive force.

Chief Hooper watched the body camera footage and ordered Hickman off the street and told him to turn in his badge and gun, according to a timeline from the city.

The district attorney and Asheville police agreed to dismiss the charges against Rush in September after watching the body camera footage, according to documents from the City Council.

The actions of Hickman's supervisor, Sgt. Taube, have also drawn criticism. Department policy requires the supervisor in a use of force incident to conduct a preliminary investigation and collect supplemental documents from all parties.

In video from her body camera, Taube can be seen arriving at the scene, speaking to Hickman and listening to his side of the story. She then goes to speak to Rush in the back of a police vehicle.

As Rush tells his version of events and says that he was hit in the face and choked, she repeatedly interrupts him and disagrees with him.

"You were in the wrong. You were told by an officer (you're) under arrest," she said. "You resisted and did not comply and ran away."

Later, she speaks with a woman who identifies herself as the mother of Rush's son. Taube tells her that Rush was being arrested for resisting arrest and trespassing, and suggests he may also receive charges for being "intoxicated" and disruptive.

The woman says she just saw Rush and that he didn't have anything to drink.

"Well, he's intoxicated on something," Taube says.

Sgt. Taube received disciplinary action for "poor performance," the city of Asheville said on its website, and was ordered to undergo remedial training in connection with the incident.

Rondell Lance, the president of the Fraternal Order of Police Lodge in Asheville, told CNN that the videos showed that Taube acted properly and appropriately given the situation.

She was disciplined because she did not watch the body camera video that night or the next morning, Lance said. Her decision not to watch the videos was just an error in thinking and was not made with bad intentions, he said.

"There wasn't (anything) that she tried to hide or cover up," he said.

<b>HEADLINE</b>	<b>04/02 Hurricane outlook: near normal season</b>
<b>SOURCE</b>	<a href="https://www.accuweather.com/en/weather-news/2018-atlantic-hurricane-outlook-4-us-impacts-predicted-amid-another-active-season/70004533">https://www.accuweather.com/en/weather-news/2018-atlantic-hurricane-outlook-4-us-impacts-predicted-amid-another-active-season/70004533</a>
<b>GIST</b>	<p>After a devastating hurricane season for the United States in 2017, forecasters are predicting a near normal to slightly above-normal year with between 12 to 15 tropical storms.</p> <p>Of those storms, 6 to 8 are forecast to become hurricanes and 3 to 5 are forecast to become major hurricanes.</p>

	<p>“Last year we had 17 tropical storms. This year may not be quite as active, but still probably normal to slightly above normal,” AccuWeather Atlantic Hurricane Expert Dan Kottlowski said.</p> <p>Similar to last year, sea surface temperatures are expected to remain warmer than normal across most of the basin and normal to above normal over the main developmental region, where more than 85 percent of all tropical storms form.</p> <p>“Right now, we are in a weakening La Niña pattern, but the climate pattern is expected to go into what’s called a neutral pattern, which promotes near-normal wind shear,” Kottlowski said.</p> <p>This should limit tropical development.</p> <p>“The thing that’s causing the balance to tip in one direction [this year] is that sea surface temperatures are warmer than normal,” he said.</p> <p>Warm water creates more favorable conditions for tropical development.</p> <p>While last year brought six impacts to the United States, including Puerto Rico and the Virgin Islands, this year is more likely to result in three or four.</p> <p>According to Kottlowski, conditions are ripe for early season development in the Gulf of Mexico due the warm water already in place in that part of the Atlantic basin.</p> <p>As for the rest of the season, historical records and the projected pattern suggest the area from Houston to Florida and up through the Outer Banks of North Carolina will be more favorable for direct impacts from tropical storms and hurricanes.</p> <p>“Anywhere else along the coast, everybody should still be vigilant and prepare for a possible direct impact,” Kottlowski said.</p>

<b>HEADLINE</b>	<b>04/03 Council: 20% drivers w/out insurance</b>
<b>SOURCE</b>	<a href="http://komonews.com/news/consumer/nearly-20-percent-of-drivers-in-washington-dont-have-insurance">http://komonews.com/news/consumer/nearly-20-percent-of-drivers-in-washington-dont-have-insurance</a>
<b>GIST</b>	<p>A lot of people drive around without insurance. It’s about 17 percent of the motorists in Washington, according to the latest report from the Insurance Research Council. That means we are the seventh worst state in the country for uninsured drivers.</p> <p>"You can buy coverage to protect yourself and those in your vehicle from others on the road who are not carrying enough liability insurance or who may not have any insurance at all," said Kenton Brine, president of the NW Insurance Council. "That coverage is called Uninsured Motorist coverage or Underinsured Motorists coverage."</p> <p>While it's against the law to drive without insurance, uninsured motorist coverage and underinsured motorist coverage are optional in Washington. Insurance companies must offer you this coverage, but you can decline it.</p> <p>So, what happens if you do that?</p> <p>"If you were hit by an uninsured driver or someone who doesn't have enough coverage to pay for your damages or injuries, that is going to end up being on you and come out of your own pocket to pay for damages to your vehicles or injuries to passengers or yourself while you're in your car," Brine said.</p>

	The Northwest Insurance Council tells me the cost of adding uninsured and underinsured motorist coverage to a policy is typically between 5-10 percent of your annual premium.

<b>HEADLINE</b>	<b>04/04 MLK assassination still clouded mystery</b>
<b>SOURCE</b>	<a href="https://www.upi.com/Top_News/US/2018/04/04/MLK-assassination-still-clouded-with-mystery-after-50-years/3871522767459/?utm_source=fp&amp;utm_campaign=ls&amp;utm_medium=2">https://www.upi.com/Top_News/US/2018/04/04/MLK-assassination-still-clouded-with-mystery-after-50-years/3871522767459/?utm_source=fp&amp;utm_campaign=ls&amp;utm_medium=2</a>
<b>GIST</b>	April 4 (UPI) -- Despite growing threats on his life, Martin Luther King Jr. had committed to going to

Memphis.

There, he wanted to march with striking minority sanitation workers. Before the trip was over, the civil rights leader was dead and one of the most controversial -- and mysterious -- cases in U.S. history began.

Raised in Georgia, King became a Baptist minister at 18 and would spend the next two decades building a civil rights legacy recognized the world over. His national crusade, though, was abruptly cut short 50 years ago, on April 4, 1968.

In the decades since his death, King's assassination has been pored over perhaps more than any case other than the shooting of President John F. Kennedy. Examinations and re-examinations of King's death have been done at local and congressional levels, and conspiracy theories are nearly as common as those surrounding Kennedy.

### **The shooting**

King arrived in Memphis on April 3, 1968, after his flight was delayed by a bomb threat. That evening, he gave the final speech of his life -- in which his words later seemed prophetic.

"I don't know what will happen now. We've got some difficult days ahead. But it doesn't matter with me now. Because I've been to the mountaintop," he said. "Like anybody, I would like to live a long life. ... But I'm not concerned about that now. I just want to do God's will. And He's allowed me to go up to the mountain. And I've looked over. And I've seen the promised land.

"I may not get there with you, but I want you to know tonight, that we, as a people, will get to the promised land. And so I'm happy, tonight. I'm not worried about anything. I'm not fearing any man."

Because King's visit to Memphis had been well advertised, it was no secret that he was staying at the Lorraine Motel. James Earl Ray, who at one time confessed to being the assassin, changed his residence on April 4 -- police said in order to be closer to King's motel. At a rooming house, he checks into room No. 8 under the name John Willard.

After purchasing a pair of binoculars, Ray returns to his room -- where police said he kept an eye on King's balcony. At 6:01 p.m., King emerged from the room with a few associates and a single shot rang out. The 39-year-old civil rights leader was struck in the head and thrown violently backward as members of his entourage, immortalized in a now-famous photograph, pointed toward the area they heard the shot come from -- Ray's rooming house.

"Martin Luther King took his cross on his shoulder over at the Lorraine Motel, and there he was crucified," the Rev. Ralph Abernathy said in 1968.

### **The escape**

According to the official version of events, Ray immediately packed up his belongings and fled the rooming house -- wrapping the rifle and a few other items in a blanket. After exiting to the street, he panicked when he spotted a police car and dumped the bundle of evidence on the sidewalk in front of the Canipe Amusement Co. offices. He hopped into his white Ford Mustang and took off.

Ray was identified as the shooter by two witnesses in the Canipe office and a resident of the rooming house who'd seen the gunman flee in the moments after the gunshot.

Within an hour, Ray had driven to Mississippi, then went on to Alabama and finally, Georgia. He then ditches the Mustang and takes a Greyhound bus to Michigan before slipping across the U.S.-Canadian border.

It wasn't until June 8 that the 40-year-old suspect was ultimately tracked down in Britain, where he was

arrested at London's Heathrow Airport attempting to board a flight to Belgium. Authorities said using multiple aliases, Ray's final destination was to be Rhodesia (now Zimbabwe), a segregated country of Africa where he believed he would be a celebrated mercenary for killing King. He was extradited to the United States.

### **The trial and 'Raoul'**

After firing his original attorney, Ray is represented at trial by famed defense lawyer Percy Foreman -- who convinces the accused gunman that an acquittal is impossible. Ray opts to plead guilty to the King assassination. He is sentenced to 99 years in Tennessee's Brushy Mountain State Penitentiary.

Three days later, Ray abruptly recants his guilty plea and claims he was merely a pawn in a grand conspiracy to kill King -- and that a shadowy figure named "Raoul" pulled the strings.

According to Ray, he first met Raoul months before the shooting in Memphis as a means to obtain Canadian immigration papers. He said from that point forward, he participated in a number of criminal enterprises with the mastermind that took him across the United States. In April, he said, he was instructed by Raoul to buy a 30-06 rifle -- and the Mustang -- and told to rent the room adjacent to the Lorraine Motel.

Ray would claim for the rest of his life that he was actually miles away from the scene when King was shot, although no one has ever been able to corroborate his alibi. Raoul, he said, disappeared after the assassination.

### **The investigations**

Memphis police and the FBI concluded that Ray was responsible for killing King, although some argue federal authorities didn't conduct an adequate conspiracy investigation. With Ray's guilty plea, many investigators felt the case didn't need to be examined further.

In 1976, eight years after King's death and Ray's repeated denials, the case received a second look by a congressional committee that convened to investigate the assassinations of King and Kennedy -- largely due to public doubts and significant elements of conspiracy in both cases.

Another element of suspicion among the general public was added by the FBI's taking the lead in the investigation. Former bureau director J. Edgar Hoover had previously made efforts to compromise King's crusade and his involvement in the probe had a direct impact on the public's questioning of whether the FBI could be impartial. Hoover once called King the "most notorious liar in the United States."

While the House panel was most noted for its work on the Kennedy killing, it concluded that it was likely King died as the result of a conspiracy. However, investigators noted the conspiracy most likely involved Ray's brothers, not the U.S. government, as some theories alleged.

Ray testified before the committee and again told panel members he'd only been a puppet for the mysterious Raoul. While most experts have dismissed the existence of a Raoul, it was ultimately learned that the FBI in 1968 had followed up on a potential lead for such a figure -- stemming from a phone call Ray received while staying in Los Angeles before King's death from a man who identified himself as "J.C. Hardin." The bureau even went so far as to commission a composite sketch of Hardin, but dropped the pursuit after Ray pleaded guilty.

The Justice Department has doubted the existence of anyone named Raoul in the case.

Some materials from the FBI's 1968 investigation remain classified, and sealed, until 2027. An effort to get the documents released via Congress failed in 2010.

### **Ray's appeals**

Ray spent three decades attempting to get a new trial in King's assassination, but was ultimately unsuccessful. He was, however, able to persuade a number of people -- including members of the King family and the pastor's former lawyer -- that he was railroaded.

Several members of the King family -- including his widow, Coretta Scott King, and sons Martin Luther King III and Dexter King -- believe Ray was not the shooter.

"The evidence pointed away from Mr. Ray," she said in 1999. "He was not the person we felt that really actually killed him."

The attorney, William Pepper, wrote multiple books on the assassination and argued that a conspiracy involving the U.S. government, the Pentagon and the U.S. intelligence community had a hand in the shooting -- largely because they wanted to "silence King's growing criticism of the Vietnam War and his anti-poverty campaign."

"We've basically solved the case, telling people how it happened and why it happened," Pepper told the Detroit Metro Times last month.

Threats against King's life had increased substantially in the months and years preceding his death, as many segregationists viewed him as a prominent enemy.

"He caused more strife in this country than anyone I can think of," Eugene Bull Connor, the former police commissioner in Birmingham, Ala., told UPI in 1968.

Ray attempted multiple times to escape from prison and was attacked during a 1981 riot.

He ultimately died in prison in 1998 at age 70 after serving nearly 30 years of his 99-year sentence. To this day, the most incriminating evidence that argues for his guilt are his fingerprints on both the 30-06 rifle that killed King and the binoculars.

### **King's legacy**

A half-century after his death, King remains one of the most celebrated civil rights leaders in U.S. history. Endless city streets and buildings have been renamed in his honor, and the Lorraine Motel -- where he spent his final day -- is now the National Civil Rights Museum, which opened in 1991.

"Let's pledge our best efforts to protect the advances that we have inherited and make real the legacy that has been entrusted to each of us," former U.S. Attorney General Eric Holder told Memphis' Commercial Appeal this week. "That is our charge, and this is our moment."

Despite the threats on his life, King continued to preach peaceful protest -- a hallmark Abernathy and others who picked up his mantle adopted in the years that followed.

King is perhaps best known for the 1963 speech he delivered on the National Mall in Washington, D.C., -- in which he proclaimed, "I have a dream." The speech followed the civil rights March on Washington.

"We are still marching," Holder said. "We are still striving. And we are still calling on our nation's leaders to act with a sense of justice, compassion and common humanity."

**HEADLINE** 04/04 Russia: West fomenting new Cold War

**SOURCE** <http://www.foxnews.com/world/2018/04/04/russian-officials-accuse-west-fomenting-new-cold-war.html>

GIST	<p>MOSCOW – Top Russian defense and security officials are accusing the West of fomenting a new Cold War in a bid to retain waning influence in global affairs.</p> <p>Russian Defense Minister Sergei Shoigu says NATO is using "the non-existent Russian threat to methodically boost its military potential" and beef up its forces near Russia's borders.</p> <p>Speaking at a security conference Wednesday, Shoigu said Moscow will respond to NATO's moves by strengthening its defense capabilities to "ensure military security of Russia and its allies."</p> <p>Russia-West relations have sunk to their lowest level since the Cold War following Moscow's 2014 annexation of Crimea and support for separatists in eastern Ukraine. Tensions further escalated this month after the poisoning of an ex-Russian spy in Britain, leading to mass diplomats' expulsions by the West and Russia.</p>

HEADLINE	<b>04/04 Renewed commitment to MLK's legacy</b>
SOURCE	<a href="http://www.foxnews.com/us/2018/04/04/resilience-resolve-and-renewed-commitment-to-mlks-legacy.html">http://www.foxnews.com/us/2018/04/04/resilience-resolve-and-renewed-commitment-to-mlks-legacy.html</a>
GIST	<p>MEMPHIS, Tenn. – Half a century ago, the enthusiastic crowd eager to hear from the Rev. Martin Luther King Jr. roused him from his bed at the Lorraine Motel across town in a thunderstorm to Memphis' Mason Temple Church of God in Christ.</p> <p>King's words rang anew during the program before his youngest child, Bernice King, addressed the audience. Calling her older brother, Martin Luther King III, to join her in the pulpit, she discussed the difficulty of publicly mourning their father — a man hated during his lifetime, now beloved around the world.</p> <p>"It's important to see two of the children who lost their daddy 50 years ago to an assassin's bullet," said Bernice King, now 55. "But we kept going. Keep all of us in prayer as we continue the grieving process for a parent that we've had yet to bury."</p> <p>As the world prepares to mark the 50th anniversary of King's murder, the milestone coincides with a resurgence of white supremacy, the continued shootings of unarmed black men and a parade of discouraging statistics on the lack of progress among black Americans on issues from housing to education to wealth. But rather than despair, the resounding message repeated in the building was one of resilience, resolve, and a renewed commitment to King's legacy and unfinished work.</p> <p>Just as it was on King's last night in Memphis, the forecast Tuesday called for a storm to again rattle the church walls, evoking the memory of King's pronouncement that he had "been to the mountaintop," his thunderous remarks were outdone only by the evening's weather.</p> <p>With an enthusiastic crowd filling Memphis' Mason Temple Church of God in Christ, the atmosphere was heavy with nostalgia Tuesday for the evening 50 years ago that the Rev. Martin Luther King Jr. gave his final speech.</p> <p>A gospel singer led a rousing rendition of "Lift Every Voice and Sing," and the gathering took on the air of a mass meeting, as if the crowd could again will King from his hotel bed across town. It was in this sanctuary that he delivered his famous "Mountaintop" speech the night before he was assassinated. The commemoration was part of a week of events celebrating King's legacy.</p> <p>Lee Saunders, a national labor leader, recounted how that night in 1968, King made an unplanned appearance to deliver the famous speech without notes after his aides saw how passionate the crowd was: "There was one man they wanted to hear from."</p>

But Saunders stressed that the purpose of the week's commemorations was not just to look to the past.

"Dr. King's work — our work — isn't done. We must still struggle; we must still sacrifice. We must still educate and organize and mobilize. That's why we're here in Memphis. Not just to honor our history, but to seize our future," he said.

Saunders was among the first speakers, taking the pulpit just after a video message from former President Barack Obama.

"As long as we're still trying, Dr. King's soul is still rejoicing," Obama said on the video.

Some of the sanitation workers who participated with King in a 1968 strike sat in the front row and were treated like celebrities, with audience members stopping to take photos with them before the event started. Contemporaries of King's including the Rev. Jesse Jackson were also in attendance.

The commemoration of the "Mountaintop" speech followed an announcement earlier in the day by civil rights leaders who are reviving an economic justice campaign first planned by King. The organizers of a new Poor People's Campaign are planning 40 days of marches, sit-ins and other peaceful protests.

"This first 40 days is not the end; it's the launch," said the Rev. William Barber of North Carolina, one of the co-chairs of the revived campaign. "You will see simultaneous moral direct action. You will see simultaneous training of people to prepare for a season of massive voter mobilization."

Starting May 14, clergy, union members and other activists will take part in the events in about 30 states, targeting Congress and state legislatures. Then, on June 23, organizers plan a large rally in Washington — similar to what King had envisioned. The original Poor People's Campaign was carried out in 1968 after King's death by other civil rights leaders.

King had envisioned the Poor People's Campaign in Washington as a way to speak out against economic injustice, as he shifted his focus from civil rights to human rights. But before he could finish those plans, he came to Memphis in 1968 to support a strike by black sanitation workers who were tired of dealing with low pay and dangerous working conditions.

King led a march in Memphis that turned violent on March 28, and he went back home to Atlanta. Seeking to prove that non-violent protests still worked, King vowed to lead a peaceful march and returned to Memphis days later.

The civil rights leader was standing on the balcony of the old Lorraine Motel when he was shot on April 4, 1968. He died at a hospital at age 39.

<b>HEADLINE</b>	<b>04/04 EMS-police gap in Austin bombing case?</b>
<b>SOURCE</b>	<a href="http://www.foxnews.com/us/2018/04/04/austin-bomber-may-have-benefited-from-ems-police-communication-mishap-officials-say.html">http://www.foxnews.com/us/2018/04/04/austin-bomber-may-have-benefited-from-ems-police-communication-mishap-officials-say.html</a>
<b>GIST</b>	<p>Addressing a communication breakdown that may have tipped off the Austin, Texas, bomber last month, emergency medical personnel on Tuesday announced changes in how they'll work with local police.</p> <p>The suspected communication mishap occurred March 20, the day before authorities closed in on Mark Conditt, who blew himself up after attacks that left two people dead and several others injured.</p> <p>Officials said two medics from the Pflugerville, Texas, Fire Department knocked on the door of Conditt's home, despite a team of officers staking out the site, waiting to arrest him, the Austin American-Statesman reported.</p>

The medics were supposed be on standby in case something went wrong, as cops planned to approach the home around 4 p.m. that day, when the suspect was supposed to return home, the newspaper reported.

Instead, a roommate of Conditt answered the door and told the medics no one needed assistance in the house.

Police were irate that the medics had compromised their surveillance work, according to the paper.

EMS officials said they have established a new system when it comes to working with officers during sensitive arrests and searches to avoid another misstep.

Meanwhile, interim Austin police Chief Brian Manley told FOX 7 on Tuesday that in hindsight, he regretted having called the bomber “a challenged young man” and apologized for a member of his team making public comments claiming the first bombing victim may have created and accidentally detonated the device himself.

“Those were comments that, if you have to investigate something, fine, but that's just not something that you put out publicly,” Manley said.

The interim chief praised the works of his officers, and all the agencies that assisted in what he said “was the most complex case” of his career.

“The partnership amongst the agencies that may not always get along was tremendous. Egos were left at the door, titles were left at the door, agencies were left at the door and everybody worked together to keep Austin safe,” he said.

<b>HEADLINE</b>	<b>04/03 France rail workers 3mo. rolling walkout</b>
<b>SOURCE</b>	<a href="https://www.cnn.com/2018/04/03/europe/france-rail-strikes-intl/index.html">https://www.cnn.com/2018/04/03/europe/france-rail-strikes-intl/index.html</a>
<b>GIST</b>	<p>(CNN)Rail workers across France have gone on strike for the first day of a three-month rolling walkout, the latest and potentially biggest battle over labor laws in the country since President Emmanuel Macron took office last May promising to transform the jobs market.</p> <p>Train services have been severely disrupted, with around 87% of high-speed trains and 80% of regional services canceled Tuesday, according to SNCF, France's state-owned rail company.</p> <p>Eurostar services were also affected, with one in four services from Paris canceled. High-speed Thalys trains towards Belgium and the Netherlands were operating almost as normal, but there were no services towards Switzerland, Spain or Italy.</p> <p>Tuesday's walkout -- dubbed "Black Tuesday" by the French media -- comes less than two weeks after a nationwide strike across the public and transport sectors as workers protested the government's proposed labor overhauls, including the plans to open the SNCF to competition.</p> <p>Unions have called for the "strongest possible" strike to protest proposed reforms that they believe would lead to the privatization of the railways, and to call for higher wages and an end to precarious jobs. The government said there were no plans to privatize SNCF, which is 45 billion euros (\$56 billion) in debt, according to Reuters.</p> <p>"We're striking for several reasons, but at the top of the list is the government wanting to open up the service to competition," the spokesman for rail union Sud Rail, Eric Santinelli, told CNN. "They don't want to do it in a progressive manner, they want to do it in an accelerated manner."</p> <p>Both sides have made it clear that they will not concede, and each sees the strikes as a test of their resolve</p>

	<p>and credibility. The government believes it is acting with a mandate for change, but the unions have always succeeded in making the government back down.</p> <p>The walkout, which began at 7 p.m. local time Monday and will end at 8 a.m. Thursday, is the first of 18 two-day walkouts planned before the end of June. The next is scheduled for April 8-9.</p>

<b>HEADLINE</b>	<b>04/04 Mexico screens migrant caravan</b>
<b>SOURCE</b>	<a href="https://www.reuters.com/article/us-usa-immigration-caravan/mexico-vets-and-disperses-central-american-migrant-caravan-idUSKCN1HA2D0">https://www.reuters.com/article/us-usa-immigration-caravan/mexico-vets-and-disperses-central-american-migrant-caravan-idUSKCN1HA2D0</a>
<b>GIST</b>	<p>MATIAS ROMERO, Mexico (Reuters) - Mexican officials on Tuesday screened a dwindling group of hundreds of largely Central American migrants who are moving through Mexico toward the United States, seeking to break up the "caravan" that has drawn the ire of U.S. President Donald Trump.</p> <p>Trump, doubling down on his tough stance against illegal immigration, has railed against those making their way from the Guatemala-Mexico border in the past 10 days.</p> <p>Trump repeated threats to torpedo the North American Free Trade Agreement (NAFTA), which underpins much of Mexico's foreign trade, and said he wanted to send troops to the U.S. border to stop illegal immigrants until a long-promised border wall is built.</p> <p>In response, the Mexican government has said the migrants are being vetted to determine whether they have a right to stay, or would be returned to their countries of origin.</p> <p>Hundreds of men, women and children from Central America were stuck on Tuesday in the town of Matias Romero in the poor southern Mexican state of Oaxaca awaiting clarification of their legal status after officials began registering them.</p> <p>Confused and frustrated by paperwork, many were uncertain what lay in store, and desperate for information.</p> <p>"What was the point of all this then if they don't let us stay?" Elizabeth Avalos, 23, a migrant from El Salvador who was traveling with two children, said angrily. "There's no food, my children haven't eaten since yesterday."</p> <p>Hundreds of people camped out overnight in a park near the town's train station, with shoes and bags strewn about.</p> <p>Around them, Mexican migration officials with notepads and pens took basic information from the migrants, asking for names, nationalities, dates of birth and proof of identity.</p>

The caravan was organized by U.S.-based advocacy group Pueblo Sin Fronteras, which seeks to draw attention to the rights of migrants and provide them with aid. The Mexican government says the caravan, which like others travels by road, rail and on foot, has been organized every year since 2010.

Honduran Carlos Ricardo Ellis Garcia clutched a handwritten list of names belonging to more than 100 people who joined the caravan in the southern border town of Tapachula, where it began on March 25, reaching a peak of around 1,500 people.

But by Tuesday the number was down to about 1,100, according to Pueblo Sin Fronteras spokeswoman Gina Garibo.

Many had broken off from the group, eager to move on more quickly, she said. Many others aimed to stay in Mexico because they had family ties there or planned to work, Garibo said.

“Now they’re separating these groups,” Ellis Garcia said, referring to an estimated 300 people who split from the caravan on Monday. “I don’t know what’s the deal, we have no answers.”

Advocacy groups told Reuters dozens of people left the caravan and traveled to the crime-ridden eastern state of Veracruz, where they were met by migration officials and police.

The government said on Monday evening around 400 people in the caravan had already been sent back to their home countries.

Geronimo Gutierrez, Mexico’s ambassador to the United States, told CNN that Mexican authorities were “looking at the status of the individuals so we can proceed either with a repatriation process” or offer humanitarian relief. That could include granting asylum or humanitarian visas.

Honduras, El Salvador and Guatemala are among the most violent and impoverished countries in the Americas, prompting many people to leave in search of a better life.

In a country where millions of people have friends or relatives who have migrated legally or illegally to the United States, many Mexicans harbor sympathy for the Central Americans.

<b>HEADLINE</b>	<b>03/29 Inside Russia’s Seattle consulate</b>
<b>SOURCE</b>	<a href="https://www.politico.com/magazine/story/2018/03/29/what-really-went-on-at-russias-seattle-consulate-217761">https://www.politico.com/magazine/story/2018/03/29/what-really-went-on-at-russias-seattle-consulate-217761</a>
<b>GIST</b>	<p>Among the 27 countries that have retaliated for what is believed to be a Kremlin-ordered chemical-weapon attack on an ex-Russian intelligence officer and his daughter in Britain earlier this month, the United States took by far the most dramatic steps: ousting 60 diplomats in total, including 15 suspected intelligence operatives based at Russia’s United Nations Mission alone—the most significant action of its type since the Reagan administration. (The move prompted Russia, on Thursday, to announce the expulsion of 60 U.S. diplomats and the closure of the U.S. consulate in Saint Petersburg.) But it was the Trump administration’s announcement of the shuttering of Russia’s consulate in Seattle that turned heads. Why Seattle? What was going on there? Would the closure matter?</p> <p>While Seattle is an important city for Russian intelligence collection efforts domestically, its consulate’s profile has generally been quieter than San Francisco’s or New York’s, according to two former U.S. intelligence officials who asked to remain anonymous but have knowledge of Russian activities in these areas. But the closure of the consulate is noteworthy nonetheless: Along with the administration’s shuttering of the San Francisco consulate in 2017, Russia will now lack a diplomatic facility west of Houston, or any diplomatic presence on the West Coast for the first time since 1971. Russian intelligence officers—at least those under diplomatic cover—will no longer operate in easy proximity to America’s</p>

two great tech capitals. Indeed, at least in Seattle, suspected Russia spies have already been caught attempting to infiltrate local tech companies.

“Certainly, there were enough issues that were important to the Russians in Seattle—the naval bases, Microsoft, Boeing, Amazon,” says John Sipher, a former CIA officer who worked closely with the FBI on counterespionage issues. “There was always nervousness within the national security agencies that the sheer number of ethnic Russians in these industries was something the Russians could take advantage of. I don’t know if closing Seattle was a strategic choice; nonetheless, the concentration of high-tech and military resources makes it a sensible target.”

After the closure of the Russian consulate in San Francisco, former senior U.S. intel officials told me that facility had, for decades, functioned as the primary hub for Russian intelligence-gathering in the Western United States. It featured key classified communications systems, and was a crucial collection center in Russia’s long-running effort to map out America’s fiber-optic cable network.

One of the two anonymous former intelligence officials I spoke with called Seattle a top-five U.S. city for Russian counterintelligence work, but a “smaller operation” than San Francisco. Seattle did not have the same type of communications facilities as San Francisco, the two former officials said. In fact, Russian diplomats used to regularly drive a van with protected diplomatic information from San Francisco to Seattle, said a second official, though the frequency of those trips decreased over time, when U.S. officials suspected the Russians had begun to move their communications to encrypted channels online.

Still, the Seattle area has some rich espionage targets. Firms like Boeing and Microsoft have long been of interest to Russian operatives, the former intel officials said. So have the many military bases in the area, including, pre-eminently, Naval Base Kitsap, located just across the Puget Sound from Seattle and home to eight nuclear-armed submarines. Administration officials have openly cited the Seattle consulate’s proximity to Boeing, and sensitive military bases, as reasons for its closure.

Because there is a seven-hour float from Kitsap to these nuclear-armed submarines’ dive point, the two former officials said, there are numerous opportunities to track the subs’ movements—a longstanding concern for U.S. intelligence and military officials. Knowing when a submarine is headed out to sea or how many submarines are running patrols at a given time, and potentially identifying new technologies on these vessels, are all valuable pieces of intelligence, these officials said. Moreover, U.S. intel officials have worried that in a worst-case-scenario—actual armed hostilities between the two countries—information gleaned from Russian operatives in the Pacific Northwest could be used to identify “choke points.” For instance, they might know the ideal places to fire a rocket-propelled grenade at a fishing boat in a narrow channel, which could prevent military vessels from deploying.

In the past, suspected intel operatives based at Russia’s Seattle consulate were observed engaging in the same sorts of behavior as their counterparts in San Francisco, the two former intel officials said, including tracking down potential fiber-optic nodes (as part of Russia’s long-term effort to map where data were being transferred), or Cold War-era intelligence-collection sites, in Northwestern forests. U.S. officials also believed Russian operatives were traveling to remote beaches in the area in order to “signal,” or cryptically transmit and receive data, with interlocutors offshore. (There was a specific beach in Oregon these individuals would favor, the two former officials said.)

More recently, however, these activities appeared to die down, these individuals said, an event one of the former intel officials attributes to Edward Snowden’s 2013 disclosures, which some in the intelligence community believe led Russia to overhaul its strategies for domestic intelligence-gathering. Generally, this person said, Seattle seemed like a “proving ground” for junior Russian intelligence officers, a place to send less-experienced operatives to acclimate them to the United States. After Snowden, U.S. intel officials started seeing more “travelers” in the Seattle area—suspected intelligence operatives working under both diplomatic and nonofficial cover—flying in remotely to meet with individuals, the two former officials said.

The biggest Russia-related concern in Seattle was “cyber-related activities,” which were separate from the

consulate, the two former officials said—including those of the local Kaspersky Labs affiliate. In July 2017, U.S. officials banned Moscow-based Kaspersky, which produces anti-virus software, from being used on any government computers, over fears about the company’s connections to Russian intelligence. U.S. counterintelligence officials were concerned that Kaspersky was being used as a tool for Russian covert communications, the two former officials said, and were also examining whether individuals affiliated with Kaspersky were actually engaging in cyber-espionage domestically. “As a private company, Kaspersky Lab does not have inappropriate ties to any government, including Russia, and the company has never helped, nor will help, any government in the world with its cyber espionage efforts,” a spokesperson for Kaspersky said. “The U.S. government actions against Kaspersky Lab lack sufficient basis, are unconstitutional, have been taken without any evidence of wrongdoing by the company, and rely upon subjective, non-technical public sources, such as uncorroborated and often anonymously sourced media reports, related claims, and rumors, which is why the company has challenged the validity of these actions in federal court.”

“Was Kaspersky looking at Microsoft or Boeing as opportunities to exploit? Was it just business development? Or were they actually engaged in trying to penetrate these enterprises?” asked one of the former officials. “The suspicions on Kaspersky have pretty much been borne out ... when you look at the recent U.S. government decision, and what has been publicly reported on what the Israelis have been able to find out.” In 2017 the New York Times reported that Israeli intelligence had hacked into a Russian espionage operation, observing Russian operatives using back doors in Kaspersky software to scan for, and purloin, U.S. intelligence documents.

Russia’s interest in Microsoft is also well-documented. In 2010, U.S. officials deported Alexey Karetnikov, a 23-year-old Russian national, from the Seattle area, where he had been working at Microsoft as a software tester. U.S. officials believed he was actually a Russian intelligence officer, and linked him to the ring of 10 “illegals”—Russian deep-cover operatives who had been living in the United States—that U.S. officials had arrested and deported earlier that year. Two of those undercover operatives, Michael Zottoli and Patricia Mills (whose real names are Mikhail Kutsik and Natalia Pereverzeva), had lived in Seattle for years, even starting a family there. In Seattle, Kutsik worked at a telecommunications firm, and both operatives took finance classes at the University of Washington. In a 2017 article in Seattle Met Magazine, Kutsik and Pereverzeva’s former investments professor said he believed the Russians were interested in his class because many of his students went on to work for Amazon, Boeing or Microsoft. Kutsik, Pereverzeva and Karetnikov were not known to have been coordinating their activities with the Seattle consulate, one of the former officials said.

Even as Russian espionage continues to migrate outside consular facilities—to travelers, and individuals working locally under nonofficial cover—it is “no coincidence” that both shuttered diplomatic outposts were on the West Coast, said one of the former officials. No matter when—or if—these two consulates are reopened, Russian interest in the West Coast is likely to continue far into the foreseeable future.

<b>HEADLINE</b>	<b>04/03 Effects, dangers of K2 synthetic marijuana</b>
<b>SOURCE</b>	<a href="http://abcnews.go.com/Health/spotlighting-effects-dangers-k2-synthetic-marijuana/story?id=54206649">http://abcnews.go.com/Health/spotlighting-effects-dangers-k2-synthetic-marijuana/story?id=54206649</a>
<b>GIST</b>	<p>It’s called K2, synthetic marijuana, and it has caused a cluster of deaths in Chicago.</p> <p><a href="#">The Chicago Tribune</a> reported three arrests over Easter weekend after large amounts of K2 being sold at a convenience store were discovered to be contaminated with a toxic compound used as rat poison.</p> <p>Between March 10 and April 2, 56 people have been hospitalized in Illinois, all related to K2, the Tribune reported. Two have died.</p> <p>Here's what you need to know:</p>

**What is synthetic marijuana?**

Contrary to what many think, synthetic marijuana is not one drug, and it is very different from tetrahydrocannabinol (aka THC, the main compound in natural marijuana). Synthetic marijuana is a “designer drug,” a chemical engineered to create the same effects as an illegal drug, but one that is different enough to avoid drug laws.

Synthetic cannabinoids (substances mimicking marijuana) work on the same brain receptors as THC, but can bind to the receptor up to 100 times more tightly than THC. Most were actually developed for research purposes so that scientists could better understand the role of THC receptors in the brain. Unlike marijuana, they have no reported potential for medical use. Eighty-four new synthetic cannabinoids were identified by the National Forensic Laboratory Information System in 2015 alone (for comparison, there were only two in 2009). These chemicals, all vastly different from each other, do not cause identical responses in the brain.

A synthetic marijuana chemical is most often sprayed onto a mix of plant materials so that it can be smoked. The chemicals can also be mixed into a liquid for vaping with e-cigarettes or added directly to herbal tea or foods. According to the Drug Enforcement Administration (DEA), this manufacturing and packaging happens “without pharmaceutical-grade chemical purity standards” and “ignoring any control mechanisms to prevent contamination or to ensure a consistent, uniform concentration of the powerful and dangerous drug in each package.”

**Why do people use synthetic marijuana?**

People use synthetic cannabinoids for many reasons: easy access, lower cost or the promise of a more intense high than they get with marijuana. Many hope that use of synthetic marijuana will avoid a positive urine drug test since many of the chemicals used to make the drugs are not known to the DEA.

In fact, the makers of synthetic marijuana are constantly tweaking the structures of their chemicals to avoid being recognized by the government as an illegal substance and to prevent scientists from developing a drug test for their compound.

Most are made in Asia and smuggled into the U.S., branded as something else. According to the Centers for Disease Control and Prevention (CDC), “There are no standards for making, packaging, or selling synthetic cannabinoid chemicals. That means that two packets of a brand-named product may have completely different chemicals.”

Despite all this, cannabinoids are marketed to unwitting buyers as safe and legal alternatives to marijuana. The CDC says that these drugs “are distributed worldwide under countless trade names and packaged in colorful wrappers designed to appeal to teens, young adults, and first-time drug users.”

They are labeled as “natural” compounds based on the plants inside -- even though the active ingredient is a factory-made chemical. Because they have never earned approval from the Food and Drug Administration (FDA), cannabinoids are sold as “herbal products,” “incense,” or “potpourri” to disguise their real use. Most packages are marked with “not for human consumption” -- not because the makers don’t want human to use them, but so that the company cannot be held at fault for problems associated with smoking or eating the drug.

**So, are these substances actually legal?**

Based on major concerns about the danger of these products, the DEA and local agencies are attempting to keep up with drugmakers to ban every known synthetic marijuana substance, but it’s tough to stay on top of all the compounds. As of 2017, 26 cannabinoids were listed as Schedule 1 controlled substances (the most severely restricted substances), though there are likely hundreds more being sold.

**What are the effects of synthetic pot on the body?**

The effects of these drugs are highly unpredictable, as the actual chemical in the package is widely different and may even change from batch to batch. Many buyers experience different effects than intended.

First and foremost, these are “psychoactive” substances, which cause an altered mental perception of the world. This high can be associated with irritability, confusion, sleepiness, dizziness and inability to concentrate. At worst, they cause hallucinations (fives times more often than THC), suicidal thoughts and violent behavior. They are also far more likely than marijuana to cause other symptoms like vomiting and muscle breakdown. They can lead to heart problems such as fast heart rate, high blood pressure and even heart attacks. There have been reports of rapid and complete kidney failure related to specific strains of synthetic marijuana. In 2018 so far (through March), Poison Control Centers have received 462 calls concerning symptoms related to these drugs. In 2015, there were 7,762 total calls, the highest year on record. Of the people who call poison control or come to the emergency department for problems related to synthetic cannabinoids each year, approximately 1 in 100 die from these events.

Unlike marijuana, synthetic cannabinoids are addictive and regular users report feeling intense withdrawal symptoms when they stop using.

#### **What else is in the package?**

Another highly concerning feature of synthetic cannabinoids: These drugs are frequently contaminated with other drugs, and buyers have no idea what may be in the packet. The most common contaminating drug is another designer drug, in a drug class called “cathinones.”

Just as synthetic cannabinoids are designed to mimic THC, cathinones are designed to mimic the effects of cocaine or methamphetamines. Their effects are just as unpredictable and dangerous. When sold by themselves, they are sold as “bath salts” or “plant food” in order to use the label “not for human consumption.” This class of medications most commonly cause confusion, agitation, aggressive and self-harming behavior. They can also lead to fast heart rate, high blood pressure, muscle breakdown, kidney failure and death.

#### **What about the Chicago cases?**

The contaminating substance in the recently reported cluster of illnesses is brodifacoum. This is the first time that this substance has been reported in synthetic marijuana, but it has previously been reported to be mixed with other drugs of abuse to make their effects last longer.

Brodifacoum is a rat poison. It is made from the more commonly known rat poison, Coumadin (or warfarin), whose name you may recognize, since, in small doses, it’s used as a medically prescribed blood thinner. Warfarin and brodifacoum interfere with the body’s natural clotting factors and can cause life-threatening bleeding.

Brodifacoum is known as a “superwarfarin,” which means that its effects on the body last a long time and are very difficult to reverse. Bleeding can occur from any part of the body: Several of the recent cases reported bleeding from the eyes and ears, and deaths occurred due to unstoppable internal bleeding.

#### **Take-home message**

Though they are sold as safe, legal alternatives to marijuana (and a way to avoid getting caught using drugs), synthetic cannabinoids are a different class of chemicals completely.

They are unpredictable and highly dangerous on their own -- and can be contaminated with even more toxic and unreported chemicals, making this a hazardous trend that will likely be marked with more reports of deadly events in the future. In addition, know that there is no standardization in the labels or packets, no guarantee what is inside and no idea, if you take a synthetic cannabinoid, what will happen to you.

**HEADLINE** 04/04 Long-hidden toxic waste endangers Serbia

**SOURCE** <http://abcnews.go.com/International/wireStory/long-hidden-toxic-waste-endangers-serbias-health->

	<a href="#">eu-54224590?</a>
GIST	<p>Dozens of rusty barrels and plastic tubs filled with a dark, oily liquid cluttered a muddy yard where chickens roamed. More brimming containers packed a wooden barn.</p> <p>The property in northern Serbia, located next to farmland and a railway line, stored about 100 tons of likely hazardous waste altogether, the country's environmental protection ministry said. Authorities found it last month, along with another big batch cemented into the walls of a nearby brick factory.</p> <p>A string of similar discoveries has triggered alarms in Serbia, where masses of poorly secured industrial waste are believed to have been dumped or hidden and could pose long-term environmental and public health dangers.</p> <p>The situation arising from decades of neglect, corruption and economic decay is "dramatic," Serbian Environmental Protection Minister Goran Trivan said.</p> <p>"People actually buried hazardous waste in their own yards as if it were some kind of hidden treasure," Trivan said in an interview with The Associated Press. "This has to stop."</p> <p>The problem has come into focus as Serbia and other Balkan nations move closer to joining the European Union, a step that ultimately will require their environmental protection standards to be in line with those in existing EU member countries. Such reforms could take the EU candidates years to achieve.</p> <p>Hazardous waste must be exported from Serbia to places such as Austria, Romania and Switzerland because the country does not have its own processing facilities. The shipments are costly, so some manufacturers and waste-management companies get rid of production residues improperly.</p> <p>The concern about concealed pollutants results from simple math, Trivan said. The country generates some 130,000 to 220,000 tons of hazardous waste every year, and while part of it is either exported or stored properly inside Serbia, a chunk remains unaccounted for, he said.</p> <p>"So, where is it?" Trivan said. "Figures tell us that we could be dealing with serious quantities, possibly thousands of tons."</p> <p>The way to handle the problem would be to step up government oversight and to introduce harsher sentences for offenders while encouraging private investments in waste management, Trivan said.</p> <p>The ministry has teamed up with the state security agency, the prosecutor's office and police to locate as much dumped waste as soon as possible. A public campaign urges citizens to report sites where they suspect toxic materials might be stored.</p> <p>Andjelka Mihajlov, an environmental scientist on the Serbian government team working to revise the country's laws to be in line with EU membership, said the potential damage that hidden toxic hazards pose to the country's people and environment cannot be estimated. It depends on factors such as the type of substances and where and how they were stowed.</p> <p>"If not handled properly, hazardous waste poses a serious concern for public health," said Mihajlov, who served briefly as Serbia's environment minister.</p> <p>Authorities say that out of the more than a hundred companies registered in Serbia to handle hazardous waste, only about a dozen followed proper labeling, storage and disposal regulations. Instead, many waste management firms pocket the money companies pay them and abandon loads that were supposed to be shipped abroad somewhere in Serbia.</p> <p>Officials suspect that was the case with the barrels and plastic tubs found on the property in the town of Pancevo in mid-March. A business named Eko 21 had been hired to deal with production waste disposed of the containers in an inhabited area without fences or any other safeguards to keep the population safe.</p>

	<p>Residents of a village near the Serbian capital, Belgrade, were warned not to use their wells after dozens of barrels of toxic waste containing carcinogenic benzene were found buried in Obrenovac. The property owner was arrested and faces a prison term of up to five years if convicted of illegally storing dangerous substances.</p> <p>Trivan said unreported waste could have been seeping into the ground for years at a number of as-yet unknown locations, polluting the surrounding water and land.</p> <p>"I am astonished by the level of negligence toward our own lives," he lamented.</p> <p>Serbia also has unaddressed environmental problems with its waste water; all Serbian cities and many factories dump it straight into rivers. Air quality, drinking water safety and pollution from mines and power plants are worries as well.</p> <p>Trivan acknowledged that his country is lagging at least 25 to 30 years behind in environmental protection, but is optimistic it will steer its way clear.</p>

<b>HEADLINE</b>	<b>04/03 States vow to defend auto fuel efficiency</b>
<b>SOURCE</b>	<a href="https://www.reuters.com/article/us-usa-epa-autos/u-s-states-vow-to-defend-auto-fuel-efficiency-standards-idUSKCN1HA2DI?il=0">https://www.reuters.com/article/us-usa-epa-autos/u-s-states-vow-to-defend-auto-fuel-efficiency-standards-idUSKCN1HA2DI?il=0</a>
<b>GIST</b>	<p>WASHINGTON (Reuters) - Nearly a dozen U.S. states and Washington D.C. on Tuesday promised to defend federal automobile efficiency standards against a rollback proposed this week by Scott Pruitt, the embattled head of the Environmental Protection Agency.</p> <p>"All Americans ... deserve to enjoy fuel-efficient, low-emission cars and light trucks that save money on gas, improve our health and support American jobs," the attorneys general from 11 states said in a statement responding to Pruitt's proposal on Monday to ease the Obama-era standards.</p> <p>The standards called for roughly doubling by 2025 the average fuel efficiency of new vehicles sold in the United States to about 50 miles (80 km) per gallon. Proponents say they help spur innovation in clean technologies and cut emissions of the greenhouse gas carbon dioxide.</p> <p>California has long been allowed by an EPA waiver to impose stricter standards than Washington does on vehicle emissions of some pollutants. And 12 other states follow California's lead on cleaner cars.</p> <p>The attorneys general, from states including New York, Iowa and Massachusetts, said they would challenge a rollback in court. California Attorney General Xavier Becerra has already threatened to sue in defense of the standards.</p> <p>The statement, also signed by more than 50 mayors from around the country, said automakers have been making progress in meeting the national standards and that compliance costs have been lower than projected.</p> <p>Auto industry executives have not publicly sought specific reductions in the requirements negotiated with the Obama administration in 2011 as part of a bailout deal. But they have urged Pruitt and President Donald Trump to revise the standards so it becomes easier and less costly to meet the targets.</p> <p>Pruitt defended his decision at EPA headquarters on Tuesday.</p>

<b>HEADLINE</b>	<b>04/03 FDA orders mandatory kratom recall</b>
<b>SOURCE</b>	<a href="https://www.nbcnews.com/health/health-news/fda-forces-mandatory-recall-kratom-says-it-s-first-n862481">https://www.nbcnews.com/health/health-news/fda-forces-mandatory-recall-kratom-says-it-s-first-n862481</a>
<b>GIST</b>	<p>The Food and Drug Administration ordered the mandatory recall Tuesday of kratom products distributed by one company that may be contaminated with salmonella.</p> <p>The FDA said it's the first time it has used its mandatory recall power for a food product after first trying to get the company to voluntarily take the products back. The agency has been criticized for years by consumer advocates and some members of Congress who say it moves too slowly to recall potentially contaminated foods.</p> <p>Kratom is a plant supplement sold to treat pain, to help people stop using opioids or as a stimulant. The FDA has been warning against its use in general and later issued a large voluntary recall notice after some samples were found to be contaminated with salmonella and sickened 87 people.</p> <p>"As of April 2, 2018, the FDA and state partners have tested multiple kratom products, and 26 different products were positive for Salmonella," it said.</p> <p>Tuesday's mandatory recall affects Triangle Pharmanaturals, which bills itself as a consultant and packager of supplement products.</p> <p>"The agency took this action after the company failed to cooperate with the FDA's request to conduct a voluntary recall," the FDA said in a statement.</p> <p>"This is the first time the agency has issued a mandatory recall order to protect Americans from contaminated food products."</p> <p>Two samples of products made by Triangle and sold in Oregon tested positive for salmonella, the FDA said.</p> <p>"The FDA is advising consumers to discard the products that are part of the mandatory recall, which include, but are not limited to: Raw Form Organics Maeng Da Kratom Emerald Green, Raw Form Organics Maeng Da Kratom Ivory White, and Raw Form Organics Maeng Da Kratom Ruby Red," it said.</p>

<b>HEADLINE</b>	<b>04/03 Russia demands thorough poisoning probe</b>
<b>SOURCE</b>	<a href="https://www.cbsnews.com/news/sergei-skripal-russia-nerve-agent-poisoning-investigation-vladimir-putin/">https://www.cbsnews.com/news/sergei-skripal-russia-nerve-agent-poisoning-investigation-vladimir-putin/</a>
<b>GIST</b>	<p>MOSCOW -- Russian President Vladimir Putin says Moscow wants a thorough probe into the poisoning of an ex-Russian spy in Britain and will demand to be part of it. Putin, speaking Tuesday in Ankara following talks with Turkish President Recep Tayyip Erdogan, cited the head of Britain's defense laboratory who said that its scientists have not identified the precise source of the nerve agent used to attack former double agent Sergei Skripal and his daughter.</p> <p>Putin said, given the lack of precise information about the agent's origin, "the speed at which the anti-Russian campaign has been launched causes bewilderment."</p> <p>Britain and its allies have blamed Russia for the poisoning, which Russia has vehemently denied. Western countries and Russia have expelled more than 150 diplomats each in the dispute, with relations between the U.S. and Russia declining to the lowest level in decades.</p> <p>Putin said the type of the nerve agent used in the March 4 poisoning could be made in some 20 nations.</p>

