<b>GIST</b>	<p>HOW BIG A problem is radicalisation in Ireland? That’s something mosques disagree on.</p> <p>The number of people who have radical or extreme Islamic views here varies from a handful to over 100, depending on who you ask.</p> <p>Shaykh Dr Umar Al-Qadri, an imam based in Blanchardstown and the chair of the Irish Muslim Peace &amp; Integration Council, thinks the risk of radicalisation in Ireland is “much smaller when compared to the UK” but that Muslim communities here “need to be vigilant”.</p> <p>Al-Qadri said he believes there are “at least 100 people [in Ireland] that would be supportive to the form or understanding of Islam that Daesh (ISIS) adheres to, that all these militants adhere to”.</p>

“This support does not necessarily mean that these people are terrorists, it means that they could support them, you know, ideologically. They may also support them financially.”

Al-Qadri said these people need to be monitored.

When asked how he arrived at the figure of 100 people, he told us: “I’ve been living here for the past 14 years. I have a lot of people throughout Ireland who are in contact with me and keep informing me about the various different activities that have been happening.”

A spokesperson for An Garda Síochána said the organisation is “monitoring no more than 30 people living in this State” in relation to radical views.

“Radicalisation is a concern for An Garda Síochána as it is for all policing and security services, particularly after the horrific attacks that have taken place in Europe by people who have been radicalised. Our response to radicalisation is based on our analysis of the level of threat from it.”

“The threat level is kept under constant review,” the spokesperson added, stating that gardaí are “constantly vigilant for any potential emerging threats” and “in constant contact with our policing and security partners across the world, but particularly in Europe, to share information and analysis”.

Al-Qadri said he has reported suspicious activity to gardaí on numerous occasions.

“I am in contact with law enforcement agencies on a regular basis ... We exchange information to ensure that our country remains a safe country.”

Dr Ali Selim, of the Islamic Cultural Centre of Ireland (ICCI) in Clonskeagh, home of Ireland’s largest mosque, disagrees with some of Al-Qadri’s assessments. He’s less concerned with the threat of radicalisation in Ireland, saying it’s “not at all” an issue.

He also disputes that in the region of 100 people in Ireland hold radical views.

“I don’t think that’s true, I think the number is smaller. I cast huge doubt over the existence of individuals who are having radicalised thoughts in Ireland. Even if you travel outside of Ireland to Muslim countries or Arab countries, Ireland has a fantastic reputation, it is known as a friendly country. Muslims living here, they enjoy equal rights.”

However, he added that gardaí hold a clinic at the ICCI every Friday, where people can share any concerns they have.

Selim said Muslim people in Clonskeagh have been embraced by the wider community and vice versa. He said the Muslim population in Ireland would not have grown from about 4,000 in 1991 to over 63,000 in the 2016 Census if its members had any problem integrating into Irish society.

“The fact that the members of the Muslim community in Ireland have increased gives a very positive indication about the level of harmony and cohesiveness.

“Had the Muslim community not felt comfortable about Ireland, they wouldn’t have rapidly increased ... The Muslim community, when they arrived in Ireland, they positively contributed to the country that they lived in,” Selim told us.

Imam Ibrahim Noonan, who is based in Galway, is concerned about certain speakers preaching in mosques around Ireland. He said some of these people are “renowned for their extremism”.

“They have been coming here and they have been lecturing here. I can’t understand how the government allowed it. OK, they had British passports, but they’re here. I mean everyone knows it, everyone involved

	in Islam in Ireland knows they're here and that they're spreading their hate here.”

<b>HEADLINE</b>	<b>03/14 'Neo-Nazi' convicted terror attack plans</b>
<b>SOURCE</b>	<a href="https://www.eveningexpress.co.uk/fp/news/local/north-east-man-connor-ward-convicted-of-planning-terrorism-attacks2/">https://www.eveningexpress.co.uk/fp/news/local/north-east-man-connor-ward-convicted-of-planning-terrorism-attacks2/</a>
<b>GIST</b>	<p>A neo nazi who acquired components for potential bombs and who kept a list of North-east mosque addresses is behind bars today after being convicted of planning terror attacks.</p> <p>Connor Ward, 25, from Banff, had denied breaching the Terrorism Act and faced trial at the High Court in Edinburgh charged with conduct which showed his intention to commit acts of terrorism.</p> <p>The court heard how the fascist acquired an arms cache which included a stun gun, hundreds of knuckle dusters, knives and metal bars.</p> <p>Ward, who was previously jailed for three years in 2012 for possessing an explosive substance, also acquired a number of deactivated bullets.</p> <p>The court heard the ammo could have been reactivated for use in a firearm.</p> <p>Ward, a former psychiatric patient, claimed he was suffering from mental illness at the time he downloaded the documents.</p> <p>He said that he acquired the files because he believed the world was going to end in 2012 and he wanted to survive the apocalypse.</p> <p>But today, jurors refused to believe Ward's claims and returned verdicts of guilty to two charges of breaching the Terrorism Act 2000 and the Terrorism Act 2006.</p> <p>Ward is expected to be sentenced at the High Court in Glasgow on April 11.</p> <p>Detective Chief Superintendent Gerry Mclean, of Police Scotland's Organised Crime and Counter Terrorism Unit, said: "Following Ward's arrest a vast amount of material was seized by officers who invested a significant amount of time into quantifying the scale of Ward's interest in terrorism. Although he operated alone, the weapons, manuals and downloads he possessed had the potential to cause serious harm.</p> <p>"While we may never know the full extent of Ward's intentions thanks to the early intervention of police, we do know that we cannot underestimate the dangerous nature of any behaviour or activity linked to terrorism. These acts are very rare, not least in the North-east of Scotland, and while concerted action takes place every day alongside our partners to protect the public it is crucial that communities remain vigilant.</p> <p>"Terrorist-related activity will not be tolerated in any form and if you are intent on trying to harm our communities let me be very clear that we will do everything in our power to stop you. This conviction today demonstrates that Police Scotland is committed to supporting and reassuring our communities and would continue to ask the public to work with us by letting us know any concerns or suspicions they have. No piece of information is ever considered too small or insignificant."</p>

<b>HEADLINE</b>	<b>03/14 Europol: terror threat still looms</b>
<b>SOURCE</b>	<a href="https://www.euractiv.com/section/defence-and-security/news/terrorist-threat-still-looms-over-europe-europol-expert-warns/">https://www.euractiv.com/section/defence-and-security/news/terrorist-threat-still-looms-over-europe-europol-expert-warns/</a>

## GIST

The threat of terrorism “has not diminished and still persists” in Europe, despite the loss of Islamic State territories in Syria and Iraq, according to the head of Europol’s Counter Terrorism Centre, Manuel Navarrete. EURACTIV’s partner Euroefe reports.

“In Europe, we continue to be very vigilant. The threat is significant and takes many forms. We are talking about more than 20 incidents in 2017, from well-planned attacks such as in Barcelona and Manchester to less prepared ones”, Navarrete said in an interview at Europol’s headquarters in The Hague (Netherlands).

The colonel from the Guardia Civil (the Spanish police force) has been at the helm of the European Counter Terrorism Centre since January 2016, and his department works to “strengthen (the EU’s) response to terror”.

According to Europol (which has not yet submitted its annual report), 980 arrests linked to jihadism were recorded in Europe last year, slightly below the 1,000 arrests a year earlier.

On the consequences of terrorism, Manuel Navarrete pointed out that “even if the threat persists, the number of victims has decreased,” in 2017 there were around “68 deaths” as a result of Islamic attacks in Europe, compared to 135 in 2016.

#### Al Qaeda

International attention is focused on the Islamic State’s (ISIS) loss of territory and loss of its self-proclaimed “caliphate” in Syria and Iraq, but Manuel Navarrete warned that this does not mean the terrorist group Al-Qaeda has disappeared: “the two threats are simultaneous,” he warned.

For this counter terrorism expert, the threat of ISIS “takes various forms, is difficult to establish and has many tendencies even abroad”, but it continues to maintain “links, competition and conflicts” with Al-Qaeda.

“Talking about ISIS and Al-Qaeda as one and the same is wrong. We cannot say that there is collaboration between them, but there is a link,” Navarrete stated.

What matters for the security forces is “the way it is manifested in terrorist attacks or actions,” in Europe and in the rest of the world.

ISIS has “a trademark, it’s more aggressive and ruthless,” as shown by the propaganda the group broadcasts on social media with videos and photos of their crimes.

However, Al-Qaeda, which carried out large-scale terrorist attacks such as on 11 September in New York (3,016 deaths) or on 11 March in Madrid (193 deaths), is an “equally aggressive and ruthless group, but with a certain degree of sophistication and planning,” said Navarrete.

Nowadays, three sources of terrorist threats can be identified: solitary actors who “go from 0 to 100 in a very short time”, Al-Qaeda’s more sophisticated and longer-term plans”, and the complex action system of ISIS, he added.

#### Growing threat outside Syria

The retreat of ISIS in Iraq and Syria “does not reduce the terrorist threat” in Europe, and even increases a risk factor: extremists who fought in the “caliphate” and are confronted with the siege of their territory will seek to return to the European countries they came from.

“Over the last few years, we were getting ready and preparing for how to deal with this issue. Information sharing data has been improving, and police operations are getting better and better and are aligned with the fight against terrorism and online propaganda.”

