Plan of Care List

Plan	Patient may be good candidate for pharmacogenetic testing and will recommend to do testing before prescribing medications and will prescribe medications based on this at next visit.
Date	03/08/2017
Plan	1
Date	03/08/2017
Plan	Assess medications regularly and adjust as necessary to optimize the patients benefits while limiting the side effects.
Date	03/08/2017
Plan	1
Date	03/08/2017

Plan zolpidem - 10 mg QHS prazosin - 1 mg QH
Date S Pristiq - 50 mg QD
03/23/2017

Plan ALL THE FOLLOWING MEDICATION
HAVE FAILED OR ARE
CONTRAINDICATED CELEXA, ZOLOFT
LEXAPRO EFFEXOR
Date 03/23/2017

Plan 1
Date 03/23/2017

Plan 1
Date 03/23/2017

Plan Assess medications regularly and adjust as necessary to optimize the patients benefits while limiting the side effects. Excessive anxiety and worry occurring more-days-than-not for at least 6 months, about a number of events or activities. Patient finds it difficult to control the worry. Patient has edginess or restlessness. Tiring easily; more fatigued than usual. Impaired concentration or feeling as though the mind goes blank. Irritability (which may or may not be observable to others). Increased muscle aches or soreness. Difficulty sleeping (due to trouble falling asleep or staying asleep, restlessness at night, or unsatisfying sleep). Has associated symptoms that have persisted for 6 months not related to any other AXIS I of medical problems.
Date 03/23/2017

Plan Prozac - 20 mg QD zolpidem - 10 mg QH
Date S prazosin - 1 mg QHS