	<p>Skripal was imprisoned in Russia after he sold secrets to British intelligence. He was released in a 2010 spy swap and moved to Britain.</p> <p>The Russian Foreign Ministry said Wednesday that British special services could have been behind the poisoning. British officials have previously rejected such Russian claims as nonsense.</p>
<p><a href="#">Return to Top</a></p>	

<b>HEADLINE</b>	<b>04/03 Israel vows tough response to protests</b>
<b>SOURCE</b>	<a href="http://abcnews.go.com/International/wireStory/israel-defense-minister-vows-tough-response-gaza-protests-54198452?cid=clicksource_76_4_article%20roll_articleroll_hed">http://abcnews.go.com/International/wireStory/israel-defense-minister-vows-tough-response-gaza-protests-54198452?cid=clicksource_76_4_article%20roll_articleroll_hed</a>
<b>GIST</b>	<p>Israel's defense minister said Tuesday that the military will not change its tough response to Hamas-led mass protests near Gaza's border with Israel, warning that those who approach the border are putting their lives at risk.</p> <p>Avigdor Lieberman spoke near Gaza, where 18 Palestinians were killed by Israeli fire Friday, the first day of what Hamas says will be six weeks of intermittent border protests against a stifling blockade of the territory.</p> <p>On Tuesday, a 25-year-old Gaza man was killed by Israeli fire as he threw stones in the area of the border fence, Gaza's Health Ministry said.</p> <p>Lieberman's comments raised the possibility of more bloodshed this Friday, when another mass protest is expected.</p> <p>The international group Human Rights Watch accused Lieberman and other senior Israeli officials Tuesday of unlawfully calling for the use of live fire against Palestinian protesters who posed no imminent threat to life.</p> <p>Last Friday, thousands of Palestinians marched near the border fence between Israel and Gaza, many gathering around tent encampments set up several hundred meters (yards) from the frontier. Smaller groups moved closer to the fence, throwing stones, hurling firebombs or burning tires. Israeli troops were lined up on the other side of the fence, including snipers perched on high earth embankments overlooking Gaza.</p> <p>Palestinian health officials have said 18 Palestinians were killed that day, including 13 involved in the mass protest, making it the bloodiest day in Gaza since the 2014 war between Israel and the Islamic militant group Hamas.</p>

<b>HEADLINE</b>	<b>04/03 Dominica: hurricane recovery progress</b>
<b>SOURCE</b>	<a href="http://abcnews.go.com/International/wireStory/tourists-exports-return-storm-hit-island-dominica-54207056?cid=clicksource_76_4_article%20roll_articleroll_hed">http://abcnews.go.com/International/wireStory/tourists-exports-return-storm-hit-island-dominica-54207056?cid=clicksource_76_4_article%20roll_articleroll_hed</a>
<b>GIST</b>	<p>The small Caribbean island of Dominica is making progress toward recovery after a devastating blow from last year's Hurricane Maria, the country's prime minister said Tuesday.</p> <p>Prime Minister Roosevelt Skerrit said the country has exported the first crops harvested since Maria roared across Dominica as a fierce Category 5 on Sept. 18 and that tourism is recovering with the return of cruise ships and the re-opening of hotels on the mountainous island in the eastern Caribbean.</p> <p>He also said water has now been fully restored to all communities in Dominica and that many homes are being rebuilt. The country has received about \$400 million in assistance from the World Bank, the European Union and other international institutions.</p>

	<p>Skerrit said the island needs about \$1 billion to rebuild and prepare for future storms.</p> <p>"We are much better than yesterday," the prime minister said in an interview on the sidelines of a disaster-recovery workshop in Miami organized by the Clinton Foundation. "We have a long way to go because we are going to build back better and that takes time."</p> <p>Hurricane Maria struck Dominica with sustained winds of about 160 mph, killing at least 31 people and damaging 90 percent of homes on the island of about 74,000 people. Skerrit, who had to flee his own home when it was damaged in the storm, said about 5,000 houses need to be rebuilt still and 20,000 require repairs.</p>

<b>HEADLINE</b>	<b>04/03 UN: attack in CAR killed peacekeeper</b>
<b>SOURCE</b>	<a href="http://abcnews.go.com/International/wireStory/peacekeeper-killed-11-hurt-car-attack-54206918?cid=clicksource_76_4_article%20roll_articleroll_hed">http://abcnews.go.com/International/wireStory/peacekeeper-killed-11-hurt-car-attack-54206918?cid=clicksource_76_4_article%20roll_articleroll_hed</a>
<b>GIST</b>	<p>Mostly Christian militias attacked a U.N. peacekeeping base in the Central African Republic early Tuesday, and in an exchange of fire that lasted several hours one peacekeeper was killed and 11 others were injured, the United Nations said.</p> <p>U.N. spokesman Stephane Dujarric said the attack by the anti-Balaka militias took place at a temporary U.N. peacekeeping base in Tagbara, about 60 miles northeast of the central mining town of Bambari. The mission said 22 anti-Balaka fighters died in the clash.</p> <p>He said the U.N. peacekeeping mission sent reinforcements to the base, and he strongly condemned the attack.</p> <p>Separately, Dujarric said, the U.N. mission reported that it later discovered the bodies of 21 civilians, including four women and four children, in Tagbara.</p> <p>Dujarric said U.N. peacekeepers were informed Monday evening that a rebel group known as the UPC had detained 23 people in Tagbara, including 13 women and three children. He said they were released peacefully to U.N. peacekeepers and spent the night at the temporary base to ensure their safety.</p> <p>In another incident, Dujarric said, U.N. peacekeepers and CAR forces launched a joint operation on Saturday and rescued 15 people who had been taken hostage by the Lord's Resistance Army rebel group led by Joseph Kony, who is wanted by the International Criminal Court for war crimes.</p> <p>The LRA has wreaked havoc in Central Africa over the years in violent rampages that include the abduction of children. It has taken boys who are then forced to become fighters and girls who become sex slaves, one of the reasons the group has gained international attention in recent times.</p> <p>Dujarric said the U.N. mission condemned the UPC and LRA incidents as well.</p> <p>The Central African Republic has faced deadly interreligious and intercommunal fighting since 2013, when predominantly Muslim Seleka rebels seized power in the capital, Bangui. Mostly Christian anti-Balaka militias fought back, resulting in thousands of people killed and hundreds of thousands displaced.</p>

<b>HEADLINE</b>	<b>04/03 China minister: visit to Russia a 'signal'</b>
<b>SOURCE</b>	<a href="http://abcnews.go.com/International/wireStory/chinas-defense-chief-moscow-trip-signal-us-54205721">http://abcnews.go.com/International/wireStory/chinas-defense-chief-moscow-trip-signal-us-54205721</a>
<b>GIST</b>	<p>China's new defense minister says his visit to Russia is a signal to the United States about the increasingly close military ties between Moscow and Beijing.</p> <p>The unusually bold statement Tuesday by Gen. Wei Fenghe at the start of his talks with Russian Defense Minister Sergei Shoigu reflected the growing military cooperation between the two former Communist rivals.</p> <p>Speaking in Moscow, Wei emphasized that he chose Russia for his first trip abroad since becoming the international face of China's military last month to "show the world a high level of development of our bilateral relations and firm determination of our armed forces to strengthen strategic cooperation."</p> <p>Wei added he would attend a security conference Wednesday hosted by the Russian Defense Ministry to "let the Americans know about the close ties between the armed forces of China and Russia."</p> <p>Shoigu said Wei's visit "underlines a special character of relations between Russia and China," adding that it will help further deepen ties between the two militaries.</p> <p>Moscow and Beijing have forged what they described as a "strategic partnership," expressing their shared opposition to the "unipolar" world — the term they use to describe perceived U.S. global domination.</p> <p>As part of their burgeoning military cooperation, Moscow and Beijing have conducted joint military maneuvers, including exercises in the South China Sea and last summer's joint navy drills in the Baltics.</p> <p>The Baltic exercise marked the first time that China had flexed its military muscle in a region where tensions between Russia and NATO have escalated following Moscow's 2014 annexation of Crimea.</p> <p>In December, the Russian and Chinese militaries held missile defense drills intended to practice a joint response to missile threats from other countries.</p>

<b>HEADLINE</b>	<b>04/03 Teachers seize Oklahoma capitol bldg.</b>
-----------------	--

SOURCE	<a href="http://abcnews.go.com/US/thousands-teachers-seize-oklahoma-capitol-building-demand-education/story?id=54201499">http://abcnews.go.com/US/thousands-teachers-seize-oklahoma-capitol-building-demand-education/story?id=54201499</a>
GIST	<p>Thousands of determined and boisterous Oklahoma teachers seized every floor of their state capitol building Tuesday vowing not to leave until lawmakers loosen the purse strings on education funding.</p> <p>In a show of force, educators stayed out of classrooms throughout the state for a second day and said in unison that they will continue their walkout until the Republican-dominated legislature substantially boosts money for school resources.</p> <p>"We'll be back on Wednesday!" chanted the teachers.</p> <p>Many of them were holding signs reading, "Let's Start Funding" and "Fund our Future."</p> <p>"I'm hearing that we have more people today than we had yesterday," Katherine Bishop, vice president of the Oklahoma Education Association told the crowd to loud cheers. "I just heard that people in the House can hear us. We need to be even louder."</p> <p>There were so many people waiting to get into the capitol to speak with lawmakers that officials have occasionally declared the building at capacity and temporarily shut the doors.</p> <p>Thousands more teachers stood outside the capital as buses filled with educators who kept pouring in from across the state.</p> <p>The massive classroom walkout caused school districts across the state -- including those in the largest cities of Oklahoma City, Tulsa and Norman -- to cancel classes for a second day.</p> <p>Bishop implored to the crowd to skip school for at least the remainder of the week to keep the protest going.</p> <p>The teachers are demanding that Republican Gov. Mary Fallin and the state legislature restore funding for education programs and supplies they say have been drastically slashed over the last decade.</p> <p>Most of the Oklahoma teachers walked out of classrooms across the state to attend the rally in Oklahoma City. Many said they were frustrated with the lack of resources in their schools, and some said they were teaching students about science and technology with textbooks from the 1990s.</p>

HEADLINE	<b>04/02 Some police returning military vehicles</b>
SOURCE	<a href="https://www.militarytimes.com/news/2018/04/02/some-wisconsin-police-are-returning-military-vehicles/">https://www.militarytimes.com/news/2018/04/02/some-wisconsin-police-are-returning-military-vehicles/</a>
GIST	<p>MADISON, Wis. — Some Wisconsin police are returning mine-resistant vehicles on loan from the Defense Department and replacing them with smaller, armored emergency vehicles they say are more appropriate for law enforcement.</p> <p>The Defense Department has transferred excess military equipment and armored vehicles to law enforcement agencies through the Law Enforcement Support Office.</p> <p>Police departments in Superior and Madison plan to return their vehicles to the program, Wisconsin Public Radio reported. They may eventually be transferred to other law enforcement agencies.</p> <p>Mine-resistant ambush protected vehicles are designed to be used by the U.S. military and are able to withstand attacks from improvised explosive devices.</p> <p>The vehicles have drawn criticism regarding the militarization of police.</p>

“I heard from citizens that they didn’t view it as an appropriate piece of equipment for the Police Department — that they thought we were overdoing things when we had that type of vehicle out,” said Superior Police Chief Nick Alexander.

The community perception combined with maintenance issues prompted the department to seek other options, he said. The Superior City Council recently approved the purchase of a smaller emergency operations vehicle.

The mine-resistant vehicle doesn’t meet the Madison Police Department’s law enforcement needs, said Madison Assistant Police Chief Victor Wahl.

“It’s really designed to take a small number of troops, sort of seal them up inside and then drive through a hostile area and allow them to survive if there’s small arms fire or improvised explosive devices that they drive over,” he said. “Stuff that civilian police use armored vehicles for, it needs a lot more capacity to carry people, easier access to get in and out. It needs to be a little bit more nimble and flexible for maneuverability.”

The vehicle is large, heavy and difficult to maintain, he said.

“The MRAP we got from the military, but you can’t go down to the auto parts store and get spare parts for it,” Wahl said. “As things break down or as there’s issues with it, it becomes more and more challenging to keep it up and running and maintain it.”

There are 36 mine-resistant vehicles in the state, said a spokeswoman with Wisconsin Emergency Management.

<b>HEADLINE</b>	<b>04/03 DHS: rogue tracking devices in D.C.</b>
<b>SOURCE</b>	<a href="https://apnews.com/d716aac4ad744b4cae3c6b13dce12d7e">https://apnews.com/d716aac4ad744b4cae3c6b13dce12d7e</a>
<b>GIST</b>	<p>For the first time, the U.S. government has publicly acknowledged the existence in Washington of what appear to be rogue devices that foreign spies and criminals could be using to track individual cellphones and intercept calls and messages.</p> <p>The use of what are known as cellphone-site simulators by foreign powers has long been a concern, but American intelligence and law enforcement agencies — which use such eavesdropping equipment themselves — have been silent on the issue until now.</p> <p>In a March 26 letter to Oregon Sen. Ron Wyden, the Department of Homeland Security acknowledged that last year it identified suspected unauthorized cell-site simulators in the nation’s capital. The agency said it had not determined the type of devices in use or who might have been operating them. Nor did it say how many it detected or where.</p> <p>The agency’s response, obtained by The Associated Press from Wyden’s office, suggests little has been done about such equipment, known popularly as Stingrays after a brand common among U.S. police departments. The Federal Communications Commission, which regulates the nation’s airwaves, formed a task force on the subject four years ago, but it never produced a report and no longer meets regularly.</p> <p>The devices work by tricking mobile devices into locking onto them instead of legitimate cell towers, revealing the exact location of a particular cellphone. More sophisticated versions can eavesdrop on calls by forcing phones to step down to older, unencrypted 2G wireless technology. Some attempt to plant malware.</p> <p>They can cost anywhere from \$1,000 to about \$200,000. They are commonly the size of a briefcase; some</p>

are as small as a cellphone. They can be placed in a car next to a government building. The most powerful can be deployed in low-flying aircraft.

Thousands of members of the military, the NSA, the CIA, the FBI and the rest of the national-security apparatus live and work in the Washington area. The surveillance-savvy among them encrypt their phone and data communications and employ electronic countermeasures. But unsuspecting citizens could fall prey.

Wyden, a Democrat, wrote DHS in November requesting information about unauthorized use of the cell-site simulators.

The reply from DHS official Christopher Krebs noted that DHS had observed “anomalous activity” consistent with Stingrays in the Washington area. A DHS official who spoke on condition of anonymity because the letter has not been publicly released added that the devices were detected in a 90-day trial that began in January 2017 with equipment from a Las Vegas-based DHS contractor, ESD America .

Krebs, the top official in the department’s National Protection and Programs Directorate, noted in the letter that DHS lacks the equipment and funding to detect Stingrays even though their use by foreign governments “may threaten U.S. national and economic security.” The department did report its findings to “federal partners” Krebs did not name. That presumably includes the FBI.

The CEO of ESD America, Les Goldsmith, said his company has a relationship with DHS but would not comment further.

Legislators have been raising alarms about the use of Stingrays in the capital since at least 2014, when Goldsmith and other security-company researchers conducted public sweeps that located suspected unauthorized devices near the White House, the Supreme Court, the Commerce Department and the Pentagon, among other locations.

The executive branch, however, has shied away from even discussing the subject.

Aaron Turner, president of the mobile security consultancy Integricell, was among the experts who conducted the 2014 sweeps, in part to try to drum up business. Little has changed since, he said.

Like other major world capitals, he said, Washington is awash in unauthorized interception devices. Foreign embassies have free rein because they are on sovereign soil.

Every embassy “worth their salt” has a cell tower simulator installed, Turner said. They use them “to track interesting people that come toward their embassies.” The Russians’ equipment is so powerful it can track targets a mile away, he said.

Shutting down rogue Stingrays is an expensive proposition that would require wireless network upgrades the industry has been loath to pay for, security experts say. It could also lead to conflict with U.S. intelligence and law enforcement.

In addition to federal agencies, police departments use them in at least 25 states and the District of Columbia, according to the American Civil Liberties Union.

Wyden said in a statement Tuesday that “leaving security to the phone companies has proven to be disastrous.” He added that the FCC has refused to hold the industry accountable “despite repeated warnings and clear evidence that our phone networks are being exploited by foreign governments and hackers.”

After the 2014 news reports about Stingrays in Washington, Rep. Alan Grayson, D-Fla, wrote the FCC in alarm. In a reply, then-FCC chairman Tom Wheeler said the agency had created a task force to combat illicit and unauthorized use of the devices. In that letter, the FCC did not say it had identified such use

	<p>itself, but cited media reports of the security sweeps.</p> <p>That task force appears to have accomplished little. A former adviser to Wheeler, Gigi Sohn, said there was no political will to tackle the issue against opposition from the intelligence community and local police forces that were using the devices “willy-nilly.”</p> <p>“To the extent that there is a major problem here, it’s largely due to the FCC not doing its job,” said Laura Moy of the Center on Privacy and Technology at Georgetown University. The agency, she said, should be requiring wireless carriers to protect their networks from such security threats and “ensuring that anyone transmitting over licensed spectrum actually has a license to do it.”</p> <p>FCC spokesman Neil Grace, however, said the agency’s only role is “certifying” such devices to ensure they don’t interfere with other wireless communications, much the way it does with phones and Wi-Fi routers.</p>

<b>HEADLINE</b>	<b>04/03 Europe air traffic control system failure</b>
<b>SOURCE</b>	<a href="http://www.dailymail.co.uk/news/article-5573959/Up-half-flights-Europe-face-delays-EU-air-traffic-control-computer-failure.html">http://www.dailymail.co.uk/news/article-5573959/Up-half-flights-Europe-face-delays-EU-air-traffic-control-computer-failure.html</a>
<b>GIST</b>	<p>Up to half of all flights in Europe face delays today after a Europe-wide air traffic control system failed.</p> <p>Eurocontrol, which runs the system, said that a technical problem means that as many as half a million passengers could be affected, disrupting travellers who went away for the Easter weekend.</p> <p>'Today 29,500 flights were expected in the European network. Approximately half of those could have some delay as a result of the system outage,' Eurocontrol said. The agency said the system would be back up and running tomorrow.</p> <p>London's Gatwick Airport said seven or eight flights an hour were being delayed as a result and told passengers to check with their airlines.</p> <p>Eurocontrol - which covers 41 countries including all 28 EU nations plus others in Europe including Ukraine, Turkey and Norway - said it hoped to have the system back up and running by tomorrow.</p> <p>The cause had been identified, it said, without saying what it was. The agency said 'contingency procedures' were in place to stop the system becoming overloaded but that these would be lifted later this evening.</p> <p>Eurocontrol added that flight plans from before 11.26am BST were 'lost' and asked airlines to refile them.</p> <p>How does Eurocontrol's Enhanced Tactical Flow Management System work? Eurocontrol's Enhanced Tactical Flow Management System compares demand for flights in a particular area with the available capacity.</p> <p>The system pulls together data such as flight plans, taxiing time, and flight position from numerous sources in multiple countries and collates them.</p> <p>It can then track planes in real time to manage the number of planes in the air to make sure it doesn't get too crowded.</p> <p>Precise monitoring prevents the carefully balanced system from being thrown out by planes with delayed departures or arrivals.</p> <p>Planes can then be herded into departure and landing slots at airports to keep the thousands of flights in</p>

Europe flowing smoothly.

ETFMS also helps plan flight schedules up to a week in advance to help airlines and air traffic controllers plan each day down to the minute.

The agency said it was a 'technical fault' and that the system had not been hacked, saying they were now 'in recovery mode'.

Some 59 per cent of departing flights at Gatwick were delayed between 3pm and 4pm, according to airline data company FlightStats.

Gatwick said it anticipated traffic would be back to normal later this evening.

A spokesperson for Gatwick said: 'Following a failure of Eurocontrol's Enhanced Tactical Flow Management System (ETFMS), and associated flight plan system, some flights in and out of London Gatwick are experiencing delays.'

'Passengers are advised to check with their airline for the latest information on flights and we apologise for any inconvenience that this may cause passengers.'

Several airports across the continent warned of problems, with Amsterdam's Schiphol saying that the 'system failure' at Eurocontrol could have 'possible consequences' for departures.

The breakdown comes a day after the Easter holidays when many travellers are on the move around Europe, and as commuters across France faced disruption from a massive rail strike in protest at President Emmanuel Macron's reforms.

The disruption comes as flights at the UK's two busiest airports could be hit with delays over the next three weeks as air traffic controllers introduce new technology.

Both Heathrow and Gatwick will suffer disruption as Nats (National Air Traffic Services) replaces paper flight information strips with a digital system at its control centre in Swanwick, Hampshire.

<b>HEADLINE</b>	<b>04/03 UN: world's worst humanitarian crisis</b>
<b>SOURCE</b>	<a href="https://www.cnn.com/2018/04/03/middleeast/yemen-worlds-worst-humanitarian-crisis-un-intl/index.html">https://www.cnn.com/2018/04/03/middleeast/yemen-worlds-worst-humanitarian-crisis-un-intl/index.html</a>
<b>GIST</b>	<p>(CNN)The war in Yemen is now the world's worst humanitarian crisis, with more than 22 million people - three-quarters of the population -- in desperate need of aid and protection, United Nations Secretary General Antonio Guterres said.</p> <p>As the conflict enters its fourth year, millions are without access to clean drinking water and the country is at high risk of a cholera epidemic, Guterres said at a donor conference in Geneva on Tuesday.</p> <p>He said over 8 million people in the country "did not know where they will obtain their next meal," and that "every ten minutes, a child under five dies of preventable causes."</p> <p>With many struggling to support their families, child marriage rates have also risen. "Nearly two-thirds of girls are married before the age of 18, and many before they are 15," said Guterres.</p> <p>More than half of the required funds needed for the UN's humanitarian response plan -- \$2.96 billion -- have not been met, Guterres told the conference.</p> <p>However he added that Saudi Arabia and the United Arab Emirates have already provided \$930 million</p>

for the UN's plan, and had pledged to secure an additional \$500 million for the region.

Since March 2015, neighboring Saudi Arabia has been leading a coalition of Gulf states against Houthi rebels in Northern Yemen, after the rebels drove out the US-backed and pro-Saudi government.

Often called the "forgotten war" amid Western media focus on Syria, Yemen's situation is now catastrophic, with "nearly half of all children aged between six months and 5 years old chronically malnourished," according to Guterres.

Both sides of the conflict have used food as a weapon of war, but the crisis is caused primarily by a brutal air, land and sea blockade imposed by a Saudi Arabia-led coalition.

In principle, the coalition says the purpose of the blockade is to stop Iranian weapons from entering Yemen to supply the Houthi rebels who are in control of much of the north, including the capital Sanaa. But in practice, it has also cut the amount of desperately needed food, medicine and fuel getting into the country, according to aid groups.

<b>HEADLINE</b>	<b>04/03 Florida cities sue state over gun laws</b>
<b>SOURCE</b>	<a href="https://www.cnn.com/2018/04/03/us/south-florida-cities-sue-state-over-gun-regulation/index.html">https://www.cnn.com/2018/04/03/us/south-florida-cities-sue-state-over-gun-regulation/index.html</a>
<b>GIST</b>	<p>(CNN)Ten South Florida cities have filed a lawsuit challenging a law that gives the state of Florida the authority to regulate firearms and imposes strict penalties on local officials who pass their own gun laws.</p> <p>In announcing the lawsuit Monday, the mayors of some of those cities said constituents demanded action after the February 14 massacre of 17 people at Marjory Stoneman Douglas High School in Parkland near Fort Lauderdale.</p> <p>"We get phone calls every day, 'What are you going to do?' " Miramar Mayor Wayne Messam said at a news conference.</p> <p>"This is about doing the right thing," Weston Mayor Daniel Stermer said. "If not now, when? If this tragedy wasn't enough in our own backyard, what has to happen to have something change?"</p> <p>The lawsuit was filed Monday in Leon County Circuit Court in Tallahassee, the state capital. Ten cities and 31 local officials joined the suit. The municipalities are Weston, Cutler Bay, Lauderhill, Miami Beach, Miami Gardens, Miramar, Pinecrest, Pompano Beach, South Miami and Coral Gables. Parkland is not a plaintiff.</p> <p>Gov. Rick Scott's office said Tuesday it was reviewing the lawsuit but had no further comment. State Attorney General Pam Bondi's office said it had not been served yet.</p> <p>The state law passed in 1987 says that "the Legislature hereby declares that it is occupying the whole field of regulation of firearms and ammunition ... to the exclusion of all existing and future county, city, town or municipal ordinances."</p> <p>Penalties were added in 2011. Municipal leaders who pass gun laws could be removed from office, fined up to \$5,000 and sued personally for damages, said Jamie Cole, city attorney for the city of Weston and the lead attorney for the cities in the lawsuit. If they were sued, the local officials could not use public funds in their legal defense, Cole said.</p> <p>"The Legislature's stated intent in imposing these penalties was to chill and deter local governments from taking any action at all that might affect firearms," the lawsuit says.</p> <p>The mayors said they want the power to regulate guns in public spaces in their cities. Messam noted that</p>

	<p>Miramar recently opened a 5,000-seat amphitheater but cannot prohibit people from bring guns inside.</p> <p>"In my own City Hall, somebody can walk in with a concealed weapon, and there's legally nothing I can do about it, nothing," Miami Beach Mayor Dan Gelber said.</p> <p>Coral Gables considered a firearms regulation in February but got an email from an unnamed "guns rights organization" that threatened legal action if the law passed, the lawsuit says. The city backed off, the suit says.</p> <p>Some groups in Florida like the gun law, saying it creates uniformity and eliminates confusion.</p> <p>"Counties with 25 cities, it would be impossible to enforce" different ordinances, Mike Adkinson, president of the Florida Sheriffs Association, said in February. "It would be confusing." He's also the sheriff of Walton County, Florida.</p>

<b>HEADLINE</b>	<b>04/03 Live Chat widgets leak employee info</b>
<b>SOURCE</b>	<a href="https://www.bleepingcomputer.com/news/security/live-chat-widgets-leak-employee-details-from-high-profile-companies/">https://www.bleepingcomputer.com/news/security/live-chat-widgets-leak-employee-details-from-high-profile-companies/</a>
<b>GIST</b>	<p>At least two live chat widgets used on hundreds of high-profile sites are leaking the personal details of company employees.</p> <p>The vulnerable widgets are used on sites managed by Google, Verizon, Spring, Bank of America, PayPal, Orange, Sony, Tesla, Bitdefender, Kaspersky Lab, Disney, and many others.</p> <p>The leak occurs when an attacker engages in a live chat session with a support staffer. According to Project Insecurity researchers Cody Zacharias and Kane Gamble, the widgets leak information on the support staffer, such as his real name, company email address, employee ID, support center name, location, supervisor name, supervisor ID, or software used by the employee.</p> <p>These details vary from company to company, depending on how each business has set up its support widgets, and for some, no information may leak.</p> <p>Bleeping Computer was able to confirm the leak on several sites, albeit not all we tested were exposing employee data. We will not name the sites where the live chat widgets leaked employee data, for security reasons.</p> <p>"The type of information being exposed is everything a person would need to successfully perform social engineering attacks against the company by using an employee's real information such as their full name, employee ID and supervisor's name to impersonate them," Zacharias and Gamble said.</p> <p>"This could lead to somebody gaining access to employee tools and even allow them to gain a foothold in the internal network," the researcher added.</p>

<b>HEADLINE</b>	<b>04/04 NCCIC growth helps tackle cyber issues</b>
<b>SOURCE</b>	<a href="https://www.hstoday.us/federal-pages/dhs/nccic-growth-helps-tackle-most-serious-and-enduring-strategic-risks-to-us/">https://www.hstoday.us/federal-pages/dhs/nccic-growth-helps-tackle-most-serious-and-enduring-strategic-risks-to-us/</a>
<b>GIST</b>	The National Cybersecurity and Communications Integration Center utilized "some innovative enhancements" to its information technology and operational technology assessment capabilities to expand

the size of its teams and breadth of services, the DHS agency said in a report reviewing fiscal year 2017.

Teams found the most frequently identified enterprise system vulnerabilities to be susceptibility to email phishing, poor password practices, poor patch management, and improper configuration. The most frequently identified control system vulnerabilities were boundary protection — pegged as “the single most prevalent area of concern, continuing a four-year trend” — along with identification and authentication of legitimate system users and allocation of resources.

The report outlined the NCCIC response to the WannaCry ransomware attack beginning in May 2017. “Due in part to the coordinated and sustained counteraction by NCCIC and its domestic and foreign partners, WannaCry had limited impact on U.S. CI,” the agency said, noting coordination with more than 40 IT and cybersecurity companies to convey what NCCIC knew.

“As part of its mission to protect federal departments and agencies, NCCIC also led Cybersecurity Coordination, Assessment, and Response (C-CAR) meetings to share actionable information about the threats. C-CARs are a critical complement to NCCIC’s technical alerts and follow a standard protocol,” the report continues. “This protocol enables DHS to convey information to CISOs and request action from federal departments and agencies to gain awareness of potentially affected systems across the Federal Government. Recognizing that not all users would be able to install patches immediately, NCCIC also shared additional mitigation guidance to assist government and private sector network defenders.”

In FY17, NCCIC led DHS planning and coordination for Cyber Guard, an annual two-week exercise headed by the Department of Defense U.S. Cyber Command and co-sponsored by DHS and the Federal Bureau of Investigation (FBI).

Cyber Guard 2017 included experts from over 100 organizations, including the Federal Government, state governments, industry, academia, and international allies.

“Misuse of, threats to, and malicious attacks on these systems pose some of the most serious and enduring strategic risks to the United States. The increasing frequency and scale of malicious cyber activity threatens us all,” said Assistant Secretary for Cybersecurity and Communications Jeanette Manfra. “As more devices connect to the Internet, the threat landscape broadens and compounds the challenge for security practitioners.”

Manfra added that in FY17 NCCIC “streamlined its product portfolio, further integrated core functions and capabilities, and improved services to customers in a number of important ways.”

“We continue to explore ways to enrich cyber threat indicator data and leverage analytics and automation to improve the information we deliver to customers. We are also helping customers improve readiness and technical expertise by enhancing our training and exercise capabilities,” she added. “These and other enhancements—together with the growing strength and breadth of our global partnerships—will help to ensure that the NCCIC continues to arm our customers with the critical information products, services, and capabilities they require.”

In FY18, NCCIC will lead all aspects of Cyber Storm, a national-level exercise occurring every two years that will focus on the Critical Manufacturing and Transportation Sectors with participation from the Information Technology and Communications Sectors; law enforcement, defense, and intelligence agencies; state and local governments; and international partners.

Goals for FY18 including building the NCCIC workforce, expanding exercises and training, supporting election infrastructure, realigning operations to better serve customers, expanding incident response capacity, and enriching data and automating cybersecurity.

<b>HEADLINE</b>	<b>04/04 Hackers targeted Singapore universities</b>
<b>SOURCE</b>	<a href="http://www.tnp.sg/news/singapore/iranian-hackers-targeted-singapore-universities">http://www.tnp.sg/news/singapore/iranian-hackers-targeted-singapore-universities</a>
<b>GIST</b>	<p>Four Singapore universities were attacked by an Iranian hacking syndicate that is believed to have pilfered more than 31 terabytes of academic data and intellectual property from varsities across the world.</p> <p>There was a breach of 52 staff accounts across Nanyang Technological University (NTU), National University of Singapore (NUS), Singapore Management University and Singapore University of Technology and Design, said the Cyber Security Agency (CSA) of Singapore and Ministry of Education (MOE) yesterday.</p> <p>The nine Iranians allegedly responsible have been charged in the US for attempting to hack into 144 US and 176 foreign universities across 21 countries - including those in Singapore - at the behest of the Iranian government, the US Department of Justice said in a March 23 statement.</p> <p>The CSA said it received information on the breach in the user accounts of the local universities last week and alerted the MOE and the institutions.</p> <p>"The universities have stepped up their vigilance and users have been advised to change their passwords immediately," the agencies told The Straits Times.</p> <p>The CSA also said the incident did not appear to be linked to last year's cyber attacks on the NUS and NTU networks, and "at this time" there was no evidence that sensitive information had been breached.</p> <p>Among the accounts affected were those of faculty members. The four universities said measures such as resetting of passwords and scanning of affected computers were carried out following the alert.</p> <p>Internal investigations are also ongoing as the institutes continue to work with the authorities on the matter.</p> <p>Charges against the Iranians, which were made public on March 23, include several counts of identity theft, fraud and conspiracy to commit computer intrusions.</p> <p>The group is also accused of being linked to the Mabna Institute, an Iran-based company that has conducted a coordinated campaign of cyber intrusions into computer systems since 2013, the US Department of Justice said in a statement.</p> <p>Data from all fields of research and academic disciplines, such as science and technology, engineering, medical and social sciences, were targeted in what US court papers termed the "University Hacking Campaign".</p> <p>The campaign, which took place from 2013 to 2017, targeted over 100,000 accounts of professors worldwide. About half of those targeted were at US-based universities.</p> <p>About 8,000 professor accounts worldwide were compromised, of which 3,768 belonged to academics in US-based universities, said the court papers.</p> <p>The data and compromised account details were then allegedly used to benefit the Iranian government, specifically the Islamic Revolutionary Guard Corps, and other Iranian customers, including Iran-based universities, the US Justice Department said.</p>

<b>HEADLINE</b>	<b>04/04 Israel websites targeted in cyberattack</b>
<b>SOURCE</b>	<a href="http://www.jpost.com/Arab-Israeli-Conflict/Major-Israeli-websites-targeted-in-large-anti-Israel-cyberattack-547834">http://www.jpost.com/Arab-Israeli-Conflict/Major-Israeli-websites-targeted-in-large-anti-Israel-cyberattack-547834</a>

<b>GIST</b>	<p>More than a dozen major Israeli websites were the target of an anti-Israel cyberattack on Tuesday evening, seemingly in response to clashes between the IDF and Gazan protesters last weekend.</p> <p>Websites belonging to Israeli hospitals, local authorities, Israel Opera, Israel Teachers' Union and the Israeli Defense Forces Widow &amp; Orphans organization were among those targeted by a hacker known as DarkCoder or Th3Falcon.</p> <p>Affected websites temporarily displayed a full-screen image from clashes on the Gaza border on Friday, accompanied by Arabic music and the messages "Jerusalem is the capital of Palestine" and "Al Aqsa is a red line." Most of the websites were taken offline shortly after the attack.</p> <p>The hacker wrote on Twitter that the attack was part of a coordinated effort by anti-Israel groups to sabotage Israeli websites known as OpIsrael, which forms part of a wider collective of hackers called Anonymous.</p> <p>Initiated in April 2013, OpIsrael is an annual effort to hack key Israeli websites and leak information in protest at alleged Israeli treatment of Palestinians, intended to correspond with Israel's Holocaust Remembrance Day. Major hacking attempts are often met by pro-Israel hackers targeting Arab government websites.</p> <p>Previous targets of cyberattacks include Israel's Holocaust remembrance center Yad Vashem and the Ministry of Education.</p> <p>The perpetrator of Tuesday's hacking act attacked social media users who sought to report his Twitter account, writing, "Message to some Zionists: you can't stop me by reporting my account even if my twitter got blocked this won't stop me. "Stand up for what you believe in even if it means standing alone". "</p> <p>In July 2017, the same hacker attacked Israel's left-wing Meretz party's website amid rising tensions over the installment of metal detectors at Jerusalem's Temple Mount following a deadly terror attack at the religious site.</p> <p>"Alquds (Jerusalem) is ours. It will never be yours," said the hacker's message on the party's website.</p>

<b>HEADLINE</b>	<b>04/03 Facebook to remove Russia-linked pages</b>
<b>SOURCE</b>	<a href="https://www.washingtontimes.com/news/2018/apr/3/facebook-to-remove-over-270-russia-linked-pages-ac/">https://www.washingtontimes.com/news/2018/apr/3/facebook-to-remove-over-270-russia-linked-pages-ac/</a>
<b>GIST</b>	<p>Mark Zuckerberg on Tuesday announced that Facebook will remove “more than 270 pages and accounts” operated by a Russian organization called the Internet Research Agency.</p> <p>In a blog post the firm’s embattled CEO said, “Most of our actions against the IRA to date have been to prevent them from interfering in foreign elections. This update is about taking down their pages targeting people living in Russia. This Russian agency has repeatedly acted deceptively and tried to manipulate people in the US, Europe, and Russia — and we don’t want them on Facebook anywhere in the world.”</p> <p>Earlier this year, as part of special counsel Robert Mueller’s investigation into Russian meddling in the 2016 U.S. presidential election, a federal grand jury indicted 13 Russian nationals and three Russian entities — including the IRA — of operating Eastern European and Russian troll farms and waging “information warfare” against the U.S.</p> <p>Since the 2016 poll, which featured waves of Russian propaganda flooding America’s unregulated social media platforms, including Twitter and Google, Facebook has come under increasing pressure too better regulate its online ads and newsfeeds to prevent the spread of misinformation.</p>

	<p>Initially, Mr. Zuckerberg dismissed the notion that his social media platform had been manipulated by foreign agents to influence the 2016 vote.</p> <p>But last month another controversy engulfed the firm after news broke about its ties to Cambridge Analytica — a data analysis firm hired by the 2016 Trump campaign and accused of exploiting the personal information of millions of Facebook users without their permission.</p> <p>Since that scandal broke, Facebook’s stock has dropped almost 20 percent and lost the company roughly \$80 billion in market value.</p> <p>Mr. Zuckerberg is scheduled to appear before Capitol Hill lawmakers next week to defend Facebook and has recently been on a major damage control publicity blitz.</p> <p>Earlier this year he admitted social media is awash in “sensationalism, misinformation and polarization.”</p> <p>On Tuesday, Facebook COO Sheryl Sandberg added that the firm’s efforts to address the IRA would continue. Last year the firm shuttered 470 fake accounts it suspected of being connected to the shadowy outfit.</p> <p>“The IRA has a history of targeting people with deceptive content and it has no place on Facebook anywhere in the world,” Ms. Sandberg said on Tuesday in a blog post.</p>

<b>HEADLINE</b>	<b>04/03 Grindr shares users’ HIV status</b>
<b>SOURCE</b>	<a href="https://www.hackread.com/gay-dating-app-grindr-user-hiv-location-data/">https://www.hackread.com/gay-dating-app-grindr-user-hiv-location-data/</a>
<b>GIST</b>	<p>Grindr shared personal, HIV and geolocation-related data with two of its third-party contractors without informing users.</p> <p>As a way to make relationships safer, the gay flirting application Grindr allows users to share information about whether or not they are infected with HIV and the date of the last test. This data is extremely sensitive and private and serves to only inform future potential partners, but it turned out that Grindr was sharing this with two third-party contractors to optimize its algorithm.</p> <p>This was revealed by a security researcher Antoine Pultier who works for a Norway based NGO Sintef. In a conversation with BuzzFeed, Pultier said that Grindr saved the data of over 3.6 million daily users and passed it on to Localytics and Apptimize, two of its third-party contractors.</p> <p>According to Pultier, the shared data contained users’ HIV information, phone numbers, email addresses and geolocation making it not only easier for them to identify but locate them in real time. What’s worse is that some of the data was not even encrypted.</p> <p>In response to the allegations, chief technology officer at Grindr Scott Chen justified the practice of sharing data and wrote a blog post stating that data sharing with Localytics and Apptimize follows industry standards to “test and validate” app. He also claimed that the data was never sold to anyone.</p> <p>The company also vows not to share HIV data with anyone outside the company. In a conversation with CNNMoney, the company said that “it has already deleted HIV data from Apptimize, and is in the process of removing it from Localytics.”</p>

<b>HEADLINE</b>	<b>04/03 Fake WhatsApp riskware in copycatting</b>
<b>SOURCE</b>	<a href="https://www.infosecurity-magazine.com/news/fake-whatsapp-riskware-copycatting/">https://www.infosecurity-magazine.com/news/fake-whatsapp-riskware-copycatting/</a>

GIST	<p>An Android app dubbed WhatsApp Plus has been unmasked as a variant of Android/PUP.Riskware.Wtaspin.GB, which steals information, photos, phone numbers and so on from a mobile phone.</p> <p>Fake WhatsApp riskware, usually found in third-party app stores, dates back to mid-2017. However, the newest version is notable in that its pathology indicates a copycat phenomenon occurring among malware developers.</p> <p>The malware, once installed, tells users that their app is out of date and offers a download link. Once clicked, users are taken to a webpage written entirely in Arabic. The page calls the app “Watts Plus Plus WhatsApp” and purports to be developed by someone named Abu.</p> <p>Looking into the code, researcher Nathan Collier at Malwarebytes found that while it has abilities to hide itself in various ways – “very spy-like behavior,” he said – it’s the same incriminating Android/PUP.Riskware.Wtaspin.GB code found within the receivers, services and activities of existing fake WhatsApp APKs.</p> <p>“The only difference of the aforementioned version from above is the code points to the Arabic webpage to update,” Collier explained. “After analyzing several different versions of PUP.Riskware.Wtaspin.GB, it appears all have different URLs from which to update. Thus, everyone is just copycatting the original source code and adding their own update website.”</p> <p>The original author of the riskware is unlikely to be the Arabic developer, Abu, he added.</p> <p>“The code of this riskware is complex,” Collier said. “The webpage of the developer claiming to be owner – not so complex. Although I won’t completely rule out the possibility, let’s just say I am skeptical.”</p>

HEADLINE	<b>04/03 Poll: critical infrastructure unprepared</b>
SOURCE	<a href="https://www.infosecurity-magazine.com/news/majority-of-critical/">https://www.infosecurity-magazine.com/news/majority-of-critical/</a>
GIST	<p>Nearly 60% of executives at critical infrastructure operators polled in a recent survey said they lack appropriate controls to protect their environments from security threats.</p> <p>While organizations have made significant investments to secure their IT infrastructures, they have not fully addressed threats to operational technology (OT) environments: 57 out of 100 executives from various critical infrastructure organizations surveyed by Indegy said they are not confident that their enterprise nor other infrastructure companies are in control of OT security.</p> <p>The poll also underscores the lack of preparedness in key sectors, including energy, utilities and manufacturing. For instance, 35% of respondents said they have little visibility into the current state of security within their environment, while 23% reported they have no visibility. Meanwhile, 63% said that insider threats and misconfigurations are the biggest security risks they currently face.</p> <p>“We have been tracking the escalation in cyber-threat activity specifically targeting critical infrastructures for some time,” says Barak Perelman, CEO of Indegy. “As the recent joint DHS/FBI CERT Technical Alert illustrates, adversaries have compromised facilities across the US to conduct reconnaissance and likely develop ‘red button’ capability for future attacks.”</p> <p>The two agencies issued a joint alert saying that Russian government cyber-actors are actively targeting organizations in the US energy, nuclear, commercial facilities, water, aviation, government and critical manufacturing sectors. They characterized the activity as a “multi-stage intrusion campaign,” where the hackers first targeted peripheral organizations such as trusted third-party suppliers with less-secure networks and through them gain remote access into energy-sector networks.</p>

	The good news is that in tandem with this, 44% of all respondents indicated that their organizations plan to increase spending for industrial control system (ICS) security measures in the next 12–24 months. About a third (29%) reported that they were not sure.

<b>HEADLINE</b>	<b>04/04 Gas pipeline firms affected by cyberattack</b>
<b>SOURCE</b>	<a href="https://www.securityweek.com/several-us-gas-pipeline-firms-affected-cyberattack">https://www.securityweek.com/several-us-gas-pipeline-firms-affected-cyberattack</a>
<b>GIST</b>	<p>Several natural gas pipeline operators in the United States have been affected by a cyberattack that hit a third-party communications system, but the incident does not appear to have impacted operational technology.</p> <p>Energy Transfer Partners was the first pipeline company to report problems with its Electronic Data Interchange (EDI) system due to a cyberattack that targeted Energy Services Group, specifically the company’s Latitude Technologies unit.</p> <p>EDI is a platform used by businesses to exchange documents such as purchase orders and invoices. In the case of energy firms, the system is used to encrypt, decrypt, translate, and track key energy transactions. Latitude says it provides EDI and other technology services to more than 100 natural gas pipelines, storage facilities, utilities, law firms, and energy marketers across the U.S. US gas pipeline companies hit by cyberattack</p> <p>Bloomberg reported that the incident also affected Boardwalk Pipeline Partners, Chesapeake Utilities Corp.’s Eastern Shore Natural Gas, and ONEOK, Inc. However, ONEOK clarified that its decision to disable the third-party EDI service was a “purely precautionary step.”</p> <p>“There were no operational interruptions on ONEOK's natural gas pipelines,” the company stated. “Affected customers have been advised to use one of the alternative methods of communications available to them for gas scheduling purposes.”</p> <p>Few details are known about the cyberattack, but Latitude did tell Bloomberg that it did not believe any customer data had been compromised and no other systems appeared to have been impacted. A status update provided by Latitude on its website on Tuesday informed customers that the initial restoration of EDI services had been completed and the company had been working on increasing performance.</p> <p>SecurityWeek has reached out to Latitude Technologies and Energy Services Group for more information about the attack and will update this article if they respond.</p> <p>“This looks like a financially-motivated cyberattack, likely by cybercriminals, but we've seen in the past that cybercriminals often collaborate with nation-states and share hacking tools with each other,” said Phil Neray, VP of Industrial Cybersecurity at CyberX, a critical infrastructure and industrial cybersecurity firm based in Boston. “It's easy to imagine a ransomware attack that uses nation-state tools to hijack ICS/SCADA systems and hold the pipeline hostage for millions of dollars per day.”</p> <p>Bryan Singer, director of Security Services at IOActive, has described some worst-case scenarios that could result from attacks targeting pipeline operators.</p> <p>“A lot of pipelines have 24-48 hour capacity within the pipelines. If hackers find a way to poison the product, you could have downstream impact for months or more. You could have gas compressors or lift stations where there’s a fire or explosion, and where you have to scramble to cap the ends before the fire spreads out. If it’s an oil rig, it could certainly be tougher to contain,” Singer told SecurityWeek.</p> <p>“Hackers can cause some intermediate problems at first, but if they have access long enough, there’s a possibility that airports could go down (they often rely on fuel delivered directly) and gas stations could run out of gas. If they’re able to maintain an attack for a couple days, there can be very large downstream</p>

	<p>impact. We're mostly out of winter, but if we don't have power, we're in need of that heat," he added.</p> <p>Back in 2012, the Department of Homeland Security (DHS) warned that malicious actors had been targeting the natural gas industry. While critical infrastructure operators in general have since become more aware of the risks posed by cyberattacks, many organizations are still unprepared.</p> <p>In the case of the oil and gas industry in the United States, a study commissioned last year by German engineering giant Siemens showed that this sector is largely unprepared to address cybersecurity risks in operational technology (OT) environments.</p>

<b>HEADLINE</b>	<b>04/03 CareFirst exposed in phishing attack</b>
<b>SOURCE</b>	<a href="https://www.scmagazine.com/information-on-6800-carefirst-members-exposed-in-phishing-attack/article/755772/">https://www.scmagazine.com/information-on-6800-carefirst-members-exposed-in-phishing-attack/article/755772/</a>
<b>GIST</b>	<p>CareFirst BlueCross BlueShield said one of its employees recently fell victim to a phishing attack that led to thousands of its members' personal information being exposed.</p> <p><b>How many victims?</b> CareFirst believes about 6,800 of its members may have been involved.</p> <p><b>What type of information?</b> Member names, identification numbers, dates of birth, and in limited cases (eight individuals) Social Security numbers. No medical or financial information was compromised.</p> <p><b>What happened?</b> CareFirst determined on March 12 that a staffer fell victim to a phishing scam that led to the compromise of the employee's email account. This account was then used to send emails to individuals not associated with CareFirst. Since the criminals had access to the email account, they could have gained access to member data, the company said.</p> <p><b>What was the response?</b> The phishing email has been analyzed by CareFirst's and a third-party's security teams. CareFirst claims there is no evidence that the email contained malware and that no other suspicious activity was detected on the company's systems. There was also no sign that any data had been removed or accessed, but as an extra precautionary measure CareFirst will offer two years of free credit monitoring and identity theft protection to those affected. Potentially affected members will be contacted directly by CareFirst with information about enrolling in the protections being offered.</p>

<b>HEADLINE</b>	<b>04/03 Evolving exploit builder kit: ThreatKit</b>
<b>SOURCE</b>	<a href="https://www.scmagazine.com/evolving-exploit-builder-kit-threadkit-used-for-rat-and-banking-trojan-campaigns/article/755975/">https://www.scmagazine.com/evolving-exploit-builder-kit-threadkit-used-for-rat-and-banking-trojan-campaigns/article/755975/</a>
<b>GIST</b>	<p>Researchers from Proofpoint last week revealed a new exploit builder kit that has been used by the sophisticated Cobalt Gang cybercriminal group, as well as other attackers who have used it to spread malware including banking trojans and remote access trojans.</p> <p>Dubbed ThreadKit, the kit has evolved several times since its activity was first identified in June 2017, according to a Proofpoint blog post detailing the various changes. The most recent iteration, seen in the wild in February and March 2018, includes exploits for the use-after-free Adobe Flash Player bug CVE-2018-4878 and the Microsoft Office remote code execution flaws CVE-2018-0802 and CVE-2017-8570. Proofpoint reports recently observing a "large spike" in email campaigns featuring ThreadKit-generated Office attachments exploiting these two added Microsoft bugs, as well as a third, CVE-2017-11882, a memory corruption vulnerability that was added last November.</p> <p>According to Proofpoint, ThreadKit bears similarities to the Microsoft Word Intruder (WMI) kit, yet is its own distinct entity. The kit offers users the ability to track infection statistics and is associated with the</p>

	<p>banking malwares Trickbot and Chthonic and the RATs FormBook and Loki Bot.</p> <p>Initial clues to Threadkit's existence emerged last summer when Proofpoint researchers saw a forum advertising the toolset. At the time, the kit exploited the Windows arbitrary code execution vulnerability CVE-2017-0199 in order to download and execute an HTA file. This file introduced a decoy doc and malicious VBScript that would extract and run the embedded downloader Smoke Loader, which subsequently produced Trickbot.</p> <p>Then in October, a new build of the kit added an exploit for the Microsoft .NET Framework RCE bug CVE-2017-8759. One month later, CVE-2017-11882 was added.</p> <p>"Document exploit builder kits like ThreadKit enable even low-skilled threat actors to take advantage of the latest vulnerabilities to distribute malware," state blog post authors and Proofpoint researchers "Axel F" and Matthew Mesa. "Organizations and individuals can mitigate the risk from ThreadKit and other document exploit-based attacks by ensuring that clients are patched for the latest vulnerabilities in Microsoft office and other applications.</p>

<b>HEADLINE</b>	<b>04/04 Magento sites hacked: malicious scripts</b>
<b>SOURCE</b>	<a href="https://www.bleepingcomputer.com/news/security/over-1-000-magento-stores-hacked-to-steal-card-data-run-cryptojacking-scripts/">https://www.bleepingcomputer.com/news/security/over-1-000-magento-stores-hacked-to-steal-card-data-run-cryptojacking-scripts/</a>
<b>GIST</b>	<p>Security researchers say they've identified at last 1,000 Magento sites that have been hacked by cybercriminals and infected with malicious scripts that steal payment card details or are used as staging points in the delivery of other malware.</p> <p>"The Magento sites are being compromised through brute-force attacks using common and known default Magento credentials," Flashpoint researchers say.</p> <p>"Brute-force attacks such as these are simplified when admins fail to change the credentials upon installation of the platform," researchers add. "Attackers, meanwhile, can build simple automated scripts loaded with known credentials to facilitate access of the panels."</p> <p>Once attackers gain access to these sites, researchers say they've observed three main patterns of malicious activities.</p> <p>The most common practice is to insert malicious code in Magento core files, code that logs payment card information entered inside the checkout process. Such malware is named a card scraper, and users should expect to find one on any e-commerce store that looks to have missed a few updates.</p> <p>Second, attackers also deploy cryptojacking scripts that mine Monero on the computers of store visitors, a practice that has become quite common these days, across all sites, not just Magento stores.</p> <p>Last but not least, hackers also use these compromised Magento stores to redirect some of the infected sites' visitors to malicious sites that attempt to trick users into downloading and installing malware on their computers. According to cases investigated by Flashpoint researchers, the most prevalent tactic was to redirect users to sites offering phony Adobe Flash Player update packages, which would infect users with the AZORult infostealers.</p> <p>According to researchers, the vast majority of these 1,000+ compromised sites were in the education and healthcare sectors, with the vast majority of compromised sites hosted on servers located in UE and the US.</p> <p>Security experts believe that the sites they discovered are only a small sample of all the compromised Magento stores.</p>

	Flashpoint says that besides Magento, threat intelligence gathered from entry-level and top-tier Deep & Dark Web forums suggests that cybercriminals are also very interested in other e-commerce platforms, not just Magento, such as OpenCart and Powerfront CMS.