	Europol, the EU's law enforcement agency, now concentrates on "the identification, the prevention and the pursuit" of those wanting to enter Europe from jihadist groups in the Middle East.
<a href="#">Return to Top</a>	

<b>HEADLINE</b>	<b>03/14 Integrating extremists back into Minnesota</b>
<b>SOURCE</b>	<a href="http://kstp.com/news/federal-probation-officer-judge-integrating-extremists-back-society-minnesota/4826244/">http://kstp.com/news/federal-probation-officer-judge-integrating-extremists-back-society-minnesota/4826244/</a>
<b>GIST</b>	<p>Minnesota has more jihadists and white supremacists than any state in the country.</p> <p>That's according to Minnesota's chief federal probation officer and chief federal judge.</p> <p>There are currently 21 extremists on supervised release in the state. Twelve of them are jihadists. Nine are white supremacists.</p> <p>Four more extremists are scheduled to be released in the next year. That means 25 extremists will be living in Minnesota communities.</p> <p>The increase in extremists coming into the system demanded a strategy or plan that wasn't available nationally, chief federal probation officer Kevin Lowry said.</p> <p>In a rare on-camera interview, Lowry said he had to travel to the United Kingdom and Germany in September of 2015 to begin to build a playbook on how to transition terrorists back into society.</p> <p>He became an expert in what motivates terrorists, what it takes to de-radicalize them and why some may never be de-radicalized.</p> <p>"We picked up programs in Germany and the U.K. because those are countries that are more similar to us in economics, diversity, religion, politics," he said.</p> <p>"I met with a number of service providers and government professionals that are fully tasked with dealing with extremist cases. We brought into the United States a number of professionals that would help us and train us in risk assessment and intervention strategies that have been tested over 20 years."</p> <p>The Twin Cities have seen several high-profile terrorist incidents in the last few years, including the conviction of nine young Somali men who tried to help ISIS, a 20-year-old man who stabbed two brothers at the Mall of America in the name of Jihad last November and a 19-year-old woman accused of arson at St. Catherine University this past January.</p> <p>She told investigators she wanted to help Al Qaeda.</p> <p>Lowry cannot talk about specific cases because he supervises all terrorists convicted in the Minnesota federal court. He's also had to supervise individuals convicted of involvement in organized crime and waves of other kinds of extremists over the years.</p> <p>But he worries about the growing number of jihadists and white supremacists.</p> <p>"When you look at somebody who's been radicalized, what you're going to look at is what's their level of engagement," he said. "What's their level of intent, what's their level of capability, is there any type of mitigating factors that can be incorporated in the rehabilitation."</p> <p>He said there are some red flags officers look for in radicalized individuals. A green bird often represents martyrdom, lions indicate jihad or fighting for a cause.</p> <p>Lowry said white supremacists are more obvious in their extremist views.</p>

"They do what we call flying a flag," he said. "They are always advertising, wearing a certain kind of clothing. Black leather boots with pant legs rolled up, Nazi SS emblems, swastikas, lightning bolts, Celtic crosses for white pride and 1488 tattoos indicating an allegiance to Hitler.

"They are easy to spot and they want to be spotted."

Lowry said extremists have turned pure religious messages like the Islamic call to prayer "Allahu Akbar," meaning God is Great, and the Christian cross, into evil calling cards.

He also said the videos terrorist organizations use for recruiting are highly produced and engaging.

Lowry is training hundreds of probation officers across the country, as well as the Bureau of Prisons, to recognize the signs.

But before Lowry sees them, extremists stand in front of federal judges.

Minnesota's Chief Judge of the Federal Courts John Tunheim is one of the foremost experts in the country and around the world on terrorist defendants.

The UN invites him to talk about Minnesota's integration of terrorists back into society, which he pioneered. And the U.S. State Department sends him around the world to talk to officials in different countries about Minnesota's program.

Tunheim saw some of the first extremist cases in Minnesota. He believes all terrorists are not equal, and the justice system's one size fits all approach doesn't work well in extremist cases.

"Putting them away in prison where they would get more radicalized as the years go on and radicalize other people is not in the best interest of society," Tunheim said. "What's in the best interest of society is to bring these people back and make sure they are productive citizens, so that's what we are trying to do."

Tunheim knows he walks a line between prioritizing public safety and an extremist's right to redemption.

He admits there is always the possibility that he'll make a wrong decision.

But it hasn't happened yet.

"Maybe we make a wrong decision," he said. "Hopefully it's a decision made with as much information (and) knowledge and training and experience in addressing an area that we haven't had much experience addressing.

"All of it is a gamble because you can't always predict the future. Let's see what we can do, let's see if we can create better people."

He said extremists who serve their time and go back into their communities to share stories of their wrong turns can be powerful when it comes to dissuading other people thinking about the same path.

Better people can better happen when a national strategy is in place, Lowry said.

He said if there's not a way to do what Minnesota is doing across the country, the problem of extremists will grow.

"What I'm worrying about is, is something bad going to happen on my watch," he said. "Is something going to go wrong? Are one of these cases going to go off the deep end and harm somebody in the community?"

	It keeps him up at night.

<b>HEADLINE</b>	<b>03/14 Military cover up in Niger operations?</b>
<b>SOURCE</b>	<a href="https://www.nytimes.com/2018/03/14/world/africa/niger-green-berets-isis-firefight-december.html">https://www.nytimes.com/2018/03/14/world/africa/niger-green-berets-isis-firefight-december.html</a>
<b>GIST</b>	<p>WASHINGTON — Green Berets working with government forces in Niger killed 11 Islamic State militants in a firefight in December, the American military acknowledged for the first time on Wednesday. The battle occurred two months after four United States soldiers died in an ambush in another part of Niger — and after senior commanders had imposed stricter limits on military missions in the West African country.</p> <p>No American or Nigerien forces were harmed in the December gun battle. But the combat — along with at least 10 other previously unreported attacks on American troops in West Africa between 2015 and 2017 — indicates that the deadly Oct. 4 ambush was not an isolated episode in a nation where the United States is building a major drone base.</p> <p>After the ambush, senior officers at United States Africa Command, which oversees American military operations on the continent, imposed additional measures to enhance the safety of troops on missions that were designed to train and advise local forces in Niger.</p> <p>But the missions did not end.</p> <p>On the morning of Dec. 6, a combined force of Nigerien and American troops “came under fire from a formation of violent extremists,” Samantha Reho, a spokeswoman for Africa Command, said in a statement to The New York Times on Wednesday.</p> <p>She said the gun battle killed 11 militants — including two wearing suicide vests — who were believed to be affiliated with the Islamic State in West Africa. No American or Nigerien forces were killed or wounded, she said.</p> <p>It was the first time the American military has acknowledged the December firefight, and Ms. Reho gave no explanation for the Pentagon’s failure to disclose the episode at the time.</p> <p>The head of Africa Command, Gen. Thomas D. Waldhauser, did not mention the December battle in testimony to Congress this month and only broadly outlined the threats in the region. A senior House Republican aide said on Wednesday that lawmakers had been notified about the Dec. 6 attack soon after it happened.</p> <p>Between 2015 and 2017, there were about 10 instances of American troops and local training partners being attacked in Niger and elsewhere in West Africa, said Brig. Gen. Donald C. Bolduc, the former commander of United States Special Operations in Africa.</p> <p>Enemy fighters were killed in some of those unreported episodes, General Bolduc said on Wednesday, but there were no American casualties.</p> <p>The existence of the Dec. 6 firefight was referenced in a terse line in an unclassified report the Trump administration gave to Congress this week about its legal and policy views on using military force. That report, obtained by The Times, mentioned only that a joint American-Nigerien force was attacked by a group of presumed Islamic State militants on that date, and returned fire “in self-defense.”</p> <p>Ms. Reho portrayed the firefight as an act of self-defense after the unit happened to come under attack.</p> <p>“The purpose of the mission was to set the conditions for future partner-led operations against violent extremist organizations in the region,” she said. “There was no aspect of this mission focused on pursuing</p>

enemy militants, and the combined force was postured to respond as necessary in case contact with the enemy occurred.”

She added: “With that said, our forces do operate in unstable areas and are occasionally exposed to danger from enemy forces. When such a situation occurs, our personnel are authorized to respond to threats and violence appropriately.”

However, another military official familiar with the Dec. 6 firefight, who spoke on the condition of anonymity, offered a different portrayal of the events.

The official said that the Green Berets were assisting Nigerien forces on a multiday operation near Diffa, a city in southeastern Niger near the border with Nigeria. It sought to clear the potentially hostile area so that Nigerien forces could build a new outpost there. It is unclear if the small base was ever built.

The mission had attracted attention among American forces after the firefight, the official said, because it was one of the first major forays into the field in Niger since the Oct. 4 ambush.

The White House only this month approved giving combat pay to American troops deployed to Niger. Army soldiers in Niger are still not eligible for certain combat awards — including the Combat Infantry Badge and Combat Action Badge — that are highly respected and sometimes can help with promotion. The four soldiers who were killed in the Oct. 4 raid were given the awards posthumously, but those troops who have fought in Niger have not received them.

Questions about whether the American military, under the Trump administration, is seeking to obscure the expanding scope of operations in Africa were raised last week when it was revealed that the United States carried out four airstrikes in Libya between September and January that Africa Command failed to disclose at the time. The military has said it will acknowledge such missions if asked about them, even if it does not affirmatively disclose them in a news release.

The Dec. 6 firefight was the main nugget of new information in the report that the Trump administration submitted to Congress this week, and was eagerly awaited by specialists on national security issues related to counterterrorism operations.

They hoped it would offer a thorough public explanation of issues — ranging from when the Trump administration thinks it can attack other countries without prior permission from Congress, to an acknowledgment that President Trump secretly relaxed limits on when the military or the Central Intelligence Agency can carry out kill-or-capture operations with drones or commando teams, away from conventional battlefields.

But the unclassified portion of the report, which was just over eight pages long, largely consisted of a slightly rewritten version of last December’s version of the semiannual War Powers Resolution letter in which the executive branch lists deployments abroad.

The unclassified report gave only terse descriptions of certain matters while making no mention of key topics like Mr. Trump’s changes to the drone strike rules, suggesting that they were relegated to the classified annex the public cannot see.

HEADLINE	<b>03/13 Gitmo: prepared for more detainees</b>
SOURCE	<a href="https://www.washingtontimes.com/news/2018/mar/13/guantanamo-bay-waits-donald-trumps-bad-dudes/">https://www.washingtontimes.com/news/2018/mar/13/guantanamo-bay-waits-donald-trumps-bad-dudes/</a>
GIST	On March 14, 2008, Muhammad Rahim al-Afghani, a close aide and “procurement specialist” for Osama bin Laden, having been captured by Pakistani authorities and handed over to the CIA, was processed and imprisoned at the U.S. detainment site at Guantanamo Bay, Cuba.

Exactly a decade later, al-Afghani remains the last inmate to enter Guantanamo despite President Trump's vow to "load it up with bad dudes."

The Pentagon has a haul of Islamic State fighters, but it now says it would rather hand them off to other countries.

At its height under President George W. Bush, Guantanamo held 750 suspected militants captured in the global war on terror. Today, just 41 remain.

U.S. military leaders say they have received no order to kick-start operations at Guantanamo despite Mr. Trump's announcement in his State of the Union address this year directing Defense Secretary James Mattis to "re-examine our military detention policy and to keep open the detention facilities at Guantanamo Bay" in the next 90 days.

Prison officials say they are ready to take in more detainees.

"We are prepared to receive more should they be directed to us," Adm. Kurt W. Tidd, who oversees the military's Southern Command that includes Guantanamo, told the Senate Armed Services Committee last month. "As of today, we have not been given a warning order that new detainees might be heading in our direction, but our responsibility will be to integrate them in effectively."

The admiral has publicly estimated that the prison site could immediately take in another 24 detainees without needing additional guard or processing staff.

But with no prisoners in the pipeline, U.S. commanders say, Washington and its allies are facing a growing problem with Islamic State terrorists who have been captured.

