About

Over the last 30 years in the military I have planned, resourced, trained, and led diverse organizations in peacetime and combat operations in complex and politically sensitive environments. I synchronized all of the staff functions of a 2000 person headquarters charged with a global no-fail mission. I have purpose-built inter-agency and inter-governmental networks designed to counter and defeat complex global threat networks. I managed cutting edge programs that were under cost, under schedule, and out-performed expectations. I ensured work climates honored dignity and respect of all, remaining dedicated to the organizations' values and purpose, while consistently performing at a high level. I dutifully enforced the legal, moral, and ethical standards our nation expects of its military.

We author the reports required by Congress on these activities and answer congressional committee questions on resource allocation, within SOCOM's overall \$11 billion annual budget. We conduct due diligence to ensure that all subordinate commands adhere to all applicable fiscal law and US Code.

I managed and synchronized human resources, intelligence and information, operations, logistics, planning, communications, training and exercises, resourcing, and knowledge management for a global military command decisively engaged in protecting US National Security interests. I led a major staff restructure, maintaining and increasing operational performance, while developing creative solutions with less resources. I planned and executed all of the theater Special Operations conducted in Yemen for a year following the Arab Spring. I was responsible for coordinating all training and operations with Yemen's Minister of Defense, Minister of the Interior, Coast Guard Director, and Border Guard Commander. The Ambassador relied on me, as the senior military officer at the embassy during the Huthi attempt to seize the embassy after the attack in Benghazi, Libya, to coordinate all military relief or rescue efforts. I commanded all DoD forces protecting the embassy after the attack; preventing further attacks, and restoring calm.

I executed the Commander's intent, and assumed his duties when he was unable to fulfill them.