<b>HEADLINE</b>	<b>04/03 New Monero-mining Android malware</b>
<b>SOURCE</b>	<a href="https://www.securityweek.com/new-monero-mining-android-malware-discovered">https://www.securityweek.com/new-monero-mining-android-malware-discovered</a>
<b>GIST</b>	<p>A newly discovered malware family attempts to leverage the (limited) computing power of Android devices to mine for Monero crypto-currency, Trend Micro warns.</p> <p>Dubbed HiddenMiner, the malware was developed with self-protection and persistence mechanisms that allow it to hide itself from the unwitting user and to abuse the Device Administrator feature to perform its nefarious activities.</p> <p>The main issue with this threat, however, is the fact that it has no switch, controller, or optimizer in its code, meaning that it essentially continuously mines for Monero until all of the device's resources are depleted. Because of that, the malware can cause the infected devices to overheat and potentially fail, Trend Micro's researchers point out.</p> <p>HiddenMiner is used in an active campaign that has resulted in its operators already making several thousands of dollars as of last week (based on the known Monero mining pools and wallets connected to the malware).</p> <p>HiddenMiner, Trend Micro says, is somehow similar to the Loapi Monero-mining Android malware, which has been previously observed causing a device's battery to bloat. Furthermore, both Loapi and HiddenMiner use a similar technique to lock the device screen after revoking device administration permissions.</p> <p>The new threat spreads via third-party application marketplaces and has been observed impacting only users in India and China so far. However, the security researchers say it might spread beyond these two countries as well.</p>
<a href="#">Return to Top</a>	

<b>HEADLINE</b>	<b>04/03 New malware records calls, steals data</b>
<b>SOURCE</b>	<a href="https://thehackernews.com/2018/04/android-spying-trojan.html">https://thehackernews.com/2018/04/android-spying-trojan.html</a>
<b>GIST</b>	<p>Security researchers at Cisco Talos have uncovered variants of a new Android Trojan that are being distributed in the wild disguising as a fake anti-virus application, dubbed "Naver Defender."</p> <p>Dubbed KevDroid, the malware is a remote administration tool (RAT) designed to steal sensitive information from compromised Android devices, as well as capable of recording phone calls.</p> <p>Talos researchers published Monday technical details about two recent variants of KevDroid detected in the wild, following the initial discovery of the Trojan by South Korean cybersecurity firm ESTsecurity two weeks ago.</p> <p>Though researchers haven't attributed the malware to any hacking or state-sponsored group, South Korean media have linked KevDroid with North Korea state-sponsored cyber espionage hacking group "Group 123," primarily known for targeting South Korean targets.</p> <p>The most recent variant of KevDroid malware, detected in March this year, has the following capabilities:</p> <ul style="list-style-type: none"> <li>•record phone calls &amp; audio</li> </ul>

	<ul style="list-style-type: none"> <li>•steal web history and files</li> <li>•gain root access</li> <li>•steal call logs, SMS, emails</li> <li>•collect device' location at every 10 seconds</li> <li>•collect a list of installed applications</li> </ul> <p>Malware uses an open source library, available on GitHub, to gain the ability to record incoming and outgoing calls from the compromised Android device.</p>
<a href="#">Return to Top</a>	

<b>HEADLINE</b>	<b>04/03 Michigan: ransomware possession illegal</b>
<b>SOURCE</b>	<a href="https://www.bleepingcomputer.com/news/security/new-michigan-law-makes-possession-of-ransomware-illegal/">https://www.bleepingcomputer.com/news/security/new-michigan-law-makes-possession-of-ransomware-illegal/</a>
<b>GIST</b>	<p>On Monday, Michigan Governor Rick Snyder signed two bills into law that criminalize the possession of ransomware "with the intent to introduce it into a computer or computer network without authorization" and punish offenders with a three-year prison sentence, respectively.</p> <p>Legislators initially sought a ten years prison sentence, but this was knocked down to three years in subsequent deliberations.</p> <p>According to the new bill, if a suspected cybercriminal is arrested and ransomware is found on his computer, the suspect would end up in prison, even if he didn't get to infect any victims. This, in theory, should make it easier for state authorities to go after suspected ransomware developers, affiliates, and others involved in Ransomware-as-a-Service operations.</p> <p>Just like most crimes, investigators must prove "intent to use" before charging someone with ransomware possession, which is now a felony.</p> <p>Michigan legislators weren't absurd —unlike their Georgia fellows— and left room for security experts to possess ransomware for research purposes.</p> <p>According to FBI statistics, there were over 1,300 ransomware incidents reported in the state of Michigan last year, with damages estimated at around \$2.6 million.</p> <p>"Cybercrime and tough measures to combat it is a rapidly evolving effort, and it's integral our law enforcement agencies have the tools to identify, prevent and penalize it," Gov. Snyder said on Monday.</p> <p>Both bills passed with the same vote tallies, 103 to 3 in the House, and 34 to 0 in the Michigan Senate.</p>
<a href="#">Return to Top</a>	

<b>HEADLINE</b>	<b>04/03 Hackers targeted 911 call centers</b>
<b>SOURCE</b>	<a href="https://www.nbcnews.com/news/us-news/hackers-have-taken-down-dozens-911-centers-why-it-so-n862206">https://www.nbcnews.com/news/us-news/hackers-have-taken-down-dozens-911-centers-why-it-so-n862206</a>
<b>GIST</b>	<p>When news broke last week of a hacking attack on Baltimore's 911 system, Chad Howard felt a rush of nightmarish memories.</p> <p>Howard, the information technology manager for Henry County, Tennessee, faced a similar intrusion in June 2016, in one of the country's first so-called ransomware attacks on a 911 call center. The hackers shut down the center's computerized dispatch system and demanded more than \$2,000 in bitcoin to turn it back on. Refusing payment, Howard's staff tracked emergency calls with pencil and paper for three days as the system was rebuilt.</p> <p>"It basically brought us to our knees," Howard recalled.</p>

Nearly two years later, the March 25 ransomware attack on Baltimore served as another reminder that America's emergency-response networks remain dangerously vulnerable to criminals bent on crippling the country's critical infrastructure — either for money, or something more nefarious.

There have been 184 cyberattacks on public safety agencies and local governments in the past 24 months, according to a compilation of publicly reported incidents by the cybersecurity firm SecuLore Solutions. That includes Atlanta, which fell victim to a ransomware attack a couple days before the one on Baltimore, scrambling the operations of many agencies, but not the 911 system.

911 centers have been directly or indirectly attacked in 42 of the 184 cases on SecuLore's list, the company says. Two dozen involved ransomware attacks, in which hackers use a virus to remotely seize control of a computer system and hold it hostage for payment.

Most of the other attacks involve "denial of service," in which centers are immobilized by a flood of automated bogus calls. One of the first occurred in October 2016, when Meetkumar Desai, then 18, of Arizona, distributed a computer bug on Twitter that overwhelmed 911 centers in 12 states. The motivations for such attacks are often less about the money than doing damage — sometimes as a form of protest, as when the "hactivist" group Anonymous took down Baltimore's city website after the death of Freddie Gray while in police custody, experts say. Desai reportedly told authorities he meant his attack more as a prank.

"911 is the perfect [target] because it can't afford to be down," said Tim Lorello, SecuLore's president and CEO.

This is how 911 works: When someone dials for help — typically from a mobile phone — the call gets routed from a cell tower to a 911 center, where a "telecommunicator" answers the phone and gathers basic information. The telecommunicator enters that information into a computer-aided dispatch system, where a dispatcher picks it up and coordinates a response from firefighters, police officers or ambulances.

This 911 system relies on redundancy, meaning that call centers that are taken out of service by a hacking attack can work around the disruption by shutting down the computer-aided dispatch system and sharing information person-to-person, or by sending calls to a nearby center. But depending on the type of attack and a 911 center's resources, those disruptions can make it more difficult for people to reach someone in case of an emergency. A July 2017 investigation by Scripps News on the vulnerabilities of 911 systems noted the case of a 6-month-old Dallas boy who died after his babysitter's 911 calls were delayed during an apparent denial-of-service attack.

J.J. Guy, chief technology officer at the cybersecurity firm Jask, said that the spread of ransomware attacks on public safety agencies and other key government operations shows the potential for cyberterrorists to target the country's critical infrastructure.

Last month, the Department of Homeland Security outlined in a report how Russian hackers have gained access to American power plants. The hackers did not cause service interruptions, but the fact that they could gain access at all is troubling to security experts.

"To date, if you don't have credit cards or lots of personal information, attackers had little motivation and thus you were mostly safe," Guy said in an email. "This will change those dynamics. Manufacturing, logistics, etc — any field with an operations mindset that loses money when 'the line is down' will be targeted."

The attack on Baltimore was discovered March 25, after a morning breach of its computer-aided dispatch system, officials said. The city's cybersecurity unit took the system down, forcing support staff to pass 911 calls to dispatchers using paper rather than electronically. Call-center operations returned to normal early the next day, officials said. Investigators later determined that the intrusion was an attempted ransomware attack, but "no ransom was demanded or paid," a city spokesman James Bentley said. He declined to

explain further, saying that “could compromise the investigation.”

Most ransomware cases end similarly, with governments refusing to pay hackers, choosing instead to switch to a more primitive version of 911 services while they rebuild their systems. Governments have caved at times, however, although officials decline to say much about those incidents, out of concern that it will encourage more attacks.

Another problem with the current 911 system is that it doesn’t accommodate the ways people communicate in the modern world — through texts, photos, videos, etc. That is why the 911 industry is pushing telecommunication companies and state and local governments to adopt what it calls Next Generation 911, which allows callers to send data through approved telecommunications carriers and internet service providers (while still taking calls from landlines).

Adoption of Next Generation 911 has been slow and costly, said Brian Fontes, CEO of the National Emergency Number Association, or NENA. A tiny fraction of America is on Next Generation 911; the short list includes Maine and Vermont, with Indiana, Washington state’s King County and part of Texas getting close, Fontes said.

The Next Generation 911 systems will have advanced security baked into their foundations, including the ability to instantly identify suspicious activity, immediately shut down in response to intrusions, and simultaneously move incoming calls to other centers in a way that is undetectable to someone dialing for help, officials say.

But the increased connectivity also opens the modern systems to new potential modes of attack, experts say. No matter how sophisticated a defense, all it takes is one overlooked vulnerability to let hackers in, experts say.

That makes it essential to develop sophisticated defense systems run by in-house cybersecurity teams, they say.

In Baltimore’s case, the ransomware attack was discovered and repelled by Baltimore City Information Technology, which maintains defenses across the local government. It determined that the hackers had found access after a technician troubleshooting the computer-aided dispatch system made a change to a firewall and mistakenly left an opening, the city’s chief information officer, Frank Johnson, said in a statement. The FBI is now helping the city investigate.

Howard, in Tennessee, knows how his attacker obtained access to the 911 center — by finding a weak password left by a deceased former system administrator. The FBI told him it looked as if the attack came from Russia. But he still isn’t sure.

Howard cleaned and rebuilt his system, but struggles to maintain patches for his outdated CAD system. “It’s been a nightmare,” he said.

No one has been caught or prosecuted in the Tennessee or Baltimore attack.

<b>HEADLINE</b>	<b>04/03 YouTube shooting fake news rampant</b>
<b>SOURCE</b>	<a href="https://www.cbsnews.com/news/youtube-shooting-fake-news-hoaxes-social-media/">https://www.cbsnews.com/news/youtube-shooting-fake-news-hoaxes-social-media/</a>
<b>GIST</b>	Even before police secured YouTube's headquarters after a shooting there Tuesday, social media was flooded with a familiar scourge: Fake news. Police say three victims in the shooting in San Bruno, California, were transported for emergency treatment and the suspected female shooter was found dead from what they believe was a self-inflicted gunshot wound. The headquarters has been evacuated and law enforcement officers are continuing to investigate.

But on Twitter, various accounts claimed to know much more about the incident and its perpetrator than law enforcement. Many were passed over, but some still managed to attract dozens of interactions.

Twitter responded Tuesday saying it was "tracking" the accounts and "taking action on anything that violates our rules"...

That didn't stop someone who rebooted a common hoax that actor Sam Hyde was the shooter, a frequent accusation following shootings. The post included a photo of Hyde carrying an assault weapon.

Some of those tweets have since been removed. Another bogus claim was that YouTuber Matt Jarbo is behind the shooting...

False flag conspirators reemerged in their corner of Twitter to make their familiar claims about crisis actors participating in the shooting.

YouTube itself, which has been subject to widespread criticism for surfacing conspiratorial videos in the wake of tragedies, was promoting verified media sources through the early waves of reports.

On Reddit, subreddits known for incubating conspiracies that spread to other networks linked the shooting as a "false flag" to be "anti-gun" or positing that the suspect was wearing a hijab and resembled prominent Women's March co-chair Linda Sarsour.

On Gab, a social network that has become a haven for extremist and conspiratorial threads, speculation familiar to anyone following the rise of fake news emerged: That a description of the suspect that was deleted appeared to be the same as early descriptions of Parkland shooting suspect Nikolas Cruz.

CNET's Facebook account was subjected to comments promoting fake news before they were removed, echoing a refrain that Parkland shooting survivor and activist David Hogg was in some way involved.

Every major social network has its own challenges with disinformation. They've enacted series of algorithmic and structural changes in order to combat its spread. Just as Tuesday's shooting raged, Facebook said it was scrubbing more than 270 pages linked to a Russian troll farm.

<b>HEADLINE</b>	<b>04/03 Shooting captured on Facebook Live</b>
<b>SOURCE</b>	<a href="http://abcnews.go.com/US/facebook-live-captures-man-shot-woman-playing-gun/story?id=54207093">http://abcnews.go.com/US/facebook-live-captures-man-shot-woman-playing-gun/story?id=54207093</a>
<b>GIST</b>	<p>A shooting captured on Facebook Live has left a man in critical condition.</p> <p>Police in Houston, Texas, are investigating an apparently accidental shooting that occurred when three people sitting in a car were "playing with two pistols," early Sunday, according to a press release. A woman in the vehicle accidentally discharged one weapon, striking the victim in the head, the release said.</p> <p>ABC station KTRK said the victim can be heard saying, "You're making me nervous," in the Facebook Live video.</p> <p>Video shows the woman hold a gun up to the camera, load the weapon and point it toward the victim. The gun discharges and the man goes still.</p> <p>The woman in the incident has been identified by Houston police as Cassandra Damper, 25.</p> <p>Officers responding to the shooting detained Damper, who allegedly tried to destroy evidence, police said.</p> <p>"While detained, Damper attempted to destroy the evidence by wiping off any gunshot residue that may have been present," Houston police said in the release.</p>

	<p>Damper has been charged with tampering/fabricating of evidence, according to the release.</p> <p>A grand jury will investigate any further charges related to the shooting, the release said.</p> <p>Another person was questioned at the scene, the release said.</p>

<b>HEADLINE</b>	<b>04/03 Bitcoin's rise as dramatic as fall</b>
<b>SOURCE</b>	<a href="https://www.cbsnews.com/news/after-meteoric-rise-bitcoins-fall-is-as-nearly-dramatic/">https://www.cbsnews.com/news/after-meteoric-rise-bitcoins-fall-is-as-nearly-dramatic/</a>
<b>GIST</b>	<p>Bitcoin may have climbed on Monday while major U.S. stock indexes were tumbling, but don't think the debate over the cryptocurrency is any closer to being resolved. After all, bitcoin prices -- whose stratospheric rise made some rich and confounded many professional money managers -- have plummeted to earth in recent weeks. However, that's not keeping the digital currency's proponents from swearing their side is winning.</p> <p>The skeptics just point to the overall price plunge. After peaking near \$20,000 in December, it has further slid from \$11,520 on March 5 to around \$6,986 on Monday afternoon, according to CoinDesk's Bitcoin Price Index. Rivals to bitcoin in the cryptocurrency market such as ethereum, ripple and bitcoin cash have also been crushed.</p> <p>According to GMO co-founder Jeremy Grantham, who correctly predicted the market downturns in 2000 and 2007, bitcoin is a speculative bubble that's bursting. He recently told his clients in a letter that it "may well crash and burn even before the broad market peaks."</p> <p>Of course, bitcoin's fans -- and they are legion -- see better times ahead in 2018.</p> <p>"I talk to hedge funds, high net-worth individuals, even commodity speculators," Bill Barhydt, CEO of Abra, a cryptocurrency startup backed by American Express (AXP), told Business Insider. "They look at the volatility in the crypto markets and they see it as a huge opportunity. Once that happens, all hell will break loose."</p> <p>Speaking to Bloomberg recently, LDJ Capital head David Drake declared that after a "long, cold winter," bitcoin prices would reach \$30,000 by year-end. He invests in initial coin offerings (ICOs), a process for launching new digital currencies similar to initial public offerings for stocks, which regulators have argued is a haven for scammers. Google (GOOG) and Facebook (FB) have both decided not to accept ICO ads.</p> <p>Whether bitcoin will regain the \$20,000 level (never mind hit \$30,000) or will dwindle to irrelevance remains unknowable -- but that won't stop the arguments from both sides any time soon.</p>

<b>HEADLINE</b>	<b>04/03 FBI: easy to buy opioids on darknet</b>
<b>SOURCE</b>	<a href="https://www.cbsnews.com/news/opioid-fentanyl-darknet-drugs-fbi/">https://www.cbsnews.com/news/opioid-fentanyl-darknet-drugs-fbi/</a>
<b>GIST</b>	<p>WASHINGTON -- His moniker was "DARKKING22," and authorities say he offered a cornucopia of illicit drugs through the click of a mouse. But it was his ads on a hidden website for pure fentanyl, the powerful painkiller driving a record number of overdose deaths across the U.S., that caught FBI agents' attention.</p> <p>They bought some, and days later it arrived in a small, clear, plastic bag complete with a thank-you card -- a sign of how easy it is to buy drugs on the so-called darknet.</p> <p>The dealer did not stay anonymous for long. Federal authorities say "DARKKING22" was 28-year-old Antoin Austin, of Euclid, Ohio. His arrest last week is among the first by a new team of federal agents,</p>

computer experts and analysts tasked with fighting the kind of online opioid trafficking that law enforcement officials say can be more persistent and vexing than more traditional trafficking by cartels.

Frustrating authorities in their pursuit of online dealers is the anonymity in which they work. Buyers access stores through secret web browsers and make purchases using encrypted channels, code names and virtual currency such as bitcoin.

Attorney General Jeff Sessions said darknet vendors are "pouring fuel on the fire of the national drug epidemic" and this year doubled the number of federal agents working on those cases. It's part of the Trump administration's tough approach to the drug crisis that has focused on harsh punishments for dealers. Critics say the overall strategy resembles a return to failed drug-war tactics and that the record \$4.6 billion included in the spending plan the president signed last month is not nearly enough to establish the kind of treatment system needed to reverse the crisis.

But there's bipartisan agreement that more resources and new restrictions are needed to stem the stream of opioids entering the U.S. from overseas, especially China, and into households through the U.S. mail.

Darknet marketplaces are thriving, even after authorities in recent years dismantled two of the most notorious, the Silk Road and AlphaBay, where hundreds of thousands of customers bought not just illegal drugs but weapons, malware and counterfeit and stolen identification. Authorities on the new task force, the Joint Criminal Opioid Darknet Enforcement team, in this case targeted the vendors who sell illicit fentanyl by mail.

"It's not enough simply to take the sites down," Acting Deputy Assistant Attorney General Richard Downing said. "Vendors look for another opportunity, another site, another place where they can go and sell their drugs and guns."

In its first operation, the team arrested Austin and seven others and seized weapons, computer equipment and more than 2,000 lethal doses of the deadly drug. Investigators uncovered 19 overdose deaths they believe are connected to fentanyl purchased online.

Agents in Pittsburgh, for example, have found drug gangs that traditionally peddled narcotics smuggled from beyond the southern border are now also selling drugs from China online, said Shawn A. Brokos, a supervisory special agent there. Buyers sometimes turn to the dark web for drugs to then deal on the street.

"A lot of them start on a smaller level and then they see how lucrative this can be and they keep expanding," she said.

Investigators from several agencies made a list of "targets," not just the fentanyl peddling vendors, but buyers and users, then set out to contact them, building on existing intelligence. They spoke to more than 160 people, getting a clearer picture of the landscape, said Kyle Rau, of the U.S. Postal Inspection Service.

"They share their secrets, they share their tradecraft," said Emily Odom, chief of the FBI's Hi-Tech Organized Crime Unit. "They're working together, so we have to do a better job working together as well."

## Terror Conditions

[Top of page](#)

HEADLINE	04/04 Expert: age of jihadist drone arrived
SOURCE	<a href="https://www.standard.co.uk/news/world/drones-are-the-new-jihadist-terror-weapons-says-us-security-expert-a3805201.html">https://www.standard.co.uk/news/world/drones-are-the-new-jihadist-terror-weapons-says-us-security-expert-a3805201.html</a>
GIST	Britain must prepare to face the threat of Islamic State terrorists using drones to attack buildings and other landmark targets, a security expert will warn in a book published next month.

Nicholas Grossman said that IS had already used drones packed with explosives in Syria and that no terror group had done more to exploit the new technology.

He said options for protecting against the danger included using electrical repulsion systems.

But he warned that if the use of drones for commercial deliveries and other purposes becomes more common it will become increasingly difficult to stop terrorists using drones to destructive effect.

There are already concerns about the potential risk that such devices could pose to aircraft if they stray into flight paths, and the possibility that out-of-control drones could injure people. But in his book *Drones and Terrorism*, Mr Grossman, an academic from the University of Illinois, warns that the “age of the drone terrorist” has arrived, with IS and other extremist groups already using them for attacks in conflicts overseas.

He says the technology is likely to be exploited further to mount attacks in Western cities. “As drones become more commonplace in cities, they will become less conspicuous, making it easier for a terrorist to case or attack a target,” he writes.

“Electronically repelling drones from restricted airspace, or forcing them to land, would protect landmarks, airports, government buildings or other potential targets ... [but] of course someone will find a way around any anti-drone technology.

“Perhaps the biggest danger is to airports. If a terrorist could fly a drone into a jet engine during take-off or landing, they could inflict mass casualties.”

The warning echoes similar comments by former Scotland Yard counter-terrorism chief Richard Walton. He told the Standard last month that vigilance was needed about potential attacks using drones because “there are very few methodologies used by terrorist organisations in their war zones that don’t at some stage come over here”.

Mr Walton added that both IS and al-Qaeda, which had not gone away, remained “globally networked organisations” capable of organising attacks.

A recent report by the London Assembly suggested that the “controlled use of drones should be explored” in planning for the future transport needs of the capital.

<b>HEADLINE</b>	<b>04/04 Terrorists, criminals and governance</b>
<b>SOURCE</b>	<a href="https://www.theatlantic.com/international/archive/2018/04/terrorism-governance-religion/556817/">https://www.theatlantic.com/international/archive/2018/04/terrorism-governance-religion/556817/</a>
<b>GIST</b>	<p>The Taliban claims to adhere to a strict interpretation of Islamic law, but that didn’t stop them from learning to love the poppy. The Islamic State developed an unforgiving set of laws to govern its caliphate, even as it engaged in widespread smuggling of antiquities and the synthetic drug Captagon. The Revolutionary Armed Forces of Colombia (the FARC) were once puritanically anti-drugs but turned wholeheartedly to supporting the cocaine economy following their Eighth Party Congress in 1982. This isn’t necessarily surprising. Despite initial protestations, militant groups often engage in criminal operations—drugs, trafficking, and smuggling—to fund their activities.</p> <p>But crime is not their primary calling—they also seek to govern. These groups may be despicable but they can also be rational, calculating, and sometimes surprisingly effective, outperforming existing governments. Yet this fundamental point is often lost on policymakers.</p> <p>The Trump administration has made a lot of noise about defeating groups like the Islamic State, but it has said little about how to prevent them from reemerging in the future. In fairness, President Trump is only building on the “counterterrorism first” policy of his predecessor, President Obama. And the Trump</p>

administration's hard line on illegal drugs coming from Mexico—setting aside the issue of the border wall—has echoes in that of previous Republican and Democratic administrations. But what if the true cause of instability isn't terrorism or crime but the absence of effective governance?

How the Taliban and the Islamic State (and even some organized crime organizations) think about governance is shaped and, in some cases, driven by ideological and religious motivations. Latin America offers an intriguing contrast. There are, of course, violent actors in Latin America—quite a lot of them. Countries like Mexico have seen Middle East-like levels of violence. Some of the most brutal tactics of al-Qaeda in Iraq in the 2000s, such as beheadings, were also used by Mexican drug cartels like Los Zetas. But tactics and the willingness to kill aside, much of the violence in Latin America is of a different kind, with religion and ideology playing a declining role.

In Latin America during the Cold War, Marxism was invoked by left-wing insurgents, as was nationalism by right-wing militias, in their attempts to seize control of the state. But with successful democratic transitions throughout the continent, states largely appropriated socialist demands by legalizing leftist parties and pushing a new brand of redistributive economics. The collapse of the Soviet Union and the moderation of socialist parties in countries made demands for a radically different political order seem unappealing (or unnecessary) to the vast majority of citizens.

Meanwhile, secularization and declining levels of religious observance throughout Latin America meant a receding political role for Catholicism. In Michoacán, Mexico, one exception has been the criminal group La Familia Michoacana, which has made extensive use of Christian imagery. In 2009, before the state fought back, the group reportedly had influence over (or extorted anyway) perhaps as many as 180,000 gas stations, truck shops, street markets, movie theaters, and businesses.

While some members of La Familia genuinely subscribed to the evangelically influenced, albeit distorted, religious practices, Christianity mainly functioned as a frame to justify their rule. References to a Christianity "purer" than that of the Catholic Church were meant to cement the group's legitimacy with the local population. Christian ideology was also used to prevent defections to rival criminal groups or collaboration with state authorities by ensuring absolute obedience. La Familia also imposed certain mores of personal conduct—including, ironically, a ban on the use of drugs by cartel members.

In these cases, however, Christianity did not have much bearing on the content of governance. La Familia did not, for example, seek to impose any particular religious conduct on local populations. By contrast, in the case of the Islamic State, religion provided much more than mere justification; it informed the whole approach to governance, including an elaborate network of legal institutions.

In Latin America, the slow disappearance of genuine Marxist alternatives led elected leaders to deemphasize state coercion for resolving disputes or conducting politics. Unlike the Middle East, Latin America has experienced no interstate war since 1995, no international terrorist attacks since 1994, and no proliferation of weapons of mass destruction since 1945. There are no longer successful separatist or irredentist armed groups. No major political party based on religion has come close to having an electoral majority in the last two decades.

The Colombian peace process that began in 2010—featuring the once-avowedly Marxist FARC—reflects the general trend toward addressing ideological differences within state institutions that began with the democratic transitions of the 1970s and 1980s. The decline of religious politics coupled with the integration of socialist ideology into mainstream politics has had major implications for violent conflict: Today, armed groups have virtually no alternative popular ideologies upon which to credibly draw.

The closest substitute, which does not quite rise to the level of ideology in the traditional sense, is loyalty toward a gang, militia, or criminal organization, offering an alternative basis for social solidarity. For its part, the United States, since the end of the Cold War, has helped reduce ideological tensions by choosing not to intervene directly, by and large, in the region or pick partners on the basis of ideology.

But even in the absence of clear ideological and religious motivations, some nonstate actors still play

important governance roles across Latin America. Where state presence is weak, this is inevitable. But even where states are not weak, governments may simply decide that the cost of establishing a state presence outweighs the benefits. Even wealthy countries like the United States, Germany, and France lack full control in pockets of territory—inner cities, refugee camps, migrant communities, or banlieues. Alienated minority communities may be reluctant to cooperate with authorities, increasing the cost of maintaining a state presence. But just because the state isn't interested in providing governance doesn't mean no one will.

Which leads us back to a basic theme: People seek out governance from whoever can deliver it, and if the state cannot, they'll find somebody else to do the job. In the Middle East and Asia, religion and ideology matter, but, beyond making a concerted effort to understand how Islam influences politics, there's little the United States can do to influence Islam's evolution (it's challenging enough for Muslim countries). What it can do is focus on the things it does know about and the things it can influence—and perhaps even change.

To put it more simply, its governing ideology aside, the Islamic State would not have been able to govern large swathes of Syria and Iraq if there had been a legitimate, responsive state there already governing. Within the broad category of “governance,” there is a common thread that sticks out across regions, religions, and cultures: the demand for justice, even if it is of the “rough and ready” variety. Order and security are what residents demand most, at least at first. Even when local orders are brutal, they can offer the swift and predictable dispute resolution that populations crave.

In Afghanistan, conflicts over land and water and tribal feuds have escalated after the end of the Taliban regime as a result of weak institutional rule and power usurpation. The post-Taliban formal courts have not been able to stop or resolve such conflicts. Worse, the courts became corrupt and themselves a tool of land expropriation, something that worsened during the presidency of Hamid Karzai. The Taliban has moved to fill the gap by providing free mediation of tribal, criminal, and personal disputes. Afghans report a great degree of satisfaction with Taliban verdicts, unlike those of the official justice system, where petitioners often have to pay considerable bribes.

The Taliban's code of conduct—the so-called Taliban La'iha—is designed both to maintain control of the Taliban rank-and-file and to limit the emergence of rogue elements. The Quetta Shura of the Taliban, one of its key leadership groups now based in Quetta, Pakistan, has even established teams to travel throughout Afghanistan and uncover complaints from local populations against the Taliban—about corruption, brutality, or other mistreatment. It has also distributed phone numbers throughout the country for reporting abuses. How much the local population trusts this reporting system and actually experiences any redress of grievances varies considerably, of course. In practice, the population is intimidated and abused by Taliban fighters and officials. Still, it says something that the Taliban feels it stands to gain from establishing and advertising such a system in the first place.

Similarly, the Islamic State went about building a distinctive legal order, allowing it to justify violence, regulate economic transactions, and reduce crime and corruption. In short order, with the international community paying little attention, it set up fairly elaborate institutional structures, oriented around interlocking sharia courts, binding fatwas, and detailed tax codes. This was what Yale University's Andrew March and Mara Revkin term “scrupulous legality.” Distinguishing itself in governance terms was not particularly difficult, since the bar was so low; the other choices were the chaotic rule of other rebel groups consumed by infighting, the mass murder of the Assad regime, or the sectarianism of the Iraqi government and Shia militias.

In Latin America, various criminal groups maintain control of neighborhoods with a mix of coercion and public services, similar in many ways to the Taliban or the Islamic State, although not on the same scale. For example, in the favelas of Rio de Janeiro, gangs such as Primeiro Comando da Capital regulate criminal activity with a so-called “criminal constitution,” which sets limits on what members of one gang can do to another or to the local population. Gangs also sponsor the development of public spaces such as plazas and sport facilities—they have even improved water delivery in one Rio favela. They help pay for

the medical expenses of residents who run into trouble or provide small-scale loans to those who cannot make ends meet. Prison-based gangs, particularly in countries where they have achieved national influence such as Brazil and El Salvador, are also in the business of governance. They regulate and make predictable the otherwise brutal conditions in overcrowded jails.

Meanwhile, Mexico's Sinaloa Cartel, long led by the notorious Joaquín "El Chapo" Guzmán, has provided handouts to local schools, clinics, and churches; built soccer stadiums; and sponsored fiestas. The cartel's "governance," including levying illegal taxes—extortion—was predictable and restrained compared to other criminal groups, at least prior to El Chapo's extradition to the United States in 2017. During her fieldwork in Tijuana 2011 and 2013, one of the authors was repeatedly told by business operators that while all of the local criminal groups extort businesses, the Sinaloa Cartel's taxes were by far the most tolerable.

Organized crime organizations sometimes even integrate into local civil society and politics. In Medellín, Colombia, local paramilitary organizations and gangs would join neighborhood civil society groups and serve on community boards. Social workers in Medellín reported that residents would turn to the dominant criminal organization to settle disputes or to deal with petty crime because local inhabitants prefer swift (if sometimes violent) resolution of problems over prolonged and uncertain interactions with the police and the courts. In Brazil, politicians seeking to be elected frequently need to bargain for permission to enter neighborhoods controlled by gangs or militias, which provides another avenue by which organized crime can shape politics and society.

Whether in the Middle East, Latin America, or elsewhere, the question of how international actors can improve governance in places they don't quite understand is always a difficult one. Good governance—or even good enough governance—isn't easy. At times, it can seem like a stand-in for the heroically impossible, requiring Marshall Plan-style ambition, visionary leadership, and massive financial resources. But there is such thing as realistic governance goals—realistic in that they might require billions of dollars, a modest amount for the United States, but more importantly political will along with feasible timelines. Most of all, though, they require a change of attitude.

The difficult, often tragic experiences of the United States and the international community in Iraq and Afghanistan have produced resignation and exhaustion. Far from wanting to promote state-building and good governance, many officials call for a hands-off approach beyond the occasional remote killing of terrorists. Or, if a military intervention is in fact necessary, they call for handing over the responsibilities of governance to local powerbrokers as quickly as possible. Yet this is exactly why such limited interventions produce such limited, disappointing, and even disastrous results. And this is why armed nonstate actors remain a persistent threat—not simply because they are violent or because not enough of them are killed, but because they provide public goods as well as public bads.

<b>HEADLINE</b>	<b>04/04 Claim: Indonesia ISIS leader identified</b>
<b>SOURCE</b>	<a href="https://www.theaustralian.com.au/news/world/bombmaker-names-aman-abdurrahman-as-isis-leader-in-indonesia/news-story/18d3cb98e47e01c5ae7053405656b566">https://www.theaustralian.com.au/news/world/bombmaker-names-aman-abdurrahman-as-isis-leader-in-indonesia/news-story/18d3cb98e47e01c5ae7053405656b566</a>
<b>GIST</b>	<p>A convicted Indonesian bomb maker who claims to have been radicalised by listening to secretly-recorded sermons by jailed cleric Aman Abdurrahman told a Jakarta court he believed the firebrand Islamist was Islamic State's leader in Indonesia.</p> <p>Kurnia Widodo, who served four years in prison over a failed suicide bombing in the west Java city of Bandung, told the South Jakarta district court he was inspired to use his background in chemical engineering to become a bomb maker after listening to lectures delivered by Aman down a phone line from prison and broadcast over loudspeakers at a Bandung mosque.</p> <p>His plan to assist in the 2010 suicide bombing attack was foiled and Kurnia was arrested and sentenced to six years in Cipinang, a high security prison off the coast of Java, where Aman was then serving a nine-</p>

year sentence for aiding a militant training camp.

The 46-year-old cleric, said to be the key ideologue for militant groups that make up Indonesia's ISIS-inspired Jamaah Ansharut Daulah (JAD), is now facing a possible death sentence on charges of inciting others to commit terror attacks in Indonesia, including the January 2016 central Jakarta attack in which eight people were killed.

Kurnia testified yesterday that Aman was still preaching to his followers from Cipinang jail in 2011 when he shared a prison cell block with the cleric, though by then he was "no longer following Aman's teaching".

"I stopped believing police (were) infidels," he said.

But, he added; "My friends referred to Aman as the ISIS leader of Indonesia. I believed them, because his teaching served as a reference to all ISIS supporters in Indonesia and his words are seen as instructions."

Aman was shifted to Indonesia's maximum security Nusakambangan prison in 2015, where many of the country's death row prisoners are held.

It was in Nusakambangan that Kurnia said he understood Aman convinced Abu Bakar Bashir, the ageing cleric and spiritual leader of the Jemaah Islamiyah militant group behind the deadly Bali bombings, to pledge allegiance to ISIS.

"That's what I learned from my colleagues. It was widely discussed on jihadist WhatsApp groups. Abu (Bakar Bashir) wouldn't have abandoned the JAT (Jamaah Ansharut Tauhid, a militant group Bashir founded) and pledged allegiance to ISIS. Abu must have been influenced by someone else. And the person influencing him was Aman Abdurrahman," Kurnia said.

But Aman yesterday dismissed Kurnia's testimony, insisting he had never met Abu Bakar Bashir and was not an ISIS leader.

"How can you say that I am an ISIS leader? I am not an ISIS chief. If you say people use me as reference, then yes," he said.

"But I am not their leader."

Aman was rearrested in August last year just days before he was scheduled to be released after serving out his time for his first conviction. He has since been placed in isolated cells at several police headquarters for fear he may radicalise more people and incite further attacks.

<b>HEADLINE</b>	<b>04/03 US considering pullout of Syria?</b>
<b>SOURCE</b>	<a href="https://www.reuters.com/article/us-usa-syria/trump-seeks-syria-pullout-as-advisers-warn-of-hard-work-ahead-idUSKCN1HA2DA">https://www.reuters.com/article/us-usa-syria/trump-seeks-syria-pullout-as-advisers-warn-of-hard-work-ahead-idUSKCN1HA2DA</a>
<b>GIST</b>	<p>WASHINGTON (Reuters) - U.S. President Donald Trump said on Tuesday he wanted to “get out” of Syria but offered no timetable, as his advisers warned of the hard work left to defeat Islamic State and stabilize areas recaptured from the hardline militant group.</p> <p>Trump told a news conference the United States would “not rest until ISIS is gone,” using an acronym for the militant group. But he also suggested that victory was imminent.</p> <p>The Pentagon and State Department have held that a longer term U.S. effort would be needed to ensure that Islamic State’s defeat is a lasting one.</p> <p>“It’s time,” Trump told reporters, when asked if he was inclined to withdraw U.S. forces.</p> <p>“We were very successful against (Islamic State). We’ll be successful against anybody militarily. But sometimes it’s time to come back home, and we’re thinking about that very seriously.”</p> <p>The United States is waging near-daily air strikes in Syria and has deployed about 2,000 troops on the ground, including U.S. special operations forces whose advising has helped Kurdish militia and other U.S.-backed fighters capture territory from Islamic State.</p> <p>U.S. Army General Joseph Votel, who oversees U.S. troops in the Middle East as the head of Central Command, estimated on Tuesday that more than 90 percent of the group’s territory in Syria had been taken back from the militants since 2014.</p> <p>Trump estimated the percentage of territory recaptured in Iraq and Syria at “almost 100 percent,” a figure</p>

that U.S. officials say is correct - it is about 98 percent - but does not highlight the work left in Syria.

The big hurdle, in the U.S. military's view, is seizing Islamic State-held territory around the Syrian town of Abu Kamal.

That effort that has been slowed as U.S.-backed Kurdish fighters shift their focus away from Islamic State toward a Turkish offensive against Kurdish allies elsewhere in Syria's complex, multi-pronged civil war, now in its eighth year.

Brett McGurk, the special U.S. envoy for the global coalition against Islamic State, speaking alongside Votel at an event in Washington on Tuesday, said the U.S. fight against Islamic State was not over.

"We are in Syria to fight ISIS. That is our mission and our mission isn't over and we are going to complete that mission," McGurk said.

Experts were divided about the significance of Trump's simultaneous musings about withdrawal and his assurance that the United States will not depart until Islamic State is defeated.

The militant group is widely expected to revert to guerilla tactics once the last remnants of its once self-styled "caliphate" are captured by U.S.-backed forces.

Jon Alterman at the Center for Strategic and International Studies think-tank, said a precipitous U.S. withdrawal would undermine U.S. leverage in talks to end Syria's civil war.

Experts warn an abrupt U.S. withdrawal could benefit Russia and Iran, U.S. rivals who could extend their influence in Syria.

<b>HEADLINE</b>	<b>04/04 Iraq grapples pre-election Iran influence</b>
<b>SOURCE</b>	<a href="http://abcnews.go.com/International/wireStory/iraq-grapples-iranian-influence-ahead-elections-54223229?">http://abcnews.go.com/International/wireStory/iraq-grapples-iranian-influence-ahead-elections-54223229?</a>
<b>GIST</b>	<p>Iran's influence is looming large as Iraqis prepare to head to the polls for parliamentary elections in May, with many in the country worried that Tehran may be looking to strengthen its political grip on Baghdad through the ballot box.</p> <p>Iranian support and military advisers helped Baghdad's Shiite-led government beat back the Islamic State group. But with IS militants now largely defeated militarily, Iran's expanding influence has emerged as one of Iraq's most divisive issues ahead of the balloting.</p> <p>That influence has sown fear among Iraq's disenchanting minority Sunnis, who bore the brunt of the war's destruction, and has also caused concern in Washington. Despite tensions between the United States and Iran, both remain key allies of Iraqi Prime Minister Haider al-Abadi's government.</p> <p>U.S. Defense Secretary Jim Mattis last month accused Iran of "mucking around" in Iraq's upcoming elections, telling reporters the U.S. has what he called "worrisome evidence" that Iran is funneling "not an insignificant amount of money" into Iraq to try to sway votes. Baghdad rejected the accusation.</p> <p>Government spokesman Saad al-Hadithi stressed that the use of foreign money in domestic politics "is illegal and unconstitutional."</p> <p>"The government is taking great efforts to hold free and fair elections and prevent the manipulation of election results," he said.</p> <p>Both Iran and Iraq are Shiite-majority countries and share deep economic and cultural ties — as well as a</p>

1,500-kilometer (900-mile) border.

The two countries fought a devastating war in the 1980s that left hundreds of thousands dead. But Iranian influence in Iraq has steadily grown since the 2003 U.S.-led invasion that toppled Iraqi dictator Saddam Hussein, marking the start of a prolonged period of sectarian division, extremist violence and political strife.

Under Saddam, many of Iraq's Shiite political elite spent years in exile in Iran. Since Saddam's ouster, Iraqi markets have been stocked with Iranian goods and millions of Iranian pilgrims descend on Iraq each year to visit holy shrines in the cities of Samarra, Baghdad, Najaf and Karbala.

When entire divisions of Iraq's military disintegrated following the fall of the city of Mosul to IS in the summer of 2014, Iranian influence soared.

Weeks before the U.S. began a bombing campaign against IS, Iranian advisers and support for Iraqi Shiite militias, which became known as Popular Mobilization Units, helped halt IS' advance, which came dangerously close to Baghdad. From then on, the militias became instrumental in the battle against IS.

More than 500 members of the paramilitary forces or political figures associated with the militias are now running for parliament.

Ahmed al-Asadi is one of the candidates with strong paramilitary ties. An elected member of parliament from Baghdad and former spokesman for the PMU, al-Asadi cut his ties with the force before launching his re-election bid — a formality required by a governing body overseeing the May vote.

"Iran is the ally of the powerful forces that supported Iraq against terrorism," he said, dismissing concerns that Tehran plays a destabilizing role in Iraq.

But other Iraqi politicians worry that if a large number of men like al-Asadi win seats in parliament, Iraq will be even more beholden to its eastern neighbor.

Saleh al-Mutlaq, a longtime Iraqi politician and former deputy prime minister, said he expects candidates with ties to the Shiite militias to do well in upcoming elections.

"These elections will be disastrous for this country," he said. "The PMU will be a key player in the political process and this will give Iran a role and a word in forming the government and in choosing a prime minister."

Iran is not the only one trying to influence the May vote, said Joost Hiltermann, a longtime Iraq researcher with the International Crisis Group.

"Everybody is trying to buy or gain influence, anybody who has a stake in Iraq that is, whether they do it with money or intimidation or other kinds of incentives," he said. "Ever since there have been elections in 2005, there's been meddling."

The future of American forces in Iraq hinges in large part on who becomes Iraq's next prime minister and who gets to lead the country's most powerful ministries.

While the Shiite militias racked up several early victories against IS, it was U.S.-led coalition airstrikes that allowed Iraqi forces to retake urban areas. Iraq remains deeply dependent on U.S. military aid, training and intelligence sharing.

While al-Abadi, who is seeking re-election with his recently formed Victory Alliance party, has said he is open to long-term American training programs for Iraqi forces, some of his opponents have taken a much harder line, describing any U.S. forces in Iraq as occupiers.

	<p>The U.S. still has more than 5,000 troops in Iraq, supporting its fight against remaining pockets of IS, most significantly along Iraq's volatile border with Syria, in western Anbar province and around the city of Kirkuk — areas that have seen an uptick in militant activity.</p> <p>"I'm not going to speculate on anything that could or would happen," coalition spokesman Col. Ryan Dillon said when asked if there is concern that a change in government could affect the U.S.-led coalition's presence in Iraq.</p> <p>"We are here at the invitation of the government of Iraq to support their operation to defeat Daesh, and we'll continue to do so as long as we are invited," he said, referring to IS by an Arabic acronym.</p>

<b>HEADLINE</b>	<b>04/04 France police database flags 78,000</b>
<b>SOURCE</b>	<a href="http://abcnews.go.com/International/wireStory/france-puts-78000-security-threats-vast-police-database-54224059?">http://abcnews.go.com/International/wireStory/france-puts-78000-security-threats-vast-police-database-54224059?</a>
<b>GIST</b>	<p>France has flagged more than 78,000 people as security threats in a database intended to let European police share information on the continent's most dangerous residents — more than all other European countries put together — according to an analysis by The Associated Press.</p> <p>A German parliamentarian, Andrej Hunko, was the first to raise the alarm about potential misuse of the Schengen Information System database in a question to his country's Interior Ministry about "discreet checks" — secret international checks on people considered a threat to national security or public safety. He questioned whether and why different countries seemed to apply very different criteria.</p> <p>"The increase in alerts cannot be explained by the threat of Islamist terrorism alone. Europol reports a four-digit number of confirmed foreign fighters, yet the increase of SIS alerts in 2017 is several times that," Hunko said in a statement late last month when he released the Interior Ministry response to his query.</p> <p>That response included a spreadsheet detailing for the first time how many discreet checks each European country had flagged up last year — more than 134,000 in all.</p> <p>"This could mean that families and contacts of these individuals are also being secretly monitored. It is also possible that the measure is being used on a large scale for combatting other criminal activity," Hunko said.</p> <p>The number of French police entries "indicates a misuse" of the system intended to monitor dangerous criminals, he added.</p> <p>The Schengen database — which is separate to the Europol database and far more widely used — forms the backbone of European security, allowing police, judicial authorities and other law enforcement to immediately check whether a person is wanted or missing, or a car is stolen, or a firearm is legal, for example. The database was checked 5 billion times in 2017 alone, according to the director of the EU-LISA agency, Krum Garkov.</p> <p>But a relatively unknown provision in European law allows countries to flag people for the "discreet checks" — allowing law enforcement in one country to notify counterparts elsewhere of a person's location and activities. Use of the system — intended for individuals who pose a threat to national security or public safety — has expanded enormously since Islamic State extremists attacked Paris and Brussels in 2015 and 2016, from 69,475 in 2015 to 134,662 last year, according to data from EU-LISA and Germany.</p> <p>If someone is flagged for a discreet check, their name will come up for any law enforcement official who has stopped them anywhere in Europe — whether trying to cross an external border or running a red light. In the entry, the requesting country can ask for a subsequent action, ranging from simply reporting back</p>

their location, vehicle, and traveling companions to detaining them immediately for arrest.

Discreet checks, unlike arrest warrants, expire after a year, although Garkov said countries are notified of pending expirations and can renew them at will.

But vast disparities in its use by individual countries raise questions about both the effectiveness of the tools and the criteria countries are using to enter people into the system. With 78,619 entries by 2017, France makes up 60 percent of the discreet check database. Britain, with nearly the same population and 16,991 people flagged, comes in a distant second. Germany, Europe's most populous country, had 4,285 people flagged last year, according to the Interior Ministry data.

To put the French number in perspective, the country's intelligence chief, Laurent Nunez, said late last year that France had recorded 18,000 people as suspected extremists, and considered 4,000 of those to be highly dangerous. The Interior Ministry did not respond to requests to comment about the criteria for discreet checks. CNIL, the government data protection agency, said the 78,000 entries covered every person that France wanted flagged for any reason.