"Currently, there are no plans to move anyone to Guantanamo," Pentagon spokeswoman Dana White said this month.

She said Defense Department officials were drafting options for Mr. Mattis on how to handle Islamic State terrorists captured by American and coalition forces in Iraq and Syria. One option was transferring some of them to Guantanamo.

Kathryn Wheelbarger, the principal deputy assistant defense secretary for international security affairs, told reporters last month that Syrian allies of the U.S. were capturing as many as 40 Islamic State militants a day.

Mr. Trump and the Pentagon share a concern that Islamic State and al Qaeda fighters who are not securely held — in the U.S. or elsewhere — could find their way back to the battlefield. Mr. Trump said that happened repeatedly under President Obama.

"These fighters that are able to depart these war zones, are able to take with them experiences and tactics that could potentially be applied in other places ... are the principal concerns," Gen. Joseph Votel, U.S. Central Command chief, told the House Armed Services Committee this month.

Human rights groups long opposed to Guantanamo also have been energized by Mr. Trump's announcement. Amnesty International in late February issued an "urgent action" alert to its chapters to launch a letter-writing campaign to Mr. Mattis and Secretary of State Rex W. Tillerson to encourage them not to send any more prisoners to the site.

Ms. White said the Defense Department is still staffing the effort to come up with a new detainee program, including mapping the future of Guantanamo.

HEADLINE	<b>03/15 Teen in Fla. killing was subject FBI probe</b>
SOURCE	<a href="https://www.cnn.com/2018/03/14/us/florida-teen-fatal-stabbing-muslim/index.html">https://www.cnn.com/2018/03/14/us/florida-teen-fatal-stabbing-muslim/index.html</a>
GIST	<p>(CNN)A Florida teenager accused of stabbing three people -- allegedly because two of them ridiculed his Muslim faith -- and who was the subject of an FBI-led investigation over his alleged activities on social media relating to terrorism, was about to be arrested on federal charges, local police reports show.</p> <p>Corey Johnson, of Jupiter, is accused of killing a boy celebrating his 13th birthday Monday at a sleepover and wounding a woman and one of her sons with a knife, Palm Beach Gardens interim police Chief Clint Shannon said.</p> <p>"This was not a random act of violence," Shannon said Tuesday. "All persons involved in this incident knew each other."</p> <p>The investigation -- which stretched back to at least January 2017 -- involves Johnson's alleged interest in ISIS, social media activity that included watching beheading videos, a threat Johnson allegedly made against a school in northern England and his reported fascination with dictators and extremist groups such as the Ku Klux Klan, according to reports compiled by Jupiter police.</p> <p>Palm Beach Gardens investigators said the boy's faith led to Monday's attacks.</p> <p>Investigators say in a probable cause affidavit that the 17-year-old suspect confessed that he stabbed his victims because one made fun of the way he prayed and kissed the ground and because another treated celebrities as if they were gods, something Johnson said Muslims don't condone.</p> <p>Johnson will face charges of first-degree murder and attempted murder, Shannon said. CNN called the Palm Beach County State Attorney's Office about Johnson's legal status but the office said "nothing is available for public disclosure."</p> <p>It was unclear whether Johnson had an attorney.</p> <p>Shannon said Johnson's alleged "violent tendencies" were the subject of a joint investigation, which included the FBI, Jupiter police and other local agencies.</p> <p>According to Jupiter police reports, an FBI agent told a Jupiter investigator on March 5 that federal authorities were preparing arrest affidavits for Johnson and that would come "in the next several weeks."</p> <p>The police reports say in January 2017 a Palm Beach County sheriff's detective contacted Jupiter police about Johnson, saying he had reached out to ISIS on the Internet and wanted to join the organization.</p> <p>The detective said Johnson had allegedly been watching ISIS videos online, including beheadings. In March 2017, Johnson denied affiliation with ISIS, police said.</p> <p>The Palm Beach County Sheriff's Office had gotten involved when the suspect's sister reported him to school resource officers, telling them he had hit her in the fall of 2016. She also told school officers that her brother was a white supremacist who liked Hitler and supported Oklahoma City bomber Timothy McVeigh, who killed 168 people in 1995.</p> <p>On January 12, 2017, authorities from the FBI, Jupiter police, Palm Beach County schools and the sheriff's office met to discuss Johnson. School police said Johnson had a history of making anti-Semitic and anti-homosexual remarks, according to the Jupiter police report.</p> <p>After the meeting, the FBI agents told police that they had been contacted by a foreign nation's counterintelligence agency and Johnson had threatened a high school in England. The threats caused 100 students to be removed from school because of fears of a possible attack.</p>

	<p>Jupiter police interviewed Johnson's mother and grandmother, the report says, on January 19, 2017. The grandparents told them Johnson had recently discovered religion and had been studying the Quran.</p> <p>The investigator relayed the information to the FBI and was told they were monitoring his social media accounts.</p> <p>At some point in the investigation, an FBI agent said the agency didn't want to pursue criminal charges and thought a "redirection approach" to the juvenile's behavior would be best, the Jupiter police report says.</p> <p>The FBI met with Johnson on March 29, 2017, and received his permission to mirror his computer so agents could see what he was looking at on the Internet.</p> <p>Johnson denied an affiliation to ISIS but said he was supportive of militant cleric Anwar al-Awlaki, who was killed by a US drone missile in Yemen in 2011, the report from the investigation says.</p> <p>The agents told him to stop ISIS-related social media posts, but the FBI said he did not do so and during the summer of 2017 they began to consider bringing charges against the teen, according to the documents.</p> <p>Authorities met in late February to talk about possible charges, but the assistant US attorney wanted more information from Johnson's social media accounts, the report says.</p> <p>About two weeks later, the FBI told Jupiter police it was working on the documents needed to arrest Johnson, according to the report. It is unclear what charges Johnson would have faced.</p> <p>CNN called the FBI office in Miami on Wednesday but didn't receive an immediate response.</p>

<b>HEADLINE</b>	<b>03/15 Russia extends pause in Syria enclave</b>
<b>SOURCE</b>	<a href="http://abcnews.go.com/International/wireStory/russia-extends-pause-syria-rebel-enclave-damascus-53763757?">http://abcnews.go.com/International/wireStory/russia-extends-pause-syria-rebel-enclave-damascus-53763757?</a>
<b>GIST</b>	<p>The Russian military says it has extended a "humanitarian pause" in fighting for two days in a part of Syria's embattled eastern Ghouta enclave, just outside of Damascus.</p> <p>The Russian Defense Ministry says the pause on Thursday and Friday is focused on the town of Douma. It claims the pause has allowed growing numbers of civilians to reach safety.</p> <p>Maj. Gen. Yuri Yevtushenko was quoted by the Interfax news agency as saying 131 people left the area through the humanitarian corridor on Wednesday.</p> <p>Maj. Gen. Vladimir Zolotukhin says some 100 people are expected to be evacuated on Thursday.</p> <p>Russia ordered the daily humanitarian pauses late last month, but few civilians have left. And activists said continued government shelling and airstrikes killed at least 20 civilians on Wednesday eastern Ghouta.</p>

<b>HEADLINE</b>	<b>03/14 US concern: NKorea aiding Syria</b>
<b>SOURCE</b>	<a href="https://www.newsmax.com/newsfront/us-north-korea-syria-chemical-weapons/2018/03/14/id/848691/">https://www.newsmax.com/newsfront/us-north-korea-syria-chemical-weapons/2018/03/14/id/848691/</a>
<b>GIST</b>	<p>The United States is monitoring indications that North Korea is nearing completion of a large underground military base in Syria that could be used for nuclear-related work, as well as helping the regime of Bashar Assad rebuild its chemical weapons factories, The Washington Free Beacon reported on Wednesday.</p> <p>Satellite images of the base available on the internet appear to indicate that only a small part of the facility</p>

is visible from above ground.

"We are aware of reports regarding possible DPRK [Democratic People's Republic of Korea] assistance to Syria to rebuild its chemical weapons capabilities," a State Department official told the Free Beacon. "We take these allegations very seriously, and we are working assiduously to prevent the Assad regime from obtaining material and equipment to support its chemical weapons program."

The official added that the Trump administration is making efforts to prevent Pyongyang from creating a more dangerous situation in Syria.

Last month a United Nations report by experts indicated that North Korea has been sending supplies to Syria that could be used to produce chemical weapons, according to CNN.

The U.N. study was released just a few days after the Assad regime was accused of using chlorine gas in an attack on Eastern Ghouta, which is near Damascus.

The report also stated that missile experts from Pyongyang visited Syria in 2016 and 2017, after the supplies had been sent and that scientists from North Korea may still be operating in Syrian military facilities.

These reports have heightened American concerns about Pyongyang at a time when the Trump administration is pursuing diplomatic negotiations with North Korea regarding its nuclear weapons program.

<b>HEADLINE</b>	<b>03/14 Focus on anti-Taliban efforts in Kabul</b>
<b>SOURCE</b>	<a href="http://abcnews.go.com/International/wireStory/top-us-commander-sees-peace-possibilities-afghanistan-53733912?cid=clicksource_76_4_article%20roll_articleroll_hed">http://abcnews.go.com/International/wireStory/top-us-commander-sees-peace-possibilities-afghanistan-53733912?cid=clicksource_76_4_article%20roll_articleroll_hed</a>
<b>GIST</b>	<p>The Afghan capital is now the main focus of the anti-Taliban fight, with U.S. special forces conducting raids in the sprawling city and additional American military advisers arriving to help beleaguered local police, the top U.S. commander in Afghanistan said Wednesday.</p> <p>"We've increased the number of special operations we're doing in and around the city to target the networks that are attacking the city," Gen. John Nicholson said in an interview with a small group of reporters. "So Kabul is our main effort right now."</p> <p>He said the Afghan government has replaced the top five police officials in each district inside Kabul as part of a plan to more effectively counter the militants.</p> <p>"This leadership element is key because what we found is many failures at the local level in terms of local security," he said, noting that the Taliban in recent months have managed to carry out large attacks with high numbers of civilian casualties.</p> <p>Nicholson said that some members of a newly arrived brigade of U.S. Army advisers are being assigned to mentoring Afghan police in Kabul as part of a comprehensive plan for improving security in a city of an estimated 5 million residents.</p> <p>"I'll just be very candid. We have a lot of work to do because this city has grown exponentially over the last 15 years" and in a haphazard way that left it vulnerable to movement by insurgents as well as criminal groups, Nicholson said.</p>

