Good morning Joanne,

Thank you for reaching out regarding assistance with chemical hygiene. Our service does not provide Chemical Hygiene Officers for schools because it does not meet the requirements of the OSHA Lab Standard. The Lab Standard requires employees of school districts and not consultants or outside contractors to be designated as CHO.

However, we do and can provide extensive consultation assistance for school district's chemical hygiene officers and science teachers including training, audits, chemical storage/inventory assistance.

I would be happy to discuss with you what your current needs may be and how we can help.

Best regards,

Hi Joanne,

I am not familiar with what exactly Needham and Questar do or have offered as a CHO service so I can't speak to whether or not they provide CHO's for school districts.

What I can tell you is that OSHA has spoken to this issue with a letter of interpretation. Essentially, they want to see that the employer designates a CHO who is an employee and who works in a laboratory where they may be exposed to hazardous chemicals in the course of his or her assignments. An outside consultant would not meet that criteria. OSHA has stated that outside consultants can provide assistance in the development and administration of the Chemical Hygiene Program.

I've provided the letter of interpretation for your convenience.

OSHA interpretation: 02/15/2008 - Whether employers may designate an outside consultant as the Chemical Hygiene Officer under 1910.1450.

Other than being a school district's designee as the CHO, we certainly can provide chemical hygiene assistance. This can include working with a CHO to carry out program elements.

Feel free to give me a call at 518-390-7502 to discuss in more detail.

Regards,

Real Asset Management database

Wednesday, January 16, 2019 at 2:42:15 PM Eastern Standard Time

to: jennifer.bennett@neric.org,

Jennifer and Amanda,

After much discussion, we are interested in moving forward with using the Real Asset Management database. Can you provide the exact prorated cost for 18/19? In addition, please confirm the following:

- The prorated cost above will include a district wide physical inventory.
- At no cost to the District, BOCES will reconcile the District's records to the database.

Please let us know what actions of the District are needed to initiate this process.

We look forward to working with you!

Thanks

Hi Eileen,

That's great news!

The prorated amount for the base service will be \$3125 (Feb-Jun). This will include Amanda's work to reconcile the database, as you stated, as well as a full physical audit which we can hopefully get to this school year. Attached is the billing agreement for the service. This will need to be signed and returned to me at your earliest convenience.

Tiffany can send over her spreadsheet to Amanda at any time and she will begin comparing it with the database. I've also shared with Amanda the original spreadsheet that Wayne provided to us back in 2014 when the database was originally built. This may help with the reconciliation process as well.

Looking forward to working with you!

Best,

Jennifer

Thanks for sending the attached. I would like to clarify that it is our understanding if the district wide physical inventory is not complete within the 18/19 school year, there will be no fee for it to be completed in the 2019/20 school year. Is that correct?

Hope you have a great weekend!

Yes, that's correct. You will still be charged the base fee for the year (\$7500) for 2019-20 come July 1, which will include a physical audit of one building or asset class sometime in the 19-20 school year.
