An interesting video a friend sent me from Rush Medical Center in Chicago. A whimsical look at how virus can spread. Glow-in-the-dark material was used to show everything that was touched.

<https://www.youtube.com/watch?v=BV25KmvUNv4>

It's public. Maybe useful in training?

Peace, Dcwe

Trustee Dave Humphreys shared this video by Rush Medical Center in Chicago. Very instructive! I think everyone should watch this before grocery shopping next!

Eye opening! This is why physicians want everyone to stay home as much as possible.

I am looking forward to answering your emails remotely as our library building is closed due to covid-19.

Yes, that's true sandy. Even though you do everything, you still have to wash your hands. soap is the best.

Julie,

I am glad he shared this with you and you with us. The way you take the gloves off is important too there are a couple of YouTube videos on that too.

Thank you,

Kathy