<b>HEADLINE</b>	<b>03/14 Suicide bombing east Pakistan kills 9</b>
<b>SOURCE</b>	<a href="http://abcnews.go.com/International/wireStory/bomb-kills-wounds-20-eastern-pakistan-53748466?cid=clicksource_76_4_article%20roll_articleroll_hed">http://abcnews.go.com/International/wireStory/bomb-kills-wounds-20-eastern-pakistan-53748466?cid=clicksource_76_4_article%20roll_articleroll_hed</a>
<b>GIST</b>	<p>A suspected suicide bombing near a police checkpoint killed five police and four bystanders and wounded 27 others on Wednesday near the city of Lahore in eastern Pakistan, police said.</p> <p>Haider Ashraf, Lahore police chief, said that evidence collected from the scene suggested it was a suicide attack. However, investigators and explosives experts were working to ascertain whether the bomb was planted near the checkpoint. He said he believes the police were targeted.</p> <p>The checkpoint is located near a religious group's main congregation place in Raiwind near Lahore, the capital of Punjab province.</p> <p>Ashraf said evidence at the scene suggested a motorcycle was used.</p> <p>Police said the blast took place after evening prayers and most members of the religious group had exited into the street, some making purchases nearby.</p> <p>Ashraf said many of the wounded were police and three were hospitalized in critical condition. Other wounded included members of the Islamic preaching group known as Tablighi Jamaat.</p> <p>The main country's Taliban group Tehrik-e-Taliban Pakistan claimed responsibility for the bombing, saying it was a suicide attack.</p>

<b>HEADLINE</b>	<b>03/14 Turkish shelling on enclave intensifies</b>
<b>SOURCE</b>	<a href="http://abcnews.go.com/International/wireStory/syrian-troops-encircle-town-embattled-rebel-enclave-53733623?cid=clicksource_76_4_article%20roll_articleroll_hed">http://abcnews.go.com/International/wireStory/syrian-troops-encircle-town-embattled-rebel-enclave-53733623?cid=clicksource_76_4_article%20roll_articleroll_hed</a>
<b>GIST</b>	<p>Turkish forces shelled the Kurdish-held northern Syrian town of Afrin on Wednesday killing at least seven people, Kurdish forces reported, as government shelling and airstrikes killed at least 20 civilians in the besieged eastern Ghouta enclave near the capital Damascus, activists said.</p> <p>Shells slammed into the heart of Afrin at dusk at intervals just second apart, forcing residents to rush for cover, according to video published by the People's Protection Units, known as the YPG. The group is being targeted by Turkey as a threat to its national security.</p> <p>A resident reported a worsening bread shortage as tens of thousands of civilians have flocked to the town seeking relief from the advancing forces, shelling, and airstrikes. Azad Mohamed said he waited in line at Afrin's only bakery for eight hours for a few loaves of bread. He said some residents were being turned away without any.</p> <p>Afrin is already suffering from water and power shortages after Turkish forces cut supplies from the countryside, according to the Britain-based Syrian Observatory for Human Rights. Turkey has bombed several bakeries since launching its offensive on Jan. 20, according to the Observatory.</p> <p>Thousands of residents had already fled Afrin as the Turkish troops approached, heading toward nearby areas controlled by the Syrian government, but hundreds of thousands more remain trapped in the town as Turkish forces and supporting Syrian opposition fighters move to completely encircle it.</p> <p>Turkish airstrikes killed at least eight pro-government militiamen, deployed to help the YPG, south of Afrin, according to the Kurdish military group.</p> <p>A Facebook page of the Nubl and Zahraa villages posted photographs of the eight killed fighters, who were from the villages.</p>

	There was no comment from the Turkish or Syrian government.

<b>HEADLINE</b>	<b>03/14 Nigeria president vows 'girls return'</b>
<b>SOURCE</b>	<a href="https://www.cnn.com/2018/03/14/africa/nigeria-president-visits-dapchi/index.html">https://www.cnn.com/2018/03/14/africa/nigeria-president-visits-dapchi/index.html</a>
<b>GIST</b>	<p>Lagos, Nigeria (CNN)Nigerian President Muhammadu Buhari vowed Wednesday his government will never give up until the schoolgirls kidnapped by Boko Haram militants go free.</p> <p>"There will be no rest till the last girl, whether from Chibok and (or) Dapchi, is released," Buhari said in a statement, referring to the towns where the terror group has struck in the past four years.</p> <p>The Nigerian leader spoke Wednesday while visiting the Government Girls Science Technical College in Dapchi, a town in Nigeria's Yobe state where Boko Haram abducted 110 schoolgirls in a February 19 raid. It marked his first trip there since last month's attack.</p> <p>In April 2014, Boko Haram sparked international outrage when it kidnapped 276 girls from a boarding school in Chibok, a town in Borno state. More than 100 of these girls remain in captivity, and their whereabouts are unknown.</p> <p>In Dapchi, Buhari met Wednesday with families of the missing girls, saying his administration has remained resolute in fighting terrorism and ensuring the students are returned safely.</p> <p>"We have re-equipped our armed forces, security and intelligence services," Buhari said, adding that Nigeria's air force is maintaining aerial surveillance of the area.</p> <p>Buhari said the government was investigating circumstances that led to the girls' abduction and warned that "any agency, person or group found to have been negligent or culpable" would be punished.</p> <p>He said he is confident that all the missing girls will be rescued or released and returned safely to their families.</p> <p>"The government, under my watch, will continue to maintain normalcy and ensure that incidents of this nature are stopped," Buhari said.</p>

<b>HEADLINE</b>	<b>03/15 Study: most bottled water 'contaminated'</b>
<b>SOURCE</b>	<a href="http://time.com/5200680/microplastic-water-bottle-orb-study/?xid=homepage">http://time.com/5200680/microplastic-water-bottle-orb-study/?xid=homepage</a>
<b>GIST</b>	<p>Drinking from a plastic water bottle likely means ingesting microplastic particles, a new study claims, prompting fresh concerns — and calls for scientific research — on the possible health implications of widespread plastics pollution.</p> <p>A study carried out on more than 250 water bottles sourced from 11 brands in nine different countries revealed that Microplastic contamination was nearly universal, found in more than 90% of the samples.</p> <p>The study, by journalism organization Orb Media and researchers at the State University of New York at Fredonia, found an average of 10.4 microplastic particles about the width of a human hair per liter. That's about twice the level of contamination discovered in the group's earlier study on the ubiquitous plastic contamination in tap water across the globe, with the highest rate found in the U.S.</p>

	<p>Previous studies have found that a large portion of the microplastic particles found in our oceans, lakes and rivers, as well as in fish stomachs, can be traced back to the washing of synthetic clothes.</p> <p>In the case of bottled water, Orb's new study indicated contamination was partly the result of plastic packaging, and partly the fault of the bottling process. The survey included brands like Aquafina, Dasani, Evian, Nestlé and San Pellegrino.</p> <p>It's unclear what effect, if any, this consumption of tiny bits of plastics has on human health. As much as 90% of ingested plastic could pass through a human body, but some of it may end up lodged in the gut, or traveling through the lymphatic system, according to research by the European Food Safety Authority.</p> <p>"We don't know all the chemicals in plastics, even... There's so many unknowns here," Jane Muncke, chief scientist at the Zurich-based Food Packaging Forum, told Orb.</p>

<b>HEADLINE</b>	<b>03/14 NKorea softening media approach?</b>
<b>SOURCE</b>	<a href="https://www.upi.com/Top_News/World-News/2018/03/14/North-Korea-skips-derogatory-media-references-to-Trump/8221521038343/?utm_source=fp&amp;utm_campaign=ts_tn_int&amp;utm_medium=4">https://www.upi.com/Top_News/World-News/2018/03/14/North-Korea-skips-derogatory-media-references-to-Trump/8221521038343/?utm_source=fp&amp;utm_campaign=ts_tn_int&amp;utm_medium=4</a>
<b>GIST</b>	<p>March 14 (UPI) -- North Korea may be softening its media approach toward U.S. President Donald Trump, only months after calling Trump a "dotard" amid a war of words with Washington that followed the country's sixth nuclear test last September.</p> <p>In a sign the Kim Jong Un regime is recognizing Trump's agreement to a summit with the North Korean leader, Korean Workers' Party newspaper Rodong Sinmun replaced derogatory terms, like "madman," with "American ruler," in an article published Tuesday that criticized U.S. tariffs against imported steel and aluminum.</p> <p>Calling the tariff measures "a trade war launched by the United States," the Rodong stated, "Recently the U.S. ruler announced a presidential decree, to place a 25 percent tariff on imported steel products and a 10 percent tariff on aluminum."</p> <p>Previous North Korean statements have referred to Trump not only as a madman but also a "lunatic."</p> <p>The pejoratives were omitted in an article that otherwise seemed typical of North Korean statements condemning U.S. policy.</p> <p>South Korean newspaper JoongAng Daily reported Wednesday North Korea has previously referred to Trump as U.S. or American ruler.</p> <p>But in the context of a news article disparaging U.S. policy, the careful avoidance of insulting Trump is a significant shift in language, the JoongAng said.</p> <p>North Korea media does not issue reports of major events ahead of time, according to defectors who spoke to UPI on Monday, and by Wednesday Pyongyang had yet to make references to the U.S.-North Korea planned for May.</p> <p>North Korea did issue a false statement on Wednesday, however, claiming South Koreans are seeking the withdrawal of U.S. forces from the peninsula.</p> <p>"What South Koreans want is an unconditional withdrawal of U.S. troops from the South, an unwelcome guest that poses a threat to peace and security on the Korean Peninsula," North Korea stated, according to Yonhap.</p> <p>Pyongyang also condemned ongoing talks on defense cost sharing between Seoul and Washington.</p>

<b>HEADLINE</b>	<b>03/15 Thurston Co. rescues hundreds animals</b>
<b>SOURCE</b>	<a href="http://q13fox.com/2018/03/14/hundreds-of-animals-rescued-in-thurston-county-its-one-of-the-worst-cases-ive-seen/">http://q13fox.com/2018/03/14/hundreds-of-animals-rescued-in-thurston-county-its-one-of-the-worst-cases-ive-seen/</a>
<b>GIST</b>	<p>THURSTON COUNTY, Wash. -- Calling it one of the worst cases of animal abuse they've ever seen, rescuers from Hooved Animal Rescue and Animal Services are now caring for 23 miniature horses and more than 100 other animals found living in horrific conditions in Tenino.</p> <p>That includes 10 goats, eight dogs, cats, rabbits, pet birds and more than 100 chickens. One dog was found lying dead on the property.</p> <p>The miniature horses were living in muck and mud, some knee-deep with no dry place or shelter to get out of the elements.</p> <p>"We had almost 150 that we moved to a secure location. When we put fresh water down for them, they just scrambled for that water. I don't know how long it has been since they had fresh water. It was heartbreaking to see that," said Kathy Bailey, president of Hooved Animal Rescue of Thurston County.</p> <p>Thurston County Animal Services plans to refer 19 charges for second-degree animal cruelty to the prosecutor's office, with more counts possible depending on the outcome of the full investigation.</p> <p>Q13 News is not naming the owners as they have not been formally charged in court with a crime.</p>

<b>HEADLINE</b>	<b>03/15 Canned soup fuels NKorea air force?</b>
<b>SOURCE</b>	<a href="http://abcnews.go.com/International/wireStory/canned-soup-fueling-north-koreas-air-force-53760439">http://abcnews.go.com/International/wireStory/canned-soup-fueling-north-koreas-air-force-53760439</a>
<b>GIST</b>	<p>Is North Korea's air force selling canned soup and taxi rides to upgrade its runways and airstrips?</p> <p>Amid the toughest sanctions ever against the North and its nuclear weapons program, there are some compelling reasons to believe the answer may well be yes. The story of how — and why — offers some insight into how North Korea's economy functions under Kim Jong Un.</p> <p>There's a fine line between North Korea's military and its private sector. To augment the already huge share of the country's limited national resources earmarked for defense, North Korean military units</p>

control everything from restaurants to farms to the flagship airline.