Like the U.S. "no fly list," people can only learn by inference whether they are flagged for a discreet check.

"People are not informed about the existence of this alert, which makes sense. But at the same there needs to be a proportionality assessment," said Niovi Vavoula, a legal scholar at Queen Mary University of London who studies the use of the database. "If certain member states are introducing alerts en masse to the system, this needs to be flagged as a problem."

<b>HEADLINE</b>	<b>04/03 US mulls changes to Syria policy</b>
<b>SOURCE</b>	<a href="https://www.cbsnews.com/news/u-s-mulls-changes-to-syria-policy-after-trump-says-u-s-will-leave-syria-soon/">https://www.cbsnews.com/news/u-s-mulls-changes-to-syria-policy-after-trump-says-u-s-will-leave-syria-soon/</a>
<b>GIST</b>	<p>President Trump's declaration last week that the U.S. will get out of Syria "soon" came just a day before the administration halted \$200 million in U.S.-led reconstruction efforts. The pair of announcements set off alarm bells within the U.S. government and among allies who are worried Washington's commitment to Syria may be wavering.</p> <p>Sen. Lindsey Graham, R-South Carolina, said on "Fox News Sunday" this weekend that pulling out of Syria would be the "single worst decision" that Mr. Trump could make. European government officials agreed.</p> <p>"This is not the moment to give up on Syria," explained one European government official. "After Mosul, some said it is all over for ISIS. Well, no it is not. If you were to walk away now, we think there is a real risk that things could go back over time to how they were. You can't do this work from afar."</p> <p>A lot depends on a White House meeting on Tuesday, which will take a close look at the Trump administration's Syria policy. Mr. Trump wants other countries, such as Saudi Arabia, to play a greater role and pick up a bigger portion of the bill in Syria. European countries admit that they have to do more to help out in Syria, as displaced Syrians will in many cases wind up as refugees in Europe.</p> <p>Countries involved in the global coalition to defeat ISIS in Syria and Iraq have said they are not expecting a quick and dramatic U.S. exit. But they are wary of the Trump administration's sudden decision to halt support for stabilization efforts.</p> <p>These U.S. efforts, led by the State Department and USAID, are focused on the essentials in the war-ravaged lands: removing landmines, supporting the opening of hospitals and schools, enabling the flow of water and turning on electricity.</p>

Over the last six months, the U.S. sent additional diplomats to Syria to work with partners on the ground to facilitate these programs, though the U.S. diplomatic presence in the country remains at under a dozen people. State Department officials explained that Acting Secretary of State John Sullivan would attend the meeting on Tuesday in an attempt to protect the stabilization efforts and renew funding.

State Department officials know that Trump is more likely to listen to Secretary of Defense Jim Mattis than other officials in the room. So before Tuesday's meeting, the diplomats reminded the Defense Department that stabilization efforts also include programs like clearing out IEDs. Their argument was simple: those programs don't just make it possible for Syrians to return home -- they also protect U.S. forces on the ground from deadly explosions.

The State Department was shocked by the administration's decision to halt the stabilization funding. Some officials were told that the pause came after Trump read news articles about the U.S. role in Syria.

"I cannot picture that within six months that U.S. will be out of Syria. At least not responsibly," said a U.S. government official. "More Syrians will die if the U.S leaves," said another official.

Yet with the ouster of Secretary of State Rex Tillerson and the imminent departure of National Security Adviser H.R. McMaster, there are fewer voices calling for the U.S. to remain committed to Syria.

"The U.S. is now re-litigating its policy on Syria," explained a European government official. "The table was set to stay and the tablecloth got pulled out with Tillerson and McMaster leaving. The plan that they shepherded through may be dead."

Earlier this year, Tillerson declared that stabilization initiatives in areas that have been liberated from ISIS "are essential" to creating conditions for normal life and for preventing ISIS from re-emerging.

"Terrorists thrive under conditions that allow them to peddle their warped and hateful messages to vulnerable people in conflict-stricken areas. Our stabilization efforts will help those people turn away from the prospect of terrorism and toward integration in their local communities," Tillerson said.

It is now unclear whether those stabilization efforts will continue.

<b>HEADLINE</b>	<b>04/03 Remains US hostages found in Syria?</b>
<b>SOURCE</b>	<a href="http://abcnews.go.com/International/human-remains-recovered-search-us-hostages-killed-isis/story?id=54208210">http://abcnews.go.com/International/human-remains-recovered-search-us-hostages-killed-isis/story?id=54208210</a>
<b>GIST</b>	<p>The FBI is conducting painstaking DNA tests on a batch of human remains which could be those of American hostages killed in ISIS captivity, after agents and U.S. commandos recently unearthed them from liberated areas in Syria, ABC News has learned.</p> <p>It may be months before testing at the FBI Laboratory in Quantico, Va., determines whether any are those of Americans or other westerners executed by ISIS or killed while held hostage, officials and family members said.</p> <p>The successful recovery of human remains gives hope to American families eager to lay their loved ones to rest at home -- even as they are urging the U.S. government to bring to justice two captured ISIS guards who helped U.S. authorities pinpoint the Syrian grave sites where remains were recovered.</p> <p>Several officials told ABC News that a decision still has not been made on what to do with the pair of Londoners captured by allied Kurdish YPG fighters in January, Alexandra Kotey and El Shafee Elsheikh, who according to the U.S. Department of State were half of the British terror quartet their captives called "the Beatles."</p>

The families reminded officials, according to sources present at the meeting, of an Obama Presidential Policy Directive issued four months after Kayla Mueller's death in 2015 (which has not been rescinded) emphasizing the prosecution of hostage-takers.

"The United States shall diligently seek to ensure that hostage-takers of U.S. nationals are arrested, prosecuted, and punished through a due process criminal justice system in the United States or abroad for crimes related to the hostage-taking," the directive states.

The U.K., which revoked the citizenship of all four "Beatles" including Mohammed Emwazi, the ISIS executioner dubbed "Jihadi John" by the media, has also objected to the men facing anything but a civilian trial, several sources said. Emwazi was killed in a CIA drone strike in Raqqa, Syria, in 2016 and Aine Davis, the fourth alleged "Beatle," was captured in Turkey.

"The Brits are not in support of the death penalty and Guantanamo but that was not a threat or demand to not help," one counterterrorism official said.

HEADLINE	04/03 Russia, Turkey, Iran Syrian challenge
SOURCE	<a href="https://www.cnn.com/2018/04/03/middleeast/syria-russia-iran-turkey-talks-analysis-intl/index.html">https://www.cnn.com/2018/04/03/middleeast/syria-russia-iran-turkey-talks-analysis-intl/index.html</a>
GIST	<p>(CNN)Despite the eagerness to declare it ebbing, Syria's war is unlikely to get closer to its end simply because Vladimir Putin, Recep Tayyip Erdogan and Hassan Rouhani are meeting in Ankara this week.</p> <p>Yes, these leaders represent the three largest foreign military forces operating now inside Syria, excluding the US, whose commander-in-chief said late last week that America would soon be letting "others" take care of Syria. But Russia, Turkey and Iran meet without the contribution of a reasonably important factor in this ghastly experiment in human cruelty: Syrians.</p> <p>You can argue that the regime in Damascus will do what Tehran or Moscow tells it to. But the prospect of Russia, Turkey and Iran agreeing what a new status quo inside Syria should look like is a short-term stopgap at best, and one that overlooks the underlying and unresolved causes of the war.</p> <p>The accepted premise of this trilateral solution is that Iran and Russia are content that the regime has full access to the coast and a clear channel all the way to the Iraqi capital Baghdad -- through which Tehran can slowly harass Israel and dominate the region, and Moscow can retain an airbase on the Mediterranean.</p> <p>Turkey is meant to be happy as its proxies control the area west of the Euphrates Rivers along to Idlib, and provide a space for Sunni militants to create their own communities into which millions of Syrian refugees currently in Turkey might return.</p> <p>The unspoken annex to this is that the Americans retain adequate firepower and influence in the northeast for the area to remain a de facto Syria-Kurdish enclave for the years to come.</p> <p>Yet already the short-term flaws to this solution are emerging. Ankara has its sights on harassing Manbij, just across to the west of the Euphrates, which is currently held by Syrian Kurds with American backing. And the regime is also eyeing the most populated area in the northwest, where Turkey has large influence: Idlib. It is to Idlib that the Syrian Sunni rebels of Ghouta, Aleppo and elsewhere have fled, along with tens of thousands of civilians.</p> <p>These are just the short-term problems. The longer-term ones are even harder to solve.</p> <p>Essentially, this supposed trilateral arrangement fails to deal with the underlying demographic and sectarian issues that began the war in the first place.</p>

Syria's Sunnis rose up against a predominantly Shia regime in 2012. These Sunnis still lack proper representation or a functional homeland. They are squeezed into a tiny pocket of the northwest, and outside Syria's borders into Turkey and Jordan, with many in Lebanon too.

Keeping this disenfranchised, beleaguered and under-resourced population in the rubble, tents and rural flatlands of Idlib won't reduce the influence of extremists in their midst -- it will amplify it.

There are two things you can count on in the months ahead: that Russia and the regime will bombard Idlib and its thousands of civilians, and that the Sunni rebel militants who take shelter in it will respond as extremely as they can. Both sides will continue to do what they have done before.

Secondly, Syria's Kurds, thanks to the near-defeat of ISIS in Syria, control an outsized chunk of the northeast now. Everything east of the Euphrates River was not exclusively Kurdish before ISIS and is not entirely so now, but the Syrian Democratic Forces are the unwavering authority there.

If the US leaves, as President Donald Trump has said is likely, then the Syrian Kurds will have to either forge a deal of coexistence with the Syrian regime or go it alone, potentially against both Turkish and regime forces.

Yes, the Iran- and Russia-backed Shia regime has solidified its control over the territory it wants, but the majority of the country -- the Sunnis of Syria -- has not settled the question of where they will live and who will rule them. That started this, and must be resolved if it is to end.

Finally, Syria's three dominant forces -- Turkish-backed rebels, US-backed Syrian Kurds and the regime supported by Iran and Russia -- have backers with totally opposed agendas. Turkey wants to defeat the Kurds. The regime wants to defeat the rebels Turkey is backing, and keep the US out. And the US wants to defeat Iranian and regime ambitions in the region, while also keeping Russia in check.

Russia, Iran and Turkey can smile for the cameras in Ankara, but they still walk on Syria's broken glass.

<b>HEADLINE</b>	<b>04/03 Claim: Putin behind trolling abroad</b>
<b>SOURCE</b>	<a href="http://www.newsweek.com/putin-pays-over-100000-troll-russias-opponents-abroad-hacked-emails-reveal-869699">http://www.newsweek.com/putin-pays-over-100000-troll-russias-opponents-abroad-hacked-emails-reveal-869699</a>
<b>GIST</b>	<p>Russian President Vladimir Putin has been paying hundreds of thousands of dollars to trolls, hackers and paid protesters to sow dissent and quell anti-Russian sentiment in foreign countries, according to a trove of leaked emails from Kremlin-linked figures.</p> <p>The emails were released by the hacker group the Ukrainian Cyber Alliance, which was responsible for the so-called Surkov leaks, over a gigabyte of hacked emails allegedly taken from Putin's close political adviser and senior Kremlin official Vladislav Surkov in 2016.</p> <p>The new set of leaked emails was analyzed by Bob Seely, a Conservative Parliament member in Great Britain and an expert on Russian warfare. Seely told the British newspaper The Times that the emails revealed a "shopping list of subversion," including hacking, propaganda, and staged protests.</p> <p>The Kremlin was prepared to pay between \$100 and \$300 for email hacking. But trolling political opponents on social media and collecting personal data on individuals thought to be Kremlin opponents was valued at around \$130,500, according to the emails. Plans were also outlined to promote historical and philosophical ideas in line with the Kremlin's worldview, and to send trained athletes to agitate at rallies and bribe the media to cover the events. The Kremlin was willing to pay \$19,200 for a month of rallies with 100 participants and three organizers.</p>

	<p>The emails demonstrate Russia used these tactics in Ukraine, where Moscow supports pro-Russian separatists. The emails allegedly belong to Surkov's deputy Inal Ardzinba and to a leader of Ukraine's Communist Party, which advocates closer ties with Russia. But experts warn that the Kremlin is using similar tactics in the U.S. and the European Union.</p> <p>The Kremlin has claimed that the Surkov leaks are fake and that Ardzinba has never been involved in spreading propaganda in Ukraine. Researchers, however, said that the previous set of Surkov leaks were authentic, and this latest dump of emails is probably real as well.</p>

<b>HEADLINE</b>	<b>04/04 DHS: mobile snooping devices in D.C.</b>
<b>SOURCE</b>	<a href="https://www.cnn.com/2018/04/03/politics/dhs-stingrays-washington-dc/index.html">https://www.cnn.com/2018/04/03/politics/dhs-stingrays-washington-dc/index.html</a>
<b>GIST</b>	<p>Washington (CNN)The Department of Homeland Security has confirmed that it has detected evidence of mobile snooping devices around Washington, DC.</p> <p>The devices could be the work of foreign governments or entities, however, DHS hasn't determined their origin, the agency said in a letter. At issue are what are known alternatively as Stingrays, IMSI catchers or cell-site simulators. The devices essentially act as fake cellphone towers, and as mobile devices connect to them, the devices are able to snoop on the traffic that goes through.</p> <p>Responding to an inquiry from Democratic Sen. Ron Wyden of Oregon, DHS top infrastructure and cybersecurity official Christopher Krebs confirmed that DHS has detected activity consistent with such devices. Law enforcement in the US does use such techniques as well, though courts have been scrutinizing that.</p> <p>DHS "has observed anomalous activity in the National Capital Region (NCR) that appears to be consistent with International Mobile Subscriber Identity (IMSI) catchers," Krebs wrote. "NPPD has not validated or attributed such activity to specific entities or devices. This information was reported to our federal partners at the time it was observed."</p> <p>Krebs was responding to a question from Wyden as to whether DHS had evidence of foreign IMSI catchers operating in the DC area, but Krebs repeatedly declined to attribute the activity to any entity in particular.</p> <p>He did say the use of Stingrays "by malicious actors to track and monitor cellular users is unlawful and threatens the security of communications, resulting in safety, economic and privacy risks," but he said DHS would need more resources to develop an ongoing ability to detect the use of the devices.</p>

<b>HEADLINE</b>	<b>04/04 Hawaii problem: too low unemployment</b>
<b>SOURCE</b>	<a href="https://apnews.com/c83bd5c9d3f04901a39b3c9113389866/What's-wrong-with-very-low-unemployment?-Hawaii-knows">https://apnews.com/c83bd5c9d3f04901a39b3c9113389866/What's-wrong-with-very-low-unemployment?-Hawaii-knows</a>
<b>GIST</b>	<p>HONOLULU (AP) — Are there downsides to a low unemployment rate? In Hawaii, which has the United States' lowest jobless rate at a minuscule 2.1 percent, the answer is yes.</p> <p>Employers are frustrated by their inability to find workers. And unfilled jobs may be slowing the state's economic growth.</p> <p>A low unemployment rate is certainly better than a high one. And many employers are responding to the worker shortage by offering higher pay.</p>

Still, Hawaii's experience serves as a cautionary tale for the nation as a whole: Low unemployment can mask underlying problems. Nationwide, the jobless rate is at a 17-year low of 4.1 percent, and economists forecast it could drop another half-point by next year. That would bring the rate to a half-century low.

U.S. employers are already complaining about their struggles to find qualified employees. The number of open jobs nationwide reached the highest level on record in January.

Like the rest of the country, Hawaii has an aging population, and its unemployment rate has been held down in part by retiring baby boomers.

The state also has unique challenges, such as an economy long dominated by tourism. Many of Hawaii's available jobs are in the service sector and don't pay enough to cover the state's high housing costs. And economists say Hawaii's ongoing economic sluggishness could make it harder for the state to pay its public pension obligations in the future, and fund highways and other expensive infrastructure.

U.S. Rep. Colleen Hanabusa, a Democrat, cited the deceptively rosy jobless rate when she launched her campaign challenging a sitting governor from her own party in this year's election.

"We cannot wait as more and more of our young people, discouraged by the future they see for themselves here, leave Hawaii in hopes for better opportunities on the mainland," Hanabusa said in January. A recent poll conducted for the Honolulu Star-Advertiser gave her a 20-percentage point lead over Gov. David Ige in the August primary.

Hanabusa was pointing to a trend reflected in census data: People are moving away from Hawaii even as employers here clamor for workers.

Last year, the state suffered a net loss of more than 1,000 people. On Oahu, home to Honolulu and major military installations like Pearl Harbor, the population declined an average of 11 people per day. The median price of an Oahu home tops \$770,000.

According to the U.S. Census Bureau, 47 percent of Hawaii's residents spend more than a third of their monthly income on rent. That's greater than any other state. About one-quarter of renters put half of their income toward housing.

The personnel squeeze is forcing employers to offer incentives to attract workers.

Maui Divers Jewelry, a retailer in the old whaling town of Lahaina, offers employees extra money to cover the cost of driving to its stores from Maui's bigger cities.

Star of Honolulu Cruises and Events has raised the hourly wage for servers on its boat cruises to \$12 from \$10.

"They can be picky now, I feel like. The ball is in their court," Sheridan Andres, the company's human resources manager, said of job applicants. Star of Honolulu is also advertising for kitchen staff, boat maintenance workers, bus drivers and supervisors.

Hawaii Pacific Health, one of the state's largest health care providers, is pursuing a pilot program to train medical assistants at five public high schools so they'll be ready to walk into jobs when they graduate. The company has 7,000 employees, along with 44 openings for medical assistants and more than 400 openings overall.

The demand for labor is driven by a tourism surge that brought a record 9.4 million visitors to the islands last year. Strong hiring and income gains in the Western U.S. mean more Americans can make the trip. And Japan and Canada, where most of the state's overseas visitors come from, also are experiencing solid growth.

That's led to an increase in low-paying hotel and restaurant jobs, which accounted for 60 percent of Hawaii's job growth in 2017, according to data compiled by Moody's Analytics. Hotels and restaurants employ about one of every five workers in the state, double the proportion in the rest of the U.S.

Adam Kamins, a senior economist at Moody's Analytics, says the state has had little success in luring better-paying tech jobs from western states such as California or Washington, because of high housing and business costs. Tech firms are instead moving to cheaper states such as Utah, Colorado and Idaho.

An economy with an unemployment rate as low as Hawaii's should be growing about 3 percent a year, said Eugene Tian, the state's chief economist. Instead, it's growing at about 1.5 percent.

"We don't have enough housing. We don't have enough trained labor. That's limiting the growth," Tian said. "They are connected."

Paul Brewbaker, an economist with consulting firm TZ Economics, said Hawaii's growth rate has lagged the nation's for the past decade. On average, Hawaii's economy has grown just 1.6 percent per year compared with the national average of 2.1 percent since 2009.

On a per-capita basis, gross domestic product in Hawaii was one-third higher than the national average 40 years ago, Brewbaker said. It's now the same. The trend could have profound consequences for Hawaii in the long term.

"Where do we go from here? If we're on this road, how do we pay for the public employee retirement system? If we're on this road, will we ever be able to build another freeway, not to mention a mass transit system?" Brewbaker said.

<b>HEADLINE</b>	<b>04/04 Indonesia declares emergency in oil spill</b>
<b>SOURCE</b>	<a href="http://time.com/5227209/indonesia-oil-spill-borneo-emergency/?xid=homepage">http://time.com/5227209/indonesia-oil-spill-borneo-emergency/?xid=homepage</a>
<b>GIST</b>	<p>Indonesia declared a state of emergency Tuesday after a deadly oil spill off the coast of the island of Borneo continued to spread, the BBC reports.</p> <p>At least four people were killed and hundreds of local residents say they have experienced health problems since the spill was reported early Saturday near the port city of Balikpapan in Indonesia's East Kalimantan province.</p> <p>The slick, which now covers an area of seven sq. mi., also threatens fishing waters off the tropical island.</p> <p>Authorities managed to extinguish the flames after the oil spill caught fire over the weekend, Agence France-Presse reports.</p> <p>"The fire was quite big, about two kilometers [1.2 miles] high. It can be seen from Balikpapan city and the smell was all over the place," a senior official with East Borneo's search and rescue agency told AFP.</p> <p>The cause of the spill, which occurred near a refinery operated by the state-owned oil and gas company Pertamina, is not yet known. Pertamina has denied responsibility for the disaster, according to the BBC.</p>

<b>HEADLINE</b>	<b>04/03 Skagit Co. 'poop smart' campaign</b>
<b>SOURCE</b>	<a href="http://www.king5.com/article/tech/science/environment/poop-happens-so-skagit-county-wants-you-to-poop-smart/281-534659734">http://www.king5.com/article/tech/science/environment/poop-happens-so-skagit-county-wants-you-to-poop-smart/281-534659734</a>
<b>GIST</b>	Karen DuBose is a modest woman with a humble job in Skagit County government. "I'm the poop finder,"

she says with a laugh.

Karen's job is making your business her business. Karen is in charge of stopping the problem of pollution in Puget Sound that comes from... poop.

It finds its way into Puget Sound in all kinds of ways -- dogs, farms, failing septic systems -- even hikers and fishermen. Excrement routinely contaminates the waters of Samish Bay, making it unsafe for swimming and fishing.

It's a very serious problem that Karen is taking on by tapping into everyone's inner 5-year-old.

"Poop is funny," she says. "We all have an inner 5-year-old who thinks that poop is hilarious."

With that, Skagit County is launching a scatologically-centered public awareness and social media campaign called Poop Smart.

Through cute little cartoons, poopie emojis, and of course a hashtag #PoopSmart, the county is offering tips, tools and financial help to people who need to clean up their act.

"Your dog's poop may not seem like a lot, but there are thousands of dogs in Skagit County," says Karen. "There's a hundred and some thousand people in Skagit county. All those tiny sources add up to a big pollution problem."

Karen hopes bringing a bit of levity and bathroom humor to an otherwise uncomfortable subject will convince people to make a change.

"Poop happens," she says. "Join the movement!"

The site goes on:

"You may think it's much a-doo about nothing, but it may lead to a variety of problems – for your family's health and for the health of our fishing and shellfish harvesting areas. Read on to help prevent a Revenge of the Turds situation," the site reads.

The site contains tips for how to dispose of fecal matter when you're out enjoying the outdoors, if you own a property with a septic system, if you own a small farm with livestock, or if you simply have pets.

<b>HEADLINE</b>	<b>04/03 Bellevue PD probes detective's 'inaction'</b>
<b>SOURCE</b>	<a href="https://www.seattletimes.com/seattle-news/crime/the-officer-still-did-nothing-bellevue-police-investigate-detectives-alleged-inaction-during-hate-crime/">https://www.seattletimes.com/seattle-news/crime/the-officer-still-did-nothing-bellevue-police-investigate-detectives-alleged-inaction-during-hate-crime/</a>
<b>GIST</b>	<p>A veteran Bellevue police detective is the subject of an internal investigation for allegedly walking away and failing to intervene as a white man hurled racial slurs and threatened violence against African-American bus riders at the Bellevue Transit Center in January, according to Bellevue's police chief and King County prosecutors.</p> <p>The man suspected of yelling the threats has been identified as Robert Panera, a 53-year-old transient who has been charged with malicious harassment, the state's hate-crime statute, court records show. A \$25,000 warrant has been issued for his arrest.</p> <p>Charging documents identify the officer as "Det. Lindquist," who was working an off-duty job at a nearby construction site and was approached for help by the alleged victim, a 32-year-old black man.</p> <p>Based on a LinkedIn page and a news account of a 2017 police awards ceremony, it appears the officer in</p>

question is Detective Jim Lindquist, who has been a Bellevue police officer for 31 years.

Bellevue Police Chief Steve Mylett would not confirm the name of the officer, but acknowledged there is an internal investigation involving a member of the police department's detectives bureau.

"All we have right now is an allegation. Until we get to the bottom of it, he'll continue to do his job," Mylett said of the detective.

The investigation into the detective's conduct is still in its early stages, said Mylett, who will eventually receive a recommendation from the detective's chain of command and decide if the officer should be disciplined.

According to charging documents, the alleged victim turned over videos of the incident to police that he recorded on his cellphone, and his account was corroborated by two witnesses.

State law defines malicious harassment — a felony commonly referred to as a hate crime — as intentionally injuring, damaging property or threatening someone because of his or her perception of the victim's race, color, religion, ancestry, national origin, gender, sexual orientation, or mental, physical or sensory handicap.

The incident at the downtown Bellevue Transit Center happened around 2:30 p.m. on Jan. 23.

Panera, the suspect, called 911 to report he was being attacked at the transit center, at 10850 N.E. Sixth St., and three officers responded, charging papers say. They spoke with Panera and an older black man, but the officers "were unable to develop probable cause for a crime that involved the two."

The officers also spoke with Lindquist, the detective, who provided clothing descriptions and pointed out another male who had boarded a bus, the charges say.

According to Mylett and charging papers, Lindquist didn't mention anything to the responding patrol officers about threats or racial slurs. One officer filed an informational report but took no further action, the charges say.

A short time later, the alleged victim called Bellevue police to report the incident and a police captain took his statement, charging papers say.

The alleged victim said he had been waiting for a bus at the transit center and witnessed a disturbance between Panera and the older black man, then saw Panera call 911 and heard him claim to have been attacked, even though Panera had been the aggressor, the charges say.

When the alleged victim confronted Panera about his claim, Panera turned his attention on him. Panera yelled at him, followed him around the transit center and made threats of violence while repeatedly using expletives and racial slurs, the charges say.

The alleged victim "hurriedly walked to the east side of the transit center and contacted a police officer, later identified as Detective Lindquist," and asked him for help, say the charges.

Lindquist, who had been working as a flagger at a nearby construction site, walked over to where the two men were and Panera continued to yell slurs "at persons of color even though Lindquist was present," the victim later said, according to the charges.

At one point, the alleged victim was so afraid of Panera that he hid behind Lindquist as Panera yelled and lunged at him before Panera abruptly walked away, say the charges. According to the charges, the alleged victim "felt so unsafe that he boarded the first available bus" and called 911 from home.

One witness told police Panera walked down a line of people waiting for a bus and "singled out each

	<p>African American, pointed at them” and yelled racial slurs, the statement says.</p> <p>She told police the last rider to be accosted was the alleged victim, who sought help from an officer. But the officer said something to the effect of, “This happens all the time” before walking away, the charges say.</p> <p>A second woman also told police the officer “did nothing” and looked bored or exasperated during the incident, according to charging papers.</p> <p>She “felt duty-bound to inform the officer that he had witnessed a hate crime under state law,” the charges say. “The officer still did nothing.”</p> <p>When the alleged victim asked for the officer’s name and badge number, the “officer turned, walked away and muttered something indistinguishable,” the witness said, according to the charges.</p> <p>The captain and two other officers involved in the investigation agreed Panera threatened the alleged victim due to Panera’s perception of the man’s race, and that the alleged victim feared for his safety and believed Panera intended to harm him, the charges say.</p>

<b>HEADLINE</b>	<b>04/03 SEA facility: costs up, behind schedule</b>
<b>SOURCE</b>	<a href="https://www.seattletimes.com/business/boeing-aerospace/sea-tacs-new-international-facility-is-running-over-budget-and-behind-schedule/">https://www.seattletimes.com/business/boeing-aerospace/sea-tacs-new-international-facility-is-running-over-budget-and-behind-schedule/</a>
<b>GIST</b>	<p>The expected cost of the new International Arrivals Facility at Seattle-Tacoma International Airport has swelled since last August by a further \$40 million and now stands at \$830 million, or 21 percent higher than originally estimated, according to a memo prepared by the Port of Seattle.</p> <p>In addition, officials announced at a Port Commissioners meeting this past week that the project is running five months late and is now not expected to open until February 2020.</p> <p>The original adjusted estimate of the project’s cost was \$684 million. According to a list of the added costs in the Port’s memo, the largest budget-busting items — \$86 million out of the total \$146 million overrun — were attributed to contractor Clark Construction initially underestimating its design costs, failing to design to the adjusted budget and misjudging airport building-code requirements.</p> <p>Ralph Graves, the Port’s senior director for Capital Development, told the commissioners that Clark consistently fell short in performance reviews for more than two years.</p> <p>David Brush, the Port’s IAF program leader, told Bowman that “we did raise holy hell with the senior managers” at Clark.</p> <p>Clark representatives did not attend the meeting and could not be reached for comment late Tuesday.</p> <p>When Port officials presented a memo on the cost increase and delay at the meeting this past week, Commissioners Peter Steinbrueck and Stephanie Bowman expressed their concern.</p> <p>“The budget and time schedule have been moving and shifting quite dramatically,” Steinbrueck said. “It’s a moving target.”</p> <p>And Bowman called out last year’s commission president, Tom Albro — “our point person on the IAF” — for lack of oversight. Albro is no longer on the commission.</p> <p>“We’re going to be digging deep into this and expecting a lot more information, much more than has been requested over the last year,” Bowman told the port officials. “Expect to be here frequently.”</p>

The new International Arrivals Facility (IAF) — a 450,000-square-foot add-on to the current Concourse A in the main terminal building — will double peak international arrival capacity to 2,600 passengers per hour, according to the Port.

Arriving international passengers will walk along a new 900-foot-long aerial walkway, 85 feet above the existing airplane taxiway, from the south satellite over the top of Concourse A to the IAF.

Some 80 percent of the cost of the IAF will come from the federal fees of \$4.50 per ticket that are tacked onto every passenger's ticket at all U.S. airports. The remainder of the IAF budget is covered by the Port using funds such as fees levied from the parking garage, airport concessions and taxis, Port spokesman Perry Cooper said.

In 2015, the original estimated cost of the IAF was just \$608 million, though later some additions to the plan later bumped it up to \$684 million.

In January 2016, the Port authorized Clark Construction to begin design work.

By mid-2017, according to the staff memo, Clark's design had exceeded the target budget by approximately \$100 million. And that August, when construction commenced, hazardous polychlorinated biphenyls (PCBs) were discovered on the construction site that required \$4 million in remediation and caused three months of delay.

The increased cost of building materials and labor in the frenzied Seattle construction market also added some \$14 million to the project's cost.

Finally, in late 2017, when the design was nearing completion, certain project specifications were changed late in the process, which caused additional costs and further delay.

A final "guaranteed maximum price" still has not been determined, the staff memo states, while forecasting the new ceiling of \$830 million.

As for the delay, the Port staff project team and Clark are "exploring measures that could accelerate the remaining work in order to deliver it as close as possible to the original September 2019 date."

However, the memo warns that "such acceleration would further increase costs."

<b>HEADLINE</b>	<b>04/03 Police investigate livestream shootings</b>
<b>SOURCE</b>	<a href="https://abcnews.go.com/Technology/wireStory/teens-shooting-death-detroit-livestreamed-instagram-54202190?">https://abcnews.go.com/Technology/wireStory/teens-shooting-death-detroit-livestreamed-instagram-54202190?</a>
<b>GIST</b>	<p>Police are investigating accidental shootings in Detroit and Houston that were livestreamed on social media and that left a teenager dead and a man on life support.</p> <p>Detroit police say two 18-year-olds were live on Instagram Saturday night showing money and a gun when one of them shot the other in the back of the head, killing him. Police say the teen who fired the gun told investigators he accidentally put his finger on the trigger and that the rifle discharged. He was taken into custody.</p> <p>The victim died before paramedics arrived at the home, which is on Detroit's northwest side.</p> <p>Police haven't released the names of the shooter or the victim.</p> <p>In Houston, a 25-year-old woman shot a male acquaintance early Sunday while waving a handgun inside</p>

	<p>of a parked car. The shooting, which police are treating as accidental, was streamed on Facebook live.</p> <p>The victim, identified by family members as Devyn Holmes, was sitting in the car when he was hit. He was hospitalized but is brain dead and on life support, authorities said.</p> <p>In the video, Cassandra Damper can be seen waving the handgun while Holmes tells her, "Hey man, you're making me nervous."</p> <p>An unidentified third person in the vehicle, a man, is heard saying, "She got no clip bud," a reference to the lack of an ammunition clip in the gun. But seconds later, the gun fires, hitting Holmes on the side of his head. A gun without an ammunition clip can still fire if there was a bullet in the gun's chamber, though police are still investigating and haven't said that was the case in Holmes' shooting.</p> <p>Damper has been charged with tampering/fabricating evidence. Authorities say she tried to wipe off any gunshot residue she might have had on her hands.</p>

<b>HEADLINE</b>	<b>04/03 European grid fixes clock-slowng lag</b>
<b>SOURCE</b>	<a href="https://abcnews.go.com/Technology/wireStory/spring-forward-european-grid-fixes-lag-slowed-clocks-54198904?">https://abcnews.go.com/Technology/wireStory/spring-forward-european-grid-fixes-lag-slowed-clocks-54198904?</a>
<b>GIST</b>	<p>One excuse fewer for being late: electricity grid operators in Europe have fixed a glitch that had slowed down countless clocks across the continent for months.</p> <p>The problem started earlier this year after a dispute between Serbia and Kosovo resulted in energy being diverted from the local grid. That triggered a domino effect , reducing the electric frequency across the 25-country network that stretches from Portugal to Poland, and Greece to Germany.</p> <p>Because many radio alarms, oven clocks and devices used to program heating systems keep time with the help of the grid frequency, they were slowed down by several minutes since January.</p> <p>The European Network of Transmission System Operators for Electricity said Tuesday that its members added energy into the system over the course of March to bring the frequency back to its target average of 50 Hertz.</p> <p>"One of the effects is notably that the digital clocks geared by electric frequency are now back on time," said spokeswoman Claire Camus.</p>

<b>HEADLINE</b>	<b>04/03 Study: 36% college students lack food</b>
<b>SOURCE</b>	<a href="https://www.upi.com/Top_News/US/2018/04/03/Study-36-percent-of-college-students-lack-food-secure-housing/7971522778275/?utm_source=fp&amp;utm_campaign=ts tn us&amp;utm_medium=2">https://www.upi.com/Top_News/US/2018/04/03/Study-36-percent-of-college-students-lack-food-secure-housing/7971522778275/?utm_source=fp&amp;utm_campaign=ts tn us&amp;utm_medium=2</a>
<b>GIST</b>	<p>April 3 (UPI) -- More than one-third of U.S. university students do not have enough to eat and lack a secure home, according to a new survey Tuesday by researchers at Temple University and the Wisconsin HOPE Lab.</p> <p>The survey focused on 43,000 students at 66 institutions in 20 states and Washington, D.C. Included in the survey are students from 4-year universities and community colleges during 30 days preceding the survey.</p> <p>The findings show the basic needs -- food and housing -- of 36 percent of university students are not being met. Numbers among community college students are higher, with 42 percent lacking food and 46 lacking housing.</p>

	<p>The research also found 9 percent of university students and 12 percent of community college students were homeless at one point during the last year.</p> <p>Rates of food and housing insecurity were higher among students who worked longer hours, the report said.</p> <p>Researchers blame increased college costs, insufficient aid packages and more low-income students enrolling in college, who often find campus grants do not cover all their expenses.</p> <p>The report also found other disparities. For example, more than 60 percent of former foster youth were both food and housing insecure, and 24 percent had experienced homelessness during the last year.</p> <p>Students who identify themselves as non-binary, homosexual or bisexual were over-represented among students who lacked food or housing security.</p> <p>The report also found African-American and Native American students were much more likely than non-Hispanic white or Asian students to experience trouble.</p> <p>To help with the growing problem, student-led food drives have been created, many of which are part of the College and University Food Bank Alliance. The National Student Campaign Against Hunger and Homelessness and the Student Government Resource Center also are focusing on student hunger, and offer toolkits and support in partnership with CUFBA.</p>

<b>HEADLINE</b>	<b>04/03 Thrill-seekers hiding 24hrs in stores</b>
<b>SOURCE</b>	<a href="https://www.wsj.com/articles/wheres-your-teen-sleeping-check-chuck-e-cheese-then-walmart-1522769632">https://www.wsj.com/articles/wheres-your-teen-sleeping-check-chuck-e-cheese-then-walmart-1522769632</a>
<b>GIST</b>	<p>Have you ever wanted to camp overnight in a big-box store or fast-food restaurant, hiding out among the shelves and perhaps using rolls of paper towels as pillows? Didn't think so.</p> <p>Apparently short of actual adventures, teens and 20-somethings are sneaking into chain stores and restaurants, including McDonald's, Walmart, Chuck E. Cheese's and IKEA, staying all night and posting videos online as evidence. A YouTube search for 24-hour overnight challenges turns up 1.6 million results.</p> <p>A closer examination of the phenomenon reveals something thrill-seekers didn't expect—spending extended periods inside an empty chain store can be really, really dull.</p> <p>Michael Manfre, who is 19, said he and his friends have done several overnight challenges since late 2016. For one, they stayed all night in a McDonald's on the Jersey Shore, figuring it would be a blast to have the place to themselves. As employees closed up for the night, the friends hid in the colorful crawling tubes in the indoor playground.</p> <p>"It looked weird to have older kids hanging out in the play area," he said "but we pulled it off."</p> <p>After the initial thrill of escaping detection, they passed the time by going down the small slide, flipping water bottles and filming themselves whispering in the dark. They tried to sleep—Mr. Manfre in a toy car.</p> <p>"It was very uncomfortable," he said. "We tried to make the best of it."</p> <p>Young people boast of holding the overnight challenges in trampoline parks, bowling alleys, home improvement stores and supermarkets, too. Companies mostly seem perplexed.</p> <p>"We appreciate that people are interested in IKEA and want to create fun experiences with us," said a U.S.</p>

spokeswoman for Inter IKEA Systems BV. “We cannot guarantee safety in our stores after closing hours and that’s why we do not allow this kind of activity.” McDonald’s declined to comment.

A Walmart Inc. spokesman said the company has been “dealing with this” for more than a year, with the teens “mainly hiding out in the toilet paper section, trying to meet their challenge.”

If spotted, they are asked to leave, he said. “We’re familiar with the incidents and obviously don’t condone the behavior.”

The craze appears to go back to 2016, when Belgian youngsters hid inside an IKEA after it closed and then posted the video online. The fad soon spread to the U.K., where a boy slept overnight in an IKEA furniture store, worrying his family, who didn’t know where he was.

South Yorkshire Police flagged the phenomenon in a February Facebook post, warning about a “recent increase in young people sharing and taking part in the latest internet trend known as the “24 hour challenge.” The goal, they reported, was “to hide and build forts in large stores and warehouses overnight, before sneaking out the next morning.”

Mr. Manfre, who passed the uneventful night at the New Jersey McDonald’s, said a separate attempted sleepover at a Walmart proved more thrilling when an employee discovered his fort, which he made out of packages of toilet paper. The employee lightly “punched the fort” and Mr. Manfre was told to leave, he says.

“A lot of these places are definitely locking down now,” he added, “because it’s such a viral trend.”

A spokeswoman for Chuck E. Cheese’s, another target for the overnight challenges, suggested the pranks are inside jobs—with the culprits getting assistance from friends who work at the pizza restaurants.

“Some of our cast members may have gotten in trouble for helping,” said spokeswoman Christelle Dupont. “We had our audit team look at the footage.”

The footage showed it’s not all that much fun for teens to spend endless hours in a pizza parlor designed for small children.

The security film that caught one incident at Chuck E. Cheese’s last year, Ms. Dupont said, showed that the thrill-seekers arrived at the end of the night, played some games and shot some video—and then slipped out before the doors were locked.

“They were not spending 24 hours in our location,” she said, though the video they posted online made it look as though they had.

<b>HEADLINE</b>	<b>04/03 ‘Nightmare’ antibiotic resistant bacteria</b>
<b>SOURCE</b>	<a href="https://www.cnn.com/2018/04/03/health/nightmare-bacteria-cdc-vital-signs/index.html">https://www.cnn.com/2018/04/03/health/nightmare-bacteria-cdc-vital-signs/index.html</a>
<b>GIST</b>	<p>(CNN)More than 200 rare antibiotic-resistant genes were found in "nightmare" bacteria tested in 2017, according to a Vital Signs report released Tuesday by the US Centers for Disease Control and Prevention.</p> <p>"I was surprised by the numbers we found," said Dr. Anne Schuchat, principal deputy director of the CDC. The report focused on the new and highly resistant germs that have yet to spread widely. Still, a variety of resistant germs can be found in every state.</p> <p>"Two million Americans get infections from antibiotic resistance, and 23,000 die from those infections each year," Schuchat said.</p>

Testing 5,776 isolates of antibiotic-resistant germs from hospitals and nursing homes, the CDC found that about one in four had a gene that helped spread its resistance, while 221 contained an "especially rare resistance gene," she said.

During followup screening, nearly one in every 10 contacts also tested positive, "meaning the unusual resistance had spread to other patients and could have continued spreading if left undetected," Schuchat said. It is unknown how frequently "asymptomatic carriers" spread the disease to uninfected people, she noted.

"This wasn't just a problem in one or two states," Schuchat said, adding that the 221 rare genes were found in isolates gathered in 27 states from infection samples that included pneumonia, bloodstream infections and urinary tract infections.

Because this was the first year of testing for rare genes, the CDC does not have trend data, she said, but she hopes this won't be the "beginning of an inevitable march upwards."

The new report highlights the work of the CDC's Antibiotic Resistance Laboratory Network, formed in 2016 to help detect antibiotic resistance in health care, food and the community.

In 1988, health officials in the United States learned that some germs within one family of bacteria, Enterobacteriaceae, could produce an enzyme capable of breaking down common antibiotics. By 2001, the germs had begun to evolve, becoming more resistant to carbapenems and other antibiotic drugs. These carbapenem-resistant Enterobacteriaceae, or CRE -- dubbed "nightmare bacteria" by the CDC -- spread rapidly in the US and around the globe.

Today, the CDC promotes an aggressive "containment strategy" that includes rapid detection tests and screening for reducing the spread of antibiotic resistance.

"CDC estimates show that even if only 20% effective, the containment strategy can reduce the number of nightmare bacteria cases by 76% over three years in one area," Schuchat said.

<b>HEADLINE</b>	<b>04/03 Mystery continues SUV Calif. cliff crash</b>
<b>SOURCE</b>	<a href="https://www.cnn.com/2018/04/03/us/family-suv-pacific-coast-crash-search-warrant-affidavit/index.html">https://www.cnn.com/2018/04/03/us/family-suv-pacific-coast-crash-search-warrant-affidavit/index.html</a>
<b>GIST</b>	<p>(CNN)As the search continued Tuesday for three siblings and questions mounted over how the rest of their family ended up dead at the bottom of a California cliff, investigators hope a laptop and iPad yield clues, an affidavit shows.</p> <p>Police seized the devices from the Woodland, Washington, home of Jennifer and Sarah Hart, on Thursday, according to court documents related to the search warrant.</p> <p>In the affidavit requesting the search warrant, a Clark County, Washington, sheriff's deputy says he is seeking evidence that will shed light on what happened to the family. That evidence could include travel itineraries, bank records, phone records, credit card receipts, hotel receipts or "handwritten or typed journals or notes related to travel, care for the children and or suicide note/s."</p> <p>It adds that the California Highway Patrol's investigators believe "a felony has been committed."</p> <p>The bodies of the mothers, both 38, were discovered inside their overturned SUV near a remote stretch of Highway 1 in Northern California on March 26. Jennifer Hart was in the driver's seat, according to the search warrant affidavit.</p> <p>Emergency responders found the bodies of three of their six adopted children -- Markis, 19, and Jeremiah and Abigail, both 14 -- outside the car, which landed upside down on the rocky shoreline below the cliff. Evidence from the scene and data retrieved from the car has led investigators to believe Jennifer Hart may have intentionally drove the SUV off the cliff.</p> <p>Their other children -- Hannah, 16, Devonte, 15, and Sierra, 12 -- are missing. Nobody reported seeing the crash.</p> <p>Though a police news release says the California Highway Patrol and Mendocino County Sheriff's Office are continuing an "active search" for the missing children, the search warrant affidavit says they, too, may have been in the SUV.</p> <p>The kids "have not been located and it is feared that they may have also been involved in the collision and presumed deceased," the affidavit says.</p>

<b>HEADLINE</b>	<b>04/03 Sanctions busting scheme aided Iran</b>
<b>SOURCE</b>	<a href="https://www.washingtonpost.com/world/national-security/billion-dollar-sanctions-busting-scheme-aided-iran-documents-show/2018/04/03/37be988a-3356-11e8-94fa-32d48460b955_story.html?utm_term=.dc04d97c49ec">https://www.washingtonpost.com/world/national-security/billion-dollar-sanctions-busting-scheme-aided-iran-documents-show/2018/04/03/37be988a-3356-11e8-94fa-32d48460b955_story.html?utm_term=.dc04d97c49ec</a>
<b>GIST</b>	<p>MANAMA, Bahrain — Investigators have uncovered evidence of a multibillion-dollar corruption scheme by a Persian Gulf bank that secretly helped Iran evade sanctions for more than a decade, according to documents filed in a legal dispute.</p> <p>Records from a Bahraini government audit reveal that the now-closed Future Bank — a joint venture partly owned by two of Iran's largest lenders — routinely altered financial documents to mask illicit trade</p>

between Iran and dozens of foreign partners, the documents show.

The bank allegedly concealed at least \$7 billion of transactions between 2004 and 2015, a time when many Iranian banks were barred by sanctions from accessing international financial markets, the records show.

Auditors also discovered hundreds of bank accounts tied to individuals convicted of crimes including money laundering and terrorism financing, as well as phantom loans provided to companies that operate as fronts for Iran's Islamic Revolutionary Guard Corps, according to confidential court filings obtained by The Washington Post.

Bahraini officials likened the bank to a Trojan horse operating inside the tiny Persian Gulf country, allowing Iran to buy and sell billions' worth of goods in defiance of international sanctions intended to punish Tehran over its nuclear program and support for terrorist groups.

Bahrain, in the papers submitted in February before an international arbitration court in the Netherlands, accused Future Bank officials of a "vast range of illicit conduct" with numerous foreign partners, adding that the activities uncovered so far are probably only the "tip of the iceberg" because many transactions appear to have been cleverly concealed.

"Bahrain has never faced violations of this magnitude," the kingdom asserted in a written summation to the Permanent Court of Arbitration in The Hague. "The ramifications rising from Future Bank's systemic malfeasance cannot be overestimated."

Neither Future Bank nor Iran's mission at the United Nations responded to written requests for comment.

Future Bank, established in 2004 as a joint venture between Bahrain's Ahli United Bank and Iran's Bank Mellī and Bank Saderat, had previously been accused of helping Iran skirt trade restrictions, allegations that led U.S. and European officials to blacklist the bank and ban it from using the international electronic payment messaging system known as SWIFT. Ahli Bank placed its shares of Future Bank's stock in a blind trust in 2008.

The new accusations stem from an intensive investigation that began after Bahraini regulators formally closed the bank in 2015. The closure prompted Future Bank's two Iranian shareholders to file a complaint in The Hague accusing Bahrain of improperly shutting down the bank and demanding the return of frozen assets.

In response, Bahrain submitted hundreds of pages of audit findings that paint a portrait of a financial institution that operated mainly with "the aim of concealment," the documents state, giving Iranian companies secret access to the foreign markets and the international monetary system.

The audit "revealed crimes and violations of Bahraini and international law of massive proportions," Bahraini Foreign Minister Khalid bin Ahmed al-Khalifa said in a written statement to The Post. He said that criminal proceedings were underway in Bahrain and that the results of the investigation were being shared with other capitals, because they will "also be of concern to the international community."

Among the practices cited in the report was a systematic use of "wire-stripping," the deliberate removal or changing of identifying information when transferring money between banks. Auditors said they discovered more than 4,500 instances of wire-stripping by bank officials to conceal Iran's role as the sender or recipient of funds.

The amount of money known to have changed hands in those transactions totals \$4.7 billion, but the true sum is likely to be far greater, Bahraini officials say. Some transactions appear to have been subjected to multiple instances of wire-stripping at different banks, one Bahraini official said, "like layers of an onion, with the originator deeply concealed."

In hundreds of cases, bank transfers were accompanied by specific instructions to avoid references to Iran

or Iranian banking codes.

“Do not mention [sic] our bank name, BIC code ref. no., in any message routed through U.S.A. and do not route through New York,” Future Bank officials were instructed in one message from Iran’s Bank Melli.

Other banks, including some in the West, have famously engaged in wire-stripping to conceal payments to countries under international sanctions. In 2010, the Obama administration slapped a \$298 million fine on the British banking giant Barclays for using wire-stripping to hide \$500 million of financial transactions with Iran.

In addition to the amount accounted for by wire-stripping, the Bahraini bank concealed \$2.7 billion in Iranian transactions using an informal alternative to the SWIFT system that is difficult to trace, documents show. The audit also identified thousands of transactions that directly violated international sanctions against Iran, as well as more than 10,000 infractions of Bahraini banking and money-laundering laws, government officials allege. Among the violations cited were 260 instances in which the bank opened accounts for individuals convicted of financial crimes such as money laundering and supporting terrorist causes.

According to former U.S. officials familiar with the case, the findings are troubling because they suggest ongoing deceptive behavior by banking officials at a time when Future Bank was under intense scrutiny by U.S. and Bahraini government agencies.

“If you’re engaging in wire-stripping, you’re hiding the nature of transactions from regulators, and possibly even from the bank itself,” said Matthew Levitt, a former Treasury Department counterterrorism official and director of the Stein Program on Counterterrorism and Intelligence at the Washington Institute for Near East Policy. “It becomes difficult to know what funds might be going to support activities such as terrorism, or Iran’s nuclear or military establishment.”

Future Bank’s founding as an Iranian-Bahraini venture in 2004 occurred when Bahraini leaders were seeking to mend strained relations between the tiny gulf kingdom and Iran, its vastly larger neighbor to the north. Bahrain’s majority-Shiite population has close cultural and religious ties to Iran, but the kingdom’s Sunni ruling family has closely aligned itself with the Saudi-based Gulf Cooperation Council.

The two Iranian shareholders, Bank Melli and Bank Saderat, have been accused by U.S. officials of helping finance Iran’s nuclear program and what they say is its international terrorism network.

