Ms. Sellie,

Since you have now verified that Mr Juzon is not forwarding emails as requested I will have to email said individuals myself.

I attempted good faith communications under the ordered plan and it's very clear that Mr. Juzon is either following orders to not communicate reasonably with me or is doing so on his own.

I would like any instructions for Mr. Juzon and his communication with me under the the communication plan.

Foia any emails for Mr Juzon with anyone concerning me?

Again this is clearly antagonistic and abusive behavior by the district to me.

This is exactly the behavior that caused my health to deteriorate previously however, thankfully I finally realized my health issues were suffering because of the district and I have taken the appropriate measures to keep from being further damaged by this behavior and the school district.

There is absolutely zero reason for the treatment I have received other than personal beliefs based on false information.

I have apologized for being wrong and my behavior from that however, it was directly caused by the school district intentionally withholding information from me for 5 years that would have alleviated the situation and that in and of itself is called gaslighting, abuse, and even psychological torture.

I was willing and I am still willing to do whatever is necessary to correct my mistakes and show that I am a decent, safe and reasonable individual. As I said I have taken the steps to ensure that the abusive treatment from the district no longer affects my health conditions.

So unless the district is intent on punishing me I am curious as to why they won't respond to me being polite and respectful which is what they said they always wanted?

Respectfully,

Dwayne Dodgen