Air Koryo is far more than just an airline.

Over the past several years, it has also become one of the country's most recognizable consumer brands.

With only a dozen or so active-use aircraft operating on limited routes to China and the Russian Far East, it's hard to imagine it's ever been much of a money-maker for Pyongyang in the conventional, ticket-sales sort of way. But it is a symbol of national prestige and serves as a key lifeline to the outside world, transporting people and loads and loads of precious — and often not-very-closely-scrutinized — cargo.

Air Koryo runs at least one gas station and car wash in Pyongyang, has its own fleet of taxis and operates several retail shops, including a boutique at the airport. At the relatively upscale Potonggang Department Store in central Pyongyang, whole aisles are devoted to Air Koryo brand products, from crates of liquor to row after row of Coke-like sodas and a half dozen varieties of canned goods, including pheasant soup and peaches.

The airline's moves mirror broader shifts in the North Korean economy, which is still socialist and technically centrally controlled, but under Kim has shifted rapidly toward capitalist-style entrepreneurialism.

At the grassroots level, street vendors and small, bazaar-style markets are common. Higher up, state-run enterprises are adapting to become more productive and profitable — quite possibly because the regime, pinched by sanctions and shrinking trade possibilities, can't afford to prop them up anymore.

It's not just Air Koryo: Naegohyang, a major producer of cigarettes including the luxury "7.27" brand reportedly favored by Kim himself, has begun pushing its own line of sporting goods. They're sold alongside Nike, Adidas and other pricey imports at its flagship stores near Pyongyang's diplomatic quarter and in the exclusive Scientists' Street district, a neighborhood built to reward the country's scientists and technicians.

Air Koryo got a big boost with Kim's decision to completely overhaul the Pyongyang Sunan International Airport, which opened a shiny new terminal in 2015. The next year, Air Koryo started its taxi service. The Air Koryo soft drink line was launched in 2016. A gas station and car wash followed in 2017.

It's impossible to say how profitable those initiatives have been. But the swelling variety of the goods and their ready availability in the capital and elsewhere, is undeniable.

The appearance of a subsidiary company, Korea Hanggong Trading, at recent trade fairs suggests Air Koryo may be considering an export business, something of a stretch in the current political climate and sanctions aimed at cutting off the North's ability to fund its nuclear program.

Curtis Melvin, a researcher at the US-Korea Institute at Johns Hopkins University and editor of the North Korean Economy Watch blog, describes the airline as a "wholly owned subsidiary" of the air force, which is using its consumer goods business to help finance reconstruction of its own infrastructure, including runway renovations and new revetments at remote highway airfields.

Selling Air Koryo-labelled products made by military factories can help the air force boost revenues outside of its official budget allocations, Melvin said.

A new headquarters for Air Koryo has been built near the international airport, he noted.

"For many years, North Korea has tried to turn its subsidy-dependent state-owned enterprises into profitable operations that pay 'taxes,'" he said in an email to The Associated Press. "Maybe Air Koryo's time has simply come."

	Air Koryo's connection to the military is not immediately obvious and is often overlooked.

<b>HEADLINE</b>	<b>03/15 US: Iran naval forces halt 'provocations'</b>
<b>SOURCE</b>	<a href="http://abcnews.go.com/International/wireStory/us-military-official-iran-naval-forces-halt-provocations-53763358?">http://abcnews.go.com/International/wireStory/us-military-official-iran-naval-forces-halt-provocations-53763358?</a>
<b>GIST</b>	<p>Iranian naval forces appear to have deliberately halted their provocations of U.S. Navy ships in the Persian Gulf in recent months, a U.S. military official said Thursday.</p> <p>According to Navy Cmdr. William Urban, spokesman for U.S. Naval Forces Central Command, there have been no "unsafe and unprofessional" actions by Iranian naval forces in the Gulf since August 2017.</p> <p>Prior to that, Iranian vessels had periodically made high-speed approaches to U.S. ships that were considered dangerous provocations.</p> <p>Urban declined to speculate on the reason for the change.</p> <p>"It seems like they've absolutely made a conscious decision to give us more space," he said. "That is definitely a change in their behavior."</p> <p>Urban spoke to reporters traveling with U.S. Defense Secretary Jim Mattis, who stopped in Bahrain to meet with senior government officials and U.S. military leaders on his way back from Afghanistan.</p> <p>The last tense encounter between the U.S. Navy and Iranian forces in the Persian Gulf was recorded on Aug. 14, 2017, when an unarmed Iranian drone shadowed the USS Nimitz aircraft carrier at night and came close enough to F-18 fighter jets to put the lives of American pilots at risk, the Navy said at the time.</p> <p>For the first eight months of 2017, the Navy recorded 14 instances of what it describes as "unsafe and/or unprofessional" interactions with Iranians forces. It recorded 35 in 2016 and 23 in 2015.</p>
<a href="#">Return to Top</a>	

<b>HEADLINE</b>	<b>03/14 Mystery: USS Cyclops missing 100yrs</b>
<b>SOURCE</b>	<a href="http://www.foxnews.com/us/2018/03/14/more-than-100-years-later-great-mystery-vanished-uss-cyclops-remains-unsolved.html">http://www.foxnews.com/us/2018/03/14/more-than-100-years-later-great-mystery-vanished-uss-cyclops-remains-unsolved.html</a>
<b>GIST</b>	<p>One hundred years ago Wednesday morning, the USS Cyclops, a massive American World War I transport ship hailed as a "floating coal mine," should have been docked in the waters off Baltimore, fresh off a journey from Brazil.</p> <p>But the vessel – reported to be the Navy's biggest and fastest fuel ship at the time – and the 309 men onboard it never pulled into the Chesapeake Bay on March 13, 1918, and its whereabouts to this day remain unknown.</p> <p>"In terms of loss of life and size of ship, it's probably the last great mystery left unresolved," James Delgado, an underwater explorer, told the Baltimore Sun this week as recent discoveries of historical shipwrecks are renewing hopes amongst the scientific community of finally finding the Cyclops.</p> <p>The 540-foot long and 65-foot wide ship, outfitted with 50-caliber machine guns to help transport doctors and supplies to American Expeditionary Forces in France during The Great War, was last seen in Barbados on March 4, 1918.</p> <p>Built in Philadelphia eight years earlier, the USS Cyclops was capable of transporting 12,500 tons of coal and could lift two tons of it in single buckets along cables that ran along the ship, leading newspapers to</p>

call it a “floating coal mine,” according to the Baltimore Sun.

But on its final journey, the Cyclops was loaded up with 10,000 tons of manganese ore – a denser and heavier cargo – and stopped at the Caribbean island for nine days to resupply before vanishing into the horizon.

Those back in the U.S. began to take notice as day after day passed without any signs of the ship making its way to Maryland.

"COLLIER OVERDUE A MONTH," blared a headline in the New York Times on April 15, 1918, next to a list of the hundreds of passengers on board.

"Numerous ships sailed to locate the collier as she was thought to have been sunk by a German submarine," the Naval History and Heritage Command says on its website. "Her wreck has never been found, and the cause of her loss remains unknown."

Two months after the ship failed to reach Baltimore, Franklin D. Roosevelt, who then was an Assistant Navy Secretary, announced the Cyclops and all of its crew were presumed lost at sea, resulting in what remains the largest loss of life in Navy history unrelated to combat.

Nothing from the ship has been found. No wreckage, oil slicks or debris. Not even a distress call. And speculation has raged throughout history, leading some to claim wild theories involving the Bermuda Triangle, giant sea creatures and mutinies.

"One magazine, Literary Digest, speculated that a giant octopus rose from the sea, entwined the ship with its tentacles and dragged it to the bottom," the U.S. Naval History and Heritage Command said. "Another theory was that the ship suddenly turned turtle in a freak storm, trapping all hands inside."

Navy Secretary Josephus Daniels at the time added that "there has been no more baffling mystery in the annals of the Navy than the disappearance last March of the U.S.S. Cyclops."

"There has not been a trace of the vessel, and long-continued and vigilant search of the entire region proved utterly futile," the Baltimore Sun quoted him as saying.

But recent deep sea discoveries of American ships, such as the USS Lexington -- lost at the Battle of Coral Sea in 1942 and found last week -- and the USS Ward, found in the Philippines in December, both by an expedition crew led by Microsoft co-founder and philanthropist Paul Allen, are giving explorers hope the Cyclops could be next.

## Crime, Criminals

[Top of page](#)

HEADLINE	<b>03/14 Europe financial system vulnerable</b>
SOURCE	<a href="https://www.wsj.com/articles/the-dark-underbelly-of-europes-financial-system-1521065960">https://www.wsj.com/articles/the-dark-underbelly-of-europes-financial-system-1521065960</a>
GIST	<p>Something is rotten in the European financial system.</p> <p>The U.K.'s status as a global capital of money laundering is once again back in the spotlight following the attempted murder of former Russian spy Sergei Skripal and his daughter, which the British government has blamed on Russia. The scandal has revived concerns about the U.K.'s remarkable openness to the mysteriously amassed fortunes of Russian oligarchs with links to Russian President Vladimir Putin and the extraordinary role that U.K.-registered companies have played in some of the biggest money-laundering scandals that have surfaced in Europe in recent years.</p> <p>But the current focus on London follows a string of disturbing stories that has exposed the dark underbelly</p>

of the financial system across the continent.