Since 2011, the Bahraini government has struggled to contain a Shiite resistance movement that includes peaceful dissenters as well as violent extremists armed with weapons that independent investigators have traced to Iran. Bahrain has repeatedly accused Iran of fomenting violence against the country’s monarchy, but its actions to stifle opposition groups have led to international criticism over alleged human rights violations.

One of the more controversial allegations in the Future Bank case involves a Shiite cleric with close ties to opposition movements. Bahraini officials criticized Future Bank for allowing the cleric, Isa Qassim, to make cash deposits totaling millions of dollars over several years, and directing some of the money to a charity Bahraini officials have linked to terrorism. U.S. investigators say much of Qassim’s cash appears to consist of tithes and alms collected from worshipers under a Shiite tradition known as khums.

“This is a politically sensitive area, and it is difficult to find hard proof of terrorist financing,” said one former U.S. official familiar with the investigation. “We share the concern over the fact that it involves millions of dollars being moved around in a way that is not at all transparent.”

**HEADLINE** 04/02 San Diego Co. fights elder abuse

SOURCE	<a href="https://www.usnews.com/news/healthiest-communities/articles/2018-04-02/elder-abuse-rises-in-san-diego-county">https://www.usnews.com/news/healthiest-communities/articles/2018-04-02/elder-abuse-rises-in-san-diego-county</a>
GIST	<p>SAN DIEGO — TERRIFIC weather, welcoming beaches and a famous zoo have earned San Diego a reputation for family fun.</p> <p>It's also among the safest big cities in the country, crows San Diego County District Attorney Summer Stephan, with its crime rate at a 49-year low and its homicide rate at its lowest ever. And San Diego County's above-average score in public safety – based on homicide and crime rates, deadly vehicle crashes and other data from recent years – helped it crack U.S. News' ranking of America's top 500 Healthiest Communities, a project that assessed some 3,000 communities across the U.S. on a range of factors tied to residents' overall health.</p> <p>In March, however, Stephan's office launched a new initiative to go after a scourge of elder abuse – a category of illicit activity that includes physical assault and financial crime, and is often perpetrated by caretakers and even the victims' children. It's been on the increase in San Diego County, which encompasses the city of San Diego and is home to some 3 million people, and is bound to become more of a national problem as the baby boomer generation ages.</p> <p>In the last five years, Stephan says, the county has seen a 37 percent rise in crimes against seniors. Her office in response has compiled a "blueprint" designed to better protect seniors – defined in the document as those 65 and older – and, when necessary, prosecute their abusers more effectively.</p> <p>The effort also focuses on dependent adults, or those younger than 65 who may have restrictive physical or mental limitations. Stephan believes it ultimately will prove valuable nationwide, since across the country at least \$2.9 billion is believed to be stolen from seniors annually, according to a 2011 report.</p> <p>While the blueprint is the first document of its kind produced by the county, Stephan says it wouldn't have been possible without many years of focus on crimes against the elderly and other vulnerable populations – such as children and victims of human trafficking – in which an "integrated and wide-ranging system" is needed to promote public safety. The district attorney's office established an elder abuse unit in 1996, and the county reportedly sees approximately 9,000 cases of elder and dependent adult abuse each year.</p> <p>Stephan says the blueprint aspires to broaden understanding of how to better recognize and investigate abusive situations, given that victims of elder abuse often suffer from dementia and can be too ashamed of getting duped to talk about what happened with authorities.</p> <p>And one reason elder abuse can be so pervasive is that police aren't necessarily trained in how best to address these kinds of crime. "A lot of police officers don't investigate these cases," says Paul Greenwood, a San Diego County deputy district attorney who built the elder abuse unit and prosecuted such cases for more than 20 years before retiring in March.</p> <p>Police may assume, for example, that an 87-year-old with dementia isn't capable of being a credible witness in court.</p> <p>"When there's an allegation of financial exploitation ... cops will say, 'That's a civil matter, we're not going to deal with that,'" Greenwood says. The blueprint offers recommendations for interviewing victims with Alzheimer's disease or otherwise diminished mental capacity, such as documenting nonverbal reactions and trying to conduct interviews in the morning, when dementia patients are less likely to "sundown," or become more confused.</p> <p>The document also provides a recommended list of questions for victims of financial abuse, as well as victims of physical abuse or neglect. The idea is to help make victims more comfortable speaking up, but also to help investigators recognize common forms of elder abuse.</p> <p>In addition to prosecutors, police and other traditional law enforcement personnel, Stephan adds that protecting older people from abuse can mean coordinating with social services organizations, health care</p>

	<p>providers and even bank tellers and notary publics.</p> <p>"People are signing off [on] homes without anyone checking as to whether they really are in their right minds," she says.</p> <p>Since police can't be everywhere, Stephan says a crucial element of preventing financial abuse is to help bank tellers recognize when a customer is withdrawing more money than usual, or if someone seems to be monitoring him or her.</p> <p>"The oldest trick in the book is to tell a senior that they need to withdraw this money because they actually owe a very large electric bill, and if they don't get the money out immediately to be given, their lights are going to be turned off," she says. "We need that clerk to be the eyes and ears, to be the upstander instead of the bystander."</p> <p>Stephan says in 2016, the county also saw 780 incidents of violent crimes against seniors. "Those are violent incidents of homicide, sexual assault, physical assault on seniors, forms of torture of our seniors – so that's the part that just breaks your heart to see that," she says.</p> <p>These types of crimes include the occasional random attack, but it's much more common for seniors to be victimized by people they trust, including their caretakers and children.</p> <p>"Many times we've seen, sadly, that the abuser is an older son of a female widow," Stephan says. "That son is addicted to drugs. The most common is methamphetamine because it causes violent tendencies, and that son is taking care of the mother, but it also turns into huge abuse."</p> <p>Elderly abuse schemes can be more elaborate as well.</p> <p>In July, a couple in the wealthy San Diego County community of Fairbanks Ranch pleaded guilty to three counts of elderly financial abuse and one of grand theft. William Phillips and his wife Lisa Sidney swindled about \$2.5 million from at least a dozen seniors, convincing them to invest their savings in nearly worthless gemstones.</p> <p>Phillips won victims over with his charm and persistence on the phone. Greenwood says his office has recovered about \$1.1 million for them, but hundreds of thousands of dollars remains missing.</p> <p>After pleading guilty, Phillips has begun to serve a four-year prison sentence. Greenwood says Sidney will have to serve a 365-day sentence after he is released.</p> <p>In the meantime, she's been taking care of her elderly mother.</p>

<b>HEADLINE</b>	<b>04/03 Miss. private prison: bad things happen</b>
<b>SOURCE</b>	<a href="https://www.nytimes.com/2018/04/03/us/mississippi-private-prison-abuse.html?hp&amp;action=click&amp;pgtype=Homepage&amp;clickSource=story-heading&amp;module=first-column-region&amp;region=top-news&amp;WT.nav=top-news">https://www.nytimes.com/2018/04/03/us/mississippi-private-prison-abuse.html?hp&amp;action=click&amp;pgtype=Homepage&amp;clickSource=story-heading&amp;module=first-column-region&amp;region=top-news&amp;WT.nav=top-news</a>
<b>GIST</b>	<p>JACKSON, Miss. — On the witness stand and under pressure, Frank Shaw, the warden of the East Mississippi Correctional Facility, could not guarantee that the prison was capable of performing its most basic function.</p> <p>Asked if the guards were supposed to keep inmates in their cells, he said, wearily, “They do their best.”</p> <p>According to evidence and testimony at a federal civil rights trial, far worse things were happening at the prison than inmates strolling around during a lockdown: A mentally ill man on suicide watch hanged himself, gang members were allowed to beat other prisoners, and those whose cries for medical attention</p>

were ignored resorted to setting fires in their cells.

So many shackled men have recounted instances of extraordinary violence and neglect in the prison that the judge has complained of exhaustion.

The case, which has received little attention beyond the local news media, provides a rare glimpse into the cloistered world of privately operated prisons, at a time when the number of state inmates in private facilities is increasing and the Trump administration has indicated that it will expand their use.

Management & Training Corporation, the private company that runs the East Mississippi facility near Meridian in Lauderdale County, already operates two federal prisons and more than 20 facilities around the nation.

The use of private prisons has long been contentious. A 2016 Justice Department report found that they were more violent than government-run institutions for inmates and guards alike, and the Obama administration sought to phase out their use on the federal level. Early last year, President Trump's attorney general, Jeff Sessions, reversed the ban.

Several states, including Michigan and Utah, have stopped using private prisons in recent years because of security problems.

But more than two dozen other states, including Mississippi, contract with privately managed prison companies as a way to reduce costs. Prisons are usually among the most expensive budget items for states.

Since 2000, the number of people housed in privately operated prisons in the nation has increased by 45 percent, while the total number of prisoners has risen by only about 10 percent, according to an analysis by the Sentencing Project.

The genesis of the problems at East Mississippi, according to prisoner advocates, is that the state requires private prisons to operate at 10 percent lower cost than state-run facilities. Even at its state-run institutions, Mississippi spends significantly less on prisoners than most states, a fact that state officials once boasted about.

The federal civil rights lawsuit, filed against the state by the American Civil Liberties Union and the Southern Poverty Law Center after years of complaints from inmates, seeks to force wholesale changes at the prison.

Testimony has described dangerous conditions, confused lines of oversight and difficulty in attracting and retaining qualified staff.

Security staff at East Mississippi earn even less than the \$12-an-hour starting wage made by their public service counterparts, and private prison guards receive only three weeks of training — less than half the training time required of state prison guards.

The state's contract with Management & Training Corporation is particularly economical. Mississippi pays the company just \$26 a day — or about \$9,500 a year — for each minimum-security inmate. That is far less than the \$15,000 a year neighboring Alabama spends per inmate, and only 13 percent of what New York, which spends more than any other state, pays per inmate.

Called as an expert witness for the Mississippi inmates, Eldon Vail, the former state prisons chief in Washington State, told the court that the focus on cutting costs had sent East Mississippi into a downward spiral.

“There are not a sufficient number of correctional officers, and most of their problems stem from that issue,” he said.

Mr. Vail said that with too few guards to maintain order, inmates felt compelled to protect themselves with crudely made knives and other weapons, prompting a chain of retaliatory violence. And having too few doctors and nurses meant that inmates with mental illnesses were also more likely to act out violently.

Lawyers for the state and representatives of Management & Training say prisons are meant to be tough environments, and that East Mississippi is no worse than most others.

“We can say — unequivocally — that the facility is safe, secure, clean, and well run,” Issa Arnita, a spokesman for the company, said in a statement released during the trial. “From the warden on down, our staff are trained to treat the men in our care with dignity and respect. Our mission is to help these men make choices in prison and after they’re released that will lead to a new and successful life in society.”

Trial testimony has presented a radically different picture.

Mr. Shaw, the warden — who works for Management & Training, not for the state — receives incentives for staying within budget, but is not penalized when inmates die under questionable circumstances or when fires damage the prison. Four prisoners have died this year.

The warden said that he had been unaware of cases in which inmates had been so badly beaten that they required hospitalization, and that he had not disciplined guards who failed to ensure that inmates were unable to jam door locks and leave their cells.

When Mr. Shaw was asked about the variety of homemade objects used to commit assaults at the prison, he was dismissive. “Inmates have weapons,” he said. “It’s a fact of life.”

Mr. Shaw had previously been warden at an Arizona prison operated by Management & Training, where there was a riot in 2015. A scathing state report determined the riot was sparked by Management & Training’s “culture of disorganization, disengagement and disregard” of “policies and fundamental inmate management and security principles.”

At East Mississippi, the prison designated by the state to hold mentally ill inmates, there was a glaring lack of oversight of inmate care, according to testimony. Four out of five inmates in the prison receive psychiatric medication, but the facility has not had a psychiatrist since November.

The state prison mental health director is not a medical doctor, but a marriage and family therapist. And Gloria Perry, who became the prison system’s chief medical officer in 2008, said that she had never been to the East Mississippi prison.

Pelicia E. Hall, the commissioner of the state prison system, testified that she may have been unaware of many problems at the facility because she did not read weekly performance reports from the state’s own monitor.

In the courtroom, the reports were delivered in person: An inmate testified in tears that a female guard had mocked him when he tried to report being raped in a cell in January. The guard never informed her superiors about the rape.

In an unrelated assault, surveillance video showed an inmate being beaten by other prisoners for 14 minutes before guards arrived.

Neither the state nor the private prison company has contested the accuracy of the prisoners’ accounts heard in court, although lawyers for the state say the stories should be treated with skepticism.

**HEADLINE** 04/03 Ferry riders help police catch suspect

**SOURCE** <http://mynorthwest.com/945885/fellow-ferry-riders-help-police-in-fatal-hit-and-run-case/>

<b>GIST</b>	<p>PORT ORCHARD, Wash. (AP) — Charging documents say a Washington state man accused in a fatal hit and run near Port Orchard is known by fellow ferry commuters to be an erratic driver.</p> <p>The Kitsap Sun reports that 33-year-old Dominic Landric Dixon was charged on Tuesday with felony hit and run for the March 22 crash that killed 34-year-old Katherine Phillips as she attempted to pour gas into a car stalled on Sedgwick Road.</p> <p>A Southworth ferry commuter told investigators the day after the crash that she saw a gold Chevrolet Impala drive over the road flares while other cars were avoiding them. She said she recognized the car as belong to a fellow ferry commuter — Dixon.</p> <p>Another commuter contacted investigators the day of the crash and told them about an Impala he had observed several times driving erratically.</p>

<b>HEADLINE</b>	<b>04/03 Pierce Co. record pace murders</b>
<b>SOURCE</b>	<a href="http://mynorthwest.com/944694/pierce-county-record-pace-murders/">http://mynorthwest.com/944694/pierce-county-record-pace-murders/</a>
<b>GIST</b>	<p>Over the first three months of 2018, the murder rate in Pierce County nearly tripled when compared to last year, according to county records.</p> <p>Authorities are at a loss to explain why.</p> <p>Pierce County Sheriff Paul Pastor said he hopes it is an outlier and that the rate will diminish.</p> <p>“All of us around here are saying this is a bit of an anomaly,” he said. “Here’s a fact that will take place: As we grow in this county — as we approach a million people — we will have spikes like this and they will be closer together.”</p> <p>First reported in the Tacoma News Tribune, the current tally of 23 murders nearly triples the nine homicides recorded through the first 81 days of 2017.</p> <p>That pace, if maintained for the next nine months, would lead to the most violent year in two decades.</p>

	<p>Pastor said even if the rate drops to normal levels, the county is unlikely to stop at the 2017 total of 38. And while this year's murder rate is high so far, it is unlikely to reach the peak level of 66 murders in 1992.</p> <p>The King County murder rate climbed for 2017 after remaining largely steady during four years prior. In 2017, the county saw 74 homicides compared to 66 in 2016, 67 in 2015 and 63 in 2014.</p> <p>Both counties are experiencing an economic boom. The violent crime rate, paradoxically, rises during those periods, Pastor said. People get displaced, he said, envy builds and tensions rise.</p> <p>The vast majority of homicides, he said, happen between people who know each other and have a dispute. That is the case for nearly every homicide in Pierce County so far.</p> <p>"None of these murders are random murders," he said. "There is not somebody loose in the county who is preying on county residents.</p> <p>"(These) are people who know one and other, who have disputes with one and other, or there is an issue of mental illness, issues of drugs, but the victims are usually known to the perpetrator."</p>

<b>HEADLINE</b>	<b>04/03 MS-13 member pleads guilty in slaying</b>
<b>SOURCE</b>	<a href="http://www.foxnews.com/us/2018/04/03/gang-member-pleads-guilty-to-role-in-boston-teens-slaying.html">http://www.foxnews.com/us/2018/04/03/gang-member-pleads-guilty-to-role-in-boston-teens-slaying.html</a>
<b>GIST</b>	<p>BOSTON – A member of the violent MS-13 gang has pleaded guilty to his role in the slaying of a 15-year-old Boston boy who was lured to his death by a fake Facebook page.</p> <p>Federal prosecutors say 21-year-old Carlos Melara pleaded guilty last week to racketeering conspiracy.</p> <p>Authorities say the El Salvador national and other gang members engaged in a "catfishing" scheme to entice the boy to an East Boston beach in September 2015 by posing as a girl on Facebook who wanted to meet him. Melara, pretending to be the girl's friend, picked up the victim on a scooter and drove him to the beach, where several gang members stabbed him to death.</p> <p>Prosecutors say the killing earned Melara promotion within the gang, which has deep Central American ties.</p> <p>He is scheduled to be sentenced July 30.</p>

<b>HEADLINE</b>	<b>04/03 Report: mass grave found in Mali</b>
<b>SOURCE</b>	<a href="http://abcnews.go.com/International/wireStory/mass-grave-found-central-mali-amnesty-report-54199283?cid=clicksource_76_4_article%20roll_articleroll_hed">http://abcnews.go.com/International/wireStory/mass-grave-found-central-mali-amnesty-report-54199283?cid=clicksource_76_4_article%20roll_articleroll_hed</a>
<b>GIST</b>	<p>A mass grave has been discovered in central Mali just days after arrests by the military as it responds to increasing jihadist attacks in the region, Amnesty International said in a new report Tuesday.</p> <p>Concerns are growing about alleged abuses as Mali's military tries to stop extremism from spreading further in the West African nation.</p> <p>Residents in Dogo village identified six bodies found in the mass grave as people who had been arrested on March 22 by the military, the human rights group said, adding that the victims appear to have been blindfolded.</p>

	<p>"Military forces fighting armed groups have also committed crimes under international law including extrajudicial killings, enforced disappearances and arbitrary arrests," the group said.</p> <p>On Feb. 21, military forces arrested and blindfolded nine men in Daresalam, residents told the rights group. Two men from the Bambara ethnic group were released but seven Peulh men have not returned.</p> <p>The United Nations mission in Mali has reported that at least 43 people were victims of enforced disappearances by Malian security forces during anti-extremist operations between May and June last year.</p>

<b>HEADLINE</b>	<b>04/04 Hundreds arrests in FBI dark web probe</b>
<b>SOURCE</b>	<a href="https://www.hstoday.us/briefings/daily-news-analysis/dark-web-opiate-investigation-leads-to-hundreds-of-arrests/">https://www.hstoday.us/briefings/daily-news-analysis/dark-web-opiate-investigation-leads-to-hundreds-of-arrests/</a>
<b>GIST</b>	<p>An FBI operation to target the buying and selling of illegal opiates on the dark web has led to hundreds of arrests.</p> <p>The FBI-led enforcement action last week, named Operation Disarray, is part of a recently launched Department of Justice initiative to disrupt the sale of opioids online and was the first operation of its kind to occur simultaneously in all 50 states.</p> <p>Hundreds of FBI agents and federal partners—including personnel from the Drug Enforcement Administration, U.S. Customs and Border Protection, Internal Revenue Service, Department of Homeland Security, and U.S. Postal Inspection Service—conducted searches, made arrests, and carried out “knock and talks” with more than 160 individuals known to have bought or sold drugs through the marketplaces. Leads from the investigation identified 19 overdose deaths of persons of interest.</p> <p>Special Agent Chris Brest, who helped organize the effort said: “The point of Operation Disarray is to put drug traffickers on notice: Law enforcement is watching when people buy and sell drugs online. For those who think the Darknet provides anonymity,” he explained, “you are mistaken.”</p> <p>Darknet marketplaces resemble legitimate e-commerce sites, complete with shopping carts, thousands of products, sales promotions, and customer reviews. But the Darknet sites’ drop-down menus direct customers to cocaine, heroin, fentanyl, and other illegal drugs.</p> <p>The marketplaces are accessed through a type of software that claims to make the buyer and seller anonymous. Drug users anywhere in the world can sit in front of a computer screen and, with a click of the mouse, buy narcotics without having to risk a face-to-face interaction.</p> <p>Special Agent Eric Yingling, who specializes in Darknet investigations from the FBI’s Pittsburgh Division said: “We see a number of individuals go from consuming to becoming distributors because they’ve become comfortable using the marketplaces. Anyone who owns a computer could potentially be involved in this type of activity.”</p> <p>In January 2018, the Department of Justice announced the Joint Criminal Opioid Darknet Enforcement (J-CODE) team, an FBI-led initiative that brings together a variety of federal agencies to disrupt illicit opioid sales online.</p> <p>As part of the effort, the FBI is training hundreds of agents, as well as local and state law enforcement partners, about the increasing use of Darknet marketplaces to facilitate the sale of opiates.</p>

<b>HEADLINE</b>	<b>04/03 Cops contacted YouTube shooter earlier</b>
<b>SOURCE</b>	<a href="https://www.mercurynews.com/2018/04/03/youtube-shooters-father-says-she-was-angry-at-company/">https://www.mercurynews.com/2018/04/03/youtube-shooters-father-says-she-was-angry-at-company/</a>
<b>GIST</b>	The night before Nasim Aghdam opened fire in a courtyard at YouTube’s headquarters Tuesday afternoon, Mountain View police found the San Diego woman sleeping in her car.

She had been reported missing by her family in Southern California, and her father Ismail Aghdam told police she might be going to YouTube because she “hated” the company. Police called the family at 2 a.m. Tuesday to say she’d been found and that everything was “under control,” her father said.

But hours later, his daughter was dead of a self-inflicted gunshot after shooting three people and causing an afternoon of terror at YouTube’s headquarters.

In an interview Tuesday night with the Bay Area News Group, Ismail Aghdam said his 38-year-old daughter told her family a couple of weeks ago that YouTube had been censoring her videos and stopped paying her for her content. “She was angry,” he said in an interview from his Riverside County home.

It wasn’t clear Tuesday night what Mountain View police knew about her history with YouTube.

A police spokeswoman confirmed that officers had found a woman of the same name asleep in a vehicle early Tuesday morning in a parking lot.

“Our officers made contact with the woman after the license plate of her vehicle matched that of a missing person out of Southern California,” said Mountain View Police spokeswoman Katie Nelson.

“The woman confirmed her identity to us and answered subsequent questions. At the conclusion of our discussion, her family was notified that she had been located.”

Ismail Aghdam said his daughter was a vegan activist and animal lover. As a youngster, she would not even kill ants that invaded the family home, instead using paper to remove them to the back yard, he said. State records show she had once established a charity called Peace Thunder Inc., to “educate people about animal cruelty, environmental pollution” and other causes.

“For me, animal rights equal human rights,” Aghdam told the San Diego Union-Tribune at a People for the Ethical Treatment of Animals protest in 2009 outside Camp Pendleton.

She told her family that YouTube had stopped paying her for the content she posted to the site, Ismail Aghdam said. YouTubers can receive payment for advertisements accompanying their videos, but the company “de-monetizes” some channels for various reasons, meaning ads don’t run with them.

Aghdam was prolific on social media, posting videos and photos on Instagram, Facebook, YouTube. Her YouTube channel included strange workout video clips, graphic animal abuse videos and vegan cooking tutorials. But recent posts show evidence of her growing frustration.

Aghdam’s YouTube, Facebook and Instagram pages were all taken down late Tuesday, but not before reporters from this news organization were able to view much of the material.

On a March 18 Instagram post, she railed at YouTube: “All my youtube channels got filtered by youtube so my videos hardly get views and it is called “merely relegation.” This is also happening to many other channels on youtube. This is the peaceful tactic used on the internet to censor and suppress people who speak the truth and are not good for the financial, political ... gains of the system and big businesses. I recently got filtered on instagram too and maybe its related to youtube and youtube staff asked instagram to filter me here too!!?”

On Jan. 28, Aghdam recorded a video of herself lamenting her perceived “discrimination” by YouTube, particularly railing on how YouTube determined her ab workout video was too racy and, therefore, filtered it.

“I’m being discriminated and filtered on YouTube and I’m not the only one,” the video begins, as Aghdam, wearing a black, white and orange long-sleeved shirt and short jet black hair stands in front of a background of green and white stars. “They age restricted my ab workout video. A video that has nothing bad in it. Nothing sexual.”

	On one of her many websites, she claims to have at least four YouTube channels, one in English, and then others in Farsi and Turkish.

<b>HEADLINE</b>	<b>04/04 Thailand: largest crystal meth haul</b>
<b>SOURCE</b>	<a href="https://www.cnn.com/2018/04/04/asia/thai-meth-drug-bust-intl/index.html">https://www.cnn.com/2018/04/04/asia/thai-meth-drug-bust-intl/index.html</a>
<b>GIST</b>	<p>Bangkok, Thailand (CNN)Authorities in Thailand seized hundreds of kilograms of crystal methamphetamine Tuesday in the largest haul of its type in the country's history.</p> <p>Lt. Gen. Sommai Kongvisaisuk, chief of the Narcotics Suppression Bureau, told CNN a truck containing 788 kilograms (1,740 lb) of the drug, was detained by military and police in Chiang Rai province near the Mekong Delta on Tuesday.</p> <p>Around 10 million amphetamine pills were seized during the same operation. The drugs were hidden inside tea bags and packets of fertilizer and Kongvisaisuk said the "14K" criminal syndicate was behind the banned substances.</p> <p>In total, the amount of drugs seized on April 3 had a street value of \$55 million, police said.</p> <p>The haul follows a series of high-profile raids targeting the drug trade in Thailand, which saw thousands of kilograms of crystal meth, speed and marijuana seized between March 25 and April 1.</p> <p>But despite the large seizures the country's drug problem was only growing more serious, Jeremy Douglas, Southeast Asia Regional Representative for the United Nations Office on Drugs and Crime, told CNN.</p>

<b>HEADLINE</b>	<b>04/03 Women rarely pull trigger mass shootings</b>
<b>SOURCE</b>	<a href="https://www.usatoday.com/story/news/nation/2018/04/03/youtube-shooting-rare-women-ones-pulling-trigger-active-shooting-incidents/483753002/">https://www.usatoday.com/story/news/nation/2018/04/03/youtube-shooting-rare-women-ones-pulling-trigger-active-shooting-incidents/483753002/</a>
<b>GIST</b>	<p>As YouTube's bright headquarters in Northern California became the epicenter of the latest shooting in the U.S. on Tuesday, five words from police at an afternoon news conference stood out: The female suspect is dead.</p> <p>It is rare for women to pull the trigger in workplace and mass shootings.</p> <p>Of 28 mass attacks analyzed by the Secret Service in 2017, all 28 involved male attackers, the service said in a recent report.</p> <p>In Tuesday's incident, the female suspect died in an apparent suicide after opening fire at the YouTube facility in San Bruno, Calif., about 11 miles south of San Francisco, police said. Her motive was still being investigated.</p> <p>One of the most recent cases of a female shooter was that of Tashfeen Malik, 27, the wife of Syed Farook, 28. Malik helped her husband carry out a deadly rampage in San Bernardino, Calif., on Dec. 2, 2015, when the couple burst into a meeting room at the Inland Regional Center, an agency that provides services for the developmentally disabled, and gunned down 14 people.</p> <p>Farook was a U.S.-born citizen of Pakistani descent and worked at the health department; Malik was a Pakistani-born lawful permanent resident of the U.S. The couple, who lived in Redlands, fled after the assault and later died in a shootout with police.</p>

A special report by USA TODAY documents how rare female shooters are: Women are suspects in just 6% of mass killings in the U.S., according to "Behind the Bloodshed," a USA TODAY analysis. The average age of a female mass killing suspect is 33; the youngest is 18, according to the report. That compares to men with an average age of 31.

More: 64% of assailants in mass attacks suffered from symptoms of mental illness, Secret Service report finds

More: Female suspect dead, 4 injured after shooting at YouTube headquarters in California

In another analysis, only six of 160 shootings from 2000 to 2013 that fit the active shooter definition were carried out by females, according to a 2014 study by the FBI and Texas State University. Law enforcement officials use the term "active shooter" to describe an individual actively engaged in killing or attempting to kill people in a confined and populated area.

Those included:

- Yvonne Hiller, 43, who opened fire on her co-workers at a Kraft Foods Factory in Philadelphia on September 2010 shortly after being suspended from her job. Hiller had been escorted from the building but returned. Two people were killed and one was wounded. Hiller exchanged gunfire with police but was eventually apprehended.
- Biology professor Amy Bishop Anderson, 44, who killed three and wounded three others after opening fire in February 2010 at a department meeting at the University of Alabama in Huntsville. Anderson, who had been denied tenure at the university almost a year earlier, did not open fire until 30 minutes into the meeting. She surrendered to responding officers.
- Latina Williams, 23, who killed two fellow students in a classroom at Louisiana Technical College in Baton Rouge in February 2008. She fired six rounds, then reloaded and committed suicide before police arrived.
- Former postal worker Jennifer San Marco, 44, who opened fire in January 2006 at the Santa Barbara U.S. Postal Processing and Distribution Center in Goleta, Calif. She killed six before turning the gun on herself. San Marco, who left the postal service three years before the incident, suffered from mental illness.
- In April 2001, Cathline Repunte, 36, opened fire at the Laidlaw Transit Services maintenance yard in San Jose, Calif., killing a fellow school bus driver. At her trial, psychiatrists said Repunte suffered from paranoid schizophrenia.

<b>HEADLINE</b>	<b>04/04 YouTube shooter 'hated' the company</b>
<b>SOURCE</b>	<a href="https://abcnews.go.com/Technology/wireStory/youtube-shooter-told-family-members-hated-company-54224046?cid=clicksource_79_2_hero_headlines_bsq_hed">https://abcnews.go.com/Technology/wireStory/youtube-shooter-told-family-members-hated-company-54224046?cid=clicksource_79_2_hero_headlines_bsq_hed</a>
<b>GIST</b>	<p>A woman who believed she was being suppressed by YouTube and told her family members she "hated" the company opened fire at YouTube's headquarters in California, wounding three people before taking her own life, police said.</p> <p>Investigators do not believe Nasim Aghdam specifically targeted the three victims when she pulled out a handgun and fired off several rounds in a courtyard at the company's headquarters south of San Francisco on Tuesday, police said.</p> <p>But a law enforcement official with knowledge of the investigation told The Associated Press that Aghdam had a longstanding dispute with the company. The official, who spoke on condition of anonymity because they were not authorized to discuss the case, said Aghdam used the name "Nasime Sabz" online.</p>

	<p>A website in that name decried YouTube's policies and said the company was trying to "suppress" content creators.</p> <p>"Youtube filtered my channels to keep them from getting views!" one of the messages on the site said. "There is no equal growth opportunity on YOUTUBE or any other video sharing site, your channel will grow if they want to!!!!!"</p> <p>Aghdam "hated" YouTube and was angry that the company stopped paying her for videos she posted on the platform, her father, Ismail Aghdam, told the Bay Area News Group.</p> <p>On Monday, he called police to report his daughter missing after she didn't answer the phone for two days and warned officers that she might go to YouTube, he said.</p> <p>Officers in Mountain View — about 30 miles (48 kilometers) from YouTube's headquarters — found her sleeping in her car in a parking lot around 2 a.m. Tuesday but let her go after she refused to answer their questions. Aghdam didn't appear to be a threat to herself or others, police spokeswoman Katie Nelson said.</p> <p>Nelson would not say whether officers had been warned that Aghdam might have been headed to YouTube headquarters.</p>

<b>HEADLINE</b>	<b>04/04 Suspect YouTube HQ shooting found dead</b>
<b>SOURCE</b>	<a href="http://abcnews.go.com/US/police-respond-active-shooter-youtubes-california-headquarters/story?id=54211484&amp;cid=clicksource_4380645_1_hero_headlines_bsq_hed">http://abcnews.go.com/US/police-respond-active-shooter-youtubes-california-headquarters/story?id=54211484&amp;cid=clicksource_4380645_1_hero_headlines_bsq_hed</a>
<b>GIST</b>	<p>The suspect in a shooting at YouTube's headquarters in California's Bay Area is believed to be a woman found dead from an apparent self-inflicted gunshot wound, police said.</p> <p>The suspect has been identified as Nasim Najafi Aghdam of San Diego, San Bruno Police Chief Ed Barberini told ABC News, confirming earlier reports.</p> <p>Authorities said they are still searching for a motive. Earlier reports linked the attack to a domestic situation, two law enforcement officials told ABC News. The incident did not appear to be terror-related, the sources said.</p> <p>The scene of the incident is being processed for evidence by San Bruno Police as well as the San Mateo County Crime Lab.</p> <p>At least four victims were transported to area hospitals, Barberini said. Three of those victims sustained gunshot wounds, while the fourth victim suffered a non-life-threatening injury such as a broken or twisted ankle, he said.</p> <p>Three people were transported to Zuckerberg San Francisco General Hospital, spokesman Brett Andrew told reporters at a press conference.</p> <p>A 36-year-old male patient was in critical condition, Andrew said. A female victim, 32, was in serious condition, and another female victim, 27, was in fair condition, he said earlier on Tuesday.</p> <p>The victim in critical condition is believed to have been the suspect's intended target, two law enforcement sources told ABC News. The other victims were apparently unintended.</p> <p>The shooting appears to have occurred in a courtyard area on YouTube's campus, Barberini said.</p>

<b>HEADLINE</b>	<b>04/03 Apple watch data leads to murder arrest</b>
<b>SOURCE</b>	<a href="https://www.cbsnews.com/news/report-apple-watch-data-leads-to-arrest-in-2016-murder/">https://www.cbsnews.com/news/report-apple-watch-data-leads-to-arrest-in-2016-murder/</a>
<b>GIST</b>	<p>AUSTRALIA - Data collected from an Apple smartwatch helped lead to an arrest in the murder of a southern Australian woman, according to testimony heard in court. Earlier this month, police arrested the daughter-in-law of Myrna Nilsson, 57, who was found dead in her Adelaide home in 2016, according to reports by the Australian Broadcasting Commission.</p> <p>Prosecutors called the victim's Apple Watch a "foundational piece of evidence" in proving that the daughter-in-law lied about her involvement in the beating death, according to the ABC.</p> <p>Police were first called to the home of Myrna Nilsson in September 2016 after her daughter-in-law, Caroline Nilsson, came out of the house "gagged and distressed," according to ABC reporters. Caroline reportedly told police that Myrna was followed home by two men, and that the three of them argued outside the home.</p> <p>In her account to police, she did not hear her mother-in-law being murdered because she was hiding in another room. Afterwards, she said, the men tied her up.</p> <p>But prosecutors say she staged the entire break-in and lied to police-- and the watch proves it.</p> <p>Biometric data recorded by Myrna Nilsson's Apple watch is consistent with her being ambushed as she walked into her home just after 6:30 p.m., prosecutor Carmen Matteo said March 29 before the Adelaide Magistrates Court. The watch can track the wearer's movement and heart rate, and it reportedly recorded the time Nilsson's body showed signs of going into shock and losing consciousness.</p> <p>"The deceased must have been attacked at around 6:38pm and had certainly died by 6:45 p.m.," Matteo said, according to the network.</p> <p>Caroline Nilsson did not come out of the house until after 10 p.m.</p> <p>Prosecutors also say there is no DNA evidence to support Caroline Nilsson's version of events. The victim's three young grandchildren were reportedly home at the time of the killing, and neighbors said they heard screaming.</p> <p>Nilsson's application for bail has been denied based on the strength of the prosecution's case, the network reports.</p> <p>The case will return to court in June.</p>

<b>HEADLINE</b>	<b>04/03 Britain to ban ivory sales</b>
<b>SOURCE</b>	<a href="http://abcnews.go.com/International/wireStory/britain-ban-ivory-sales-stamp-abhorrent-trade-54198615?cid=clicksource_76_4_article%20roll_articleroll_hed">http://abcnews.go.com/International/wireStory/britain-ban-ivory-sales-stamp-abhorrent-trade-54198615?cid=clicksource_76_4_article%20roll_articleroll_hed</a>
<b>GIST</b>	<p>Britain says it will ban the sale of ivory, no matter how old, to help protect the world's elephant population.</p> <p>The government said Tuesday that the ban is the toughest in Europe and will impose a maximum five-year prison sentence for offenders.</p> <p>Environment Secretary Michael Gove says "the abhorrent ivory trade should become a thing of the past."</p> <p>There will be exceptions for some old musical instruments and for works of art, such as portrait miniatures, that are more than a century old.</p>

	Conservationists say about 20,000 elephants a year are killed for their tusks. David Cowdrey of the International Fund for Animal Welfare says the British ban sends "a clear and unequivocal message that ivory trade is over and rightly being consigned to the history books."
<a href="#">Return to Top</a>	

<b>HEADLINE</b>	<b>04/03 UK lab: no ID for source of nerve agent</b>
<b>SOURCE</b>	<a href="http://abcnews.go.com/International/wireStory/top-russian-diplomat-britain-poisoned-spy-54198504?cid=clicksource_76_4_article%20roll_articleroll_hed">http://abcnews.go.com/International/wireStory/top-russian-diplomat-britain-poisoned-spy-54198504?cid=clicksource_76_4_article%20roll_articleroll_hed</a>
<b>GIST</b>	<p>The head of Britain's defense laboratory said Tuesday that its scientists have not identified the precise source of the nerve agent that poisoned former Russian spy Sergei Skripal, although it's likely the attack was carried out by a "state actor."</p> <p>Britain blames Russia for the March 4 attack on Skripal and his daughter Yulia, a claim that Moscow fiercely denies.</p> <p>Scientists at the U.K's Porton Down lab have identified the poison as a Soviet-developed type of nerve agent known as Novichok, and the British government says the only plausible explanation is that it came from Russia.</p> <p>Porton Down chief executive Gary Aitkenhead said scientists at the lab "have not verified the precise source, but we provided the scientific information to the government who have then used a number of other sources to piece together the conclusions that they have come to."</p> <p>"It's our job to provide the scientific evidence that identifies what the particular nerve agent is ... but it's not our job to say where that was actually manufactured," he told Sky News.</p> <p>Aitkenhead said the attack with a highly toxic chemical weapon was "probably only within the capabilities of a state actor."</p> <p>The British government said several pieces of information contributed to its conclusion that the Russian government was responsible for the nerve agent attack, including intelligence that Russia had produced Novichok within the last decade and had investigated ways of delivering nerve agents for assassination.</p> <p>Russian officials have claimed the poison may have come from Britain, pointing out that Porton Down conducts secret chemical and biological weapons research.</p> <p>Russian Deputy Foreign Minister Alexander Grushko called the poisoning a "provocation arranged by Britain" in order to justify high military spending because "they need a major enemy."</p> <p>Aitkenhead said there is "no way" the nerve agent could have come from the high-security facility.</p> <p>"We deal with a number of very toxic substances as part of the work that we do, we've got the highest levels of security and controls," he said.</p>

<b>HEADLINE</b>	<b>04/03 British Muslims defiant in 'punish day'</b>
<b>SOURCE</b>	<a href="https://www.usatoday.com/story/news/world/2018/04/03/british-muslims-defiant-after-leaflets-call-punish-muslim-day/480878002/">https://www.usatoday.com/story/news/world/2018/04/03/british-muslims-defiant-after-leaflets-call-punish-muslim-day/480878002/</a>
<b>GIST</b>	<p>LONDON — British Muslims were defiant Tuesday after anonymous leaflets mailed to addresses across the country called for April 3 to be a day of violence against Muslims.</p> <p>Police are investigating after the leaflets referring to "Punish a Muslim Day" were sent to addresses in several cities with large Muslim populations, including London and Bradford.</p> <p>"The campaign has caused serious fear within Muslim communities, especially among Muslim women, who often suffer the most from Islamophobia," said the Muslim Council of Britain, which represents a number of Islamic organizations, in a statement.</p> <p>"The Muslim Council of Britain has been urging vigilance but also recognizes the importance of keeping calm and carrying on, for those who are able," it added.</p> <p>WhatsApp messages urged women to hide their hijabs and advised people to make sure their doors are locked and how to explain the situation to their children, the Mirror reported.</p> <p>One of the messages read: "Sisters please be warned that on 3rd April DO NOT GO OUT they have made a national punish a muslim day!" according to the Daily Mirror.</p> <p>The message continued: "This is not a joke its sick plan they have a pointing system where they will b giving points nd reporting ona site with vids etc punishments include taking off hijabs...beating up and even acid throwing.</p> <p>"May Allah protect us all.(sic)."</p> <p>Recorded incidents of hate crime in Britain have leaped since the country voted to leave the European Union in a 2016 referendum. Controlling immigration was a major issue during campaigning ahead of the vote.</p> <p>Iman Atta, director of Tell Mama — an independent organisation that records anti-Muslim incidents in the United Kingdom — advised people to continue with their normal activities, to be vigilant, not to stay indoors and to report any incidents to the organization, the London Evening Standard reported.</p> <p>#PunishAMuslimDay was trending on Twitter as people voiced their concerns and solidarity...</p> <p>Meanwhile, West Yorkshire Police in northern England said its officers were investigating a number of reports of "potentially malicious communications sent to individuals" in the city of Bradford.</p> <p>London's Metropolitan Police said it was aware that the leaflets had been circulating in the capital.</p> <p>"The MPS does not tolerate any form of hate crime. If anyone believes they have been a victim of such an offence we would encourage them to report it to police so it can be fully investigated," it said in a statement.</p>

<b>HEADLINE</b>	<b>04/03 NY braces for viral anti-Muslim campaign</b>
<b>SOURCE</b>	<a href="http://www.newsweek.com/punish-muslim-day-new-york-braces-869163">http://www.newsweek.com/punish-muslim-day-new-york-braces-869163</a>
<b>GIST</b>	<p>Police patrols are being stepped up at New York mosques and Islamic centers in response to fears that a viral anti-Muslim campaign that originated in the U.K. will spread to the city.</p> <p>Brooklyn Borough President Eric Adams announced the increased security measures at a meeting Monday at the Pakistani American Youth Society in Ditmas Park, the New York Daily News reported.</p> <p>In March, a letter began circulating in the U.K. that said April 3 had been designated Punish a Muslim Day. It laid out a points-based reward system for violence carried out against Muslims, including 50 points to “throw acid in the face of a Muslim” and 1000 points to “burn or bomb a mosque.”</p> <p>As the letter went viral on social media, there were concerns the campaign could spark violence in New York. Adams called for it to be countered by a message of tolerance.</p> <p>“Our message must be just as loud,” Adams said. “Not punish a Muslim, let’s embrace a Muslim, let’s embrace a Christian, let’s embrace a person of Jewish faith, let’s embrace the diversity that this city has to offer.”</p> <p>The NYPD’s Intelligence Bureau learned of the threat in mid-March after the flyers appeared, Police Department spokesman J. Peter Donald told local news site Patch.</p> <p>"While we have not seen any evidence of this threat gaining traction here, it has generated understandable concern," Donald said.</p> <p>In the U.K., Muslims have been urged to “unite” and “carry on as normal” as the day approaches.</p> <p>A spokesman for London’s Metropolitan Police told the Evening Standard that though there was no “credible information” that anti-Muslim attacks were being planned, police officers remained alert for potential incidents.</p> <p>People from six U.K. communities received the letters, which have been investigated by counterterrorism officials. A number of the letters appeared to have been sent from the northern English city of Sheffield, police said.</p> <p>“Are you a sheep like the vast majority of the population?” the letter reads. “Sheep follow orders and are easily led. They are allowing the white-majority nations of Europe and north America to become overrun by those who would like nothing more than to do us harm and to turn our democracies into sharia-led police states.”</p> <p>One British Muslim activist has called for April 3 to instead to be designated Love Muslim Day to combat the letter’s message of hate, with points to be awarded for acts of kindness and charity towards Muslims. Under activist Shahab Adris's scheme, 25 points would be won for buying Muslims coffee with cake, 500 points for fasting with Muslims during Ramadan, and 1,000 points for raising funds to help victims of conflict in Iraq or Syria.</p>

<b>HEADLINE</b>	<b>04/02 Supreme Court shields cop from lawsuit</b>
<b>SOURCE</b>	<a href="https://www.seattletimes.com/nation-world/supreme-court-shields-a-police-officer-from-lawsuit-for-shooting-a-woman-in-her-front-yard/">https://www.seattletimes.com/nation-world/supreme-court-shields-a-police-officer-from-lawsuit-for-shooting-a-woman-in-her-front-yard/</a>
<b>GIST</b>	<p>WASHINGTON — The Supreme Court on Monday shielded a police officer from being sued for shooting an Arizona woman in her front yard, once again making it harder to bring legal action against officers who use excessive force, even against an innocent person.</p>

With two dissents, the high court tossed out a lawsuit by a Tucson woman who was shot four times outside her home because she was seen carrying a large knife.

The ruling — which comes at a time of growing controversy over police shootings nationwide — effectively advises courts to rely more heavily on the officer’s view of such incidents, rather than the victim’s.

Justices Sonia Sotomayor and Ruth Bader Ginsburg said in dissent the victim did not threaten the police or a friend who was standing nearby. This “decision is not just wrong on the law; it also sends an alarming signal to law enforcement officers and the public. It tells officers that they can shoot first and think later,” Sotomayor wrote.

Civil liberties advocates on the right and the left sharply criticized the ruling.

“Today’s ruling gives yet another green light to officers who use deadly force as a tool of first resort instead of last,” said Clark Neily, vice president of the libertarian Cato Institute. “It does so based on a legal doctrine — qualified immunity — that the Supreme Court invented out of whole cloth to help create a policy of near-zero accountability for law enforcement.”

David Cole, legal director for the American Civil Liberties Union, said officers who use lethal force unconstitutionally should be held accountable. “Giving a free pass to officers under these circumstances will only exacerbate the problem.”

Since the Civil War, federal law has allowed people to sue government officials, including the police, for violating their constitutional rights. But in recent years, the Supreme Court has erected a shield of immunity for police and said officers may not be sued unless victims can point to a nearly identical shooting that had been deemed unconstitutionally excessive in a previous decision.

Police shootings of unarmed people, many of them African Americans, have sparked protests across the country, most recently in Sacramento, California. Often prosecutors have been reluctant to bring criminal charges in such cases because they would need to convince an entire jury that the officer was guilty beyond a reasonable doubt.

Civil suits that seek damages are in theory easier to win because plaintiffs need only present convincing evidence that the officer used unreasonable force. But the high court has repeatedly made it harder for victims to bring such claims before a jury.

In an eight-page unsigned opinion in *Kisela v. Hughes*, the justices did not rule on whether officer Andrew Kisela acted reasonably when he used potentially deadly force against Amy Hughes, who was standing in her driveway a few feet away from her friend and roommate, Sharon Chadwick. The police had been called after a neighbor reported seeing a woman acting strangely and carrying a large knife.

Rather than decide whether Kisela used excessive force, the court instead ruled he could not be sued because the victim could not cite a similar case involving a police shooting of a person holding a knife.

“Police officers are entitled to qualified immunity unless existing precedent squarely governs the specific facts at issue. ... This is far from an obvious case in which any competent officer would have known that shooting Hughes to protect Chadwick would violate the 4th Amendment” and its ban on unreasonable seizures, the court said Monday.

The decision reversed the 9th Circuit Court of Appeals, which had allowed the woman’s lawsuit to go before a jury.

In recent months, legal scholars and the Cato Institute have joined civil rights lawyers in criticizing the court’s approach to police shootings. University of Chicago law professor William Baude, a former clerk

for Chief Justice John Roberts, has argued the justices invented the doctrine of “qualified immunity” in the 1980s and have steadily expanded it to block suits in cases of excessive force.

In her dissent, Sotomayor quoted a law review article by Judge Stephen Reinhardt from Los Angeles, who died last week. “Nearly all of the Supreme Court’s qualified immunity cases come out the same way — by finding immunity for the officials,” Reinhardt wrote in 2015.

Three years ago, the justices tossed out a lawsuit brought by a mentally ill San Francisco woman shot five times by officers who pushed their way into her private room. They said they shot her because she was holding a bread knife.

The Tucson shooting took place a few blocks from the University of Arizona campus. Police were called to “check welfare” after a neighbor called about a woman who was acting erratically and brandishing a knife. Three officers, including Kisela, arrived and saw a woman, later identified as Hughes, leave the house and walk toward Chadwick. She was carrying a knife. A chain-link fence prevented the officers from approaching, but they called out to Hughes to drop the knife.

She ignored them and came within 6 feet of Chadwick. The other woman was calm and said there was no threat. But Kisela then fired four shots, striking Hughes. She was handcuffed, and taken to a hospital. She recovered from her injuries and sued Kisela for an unreasonable seizure and an excessive use of force.

The 9th Circuit appeals court said that while some key facts are in dispute, a “rational jury could find that (Hughes) had a constitutional right to walk down her driveway holding a knife without being shot.”

Lawyers for Arizona appealed and said the suit should be dismissed. “Qualified immunity exists to protect the public from unwarranted timidity on the part of public officials,” they said.

The justices agreed and ruled Kisela was entitled to immunity.

Sotomayor said the majority had revised the facts to favor the officer. Hughes “held a kitchen knife down at her side with the blade facing away from Chadwick. Hughes was nowhere near the officers, had committed no illegal act, was suspected of no crime, and did not raise the knife in the direction of Chadwick or anyone else,” she wrote. Two officers kept talking, but “without giving a warning that he would open fire, he (Kisela) shot Hughes four times, leaving her seriously wounded. If this account of Kisela’s conduct sounds unreasonable, that is because it was,” Sotomayor said.

She said the court’s “one-sided approach to qualified immunity transforms the doctrine into an absolute shield for law enforcement officers, gutting the deterrent effect of the 4th Amendment.”

Erwin Chemerinsky, dean of the University of California, Berkeley Law School, said Monday’s decision is part of a trend. “In case after case involving excessive police force, the Supreme Court is finding for the police and keeping juries from ever being able to decide if the police acted impermissibly. This contributes significantly to the difficulties in holding police accountable,” he said.

<b>HEADLINE</b>	<b>04/02 Martin Luther King's voice lives on</b>
<b>SOURCE</b>	<a href="https://patch.com/georgia/atlanta/50-years-after-bullet-mlks-voice-lives">https://patch.com/georgia/atlanta/50-years-after-bullet-mlks-voice-lives</a>
<b>GIST</b>	<p>ATLANTA, GA — On the evening of April 4, 1968, an assassin's bullet ended the life of 39-year-old civil-rights leader Martin Luther King Jr. at the Lorraine Motel in Memphis, Tennessee. On Wednesday, fifty years later, a new generation will gather to remember a man whose message of equality and nonviolence could never be silenced.</p> <p>A Nobel Peace Prize winner and the first president of the Southern Christian Leadership Conference, King led the 1955 Montgomery bus boycott and the 1963 March on Washington. His "Letter From a</p>

Birmingham Jail" and "I Have A Dream" speech remain iconic civil-rights documents.

