Subject : 💡 Bill Gates Is Backing This \$30 ██████████ ██████████ 💡

*A note from the Editor: Rich Retirement Recovery, we keep an eye out for favorable circumstances we believe will interest our readers. The following is one such message from one of our colleagues I think you'll appreciate.*

Hello Reader,

A new super battery tech is about to hit the market...

One that could make every lithium-ion battery obsolete.

This battery tech is so powerful that *Business Insider* has hailed it as the “death blow to traditional lithium-ion batteries.”

And *Popular Mechanics* has called it the EV “Holy Grail.”

Already some of the richest men in the world are getting in on this new super-battery tech....

Bill Gates... Jack Ma.... Richard Branson... Jeff Bezos... they're all getting a stake.

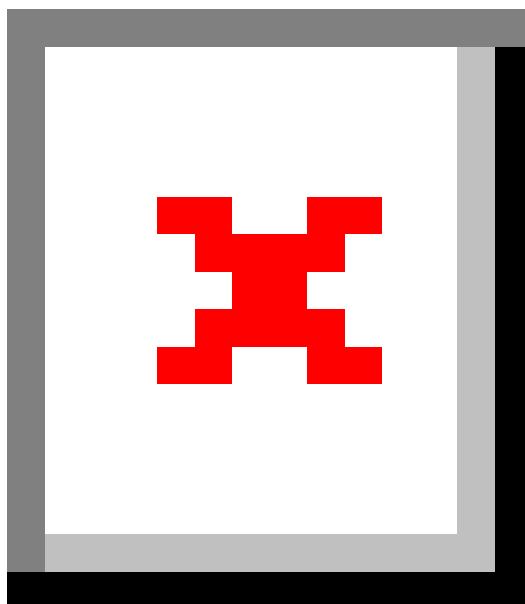

And everyday folks don't have to sit on the sidelines.

Today, people can buy a company working with this new super-battery technology for less than \$30.

I just released the name and ticker symbol of this company in a new video.