Last October, the leading Maltese investigative journalist Daphne Caruana Galizia —who had been investigating high-level corruption in the country—was blown up in a car bomb. In February, Latvia’s third largest bank collapsed after the U.S. Treasury accused it of “institutionalized money laundering.” Last month, a Slovak investigative journalist and his girlfriend were shot dead in what police say is likely to have been revenge for his investigation into alleged links between top Slovak politicians and the Italian mafia.

These stories raise uncomfortable questions about the extent to which three eurozone countries have been captured by organized crime. The collapse of Latvia’s ABLV Bank is particularly alarming because it was supervised directly by the European Central Bank. The fact that ABLV’s alleged money laundering was exposed by a U.S. agency rather than a European authority raises doubts about the EU’s ability to police its own financial system. ECB President Mario Draghi this week acknowledged that the ECB had suffered reputational damage from the ABLV crisis. ABLV has said it isn’t guilty of money laundering.

The truth is that the EU is particularly vulnerable to organized crime and money laundering. It has created a single market and single financial system in which capital and people can move freely between member states. This has created healthy competition and reduced financing costs for European businesses and households.

Yet responsibility for policing that system lies squarely at the national level. The EU has introduced a single rule book to cover customer protection and anti-money laundering, but it is up to member states to transpose the rules into national law and it is up to domestic agencies to ensure that the law is enforced.

As in the EU migration crisis, where the inability of a few countries properly to manage their own borders exposed the entire EU to risks, so the inability of a few countries adequately to manage their financial systems exposes the entire European financial system to risk.

The EU is also vulnerable because of the opportunities it offers to money launderers. In some smaller EU countries, particularly in the east and south, oligarchs have been able to amass vast fortunes by exploiting their connections to the state, whether through privatizations, public money or public procurement.

At the same time, poorly supervised banking systems in EU neighboring countries have offered opportunities for theft: for example, more than \$1 billion was stolen from three Moldovan banks in 2014 and at least \$5.5 billion disappeared from Ukraine’s Privatbank in 2016. Typically this money then finds its way into the EU financial system, where it is legitimized and invested—often in British assets, which benefit from U.K. legal protections.

The EU has been trying to tackle these deficiencies in its system. The EU’s fourth anti-money-laundering directive came into force last summer—and a fifth is currently on its way, with new measures to close down loopholes exposed by the Panama Papers.

Much of the EU effort is focused on promoting transparency about the ultimate ownership of assets and ensuring that banks and finance professionals know their customers and report suspicious activity.

But while Brussels has powers to ensure that countries implement the rules—it is currently taking infringement action against 20 member states over the latest directive—it has no powers to ensure that they enforce them.

At the same time, strict protocols govern what information can be shared between institutions, limiting cross-border cooperation. Remarkably, the ECB has no powers to investigate money laundering.

GIST	<p>High on the Colorado Plateau in northwestern New Mexico, a dusty main road runs through the Pueblo of Zuni. Pull over to the side, and someone in threadbare clothing will soon approach your window holding out a mysterious little box. In Los Angeles, where I live, such an offering could only mean trouble, and you'd be wise to roll up the window and make a quick getaway. But here in the homeland of the Zuni people, it's safe to take a look. The box is lined with soft cloth, and in it you'll find an exquisite creation this person made with his own hands—a travertine animal carving, silver earrings inlaid with the Zuni sun face motif, a corn maiden pendant of carved shell.</p> <p>The Zuni people rely heavily on hard-won earnings from handmade jewelry and crafts. The tourism department of Zuni Pueblo estimates that 80 percent of working adults there make arts and crafts for sale. Yet it's getting harder and harder for them to make a living.</p> <p>For as long as the Zunis and other indigenous artisans have sold their crafts, they've been undercut by fakes—nonnatives posing as Indians to sell more of their work, factory made goods sold as handmade. But today's fakes include a virtual torrent of knockoffs cheaply manufactured overseas and masquerading as genuine Native made—baskets made in Pakistan sold as Navajo, beadwork made in China sold as Plains Indian, Hopi katsina dolls cranked out in the Philippines—none more profitable than counterfeit Indian jewelry.</p> <p>The insult isn't just financial. "Our arts and crafts give us a really concrete way to stay connected to our culture and our history," says Navajo jeweler Liz Wallace. "All this fake stuff feels like a very deep personal attack."</p> <p>But even though the rampant sale of counterfeits in the Southwest has been widely acknowledged for decades—and has ties to organized crime, according to affidavits by federal investigators—only recently has the U.S. government taken any serious action to shut down the major operators. Whether the crackdown has teeth will be tested in New Mexico on March 27, when Albuquerque jewelry dealer Nael Ali is sentenced for fraudulently selling imported jewelry as Native American made.</p> <p>Ali, the owner of several retail stores in Albuquerque's Old Town district, pleaded guilty on October 18, 2017, to misrepresenting as Native-made jewelry sourced from two family-run networks he said were supplying him with counterfeit jewelry made in the Philippines. These two networks make for the largest Native American art fraud conspiracy ever brought to light.</p> <p>Ali's sentencing is the first in the ongoing federal investigation called Operation Al Zuni, which began in March 2012, and is the most extensive ever conducted into Native American art fraud.</p> <p>The investigation was named Operation Al Zuni after Al Zuni Global Jewelry, a well-known business in Gallup, New Mexico, owned by Nashat Khalaf, a Palestinian immigrant and prominent Indian arts dealer. Al Zuni, which claims to be the "largest wholesaler of Indian jewelry serving the Southwest since 1977," has its storefront in Gallup but also sells at gem and jewelry trade shows where retailers from all over the country buy inventory.</p> <p>Misrepresenting arts and crafts, including jewelry, for sale as Native made when they're not is a federal crime under a law passed in 1935 called the Indian Arts and Crafts Act. The act provides for penalties of up to \$250,000 and five years in jail for first time offenders, but until now it has rarely been enforced. Federal law also requires that "Indian-style" products imported into the United States be permanently marked with the country of origin. That law too has been widely flouted.</p> <p>It has been estimated that the Native American arts and crafts industry brings in more than a billion in gross sales annually nationwide. And although many would say that not enough profits have ever reached the artists, the sale of handmade jewelry, baskets, pottery, carved figurines, beaded leather, and other crafts provide livelihoods for thousands of indigenous people.</p> <p>According to federal investigators, the two families running counterfeiting networks are both Palestinian,</p>

known to law enforcement as the Sterling Coalition and the Aysheh brothers. The Sterling Coalition, the larger of the two, operates an importing company in Albuquerque called Sterling Islands, which is owned by Nashat Khalaf's brother, Jawad Khalaf, and niece, Sheda Khalaf.

In affidavits filed in support of 18 search warrants executed in October of 2015, investigators name these and other members of the Khalaf family, and associates, as participants in a scheme to import and fraudulently sell counterfeit Native American jewelry manufactured in a factory in the Philippines called "Fashion Accessories 4 U." Jawad Khalaf and his son, Nader, have owned the factory since at least 2006. None of the Khalafs has been charged yet.

Law enforcement estimates that Sterling Islands has imported into the U.S. contraband jewelry worth \$11,800,000 in wholesale value between October 2010 and October 2015. According to court records, retail buyers and wholesalers would place orders for replicas of particular pieces of genuine jewelry and pick them up at Sterling Islands.

The ongoing prosecutions against the alleged fraudsters in New Mexico are sending shockwaves through the Indian arts and crafts industry. Nidal Abdeljawad of All Tribes Trading Post, an Indian arts store in the Pueblo of Zuni, claims that Nashat Khalaf's Al Zuni Global Jewelry supplies 90 percent of the retail stores in the U.S. that deal in Native art. "If this guy has to close his shop, it will be a disaster for the Native Americans," Abdeljawad says.

The four Aysheh brothers running the other alleged conspiracy—Imad, Nedal, Iyad, and Raed—were charged in February 2017. Their trial is scheduled for October of this year. None has yet entered a plea.

The sentencings of Nael Ali and Mohammad Manasra, who have confessed to knowingly dealing in fakes from both alleged networks, will test how tough New Mexico judges are willing to be. Manasra isn't facing prison time. But Ali, who pleaded guilty to a felony, faces up to 18 months in prison and could be the first person ever to go to jail for violating the Indian Arts and Crafts Act.

Ali's sentencing is scheduled for March 27 in Albuquerque, and prosecutors have requested that the sentencing of his co-defendant, Mohammad Manasra, be on the same day so that any Native American artisans who wish to be heard by the court won't have to travel twice.

<b>HEADLINE</b>	<b>03/14 Arrests Lakewood massage parlor operators</b>
<b>SOURCE</b>	<a href="http://www.thenewstribune.com/news/local/crime/article205217534.html">http://www.thenewstribune.com/news/local/crime/article205217534.html</a>
<b>GIST</b>	<p>Lakewood police arrested the proprietors of a massage parlor Tuesday after a two-year investigation into human trafficking, and seized two sets of body armor and an automatic weapon in the process, according to Pierce County prosecutors.</p> <p>Gig Harbor residents Guang Zheng, 45, and Dan Yu, 37, were arraigned Wednesday in Pierce County Superior Court. The Taiwanese nationals each face seven felony charges and seven misdemeanor charges of unlawful operation of a licensed business, and their bail was set at \$100,000 each.</p> <p>Prosecutors noted in charging documents that they reserve the right to add charges of promoting prostitution, human trafficking and leading organized crime, as well as felony firearms charges.</p> <p>Officers also served a search warrant at Zheng's and Yu's Gig Harbor home, where they found 17 firearms, silencers and other firearm accessories, and two sets of military-grade sets of body armor. Among the firearms is an automatic MP5 9mm gun. The two were arrested.</p>

<b>HEADLINE</b>	<b>03/14 Anti-money laundering controls 'failing'</b>
-----------------	---