In countries around the world, bells will toll 39 times at 6:01 p.m. Wednesday (when King was shot) in remembrance. At the King Center campus in downtown Atlanta, family members of the civil rights legend will place wreaths on the crypts of King and his late wife, Coretta Scott King.

During their first joint interview in more than a decade, Bernice King and her brothers, Dexter and Martin, recently told CBS News they still relive the trauma of their father's assassination. The brothers saw the fatal shooting while watching television.

"Even to this day, when I see a breaking news flash I have PTSD," Dexter King said. "You see your father being shot on television, and that's very, very traumatic."

Older brother Martin said he remembered his mother saying, "Your dad has gone home to live with God."

In Atlanta, where King preached as pastor of Ebenezer Baptist Church, the Martin Luther King, Jr. Center for Nonviolent Social Change has a full slate of events scheduled to mark the day.

"Today, we remember my father's death, but most importantly, we must remember the purpose and power of his life," the center's CEO, Bernice A. King, said in a news release. "Although this day is challenging for our family and for many around the world, I encourage you to hope today and to hope always ... . Our family encourages you to not be angered by my father's death; be bolstered by his teachings and awakened by his work."

A day before he was murdered, King arrived in Memphis to help lead a peaceful protest march by the city's striking sanitation workers that was set for April 5. While there, he delivered his "I've Been to the Mountaintop" speech, which referenced death and fear.

"We've got some difficult days ahead. But it really doesn't matter with me now, because I've been to the mountaintop. And I don't mind. Like anybody, I would like to live—a long life; longevity has its place. But I'm not concerned about that now. I just want to do God's will. And He's allowed me to go up to the mountain," King said. "And I've looked over. And I've seen the Promised Land. I may not get there with you. But I want you to know tonight, that we, as a people, will get to the Promised Land. So I'm happy, tonight. I'm not worried about anything. I'm not fearing any man."

The next evening, April 4, a white supremacist named James Earl Ray fatally shot the father of four with a high-powered rifle from the window of a rooming house across the street from King's motel.

As the country grappled with a deadly white supremacist march in Virginia last summer, Atlanta unveiled a statue of King at the Georgia State Capitol. The King family was on hand for the event, which came as much of the nation, especially the South, debated the import of monuments and markers. The issue has simmered for years, but it boiled over with the tragic clashes in Charlottesville.

King's daughter Bernice spoke at the event, saying that "now is the time to make justice a reality for all of God's children."

King's impact has endured over the decades despite his never having held political office. And while some observers say it is easy for today's leaders to claim they would have supported King, his words ring as true today as they did in the 1960s.

In his last Sunday sermon, King called on good people to speak out against injustice instead of remaining on the sidelines. His words still ring true in an era of gun-violence, marches, police-shooting protests and #MeToo.

"Human progress never rolls in on the wheels of inevitability," King told a largely white congregation at Washington National Cathedral. "It comes through the tireless efforts and the persistent work of dedicated

individuals who are willing to be co-workers with God."

He went on to condemn "the appalling silence and indifference of the good people who sit around and say, 'Wait on time.'"

When tempers frayed and flared, King urged patience.

One of King's most memorable quotes, from his book "Strength to Love" that was first published in 1963, continues to ring true:

"Returning hate for hate multiplies hate, adding deeper darkness to a night already devoid of stars. Darkness cannot drive out darkness; only light can do that. Hate cannot drive out hate; only love can do that. Hate multiplies hate, violence multiplies violence, and toughness multiplies toughness in a descending spiral of destruction."

King's three surviving children have made headlines for court battles over two of their father's most famed possessions. His sons Martin and Dexter have been at odds with their sister Bernice over whether to sell their father's Bible and Nobel Prize. The siblings were in court several years ago seeking legal right to the artifacts. One historian accused them of being motivated by greed.

King's Bible was last seen in public when President Barack Obama used it in early 2013 while taking the oath of office at his second inauguration, according to Associated Press. Former President Jimmy Carter has urged the siblings to remove themselves from the business of running their father's estate, which they said they plan to do.

<b>HEADLINE</b>	<b>04/03 Saudi crown prince: triangle of evil</b>
<b>SOURCE</b>	<a href="http://www.newsweek.com/irans-leader-worse-hitler-and-wants-spread-islam-america-says-saudi-prince-869194">http://www.newsweek.com/irans-leader-worse-hitler-and-wants-spread-islam-america-says-saudi-prince-869194</a>
<b>GIST</b>	<p>The heir to the Saudi throne has lambasted Iran, saying its Supreme Leader is the first side of a "triangle of evil" along with the Muslim Brotherhood and extremist Islamist groups like Isis.</p> <p>In an echo of former U.S. president George W. Bush's 2002 reference to Iran's supposed role in an "axis of evil," Crown Prince Mohammed bin Salman told The Atlantic that Ayatollah Ali Khamenei was akin to Hitler and headed a regime that wanted to spread "extremist Shiite ideology."</p> <p>The crown prince added that if Tehran got its way, "the hidden Imam will come back again and he will rule the whole world from Iran and spread Islam even to America," referring to the final savior of humankind according to Iran's Twelver Shia faith.</p> <p>He said: "The second part of the triangle is the Muslim Brotherhood, which is another extremist organization. They want to use the democratic system to rule countries and build shadow caliphates everywhere... And the other part is the terrorists, al-Qaeda, ISIS, that want to do everything with force.</p> <p>"I believe that the Iranian supreme leader makes Hitler look good. But the supreme leader is trying to conquer the world. He believes he owns the world. They are both evil guys. He is the Hitler of the Middle East," he added.</p> <p>The wide-ranging interview will be seen as the latest move by the royal to present a different image of his country. In November he ordered a crackdown on businessmen and officials accused of corruption, which has reportedly recovered 100 billion dollars in financial settlements, although critics said it was a purge of his rivals to consolidate power.</p> <p>The crown prince insists his country is part of a group of moderate Muslim nations which include Jordan,</p>

Oman, Kuwait and the United Arab Emirates which are, in his view, countries based on the founding principles of the United Nations whose values are at odds with those of the “evil triangle.”

But Salman puzzled his interviewer when he denied that Wahhabism, the austere fundamentalist strand of Islam which is the bedrock of the country, even existed in Saudi Arabia.

“No one can define Wahhabism. There is no Wahhabism. We don’t believe we have Wahhabism. We believe we have, in Saudi Arabia, Sunni and Shiite. We believe we have within Sunni Islam four schools of thought,” he said, adding that Shiites held many positions of power in government and society.

He said he has no religious objections to the right of Israel to exist, and that his concerns were solely about the fate of the holy mosque in Jerusalem and the rights of the Palestinian people.

“I believe that each people, anywhere, has a right to live in their peaceful nation. I believe the Palestinians and the Israelis have the right to have their own land. But we have to have a peace agreement to assure the stability for everyone and to have normal relations.

"We have religious concerns about the fate of the holy mosque in Jerusalem and about the rights of the Palestinian people. This is what we have. We don’t have any objection against any other people.

"Our country doesn’t have a problem with Jews. Our Prophet Muhammad married a Jewish woman. Not just a friend—he married her. Our prophet, his neighbors were Jewish. You will find a lot of Jews in Saudi Arabia coming from America, coming from Europe. There are no problems between Christian and Muslims and Jews. We have problems like you would find anywhere in the world, among some people. But the normal sort of problems," said the crown prince.

<b>HEADLINE</b>	<b>04/01 State’s firearm records months behind</b>
<b>SOURCE</b>	<a href="http://www.heraldnet.com/news/states-firearms-records-months-behind/">http://www.heraldnet.com/news/states-firearms-records-months-behind/</a>
<b>GIST</b>	<p>OLYMPIA — Had lawmakers passed new rules governing sales of semiautomatic rifles, it could have been months — if not years — before details of any transactions made it into a state firearms database relied upon by law enforcement officers.</p> <p>That’s because the database, which now only deals with handguns, lacks information on the make, model, serial number and caliber of weapons sold dating back to early 2015.</p> <p>The backlog reached 478,006 pistol transfer records at the end of February, according to the state Department of Licensing, which maintains the database.</p> <p>As it has grown from 106,000 in November 2013 to 327,000 in September 2016, agency officials have asked the Legislature for money to hire extra staff to catch up. Lawmakers didn’t come through.</p> <p>This year the agency didn’t ask and, ironically, lawmakers did allot \$382,000 in the supplemental state budget to tackle the problem.</p> <p>It happened after Democratic senators learned a suite of gun-related bills they were pushing would, if enacted, put further strain on the department’s ability to ensure all the data is up to date.</p> <p>In particular, there was concern about a bill that would have raised the age for purchasing a semiautomatic rifle and required background checks on buyers. It would have mandated, for the first time, that information from semiautomatic rifle sales be put in the database.</p> <p>“I explained that if you add another type of weapon to the database, I don’t think it can handle it,” recalled Beau Perschbacher, the agency’s legislative and policy director.</p>

It wasn't a hard sell.

"We thought let's take care of the backlog and clear the way" for the bills, said Sen. Christine Rolfes, D-Bainbridge Island, chairwoman of the Senate Ways and Means Committee and the chamber's chief budget writer.

With extra funding secured, the next step is figuring out how it should be best spent.

A year ago, agency leaders talked of hiring a data-entry firm to do the work and predicted the backlog — which was roughly 150,000 fewer records — could be erased in six months.

They may not follow that course now. Department officials want to switch to a new system and are finding out about different options. They could settle on something in 2019. They want to understand how efforts to clear the backlog might, or might not, align with any transition.

"We are still working on what will be the most effective way to use those dollars to alleviate the problem," said Stephanie Sams, a policy and legislative analyst for the agency.

In Washington, the Department of Licensing is tasked with collecting data from sales of handguns by licensed firearms dealers and getting those details into the database.

It also inputs information from the courts and law enforcement agencies on people obtaining or renewing a concealed pistol license and those who are ineligible to possess a firearm due to a court order or because they are deemed mentally unfit. Agency officials say this specific information is current in the database.

It's been difficult keeping up with gun sale records.

In its 2017 budget request, the department said it receives 240,000 records per year of firearm sales and licenses. Of those, 85 percent are submitted on paper and must be entered manually into the database.

What concerns agency leaders about the backlog is the potential safety risk of law enforcement officers who are not getting a complete picture of what firearms a person may have purchased.

For example, if a person who is not supposed to possess a firearm bought one at some point in the recent past, the database would be the place to find out. That wouldn't happen, though, if the record of the sale is stuck in the backlog.

In last year's budget request, agency officials made their concerns pretty blunt.

"Law enforcement officers' inability to electronically access pistol sale and transfer information on a CPL (concealed pistol license) holder deemed by the courts to be ineligible to possess a firearm presents a risk to public safety," read the request.

And they cautioned in that same request, the backlog poses a risk "of misinforming, delaying, or impeding" law enforcement agencies in the course of their work.

They use this system a lot. Officers from city, county, state and federal law enforcement agencies will check it more than 2 million times a year, agency officials estimate.

It is seen as a good starting point for an officer when they have to track a firearm for investigation, said Steve Strachan, executive director of the Washington Association of Sheriffs and Police Chiefs. And when a stolen firearm is recovered, the serial number can be punched in to find the legal owner to whom it can be returned, he said.

But it is not their only option. The federal Bureau of Alcohol, Tobacco, Firearms and Explosives manages

	<p>the National Tracing Center which law enforcement officers can use for investigating the source of weapons made in the United States or overseas.</p> <p>That's important because with so many missing records in the state system, officers know it is not always going to be useful, Strachan said.</p> <p>"The fact that it's been so far behind is a concern," he said. "Any time a database is more robust and more accurate and up-to-date is good for law enforcement."</p>

<b>HEADLINE</b>	<b>04/02 EPA scraps fuel efficiency rules</b>
<b>SOURCE</b>	<a href="https://www.washingtontimes.com/news/2018/apr/2/scott-pruitt-epa-chief-scraps-obama-era-fuel-efic/">https://www.washingtontimes.com/news/2018/apr/2/scott-pruitt-epa-chief-scraps-obama-era-fuel-efic/</a>
<b>GIST</b>	<p>In a move that could upend the U.S. auto industry and spark a bitter legal fight with states such as California, the Trump administration said Monday that it will scrap Obama-era fuel economy standards and effectively cancel the looming requirement that all vehicle fleets average more than 50 miles per gallon by 2025.</p> <p>Environmental Protection Agency Administrator Scott Pruitt said the program, known as Corporate Average Fuel Economy, or CAFE standards, fell victim to politics during the Obama administration as officials sought to take dramatic action against climate change.</p> <p>He said his predecessors at the EPA rushed through rules governing fuel economy for model years 2022 through 2025 without fully understanding their potential consequences, and that it's now clear those rules simply aren't realistic.</p> <p>The decision represents a major defeat for green groups and other backers of the program, which was one of the most sweeping and lasting environmental actions of the prior administration.</p> <p>"The Obama administration's determination was wrong," Mr. Pruitt said in a statement. "Obama's EPA ... made assumptions about the standards that didn't comport with reality, and set the standards too high."</p> <p>The announcement also marks a turning point for how the government handles fuel economy for cars and light trucks, and could slow what had been a steady climb toward more efficient vehicles on U.S. roads. Car manufacturers, though, insist that cleaner cars will continue to roll off assembly lines.</p> <p>The current iteration of the CAFE program began with 2012 models and was the result of intense negotiations between the Obama administration and automakers. Although the benchmarks will remain in effect through 2021, the next phase — in which all automakers would have had to ensure that their vehicles averaged about 54.5 mpg — was seen as the most difficult to achieve.</p> <p>Supporters said it would result in a dramatic reduction in harmful tailpipe emissions. Critics argued that it was a misguided federal mandate that pushed consumers toward electric cars or other vehicles that they couldn't afford or simply didn't want.</p> <p>Auto industry groups praised the about-face and vowed to work with Mr. Pruitt to rewrite the standards in a more realistic way. The EPA chief said he intends to immediately begin work on a replacement program, though it's unclear when or if such a plan will materialize.</p>

<b>HEADLINE</b>	<b>04/02 SDOT workers complain bias, favoritism</b>
<b>SOURCE</b>	<a href="https://crosscut.com/2018/04/city-transportation-workers-complain-gender-bias-favoritism">https://crosscut.com/2018/04/city-transportation-workers-complain-gender-bias-favoritism</a>

GIST

Employees of the Seattle Department of Transportation perceive a workplace that discriminates against women, plays favoritism in hiring, limits opportunities for voicing concern and lacks communication between management, according to the results of an internal focus group study.

The results were sent to the department's employees last Monday and were provided to Crosscut by an employee.

In an email to staff, Goran Sparrman, the acting director of the department, acknowledged the feedback and pledged the department, which has some 750 employees and a budget of more than \$500 million, would do better.

"Going forward we want to make it clear that favoritism and discrimination are not acceptable behaviors within the department," he wrote. "As an example, we heard strong feedback that many women inside SDOT do not feel they are treated as equitably as men or given the same level of professional respect. This is not acceptable. We need to ensure that employees feel they do have a voice in SDOT, and that they will not experience retaliation for speaking up. Indeed, we want to encourage a culture where employees are comfortable raising issues and contributing ideas."

A spokesperson for the department said Sparrman did not wish to comment further.

In recent months, employees across the City of Seattle have voiced concerns about their workplace environment. Mayor Jenny Durkan and the Seattle City Council have pledged to revisit dated harassment policies. They have also formed an inter-departmental team to address other issues that have been raised by employees across the city, particularly in City Light and Human Resources.

The examination of SDOT's internal climate began in the third quarter of 2017, according to Marcus Scott, a consultant with PeopleFirm, the company that conducted the work with the department's employees. (Scott Kubly was still the director of the department at that time.)

Much of the perceived lack of equity was reported by women workers.

"I feel like what I say isn't heard unless a man says it," said one respondent. "That just isn't right."

Another complained about feeling objectified. "I've given up wearing skirts to work," this person said. "When I wore a skirt, men would ask me about my exercise regimen."

More broadly, employees felt that promotion only went to those who knew the right people. One person accused leadership of "cronyism."

In the face of the perceived favoritism, workers said there were few positive avenues for voicing concern. Speaking out, some believed, would lead to negative consequences.

"I know firsthand the field workers will not talk up because they are scared of retaliation," said one employee.

"Voicing an opinion has a certain degree of fear that is instilled," said another. "It is that sort of 'don't you forget you're replaceable' attitude."

Leadership took heavy blame for rewarding friends and not fostering an open or communicative department. According to the results of the focus groups, employees perceived from leadership a my-way-or-the-highway mentality and a lack of trust in employees.

"A lot of people seem to want the authority and title of being a leader but not the responsibility that comes with it," said one person.

"We have directors yelling and cussing at people and when you defend yourself you get reprimanded,"

	<p>said another.</p> <p>One respondent pleaded: “Managers, please put more trust into your employees. We know more than you think we do, give us a chance.”</p> <p>There were some positive pieces of the results, namely that employees seem to genuinely believe in the work at SDOT. Participants praised their colleagues and said people do work hard.</p> <p>“My career (it’s not just a job) is in transportation,” said one person. “We’re here because of a sense of service.”</p> <p>In an email to employees, Sparrman said he wanted to involve employees in a collaborative process to create an action plan. “Sharing these findings and continuing the conversations about them is an important first step.</p> <p>“I’m determined that we make the most of this opportunity to address the issues we face.”</p> <p>Several employees told Crosscut they’re hopeful that Durkan will back up her pledges to address the city’s workplace environment with action.</p> <p>Durkan has yet to announce steps for hiring a permanent director of SDOT. Several weeks after Durkan took office, Kubly resigned — not fired, exactly, but not asked to remain either.</p> <p>In an email, Durkan spokesperson Stephanie Formas said Sparrman is conducting a “thorough evaluation of SDOT and the City’s transportation system,” including “on project delivery, organizational structure, culture, and day-to-day operations.”</p> <p>When that is complete in the coming weeks, Durkan will begin the process for finding a permanent director.</p>

<b>HEADLINE</b>	<b>04/02 Everett appeals bikini barista case</b>
<b>SOURCE</b>	<a href="http://mynorthwest.com/944853/everett-files-federal-court-appeal-in-bikini-barista-case/">http://mynorthwest.com/944853/everett-files-federal-court-appeal-in-bikini-barista-case/</a>
<b>GIST</b>	<p>EVERETT, Wash. (AP) — Lawyers for the city of Everett have filed a brief in the 9th U.S. Circuit Court of Appeals asking for a temporary ban on a dress code for bikini baristas to be lifted.</p> <p>The Daily Herald reported Monday that lawyers contend U.S. District Court Judge Marsha Pechman erred in ruling that it was unconstitutional for the city to require coffee stand employees to cover up at work.</p> <p>The 66-page brief argues that the judge was wrong in suggesting that the rules were vague in describing what body parts can’t be on display. They also said the judge failed to consider evidence that the stands are adult-oriented businesses with associated crime problems.</p> <p>The city wants to require such workers to at minimum dress in tank tops and shorts.</p> <p>Bikini stand owners and their employees argued the dress code puts their civil rights at risk.</p>

<b>HEADLINE</b>	<b>04/02 Apple, cherry industry wary trade war</b>
<b>SOURCE</b>	<a href="http://mynorthwest.com/944684/washingtons-apple-and-cherry-industry-wary-of-trade-war/">http://mynorthwest.com/944684/washingtons-apple-and-cherry-industry-wary-of-trade-war/</a>
<b>GIST</b>	<p>SPOKANE, Wash. (AP) — Cherry and apple growers in Washington state are worried their exports to China will be hurt by a trade war that escalated on Monday when that country raised import duties on a \$3 billion list of products.</p>

	<p>China buys Washington-grown cherries, apples and pears, which are all included in the trade dispute.</p> <p>Kate Woods, a vice president of the Northwest Horticultural Council in Yakima, Washington, says they hope the issue is resolved before cherry harvest begins in June.</p> <p>The council handles international trade issues for the agriculture industries in Washington, Oregon and Idaho.</p> <p>China is the top export market for Washington cherries, buying 2.9 million cases worth \$127 million per year.</p> <p>China also bought about \$50 million worth of apples and \$1.5 million worth of pears from Washington last year.</p>

<b>HEADLINE</b>	<b>04/02 Seattle eyes massive parking changes</b>
<b>SOURCE</b>	<a href="http://mynorthwest.com/944893/seattle-parking-changes/">http://mynorthwest.com/944893/seattle-parking-changes/</a>
<b>GIST</b>	<p>Tenants without cars won't have to pay for parking spots in their building after the Seattle City Council passed on Monday legislation that allows unbundling in leases, among other changes.</p> <p>The changes outlined in Council Bill 119221 (approved by the council 7-1), would require the unbundling of parking space rental from multi-family dwellings and lease agreements in new and existing structures with 10 dwelling units or more. Tenants would have the option to refuse a parking space, which would mean paying less for rent. The legislation would also allow building owners to make parking available for public use.</p> <p>Councilmember Mike O'Brien says there's actually plenty of parking in Seattle.</p> <p>"We have lots of off-street parking that costs people money that they're choosing not to use," O'Brien said. "The shortage is not a shortage of parking. It's a shortage of free on-street parking in our congested neighborhoods."</p> <p>A parking study done by King County Metro found that 30-35 percent of parking in existing buildings goes unused. The changes would allow flexibility in deciding how much parking to include in development projects in areas with frequent transit.</p> <p>The City of Seattle says the legislation would enact several parking suggestions to improve housing affordability and neighborhood livability.</p> <p>"We know that an over supply of cheap parking has a negative impact on Seattle – it increases driving and traffic congestion, increases our carbon footprint, and makes housing more expensive," Councilmember Rob Johnson said in a news release following the vote.</p> <p>The Seattle Times reports that new apartments came with an average of 1.5 parking spots in 2004. That number dropped to 0.6 spots in 2017. Supporters say that allowing developers to eliminate parking altogether would lower the cost of construction and thus, lower the cost of rent. Ultimately, no parking would establish a cheaper cost of living.</p> <p>"People who cannot afford a car or choose not to own a car should not have to pay anything for parking," Donald Shoup, author of The High Cost of Free Parking, said in a news release. "If drivers don't pay for their parking, someone else has to pay for it, and that someone is everyone. But a city where everyone happily pays for everyone else's free parking is a fool's paradise."</p>

HEADLINE	<b>04/02 Turkey, Russia ties growing closer</b>
SOURCE	<a href="http://abcnews.go.com/International/wireStory/turkey-russia-deepen-ties-amid-troubled-relations-west-54171413?cid=clicksource_76_4_article%20roll_articleroll_hed">http://abcnews.go.com/International/wireStory/turkey-russia-deepen-ties-amid-troubled-relations-west-54171413?cid=clicksource_76_4_article%20roll_articleroll_hed</a>
GIST	<p>Ties between Russia and Turkey are growing closer than ever, as Russia runs into widespread diplomatic fallout from the poisoned spy scandal and Turkey's relations with its Western allies worsens over human rights issues and its military operations against Kurdish militia in Syria.</p> <p>Russian President Vladimir Putin heads back to Turkey on Tuesday, joining Turkish President Recep Tayyip Erdogan at a symbolic ground-breaking ceremony for a Russian-made nuclear power plant being built on Turkey's Mediterranean coast at Akkuyu. On Wednesday, Putin, Erdogan and Iranian President Hassan Rouhani are expected to hold a summit in the Turkish capital of Ankara to discuss Syria's future.</p> <p>Turkey and Russia have put aside their traditional rivalries and differences on regional issues to forge strong economic ties. In December, they finalized an agreement for Turkey to purchase Russia's long-range S-400 missile defense system, a deal that raised eyebrows among some of Turkey's NATO allies. Aside from the power plant, the two countries are also building the "Turkstream" pipeline to transport Russian gas to Turkey.</p> <p>"Turkish-Russian relations are in a better mood compared with two years before . both parties are working together," said Mitat Celikpala, a professor of international relations at Istanbul's Kadir Has University.</p> <p>"They managed to compartmentalize issues," Celikpala said, citing Turkish and Russian divisions, including over the divided island of Cyprus and Russia's 2014 annexation of Crimea. "If you set aside all those issues . they are good partners for the resolution of immediate interests."</p> <p>Their warming relations come as ties between European Union nations and Turkey have become increasingly testy.</p> <p>Turkey's EU membership talks have stalled and many EU countries have voiced concerns over the Turkish government's growing authoritarian turn and its crackdown on rights and freedoms, especially following an attempted coup in 2016 that Turkey blames on a U.S.-based Islamic cleric.</p> <p>Turkey in turn, accuses EU countries of supporting Kurdish rebels as well as the alleged perpetrators of the 2016 failed coup.</p> <p>Turkey's relations with the United States have fared even worse, with Turkey accusing Washington of harboring the cleric, Fethullah Gulen, and backing Syrian Kurdish militia that Turkey considers to be terrorists.</p> <p>Last week, Turkey announced it would not be following NATO and EU allies in ousting Russian diplomats in response to the poisoning in Britain of a former Russian spy. Britain has accused Russia of being behind the nerve agent attack on former double agent Sergei Skripal and his daughter, prompting nearly two dozen nations to expel over 150 Russian diplomats. Russia has responded by expelling a similar number of envoys.</p> <p>Turkey condemned the nerve agent attack on British soil without naming Russia, adding that it enjoyed "positive" relations with Moscow.</p> <p>"Just because some countries took a step based on an allegation, we don't have to take the same step," Erdogan said.</p> <p>Putin and Erdogan have met several times in the past year and regularly speak on the phone.</p>

<b>HEADLINE</b>	<b>04/02 Inspirational quotes Martin Luther King Jr</b>
<b>SOURCE</b>	<a href="http://abcnews.go.com/US/martin-luther-king-jr-10-inspirational-quotes/story?id=54097261">http://abcnews.go.com/US/martin-luther-king-jr-10-inspirational-quotes/story?id=54097261</a>
<b>GIST</b>	<p>Martin Luther King Jr., whose assassination was 50 years ago this week, was known for his soaring oratory as well as his leadership of the U.S. civil rights movement.</p> <p>Here are some inspirational quotes from the minister and civil rights leader who was gunned down in Memphis on April 4, 1968:</p> <ol style="list-style-type: none"> <li>1. "Injustice anywhere is a threat to justice everywhere." (Letter from Birmingham City Jail)</li> <li>2. "If a man hasn't discovered something he will die for, he isn't fit to live." (Preview of the "Dream" at Detroit March)</li> <li>3. "As long as there is poverty in this world, no man can be totally rich even if he has a billion dollars." ("The American Dream")</li> <li>4. "Negroes of the United States, following the people of India, have demonstrated that nonviolence is not sterile passivity, but a powerful moral force..." (Nobel Prize Acceptance Speech)</li> <li>5. "Civilization and violence are antithetical concepts." (Nobel Prize Acceptance Speech)</li> <li>6. "Everybody can be great ... because anybody can serve. You don't have to have a college degree to serve. You don't have to make your subject and verb agree to serve. You only need a heart..." ("The Drum Major Instinct," Ebenezer Baptist Church)</li> <li>7. "We are caught in an inescapable network of mutuality, tied in a single garment of destiny. Whatever affects one directly, affects all indirectly." (Letter from Birmingham City Jail)</li> <li>8. "We must use time creatively, in the knowledge that the time is always ripe to do right." (Letter from Birmingham City Jail)</li> <li>9. "Somewhere we must come to see that human progress never rolls in on the wheels of inevitability. It comes through the tireless efforts and persistent work of dedicated individuals..." (Oberlin College Commencement)</li> </ol>

	10. “Mankind must put an end to war or war will put an end to mankind.” (Oberlin College commencement)

<b>HEADLINE</b>	<b>04/03 Seattle schools wary ‘punish Muslim day’</b>
<b>SOURCE</b>	<a href="https://www.kiro7.com/news/local/seattle-schools-to-have-increased-security-tuesday-over-social-media-post/726058692">https://www.kiro7.com/news/local/seattle-schools-to-have-increased-security-tuesday-over-social-media-post/726058692</a>
<b>GIST</b>	<p>Seattle Public Schools is warning parents that it will have extra security at its schools on Tuesday as a result of a social media post called “Punish a Muslim Day.”</p> <p>The campaign started in the United Kingdom and has gone viral.</p> <p>School officials sent a letter to parents on Monday warning about the post and that it would have increased security.</p> <p>The letter said:</p> <p>“Dear families,</p> <p>In recent weeks, a social media post from the United Kingdom began promoting April 3 as “Harm a Muslim” Day. Social media can spread messages quickly, and some of SPS students are talking about this. While this activity seems to be focused in Europe, in an abundance of caution, there will be increased security at schools. If you hear of something, please contact the district Safety &amp; Security office at 206-252-0510 or call 9-1-1 if it is an emergency. As a school system, we will do everything we can to make sure our students are safe while in our care. Anyone who feels unsafe or targeted for any reason should immediately contact a trusted adult. Harassment of any kind is not, and will not, be tolerated in Seattle Public Schools.</p> <p>Thank you.</p>

<b>HEADLINE</b>	<b>04/02 Seattle’s rodent problem getting worse?</b>
<b>SOURCE</b>	<a href="http://q13fox.com/2018/04/02/rat-city-is-seattles-rodent-problem-getting-worse/">http://q13fox.com/2018/04/02/rat-city-is-seattles-rodent-problem-getting-worse/</a>
<b>GIST</b>	<p>SEATTLE -- Rats. They’re every city’s dirty little secret, and Seattle is no exception.</p> <p>“There’s a lot more than people would like to think,” said Don Pace, an inspector for Seattle &amp; King County Public Health’s Rodent Prevention Program.</p> <p>Exactly how many live in the region? Pace said there’s no way to count, but “it’s a lot.”</p> <p>“I’d say we’re outnumbered,” said Chris Pape, a Seattle &amp; King County Public Health inspector in-training who previously worked for a local pest control company.</p> <p>According to Orkin’s annual survey, Seattle is the ninth rattiest city in the country, and some say it’s getting worse.</p> <p>“I’m extremely busy,” said Eric Oland, better known as “the rodent guy.”</p> <p>Oland owns Puget Sound Rodent Exclusion Specialist and has been ridding homes of rats for 20 years. These days, he has more business than he can handle. “It’s pretty much constantly ringing off the hook.”</p>

	<p>The question is: Is the rodent population growing along with the city?</p> <p>“I think certainly people are being more vocal,” said Oland.</p> <p>Pest control specialists and King County health inspectors agree: There aren’t more rats, just more sightings and more people calling to complain. Two things that may be contributing to the issue are demolition and new construction.</p> <p>“Anytime you disturb the environment, they’re going to scatter,” said Pace.</p> <p>Pace added that sometimes tearing down an old home can push not only the human residents out but the rat residents as well. That’s why ever since January 2017, the city of Seattle no longer issues demolition permits unless the applicant includes a plan for rat eradication.</p> <p>The King County Health Department is also doing its part to contain the rodent problem by baiting the sewers, but they admit they are not trying to kill all the rats.</p> <p>“They’ve been here longer than we’ve been here -- to expect to get rid of them is impossible,” said Pace.</p> <p>Oland said he gets the most calls from residents living in Seattle neighborhoods north of the cut. That includes Ballard, Fremont, the U-district, Wallingford and north Seattle. Oland goes as far as to say that at some point, every home in Seattle will have a rat problem.</p> <p>“They all have rats,” said Oland. “They think as long as they don’t see them, then they’re not in the living space, but they’ll be thriving in the attic space or in the crawlspace.”</p> <p>A covered home and consistent food supply are the keys to keeping rats around older homes; those that have holes, rock walls and greenery are a rats’ paradise.</p> <p>There are a few things you can do to keep the rats out: don’t leave bird or pet food out, keep your trash neat, tend to your compost but most of all, don’t ignore the problem. If you think you have rats, call someone because the problem can only get worse.</p> <p>“It doesn’t take long to have them get seriously out of control,” said Oland.</p>

<b>HEADLINE</b>	<b>04/02 OIG critical FBI handling polygraphs</b>
<b>SOURCE</b>	<a href="https://www.hstoday.us/briefings/government-reports-and-summaries/oig-fbis-handling-of-unresolved-polygraph-results-may-cause-security-vulnerabilities/">https://www.hstoday.us/briefings/government-reports-and-summaries/oig-fbis-handling-of-unresolved-polygraph-results-may-cause-security-vulnerabilities/</a>
<b>GIST</b>	<p>The OIG has found that the way the FBI handles unresolved employee polygraph results may lead to security and operational vulnerabilities.</p> <p>DoJ Inspector General Michael E. Horowitz announced that a classified report examining the FBI’s handling of polygraph results in applicant and employee examinations has been submitted to Congress, DOJ leadership, and the FBI. The report focuses on the FBI’s process for investigating and addressing “unresolved results,” or results that found alleged deception or use of countermeasures by the applicant or employee.</p> <p>A public, unclassified summary of the report’s findings has been released, which found that investigations and adjudications of unresolved results in employee polygraph examinations were often lengthy, taking an average of 357 days. The report also highlighted that the FBI allowed certain employees who were unable to pass multiple polygraph examinations to retain access to highly sensitive information. As a result, some employees were allowed to retain access to sensitive information, systems, and spaces for extended periods of time without the risk assessments that FBI policy requires — potentially posing a security risk.</p>

In addition, FBI personnel conducting investigations in response to unresolved employee polygraph examinations did not always share information regarding alleged employee conduct with the FBI office responsible for investigating employee misconduct or with the OIG and the FBI did not fully document or centralize its record keeping of polygraph case information, including, at times, information explaining the test results. Finally, in a sample of 12 cases, the OIG found that that the FBI did follow its policy of not offering employment to applicants whose initial polygraph or retest examination results were unresolved.

The classified report makes eight recommendations for the FBI to improve the timeliness, consistency, and thoroughness of investigations and adjudications of unresolved polygraph results; to improve the identification and handling of derogatory information developed during polygraph examinations and AIU investigations; and to improve the documentation, tracking, and record keeping of unresolved polygraph results.

“It’s essential that the FBI address, promptly and completely, the vulnerabilities and other issues we identified,” said DoJ Inspector General Michael Horowitz. “To address the risk areas, our classified report made eight recommendations to the FBI, and the FBI agreed with all of them.”

<b>HEADLINE</b>	<b>04/03 Anti-Semitism serious concern Europe</b>
<b>SOURCE</b>	<a href="http://www.homelandsecuritynewswire.com/dr20180403-european-antisemitism-trends-to-watch-in-9-countries-in-2018">http://www.homelandsecuritynewswire.com/dr20180403-european-antisemitism-trends-to-watch-in-9-countries-in-2018</a>
<b>GIST</b>	<p>Anti-Semitism is once again a serious concern in Europe. Incidents are rising in several countries. Violent attacks, assaults and vandalism against the French Jewish community are making headlines nearly every day. Earlier this week, Jews in the United Kingdom took to the streets to protest deep-seated anti-Semitism in the Labor Party and the failure of political leaders on the left, including Labor Party leader Jeremy Corbyn, to adequately address their concerns.</p> <p>ADL says that an ADL’s international affairs team recently visited six European capitals including Paris, Berlin, Stockholm, Brussels, Budapest, and Rome to meet with Jewish community leaders and government officials to discuss concerns about rising anti-Semitism on the continent. They shared ADL’s best practices for confronting anti-Semitism, as well as information and data on rising anti-Semitic incidents in the United States.</p> <p>Here’s ADL’s assessment of the current situation in nine European countries:</p> <p><b>France</b></p> <p>The French Jewish community of almost 500,000 lives in a state of constant insecurity, despite their government’s good-faith efforts to address anti-Semitic violence. The recent murder of Mireille Knoll, an 85 year-old Holocaust survivor, was the 11th anti-Semitic murder in France over the past twelve years, a stark contrast to the absence of such crimes in the prior three decades. Frequent assaults on Jews – on average, twice per week – also drive their sense of insecurity. In early February, ADL met in Paris with officials in the prime minister’s office, responsible for coordinating the government’s efforts against anti-Semitism and racism, to discuss ADL’s work on cyberhate, a problem the French government has identified as a major factor in radicalization. We also met with the head of the Jewish community’s security group to discuss extremism in France and offered our assistance of ADL experts.</p> <p><b>Germany</b></p> <p>German Jews are worried about anti-Semitism among the new migrant and refugee population, many from Syria and Iraq, and by the rise of the far-right Alternative for Germany (AfD) party, which now holds 13 percent of the parliament and is the third largest party. In March, ADL met in Berlin with organizations that monitor and combat anti-Semitism in Muslim communities and on the far-right and with senior government officials whose work directly impacts the Jewish community and integration of new immigrants. Recent incidents include the anti-Semitic bullying of Jewish schoolgirl in Berlin by her Muslim classmates.</p>

**Poland**

In our public statements and private conversations with Polish officials, ADL has condemned the outbreak of anti-Semitic rhetoric on Poland, following the adoption of a libel law on Polish involvement in the Holocaust. The Polish Jewish community took the extraordinary step on 19 February to issue an open letter, saying “Polish Jews do not feel safe in Poland” due to “the current wave of anti-Semitism [which] arose in response to” the libel law.

**Sweden**

Synagogues were targeted after President Trump announced U.S. recognition of Jerusalem as Israel’s capital, with Molotov cocktails thrown at the Gothenburg synagogue and an anti-Semitic demonstration held in front of the Malmo synagogue. Together with Swedish Jewish community representatives, ADL met with the Swedish Police Authority in February to discuss training their officers about extremism.

**U.K.**

For the first time in years, British Jewish leaders felt compelled to call a public demonstration to protest the constant stream of anti-Semitic incidents in the Labor Party and the failure of its leader, Jeremy Corbyn, to address anti-Semitism seriously. Their “Enough is Enough” event was widely covered in British media, and jump-started a serious public conversation about the problem.

**Hungary**

The Hungarian Jewish community of almost 100,000 has experienced only a few anti-Semitic assaults in recent years, but is concerned about the political atmosphere. Over the past months, leading up to the 8 April election, political campaigns have featured the Jewish financier George Soros as an enemy of the state, intent on flooding Hungary with Muslim immigrants. While the billboards and posters do not feature overt anti-Semitic images, Jewish community leaders worry that the campaign appeals to anti-Semitic sentiment in the Hungarian public. Hungary scored poorly in ADL’s Global 100 survey of anti-Semitic attitudes with a score of 41 percent, compared to 9 percent in the United States and 25 percent on average in the European Union. In March, ADL met Jewish community leaders, extremism researchers, and U.S. Embassy officials. ADL made a direct request to a senior official in the prime minister’s office to cease campaigns that feature George Soros.

**Iceland and Denmark**

The right to circumcise Jewish newborn boys is under threat in Iceland and Denmark. While Iceland is home to just a hundred or so Jews, ADL is deeply concerned that a circumcision ban there could set a precedent in Europe, especially for Denmark, home to 6,000 Jews, where a public petition in parliament is gaining signatures and public support for a ban is around 80 percent. ADL submitted a strong letter to the Icelandic Parliament, warning that a ban would not only infringe on religious freedom, but also make Iceland a darling of neo-Nazis and other anti-Semitic bigots, who would see that decision as a step to making Iceland judenrein, free of Jews.

**Russia**

Following the tragic fire at a shopping mall in Siberia that killed 64 people on 25 March, anti-Semitic posts began to appear on Russian social media, suggesting that Jews were responsible and murdered the victims to get blood for Passover matzah, a classic blood libel. Using our social media search capabilities, ADL says it was able to assess the prevalence of these anti-Semitic posts across multiple platforms and reassure Russian Jewish leaders of the limited presence on Twitter, YouTube, Facebook, and VK (a popular Russian platform similar to Facebook). This came on the heels of remarks by President Vladimir Putin suggesting that Jews and other minorities may have been behind the meddling in the 2016 U.S. elections.

**HEADLINE** 04/02 Panel: change deadly force inquests

**SOURCE** <https://www.seattletimes.com/seattle-news/crime/history-of-transparency-king-county-panel->

	<a href="#"><u>recommends-overhaul-of-police-deadly-force-inquests/</u></a>
GIST	<p>A King County committee is calling for significant changes in the way inquests into the police use of deadly force are conducted, including giving jurors the option of suggesting ways to prevent fatal confrontations.</p> <p>In an 89-page report, the six-member review committee recommended that county judges and prosecutors no longer oversee inquests and that they be replaced with hearing examiners and staff attorneys.</p> <p>Jurors also should be given the opportunity to hear summary statements from various attorneys, including those representing the families of those killed by police. The move would add an element of debate to a narrow process that has been seen by some as biased toward law enforcement.</p> <p>Inquests should continue to focus on fact-finding, but with a clear message that jurors should not affix fault on police or the person killed — a definition that has been somewhat lost in the process as people look for a verdict.</p> <p>But inquests should not serve as a “passive consumer” of the underlying investigation into the death, but as “robust, probing and public review mechanism,” the committee said in a report submitted to King County Executive Dow Constantine over the weekend.</p> <p>Constantine, who formed the committee in December to examine how the county conducts inquests into shooting deaths and other fatalities at the hands of police, was to unveil the panel’s key proposals during his state of the county speech Monday morning. But the speech was canceled when demonstrators protesting construction of a new county youth jail disrupted the event.</p> <p>Constantine plans to review the report and seek public comment before making any changes to the inquest process.</p> <p>Declaring that families, law enforcement and the community need to know the facts, Constantine said he will craft a directive that provides the “greatest opportunity to understand what happened in these tragic circumstances, and help ensure future inquests — and the incidents that make them necessary — are as rare as we can possibly make them.”</p> <p>In January, several pending inquests were temporarily halted — and no new inquests were to be ordered — until the review committee completed its work.</p> <p>And, in the same month, the Metropolitan King County Council dealt with one issue when it unanimously adopted legislation to provide publicly funded legal representation during inquest proceedings to families of those killed — something police officers have been routinely provided.</p> <p>In a statement responding to the report, Corey Guilmette, an attorney at the Public Defender Association, said, “The Inquest Review Committee has rightfully highlighted the widespread community concern that the current inquest process is one sided in favor of law enforcement, and too narrow in scope to answer the most important community questions in the aftermath of police killings.”</p> <p>He commended the committee for its hard work, saying it incorporated many key reforms identified by community leaders that will “create a fairer and more meaningful inquest process.”</p>

HEADLINE	04/02 Instagram effect? Area hikers doubled
SOURCE	<a href="https://www.seattletimes.com/seattle-news/data/instagram-effect-number-of-seattle-area-hikers-has-doubled-in-less-than-10-years-data-show/">https://www.seattletimes.com/seattle-news/data/instagram-effect-number-of-seattle-area-hikers-has-doubled-in-less-than-10-years-data-show/</a>
GIST	Let me tell you about my most recent hiking adventure.

It was a sunny, warm Sunday in late summer, and my friends and I decided to hit Snow Lake, a popular spot less than an hour's drive from Seattle. We probably left a little later in the morning than we should have, and trying to find parking was not unlike Capitol Hill on a Saturday night. The trail was jampacked, a steady stream of people and dogs all the way up and all the way down — not quite the escape from crowded city life we'd hoped for.

I suspect a lot of folks around here can relate.

More than 940,000 adults who live in the Seattle area say they've been hiking in the past 12 months — double the number from 2008, according to survey data from market-research firm Nielsen.

Part of the reason there are so many more hikers here is the same reason that traffic is so much worse these days — there's just a lot more people living here. But that's not the whole story.

In fact, the increase in the number of hikers is seven times greater than our population growth over the past decade.

Hiking has always been popular in Seattle, for obvious reasons. But right now, hiking is having its moment.

In 2008, less than a quarter of local adults said they hiked, according to Nielsen. Last year, it was 41 percent.

That ranks Seattle third for hiking among the 75 largest metro areas included in the survey. Salt Lake City is No. 1, with 43 percent of adults saying they hike. Portland comes in second, by just a fraction ahead of Seattle.

The place where hiking is least popular? Miami, by a fairly wide margin. It's not that you can't hike in Florida, which has more than 5,000 miles of trails. But if you've ever wondered how many people would choose to trek through the Everglades, fighting off mosquitoes, rather than hang out at the beach — well, here's your answer: 4 percent. That's how many Miami adults have been on a hike in the past 12 months.

The data show that hiking has grown in popularity pretty much everywhere over the past decade — even in Miami, a bit — but the increase here in Seattle has easily outpaced the national average.

“Any hike within an hour, an hour and a half of Seattle has seen significant increase,” said Kindra Ramos, director of communications and outreach for the Washington Trails Association (WTA). “Folks are looking (for hikes) in that 3- to 6-mile range. That's a lot of what's off the I-90 corridor.”

Ramos says there's been a surge in visitors to the WTA's website, and in the number of folks leaving trip reports, which are kind of like Yelp reviews for hikes.

What's driving the increase?

For the most part, millennials.

According to Nielsen, there's been a significant shift in the age demographics of hikers in the U.S. In 2008, adults age 35-49 had the highest rate of participation in the activity. Not anymore. Nationally, interest in hiking has doubled among those 18-34, surging from a participation rate of 15 percent in 2008 to 30 percent last year. This change has shaved more than three years off the median age of the American hiker (it's now 38).

It seems likely that Seattle's hiking boom is related to the influx of young newcomers to this area — and well over half of millennial-age residents here say they've been hiking in the past 12 months, according to the data.

Some people point to the 2012 best-selling memoir “Wild” by Cheryl Strayed (and the subsequent movie), about the author’s cathartic, 1,100-mile trek on the Pacific Crest Trail, as sparking a new interest in hiking among young people.

And then there’s the Instagram effect.

Maybe you felt a twinge of jealousy seeing your friends’ awesome hiking photos on social media. The next thing you know, you’re on the mountain, taking your own awesome photos — and, naturally, sharing them on social media.

Nielsen data show that people who hike are 43 percent more likely than average to have used Instagram in the past 30 days.

Ramos thinks it’s because folks need that outdoors “fix” now more than ever.

“As our lives get busier and busier, and more and more technology-reliant,” she said, “the call of the mountains is even stronger.”

While the influx of new hikers presents some challenges in terms of overcrowding and trail maintenance, Ramos believes the positives outweigh the negatives.

“There are places where we need to be thoughtful, and where the crowds do have an impact. But are there too many people out hiking?” she said.

“NO. I think it’s an opportunity — an opportunity to inspire more people to become advocates for these places.”

Ramos points out that hiking’s surge in popularity also represents an economic opportunity. The outdoor-recreation industry is booming across the country, and particularly so in Washington.

“And it’s a chance to invest in local communities,” she said. “Those gateway communities — Darrington, Winthrop, Trout Lake — those places where people stop before they start their next adventure.”

<b>HEADLINE</b>	<b>04/02 Russia consulate in Seattle closes</b>
<b>SOURCE</b>	<a href="https://www.seattletimes.com/seattle-news/u-s-state-department-officials-stand-guard-outside-closed-russian-consulate-in-seattle/">https://www.seattletimes.com/seattle-news/u-s-state-department-officials-stand-guard-outside-closed-russian-consulate-in-seattle/</a>
<b>GIST</b>	<p>The mood on the 25th floor of One Union Square was subdued compared to the flurry of activity that enveloped the downtown Seattle office last week.</p> <p>Monday was the deadline for the Russian Consulate to close in Seattle. Security officers from the U.S. State Department stood guard outside the office suite, which was the last Russian Consulate on the West Coast. A sign with orange writing behind officers, in the entry of the consulate, read “Closed.”</p> <p>A State Department spokesperson said personnel accredited to the Seattle consulate, including the Consul General, have to transfer to another U.S. mission or leave the country and that the office space and residence can no longer be used. “The Russian government will no longer be able to use the properties for diplomatic consular purposes. We will follow our standard procedures and fulfill our responsibilities appropriately,” the spokesman said.</p> <p>Last Thursday, the unmistakable sound of moving, packing tape being stretched across boxes, emanated from behind the window where visitors to the consulate were greeted. A man working at the consulate on Thursday told a reporter, “Sorry sir. There is nothing I can say. Just regular moving of boxes.”</p>

	<p>The consulate and the consulate residence in Madison Park were ordered closed by the Trump administration in retaliation for Russia's alleged use of a nerve agent to poison a former Russian intelligence agent and his daughter in Britain. The United States expelled 60 Russian diplomats and closed Russia's Seattle operation, which the White House identified as an outpost for intelligence agents.</p> <p>Russia responded by closing the U.S. Consulate in St. Petersburg and expelling 60 U.S. diplomats.</p> <p>A former special agent in charge of the FBI Seattle office told The Seattle Times that consulates can be used to run covert activities and that the Seattle area has some tempting targets, such as Naval Base Kitsap with its fleet of Trident submarines and companies like Boeing and Microsoft.</p> <p>On Thursday, packed boxes were being ferried down from the 25th floor to the loading dock and into a mid-sized moving van. On Monday, the loading dock was occupied by delivery trucks. Other than the security officers standing guard, there is little trace left of the Russians. The only external remnant of the consulate was the sign designating reserved street parking on Sixth Avenue for consulate vehicles. Last week the spot was occupied by a black van with black tinted windows and consulate plates.</p> <p>The parking space was empty Monday.</p>

<b>HEADLINE</b>	<b>04/02 UN: Papua New Guinea still needs aid</b>
<b>SOURCE</b>	<p><a href="https://www.upi.com/Top_News/World-News/2018/04/02/UN-ships-food-to-Papua-New-Guinea-says-270K-still-need-aid-after-quake/2271522687895/?utm_source=fp&amp;utm_campaign=lh&amp;utm_medium=9">https://www.upi.com/Top_News/World-News/2018/04/02/UN-ships-food-to-Papua-New-Guinea-says-270K-still-need-aid-after-quake/2271522687895/?utm_source=fp&amp;utm_campaign=lh&amp;utm_medium=9</a></p>
<b>GIST</b>	<p>April 2 (UPI) -- More than one month after a 7.5-magnitude earthquake killed more than 160 people in Papua New Guinea, the World Food Program said some 270,000 people still require humanitarian assistance.</p> <p>The U.N. agency said Monday it airlifted 80 metric tons of nutrient-dense biscuits to the Pacific island -- enough to feed about 60,000 people.</p> <p>Sheikh Mohammed bin Rashid al-Maktoum, vice president and prime minister of the United Arab Emirates, provided the plane for the food delivery, WFP said.</p> <p>"More than 60 percent of [U.N. Humanitarian Response Depot] transports originate from Dubai. This makes Dubai WFP's largest humanitarian hub in the world, thanks to the excellent logistical facilities and ongoing Government support," said Stefano Peveri, head of UNHRD in Dubai.</p> <p>Before the earthquake hit February 26, Papua New Guinea was already experiencing food scarcity. About 60,000 people were "severely food insecure" before the temblor, the WFP said.</p> <p>"The earthquake and its aftershocks have further impacted people in the most vulnerable areas of the country, destroying root crops and vegetable gardens; the primary food sources in the affected area," a release from the agency said.</p>

<b>HEADLINE</b>	<b>04/02 NYC heaviest April snowfall in 36yrs</b>
<b>SOURCE</b>	<p><a href="https://www.upi.com/Top_News/US/2018/04/02/NYC-sees-heaviest-April-snowfall-in-36-years/1221522693337/?utm_source=fp&amp;utm_campaign=ls&amp;utm_medium=1">https://www.upi.com/Top_News/US/2018/04/02/NYC-sees-heaviest-April-snowfall-in-36-years/1221522693337/?utm_source=fp&amp;utm_campaign=ls&amp;utm_medium=1</a></p>
<b>GIST</b>	<p>April 2 (UPI) -- New York City woke up Monday morning to its largest April snowfall since 1982, accumulating more than half a foot in some areas, meteorologists said.</p>

Parts of the Bronx and Grammercy Park in Manhattan saw more than 6 inches of snow as of late morning Monday. The highest snowfall totals of more than 7 inches were in New York's Nassau and Westchester counties, New Jersey's Essex and Bergen counties, and Connecticut's Fairfield and New Haven counties, the National Weather Service said.