SOURCE	<a href="https://www.reuters.com/article/bc-finreg-laundering-detecting/anti-money-laundering-controls-failing-to-detect-terrorists-cartels-and-sanctioned-states-idUSKCN1GP2NV">https://www.reuters.com/article/bc-finreg-laundering-detecting/anti-money-laundering-controls-failing-to-detect-terrorists-cartels-and-sanctioned-states-idUSKCN1GP2NV</a>
GIST	<p>NEW YORK (Thomson Reuters Regulatory Intelligence) - Regulators are holding financial institutions responsible for the real-life consequences of anti-money laundering (AML) failures. Firms must reconfigure their transaction monitoring programs to identify the emergent, multi-dimensional money laundering and terrorism finance methods that are defeating today's rules-based detection scenarios. Adopting an actor-centric hybrid threat finance (HTF) model can cut compliance costs, reduce risk, improve regulatory relations, and increase the usefulness of suspicious activity reports (SARs).</p> <p>Financial institutions are required by the Bank Secrecy Act (BSA) to detect and report customers engaged in money laundering, fraud, terrorist financing, and sanctions violations. With millions of customers, banks have fielded automated transaction monitoring systems, which use money laundering detection scenarios known as rules, to alert firms to certain customers for potential violations. Current industry detection logic has proven flawed and inefficient at identifying financial crime, resulting in record-breaking regulatory fines for financial institutions that fail to detect terrorists, drug cartels, and sanctioned state actors exploiting the U.S. financial system.</p> <p><b>BANKS FOCUSED ON SIMPLE TRANSACTIONAL BEHAVIORS</b></p> <p>Banks have spent billions on transaction monitoring systems that scrub their accounts for possible money laundering schemes. Detection rules are action-based and target suspicious transaction behaviors, such as excessive cash deposits, structured transactions intended to avoid government record-keeping thresholds, and rapid money movement through one bank to another.</p> <p>Customers who violate the detection rules trigger a system-generated alert, which is reviewed by an internal investigator. Despite decades and billions of dollars in industry investment, over 95 percent of system-generated alerts are closed as "false positives" in the first phase of review, with approximately 98 percent of alerts never culminating in a suspicious activity report (SAR).</p> <p>False positives cost the financial industry billions of dollars in wasted investigation time each year but more importantly, expose banks to steep fines and reputational damage for failing to identify bad actors involved in organized crime, sanctions evasion, or terrorism. Banks can reduce risk by reassessing their detection strategies, which presently lack the focus or sophistication to identify illicit source behavior.</p> <p><b>REGULATORS AND LAW ENFORCEMENT AGENCIES FOCUSED ON THREAT ACTORS</b></p> <p>Unlike fraud, money laundering stems from a precursor criminal act, like extortion, misappropriation of funds, or trafficking. As such, most global money laundering is perpetrated by transnational criminal organizations (TCOs), rather than individuals. Bank accounts used to launder illicit proceeds may be set up for personal or business use, but are most often used to cleanse funds on behalf of a threat organization. As one might imagine, different threat groups launder money in different ways.</p> <p>For this reason, law enforcement agencies (unlike banks) target money laundering purpose; meaning they consider both source criminal behavior (e.g. drug trafficking) and illicit organizational membership. When a U.S. law enforcement investigation into a crime syndicate or terrorist group identifies suspect bank accounts, the Treasury Department's Financial Crimes Enforcement Network (FinCEN) issues request for information notices (known as 314(a) forms) to those banks. The resulting case investigations often reveal that banks failed to detect or investigate these suspicious accounts, leading to increased regulatory scrutiny that opens the floodgates to fines and remediation.</p> <p><b>THE TOTAL COST OF FAILURE</b></p> <p>When bank AML programs neglect detection considerations for money laundering purpose and preceding illicit activities, they fail to identify bad actors exploiting the firm. Such failures have caused major institutions to incur hundreds of millions, or billions, in regulatory penalties and associated costs. Global and retail banks, money service businesses (MSB), digital currency exchanges, and casinos are all at risk</p>

of crushing enforcement actions. Financial institutions globally have been fined over \$321 billion by regulators since 2008 (PDF)(here), with \$42 billion in fines in 2016 alone.

Firms incur not only financial loss, but also reputational harm. Regulatory enforcement actions often feature specific language indicating that banks aided and abetted terrorism, drug trafficking, and human trafficking by failing to detect and report illicit activity. Financial institutions have learned the hard way that regulators hold them responsible for the broader outcome of AML failures, not just their program's procedures. Additionally, media outlets are quick to capitalize on negative news about large corporations, which can trigger a public relations disaster, especially when amplified by viral social media.

#### HEZBOLLAH AS HYBRID THREAT FINANCE EXAMPLE

Criminal cartels, hostile states, and terrorist groups today form hybrid threat alliances that extend through their finances. In some cases, one single group may be classified as a hybrid threat organization. The Lebanese Shiite Islamic group Hezbollah is one such example.

Designated by the U.S. State Department as a terrorist organization, Hezbollah is aligned with the Iranian Islamic Revolutionary Guard Corps (IRGC), Palestinian Hamas, Yemen's Houthi rebels, and nearly one-hundred Shiite militant groups in Iraq, Syria, Afghanistan, and elsewhere. These connected Shiite militant groups (Hamas is Sunni) collectively report to Iranian Supreme Leader Ali Khamenei. Iran is subject to a number of U.S. and international economic sanctions.

Hezbollah has recently become a hot-ticket political issue for U.S. Attorney General Jeff Sessions, who in January 2018 announced the Hezbollah Financing and Narcoterrorism Team (HTNT), an interagency team of prosecutors and investigators tasked with targeting Hezbollah's criminal and money laundering networks. This announcement followed revelations outlined in a media report alleging the Obama administration derailed a Drug Enforcement Administration (DEA) program targeting Hezbollah's trafficking operations, in order to secure the 2015 Iran nuclear deal.

Sessions has indicated that targeting Hezbollah's money laundering operations will be a primary focus of the current administration; an emphasis set to extend to bank regulators.

According to a December 2016 terrorism finance report by the U.S. House of Representatives Financial Services Committee, Hezbollah is a hybrid threat organization with a global footprint. With a structure that includes a Lebanese political party, conventional military, Iranian terrorist proxy force, and crime syndicate, Hezbollah is one of the world's most unique and versatile threat groups.

Hezbollah's crime syndicate is extremely multi-faceted, with long-held narcotics, human trafficking, and counterfeit goods underworld networks throughout the tri-border Area of Latin America, the Middle East, North/West Africa, and Asia.

Hezbollah maintains one of the most sophisticated and efficient trade-based money laundering (TBML) operations in the world, as evidenced by the 2012 Lebanese Canadian Bank laundering case. Their TBML tradecraft is so proficient that they hide drugs and cleanse narcotics proceeds by owning all parts of an elaborate global distribution network that falsifies the number of shipments and amount of products shipped, while concurrently hiding counterfeit goods among legitimate products.

This double-dipping smuggling and false invoicing operation provides the profit margin Hezbollah needs to purchase weapons, tactical kit, and to provide logistical support to their global insurgency operations in places like Iraq, Syria, and Yemen.

Hezbollah's business and money laundering tactics are extremely specific and unique (compared to other groups) and require seasoned intelligence practitioners to identify. They use virtually all banking products, including international wires, retail services, prepaid products, and money service businesses (MSBs) at different operational echelons, ranging from international/strategic to regional, domestic support companies (DSC), and at the tactical level.

Accordingly, this one organization presents separate enforcement and reputational risks at different levels of operation.

Like Hezbollah, other militant groups, drug trafficking organizations (DTOs), human trafficking outfits, and hostile nation-state actors are also competent money launderers. They too possess a hierarchical, multi-echelon global structure that utilizes numerous controls designed to subvert modern AML detection mechanisms. These groups hire professional money launderers with a detailed knowledge of compliance that could rival the AML experts working at banks.

Professional money launderers working for global threat organizations launder funds in ways that superficially appear entirely legitimate, failing to raise red flags through conventional detection strategies. Put simply, these professional criminals are unlikely to make amateur mistakes, such as structuring or rapid withdrawal of cash.

<b>HEADLINE</b>	<b>03/15 USCG record-breaking cocaine seizures</b>
<b>SOURCE</b>	<a href="https://www.hstoday.us/federal-pages/dhs/uscg/record-breaking-cocaine-seizures-by-uscg-amount-ton-day/">https://www.hstoday.us/federal-pages/dhs/uscg/record-breaking-cocaine-seizures-by-uscg-amount-ton-day/</a>
<b>GIST</b>	<p>The Coast Guard broke records last year with its interceptions of cocaine shipments, Commandant Adm. Paul Zukunft confirmed to Congress on Wednesday, amounting to 10 times the amount of the drug seized via land smuggling.</p> <p>Testifying before the House Transportation and Infrastructure Subcommittee on Coast Guard and Maritime Transportation, Zukunft noted among recent USCG accomplishments the seizure of more than 450,000 pounds of cocaine worth over \$6 billion wholesale.</p> <p>“These efforts often go unsung and we do not want that — we want the Coast Guard to be known for the valor of their servicemembers because we know they take risks every day in defense of this nation,” he added.</p> <p>U.S. Virgin Islands Del. Stacey Plaskett (D), noting “the majority of the illegal contraband ... is being interdicted in the eastern Pacific,” asked the commandant about the “significant drug smuggling” reaching the U.S. Virgin Islands and Puerto Rico from South America.</p> <p>The “flow rate” of drugs coming into Puerto Rico has “grown over 30 percent over the last two years,” Zukunft said.</p> <p>“It’s not staying in Puerto Rico; it’s being transshipped elsewhere to include the U.S. Virgin Islands and to include the continental United States as well. So we are repurposing resources. All this based on intelligence.”</p> <p>Plaskett asked if the USCG resources are “sufficient” to “address this increasing threat in the area.”</p> <p>“The U.S. will never get in front of this problem by itself, which is why we need allies... and as many ships as we put out there, what we soon run out of is surveillance aircraft, which is why we’re looking and experimenting with land-based UAS,” Zukunft replied. “We’ve done a couple prototypes out of Puerto Rico as well. We need to look at state-of-the-art sensors to put into these on-demand aerial systems, but the intelligence is good. We do not have enough ships or aircraft to be fully effective in this mission.”</p> <p>Another lawmaker noted to Zukunft that the Coast Guard’s haul was about 10 times the rate of cocaine smuggling seizures across U.S. land borders.</p> <p>“Yeah, where it’s most vulnerable is where it moves in bulk, and that moves predominantly in the</p>

	maritime domain, way beyond our border,” the commandant said.

<b>HEADLINE</b>	<b>03/15 Property crimes frustrate small businesses</b>
<b>SOURCE</b>	<a href="http://www.kiro7.com/news/local/property-crimes-continue-to-frustrate-seattles-small-businesses/716200898">http://www.kiro7.com/news/local/property-crimes-continue-to-frustrate-seattles-small-businesses/716200898</a>
<b>GIST</b>	<p>A small business owner in Seattle's Fremont neighborhood is fed up after repeated break-ins. Each time, burglars took off with thousands of dollars' worth of tools.</p> <p>Lebron Castleberry, who owns Castleberry Carpentry, said he was nearly done covering the loss from the</p>

first break-in when the second one happened Wednesday morning.

“Smash and grab, typical,” Castleberry said.

“They got \$2,500 worth of tools out of it.”

The burglary happened outside his home near NW 44th and 5th Street, close to the Fremont-Ballard line.

He said less than a year and a half ago, thieves broke into his other truck, with a much larger box van. That time, he lost \$20,000 worth of tools plus damages.

“I was in a real bad spot there,” he said.