The snowfall didn't quite measure up to the accumulations seen during the region's four nor'easter storms this winter, but the totals were unusual for the month of April. The last time New York City had this much snow in April was in 1982, when there was about 10 inches of accumulation.

The rare April snowfall meant the New York Yankees had to postpone the team's opening home game against the Tampa Bay Rays. The league rescheduled the game for Tuesday afternoon, when there was expected to be a 90 percent chance of rain with a low of 40 degrees and high of 42 degrees.

FlightAware flight tracking website said flights into and out of LaGuardia, Newark and John F. Kennedy airports had the highest percent of cancelations and delays Monday. Accumulatively, about 175 flights were canceled and nearly 600 were delayed as of 4:15 p.m.

JFK International Airport tweeted that most delays were 15 minutes or less as of 1:30 p.m.

<b>HEADLINE</b>	<b>04/02 Fla. students question new security measures</b>
<b>SOURCE</b>	<a href="http://www.sun-sentinel.com/local/broward/parkland/florida-school-shooting/fl-florida-school-shooting-clear-backpacks-20180330-story.html">http://www.sun-sentinel.com/local/broward/parkland/florida-school-shooting/fl-florida-school-shooting-clear-backpacks-20180330-story.html</a>
<b>GIST</b>	<p>Marjory Stoneman Douglas High created a new environment Monday, with clear backpacks, bag searches, I.D. lanyards, police officers at every entrance and a student body skeptical that any of it will make them safer.</p> <p>District officials say Stoneman Douglas, the site of a Feb. 14 shooting that killed 17, is serving as a pilot for possible district-wide security changes. Some schools already have more cops on campus, and dozens are now armed with AR-15 rifles. The district says it's expediting plans to provide fencing and gates at about 100 schools.</p> <p>The district limited the number of places students could enter Stoneman Douglas in the morning to four, with guards stationed at each spot. Metal-detecting wands weren't being used Monday but are being considered, officials said.</p> <p>"This is still being explored by the district. No decision or date has been set for the use of metal-detection wands," district spokeswoman Cathleen Brennan said.</p> <p>The new precautions didn't prevent the school from receiving an emailed bomb threat Monday, which the Broward Sheriff's Office determined to be unfounded.</p> <p>"The BSO bomb squad responded and swept the school with negative results," Sheriff's Office spokeswoman Keyla Concepcion said. "Additional deputies were placed on campus as a precaution. The investigation is ongoing."</p> <p>The school district said the students were not evacuated.</p> <p>On Monday, the first day back from Spring Break, administrators handed out clear backpacks — the only ones allowed at the school for the time being, officials say. The school confiscated non-clear backpacks, returning them to students at the end of the day. Band instruments and sports equipment were left with teachers and coaches.</p> <p>Students were also given lanyards to hold photo identification cards, which they'll be required to wear at</p>

all times.

Are clear backpacks at Stoneman Douglas an effective deterrent? Are they a privacy issue? Some students compared their school to an airport, others to a prison. Few voiced support for the changes.

“Do you want me to take my shoes off when I walk into school as well?” tweeted Carly Novell, a senior at the school and editor of the Eagle Eye student newspaper.

Ariana Lopez, a junior at the school tweeted, “First member of my family to be in prison — oh wait. I'm in school, sorry, can't tell the difference without my glasses.”

On Monday morning, many students entered the campus carrying plastic grocery bags containing their books and other belongings. Students reported a number of bag searches by school officials.

“Got my brown paper lunch bag checked today while walking to class. Lady saw my sandwich and figured it wasn't a threat,” tweeted Christy Ma, an Eagle Eye editor.

### **No backpacks**

Returning to school after spring break on Monday, April 2, 2018, students at Marjory Stoneman Douglas High School carry their items in plastic bags instead of traditional backpacks. (Joe Cavaretta/Sun Sentinel) The police presence was heavy Monday and will remain so at least until the end of the school year, officials say. Gov. Rick Scott is providing up to eight Florida Highway Patrol officers to guard the school, and extra Broward Sheriff's deputies and district police officers are also stationed there.

The backpacks were donated by Walmart and the Broward Education Foundation. Many students posted photos of them on Twitter, along with sarcastic comments.

One student complained about the smell of her bag, comparing it to “the inflatable pool toys when they're immediate taken out of the box.” Another said the bags are bound to get mixed up when everyone has the same one.

Student activist Jaelyn Corin accessorized her bag with buttons that said, “Vote,” “March for Our Lives,” and “MSDStrong.”

“They should've been given to a school that actually needs the supplies,” she tweeted. “But since we're stuck with them, I decided to make the most out of the situation & decorate!”

Delaney Tarr, who has been a leader in the student movement to fight for tighter gun laws, tweeted, “Starting off the last quarter of senior year right, with a good ol' violation of privacy!”

Kyrah Simon, a 17-year-old junior, questioned the benefits of the clear backpacks.

“I think it's the illusion of security, and it's not going to accomplish anything, except make students feel like their privacy is being violated,” Simon told the South Florida Sun Sentinel Monday.

Holden Kasky, 16, a ninth-grader with autism and the brother of student activist Cameron Kasky, hand-wrote a letter to Superintendent Robert Runcie asking the district to reconsider the backpack rule. He said it makes his fellow students uncomfortable, particularly girls who may carry feminine products.

“I don't want people to feel uncomfortable or judged,” he wrote in the letter his father Jeff posted on Twitter. “If you really want to bring a weapon to school, you'll [still] be able to hide it.”

Runcie responded to Holden, “we will continue to re-evaluate and make changes based on experience and feedback from you and other students.”

Runcie told the Sun Sentinel the clear backpacks are “an initial measure, not a permanent one.”

He said the district may allow other backpacks after the district sees how well the wands work. The district is preparing a security assessment of all schools as part of a grant application to receive state dollars, he said.

Many students and parents have been on edge in the past few weeks.

In addition to the shooting, there have been a string of other incidents at the school, including a student making a threat on social media, two students being arrested for bringing knives to school and the brother of killer Nikolas Cruz being arrested for trespassing on the campus.

The new policies are an attempt to balance convenience and privacy with safety and security, Stoneman Douglas Principal Ty Thompson wrote in a weekend memo to parents. He said these policies may be facing some adjustment in the coming weeks.

“It is very difficult to balance both convenience/privacy with safety/security; if there is more of one, the other often suffers, but I will do my best to balance the two,” he wrote.

<b>HEADLINE</b>	<b>04/02 DOJ sues Calif. over sales federal land</b>
<b>SOURCE</b>	<a href="https://www.cbsnews.com/news/trump-sues-california-over-sales-of-u-s-lands/">https://www.cbsnews.com/news/trump-sues-california-over-sales-of-u-s-lands/</a>
<b>GIST</b>	<p>The Justice Department is suing California over its attempt to block the sale of federal lands within the state's borders, CBS News' Paula Reid reports. Fearing that President Trump and the GOP-majority Congress would move to sell off federal lands, California enacted a law in October seeking to penalize anyone who attempts to transfer federal lands.</p> <p>The California law gives the state the first right to buy federal lands, to arrange for a specific buyer, as well as the ability to block the sale, donation or exchange of federal lands by the federal government or to any other person or entity. The Justice Department is calling this another "extreme" law passed by California and argues the U.S. Constitution empowers the federal government to determine when lands are sold.</p> <p>The federal government owns about 640 million acres of land in the U.S. (28 percent of all land). Most of those acres are in the western U.S. The federal government owns around 46 percent of the land in California.</p> <p>The U.S. government says California's law, which took effect Jan. 1, is delaying land sales — even for projects that have been in the works for years — and is depressing their value. The auction of 1.7 acres owned by the U.S. Postal Service was suspended when nobody bid, and a developer looking to purchase property at the now-closed Naval Air Station Alameda has requested a delay, the lawsuit contends.</p> <p>The lawsuit also cites the sale of Army property east of San Francisco, which the state declined to purchase. The State Lands Commission has requested information about a planned property sale in Santa Barbara County to decide whether to buy first, according to the lawsuit.</p> <p>California Democrats welcomed the latest fight and vowed to defend the law.</p>

<b>HEADLINE</b>	<b>04/02 China ready for proportionate response</b>
<b>SOURCE</b>	<a href="https://www.reuters.com/article/us-usa-trade-china-tariffs-response/china-ready-for-proportionate-response-to-u-s-tariffs-envoy-idUSKCN1HA0DM">https://www.reuters.com/article/us-usa-trade-china-tariffs-response/china-ready-for-proportionate-response-to-u-s-tariffs-envoy-idUSKCN1HA0DM</a>
<b>GIST</b>	BEIJING (Reuters) - China will take counter-measures of the “same proportion” and scale if the United

States imposes further tariffs on Chinese goods, China's ambassador to Washington said, amid growing fears of an impending trade war.

Cui Tiankai made the comments ahead of what is expected to be the announcement this week of U.S. tariffs on \$50 billion to \$60 billion in Chinese imports following an investigation under Section 301 of the 1974 U.S. Trade Act.

"If they do, we will certainly take countermeasures of the same proportion, and the same scale, same intensity," Cui said in an interview posted on the website of China Global Television Network (CGTN) and broadcast on state television on Tuesday.

The U.S. tariffs are expected to target products benefiting from Beijing's "Made in China 2025" industrial development program, although it may be more than two months before the import curbs take effect, U.S. officials have said.

China on Sunday announced tariffs on \$3 billion in imports of U.S. food and other goods in response to U.S. tariffs on imports of aluminum and steel, a skirmish that investors fear is a prelude to a broader trade war.

The Section 301 investigation initiated by U.S. President Donald Trump is focused on accusations of theft of intellectual property and forced technology transfer by China, charges Beijing denies.

Cui said China has been bolstering its protection of intellectual property rights.

"China has been strengthening its efforts and strengthening our legal system on this particular issue, and we are making good progress," he said.

<b>HEADLINE</b>	<b>04/01 Health officials alarm on gabapentin</b>
<b>SOURCE</b>	<a href="https://www.nbcnews.com/storyline/americas-heroin-epidemic/health-officials-are-sounding-alarm-drug-gabapentin-it-s-not-n861111">https://www.nbcnews.com/storyline/americas-heroin-epidemic/health-officials-are-sounding-alarm-drug-gabapentin-it-s-not-n861111</a>
<b>GIST</b>	<p>It's fast becoming the go-to drug for addicts in search of a stronger high — and it is not even an opioid.</p> <p>Gabapentin, a purportedly nonaddictive painkiller primarily used to treat shingles and control seizures, has landed on the radar of beleaguered health officials and law enforcement already battling the deadly opioid epidemic that has ripped through the Rust Belt and claimed thousands of lives across the country.</p> <p>Kentucky last year became the first state to classify gabapentin as a controlled substance after the drug showed up in a third of the state's fatal overdoses in 2016, as The Louisville Courier Journal first reported.</p> <p>And police in Ohio have reported a dramatic rise in the abuse of gabapentin, better known by brand names like Neurontin, Gralise or Horizant. There have already been reports of 300 milligram pills being sold on the street for as little as 75 cents apiece in the college town of Athens, Ohio.</p> <p>"We started hearing from pharmacists about people trying to get early refills," Van Ingram, executive director of the Kentucky Office of Drug Control Policy, told NBC News. "That is usually a sign that something is being abused. "</p> <p>So Kentucky lawmakers classified gabapentin as a Schedule 5 drug, meaning that every time it is sold it will be "reported to our prescription monitoring program," Ingram said. "We'll be looking at that data."</p> <p>What makes Kentucky's move all the more unusual is that gabapentin has the seal of approval from the U.S. Centers for Disease Control and Prevention as a nonopioid treatment for chronic pain. In fact, it has been seen as a safe alternative to addictive opioid painkillers.</p>

“I don’t want to declare war on gabapentin,” said Ingram. “I think it’s a good drug. But when it’s being used in conjunction with other drugs or alcohol there may be a problem.”

That’s because gabapentin is, in the parlance of the drug abuse experts, a “potentiate.” That means it can make already dangerous drugs like fentanyl or heroin even more lethal.

“This means that when the drugs interact in the human body, they each increase the effects caused by the other drug,” the informational website Addict Help reported. “For alcohol, this means that the alcoholic high is stronger and kicks in with less alcohol. It also means, for both drugs, that unfortunate side effects common with these drugs are equally heightened.”

So is the danger. A Canadian study published last year, which tracked patients in Ontario from August 1997 to December 2013 who had been prescribed both opioids and gabapentin for pain, found a “substantial increase in the risk of opioid-related death.”

“Clinicians should consider carefully whether to continue prescribing this combination of products and, when the combination is deemed necessary, should closely monitor their patients and adjust opioid dose accordingly,” the researchers concluded.

How did gabapentin become such the problem? The same way opioids did — through over-prescription, said Dr. James Patrick Murphy, a pain specialist based in Louisville.

“It got prescribed so much that everybody taking an opioid for chronic pain was also taking gabapentin,” said Murphy. “People have a tendency to want to abuse anything that is mind-altering and a lot of time it is what is readily available to them.”

The fact is gabapentin “is not really that strong of a drug and relatively safe,” Murphy said. It is also a cousin to the nongeneric pain medications like Lyrica, sales of which have reportedly tripled in recent years.

“But some people will take a valium with opioids and some people will take a handful of gabapentin,” Murphy said. “The sad thing for patients who do well on gabapentin is that this will make physicians less likely to prescribe gabapentin.”

<b>HEADLINE</b>	<b>04/02 Airplanes collide at Indiana airport</b>
<b>SOURCE</b>	<a href="https://www.nbcnews.com/news/us-news/airplanes-collide-indiana-airport-killing-two-n862251">https://www.nbcnews.com/news/us-news/airplanes-collide-indiana-airport-killing-two-n862251</a>
<b>GIST</b>	<p>Two firefighters were killed Monday when their single-engine airplane collided with a jet on an airport runway in Marion, Indiana, officials said.</p> <p>The firefighters were identified as Kyle Hibst and David Wittkamper of Pipe Creek Township Fire Department, north of Indianapolis, according to a statement from Madison County Emergency Management and Homeland Security.</p> <p>Jim McKinney, president of the Marion Municipal Airport Board, said the firefighters' Cessna 150 split in half after the collision, ejecting one of the men. He died on impact, according to a doctor who witnessed the collision, McKinney said.</p> <p>McKinney said the Cessna 150, which was taking off, collided with the larger plane, a Cessna 525 CitationJet which was landing at Marion Municipal Airport, between Indianapolis and Fort Wayne. He said the pilot of the Cessna 150 either did not see the jet or thought that it had cleared the runway and that it was safe to take off.</p>

	In a statement, the Federal Aviation Administration, or FAA, said the smaller plane struck the tail of the jet — which was carrying five people — shortly after 5 p.m. The agency said that the airport does not have an air traffic control tower and that pilots are expected to announce their intentions over radio.

<b>HEADLINE</b>	<b>04/02 Wall St. shares take a plunge</b>
<b>SOURCE</b>	<a href="https://www.newsmax.com/finance/markets/stocks-dow-wall-street/2018/04/02/id/852023/">https://www.newsmax.com/finance/markets/stocks-dow-wall-street/2018/04/02/id/852023/</a>
<b>GIST</b>	<p>Wall Street shares plunged on Monday as investors fled technology stocks amid resurgent trade war worries, with key indexes trading below their 200-day moving averages and the S&amp;P 500 closing below that pivotal technical level for the first time since Britain's vote to leave the European Union in June 2016.</p> <p>The first trading day of the second quarter began with a broad selloff concentrated in the technology and consumer discretionary sectors, as losses by Amazon.com, Tesla and Microsoft, among others, took center stage from retaliatory trade measures China unveiled on Sunday.</p> <p>"It's more complicated than just a tech selloff. What's hurting everything is that the S&amp;P went through its 200-day moving average," said Brian Battle, director of trading at Performance Trust Capital Partners in Chicago. "That attracts momentum sellers and they don't care what the fundamentals are."</p> <p>The Dow Jones Industrial Average fell 458.92 points, or 1.9 percent, to 23,644.19 after dipping below its 200-day moving average. The S&amp;P 500 fell 58.99 points, or 2.23 percent, to 2,581.88 and the Nasdaq Composite dropped 193.33 points, or 2.74 percent, to 6,870.12.</p> <p>Amazon.com was the biggest drag on the S&amp;P 500, down 5.2 percent, as President Donald Trump continued his twitter attacks on the online retailer.</p> <p>All 11 major sectors of the S&amp;P 500 closed lower, with the biggest losses seen by the consumer discretionary and technology indexes, which were down 2.8 percent and 2.5 percent, respectively.</p> <p>The tech-heavy Nasdaq was dragged lower by Microsoft , Intel, Apple Inc, Facebook and Alphabet.</p> <p>Shares of Tesla Inc ended the day down 5.1 percent after the company was reported to be making 2,000 Model 3s per week, missing its 2,500 target.</p> <p>The electric automaker's losses extend last week's near 14-percent decline as investigations of a fatal California crash and a Moody's credit downgrade weighed on the stock.</p> <p>Health insurer Humana Inc's shares closed up 4.4 percent on news it was in talks with Walmart to expand their partnership or possibly be acquired by the retailer . Walmart stock fell 3.8 percent.</p> <p>U.S. Treasury yields fell to two-month lows as investors fled sliding stocks for safety ahead of Friday's closely watched jobs report.</p> <p>Declining issues outnumbered advancing ones on the NYSE by a 4.17-to-1 ratio; on Nasdaq, a 4.14-to-1 ratio favored decliners.</p> <p>Volume on U.S. exchanges was 7.71 billion shares, compared to the 7.29 billion average over the last 20 trading days.</p>

<b>HEADLINE</b>	<b>04/02 Saudi crown prince 'recognizes' Israel</b>
<b>SOURCE</b>	<a href="http://www.latimes.com/world/middleeast/la-fg-saudi-israel-20180402-story.html">http://www.latimes.com/world/middleeast/la-fg-saudi-israel-20180402-story.html</a>

## GIST

Saudi Arabia's young crown prince said in an interview published Monday that Israelis, alongside Palestinians, "have the right to have their own land," seemingly opening the door to the possibility of an eventual normalization of ties with Israel.

Mohammed bin Salman, the 32-year-old heir to the Saudi throne, told the Atlantic magazine that any Mideast peace agreement would need to address the fate of Islam's third-holiest site, which is located in Jerusalem, and ensure "the rights of the Palestinian people." Even so, his comments appeared to mark a break with the public posture adopted by most Arab leaders.

Two Arab countries, Jordan and Egypt, have peace treaties with Israel, but most Arab countries, including Saudi Arabia, do not recognize Israel. However, there have been recent signs of a warming between Israel and the conservative kingdom, whose aging monarch, King Salman, has already handed many leadership responsibilities over to the crown prince.

The Trump administration has pinned hopes on Saudi Arabia as a key interlocutor in any Mideast peace accord. Mohammed is currently on a U.S. visit that's focused on attracting investment and presenting himself as a reformist who has pushed for social changes such as granting Saudi women the right to drive.

The young crown prince is close to President Trump's son-in-law, Jared Kushner, and a bitter Saudi rivalry with Iran's government dovetails neatly with Trump's own hawkish views on Tehran.

Critics are mistrustful of Mohammed, however, painting a recent anti-corruption drive by the crown prince as a thinly veiled power grab meant to sideline royal rivals and force wealthy business leaders to sign over billions of dollars in assets.

In the Atlantic interview, Mohammed was asked whether he believed that the Jewish people had the right to a nation-state in at least part of their ancestral homeland.

"I believe the Palestinians and the Israelis have the right to have their own land," he replied. "But we have to have a peace agreement to assure the stability for everyone and to have normal relations."

Referring to the contested plateau in Jerusalem's Old City revered by Jews as the Temple Mount and by Muslims as the Noble Sanctuary, the crown prince said Saudi Arabia had "religious concerns about the fate of the holy mosque in Jerusalem and the rights of the Palestinian people."

But he added, "We don't have any objection against any other people."

Although Trump has said he regards Mideast peace as "the ultimate deal," the rift between Israel and the Palestinians has widened during his tenure to date. Palestinians were infuriated by Trump's declaration that the United States recognized Jerusalem as Israel's capital — seemingly dismissing a Palestinian claim to part of the city as the capital of their future state.

Saudi Arabia was among the many states across the Muslim world that denounced the Trump administration's stance on the holy city.

Mohammed, in the interview, suggested that shared economic interests might be a powerful driver of normalization efforts with Israel.

"Israel is a big economy compared to their size, and it's a growing economy," he said. "Of course there are a lot of interests we share with Israel, and if there is peace, there would be a lot of interest between Israel and the Gulf Cooperation Council countries and countries like Egypt and Jordan."

Saudi Arabia's position, like most other Arab states, has long been that there can be no ties with Israel until it cedes territory captured in the 1967 Middle East war to make way for a Palestinian state.

<b>HEADLINE</b>	<b>04/02 DOJ metrics on immigration judges</b>
<b>SOURCE</b>	<a href="https://www.newsmax.com/politics/us-immigration-judges/2018/04/02/id/852159/">https://www.newsmax.com/politics/us-immigration-judges/2018/04/02/id/852159/</a>
<b>GIST</b>	<p>The Trump administration has introduced production quotas for immigration judges in an effort to reduce enormous court backlogs, drawing criticism from some that decisions may be unfairly rushed.</p> <p>The Justice Department's Executive Office for Immigration Review said judges must complete 700 cases a year to earn a satisfactory grade. The standards, which take effect Oct. 1, include six other measures indicating how much time judges should spend on different types of cases and court motions.</p> <p>The move, while significant, didn't come as a surprise. Attorney General Jeff Sessions, who oversees immigration courts, has sought major changes to unclog the courts as a sharp increase in deportation arrests under President Donald Trump has pushed the court backlog above 650,000 cases. In December, Sessions wrote judges that performance measures would aid in "the efficient and timely completion of cases and motions" while maintaining fairness.</p> <p>James McHenry, director of the Executive Office for Immigration Review, used similar language in an email Friday that details the new measures for the department's approximately 350 immigration judges.</p> <p>"Using metrics to evaluate performance is neither novel nor unique to (the Executive Office for Immigration Review)," McHenry wrote. "The purpose of implementing these metrics is to encourage efficient and effective case management while preserving immigration judge discretion and due process."</p> <p>The Associated Press obtained a copy of McHenry's memo and performance plan, whose contents were first reported by The Wall Street Journal.</p> <p>The measures are highly specific. A judge who completes more than 560 cases a year but fewer than 700 "needs improvement." Deciding fewer than 560 cases a year is deemed unsatisfactory.</p> <p>The Justice Department said Monday that judges complete an average of 678 cases a year.</p> <p>Under one benchmark, judges must rule the same day on every plea by asylum seekers to pass an initial threshold of establishing "credible" or "reasonable" fear to earn a satisfactory mark, unless the Homeland Security Department is responsible for them failing to show. Anything less than 80 percent is considered unsatisfactory.</p> <p>The National Immigration Judges Association, which represents the judges in collective bargaining agreements, did not immediately respond to a request for comment.</p> <p>Laura Lynch, senior policy counsel for the American Immigration Lawyers Association, said immigration attorneys were deeply concerned that cases will be "rushed through" to meet arbitrary measures.</p> <p>"Subjecting judges to numerical goals undermines one of the core principles of our judicial system, which is really a fair day in court," she said.</p>

<b>HEADLINE</b>	<b>04/03 Migrant caravan takes break in Mexico</b>
<b>SOURCE</b>	<a href="http://abcnews.go.com/International/wireStory/migrant-caravan-raising-concerns-us-takes-break-mexico-54193526">http://abcnews.go.com/International/wireStory/migrant-caravan-raising-concerns-us-takes-break-mexico-54193526</a>
<b>GIST</b>	<p>A big caravan of Central American migrants that has stirred up concerns in the U.S., including drawing tweets from President Donald Trump, has halted its march for a rest at a sports field in southern Mexico.</p> <p>The U.S. leader warned about "caravans" of migrants heading to the U.S., and others questioned whether the caravan of approximately 1,100 people was moving across Mexico toward its northern border with the</p>

intent of crossing into the United States.

On Monday, the mass of mostly Hondurans that had been walking along roadsides and train tracks stopped in Oaxaca state at the field, where they are getting advice on filing for transit or humanitarian visas in Mexico. Many took refuge from the hot afternoon sun by resting in the stands under the awning. As night fell, the migrants, many with children, lit fires to cook their meager rations.

A group of a couple hundred men did break off from the march Sunday, hopping a freight train north probably with hopes of trying to enter the U.S. But the rest seemed unlikely to move again until Wednesday or Thursday, and they probably would take buses to the last scheduled stop for the caravan, a migrant rights symposium in central Puebla state.

Irineo Mujica, director of Pueblo Sin Fronteras, the activist group behind the annual symbolic event designed to draw attention to the plight of migrants, said the caravan would continue only to Puebla southeast of Mexico City, "but not in a massive way."

After the symposium, some migrants might go to Mexico's capital, where it is easier to make an asylum claim. Mujica said about 300 to 400 say they have relatives living in Mexico and so may consider staying here at least temporarily.

There were reports Mexican officials were seeking to end the caravan, but it was for all intents and purposes over anyway. The participants were never equipped to march en masse to the U.S. border or anywhere near it.

The "Stations of the Cross" caravans have been held annually in southern Mexico for about 10 years. They began as short processions of migrants, some dressed in biblical garb and carrying crosses, as an Easter-season protest against the kidnappings, extortion, beatings and killings suffered by many Central American migrants as they cross Mexico.

The organized portions of the caravans usually have not gone much farther north than the Gulf coast state of Veracruz, although some participants have then gone off by bus or truck to the U.S. border, moving as individuals or in small groups.

This year's event seems to have gotten more notice in the U.S., and Trump has sent some angry tweets that raised hackles in Mexico.

"Mexico is doing very little, if not NOTHING, at stopping people from flowing into Mexico through their Southern Border, and then into the U.S. They laugh at our dumb immigration laws. They must stop the big drug and people flows, or I will stop their cash cow, NAFTA. NEED WALL!" Trump wrote in one. "With all of the money they make from the U.S., hopefully they will stop people from coming through their country and into ours."

Mexico's interior secretary, Alfonso Navarrete Prida, rejected such pressure.

"We will act with complete sovereignty in enforcing our laws," he said Monday. "Of course we will act ... to enforce our immigration laws, with no pressure whatsoever from any country whatsoever."

In a statement late Monday, Mexico's government said about 400 participants in the caravan had already been sent back to their home countries. "Under no circumstances does the Mexican government promote irregular migration," the Interior Ministry statement said.

But it added that Mexico considers the annual caravans to be "a public demonstration that seeks to call attention to the migration phenomenon and the importance of respecting the rights of Central Americans." The U.S. government has been kept fully informed of the situation, it said.

<b>HEADLINE</b>	<b>04/03 Argentine drought hits farmers hard</b>
<b>SOURCE</b>	<a href="http://abcnews.go.com/International/wireStory/argentine-drought-hits-farmers-hard-undermining-economy-54193491?">http://abcnews.go.com/International/wireStory/argentine-drought-hits-farmers-hard-undermining-economy-54193491?</a>
<b>GIST</b>	<p>Jorge Josifovich is silent and downcast as he walks under the pounding sun in one of Argentina's most fertile agricultural regions, staring at soy crops parched by the country's worst drought in years.</p> <p>The drought, which began in November, has caused big losses, reduced expectations of economic growth and raised concerns among farmers, government officials and experts in the world's third-largest exporter of soybean and corn.</p> <p>"It's dramatic," said Josifovich, a farmer and agricultural engineer who provides advice to growers. He picked up soy seeds from a plant that stands at about half its normal height.</p> <p>"Not only is there the physical loss of grain yield, but there's also the loss of quality, which lowers the product's final price."</p> <p>That's a blow to Argentina, where farming is the economy's main engine, and high or low prices for soy and other commodities can either help sustain or bust government investment plans.</p> <p>President Mauricio Macri was counting on a near-record soy crop this year to boost economic growth to 3.5 percent in 2018. Instead, what is expected to be the poorest harvest in at least a decade has already cut growth forecasts by up to a percentage point.</p> <p>Argentina's famed meat and dairy industries, which depend on corn and soymeal for animal feed, are facing more than \$600 million in losses, according to the exchange. The drought has also hurt the poultry and pork sectors as well as the silos that store grain and the trucking and shipping companies that transport it.</p> <p>"You'll have less beef and a problem with (a rise) in prices," Ezequiel de Freijo, chief economist at the Argentine Rural Society, said about the outlook for next year.</p>

<b>HEADLINE</b>	<b>04/02 Oklahoma, Kentucky teachers protest</b>
<b>SOURCE</b>	<a href="http://abcnews.go.com/US/thousands-teachers-students-converge-oklahoma-kentucky-capitals-labor/story?id=54174751">http://abcnews.go.com/US/thousands-teachers-students-converge-oklahoma-kentucky-capitals-labor/story?id=54174751</a>
<b>GIST</b>	<p>Braving chilly weather, tens of thousands of public school teachers in Kentucky and Oklahoma converged on their state capitals today demanding higher wages and better classroom resources.</p> <p>Teachers in the two red states, both run by Republican governors and Republican-dominated legislatures, said they're fed up with persistent cuts in education funding. Many of the demonstrators Monday wore red T-shirt reading "I Support Public Schools," in solidarity with the nationwide #RedForEd grass-roots movement started online.</p> <p>The Oklahoma teachers plan to continue the classroom walkout on Tuesday at the state capitol, prompting the Oklahoma City, Tulsa and other districts to cancel school for a second day.</p> <p>Thousands of teachers and supporters in Kentucky joined outside the Kentucky Education Association headquarters in Frankfort around 9 a.m., many fuming over their state legislature's decision to overhaul their pension plan without any say from them.</p> <p>"We're putting them on notice today that if they don't pass a budget that protects public services of Kentucky, if they don't pass a budget that provides adequate funding for the schools in the Commonwealth, then we're going to vote them out," Stephanie Winkler, president of Kentucky Education Association and a fourth-grade teacher from Madison County, Kentucky, told the crowd before leading a march from the union's headquarters around the capitol building.</p> <p>The teachers, most of them on their first day of spring break, were joined in a show of solidarity by members of other public-employee unions, including those representing firefighters, police, plumbers and pipe fitters.</p> <p>Meanwhile, thousands of Oklahoma teachers and education advocates staged a classroom walkout and converged on the state capitol in Oklahoma City to call on lawmakers, including Gov. Mary Fallin, to restore funding for education programs and supplies they say have been drastically slashed over the last decade.</p> <p>Most of the Oklahoma teachers walked out of classrooms across the state to attend the rally in Oklahoma</p>

City. Many said they were frustrated with the lack of resources in their schools, and some said they were teaching students about science and technology with textbooks from the 1990s.

The Oklahoma protest came after Fallin signed legislation Thursday granting teachers annual pay raises averaging \$6,100, the largest in state history. Oklahoma teachers had been making an average of \$45,276 a year, among the lowest for educators nationwide, according to a 2017 report by the National Education Association.

## Cyber Awareness

[Top of page](#)

<b>HEADLINE</b>	<b>04/02 Russian cyber spy admits intel sharing?</b>
<b>SOURCE</b>	<a href="http://www.thenewstribune.com/news/politics-government/article207724239.html">http://www.thenewstribune.com/news/politics-government/article207724239.html</a>
<b>GIST</b>	<p>WASHINGTON - A senior leader in Russia's spy agency, wanted by the FBI and suspected to be linked to Russian meddling in the 2016 U.S. election, has agreed to plead partially guilty to sharing information with foreign intelligence, according to a Russian media report.</p> <p>The Russian news site RBC reported Monday that Dmitry Dokuchaev, a major in the FSB intelligence service, has admitted that he indirectly transferred information to foreign intelligence, presumably the United States. RBC, citing two anonymous sources, said that Dokuchaev insisted it amounted to informal information-sharing about activities of cybercriminals who did not work for Russia.</p> <p>That's at odds with a report from another Russian news outlet last year, which said that one of the individuals about whom Dokuchaev shared information was alleged Russian hacker Yevgeniy Nikulin. On Friday, it became public that the United States had succeeded in its attempt to extradite Nikulin from the Czech Republic – an effort bitterly fought by Moscow. Nikulin faces charges in California for allegedly hacking the databases of LinkedIn, Dropbox and Formspring in 2012.</p> <p>Dokuchaev, 34, once a high-ranking official in the FSB's unit that investigates cybercrime, is also the target of an arrest warrant in the U.S. The FBI accused him in February 2017 of directing and facilitating criminal hackers who stole user information on 500 million Yahoo accounts.</p> <p>How exactly Nikulin and Dokuchaev fit into Russia's efforts to interfere in the U.S. presidential election is not completely clear. The FSB is known to tolerate cybercriminals because it can piggyback off their illicit behaviors. U.S. intelligence believes the high-profile hacks of U.S. tech-firm databases allowed Russia to mine hundreds of millions of user accounts for personal information on election officials and U.S. political activists. This data could be used to try to enter secure websites or hypothetically to gather compromising information.</p> <p>Importantly, Dokuchaev's signed pre-trial agreement reported by RBC means evidence collected against him might not be made public and he could receive a lighter sentence if convicted. The Kremlin has said little publicly about Dokuchaev, and his alleged ties to accused hackers has provoked speculation of involvement in U.S. election meddling.</p> <p>Dokuchaev and his boss, the cybercrime unit's deputy director Sergey Mikhailov, were arrested on treason charges and reportedly led out of FSB headquarters with sacks over their heads in December 2016 — but that wasn't revealed until shortly after the release of the so-called Trump dossier, a collection of business-intelligence memos compiled by former British spy Christopher Steele that alleged collusion between Russia and members of the Trump campaign team.</p> <p>That explosive document, published in full on Jan. 10, 2017, by the news site BuzzFeed, led to congressional investigations and was in part the basis for the appointment of former FBI Director Robert Mueller III as special counsel to investigate possible collusion. Earlier this year, Mueller brought charges against 13 alleged Russian intelligence officials, accusing them of attempting to undermine confidence in</p>

	<p>U.S. election results.</p> <p>Adding to the intrigue of that period, Gen. Oleg Erovinkin, a former FSB leader, was found dead in the back seat of his car on Dec. 26, 2016. His death later sparked speculation that he might have been somehow involved in sharing information that made it into the dossier.</p> <p>The next public hearing in Dokuchaev's case is expected on Wednesday, RBC reported. A lawyer for Mikhailov, also facing treason charges, told RBC his client was not admitting guilt.</p>

<b>HEADLINE</b>	<b>04/02 Russia: extradition may hurt Czech ties</b>
<b>SOURCE</b>	<a href="https://www.reuters.com/article/us-czech-usa-russia-ministry/russia-says-czech-extradition-of-alleged-hacker-to-usa-may-hurt-ties-idUSKCN1H90XK">https://www.reuters.com/article/us-czech-usa-russia-ministry/russia-says-czech-extradition-of-alleged-hacker-to-usa-may-hurt-ties-idUSKCN1H90XK</a>
<b>GIST</b>	<p>MOSCOW (Reuters) - Russia's Foreign Ministry said on Monday that the Czech Republic's extradition to the United States of Yevgeny Nikulin, a Russian charged with hacking U.S. tech companies, appeared to be aimed at damaging ties between Moscow and Prague.</p> <p>Nikulin, 30, was arrested in Prague in 2016. He was extradited to the United States last week, where he pleaded not guilty to charges that he hacked into the systems of three U.S. technology firms, potentially compromising the personal details of at least 100 million users, including on LinkedIn.</p> <p>"We regard Prague's decision as a conscious, politically-motivated step by the Czech side aimed at undermining the constructive basis of bilateral cooperation," the ministry said in a statement. It said it would take all necessary measures to ensure Nikulin's rights are respected.</p> <p>LinkedIn, owned by Microsoft Corp, has said the case was related to a breach that might have compromised the information of 100 million users or more.</p>

<b>HEADLINE</b>	<b>04/02 Lessons from Atlanta cyber extortion</b>
<b>SOURCE</b>	<a href="https://www.forbes.com/sites/dantedisparte/2018/04/02/cities-held-for-ransom-lessons-from-atlantas-cyber-extortion/#370cd2245996">https://www.forbes.com/sites/dantedisparte/2018/04/02/cities-held-for-ransom-lessons-from-atlantas-cyber-extortion/#370cd2245996</a>
<b>GIST</b>	<p>Time has run out on the city of Atlanta to respond to cyber extortionists who have successfully crippled several critical systems across the city. From first responders like the police department, which has been prevented from using certain databases, to the judicial system, city-wide payment processing for traffic fines and other areas, many citizen services in Atlanta were taken offline by a sophisticated ransomware attack. Meanwhile public servants have been relegated to switching back to analog carrying out paper-based work to maintain the semblance of business as usual in the bustling city. The cyber criminals who perpetrated this attack demanded payment of \$51,000 in bitcoin, lest Atlanta face wider repercussions from this exploit, such as the deletion of critical data, crippling of systems, among other possible consequences. Whether Atlanta paid the cyber ransom or not, cities are in the crosshairs of cyber and other man-made risks posing serious threats to national security.</p> <p>Atlanta joins a growing number of municipal, state and government-level targets to fall prey to an increasingly complex cyber threat environment. Just as a heating and cooling vendor served as the backdoor to Target's breach, cities may very well be a backdoor to broader cyber vulnerabilities affecting U.S. national security. In short, our lawmakers and governments are not immune to a risk that evolves according to Moore's Law – a painful lesson Atlanta's public servants learned during an arduous recovery. All too often, cyber criminals who seek monetary gains from their ransomware attacks exploit so called soft targets, which makes many government agencies easy prey. This is so due to the lack of synchronization of critical systems, harmonization among the numerous third parties' states rely on to render their services, as well as the difficulty in attracting high-demand cybersecurity professionals who</p>

can make a more lucrative career in the private sector. It does not help that governments, like private enterprises, do not typically treat cyber risk like an enterprise-wide threat, but rather consign it to cash-strapped and ill-equipped IT departments and vendors.

City and government cyber resilience is not aided by the placebo effect that cybersecurity technologies and “safe brands” can create. These blindsides conspire to make the public sector particularly vulnerable to cyber threats. Add in the effect of human errors, indifference and deliberate actions (“between the keyboard and the chair” risks) and hardening the information systems of an entity as complex as a city comes into focus. All the more so as government transparency, public accountability and digital transformation are highly sought-after goals. The increasing reliance in cities on connected devices to measure everything from traffic flows to water levels and issuing fines through ubiquitous speed cameras, creates an enormous and highly vulnerable attack subsurface. The internet of things (IoT) has opened a veritable Pandora’s box of cyber threats that even well-heeled private entities are struggling to contain. Cities will be hard-pressed to get ahead of self-sovereign cyber threats, as well as making the absolute amount of cybersecurity spend a proxy for safety. Many city leaders may come to rue the day they connected every citizen service to the internet, without thinking through the potential for unintended consequences.

Mercifully Atlanta’s cyber-attack had a financial motive and or a path to negotiation. Similar exploits aimed at proving a political point or sowing panic, such as cyber terrorism or an act of cyber warfare, are much harder to respond to and recover from. This highlights the reality that cyber risk is more of a continuity of government threat than a matter of privacy and the provision of basic citizen services. In Atlanta’s case, how many months could a city go on under the presumption of business as usual if its critical systems were taken down? Cyber risk is all too often conflated with a breach of privacy and citizen or customer trust, when in reality it is a business continuity threat. Because many cities rely on private sector cybersecurity consultants to “harden their systems,” they often take a similar tack as private enterprises. Namely, hardening databases that store so called “crown jewels,” such as health records, citizen information, tax records, among others. A veritable arms race of cybersecurity spending primarily benefits consultants and technologies, yet many vulnerabilities remain, the human element is often forgotten, and no panaceas exist.

While citizen services are vital, especially when it comes to the provision of essential government services, in the priority list of where to place cybersecurity resources, continuity of government comes first. This much is true at the state level and continuity of government begins with the state house, critical infrastructure, first responders, such as police, fire departments, emergency medical care and finally the provision of basic citizen services. By this measure, cities like Atlanta must begin reframing the economics of cyber threats from a value at risk lens, rather than a cost of remediation or notification approach, which is the dominant model in cyber risk management. By looking at the economic value at risk in Atlanta, or the share of the city’s GDP exposed to cyber threats, \$2.62 billion could be eradicated due to this faceless and infinitely patient threat according to the Lloyd’s City Risk Index. Indeed, cyber-attacks are highlighted as the third most consequential threat to the city of Atlanta, a rank held for North American cities, where more than \$93 billion in economic output is at risk. The second and third order effects of cyber threats can hobble the global economy.

Combining city and state requirements to maintain a balanced budget, the measure of economic value at risk together with the reality that taxpayers are the first line of financial defense, makes a compelling case for pooling “blended” risk capital into government cyber risk transfer approaches. Structures that recognize cyber threats (even when monetary demands are relatively small) as potential catastrophic losses can help shield limited public coffers from the economic consequences of these risks. Indeed, Lloyd’s research shows that for every 1% increase in insurance penetration, there is a corresponding 22% decrease in the share of risk borne by taxpayers. Cyber risks unlike property damage, which tends to be a finite and easily calculated economic exposure, can cause incalculable harm. Therefore, when it comes to cyber threats, prevention is much better than cure. In short, even if you are fully insured, a cyber threat will be painful.

Just as the great city of Atlanta has a fire brigade to save lives and limit property damage, cities and indeed

countries, must consider creating cyber fire brigades as a common good and not as a service spared for those who pay the most money. Cyber threats exploit weak links to get at more desirable or lucrative targets. Therefore, approaches that view cyber threats from the lens of collective defense can go a long way in improving overall resilience. Atlanta's ransomware woes should serve as a wakeup call to all cities and government entities that cyber threats have not only come of age, the next time around the motive may not be monetary.

<b>HEADLINE</b>	<b>04/02 London chief: 99% crooks escape cyber</b>
<b>SOURCE</b>	<a href="http://www.dailymail.co.uk/news/article-5570959/Just-one-100-crimes-web-ends-conviction.html">http://www.dailymail.co.uk/news/article-5570959/Just-one-100-crimes-web-ends-conviction.html</a>
<b>GIST</b>	<p>Only one in ten cases of cyber crime is investigated by police and 99 per cent of crooks escape justice, shocking statistics revealed last night.</p> <p>It came as the country's top anti-fraud cop, City of London police commissioner Ian Dyson, conceded: 'We cannot arrest our way out of this problem.'</p> <p>Mr Dyson said the explosion in fraud and cyber crime means it is impossible to haul all the culprits before the courts, adding: 'You are more likely to have money taken from you online than you are in the street.'</p> <p>The officer, who has been a victim of card fraud, also said some online scams were so simple to set up, he questioned why criminals would bother to rob a bank.</p> <p>He believes the scale of the problem is so vast, the national reporting system 'couldn't cope' if the banks passed on all of their fraud reports to police.</p> <p>Describing cyber crime as an 'industry', Mr Dyson said his officers had to be honest with victims about the chances of culprits being caught: 'From the very start we are managing expectations, but equally what we don't want is a mindset that says there is no point in reporting to us because we are not going to do anything.'</p> <p>Mr Dyson spoke out as the new figures show there were 735,098 frauds and cyber crimes reported across the UK in the 12 months to March 2017. But in the same period, just 71,133 reports – less than 10 per cent – were investigated. The figures show that 8,214 people were prosecuted, representing just 1 per cent of cases.</p> <p>Asked if the public should accept that in the majority of cases fraudsters won't be brought to justice, Mr Dyson said: 'I think that's the case now, but it's a subtle message. I would want people to report it, but to understand that it's more about saying you can't enforce your way out of this problem.'</p> <p>In the past year the National Fraud Intelligence Bureau run by Mr Dyson's force shut down 170,856 bank accounts, websites and phone lines associated with fraud. He said the public tended to lose their 'common sense hackles' when they go online and the number of victims will continue to rise as more of our business is done online.</p> <p>The commissioner revealed that he fell victim to fraudsters three years ago: 'Someone spent Christmas in a Travelodge on my credit card then tried to renew their car insurance and that was a big chunk of money so the bank alerted me.'</p> <p>He said the police will always need more resources to tackle cyber crime, but the solution was not to haul officers off the beat to hunt for online offenders, adding: 'When it happened to me, I was a bit p***ed off that someone had used my bank account, to be honest.'</p> <p>'But would I vote to say I want to see less officers patrolling the area because of that?'</p>

	'I'm not sure... there is a balance to be had.'

<b>HEADLINE</b>	<b>04/02 Grid hacking exercise reveals shortfall</b>
<b>SOURCE</b>	<a href="https://www.cyberscoop.com/electric-grid-hacking-exercise-reveals-shortfalls-security-clearance-shortage/">https://www.cyberscoop.com/electric-grid-hacking-exercise-reveals-shortfalls-security-clearance-shortage/</a>
<b>GIST</b>	<p>As foreign hackers continue to probe the U.S. grid for weaknesses, a cyber exercise for the North American energy sector has shown that many utility personnel still lack access to the classified information needed to stay on top of the threat.</p> <p>Not enough utility employees had the clearances needed to share threat information for a serious cyberattack scenario rehearsed during the exercise, according to a report published Friday by regulator North American Electric Reliability Corp. (NERC).</p> <p>"Government should plan to quickly declassify information that utilities need to prevent or respond to attacks," the report states.</p> <p>During the two-day exercise, which took place in November, government officials and utility executives worked together to respond to simulated "cyber and physical attacks" against control systems and generation and transmission facilities "that caused widespread and prolonged power outages," the report notes.</p> <p>Energy industry officials have long urged the U.S. government to expedite the clearance process for private sector operators. Last year, American Gas Association CEO Dave McCurdy told lawmakers that his industry was in pressing need of actionable cyberthreat information.</p> <p>This fourth iteration of the biennial "GridEx" exercise convened a record 6,500 people from 450 organizations, including electricity transmission authorities and academics. As hackers have grown bolder in attacking the industrial control systems (ICS) that underpin the grid in places like Ukraine, observers credit GridEx with sharpening the North American grid's defenses.</p> <p>"GridEx does a great job in finding new areas to explore and focus on rather than a rinse-and-repeat sort of mentality," Ben Miller, director of threat operations for ICS security firm Dragos, told CyberScoop.</p> <p>The most recent GridEx included new pre-exercise training, dubbed Move 0, that focused on the reconnaissance hackers carry out before an attack. "Attacks don't occur in minutes but instead weeks or months and Move 0 helped illustrate this to the attendees," Miller said.</p> <p>Such reconnaissance techniques have been on display in an ongoing hacking campaign targeting the U.S. energy sector that the Department of Homeland Security has attributed to Russian government actors. DHS warned last month that the hackers had used spear-phishing and watering-hole attacks to collect information on ICS.</p> <p>The NERC report on GridEx found other areas for improvement. Twenty-two percent of participants said the exercise didn't effectively test utilities' communication plans with groups like law enforcement and state officials – a crucial point of contact in the event of serious hacking incident. In the 2015 cyberattack of the Ukrainian power grid, hackers cut power for at least 225,000 customers but also hit the power company's customer call center, hampering the recovery process.</p> <p>The NERC report also floated the possibility of the electric industry's cyber-threat sharing hub, known as E-ISAC, adding a "common operating picture" to give utilities a clearer view of overall grid security.</p> <p>Energy officials in Europe and elsewhere also are increasingly carrying out more complex cyber exercises to try to keep pace with hacking operations. Last October, Swedish nuclear plant employees drilled for a</p>

	range of attacks, including one based on the 2015 hack of the Ukrainian grid. It was the most technically sophisticated exercise in which the UN's nuclear watchdog has participated.

<b>HEADLINE</b>	<b>04/02 Energy firm: pipeline data cyberattack</b>
<b>SOURCE</b>	<a href="https://www.bloomberg.com/news/articles/2018-04-02/energy-transfer-says-cyber-attack-shut-pipeline-data-system">https://www.bloomberg.com/news/articles/2018-04-02/energy-transfer-says-cyber-attack-shut-pipeline-data-system</a>
<b>GIST</b>	<p>A cyber attack that hobbled the electronic communication system used by a major U.S. pipeline network has been overcome.</p> <p>Energy Transfer Partners LP was confident that, after 6 p.m. New York time on Monday, files could safely be exchanged through the EDI platform provided by third-party Energy Services Group LLC, the pipeline company said in a notice. Earlier in the day, it reported a shutdown of the system because of an attack, while saying there was no effect on the flow of natural gas.</p> <p>The EDI system conducts business through a computer-to-computer exchange of documents with customers. Though it's not clear who was responsible for the attack, it comes after U.S. officials warned in March that Russian hackers are conducting a broad assault on the nation's electric grid and other targets. Last month, Atlanta's municipal government was hobbled for several days by a ransomware attack.</p> <p>Energy Transfer, run by billionaire Kelcy Warren, isn't the only pipeline company using EDI. Other operators with similar systems include Kinder Morgan Inc. and Tallgrass Energy Partners LP, according to their websites. Representatives for Kinder and Tallgrass said the companies' systems weren't affected.</p> <p>Boardwalk Pipeline Partners LP also had an EDI outage, though it didn't provide the cause.</p> <p>The attack didn't impact operations otherwise and no data was compromised, Vicki Granado, an Energy Transfer spokeswoman, said earlier.</p> <p>The company's wide network of pipeline units includes Panhandle Eastern Pipe Line Co., Transwestern Pipeline Co. and Rover Pipeline LLC.</p> <p>The Panhandle natural gas pipeline network includes four large-diameter pipelines stretching from the Anadarko Basin of Texas and Oklahoma into several midwestern states. The Trunkline system, which extends from the Gulf Coast into the Southeast and Midwest, and the Sea Robin system in the Gulf of Mexico are also part of the Panhandle network.</p> <p>The Transwestern pipeline system connects gas supplies in the Rockies and the Permian Basin of West Texas and New Mexico to customers in California, Arizona and Nevada. The Rover pipeline, also controlled by Energy Transfer, is designed to transport gas from West Virginia and Ohio to markets in the Midwest and Canada.</p>

<b>HEADLINE</b>	<b>04/02 Phishing scam hits Italy soccer club</b>
<b>SOURCE</b>	<a href="https://www.hackread.com/phishing-scam-italian-football-club-scammed/">https://www.hackread.com/phishing-scam-italian-football-club-scammed/</a>
<b>GIST</b>	<p>An Italian football club Lazio has been scammed as the club sent out an outstanding transfer bill of €2 million (\$2,460,840) to a fraudster's bank account. The club was tricked by email fraudsters, who claimed to be representing a team negotiating for the release of funds that the Italian club owed for a player's transfer.</p> <p>Serie A team from the Lazio club released funds after receiving an email, which apparently looked legitimate. The email was supposedly sent by representatives of Dutch club Feyenoord. In the email, the</p>

sender demanded final payment of a player's transfer that occurred in 2014. It is clear that the fraudsters knew about the details of this deal. In this deal, defender Stefan de Vrij was transferred to Lazio from Feyenoord.

Italian newspaper II Tempo reports that fraudsters tricked Lazio club's accountants into releasing the outstanding balance and transfer the money to the bank account they provided details of. However, when inquired, Feyenoord denied any such communication carried out by any of its staff members. Furthermore, the Dutch club clarified that it never even received the funds.

Prosecutors state that the money trail has been tracked and that it has been transferred to a Dutch bank account but it does not belong to Feyenoord.

However, it shows the caliber of cybercriminals and the innovativeness that they have achieved over time as they come up with one unique strategy after another. This particular incident is a clear example of how lucrative phishing scams can be. Especially if cybercrooks are aware of such high-profile deals involving large sums of cash transferred through banks.

<b>HEADLINE</b>	<b>04/03 Pirate site 123movies shuts down</b>
<b>SOURCE</b>	<a href="https://www.hackread.com/streaming-site-123movies-shut-down-and-its-alterntives/">https://www.hackread.com/streaming-site-123movies-shut-down-and-its-alterntives/</a>
<b>GIST</b>	<p>On March 19th, the world's most popular pirate streaming website 123movies which is also known as 123movieshub and GoMovies announced that it is shutting down its operation, meaning that it will be no longer available.</p> <p>The news came as a shock to the fans who witnessed an unusual message on the site's homepage urging them to "respect" the filmmakers by paying for their content including movies and TV shows rather than pirating them.</p> <p>"We've been providing links to movies and shows for years. Now it's time to say goodbye. Thank you for being our friends and thanks for staying with us that long," the message stated. "PS: Please pay for the movies/shows, that's what we should do to show our respect to people behind the movies/shows."</p> <p>According to reports, authorities were aware that the site was being operated from Vietnam while 123movies itself was listed as "the world's most popular illegal site" by the Motion Picture Association of America (MPAA), a United States-based association that represents the six major Hollywood studios.</p> <p>In a statement on March 15th, 2018 just days before 123movies announced it was shutting down, the executive vice president &amp; chief of Global Content Protection Van Voorn had said that "Right now, the most popular illegal site in the world, 123movies.to (at this point), is operated from Vietnam, and has 98 million visitors a month."</p> <p>"There are more services like this [123movies] – sites that are not helpful for local legitimate businesses," added Voorn, who is working with the Office of the Police Investigation Agency (C44) to tackle the issue.</p> <p>Why 123movies shut down?</p> <p>123movies fans are still struggling to understand why the pirating streaming giant suddenly announced shutting down. However, according to a recent report from TorrentFreak in March last year US Ambassador to Vietnam Ted Osius asked the country's government for a crackdown against pirate website including 123movies and it could be the result of the meeting that year that 123movies has been confined history.</p>

<b>HEADLINE</b>	<b>04/02 Boxing match w/hundreds illegal streams</b>
<b>SOURCE</b>	<a href="https://www.infosecurity-magazine.com/news/joshua-vs-parker-boxing-match/">https://www.infosecurity-magazine.com/news/joshua-vs-parker-boxing-match/</a>
<b>GIST</b>	<p>The highly anticipated world-title boxing match between Anthony Joshua and Joseph Parker on Saturday night – in which Joshua triumphed to capture a bevy of titles – saw hundreds of pirated streams as fans found ways to tune in online or without paying the pay-per-view fee.</p> <p>Content security specialist Irdeto identified 339 streams that illegally redistributed the fight. Aside from the theft of intellectual property and the revenue lost, many of the streams were lower quality that put consumers at risk of a poor viewing experience and missing key moments during the fight.</p> <p>Social media was again found to have been a major vehicle for illegal streams, with 207 pirate streams detected using multiple social media channels, including Facebook, YouTube, Periscope and Twitch, reaching approximately 225,804 viewers.</p> <p>Pirates also took advantage of illicit streaming plugins for Kodi, the popular media player, with 71 streams identified on that platform.</p> <p>Further, pirates often create professional-looking websites and services to fool users into thinking their illegal content offering is legitimate. They tend to use popular e-commerce sites to proactively advertise their services to consumers, despite those sites explicitly banning the sale of illegal streaming devices. Irdeto identified 180 advertisements for illicit streaming devices offering Joshua vs. Parker on e-commerce websites, including eBay and Gumtree, in just one day in the week leading up to the fight.</p> <p>“High-profile live sporting events like this are major targets for criminals looking to profit from illegal streams,” said Rory O’Connor, senior vice president of cybersecurity services at Irdeto. “Content owners and rights holders can combine state-of-the-art anti-piracy technology, proactive services and comprehensive cybercrime business intelligence services to shut down streams in real time and protect their content investments.”</p>

<b>HEADLINE</b>	<b>04/02 DOD extends bug bounty program</b>
<b>SOURCE</b>	<a href="http://www.darkreading.com/vulnerabilities---threats/hack-the-defense-travel-system-dod-extends-its-bug-bounty-program/d/d-id/1331428">http://www.darkreading.com/vulnerabilities---threats/hack-the-defense-travel-system-dod-extends-its-bug-bounty-program/d/d-id/1331428</a>
<b>GIST</b>	<p>The US Department of Defense and HackerOne have announced a new DoD bug bounty program, "Hack the DTS," which will let vetted white-hat hackers take aim at the Defense Travel System, an enterprise platform used by millions of employees to book work-related travel.</p> <p>This is the fifth bug bounty challenge the two have created since 2016, when the inaugural Hack the Pentagon program let participants hunt for vulnerabilities in DoD websites, applications, and networks. Hack the DTS opened registration on April 1, 2018 and will conclude on April 29.</p> <p>"The scale of users, volume of travel booked, and sensitive information it is responsible for maintaining makes DTS both a compelling asset for researcher and a priority for DoD to harden its security," says Reina Staley, chief of staff and co-founder at Defense Digital Service, who says this program will have the same execution as earlier ones but "inevitably yield unique findings."</p> <p>Eligible participants must be US taxpayers and either citizens of, or eligible to work in, the United Kingdom, Canada, Australia, or New Zealand. Proof of citizenship is required to register.</p> <p>Active US military members and contractors can join the challenge if they're eligible but can't receive financial rewards. Anyone who submits a vulnerability report must undergo a security and criminal background check before they are rewarded for their findings, HackerOne reports.</p>

	While the DoD's initial bug bounty initiative first took security experts by surprise, the DoD's bug bounty programs launched with HackerOne have proven a valuable resource for finding and addressing vulnerabilities. More than 3,000 flaws have been resolved since the 2016 launch of Hack the Pentagon, with ensuing programs leading to more flaws discovered and larger bounties.

<b>HEADLINE</b>	<b>04/02 Tor Project discontinues Tor Messenger</b>
<b>SOURCE</b>	<a href="https://www.bleepingcomputer.com/news/software/tor-project-discontinues-tor-messenger-after-only-25-years/">https://www.bleepingcomputer.com/news/software/tor-project-discontinues-tor-messenger-after-only-25-years/</a>
<b>GIST</b>	The Tor Project announced today plans to discontinue Tor Messenger, the organization's security-hardened instant messaging application.

Tor developers cited a multitude of reasons for their decision today, all containing valid reasons, in hindsight.

Tor Messenger launched in late 2015

The Tor Project launched Tor Messenger in October 2015, as an alternative to the multitude of IM clients that were available on the market, at the time.

The main attraction point was that Tor Messenger would ship with Off-the-Record (OTR) Messaging enabled by default and would exchange all messages via the Tor network. In layman terms, this meant that all messages would be automatically encrypted and travel over a secure network like Tor, keeping private conversations safe from prying eyes.

At the time of launch, Tor developers admitted that Tor Messenger wasn't 100% secure, as it was still built on a client-server architecture that allowed servers to log IM metadata, even if the server wasn't able to view the content of the messages.

Back then, the Tor team said they were looking into alternatives to this architectural model flaw, which would arrive in future versions.

Tor team encountered problems after problems

But eleven beta versions later, Tor Messenger development ground to a halt and the Tor team didn't even manage to ship even a single stable version.

Probably the biggest issue that led Tor developers to drop Tor Messenger developers was that Mozilla stopped working on Instantbird, the IM client at the base of Tor Messenger.

While Mozilla chose to integrate Instantbird's chat features into Thunderbird, the Tor team didn't have the resources to continue the development of a separate IM client or rebase Tor Messenger on anything else.

Even if it could have extracted the chat features from the Thunderbird codebase, Tor devs would still have needed a GUI component for their IM client, something they didn't have the resources to cover.

But this wasn't the only issue. Tor developers also weren't able to address the client-server architecture problem they promised to fix. This meant servers would still be able to log messages sent between Tor Messenger clients.

All of this was only exacerbated by the fact that funds were never plentiful for the development team.

<b>HEADLINE</b>	<b>04/03 Android Trojan steals IM clients data</b>
<b>SOURCE</b>	<a href="https://www.bleepingcomputer.com/news/security/android-trojan-steals-data-from-facebook-messenger-skype-other-im-clients/">https://www.bleepingcomputer.com/news/security/android-trojan-steals-data-from-facebook-messenger-skype-other-im-clients/</a>
<b>GIST</b>	<p>Security researchers have found a new Android malware strain that has been designed to steal data from mobile instant messaging clients.</p> <p>This new trojan is quite simple in its design, researcher from cyber-security firm Trustlook said in a report published on Monday.</p> <p>Trojan has only a handful of features</p> <p>The trojan has only a few abilities. The first is to gain boot persistence by unpacking code from an infected app's resources. The code will attempt to modify the "/system/etc/install-recovery.sh" file, which if</p>

successful, would allow the malware execute with every boot.

Second, the malware can extract data from the following Android IM clients, data that it will later upload to a remote server. The malware retrieves the IP of this server from a local configuration file.

Facebook Messenger  
 Skype  
 Telegram  
 Twitter  
 WeChat  
 Weibo  
 Viber  
 Line  
 Coco  
 BeeTalk  
 Momo  
 Voxer Walkie Talkie Messenger  
 Gruveo Magic Call  
 TalkBox Voice Messenger

Researchers spotted the malware inside a Chinese app named Cloud Module (in Chinese), with the package name com.android.boxa.

Simple features, but advanced evasion techniques

Trustlook researchers say that despite the singular focus on stealing IM data, the malware uses a few advanced evasion techniques. For example, the malware uses anti-emulator and debugger detection techniques to evade dynamic analysis, and also hides strings inside its source code to thwart lackadaisical code reversing attempts.

It is strange that Android malware only comes with one single functionality, that to extract and exfiltrate IM data. A theory for this design choice would be that attackers are collecting private conversations, images, and videos, in an attempt to identify sensitive data that they could later leverage in extortion attempts, especially against high-profile victims.

Researchers have not shared any info on the malware's distribution methods, but taking into account that the malware has a Chinese name and that there's no Play Store in China, the malware's authors may be distributing the malicious app via third-party stores and links on Android app forums.

<b>HEADLINE</b>	<b>04/02 Fringe websites attacking Parkland teens</b>
<b>SOURCE</b>	<a href="https://www.nbcnews.com/tech/internet/mainstream-pundits-apologize-fringe-sites-cash-attacking-parkland-teens-n862191">https://www.nbcnews.com/tech/internet/mainstream-pundits-apologize-fringe-sites-cash-attacking-parkland-teens-n862191</a>
<b>GIST</b>	<p>One of the most notorious internet purveyors of conspiracy theories and debunked science has launched an entire website dedicated to attacking a single person: David Hogg, who survived the school shooting in Parkland, Florida.</p> <p>The people behind Natural News, who publish stories about the dangers of tap water and vaccinations, launched a new hub eight days ago called HoggWatch.com. The website is populated almost entirely with content from Natural News founder Mike Adams and senior writer J.D. Heyes.</p> <p>Fringe websites have ridiculed the surviving teens from February's shooting in Marjory Stoneman Douglas High School as they've spurred nationwide anti-gun protests in the last month. Hogg and classmate Emma Gonzalez have been the subject of high-profile conspiracy theories in the aftermath of the shooting — some even pushed by celebrities like Roseanne Barr and Frank Stallone.</p> <p>Criticism of Parkland students has been met with its own counterattacks, including from the students themselves. Fox News host Laura Ingraham lost several major advertisers and apologized after attacking Hogg. But on the fringe parts of the internet, attacking Hogg remains a popular — if not lucrative — endeavor. On Monday, Hoggwatch pushed users to Natural News' sprawling network of sites, where Adams sells dietary supplements, water defluoridation devices and doomsday preparation materials.</p> <p>An article that was crossposted on both HoggWatch and Natural News received several call-outs on Monday from Alex Jones, whose InfoWars website also makes money from similar ads. Gateway Pundit, whose articles appear on Hoggwatch, have devoted much of their website's coverage to criticizing Hogg's media appearances since the shooting.</p> <p>Every article on HoggWatch is about Hogg or refers to him in some way. HoggWatch hammers home many of the same conspiracy theories and inflammatory political talking points pushed by Natural News and InfoWars, but uses the Parkland student as a central antagonist.</p> <p>Adams, whose flagship site Natural News was banned from YouTube in March, penned an article titled "Hogg Hitler! YouTube puts warning on hilarious David Hogg spoof video." Several articles attack CNN, and other articles warn of an impending civil war.</p> <p>The Hoggwatch article about atrazine links out to Pesticides.news, which sells breath sprays and other supplements through Natural News' store.</p> <p>The site's article feeds are hosted on a Natural News subsite, AlternativeNews.com, and shares a Disqus comment section with Natural News.</p> <p>Natural News claims on its website that it is "affiliated with the 501(c)3 nonprofit known as the Consumer Wellness Center."</p>

<b>HEADLINE</b>	<b>04/02 Report: IT background checks waived</b>
<b>SOURCE</b>	<a href="https://www.newsmax.com/newsfront/ig-democrats-waive-background-checks/2018/04/02/id/852125/">https://www.newsmax.com/newsfront/ig-democrats-waive-background-checks/2018/04/02/id/852125/</a>
<b>GIST</b>	<p>Nearly 50 House Democrats waived background checks for Pakistani IT aides accused of hacking Congressional data, according to an inspector general report.</p> <p>The report comes nearly a year after Rep. Debbie Wasserman-Schultz, D-Fla., continued to employ a former House IT Aide who was arrested on bank fraud charges. Imran Awan was tossed off the House network nearly five months before Wasserman-Schultz fired him for reportedly staling data and emails from Congress.</p> <p>House security policy requires mandatory background checks but includes a technical loophole that allows other members to vouch for them, according to investigative reporter Luke Rosiak.</p> <p>"It was as casual as that before you turn over the passwords that give these guys access to all the emails to members of Congress and every file on their hard drives and all their staffer's hard drives," Rosiak said to Fox Business' Maria Bartiromo on "Mornings with Maria."</p> <p>"As a result they gave these guys access to everything," he said, "And the [House Inspector General] determined that they were funneling data to the House network."</p> <p>Awan served as a tech aide in Congress for 13 years, and managed to help get jobs for brothers Abid and Jamal, wife Hina Alvi and friend Rao Abbas. All five were making close to \$165,000 a year. A background check on him would have found several red flags, including a \$1.1 million bankruptcy, six lawsuits against him or one of his companies and at least three misdemeanors.</p>

<b>HEADLINE</b>	<b>04/03 ISIS gaining ground in Bangladesh?</b>
<b>SOURCE</b>	<a href="http://www.business-standard.com/article/news-ani/global-concerns-over-islamic-forces-gaining-ground-in-bangladesh-118040300460_1.html">http://www.business-standard.com/article/news-ani/global-concerns-over-islamic-forces-gaining-ground-in-bangladesh-118040300460_1.html</a>
<b>GIST</b>	<p>As Bangladesh gears up for the general elections to be held in December this year, the Islamic forces in the country have started gaining ground.</p> <p>The Khalida Zia-led Bangladesh Nationalist Party (BNP), in alliance with Jamaat-e-Islami and other Islamic fundamentalist groups, are making attempts to root out the Sheikh Hasina-led Awami League.</p> <p>Experts believe that the Jamaat-e-Islami has committed war crimes during the 1971 Liberation War and killed three million people in the name of Islam.</p> <p>Around 500,000 women were reportedly violated by the Pakistan Army and their collaborators</p> <p>Shahriar Kabir, a Dhaka-based journalist and human rights activist, said, "The rise of Islamic militancy, terrorism in the name of Islam that is being perpetrated by the Jamaat-e-Islami and the Hifazat-e-Islam, and backed by the BNP, one of the largest political parties of Bangladesh. Because of the BNP, the Jamaat-e-Islami and the Hifazat-e-Islam as well as other fundamentalist and extremist groups have become so violent and we have see their violence starting from February 2013.</p> <p>Experts sitting offshore are also concerned over the growing alliance of the BNP and Islamic fundamentalists as they believe the perpetrators of 1971 are still stronger than pro-liberation forces.</p>

Rohan Gunaratna, an international terrorism expert based in Singapore said, "The Jamaat-e-Islami ideology has formed the sea bed, the foundation for the emergence of extremist and terrorist groups in Bangladesh. If not for the Jamaat-e-Islami, so many people would not have been radicalised and we have seen the emergence of JMB (Jamaatul Mujahideen Bangladesh), HuJI-B, the Harkat-ul-Jihad-al Islami Bangladesh and a number of other groups."

The rise of Islamic forces in Bangladesh not only affects the common people in the country, but also raises concerns for the fragile neighbourhood

BNP-Jamaat-led coalition governments in the past had provided shelter, funds and training to secessionist insurgent groups of north eastern India.

A BNP return to power would mean New Delhi facing a hostile government in Dhaka as it would again allow anti-India groups to gain ground on Bangladesh soil.

**HEADLINE** 04/03 US: Pakistan group an 'alias' for terror

**SOURCE** <https://www.reuters.com/article/us-pakistan-usa/u-s-designates-pakistan-group-an-alias-for-militants-on-terrorist-list-idUSKCN1HA0SC>

**GIST** ISLAMABAD (Reuters) - The United States has placed a Pakistani political group called the Milli Muslim League (MML) on its list of foreign terrorist organisations, saying it was merely an alias for a militant group blamed for a bloody 2008 attack in India.

The Milli Muslim League is controlled by Islamist leader Hafiz Saeed, who has a \$10 million U.S. bounty on his head. The group shot to prominence after fielding a candidate in a September 2017 by-election to fill a seat vacated by deposed prime minister Nawaz Sharif.

Saeed is the founder of Lashkar-e-Taiba (LeT), or Army of the Pure, which is also on the U.S. terrorist list and blamed by the United States and India for a four-day militant attack on the Indian city of Mumbai in 2008 in which 166 people were killed.

Saeed has repeatedly denied involvement in the attack.

The U.S. State Department said the Milli Muslim League alias had been added to the LeT's designations as a terrorist group.

"These designations seek to deny LeT the resources it needs to plan and carry out further terrorist attacks," the State Department said in a statement.

"Make no mistake: whatever LeT chooses to call itself, it remains a violent terrorist group. The United States supports all efforts to ensure that LeT does not have a political voice until it gives up violence as a tool of influence," it added.

Pakistan's Ministry of Foreign Affairs did not immediately respond to request for comment.

Saeed was placed under house arrest in January 2017 after years of living freely in Pakistan but a court ordered his release in November 2017.

India welcomed the U.S. decision saying Pakistan has failed to crack down on militants.

"Terrorist individuals and entities are allowed to change names and continue to operate freely from territory under Pakistan's control," an Indian foreign office spokesman said in New Delhi.

<b>HEADLINE</b>	<b>04/02 Syria: largest rebel group evacuating</b>
<b>SOURCE</b>	<a href="http://abcnews.go.com/International/wireStory/largest-syrian-rebel-group-starts-leaving-damascus-enclave-54170816?cid=clicksource_76_4_article%20roll_articleroll_hed">http://abcnews.go.com/International/wireStory/largest-syrian-rebel-group-starts-leaving-damascus-enclave-54170816?cid=clicksource_76_4_article%20roll_articleroll_hed</a>
<b>GIST</b>	<p>The most powerful Syrian rebel faction on the fringes of Damascus began abandoning its stronghold in the once rebel-held enclave of eastern Ghouta on Monday, opening the way for government forces to secure full control of the area, after seven years of revolt.</p> <p>The first fighters from the Army of Islam left the town of Douma around midday as part of an evacuation deal that will hand the town to the Syrian government, reported the state SANA news agency.</p> <p>The rebels were headed to Jarablus, a town in northern Syria where control of the territory is shared between Syrian rebels and Turkish forces.</p> <p>The Syrian government dispatched more than 50 buses to Douma to take the rebels out, SANA reported. By mid-afternoon, eight buses had departed, with 448 people aboard — rebel fighters and their family members.</p> <p>There was no immediate comment from the Army of Islam. The Britain-based Syrian Observatory for Human Rights, which monitors the civil war through a network of activists on the ground, also reported the evacuation.</p> <p>Rami Abdurrahman, the Observatory's director, said some factions within the Army of Islam oppose evacuating and surrendering Douma to the government of President Bashar Assad.</p> <p>The deal over Douma would mark the end of a weeks-long push by Assad's forces to consolidate their control over eastern Ghouta, just outside the capital.</p>

<b>HEADLINE</b>	<b>04/02 FBI atypical terror case comes to close</b>
<b>SOURCE</b>	<a href="http://www.foxnews.com/us/2018/04/02/atypical-terror-case-comes-to-close-with-20-year-sentence.html">http://www.foxnews.com/us/2018/04/02/atypical-terror-case-comes-to-close-with-20-year-sentence.html</a>
<b>GIST</b>	<p>BALTIMORE – It was July 2015 when the FBI, scrambling to contain a surge in Islamic State group propaganda, first visited an Egyptian-American newspaper deliveryman in Maryland.</p> <p>Agents needed to ask Mohamed Elshinawy why his phone number had surfaced in an investigation involving ISIS extremists and how he came to receive a \$1,000 Western Union transaction from Egypt.</p> <p>During hours of questioning, Elshinawy first suggested the money was from his mother. Next he said it was for an iPhone purchase for a friend. After being reminded it was a crime to lie to federal agents, he proceeded to tell a whole new story — that he had indeed received money from the Islamic State but that he was actually scamming the group instead of planning an attack.</p> <p>It was a pivotal moment in a months-long FBI investigation. Elshinawy was sentenced Friday to 20 years in prison on terrorism-related charges.</p> <p>The investigation stretched from a modest townhome northeast of Baltimore across multiple continents, unveiled a shadowy network of illicit payments and shell companies, and revealed a direct link to an ISIS hacker killed in Syria just before Elshinawy's arrest. It also had a chilling twist: Officials say that among the roughly 150 IS-linked cases U.S. authorities have brought since 2014, this is the only prosecution they're aware of in which money was transmitted from IS group operatives abroad to someone in the U.S.</p>

Law enforcement officials involved in the case spoke to The Associated Press about it in detail, recounting a high-intensity investigation that required constant surveillance, the scouring of money transfers and concern that funds sent to Elshinawy would fund an attack.

Brian Nadeau, a Baltimore FBI assistant special agent in charge, said the case raised a lot of red flags.

"Why is the money coming this way? Who is this person? What level are they at?" he said. The FBI, he said, "can't let someone who's receiving ISIS money be out running around. Who knows if we're in the middle of it, the beginning of it, the end, and what their plan is?"

Elshinawy's lawyers didn't return messages seeking comment, but they have argued that his social media and other communications — such as his claim that he was an ISIS soldier and was committed to violent jihad — were protected by the First Amendment, were not directed by the Islamic State and were merely aspirational.

Under a plea agreement, Elshinawy admitted conspiring with the IS group, but he defended himself at his sentencing hearing, saying, "I am not a terrorist," according to the Baltimore Sun.

It's not clear how close Elshinawy came to an attack, though FBI officials said they believed the threat of violence was real. Elshinawy's lawyers said in a sentencing memorandum that he was provided little to no specific direction, though Elshinawy told authorities he was given multiple options for violence, including a suicide bombing, and images of individuals who were potential targets, court papers say.

The Islamic State generally doesn't need to fund attacks in the U.S. given the inexpensive nature of the violence it advocates and its reliance on social media to motivate followers. But officials believe jihadists exploited a personal connection: a childhood friend of Elshinawy's from Egypt who joined the Islamic State in Syria, communicated with him on social media and encouraged him to pledge allegiance to the group.

His technological know-how and skill in covering his electronic tracks — he used encrypted communications applications and proxy servers — likely made Elshinawy a natural conduit, officials said.

Elshinawy received nearly \$9,000 in money transfers, including through PayPal accounts, and used the funds for phones, a laptop and a virtual private network for communication with militants overseas. The funds, disguised as money for printers, were routed through a web of wire transfers. Much of it came from a United Kingdom-based IT company run by Siful Sujjan, an IS computer hacker killed in December 2015 airstrikes in Syria.

"I think they thought they were going to just have a run-of-the-mill ISIS case, and when they peeled back the onion, they realized that (Elshinawy) was a key node," said Seamus Hughes, deputy director of George Washington University's Program on Extremism, who has written about the case.

The FBI's first interview with Elshinawy came weeks after an attempted rampage at a Prophet Mohammed cartoon contest in Texas and one day after shootings at military facilities in Tennessee.

Officials say he deflected questions about the money transfer with answers they knew were untruthful. At one point he pulled out an iPhone to display a Facebook conversation in Arabic. The English translation he provided was clearly improvised, an FBI official said.

After several hours, he admitted under pressure to receiving the money from the Islamic State but said he was scamming the group because he never intended to commit violence, officials said. He said that his cleverness should be rewarded and that he should be hired by the FBI to help untangle the IS money network, officials say.

The interviews continued over several weeks, and the results from search warrants and subpoenas yielded

	<p>insights that alarmed officials further.</p> <p>Elshinawy had pledged allegiance to the Islamic State group in February 2015 and, in conversations with his friend, pronounced himself ready for jihad and asked for advice in bomb-making, court papers say.</p> <p>He responded to the unrest in Baltimore that followed the death of Freddie Gray by praising violence against police. And, the FBI says, he attempted to recruit a brother in Saudi Arabia to join the Islamic State.</p> <p>Elshinawy has been in custody since his December 2015 arrest.</p> <p>Agents searching his home found a box of articles about IS attacks. His laptop held an image of a severed head next to an IS flag, and he accessed on his phone images of government buildings in Baltimore that officials believe were potential targets.</p> <p>"If this turned out to be successful," said Hughes, "it would be a whole different way of looking at ISIS external operations in the U.S."</p>

<b>HEADLINE</b>	<b>04/03 Kashmir violence tempting for ISIS?</b>
<b>SOURCE</b>	<a href="https://www.cnn.com/2018/04/03/asia/violence-kashmir-isis-intl/index.html">https://www.cnn.com/2018/04/03/asia/violence-kashmir-isis-intl/index.html</a>
<b>GIST</b>	<p>(CNN)Indian-administered Kashmir is again in the grip of deadly violence, following a series of raids by Indian security forces against militant groups Sunday.</p> <p>At least twenty people have been killed, including 13 militants, and several civilians who took to the streets to protest the army operations.</p> <p>For more than two decades several domestic militant groups, demanding either independence for Kashmir</p>

or for the area to become part of Pakistan, have fought Indian security forces. Now, into this volatile mix comes a new, potentially more significant threat: al Qaeda and ISIS.

### **Powerful recruitment tool**

ISIS first declared its intention to move into Kashmir in 2016, describing it as part of its Khorasan province. But only in the past few months have there been the first signs of activity there.

In February, ISIS claimed the killing of a police officer in Kashmir's capital, Srinagar, through a Telegram channel called 'Kashmir Villayah.' State police chief Shesh Paul Vaid said the attack was a "cause of worry," telling Indian network NDTV that though there didn't seem to be a substantial presence of ISIS in the region, the attack could have been driven by ISIS ideology.

It was the second ISIS claim in Kashmir in three months. In November, the Qaraar media outlet claiming to represent the "mujahideen of the Islamic Caliphate in the gateway of India" posted a photograph of a militant who was killed in an attack in Srinagar that left a policeman dead. At his funeral, the militant's body was wrapped in an ISIS flag.

Officials in New Delhi have flatly denied that ISIS exists in Kashmir; Vaid also asserted it had no "substantial" presence in the region. But there is concern that ISIS' ideology may attract militant Kashmiri youth. Amira Jadoon of the Combating Terrorism Center at West Point says that "unlike their predecessors of the 1990s, this generation is educated and highly active on social media, a powerful recruitment tool for the Islamic State."

Militant cells in Kashmir benefit from widespread support among young Kashmiri men. On several occasions in recent months, hundreds of them have pelted security forces with stones in an effort to shield militants. The situation has been exacerbated by the lack of any political progress on Kashmir's future.

### **Jihadi networks**

Two Pakistan-based groups - Lashkar-e-Taiba and Jaish-e-Mohammed -- have long been the main jihadi networks in Kashmir, and they are viscerally opposed to ISIS. No surprise, perhaps, that the pro-ISIS media outlet al-Qaraar has urged Muslims to abandon these groups and wage "pure jihad" under its banner, while describing Pakistan as an "enemy of Islam."

ISIS may find it difficult to challenge the Pakistan-based groups because -- in the eyes of the US and other western governments -- they enjoy the support of Pakistani military intelligence.

US Director of National Intelligence Daniel Coats told Congress in March that "militant groups supported by Islamabad will continue to take advantage of their safe haven in Pakistan to plan and conduct attacks in India and Afghanistan."

Additionally, Kashmiri militancy has been focused on liberating the region from Indian rule; it hasn't had much time for global jihad.

Jadoon says the possibility that ISIS can "inspire a sufficiently large number of young Kashmiris to stimulate an entire new wave of jihad in Jammu and Kashmir seems unlikely, at least in the short term."

But the region is potentially attractive to ISIS, with a large community of radicalized youth, mountainous territory, and a long-established insurgency that could potentially be co-opted.

Now that it has lost virtually all its territory in Iraq and Syria, ISIS is looking for areas in which to regenerate, from the Philippines to Pakistan to west Africa (as well as inside Iraq).

It has established a presence in Afghanistan, and across the border in the Pakistani province of Balochistan. On Monday, it claimed responsibility for murdering four Christians in the Balochi capital, Quetta.

	Preventing ISIS from establishing a foothold in the region would be one of the very few things on which India and Pakistan could agree.

<b>HEADLINE</b>	<b>04/02 US: 'kill or capture ISIS member' mission</b>
<b>SOURCE</b>	<a href="https://www.cnn.com/2018/04/02/politics/us-british-soldiers-killed-syria-isis-kill-mission/index.html">https://www.cnn.com/2018/04/02/politics/us-british-soldiers-killed-syria-isis-kill-mission/index.html</a>
<b>GIST</b>	<p>(CNN)The US and British soldiers killed in an improvised explosive device blast in Manbij, Syria, last week were on a classified mission to "kill or capture a known ISIS member" according to Pentagon spokesman Major Adrian Rankine-Galloway. The US military is releasing few details about the mission that killed Master Sgt. Jonathan J. Dunbar and UK soldier Sgt. Matt Tonroe.</p> <p>They were killed and five other troops were wounded in a March 30 IED blast. The US military has not said if the IED was in a building, a vehicle or buried in the road. The troops were out of their vehicles at the time of the explosion, according to a US official. There is also no word on whether the target was found and captured or killed.</p> <p>One indicator of the sensitivity of the mission is Dunbar was identified publicly by the Army only as being "assigned to Headquarters, U.S. Army Special Operations Command, Fort Bragg, N.C." That specific language has been used in the past when troops killed in action have actually been part of the Army's elite Delta Force, a counterterrorism unit that is not publicly identified.</p> <p>Another US official confirmed to CNN that Dunbar was assigned to Delta. Delta Force and the Naval Special Warfare Development Group -- popularly known as Seal Team Six -- are among the so-called Tier One units that specialize in high-risk counterterrorism and hostage rescue missions that are rarely acknowledged. Special operations forces have been in the Manbij area recently looking for high-value ISIS operatives that may have fled to the area the US official said.</p> <p>The US maintains about 2,000 US troops in Syria, who mostly work with local allies fighting ISIS in Syria.</p>

<b>HEADLINE</b>	<b>04/02 FBI oldest forensic case</b>
<b>SOURCE</b>	<a href="https://www.nytimes.com/2018/04/02/science/mummy-head-fbi-dna.html">https://www.nytimes.com/2018/04/02/science/mummy-head-fbi-dna.html</a>
<b>GIST</b>	<p>In 1915, a team of American archaeologists excavating the ancient Egyptian necropolis of Deir el-Bersha blasted into a hidden tomb. Inside the cramped limestone chamber, they were greeted by a gruesome sight: a mummy's severed head perched on a cedar coffin.</p> <p>The room, which the researchers labeled Tomb 10A, was the final resting place for a governor named Djehutynakht (pronounced "juh-HOO-tuh-knocked") and his wife. At some point during the couple's 4,000-year-long slumber, grave robbers ransacked their burial chamber and plundered its gold and jewels. The looters tossed a headless, limbless mummified torso into a corner before attempting to set the room on fire to cover their tracks.</p> <p>The archaeologists went on to recover painted coffins and wooden figurines that survived the raid and sent them to the Museum of Fine Arts, Boston in 1921. Most of the collection stayed in storage until 2009 when the museum exhibited them. Though the torso remained in Egypt, the decapitated head became the star of the showcase. With its painted-on eyebrows, somber expression and wavy brown hair peeking through its tattered bandages, the mummy's noggin brought viewers face-to-face with a mystery.</p> <p>"The head had been found on the governor's coffin but we were never sure if it was his head or her head,"</p>

said Rita Freed, a curator at the museum.

The museum staff concluded only a DNA test would determine whether they had put Mr. or Mrs. Djehutynakht on display.

“The problem was that at the time in 2009 there had been no successful extraction of DNA from a mummy that was 4,000-years-old,” said Dr. Freed.

Egyptian mummies pose a unique challenge because the desert’s scorching climate rapidly degrades DNA. Earlier attempts at obtaining their ancient DNA either failed or produced results contaminated by modern DNA. To crack the case, the museum turned to the Federal Bureau of Investigation.

The F.B.I. had never before worked on a specimen so old. If its scientists could extract genetic material from the 4,000-year-old mummy, they would add a powerful DNA collecting technique to their forensics arsenal and also unlock a new way of deciphering Egypt’s ancient past.

“I honestly didn’t expect it to work because at the time there was this belief that it was not possible to get DNA from ancient Egyptian remains,” said Odile Loreille a forensic scientist at the F.B.I. But in the journal *Genes in March*, Dr. Loreille and her colleagues reported that they had retrieved ancient DNA from the head. And after more than a century of uncertainty, the mystery of the mummy’s identity had been laid to rest.

#### What lies in Tomb 10A

Governor Djehutynakht and his wife, Lady Djehutynakht, are believed to have lived around 2000 B.C. during Egypt’s Middle Kingdom. They ruled a province of Upper Egypt. Though the walls in their tomb were bare, the coffins were embellished with beautiful hieroglyphics of the afterlife.

“His coffin is a classic masterpiece of Middle Kingdom art,” said Marleen De Meyer, assistant director for archaeology and Egyptology at the Netherlands-Flemish Institute in Cairo, who re-entered the tomb in 2009. “It has elements of a rare kind of realism.”

The team that discovered Djehutynakht’s desecrated chamber more than a century ago was led by archaeologists George Reisner and Hanford Lyman Story. As they explored the cliffs of Deir el-Bersha, which is about 180 miles south of Cairo on the east bank of the Nile, they uncovered a 30-foot burial shaft beneath boulders. With the help of dynamite, they entered the tomb.

In their original reports the archaeologists said the dismembered body parts belonged to a woman, presumably Lady Djehutynakht. Dr. De Meyer suspected the head belonged to the governor and not his wife.

#### Missing facial bones

As Dr. Freed, the museum curator prepared the items from Tomb 10A for exhibition in 2005, she reached out to Massachusetts General Hospital. Its CT scan revealed the head was missing cheek bones and part of its jaw hinge — features that may have potentially provided insight into the mummy’s sex.

“From the outside you could not tell that the mummy had been so internally tinkered with,” said Dr. Rajiv Gupta, a neuroradiologist at Massachusetts General. “All the muscles that are involved in chewing and closing the mouth, the attachment sites of those muscles had been taken out.”

They now had another mystery: Why did the mummy have these facial mutilations?

Along with Dr. Paul Chapman, a neurosurgeon at the hospital, Dr. Gupta hypothesized that they might be part of an ancient Egyptian mummification practice known as the “Opening of the Mouth Ceremony.” The ritual was performed so the deceased could eat, drink and breathe in the afterlife.

“It’s a very specific cut they made,” said Dr. Gupta, referring to the surgical removal of part of the mandible. “There’s a precision to it which is what we were surprised by. Someone was actually doing coronoidectomy 4,000 years ago.”

Some doctors and Egyptologists doubted that ancient Egyptians could perform that complex operation with primitive tools.

To show it was possible, Dr. Gupta, Dr. Chapman and an oral and maxillofacial surgeon performed the bone removal on two cadavers using a chisel and mallet. They drove the chisel between the lips and gums behind the wisdom teeth, and were able to remove the same bones missing in the mummified skull.

Still, the question of the mummy’s identity lingered.

#### Tooth raiders

The doctors and museum staff determined their best chance of retrieving DNA would be by extracting the mummy’s molar. “The core of the tooth was where the money was,” Dr. Chapman said. Teeth often act as tiny genetic time capsules. Researchers have used them to tell the tales of our prehistoric human cousins called Denisovans, as well as to provide insight into the medical history of long dead people.

“The advantage we had is that we had a hole in the neck because the head had been torn off,” said Dr. Chapman.

They snaked a long scope with a camera into the back of the mouth. The first tooth they targeted would not budge, so Dr. Fabio Nunes, who was then a molecular biologist at Massachusetts General, switched to a different molar. Sweating, he clamped down with dental forceps, gave it a few wiggles, then a few twists and “pop” — it was free.

“My main concern was: Don’t drop it, don’t drop it, don’t drop it,” he said. After he successfully maneuvered out from the neck, the room exhaled and gazed upon their prize.

“This looked like an absolutely cavity free, perfectly preserved tooth,” Dr. Freed said. “I thought maybe it was Mrs. Djehutyakht who had died in childbirth. Total speculation.”

#### The F.B.I. ’s oldest forensic case

For several years, other teams of scientists tried fruitlessly to get DNA from the molar. Then the crown of the tooth came to Dr. Loreille at the F.B.I. ’s lab in Quantico, Va., in 2016.

Dr. Loreille had joined the F.B.I. after 20 years of studying ancient DNA. Previously, she had extracted genetic material from a 130,000-year-old cave bear, and worked on cases to identify unknown Korean War victims, a two-year old child who drowned on the Titanic and two of the Romanov children who were murdered during the Russian Revolution (though she was unable to confirm if one was the famed Anastasia).

In the F.B.I.’s clean lab, Dr. Loreille drilled into the tooth’s core and collected a tiny bit of powder. She then dissolved the tooth dust to make a DNA library that allowed her to amplify the amount of DNA she was working with, like a copy machine, and bring it up to detectable levels.

To determine whether what she had extracted was ancient DNA or contamination from modern people, she analyzed how damaged the sample was. It showed signs of heavy damage, confirmation that she was studying the mummy’s genetic material.

She plugged her data into computer software that analyzed the ratio of chromosomes in the sample. “When you have a female you have more reads on X. When you have a male you have X and Y,” she said.

The program spit out “male.”

Dr. Loreille discovered the mummified severed head had indeed belong to Governor Djehutynakht. And in doing so she had help establish that ancient Egyptian DNA could be extracted from mummies.

“It’s one of the Holy Grails of ancient DNA to collect good data from Egyptian mummies,” said Pontus Skoglund, a geneticist at The Francis Crick Institute in London who helped confirm the accuracy of the finding while he was a researcher at Harvard. “It was very exciting to see that Odile got something that looked like it could be authentic ancient DNA.”

#### Unraveling the mummy’s genetic history

Dr. Loreille’s examination also showed that Governor Djehutynakht’s DNA carried clues to another mystery. For centuries archaeologists and historians have debated the origins of the ancient Egyptians and how closely related they were to modern people living in North Africa. To the researchers’ surprise, the governor’s mitochondrial DNA indicated his ancestry on his mother’s side, or haplogroup, was Eurasian.

“No one will ever believe us,” Dr. Loreille recalled telling her colleague Jodi Irwin. “There’s a European haplogroup in an ancient mummy.”

Dr. Irwin, the supervisory biologist at the F.B.I.’s DNA support unit, had similar concerns. To verify the results they sent a portion of the tooth to a Harvard lab, and then to the Department of Homeland Security, for further sequencing.

Then last year as the F.B.I. scientists worked to confirm their results, another group affiliated with the Max Planck Institute for the Science of Human History in Germany reported the first successful extraction of ancient DNA from Egyptian mummies. Their results showed that their ancient Egyptian samples were closer to modern Middle Eastern and European samples than to modern Egyptians, who have more sub-Saharan African ancestry.

“It was at the same time ‘Dang! We’re not first,’” Dr. Loreille said. “But also we’re happy to see they had this Eurasian ancestry.”

Alexander Peltzer, a population geneticist at the Planck Institute and an author on the first Egyptian mummy DNA paper, said Dr. Loreille’s genetic findings fit well with what his team had found.

“Of course, one has to be careful to deduce too much from single genomes and only two locations,” he said.

Dr. Irwin also expressed caution with how the public interprets her team’s results, saying that mitochondrial DNA provides, “just a very small glimpse into somebody’s ancestry.”

Future ancient DNA work will provide insight into how diverse populations moved and mixed in Egypt millenniums ago, according to Verena Schünemann, a paleogeneticist at the University of Zurich in Switzerland who led the Egyptian mummy DNA study that was published before the F.B.I.’s.

Obtaining mummified samples for genetic sequencing may prove difficult for researchers outside of Egypt as the country’s government has barred foreign researchers from taking artifacts and ancient human remains out of the country since 1983. Many investigations will instead rely on museum samples, like Djehutynakht’s decapitated head.

In addition to helping lay groundwork for future exploration of ancient Egypt’s migration history, Dr. Loreille and her team’s work may prove beneficial to F.B.I. forensic efforts.

“We are testing techniques that may in the future help them work on remains that are highly degraded, like

	<p>in the desert or that are burned,” she said.</p> <p>But for the Egyptologists and medical professionals enthralled by Tomb 10A, the biggest prize was finally solving the mystery of the mummified head.</p> <p>“You almost feel like it’s a child, like you just identified the gender of a baby,” Dr. Nunes said. “It is a boy!”</p> <p>Dr. Freed agreed. “We now know that we have the governor himself,” she said. “We already show the head at the museum, but now we’ll have to change the label!”</p>

<b>HEADLINE</b>	<b>04/02 Antarctica coastal glaciers in retreat</b>
<b>SOURCE</b>	<a href="https://www.washingtonpost.com/news/energy-environment/wp/2018/04/02/an-alarming-10-percent-of-antarcticas-coastal-glaciers-are-in-retreat-scientists-find/?utm_term=.3a4936a86206">https://www.washingtonpost.com/news/energy-environment/wp/2018/04/02/an-alarming-10-percent-of-antarcticas-coastal-glaciers-are-in-retreat-scientists-find/?utm_term=.3a4936a86206</a>
<b>GIST</b>	<p>Antarctica’s ocean-front glaciers are retreating, according a new satellite survey that raises additional concerns about the massive continent’s potential contribution to rising sea levels.</p> <p>Antarctica, which contains enough ice to raise the oceans by about 200 feet, is a continent of ice that flows outward to the ocean at numerous large glaciers. These mostly submerged glaciers rest deep on the seafloor at a point called the “grounding line,” where ocean, ice and bedrock meet.</p> <p>But at 10.7 percent of these glaciers, the ice masses are moving at a significant speed back toward the center of the continent as they melt from below, often because of the incursion of warm ocean water, which causes the grounding line to retreat. Only about 1.9 percent of glaciers were growing at a significant speed, suggesting a net retreat.</p> <p>And the more glaciers are retreating, the more one worries about sea-level rise. Retreating grounding lines can expose more ice to the ocean, allowing it to flow outward more rapidly.</p> <p>The research used satellite techniques to infer changes to glacier grounding lines based on changes in the height of the glacier’s surface. Scanning one-third of Antarctica’s marine-based glaciers along a roughly 10,000-mile stretch of coastline, the work presents a more comprehensive look than other studies of Antarctic glaciers, which have tended to focus on grounding lines in just one key region.</p> <p>“We were able to quantify more or less all around Antarctica,” said Hannes Konrad, the lead author of the research. Konrad works at the University of Leeds in Britain, along with a number of co-authors of the study. Other authors worked at University College London.</p> <p>The research found that from 2010 through 2016, about 80 square miles per year of ice is being lifted off of the seafloor and going afloat as grounding lines retreat. That’s about four times the size of Manhattan every year.</p> <p>At the same time, the 10.7 percent of Antarctic grounding lines were retreating at a rate faster than 25 meters per year, which the study takes as a benchmark because that rate of retreat is believed to have occurred at the end of the last ice age. Just 1.9 percent of Antarctic grounding lines were advancing faster than 25 meters per year.</p> <p>The sea-level implications of the research are troubling, if not direct — researchers cannot precisely quantify sea-level rise just based on the retreat of grounding lines, although they are certainly related.</p> <p>“We find that 10 percent of the Antarctica ice sheet significantly retreating, but we can’t somehow extrapolate sea level rates that come from that,” Konrad said. “But to say 10 percent of Antarctica, this massive ice body, is retreating, still should be some sign of warning. It’s large.”</p>

	A key factor driving the retreat of Antarctic grounding lines is the incursion of warm, deep ocean water which melts glaciers at their bases and causes the grounding line to retreat.

<b>HEADLINE</b>	<b>04/02 IRS audits fewest tax returns in 15yrs</b>
<b>SOURCE</b>	<a href="https://www.washingtontimes.com/news/2018/apr/2/irs-tax-return-audit-rate-lowest-15-years/">https://www.washingtontimes.com/news/2018/apr/2/irs-tax-return-audit-rate-lowest-15-years/</a>
<b>GIST</b>	<p>The IRS is auditing fewer tax returns than at any other time in the past 15 years as the agency struggles with what it says is a shrinking budget and pressure from Congress to be less zealous in enforcement.</p> <p>Just six out of every 1,000 individual taxpayers faced an audit last year, the government said in the latest IRS Data Book released last week, marking the lowest rate since 2002.</p> <p>Analysts said that is unlikely to change this year, as the April 17 deadline for this year’s filing season nears and as the IRS grapples with endemic budget cuts and the strain of having to administer the new tax law.</p> <p>Some taxpayer advocates cheered the news, saying it’s time the IRS was brought to heel after years of excesses, including targeting tea party groups for illegal scrutiny and making tax-filing season tougher than it had to be as a protest against budget cuts.</p> <p>“It should be a healthy sign if they’re auditing less,” said Grover Norquist, president of Americans for Tax Reform. “I would very much like to live in a world where the IRS doesn’t have to do too much auditing because the tax code is simple enough for people to understand.”</p> <p>But the agency’s defenders said having a working IRS is critical to collecting money owed to the government — particularly after Congress made the job even more complicated with the passage in December of the \$1.5 trillion tax cut legislation.</p> <p>“You’ve got this depleted workforce, they’re auditing fewer people, and now here comes this tax law that invites all kind of rampant tax sheltering, and they provide no additional money,” said Chuck Marr, director of federal tax policy at the left-leaning Center on Budget and Policy Priorities.</p> <p>The IRS has been begging for more resources to conduct enforcement, but the Republican-led Congress has been reluctant to allocate the money.</p> <p>Former IRS Commissioner John Koskinen has estimated that the agency leaves up to \$8 billion per year in legitimately owed taxes on the table because of a lack of resources for enforcement.</p>