Castleberry said he had to replace the steering column, after the thieves had tried to drill into the ignition area to try and steal the van.

It didn’t work, but the thieves did get away with most of his tools.

He said he was a just few thousand dollars away from replacing everything, when this latest burglary happened.

“You know? It’s like man, come on now!” he said.

A few weeks ago, KIRO7 talked with “Cheese Wizards,” a food truck based not far away in Ballard. That business said it has had \$15,000 worth of equipment stolen over the past few months.

The owner contacted the city council and Mayor Jenny Durkan’s office for help. Durkin said she will work closely with them to take action and "keep our small businesses safe.”

Castleberry isn’t hopeful.

“What are you going to do about it? Well I already know the answer. Nothing,” he said.

He’s been a business owner for 10 years in Seattle but said property crimes make it much harder to survive.

“My margins are slim, slim to none sometimes,” Castleberry said. “It is frustrating. There’s certainly a solution to it, but it’s not something you can just snap your fingers and make happen. It’s a systemic issue.”

For now, he has no plans to leave.

“Persistence is the thing, that’s the key. So that’s what I do, I endeavor to persevere,” he said.

Another case of tools and equipment stolen happened halfway down the block a couple of days ago at a new construction site.

Workers the site said thieves broke in and stole everything, even the extension cords.

The Seattle Police Department’s crime map shows in the preceding 24-hours, they received 118 calls to 911 for property crimes. The number does not include non-emergency calls.

Castleberry said he doesn’t know what the answer is, but believes part of the solution is more support for the Seattle Police Department.

<b>HEADLINE</b>	<b>03/15 'Threatening figure' in mosque bombing?</b>
<b>SOURCE</b>	<a href="http://abcnews.go.com/International/wireStory/alleged-leader-mosque-bombing-threatening-figure-53762691">http://abcnews.go.com/International/wireStory/alleged-leader-mosque-bombing-threatening-figure-53762691</a>
<b>GIST</b>	A former sheriff's deputy and purported ringleader in the bombing of a Minnesota mosque emerges in

court documents as a sometimes-threatening figure with anti-government views who also wrote books and attracted others into his shadowy group.

Michael Hari, 47, allegedly intended for the attack to scare Muslims into leaving the U.S. He and two associates were charged Tuesday with traveling from rural Clarence, Illinois, about 120 miles south of Chicago, to carry out the Aug. 5 pipe-bomb assault on the Dar Al-Farooq Islamic Center in Bloomington, Minnesota.

The explosion caused a damaging fire just as morning prayers were about to begin, but no one was hurt.

Even before his arrest, the self-described entrepreneur and watermelon farmer had a background that included working in law enforcement, floating ideas for a border wall with Mexico, fleeing with his daughters to Central America during a custody dispute and suing the federal government for allegedly cutting in on his food-safety business.

Court papers say Hari promised his accomplices \$18,000 for their participation in the mosque attack. But the complaints in the case do not portray him as well off, citing an informant who said Hari frequently stayed at his parents' home because he had no running water or electricity.

Hari describes some of his political views in a federal lawsuit he filed last month against the Department of Agriculture in which he complains it was cutting in on his food-safety certification business, Equicert.

"The People of the United States have rejected the Marxist doctrine that the government shall own the means of production," he wrote.

Under the screen name "Illinois Patriot," Hari posted 19 videos to YouTube in the past two months, most of them anti-government monologues delivered in a smooth, matter-of-fact voice. He wears a balaclava that obscures all but his eyes.

In a March 11 video titled "A Cry for Liberty," Hari criticizes the Justice Department as "a political animal," and calls the government "completely illegitimate."

He spoke to the Chicago Tribune last year for a story on Illinois residents seeking contracts to help build the border wall with Mexico championed by President Donald Trump. Hari said he had drafted a \$10 billion construction plan.

In addition to Hari, authorities charged Joe Morris, 22, and Michael McWhorter, 29. All three men live in Clarence, a community with a population of just a few dozen people encircled by farm fields. During a reporter's visit on Wednesday, at least four homes displayed Confederate flags — one flying high atop a flagpole in a front yard.

It isn't clear why the men targeted a mosque in Minnesota, though Al-Farooq had been in the headlines in recent years.

A group of young Minnesota men who were convicted of conspiring to travel to Syria to join the Islamic State Group had frequented the mosque. A young woman and at least one of the men who successfully got to Syria also worshipped there. Mosque leaders were never accused of any wrongdoing.

Hari fled the U.S. in the early 2000s to live in Mexico and then the small South American nation of Belize, taking his two teenage daughters with him for fear his ex-wife would gain custody, according to media reports of legal proceedings against him after he returned to the U.S. in 2006. He was convicted of child abduction and given probation.

The case put Hari on television.

Dr. Phil McGraw of the "Dr. Phil" talk show used an investigator to help track down Hari in Belize,

shortly before Hari came back to face charges of abducting his kids.

He wrote a handful of self-published books, including essays on religion. One was titled "Resurgence: More than Conquerors." Another was "Beowulf: A Novel of the Norsemen," which was listed as the first in a series.

Hari belonged to the Old German Baptist Brethren, a religious sect that shares some beliefs with the Amish, although its followers do not spurn modern technology, according to 2006 coverage of his trial published in the News-Gazette in Champaign, about 30 miles south of Clarence.

Some of Hari's neighbors told Champaign television station WCIA that Hari frightened them. One neighbor said Hari gave her "the heebie-jeebies."

His criminal record includes a charge of assaulting a neighbor who entered his property in July, when he allegedly held the man down and pointed a pellet gun at his head. Then in February, the Bureau of Alcohol, Tobacco, Firearms and Explosives received an anonymous tip about explosives on that neighbor's property.

Authorities found explosives, including a pipe bomb, which McWhorter said he, Hari and Morris planted to discredit the neighbor who reported the assault, according to court documents. Hari allegedly called in the phony tip.

In a March 10 video, just days before his arrest, Hari went to YouTube again and posted as "Illinois Patriot," saying FBI and local law enforcement investigators had "run wild" and were terrorizing Clarence.

He asked "freedom-loving people everywhere to come and help us."

Hari was raised near Champaign and went to graduate school in criminal justice at the University of Central Texas, now known as Texas A&M University-Central Texas, where he took courses in security-related construction, the Tribune reported.

The three men are also suspected in the attempted bombing of an abortion clinic on Nov. 7 in Champaign, according to the U.S. attorney's office in Springfield. In that attack, a pipe bomb was thrown inside but failed to go off.

A tip in December led authorities to investigate the three men, after a person sent the local sheriff photos of guns and bomb-making material inside Hari's parents' home. In January, a second informant told authorities that the men had carried out the mosque bombing and the failed clinic attack, according to the complaints.

<b>HEADLINE</b>	<b>03/14 Police: 2 shot in Birmingham hospital</b>
<b>SOURCE</b>	<a href="http://abcnews.go.com/US/shot-birmingham-hospital-suspect-police/story?">http://abcnews.go.com/US/shot-birmingham-hospital-suspect-police/story?</a>
<b>GIST</b>	<p>Two people were shot at a hospital in Birmingham, Alabama, this evening, police said.</p> <p>Police responded to a call of a reported shooting at UAB Highlands Hospital, Birmingham police Lt. Pete Williston said in a press conference. They located the two victims and then proceeded to search the hospital.</p> <p>The suspect was found dead of an apparent self-inflicted gunshot wound, Williston said.</p> <p>There is no additional threat to the public, police said.</p> <p>The victims were listed as being in critical condition.</p>

	Further details were not immediately available.

<b>HEADLINE</b>	<b>03/14 Austin: 370 suspicious package calls</b>
<b>SOURCE</b>	<a href="http://abcnews.go.com/US/austin-police-receive-370-calls-suspicious-packages-deadly/story?id=53747381&amp;cid=clicksource_81_4_article%20roll_articleroll_hed">http://abcnews.go.com/US/austin-police-receive-370-calls-suspicious-packages-deadly/story?id=53747381&amp;cid=clicksource_81_4_article%20roll_articleroll_hed</a>
<b>GIST</b>	<p>Austin, Texas, residents have taken police warnings to heart, phoning in hundreds of times about suspicious packages in the wake of this month's deadly bombings in the city.</p> <p>There have been more than 370 suspicious package calls as of 8:30 a.m. today, since the first explosion on March 2, according to police.</p> <p>The calls followed three package bombs that detonated at different residences in the city, killing two and injuring two others.</p> <p>The three bombings took place 11 days apart -- March 2 and then two this Monday -- but police have said that they believe they're related.</p> <p>Authorities have advised residents to exert caution and call authorities if they see any unexpected or suspicious packages near their homes.</p> <p>Police said they had received 265 calls Tuesday afternoon, followed by an additional 108 calls between then and this morning.</p> <p>Federal and local investigators have been working nonstop to find the suspect or suspects, Austin Police Chief Brian Manley told ABC News.</p> <p>"We are definitely dealing with a suspect or suspects who has some level of skill in making these types of devices," Manley said Tuesday.</p> <p>"The fact they have not only been able to build these bombs, but then travel with them to the target location without them exploding either during construction or during deployment, shows that they do have a certain level of sophistication and they know what they are doing," he said.</p>

**Information From Online Communities and Unclassified Sources/InFOCUS is a situational awareness report published daily by the Washington State Fusion Center.**

**If you no longer wish to receive this report, please submit an email to [intake@wsfc.wa.gov](mailto:intake@wsfc.wa.gov) and enter UNSUBSCRIBE InFOCUS in the Subject line.**

**DISCLAIMER - the articles highlighted within InFOCUS is for informational purposes only and do not necessarily reflect the views of the Washington State Fusion Center, the City of Seattle, the Seattle Police Department or the Washington State Patrol and have been included only for ease of reference and academic purposes.**

**FAIR USE Notice - All rights to these copyrighted items are reserved. Articles and graphics have been placed within for educational and discussion purposes only, in compliance**

with 'Fair Use' criteria established in Section 107 of the Copyright Act of 1976. The principle of 'Fair Use' was established as law by Section 107 of The Copyright Act of 1976. 'Fair Use' legally eliminates the need to obtain permission or pay royalties for the use of previously copyrighted materials if the purposes of display include 'criticism, comment, news reporting, teaching, scholarship, and research.' Section 107 establishes four criteria for determining whether the use of a work in any particular case qualifies as a 'fair use'. A work used does not necessarily have to satisfy all four criteria to qualify as an instance of 'fair use'. Rather, 'fair use' is determined by the overall extent to which the cited work does or does not substantially satisfy the criteria in their totality. If you wish to use copyrighted material for purposes of your own that go beyond 'fair use,' you must obtain permission from the copyright owner.
